THE LIVES OF THE Moſt eminent PERSONS

Who have flouriſhed in

GREAT-BRITAIN and *IRELAND*,

From the earlieſt Ages down to the preſent Times.

W.

WAKE [William], Archbiſhop of Canterbury, was deſcended of an ancient noble family of Saxon original, which flouriſhed before the Conqueſt [*A*]; and was born in the year 1657, at Blandford in Dorſetſhire; in which town his Father, Mr William Wake, was a Gentleman of a conſiderable fortune (*a*), and having the ſatisfaction to ſee his ſon make a quick progreſs through all parts of ſchool learning, he carried him to Oxford, with a deſign to enter him of Trinity-college; but having a mind firſt to entertain himſelf and his ſon with a view of the univerſity, they accidentally met at Chriſt-church with Dean Fell, who being acquainted with the father, invited them both to his lodgings, and there prevailed with Mr Wake to admit his ſon of that college, upon a promiſe to give him a ſtudent's place (*b*). Accordingly he was admitted a ſtudent of Chriſt-church at the age of fifteen years, and matriculated in that univerſity February 28, 1672 (*c*). Having taken both his degrees in arts at the regular times (*d*), he fixed his choice upon divinity for his profeſſion, much againſt the mind of his father, who had laid out no leſs than ten thouſand pounds in the purchaſe of a place for him in the clothing buſineſs; but he ſacrificed that advantage to his inclination for the Church (*e*), and entered into holy orders: and not long afterwards, the Lord Viſcount Preſton, who was bred at the ſame college, being appointed by King Charles the Second to go Envoy Extraordinary

(*e*) MS memoirs in the hands of one of the family.

[*A*] *Deſcended from a Saxon family*, &c.] The name of Wake, or Wac, is in the roll of Battle-abbey; and Brompton ſays, ſome of the family being uneaſy under Harold, went to Normandy to invite the Conqueror into England, and came back with him: But Dr Patrick aſſures us it appears from the Regiſter of the church of Peterborough, that Herewold ſirnamed de Wake, or le Wake, was one of the brighteſt heroes of his age and country, whoſe memorable actions are ſet forth by Ingulphus. He was the laſt baron that ſubmitted to the Conqueror, who came to an agreement with him about the year 1076, by virtue of which he was entirely reſtored to his eſtates and honours. Part of his eſtates was the lordſhips of Brunne and Depyng, the latter of which continued in this family till the beginning of the laſt century. From this Herewold deſcended Baldwyn le Wake, who was a baron at the coronation of Richard I. and his grandſon Thomas Baron of Lydel in Northamptonſhire, being Conſtable of the Tower and Governor of Hertford Caſtle, married Blanch Plantagenet *, ſiſter of Henry Duke of Lancaſter; but having no iſſue by her, the inheritance paſſed with Thomas's ſiſter Margaret by marriage to Edmund of Woodſtock, youngeſt ſon of Edward I. and Earl of Kent, whoſe daughter Joan after the death of her two brothers became Counteſs of Kent. Joan was a lady of tranſcendent beauty, and on that account is famous in our annals by the name of THE FAIR MAID OF KENT. She married Sir Tho. Holland, ſecond ſon of Sir Roger Holland of Lancaſhire, one of the firſt Founders of the Garter, who hereupon had the titles of Earl of Kent and Baron Wake of Lydell. He was ſurvived by his beautiful Lady Joan, who afterwards, by a marriage with the renowned Black Prince, became mother to Richard II. For the reſt of the pedigree we ſhall refer ſuch as are curious in theſe matters to the book cited in the margin. It is ſufficient to our purpoſe to take notice, that in the courſe of time after many deſcents, John, ſon and heir of Richard Wake, marrying Elizabeth daughter and coheir of Sir Edward Gorges, Knt. had iſſue five ſons, John, Edward, Arthur, Robert, and William, from which laſt deſcended our Archbiſhop (1).

* The arms of Margaret Wake are impaled with thoſe of Plantagenet in a window in the church of Cheſterfield in Derbyſhire.

(1) Baronettage of England, vol. I. p. 465. & ſeq. edit. 1741.

to the Court of France, took Mr Wake for his Chaplain in that Embaſſy, in 1682 [B]. Here he quickly made a diſtinguiſhed figure in the learned world; and he had been abroad not above two years when he was applied to by a learned Biſhop at home to procure the collation of ſome valuable Greek MSS. of the New Teſtament at Paris, for the ſervice of a new intended edition of that Chriſtian Code in England [C]. Returning home with his Lordſhip in the beginning of K. James the Second's reign (f), he was preſently taken notice of for his excellent performances in the Pulpit, and was ſoon after choſen Preacher to the Honourable Society of Gray's-Inn (g). During his reſidence in France there fell out a ſingular incident, which was of particular ſervice to him with the friends of the Church of England: Mr Boſſuet, the learned Biſhop of Meaux, having wrote a book intituled *An Expoſition of the Doctrine of the Catholic Church*, a very curious copy of it came into the hands of Mr Wake [D], which furniſhed him with a remarkable opportunity of diſcovering the diſingenuous craft made uſe of by that Prelate

(f) He preached a Sermon at Paris on the 30th of January 1684-5, and another the ſame year at Grays-Inn, both inſerted in a volume of his ſermons, edit. 1690, 8vo.

(g) On the death of Dr Claget, the King ſent a meſſage to the Society, not to proceed to an election, till they heard from him; but they returned an anſwer, that they had already choſen Dr Wake. From the information of Mr Beauvoir of Canterbury.

[B] *He was Chaplain to Lord Viſcount Preſton.*] This nobleman was eldeſt ſon of Sir George Graham, of Netherſby in Cumberland, Bart. and educated, as well as his Chaplain, at Chriſt-church college in Oxford (2). In 1662, he was made a Baronet by creation, by the ſtile of Richard Graham, of Norton-Conyers in Com. Ebor. (3) and was created A.M. at Oxford by that title, March 24, 1666. He became afterwards a Burgeſs for Cockermouth in Cumberland in ſeveral parliaments, particularly in thoſe which began January 26, 1679, and the following one at Oxford, March 21, 1680. He was created Viſcount Preſton of Scotland by King Charles the Second, and ſent Envoy by King James the Second (4), as abovementioned. Biſhop Burnet tells us (5), that, while he was at Paris, he procured the ſuppreſſion of the Abbot Primes's Hiſtory of the Dutch War, printed there in 1682, and containing an account of the ſecret treaty between France and England, negotiated by Henrietta Dutcheſs of Orleans with her brother [King Charles the Second] at Dover, in May, 1669. Upon his return from France in the beginning of King James's reign, he was received into a high degree of favour by that Monarch, who had made him Secretary of State upon the removal of the Earl of Sunderland, October 21, 1688, and deſigned to advance him to an Engliſh peerage, with the title of Viſcount Preſton in Amounderneſs in Lancaſhire, but his patent had not paſſed the great ſeal before his Majeſty's abdication. Being engaged in a plot afterwards with Henry Earl of Clarendon, Dr Turner Biſhop of Ely, and others, in favour of King James, he was ſeized Decemb. 30, 1690, in a yacht going to France, with Mr John Aſheton, and Mr Elliot, and, on the 17th of January, tried at the Old Bailey for high treaſon, and condemned; but, after acting a very weak and irreſolute part, redeemed his life by ſome diſcoveries of importance (6), while his companion, Mr Aſheton, ſubmitted to death with great firmneſs and decency (†). His Lordſhip was a man of excellent parts and learning, and gave the public, in 1695, as the fruits of his retirement, a Tranſlation of *Boetius de conſolatione philoſophiæ*, illuſtrated with notes, and a life of the Author, who was diſtinguiſhed by being one of the laſt that made any figure in literature or genius in Italy, then ſinking into Barbariſm through the irruption of the Northern nations. This Lord Preſton had a younger brother, William, who was bred likewiſe at Chriſt-church, entered into Holy Orders, and was inſtalled Prebendary of Durham, Auguſt 26, 1684, and Dean of Carliſle on the death of Dr Muſgrave in April or May, 1686, and was diplomated D. D. at Oxford, June 4th following, being then Chaplain to the Princeſs Anne of Denmark (7). In 1704, he was removed to the Deanery of Bath and Wells from Carliſle, where he was ſucceeded by Dr Francis Atterbury, whoſe requeſt to antedate his reſignation of that Deanery he reſolutely refuſed to comply with, as not conſiſtent with his honour (8).

(8) A Letter from the South, by way of anſwer to a letter to a northern Divine.

[C] *He was employed in ſearching for MSS of the Greek New Teſtament*, &c.] For this purpoſe, he had a correſpondence with the Editor of that intended edition. We ſhall preſent the Reader with the copy of an original letter under his own hand to that Editor, communicated by the Reverend Mr R. Thoreſby, Rector of Stoke-Newington, Middleſex, E muſ. Thoreſb. as follows.

‘My Lord, July 5th, St. N. 1684.

‘According to your Lordſhip's commands in your letter incloſed to my Lord Preſton, I have made it my endeavour to get a ſight of the MS. I mentioned to your Lordſhip of the New Teſtament. I am aſſured by a perſon of great knowledge and underſtanding in theſe matters, that there is not only that, but 7 or 8 more in the ſame library of the late Monſ. Colbert, which I may have the collation of, and (that he will undertake to procure me leave) which never have been examined. I am aſſured by a very ingenious man, that the collation of the MS. of St Germain made by Monſr Gazon is very imperfect, ſo that if your Lordſhip has no other, I believe he will furniſh me with thoſe that are more exact. It is a MS. of about a 1000 years ſince, belonging to the monaſtery of St Genevieve, which Curcellæus had the uſe of, but having given no account (as was done in the Oxford collations) from what MSS he took his various lections, they are of little uſe. I have the promiſe of all theſe to be compared, and others to the number of 20 or more of good credit, which were never yet diſtinctly remarked. If your Lordſhip thinks it worth the while to ſtop your edition ſome few weeks, and will give me orders to make the expence for the doing it, which cannot be very great, they ſhall be procured by perſons whoſe learning and fidelitie may be relied on. If your Lordſhip deſires no others than of that MS. I firſt mentioned, and the review of that of St Germain, I hope in a fortnight's time, after I ſhall have the honour of receiving your commands, to diſpatch them to you. My Lord, I beg the continuance of your Lordſhip's favour to me, and your pardon for the trouble which is here preſumed to be given you, by,

‘My Lord,
‘Your Lordſhip's moſt humble
‘and moſt obedient ſon and ſervant,
‘WILL. WAKE.’

[D] *A copy of the Biſhop of Meaux's piece*, &c.] Mr Wake has prefixed a particular account of this copy to his anſwer, by way of preface; where he tells us (9), that the firſt deſign of M. De Meax's book was either to ſatisfy or ſeduce the late Mareſchal de Turenne; that he was not able to ſay how far it contributed thereto, but is willing to believe that the change which that honourable perſon made of his religion, was upon ſomewhat better grounds than a bare expoſition of the Roman faith; and that the Author ſupplied, either by his perſonal conferences with him, or by ſome other papers to us unknown, what was wanting to the firſt draught which he had ſeen of this. For he obſerves, that the manuſcript copy which then appeared, and for about four years together paſſed up and down through private hands with great applauſe, wanted all thoſe chapters of the Euchariſt, Tradition, the Authority of the Church and Pope, which now make up the moſt conſiderable part of it; and, in the

other

(†) Mr Aſheton, in a paper delivered at his execution, profeſſed his allegiance to be then ſtill due to King James; but declared his innocence as to the fact for which he was ſentenced to die. And his Anſwerer (ſuppoſed to be Dr Teniſon) allows there was no direct and plain proof of the hand writing in the treaſonable papers found upon him, as there was in the caſe of Lord Preſton, profeſſing his admiration that it was omitted. Upon the whole, there was certainly room for mercy, which probably would have been granted in a leſs critical and dangerous juncture. Anſwer to Mr Aſheton's paper, with the paper itſelf. Edit. 1730. a very thin 4to.

Prelate to diſguiſe and palliate ſome of the Romiſh doctrines. This he executed in a piece intituled, by way of contraſt to that of the French Biſhop, *An Expoſition of the Doctrine of the Church of England* [*E*], publiſhed in 1686, 4to. From this entrance he proceeded with ſpirit, and wrote ſeveral Tracts in the controverſy, which was carried on with diſtinguiſhed vigour during that reign againſt Popery [*F*]; and in the cloſe of it he publiſhed

other points which it handled, ſeemed ſo looſely and favourably to propoſe the opinions of the Church of Rome, that not only many undeſigning perſons of that communion were offended at it, but the Proteſtants, who ſaw it, generally believed, that Monſ. de Meaux durſt not publicly own, what in his Expoſition, *&c.* he privately pretended to be their doctrine; and the event ſhewed that they were not altogether miſtaken: For that, in the beginning of the year 1671, the *Expoſition* being, with great care, and after the conſideration of many years, reduced into the form in which we now ſee it, and, to ſecure all, fortified with the approbation of the Archbiſhop of Rheims, and nine other Biſhops, who profeſs, that having examined it with all the care which the importance of the matter required, they found it conformable with the doctrine of the Church, and as ſuch recommended it to the people which God had committed to their conduct, it was ſent to the preſs: That the impreſſion being finiſhed and juſt ready to come abroad, the Author, who deſired to appear with all the advantage to himſelf and his cauſe that was poſſible, ſent it to ſome of the Doctors of the Sorbonne, for their approbation, to be joined to that of the Biſhops, that ſo no authority, either ordinary or extraordinary, might be wanting to aſſert the doctrine contained in it to be ſo far from the ſuſpicion conceived of it by the Proteſtants, that it was truly, and without diſguiſe, Catholic, Apoſtolic, Roman. But to the great ſurprize of Monſ. de Meaux, and thoſe who had cried up his treatiſe before, the Doctors of Sorbonne, to whom it was communicated, inſtead of the approbation that was expected, confirmed what the Proteſtants had ſaid of it, and, as became their faculty, marked ſeveral of the moſt conſiderable parts of it, wherein the Expoſition, by the too great deſire of palliating, had abſolutely perverted the doctrine of the Church. Mr Wake continues to obſerve, That to prevent the open ſcandal which ſuch a cenſure might have cauſed, the whole Edition, with great induſtry and all the ſecrecy poſſible, was ſuppreſſed, the ſeveral places which the Doctors had mark'd changed, and the copy ſo ſpeedily ſent to the preſs again, that in the end of the ſame year another, much alter'd, was publicly expoſed, as the *Firſt Impreſſion* that had at all been made of it. Yet this could not be ſo privately carried on, but that it ſoon came to a public knowledge, inſomuch that ſome of the firſt anſwers that were made to it charged Monſ. de Meaux with this change. 'I don't hear, proceeds Mr Wake, 'that he has ever yet thought fit to deny the relation, 'either in the advertiſement prefixed to the later edi'tion of his book, wherein he replies to ſome other 'paſſages of the ſame treatiſe, or in any other vindica'tion. Whether it be that ſuch an imputation was not 'conſiderable enough to be taken notice of, or that it 'was too true to be denied, let the Reader judge. But 'certainly it appears to us not only to give a clear ac'count of the deſign and genius of the whole book, 'but to be a plain demonſtration, how improbable ſo'ever Mr de Meaux would repreſent it (10), that it is 'not impoſſible for a Biſhop of the Church of Rome 'either not to be ſufficiently inſtructed in his religion 'to know what is the doctrine of it, or not ſufficiently 'ſincere, to repreſent it without diſguiſe. And ſince a 'Copy of that very book, ſo marked, as has been ſaid, 'by the Doctors of the Sorbonne, is fallen into my 'hands, I ſhall gratify the Reader's curioſity with a 'particular view of the changes that have been made, 'that ſo he may judge whether of the two was the cauſe 'of thoſe great advances which the Author in that firſt 'edition had thought fit to make towards us.'

[*E*] *An Expoſition of the Doctrine of the Church of England, &c.*] This undertaking was prompted in general by ſome obſervations occaſionally made by our Author in a long converſe with the Papiſts of our own and other countries, in which he perceived, that, either through the ignorance or malice of their Inſtructors, they have generally very falſe and imperfect notions of our opinions in the points controverted between us. But the deſign of it was levelled particularly againſt Monſ. de Meaux, as the Author, to avoid the cenſure of a wrangler, chuſes to declare in theſe words. 'I have ſuffer'd myſelf to be perſuaded to 'purſue the method of Monſ. de Meaux's *Expoſition* 'as to the doctrine of the Church of England, and to 'oppoſe ſincerely, to what he pretends is the opinion 'of the Roman Church, that form of faith that is 'openly profeſſed and taught, without any diſguiſe 'or diſſimulation, among us (11).' This Tract, which is generally called *Wake's Catechiſm*, was anſwer'd in *A Vindication of the Biſhop of Condom's Expoſition of the doctrine of the Catholic church, in anſwer to a book intituled* An Expoſition of the doctrine of the church of England, &c. *with a Letter from the ſaid Biſhop*, 1686, 4to. To which our Author replied in a piece intituled *A Defence of the Expoſition of the doctrine of the church of England, againſt the exceptions of Monſ. de Meaux, late Biſhop of Condom, and his Vindicator*. Lond. 1686, 4to. This occaſioned *A Reply to the defence of the Expoſition of the doctrine of the church of England, being a ſober vindication of the Biſhop of Condom's Expoſition of the doctrine of the Catholic Church, with a ſecond Letter from the Biſhop of Meaux*, 1687, 4to. In anſwer to which, Mr Wake publiſhed *A ſecond defence of the Expoſition of the doctrine of the Church of England, againſt the new Exceptions of Monſ. de Meaux and his Vindicator*. Part i. *In which the account that hath been given of the* Biſhop of Meaux's Expoſition *is fully vindicated, the diſtinction of old and new Popery hiſtorically aſſerted, and the doctrine of the church of Rome in point of Image-worſhip more particularly conſidered*. Part ii. *In which the Romiſh doctrines concerning the nature and object of religious worſhip, of the Invocation of Saints and worſhip of Images, are conſidered, and the charge of Idolatry made good againſt thoſe of the church of Rome on account of them*. While the ſecond part of this treatiſe was writing, there came out *A Full Anſwer to the ſecond defence of the Expoſition of the doctrine of the church of England, in a Letter to the Defender* (12).

[*F*] *He publiſhed ſeveral other Tracts in the Romiſh Controverſy*.] The titles of theſe are as follows. (I.) *A diſcourſe of the holy Euchariſt, in the two great points, of the Real preſence, and the Adoration of the Hoſt; in anſwer to the two diſcourſes lately printed at Oxford, on this ſubject. To which is prefixed, a Large hiſtorical preface, relating to the ſame argument*. Lond. 1687, 4to. The piece he anſwers, is intituled, Two diſcourſes concerning the Adoration of our Bleſſed Saviour in the Euchariſt: The Firſt containing Animadverſions on the alterations of the Rubric in the common ſervice in the Common Prayer book of the church of England. The Second, The Catholics defence for the adoration of our Lord, as believed really and ſubſtantially preſent in the holy ſacrament of the Euchariſt. Oxon 1687. 4to. publiſhed in ann. 1686, by Mr Walker, without licenſing by the Vice-chancellor, by vertue of the King's licence granted to him to print certain books at Oxford. But A. C. [Arthur Charlet] of Trinity-college Oxford, obtaining by another hand the ſaid book, ſheet by ſheet, as it paſſed through the preſs, from L. Litchfield the Printer, Mr Wake's anſwer to it came out about a month after: Whereupon Mr Walker, *Maſter of the Univerſity-college*, ſet up a preſs in his own lodgings there (13). The Author of the Two diſcourſes, *&c.* was Mr Abraham Woodhead, who in his time made a diſtinguiſhed figure in the learned world, and being often occaſionally mentioned in the courſe of theſe memoirs (14), we ſhall take this opportunity of laying before the Reader ſome account of him, as follows. He was born at Maltham in the pariſh of Albonſbury, or Ambury, in Yorkſhire; enter'd, about ſixteen years of age, in 1624 at Univerſity-college Oxford, of which having taken his degrees in arts (15), he became a Fellow in 1633; enter'd into Holy Orders, and commenced Tutor (16). In 1641 he was elected one of the Proctors of the univerſity; which office he quitted, on account of ſome trouble in the execution of it given him by the Long Parliament (17); and thereupon travelled into France, firſt with Tho. Radcliffe, a Gentleman-Commoner of his houſe, ſon to Sir George Radcliffe (18), and afterwards with two others publiſhed *A State of the Controverſy*, in an account of the books that were written on both ſides during its continuance [*G*]. Under the guidance of ſuch principles, he took leave

(17) On account of the degree of B. D. being denied in the Congregation to Francis Cheynel, for two reaſons; one of which was, that he had preached againſt his Majeſty's declaration. Faſti Ox. Vol. II. col. 2. But this degree was conferred on him April 12, 1648, with the privilege of ſitting with thoſe in 1641. He was alſo one of the Parliamentary Viſitors, made Margaret Profeſſor of Divinity, and Preſident of St John's college. Ibid. col. 65. See more particular of him in Ath. Ox. Vol. II. col. 358, 359.

(18) Who wrote the life of the Earl of Strafforde. See that Earl's Article.

others of the ſame college. At length, ſettling for a time at Rome, he embraced the Romiſh religion, but ſo ſecretly, that the reaſon alledged for depriving him of his Fellowſhip by the parliamentary Viſitors, in 1648, was barely abſence and non-reſidence; ſo that in 1660, being returned home ſome time before (19), he was reſtored by the King's Commiſſioners, and continued in his college, till obtaining leave of abſence, with the allowance of twenty pounds a year, under a pretence of travelling again, he ſettled at Hogſden, or Hoxton, near London; living there ſo obſcurely, that no body, except his quondam pupil, Obadiah Walker, knew that he was not beyond ſea. In this retirement, he applied himſelf to the training up youths in the Romiſh faith, and wrote alſo divers books in defence thereof, by which he gained the character, among that party, of being the prime champion of England for their cauſe. Moſt of his pieces are contained in the following liſt. I. *A brief account of ancient church government, with a reflection on ſeveral writings of the Presbyterians touching that ſubject* (20). London, 1662, and 1685, in 4 parts, a thin 4to. This piece was aſcribed by ſome to one R. Holen, a Sorbonne Doctor, but the Oxford Antiquary claims it as certain for Mr Woodhead's; yet it is given to his pupil, Walker, by Biſhop Kennet (21). II. *The Guide in controverſies; or a rational account of the doctrines of the Roman Catholics concerning the eccleſiaſtical Guides in controverſies of religion.* London. The two firſt in 1666, and the other two in 1667, and there again, all together, with additions and ſome alterations, in 1673, all in 4to. Some reflections being thrown out in this book, part 3d, on the later writings of Proteſtants—particularly, of Archbiſhop Laud, and Dr Stillingfleet, on the ſame ſubject, gave riſe to a controverſy between the latter and Mr Woodhead, in which he wrote, III. *Dr Stillingfleet's principles conſidered.* Paris, 1671. 4to (22). IV. *Conſiderations on the Council of Trent, being the 5th diſcourſe concerning* The Guide in controverſies. 1671, 4to. V. *The Roman church's devotions.* And, VI. *The Roman doctrine of repentance and indulgence vindicated from Dr Stillingfleet's miſrepreſentations,* both in 1672, 8vo (23). VII. *Exercitations concerning the reſolution of faith,* &c. 1674, 4to. This is a defence of part of the third diſcourſe of the Guide, againſt Dr Stillingfleet's objections in his ſecond diſcourſe before mentioned, in vindication of the Proteſtant grounds. VIII. *An Appendix to the four diſcourſes concerning* The Guide in controverſies, *ſhewing the neceſſity and infallibility thereof, againſt ſome contrary Proteſtant principles.* 1675, 4to. *in two parts.* The ſecond of which contains *Annotations on Dr Stillingfleet's anſwer to N. O's* (24) *conſiderations of his principles.* Some Copies of this book have the following title: *A diſcourſe of the neceſſity of Church Guides for directing Chriſtians in neceſſary faith,* &c. IX. *Of the benefit of our Saviour Jeſus Chriſt to mankind.* Oxon. 1680, 4to. X. *An hiſtorical narration of the life and death of our Saviour Jeſus Chriſt; in two parts.* Oxon. 1685, 4to. publiſhed by Obadiah Walker. Before it went to the preſs, it was view'd by Dr Will. Jane, Regius Profeſſor of Divinity, who ſtruck out ſome things; but they were replaced by Walker, while it was in the preſs. This book raiſed a great clamour in the Univerſity, but was commended for a very good book by King James II. who ſaid, he wondered why any ſhould find fault with it. XI. *Two diſcourſes concerning the Adoration of our Bleſſed Saviour in the Euchariſt* (25), publiſhed, in 1686, by Mr Walker, by vertue of the King's licenſe granted to him, as before mentioned. XII. *Church-government. Part V. A relation of the Engliſh Reformation, and the lawfulneſs thereof examined by the Theſes delivered in the four former parts* (26). Oxon. 1687. XIII. *Two diſcourſes. The firſt concerning the ſpirit of Martin Luther, and the original of the Reformation. The ſecond concerning the celibacy of the clergy* (27). Oxon. 1687. XIV. *Pietas Romana & Pariſienſis; or a faithful relation of the ſeveral ſorts of charitable and pious works eminent in the cities of Rome and Paris.* Oxon. 1688. 4to. XV. *Of Faith neceſſary to ſalvation, and of the neceſſary ground of Faith ſalvifical.* Ibid. 1688. 4to. To which are annexed the four following Treatiſes. 1. *Of Infallibility.* 2. *Concerning the obligation of not profeſſing or acting againſt our judgment and conſcience. And whether the obedience of non contradiction only, or alſo of aſſent, be due to the decrees of Councils.* 3. *Concerning obedience to Eccleſiaſtical Governours, and Tryal of doctrine.* 4. *Concerning ſalvation poſſible to be had in a ſchiſmatical communion. And concerning the danger of living in, and the neceſſity of parting from, a known ſchiſmatical communion.* XVI. *A compendious diſcourſe of the Euchariſt,* &c. Oxon. 1688. 4to. To this diſcourſe are added two Appendixes. The firſt by Francis Nicolſon, M. A. of Univerſity-college, in two parts: The firſt intituled *The doctrine of the church of England concerning the ſubſtantial preſence and adoration of our bleſſed Saviour in the Euchariſt.* 2. *A Vindication of two diſcourſes on that ſubject,* &c. The ſecond by Obadiah Walker, Maſter of the ſaid college, intituled *Animadverſions upon the reply to the two diſcourſes concerning the adoration of our bleſſed Saviour in the holy Euchariſt.* XVII. *Motives to holy living; or heads for meditation, divided into conſiderations, counſels, and duties. Together with ſome forms of devotion in Litanies, Collects, Doxologies,* &c. Oxford, 1688. XVIII. *The Second and Third Treatiſes of the firſt part of Ancient church government.* Oxford, 1688, 4to. The ſecond treatiſe contains a diſcourſe of the ſucceſſion of the Clergy. Theſe laſt Eight were all publiſhed by Mr Walker, of which the laſt ſix were printed at a preſs ſet up in his lodgings in Univerſity college. Beſides theſe eighteen, Mr Woodhead left the following pieces unfiniſhed. 1. *Catholic Theſes.* 2. *Concerning images and idolatry.* 3. *Apocalyps paraphraſed.* 4. *A larger diſcourſe concerning Antichriſt.* All printed at Oxford, in 1689. 4to. This pious and learned Author died in his little cell at Hogſden, or Hoxton, and was buried in the church-yard of St Pancras, near London, about 22 paces diſtant from the chancel of the church, on the ſouth ſide (28). Over his grave was afterwards raiſed an altar monument of brick, cover'd with a thick plank of black marble, upon which was engraven, *A. W. obiit Maii 4. A. D. 1678. ætatis ſuæ LXX. Elegi abjectus eſſe in domo Dei, & manſi in ſolitudine, non quærens quod mihi utile eſt, ſed quod multis.* Dr Stillingfleet gives him the character of a moderate man; and comparing him with Serenus Creſſy, ſays, he is a mere pattern of meekneſs, writing pertinently, without the other's bitterneſs and paſſion (29).

To Dr Wake is alſo ſometimes aſcribed, (II.) The publication of *An hiſtorical treatiſe of Tranſubſtantiation, wherein is made appear, that, according to the principles of that Church, this doctrine cannot be an article of Faith.* 1687. 4to. This was written by a member of the Church of Rome. (III.) *A diſcourſe concerning the nature of Idolatry, in which a late Author's* (S. Parker, Biſhop of Oxford's) *true and only notion of Idolatry (in his reaſons for abrogating the Teſt) is conſidered and confuted.* London, 1688. 4to. (IV.) He is alſo ſaid to be the Author of a Preface prefixed to a tranſlation, by himſelf, from the French, of a piece intituled *Sure and honeſt means for the Converſion of all Hereticks,* &c. 1688. 4to. (V.) *Two diſcourſes of Purgatory and Prayer for the Dead.* 1688. 4to.

[G] *He publiſhed A State of the Controverſy,* &c.] This is an exact collection, ſo far as he was able to make it, of the controverſy on both ſides between the Divines of the Church of England and thoſe of Rome, and in that, ſays our Author, the victory of truth over error. 'Never certainly, continues he, was any cauſe more intirely baffled than the Popiſh at this time. Never was a controverſy more fully handled, and that in ſuch a manner as to inſtruct the meaneſt capacities, than this has been in theſe laſt years: Inſomuch that there is ſcarce a perſon among us ſo ignorant that is not able to make a ſtand againſt the rudeſt attacks of our adverſaries. Now our very *Footmen* eſteem themſelves (and I think have ſatisfied the world that they are not (30) miſtaken) an equal match for Jeſuits, *i. e.* for thoſe who would at leaſt be thought the moſt able men of their party, and dropt down from heaven on purpoſe to oppoſe the growth of the Proteſtant hereſy (31).' But this collection being found incompleat, another liſt of this famous controverſy was publiſhed by Dr Goe, Dean of Lincoln, and Prebendary of Weſtminſter; and Both theſe being found greatly ſhort of the full number; there has been a third made by Mr Francis Peck: Yet even this, vaſt

leave of his Patron, the Lord Preſton; and on the 1ſt of October 1688, he enter'd into a marriage with Mrs Etheldred Hovel, daughter and coheireſs of (*b*) Sir William Hovel, of Illington in the county of Norfolk, Knt. (*i*); and ſiding with the Revolution, he was after that event appointed Deputy Clerk of the Cloſet to King William and Qu. Mary, being created D. D. July 5th, 1689, at Oxford, where he had been, on the 20th of the preceding month, collated to a Canonry in his college of Chriſt-church, in the room of Dr Henry Aldrich, promoted to the Deanery of that church (*k*). In the ſame ſpirit of vindicating the doctrine and government of the Church of England againſt the adverſaries to its hierarchy, he publiſhed in 1693, *An Engliſh Verſion of the genuine Epiſtles of the Apoſtolical Fathers, with a Preliminary Diſcourſe concerning the right uſe of thoſe Fathers* [*H*]; and on July the 4th the following year, he was preſented to the Rectory of St James's Weſtminſter (*l*). Continuing under the influence of the ſame zeal for the eccleſiaſtical eſtabliſhment, he publiſhed, in 1697, *A Defence of the Power of Chriſtian Princes over their eccleſiaſtical Synods, with particular reſpect to the Convocations of the Clergy and Church of England* [*I*], being the firſt that appeared in print on the ſide of the Regal Authority in that remarkable diſpute (*m*), to which afterwards, having publiſhed a further

as it is, has been obſerved to be defective, eſpecially as to the titles of them, ſo teeming was the preſs upon this occaſion. However, there was printed many years ago, under the Eye of Dr Gibſon, late Biſhop of London, a ſelect collection of the beſt pieces, in 3 vols. folio, ſo that we may well enough ſpare the reſt.

[*H*] *He publiſhed an Engliſh verſion of the Apoſtolical Fathers*, &c.] The deſign of this piece being to ſtate and aſſert the juſt authority of theſe Fathers in reſpect to ſome not uncontested parts of the conſtitutional Church, as well as ſome opinions generally embraced therein, the Doctor claims that authority as giving a kind of ſanction thereto; and ſums it up in theſe particulars. 1. They were contemporary with the Apoſtles, and inſtructed by them. 2. They were men of an eminent character in the church, and therefore could not be ignorant of what was taught in it. 3. They were careful to preſerve the doctrine of Chriſt in its purity, and to oppoſe ſuch as went about to corrupt it. 4. They were men not only of a perfect piety, but of great courage and conſtancy, and therefore ſuch as cannot be ſuſpected to have had any deſign to prevaricate in this matter. 5. They were endued with a large portion of the Holy Spirit, and as ſuch could hardly err in what they delivered as the Goſpel of Chriſt. 6. Their writings were approved by the church in thoſe days, which could not be miſtaken in its approbation of them.—Both the undertaking and execution of the work met with entire approbation, and fixt his reputation among all parties well affected to the church, as a moſt able and worthy champion for it. A new edition was publiſhed, in 1710, 8vo. with ſuch corrections and improvements, as to render it, he ſays, almoſt a new work. But, ſince his death, Dr Conyers Middleton having, in his *Free Enquiry*, &c. urged the ſilence of theſe Fathers in confirmation of the general poſition of that treatiſe, he was charged by his Antagoniſts, Dodwell and Church, with a paſſage taken from Dr Wake's verſion of St Clement's Epiſtle to the Corinthians, as an inſtance of a plain reference to the miraculous gifts of that age. Hereupon Middleton, in a reply, grants, that the paſſage, as it is paraphraſed by our Author, does expreſsly aſſert the ſubſiſtence of the miraculous powers to that particular age; and owns that he wilfully omitted this teſtimony, even knowing it to be contrary to his aſſertion. ‘ But, ſays he, I can plead at the ſame time, with great truth, that the reaſons which moved me to omit it, were, firſt, the utter inſignificancy which it appeared to have, as to any proof or evidence relating to the quæſtion; and, ſecondly, a regard alſo for the character of that venerable Prelate, which made me unwilling to recall into public light a paraphraſe which I took to be unworthy of him, and, of all others that I had ever obſerved, to be the moſt palpably forced and dreſſed up, without any ground or colour from the Text, to ſerve the point which he was inculcating, concerning the continuance of the miraculous powers to the times of theſe Apoſtolic Fathers. In proceeding, he obſerves, that the words of the Text, as they ſtand in the Epiſtle clear of the paraphraſe, and tranſlated by the Archbiſhop himſelf, are, *Let a man be faithful, Let him be powerful in the utterance of knowledge, Let him be wiſe in making an exact judgment of words, Let him be pure in all his actions; but ſtill by how much the more he ſeems to be above others by reaſon of theſe things, by ſo much the more will it behove him to be humble-minded, and to ſeek what is profitable to all men, not his own advantage* (32). Thus ſtands the paſſage in the Archbiſhop's Engliſh edition of theſe Apoſtolical Fathers, where no man whoſe mind was not prepoſſeſſed with the ſame hypotheſis, or ſenſes dazzled with the authority of the Archbiſhop, could find a ſyllable which bears any ſort of reference to miraculous powers, or ſuggeſts the leaſt hint of the continuance of them to that Age. How is it then that the Archbiſhop has contrived to give ſuch a turn to it? why, not by any critical art, or grammatical rule, but by forcibly thruſting his own ſenſe into it, in a manner ſo groſs and arbitrary, as would fix the ſame ſenſe or any other upon any paſſage whatſoever. We ſee that the words of the Text, unparaphraſed, are clear of any miraculous ſenſe; for, in his preliminary diſcourſe to theſe very Epiſtles, he has ſhewn us how eaſily this may be performed on any proper occaſion by any commodious paraphraſe. The paſſage then, when opened and illuſtrated by the Archbiſhop's explanatory tranſlation, ſtands thus: *Let a man have faith*, that is, ſays the Archbiſhop, ſuch a faith by which he is able to work miracles: *Let him be powerful to utter knowledge*, that is, myſtical knowledge, ſays the Archbiſhop, for to that the expreſſion manifeſtly relates: *Let him be wiſe in diſcerning of ſpeeches*, for that was another gift, ſays the Archbiſhop, common to thoſe times: *Let him be pure in his actions: but ſtill by how much the more he ſeems to excell others*, that is, ſays the Archbiſhop, upon account of theſe extraordinary endowments, *ſo much the more will it behove him to be humble minded* (33). The recital of this paraphraſe, continues Middleton, will readily convince every man of ſenſe, that I could have no other reaſon for omitting it, than what I have already alledged; nor could I ever imagine, that in a controverſy of this kind, which can be determined only by the authentic facts and teſtimonies of antiquity, any one, who profeſſed to be ſearching into the real ground of it, would attempt to prove by a paraphraſe, what he could not prove from the Text, and inſtead of the poſitive teſtimony of an Apoſtolic Father, which his cauſe neceſſarily required, take up with the arbitrary comment of a modern Prelate (34).’

[*I*] *He was the firſt that engaged on the ſide of the royal authority*, &c.] In this book he undertakes to prove, that under the government of a Chriſtian Prince, the church has no other right to aſſemble in ſynods, but what it receives from the grant or expreſs conſent of ſuch a Prince, and conſequently no Perſon can be deputed to call a ſynod without his particular leave; and when the ſynod is aſſembled, they have no right to ſit, debate, diſpute, or determine upon any point of doctrine or diſcipline, any farther than is allowed by the Prince, who may ratify, annull or alter their proceedings as he thinks proper, and ſuſpend the execution of all or any of their conſtitutions and decrees. In ſhort, that the authority of their acts depends intirely and ſolely upon him; and that no ſynod can diſſolve themſelves without his permiſſion. The piece being ſomewhat imperfect, and ſome miſtakes ſlipt into it through haſte, did not eſcape the animadverſions of his Antagoniſts: Whereupon Dr Kennet, who engaged afterwards on the ſame ſide with our Author, publiſhed an apology for him on theſe terms, (35) obſerving, that his attempt upon this ſubject was

further *Vindication of the King's Supremacy againſt both Popiſh and Fanatical Oppoſers of it*, he alſo put an end by his unanſwerable treatiſe, *The State of the Church and Clergy of England*, &c. publiſhed in 1703, folio; being then Dean of Exeter, into which dignity he was inſtalled on the 16th of February 1701 *(n)*; whence he was promoted to the Biſhopric of Lincoln, July 28th, 1705, and conſecrated thereto the 21ſt of October following *(o)*. This promotion entitling him to a ſeat in the Houſe of Peers, he diſtinguiſhed himſelf by a long and learned ſpeech in favour of a comprehenſion with the Diſſenters [*K*], at the opening of the ſecond article of impeachment againſt the famous Dr Henry Sacheverell; in the cenſure and puniſhment of which Divine he zealouſly concurred with the Archbiſhop of Canterbury, Dr Tho. Teniſon, upon whoſe demiſe he was tranſlated to that Metropolitan See, in January 1715-16, being confirmed the 16th of that month *(p)*. As he had hitherto ſhewed himſelf on all occaſions a faithful Son of the Church, by ſtanding in defence of the eccleſiaſtical eſtabliſhment againſt the attempts made to ſet it off its genuine foundation with regard to the power of the Prince, by the unwarrantable exceſſive zeal of one party; ſo being now raiſed to the head of the Church, he watched over it with a paternal care for its welfare, againſt the no leſs exceſſive zeal of another party, labouring to weaken its legally eſtabliſhed authority with regard to the People. It was in this view that he both voted and ſpoke in the Houſe of Lords againſt the repeal of the Schiſm and Conformity Bill in *(q)* 1718 [*L*], and that

---

the more difficult, becauſe no writer before him had profeſſedly treated of theſe matters. And truly, continues Kennet, ſince our church was reformed, no occaſion had been given, no diſputing among churchmen with the King's Supremacy as by law eſtabliſhed, from 25 Henry VIII. to the 9 William III. For this reaſon the Doctor had a better title to civil uſage, becauſe he was a firſt adventurer, and made diſcoveries of a world unknown, as it were, before. That he had a further right to ſome allowance, in that he owned himſelf in haſte (36), and ſpoke modeſtly of what he had done. He offers it as *a rude haſty performance, at moſt but an imperfect eſſay, and the firſt lines of a draught, ſhews rather what he deſigned, than what he was able in any tolerable manner to finiſh* (37); with many other acknowledgments ingenuous and free; not inſulting his Adverſary, nor catching at a word for triumph, but with a good eaſy air approving himſelf a writer of ſome breeding and ſome conſcience, for an example to his Anſwerers and Accuſers.

[*K*] *His ſpeech in favour of a comprehenſion*, &c.] The moſt intereſting paſſage of this ſpeech has been already cited under the article of Archbiſhop Sancroft (38), the proſecuting and compleating of whoſe particular plan of a comprehenſion, it was our Author's intention in this ſpeech to recommend, and which he juſtly calls the firſt concerted deſign of that Project, the ſeveral attempts that were made in it before by Judge Hales and Dr Tillotſon, in the reign of King Charles II. being found impracticable, before any regular plan, ſuch as that of Sancroft's, was drawn for carrying it into execution. Upon the whole, it muſt be obſerved carefully, that our Author here concurs with that plan, as aiming to gain the more moderate Diſſenters, who had joined with the church in the Popiſh controverſy, and who had then expreſſed an unuſual readineſs to come into it; and that, nevertheleſs, no conceſſions were to be made, that might do any prejudice thereto.

[*L*] *He ſpoke, in* 1718, *againſt the repeal of the ſchiſm and conformity Bill.*] The Bill for this purpoſe was brought into the Houſe of Lords by the then Earl *Stanhope*, under the title of *a Bill for ſtrengthening the Proteſtant Intereſt*. Our Archbiſhop, in his ſpeech againſt it, obſerved, among other things, "that the "Acts, which by this Bill were to be repealed, were "the main bulwark and ſupporters of the eſtabliſhed "church: That he had all imaginable tenderneſs for "all the well meaning conſcientious diſſenters, but "he could not forbear ſaying that ſome amongſt "them made a wrong uſe of the favour and indulgence that was ſhewn them upon the Revolution, "though they had the leaſt ſhare in that event." His Grace added in the cloſe of his ſpeech, "that as to "the *Act againſt Schiſm*, though it may carry a face "of ſeverity, yet it ſeem'd needleſs to make a law to "repeal it, ſince no advantage had been taken of it "againſt the Diſſenters ever ſince it was made." This oppoſition of his Grace to the repeal of this bill made a great noiſe, and was objected to him, as proceeding from a notoriouſly unbecoming inconſiſtent conduct in the change of principles, which had led him, while Biſhop of Lincoln, to vote and proteſt againſt paſſing the Schiſm bill, in 1714 (39). To which, in juſtice to our Prelate's memory, it ought to be obſerved, that whoever looks into the ſtate of the nation in thoſe times, will too plainly ſee, that both the enacting and repeal of the Schiſm bill were purely owing to the heat of ſuch a zeal, as was ſet on fire by the violent colliſion of party rage, without any real concern for the true intereſt or welfare of Religion or the church, which are too often made a dupe to private reſentments in ſuch unhappy conjunctures. In theſe caſes, the man that acts ſteadily and uniformly upon principle, will find himſelf frequently under the neceſſity of ſiding with different parties, as our Metropolitan is obſerved to do in the preſent caſe. Neither is it any impeachment of that ſteadineſs, if we ſhould grant that his Grace changed his opinion concerning the beſt way to win over the Diſſenters, and agreed with his Brother Metropolitan of York *, in reſpect to the danger of truſting the Diſſenters, urging, *That the Acts againſt occaſional conformity and ſchiſm were proper means of ſelf defence and preſervation, and that the Diſſenters were never to be gained by indulgence*. The Earl of Nottingham, who appeared on the ſame ſide with Dr Wake, being charged, in the ſame debate, by Dr Gibſon, then Biſhop of London, with promoting a *comprehenſion* when Secretary of State, thought it a ſufficient juſtification of himſelf therein to alledge, that *in thoſe days he was but a young man, and had ſince found the Diſſenters were obſtinate, never to be ſatisfied*. Dr Ben. Hoadly, then Biſhop of Bangor, likewiſe, who ſpoke on the other ſide in this memorable debate, being charged from a paſſage in his *Perſuaſive to Lay Conformity*, with having, ſince that book was written, embraced and maintained other principles, anſwered, that 'he was ſo far from having 'altered his principles, that, both before and after he 'had been promoted to that ſtation he held in the 'church, he had endeavoured to bring over the Diſſenters to it; but that he ever was of opinion that gentle meaſures were the moſt effectual for that purpoſe.' So far was not *abſolutely* irreconcileable to his Metropolitan's way of thinking, ſince there are manifeſtly different degrees of gentle meaſures: but, in proceeding to unfold his ſentiments, he ſpoke out plainly and fully as follows. He endeavoured to ſhew at large, 'the unreaſonableneſs and ill policy of impoſing religious teſts as a qualification for civil and military 'employments, as abridging men of their natural 'rights, depriving the ſtate of the ſervice of many of 'its beſt ſubjects, and expoſing its moſt ſacred inſtitutions and ordinances to be abuſed by profane and irreligious perſons.' He alſo laboured to prove, that the '*occaſional* and *ſchiſm* Acts were in effect perſecuting 'laws; and that by admitting the examples of *ſelf-defence* and *ſelf-preſervation* in matters of religion, 'all the perſecutions of the Heathens againſt the 'Chriſtians, and even the Popiſh inquiſition, might 'be juſtified. As to the power, of which ſome Clergymen appeared ſo fond and ſo jealous, he owned 'that the deſire of power and riches is natural to all 'men; but that he had learned both from reaſon and 'the goſpel, that this deſire muſt keep within due 'bounds, and not intrench upon the rights and liberties

(39) Journals, &c. of the houſe of Lords for that year.

* Sir William Dawes, Bart.

that he oppoſed the deſign entered into by ſome powerful perſons the year following to repeal the Corporation and Teſt Acts [*M*]. In the ſame ſpirit, he joined the Earl of Nottingham in preparing and bringing a Bill into Parliament in 1721, for requiring a new Teſt againſt the Arian hereſy [*N*]. At the ſame time we ſee him not unmindful to diſcharge other duties of his high Poſt. It was in this year, 1721, that an Appeal being lodged with him as Viſitor in right of his See of All Souls college in Oxford, he made a decree eſtabliſhing the abſolute claim by the ſtatutes of the Founder's kinſmen, tho' related in any the moſt diſtant degree whatſoever, to be elected Fellows of that Society *(r)* [*O*]. However, this incident did not in any wiſe interrupt his care for the more important concerns of the Church: Whilſt he was labouring to preſerve the purity and dignity of it from the various attempts, as has been ſaid, of its barefaced as well as its maſked adverſaries to undermine it at home, we find him exerting his ſkill and wiſdom to remove the errors and prejudices concerning its doctrine and government among the nations abroad; and foreigners had a ſhare in his univerſal catholic affection. Some mutual civilities having paſſed in 1717 between his Grace and Lewis Ellis Dupin, Doctor of Sorbonne at Paris, as men of letters, by the means of the reverend Mr Beauvoir, then Chaplain to Lord Stair, the Engliſh Ambaſſador at that court; Dupin wrote to the Archbiſhop a Latin letter in January 1717-18 [*P*], wherein having congratulated the Church of England in the enjoyment of ſo eminent a Prelate for its Metropolitan,

‘ ties of our Fellow-creatures and Countrymen (40).’ This was flying full in the face of our Archbiſhop, who, 'twas well known, had before expreſſed his diſpleaſure at the doctrine advanced by my Lord of Bangor, in his famous Sermon concerning the *nature of Chriſt's kingdom*, preached before the Houſe of Lords the preceding year, as aiming to ſtrip the Church of ſome of its juſt rights and powers, of which his Grace was by his poſt the conſtituted Guardian. He was not, therefore, wanting to exert himſelf warmly in the defence of thoſe rights, as may be ſeen in the enſuing Remark.

[*M*] *He oppoſed the deſign of repealing the Corporation and Teſt Acts.*] Dr Hoadly was at the bottom of this deſign; and his famous ſermon laſt cited was obſerved to be preached and printed in order to prepare and pave the way for its execution. His Grace, therefore, finding the deſign to be countenanced, encouraged, and promoted by Powerful Perſons in the miniſtry, judged it beſt, after their example, to declare his utter abhorrence and indignation againſt it in an indirect way, without profeſſedly engaging in a controverſy occaſioned by Party malevolence. In this judgment, he wrote a Latin letter, addreſſed to the Superintendant of Zurich in Switzerland, and which has been publiſhed in a piece printed there, under the title of *Oratio hiſtorica de beneficiis in eccleſiam Tigurinam collatis*, containing in ſubſtance as follows *: ‘ Some of our Biſhops, ſays he, are labouring to pull down the church in which they miniſter, and to introduce ſuch licentiouſneſs, as would overthrow the grace of the Holy Spirit, the divinity of Chriſt, and all other fundamental Articles of our religion. That it is to be lamented by all that theſe *grievous wolves* are not only not driven away from the ſheepfold, but are received within the walls of the Church; and what is more, preferred to its honours, its offices, and its government! That the miniſtry, who have nothing at heart but their own power, and the preſervation of their places, becauſe they think by tolerating and promoting theſe men, they ſhall ingratiate themſelves with the Populace, are intirely careleſs what becomes of the church, of the faith, or of religion; in ſhort, of Jeſus Chriſt himſelf, and of his truth—That he ſhould think himſelf guilty of betraying the Faith, if he did not, whenever opportunity ſerved, anathematize theſe Heretics and Enemies of our religion.’ This letter gave birth to two ſevere pamphlets. 1. *A ſhort Vindication of the Lord Archbiſhop from the imputation of being the Author of a Letter lately printed at* Zurich, *concerning the ſtate of religion in England.* Lond. 1719. 8vo. 2. *A Letter to the Lord Archbiſhop, proving that his Grace cannot be the Author of the Letter to an eminent Presbyterian Clergyman in Swiſſerland, in which the preſent ſtate of religion in England is blackened and expoſed, and the preſent miniſtry miſrepreſented and traduced.* Lond. 1719. 8vo. This laſt piece was aſcribed to Mr Gordon, Author of *The Independent Whig*, who, from ſome paſſages in his Grace's *Defence of the Expoſition of the Doctrine of the Church of England*, p. 80, 81. and others in a Sermon preached by him 5th Nov. 1699, p. 12, 13. 15. compared with the forementioned Letter, would infer a change of his principles; but with the like ill ſucceſs as Mr Whiſton had, for want of diſtinguiſhing between a licentious and malevolent, and a liberal, ingenuous inquiry, as is abundantly ſhewn in a piece publiſhed in anſwer to the two former, under the title of *A Vindication of the Orthodox Clergy, in anſwer to two ſcurrilous libels, pretending to be a vindication of his Lordſhip of Canterbury, but ſcandalouſly reflecting upon his Grace, and our moſt orthodox Clergy.* Lond. 1720. 8vo.

[*N*] *He joined with the Earl of Nottingham againſt the Arians.*] The Bill was rejected by the Lords (41), and the miſcarriage of it furniſhed matter of triumph to the much famed Mr Will. Whiſton, who called it an attempt to introduce an *holy inquiſition* into the Church of England. By this part of our Archbiſhop's conduct, he unavoidably brought himſelf under the ſcratches of that Author's pen, which was particularly ſet on edge, and pointed to defame him as a changing Time-ſerver, in a letter addreſſed directly to his Grace, whoſe moderate conduct in the convocations which cenſured this Author and Dr Clarke, in 1711, and 1712, where he appeared for examining their doctrines before ſentence, is contraſted as diametrically oppoſite to his ſpeech on the introduction of this Bill into Parliament, declaring he would have the ſame doctrines puniſhed, even before and without examination, with the utmoſt ſeverity, as no better than *profane blaſphemy* (42). No anſwer to this appears in Whiſton's book, and it is more than probable he received none. However, the anſwer is very obvious, *viz.* the increaſe of theſe heretical doctrines ſince 1712, made, in his Grace's opinion, ſharper ways of proceeding againſt them proper in 1721.

[*O*] *A decree in favour of Founders Kinſmen.*] This decree has been much complained of by ſeveral of the Fellows of that college; and, in 1748, 8vo. there came out a Pamphlet, wherein the Author undertakes to ſhew the notorious repugnancy of it to the welfare of that, or of the like to the welfare of any ſociety; and thence infers, that the words of the founder in the ſtatute which gives a preference to his kindred, cannot be interpreted in that abſolute and unlimited ſenſe as is put upon them by this decree.

[*P*] *A Latin letter in January* 1717-18.] Mr Beauvoir in a letter to the Archbiſhop, dated Paris, 11 December 1717, O. S. writes thus:

‘ My Lord,

‘ I had the honour of your Grace's letter of the 27th ult. but laſt Sunday, and therefore could not anſwer it ſooner.—Dr Du Pin, with whom I dined laſt Monday, and with the Syndic of the Sorbonne and two other Doctors, tells me, that what ſwells Moreri's dictionary, are ſeveral additions, and eſpecially the families of Great Britain. He hath the chief hand in this new edition. They talked as if the whole kingdom was to appeal to a future General Council, &c. They wiſhed for *an Union with the Church of England, as the moſt effectual means to unite all the Weſtern churches.* Dr Du Pin deſired me to give his duty to your Grace, upon my telling him that I would ſend you an arreſt of the Parliament of Paris relating to him.’—It was the handſom mention which his Grace made of Dr Du Pin in his anſwer to this letter which occaſioned Dr Du Pin to write his firſt letter to his Grace.

(r) The ſame decree was afterwards made on the like occaſion by the Archbiſhops Potter and Herring, and has been lately [1762] affirmed by the preſent Archbiſhop, Dr Secker.

(40) Journals and Debates of the Houſe of Lords in 1718.

* A copy of the original Latin is printed in the General Dictionary, vol. X. p. 81, Rem. [*B*].

(41) See in Biſhop Gibſon's article ſome account of it.

(42) Whiſton's memoirs, &c. p. 221. edit. 1743. The title of the Bill was, *A Bill for the more effectual ſuppreſſion of blaſphemy and profaneneſs.*

he took occaſion to expeſs his deſire of an UNION between the two churches of England and France, and of entring into a correſpondence with his Grace for that purpoſe. The Archbiſhop, in return, thanking him for his civilities, obſerved, that it was full time both for himſelf and the reſt of his brethren of the Sorbonne to declare openly their true ſentiments of the ſuperſtition and ambition of the Court of Rome: That it was the intereſt of all Chriſtians to unmaſk that Court, and thereby reduce it to thoſe primitive limits and honours which it enjoyed in the firſt ages of the Church. In the courſe of this correſpondence, the Archbiſhop explained the Belief, Tenets, and Doctrine of the Church of England, the manner of its beginning to reform and ſhake off all foreign power and ſuperſtition both in Church and State, and its acknowledgment that our Lord Jeſus Chriſt is the only Founder, Source, and Head of the Church. His Grace inſiſted conſtantly on this Article in the letters he wrote not only to Dr Dupin, but Quinault and Piers de Girardin, both Doctors alſo of Sorbonne; and he always maintained the juſtice and orthodoxy of every individual Article of the Church of England, without making the leaſt conceſſion towards approving the ambitious pretenſions of the Church of Rome. It is not to be wonder'd at, if the Doctors of the Sorbonne readily concurred in a ſcheme which ſome of the principal of them ſingly wiſhed for. Dr Patritius Piers de Girardin, in an oration ſpoken in an extraordinary Aſſembly of the Sorbonne, March 17, 1718, N. S. openly propoſed it [*Q*]; and before the July following, Dr Dupin drew up an Eſſay towards an UNION, which was to receive the approbation of Cardinal de Noailles, and then to be tranſmitted to his Grace [*R*]. This piece, which was called *A Commonitorium*, was read by, and had the approbation of, the Sorbonne, and in it was ceded the adminiſtration of the Euchariſt in both kinds, the performing of divine ſervice in the vulgar tongue, and the marriage of the Proteſtant Clergy; and the invocation of Saints was given up as unneceſſary. The project engroſſed the whole converſation of the city of Paris. The Lord Stanhope, who about that time went thither upon ſome extraordinary emergency, and Lord Stair, the Ambaſſador, were congratulated thereupon by ſome great perſonages in the royal palace. The Regent himſelf [Duke of Orleans] and Abbot du Bois, Miniſter of foreign affairs, as alſo Mr Jely de Fleury, Attorney General, gave the line at firſt, and let things run on to certain lengths. But the Jeſuits and Conſtitutioners rung the alarum-bell, and overturned the whole ſcheme, by ſpreading a report that Cardinal de Noailles and his friends the Janſeniſts were upon the point of making a coalition with the Heretics. Hereupon Dr Piers de Girardin was ſent for to court, and ſeverely reprimanded by Abbot Du Bois, and ſtrictly charged, upon pain of being ſent to the Baſtille, to give up all the letters he had received from the Archbiſhop of Canterbury, as alſo a copy of all his own. The Doctor was forced to obey; and all the letters were immediately ſent to Rome, as ſo many Trophies gained from the Enemies of the Church. Abbot Du Bois was then in purſuit of a Cardinal's cap, which met with ſome ſtop at Rome; his diſcovery of what was in agitation in France, and in concert with whom, is ſuppoſed to have contributed not a little to removing all difficulties, and to procuring that dignity, which he ſoon after obtained [*S*]. Thus ended this noble project! His Grace was perfectly ſenſible that nothing could be done in it without the concurrence of the ſtate, however well diſpoſed the principal men of that Church might be towards it. Nevertheleſs the change of affairs contributed to the reputation of the Archbiſhop, his letters being admired even by the then Pope Clement XI. who declared it was pity the author of ſuch profound letters was not a member of their Church [*T*]. And notwithſtanding this affair met with ſo unhappy a fate,

---

[*Q*] *Piers de Girardin openly propoſed it.*] A copy of this oration, with a letter to the Archbiſhop in the hand-writing of Dr Piers de Girardin (43), are in the Collection of letters, &c. now in the poſſeſſion of Mr Beauvoir's family.

(43) His name was originally Piers only, but he added De Girardine to denote his extraction from a family of that name in Ireland. From the information of Father Courayer.

[*R*] *An Eſſay towards an Union*, &c.] In the laſt mentioned collection there is alſo a copy of this piece, which is intituled *Commonitorium de modis ineundæ pacis inter Eccleſias Anglicanam & Gallicanam.* It is addreſſed to all the Biſhops: and in it he firſt gives a ſhort hiſtory of the Reformation, after which he reduces the controverſy to theſe three Heads; 1. *Fidei dogmata*: 2. *Diſciplinæ Eccleſiaſticæ Ritus*: 3. *Moralis Doctrina*. Theſe he treats of by conſidering the Articles of the Church of England. With regard to Art. VI. [*Of the ſufficiency of the holy Scriptures to ſalvation*] he deſires Tradition to be admitted as explanatory of ſcripture, and the Apocryphal Books of the Old Teſtament to be allowed as *Deutero-Canonici.* In Art. XXI. [*Of the authority of General Councils*] he aſſerts, that a General Council of the whole Church cannot err. As to Art. XXII. [*Of Purgatory*] he ſays, that *Images* may be retained or not, as each Church pleaſes: Purgatory and Indulgencies are ſo explained as, he thinks, may be admitted by the Church of England. In conſidering Art. XXV. [*Of the Sacraments*] without examining whether the five rejected ſacraments of the Roman church were inſtituted by Chriſt or not, he thinks they may retain that name. Under Art. XXVIII. [*Of the Lord's Supper*] he would alter the words ſo as the Believers in Tranſubſtantiation might ſubſcribe to it. The other Articles are allowed; as is the Ordination of Biſhops, &c. and the Eccleſiaſtical Diſcipline of the Church of England.

[*S*] *He obtained a Cardinal's cap ſoon after.*] This account is principally taken from the dedication to Archbiſhop Wake of a book intituled *An Eſſay on Generoſity and Greatneſs of Spirit*, by Henry Mills, Maſter of Whitgift's Hoſpital, at Croydon in Surrey. Lond. 1732. 8vo. and perfectly agrees with a ſeries of Letters from the Archbiſhop to Mr Beauvoir on this ſubject, and with an account of this tranſaction drawn up by Dr Du Pin, and ſome other papers relative to this affair now in the hands of Mr Beauvoir's family; from which authorities it is in ſome places a little enlarged by the Rev. Mr Beauvoir, the preſent Maſter of the King's ſchool at Canterbury. The cauſes of its being broken off do not appear from theſe letters, but reſt on the authority of Mr Mills's relation, which, 'tis ſaid, came from the Archbiſhop himſelf.

[*T*] *The Pope wiſhed the Archbiſhop was a member of their church.*] Thus ended this noble project; his Grace was perfectly ſenſible, that nothing could be done in it, without the concurrence of the ſtate, however well diſpoſed the principal men of that church might fate, yet ſeveral learned Divines of the Gallican Church became thereby very ſenſible of his Grace's Catholic benevolence and abilities. It was from a conviction of theſe that Peter Francis Courayer, Canon Regular and Principal Librarian of the Cathedral Church [illegible]t Genevieve at Paris, applied not long after to his Grace for his aſſiſtance to clear up [illegible]ome difficulties in the accounts he had met with of the Engliſh Ordinations [*U*]. The Archbiſhop gladly complied with this requeſt, and ſpared no pains to give his Correſpondent full ſatisfaction in that point [*W*]. And as Father Courayer had alſo deſired ſome information

might be towards it. Although we muſt lament that what was ſo far happily advanced was thus broken off, yet it muſt be ſome pleaſure to know, that the way is paved for this arduous, pious, and deſireable work, whenever it ſhall pleaſe the Almighty to incline the Princes of this world to come into it: and the letters from his Grace to Mr Beauvoir, who conducted this affair under his direction, will be undeniable teſtimonies of that truly great Prelate's zeal for maintaining the doctrines of the church of England, and for eſtabliſhing a general union among the Chriſtian churches, as well as of his great knowledge of mankind; and they contain the beſt inſtructions for any perſon, who ſhall hereafter undertake ſo laudable a work. In a word, ſays Mr Mills, the project of uniting the Engliſh and Gallican churches, which his Grace did ſo much to promote, beſides other more particular and perſonal both ſpiritual bleſſings and temporal which might have enſued thereupon, would have been a not improbable means of ſecuring the public peace of Chriſtendom, by fixing an uniformity and good underſtanding upon true Chriſtian principles between thoſe two great nations, upon whoſe friendſhip or enmity it is now well ſeen that the tranquillity of Europe in great meaſure depends. To this we ſhall add, that as the Archbiſhop conſtantly in his letters both to Dr Du Pin, *&c.* on this occaſion, and alſo in thoſe hereafter mentioned to Father Courayer, lays the obſtruction of the union chiefly to the pride and ambition of the court of Rome; ſo it ſeems to be nearer a completion from the late total ſuppreſſion in France of the Jeſuits, an order erected purely to ſupport that pride and ambition.

[*U*] *Courayer applied to him upon the ſubject of our Engliſh Ordinations.*] A copy of this addreſs, which was written in Latin, has been communicated to me *by Father* Courayer himſelf, and is as follows.

‘ *Miraberis forte*, Illuſtriſſime ac Reverendiſſime Preſul, Te ab homine extero & ignoto compellari. Nec ſane mihi tantum ſumſiſſem, niſi Tuæ eruditionis fama, Eccleſiæ Britannicæ utilitas, & Eccleſiaſticæ concordiæ, quo flagras, zelus, eum mihi animum addidiſſent. Deterrebant equidem, ne ad Te accederem nominis mei obſcuritas, Tuæq; dignitatis celſitudo. Sed fiduciam adjecit commercii litterarii, quod cum amico meo felicis memoriæ D. DUPIN dudum inſtitueras, recordatio, eoque confidentius id in me ſuſcepi, quod Tibi non ingratum fore judicarem, ſi aliquis e Catholicis Theologis tentat, quod non niſi ab Anglicanis huc uſque tentatum eſt. De Ordinationibus Anglicanis loquor, quarum defenſionem mox edendam contra clariſſimi Viri. D. EUSEBII RENAUDOT ſcriptum poſthumum ſuſcepi. A veſtris jam feliciter res acta eſt; ſed ut plurimum ignoti ſunt apud nos libri Anglicani, & ob religionis diſſidia maxime ſuſpecti; nemo enim neſcit, multum in rebus eccleſiaſticis partium ſtudium poſſe, ac ſæpiſſime plus roboris habere, apud homines præjudicii tenaces, unum ſocietatis ſuæ Theologum quâm oppoſitæ ſectæ Gregem integrum.

‘ Veritatis amore ductus quidquid ex utraque parte adductum eſt, ſedulo perſolvi, ſelegi quidquid in iis ad convincendum fortius, & ad perſuadendum viſum eſt aptius, nova argumenta veteribus adjunxi, ſi quid e ſacris Theologiæ fontibus ad rem faciebat, non neglexi; uno verbo eo modo rem digeſſi, ut ſi non ignota proferrem, *ſaltem* huic hiſtoriæ parti majorem lucem diſquiſitio noſtra aliquatenus fæneraretur. Unum deeſt maxime neceſſarium ad pertinaciam adverſariorum retundendam, & id ipſum eſt cujus recuperandi gratia ad Te ſcribere audeo, ſi forte inde aliquid ſubſidii cauſæ communi obveniat. Non Te latet, *R*everendiſſime Præſul, conſecrationem Barloi primum Aſſavenſis, tum poſtea Menevenſis & Ciceſtrienſis Epiſcopi, a pleriſque negari. Multa ſuppetunt argumenta, quibus hujus conſecrationis veritas evincatur, ſed niſi proferatur Actus, acquieſcere detrectant. Certum eſt, in Eccleſiæ Tuæ Metropolitanæ Regiſtro eum non reperiri, ſed forte apud Eccleſiam aliquam e Suffraganeis conſecratus eſt Barlous, & in Tabulis hujus Eccleſiæ Actus occurret. Tanti res eſt, ut nil omitti debeat ad hujus monumenti inveſtigationem, tantaque apud ſeren. M. *B*ritannicæ Regem vales gratia, ut facile ab Eo Regium Placitum obtineas, quo ſingularum M. Britanniæ Tabulæ perluſtrentur, ut ſemel conſtet exiſtat nec ne talis Actus, aut ſaltem conſecrationis locus & tempus e monumentis certis aſſignetur. *Illud* a Te beneficium impenſe rogo, nec ullus dubito, quin pro Tua humanitate impertiaris. Quod ſi diligentiam tuam votaque noſtra ita fortunet Deus ut Actus occurrat, non tam de me bene meritus eris, quam de Tua Eccleſia, & quid dico Tua, imo potius de tota Eccleſia Catholica, cujus unitatem & concordiam colere & procurare pro viribus omnes debent. O me felicem, ſi quid operi bonorum omnium votis digno conferre queam, & meis obſecundare deſideriis, quæ proculdubio eruditio Tua, prudentia, zelus, magnæ ſedis auctoritas efficacia redderent, ſi tanto operi humana ſufficerent ſubſidia. Sed forſan aliquando precibus noſtris præſtabit Deus, quod laboribus denegat, & qualiſcunque votorum noſtrorum ſit exitus, pacem tamen & concordiam optare imo & procurare, Chriſtiani & probi hominis eſſe ſemper judicabimus.

‘ Quid mihi jam ſupereſt, Reverendiſſime Præſul, niſi ut excuſatum me habeas, quod audacius forte, quam par erat, ad Te acceſſerim. Condonabis tamen, ut ſpero, temeritati meæ, ſi quid hac in parte peccavi, & eruditionis ac humanitatis Tuæ famæ imputa, quidquid a me erratum eſt. Cæterum ſi res non ita mihi ſucceſſerit, ut quod cupio aſſequar, maximo honoris & felicitatis cumulo ſemper ducam, quod me Reverendiſſime Paternitatis Tuæ obſervantiſſimum & devotiſſimum cultorem agnoveris.

X° Calend. Aug. 1721.
le 23 de Juilliet.
Petr. Francis Courayer.

In this letter Father Courayer begins with a profeſſion, that it was the kind condeſcenſion ſhewn by the Archbiſhop to D. Dupin upon his propoſal of an union between the Engliſh and French Churches, which encouraged him to addreſs his Grace upon the ſubject of the Engliſh Ordinations; that he had drawn up a defence of their validity againſt a poſthumous piece of D. Euſeb. Renaudot, intending to publiſh it; to compleat which there was only wanting the Act of Conſecration of Biſhop Barlow, ſucceſſively Biſhop of St Aſaph, St David's, and Chicheſter: he begs his Grace's aſſiſtance in ſupplying that act, if poſſible, or at leaſt in aſcertaining the time and place of that Biſhop's conſecration; and concludes with lamenting the unhappy iſſue of the forement 'd union, and his ardent wiſhes that it may at length be effected. In compliance to this requeſt, the Archbiſhop ſent him a letter, conſiſting of no leſs than twelve ſheets cloſely written, in Latin, wherein a ſatisfactory account is given of the certainty of Biſhop Barlow's conſecration, which, notwithſtanding the Act itſelf could not be found, is alſo further aſcertained from indiſputable evidences in ſeveral ſubſequent letters of his Grace, written in Engliſh, in compliance to an intimation given to him by Courayer.

[*W*] *He ſpared no pains to ſatisfy his correſpondent.*] A ſeries of no leſs than five and forty letters in MS. now lies before me, from September 1721 to January 1726-27, written by the Archbiſhop. They were communicated by Father Courayer; and, after peruſing them, I can aſſure the public, that they contain ſo many illuſtrious proofs of his Grace's amazing diligence and indefatigable pains in ſearching original records by himſelf and proper perſons employed by him throughout all England, in order to furniſh his correſpondent with undeniable evidences in anſwer to all poſſible objections that could be raiſed againſt the validity of our ordinations. They are all well worth the public view, but are a great deal too many and too long to come within the compaſs of this work. The ſubſtance indeed of moſt of them is inſerted by him in his information concerning other branches of the conſtitution of the Engliſh Church, the Archbiſhop ſent him alſo a particular account of ſuch [*X*]. The correſpondence began in

his Diſſertation and Defence of it, as far as was neceſſary to his deſign (44); but it will be proper to lay before our readers copies and extracts of a few others, which will enable us to form a better judgment of his Grace's true character; as follows.

'Worthy Sir, Lambeth Houſe, 9 Nov. N. S. 1721.

'I had ſooner acknowledged the favour of yours of the 12th of October laſt, but that, beſides the accidents that befell our friend in the way, I have been ever ſince I received it taken up in making new enquiries and farther ſearches, to ſatisfie your new demands of me. The time I have for any thing of this kind is ſo very little, that I am forced to go on ſlowly in theſe matters, and ſpend a week in doing that, which, were it not for my other engagements, might be diſpatched in a day. I can now tell you, that I have finiſhed my anſwer to what you deſire; but do ſtill keep it, partly till it be fairly tranſcribed, but more eſpecially in expectation of ſome anſwers to the new ſearches I have ordered to be made on this occaſion.

'I confeſſe, I cannot but look on this whole controverſy, as a quarrell ſought againſt us by thoſe of our own country who differ from us in other matters, and are glad of any exceptions they can make againſt us. Strangers, who are leſſe acquainted with our conſtitution, are to be excuſed, and informed aright; but I am ſorry to ſay, our Engliſh Prieſts have ſhewn themſelves extremely faulty in the management of this cauſe. If this has given any undue ſharpneſſe to my letter now prepared for you, I hope you will excuſe it; but did you ſee with your own eyes what I ſee, and compare it with their reports, you would be apt to ſpeak of them as I have done; I hope, no where beyond the bounds of truth and charity. Let them allege what they will againſt us; I may venture to affirm, that the Epiſcopal Succeſſion has no where been better preſerved than in the Church of England; nor do I believe any Church in the world can ſupport it with more ample or authentic Records, than we have done, and can do.

'It is true, we have had ſeveral misfortunes in this particular, for which due allowances ought to be made. What was done by thoſe in power in Queen Marie's reign, I cannot tell; I doubt much miſchief to the Acts of K. Henry the VIIIth and K. Edward the VIth. In our long civil wars in the time of K. Charles the Iſt, when our own Enthuſiaſts, not unlike the Anabaptiſts in Germany, and other parts abroad, prevailed againſt the eſtabliſhed Church; when the Biſhops Houſes were demoliſhed, their Revenues diſperſed, and their Courts and Offices deſtroyed; a new deſolation came upon our public records: This was followed with the fire of London, in which the Archbiſhop's regiſters and public papers ſuffered very much: And not many years ago (45), another fire in my metropolitical city of Canterbury, burnt the whole place where the records of the capitular body were kept, and many books and regiſters were deſtroyed by it. Yet after all, by God's providence, we have, I believe, the beſt ſtock of public papers, books, and MSS, that is in the world; and can produce more authentic proofs of the Acts of our Church for near a thouſand years paſt, than any other nation in Europe. I forgot to mention the deſtruction of Monaſterys and Religious Houſes in the time of K. Henry the VIIIth, in which abundance of the moſt ancient monuments of antiquity either periſhed or were diſperſed.

'I am very glad my letter relating to Biſhop Barlow was of any uſe or ſatisfaction to you. What I ſhall next ſend will be only like the gleanings after the harveſt, yet may contain ſome things not unworthy of your remark. I have written it in Latin, only becauſe the other was ſo (46); I ſhall hereafter uſe the liberty you give me, and which now I take, of correſponding with you in our own language.

'Your ſecond letter, of the 31ſt of October, gave me a ſenſible concern; to think that after the pains you have taken to vindicate the truth, and to render a reall ſervice to the Church Catholique, the prejudice of party ſhould move the Chancellor to refuſe you a licenſe for the printing of it. I hope ſome means may be found to remove the obſtacle, and to leave you at liberty to be your ſelfe the publiſh[illegible] your own worke. As for my letter, I ſhall leave it to you to do as you pleaſe with it, provided care be but taken to omit every thing that may ſhew it to be mine. I have diſcourſed over my reaſons with our friend here, who at his return will fully report them to you. In the mean time, I am very ſorry to acquaint you that he has been very ill, and tho' in a fair way of recovery, is yet ſtill confined to his lodging, and not like for ſome days to come to be in a condition to go abroad (47).

'Mr S———, Sub-dean of Exeter, is returned to my houſe: he called at Wells in his return hither, and made the beſt enquiries he could about Biſhop Barlow.—His Regiſter was wholly deſtroyed in the ravage made of that Church, as I ſuppoſe, in the Duke of Monmouth's rebellion; ſo that there is no hope of any thing from thence. I have the like accounts from St Aſaph and St David's. At Chicheſter his Regiſter remains; but has nothing in it but inſtitutions to benefices, and other the like Epiſcopal acts. He was buryed in his Cathedral at Chicheſter; but no epitaph of him remains, from whence to gather any account of him.

'I have written to the Dean of Durham to ſearch Biſhop Tonſtal's Regiſter for the time of his deprivation. Mr Strype writes me word, that in his life of Parker, he followed Stow's authority, which is of no great value; and freely owns, that he relys ſtill on the account which he has given of that Biſhop's deprivation in his hands from the Cotton MS.

'Of Bourne's deprivation you will have an authentic proof in my letter; ſo you will of Biſhop Poole's; yet, to ſecure the latter, I have ſpoken to the Biſhop of Peterborough to inform me what their regiſters furniſh concerning it (48). I have alſo ſent again to Canterbury by one of my Chaplains, who is a Canon Reſidentiary of that Church, and now there; to ſearch more thoroughly, whether there is any further informations to be had from thence. I was in hopes I ſhould have had ſome certainty from the Records of the Councill Office for every one of theſe deprivations; but the Regiſter of the firſt four years of Elizabeth is loſt, and, as *the Clerk of the* Councill thinks, was burnt in the *laſt fire at White-hall* (49).

'You ſee, *Reverend Father*, that I have not been wanting in making the beſt ſearches and inquiries I could for your ſatisfaction. What time and chance may produce I cannot tell; but I have looked every where in the proper places to no purpoſe, and do now deſpair of diſcovering any more of theſe matters.'

[*X*] *He gave him an account of other parts of our eccleſiaſtical conſtitution.*] To this purpoſe he concludes the letter cited in the preceding remark thus. 'Mr Strype has very lately publiſhed 3 volumes in folio of Eccleſiaſticall Memorialls, during the times of K. Henry VIII. Edw. VI. and Qu. Mary. Next to theſe follow his Annals of Eliz. heretofore publiſh'd; his life of Cranmer is contemporary with theſe laſt 3 volumes; the lives of Parker, Grindal, and Whitgift, perfect and continue his Annals. I am, with all poſſible eſteem,

'Worthy Sir,

'Your obliged humble ſervant,

'W. CANT.'

This laſt paragraph relates to the deſign mentioned by Courayer of writing a new Hiſtory of the Reformation, of which the Archbiſhop gives his opinion in a ſubſequent letter, dated Lambeth-Houſe, April 20. O. S. 1722, in theſe terms. 'I am ſtill of opinion, that if God ſhould continue you in life and health, it would be an uſefull work, out of the ſeverall hiſtories that have been publiſhed of our Reformation, to draw up one compleat hiſtory, that might fully ſuffice for all. I hope you will not meet with any ſuch interruptions, as you ſeem to apprehend, in it. I ſhall be glad to hear that the CODEX of our eccleſiaſtical laws, which I took the liberty to ſend you, is come to your hands. You will there ſee the *Concordia Sacerdotii & Imperii* in our Engliſh Church; that we are ſtill under the ſame Canonical diſcipline and Epiſcopal government, we ever were; and have done nothing more than to lay aſide ſuch Canons and

(44) Beſides which they contain an account of the particular conſtitution of our church in other branches of it.

(45) About 30 years ago, as his Grace mentions in another letter.

(46) Both theſe are in this collection, and fill no leſs than 12 ſheets of paper, cloſe written on all ſides. The date is, *Ex ædibus noſtris Archiepiſcopalibus*, xv. Kal. Octob. A. D. M.DCC.XXI.

(47) This friend was the Abbé Girardin, who, as appears from a letter of the Archbiſhop, dated Lambeth-houſe, April 20. 1722, did not leave England till towards the middle of that month.

(48) That Biſhop, it ſeems, miſinformed him at firſt, but corrected his miſtake afterwards, which the Archbiſhop takes notice of and *rectifies in a ſubſequent letter*.

(49) That fire happened in K. William's time. See Sir Chriſt. Wren's article.

in 1721, and continued till 1727; during the courſe of which that learned Pariſian Divine received from his Grace ſuch indiſputable proofs of the validity of our Ordinations;

[illegible]ſtitutions, as we found to have been contrary to the *word of God*, the *laws of the Realm*, or the *prerogative of the Crown*. The reſt, even thoſe that were uſed before the Reformation, ſtill continuing in force with us. So that our ſucceſſion is as uninterrupted in the diſcipline of our Church as in that of our Epiſcopacy, in which there never has been, that we know, the leaſt breach.

‘ I wiſh that any thing I can ſend to you may help you in the good work you are upon: for indeed I am exceedingly deſirous you ſhould know the true conſtitution of our Church *; of which I am ſorry to ſay I perceive you have been abroad very ignorant: and then, on God's name, judge of us as you ſee cauſe to do. I am with all true eſteem,

‘ Reverend Father,
‘ Your very affectionate friend,
‘ And ſervant in Chriſt,
‘ W. Cant.’

‘ Reverend Father, Lambeth-Houſe, 9 Dec. 1721.

‘ I am ſorry to find by your letter of the 21ſt of November that you had no proſpect of obtaining a permiſſion to print your book. Mr Ayerſt confirmed the ſame to me: And tho' you would afterwards have been content with a *tacit allowance* inſtead of a public permiſſion, yet I never doubted but that thoſe who refuſed the one, would alſo deny you the other. I cannot but own myſelf ſomewhat ſcandalized at this procedure. What are theſe men afraid of? Do they apprehend that our Epiſcopal ſucceſſions and Conſecrations ſhould be made appear to be better founded than they thought it had been? But why ſhould they not deſire, if poſſible, to be convinced of this? Why ſhould they not wiſh us to be leſſe irregular, than they ſuppoſed us to be? Is this, my Father, the ſpirit of Chriſtianitie? Would not an honeſt philoſopher be aſhamed of it? On God's name, let truth prevail; let it be made known and repreſented in its juſt light; and then let every man lay his hand upon his heart, and judge righteous judgment. But why do I complain that thoſe who either diſſemble, or diſguiſe, their own ſentiments, endeavour to hinder men from knowing ours? Let them do as they pleaſe: God knows that we are as carefull to continue the true ſucceſſion of our Epiſcopacy, and value ourſelves as much upon it, as any in the Romane † Church: He knows that we have done it; and to him we leave it to judge between us, whether this ſtone of offence ſhould not be removed, and good men ſatisfied what the true ſtate of the matter is, and that there is no obſtacle on this account to our union, if other points could be adjuſted.

‘ Our good friend the Abbé Girardine being ſtill here, I have deſired him to take care to get Mr *Strype's Memoirs* and *Anthony Wood's Athenæ Oxon'* for you. I cannot commend either of theſe as juſt hiſtories to you, but you will meet many things in both, that are not eaſy to be found elſewhere; and muſt make your own uſe, as you have occaſion, of them. For the new *Monaſticon Anglicanum* of which you ſpeak, I have enquired after it; but by the account I have received, do not expect any great matter from it. I ſhall think of what books may be of uſe to you for the Hiſtory of our Reformation, and in time ſend you a catalogue of them.

‘ While the Abbé has been here, he has had the opportunity of ſeeing the Confirmation of one Biſhop, and the Conſecration of two. When he returns, he will give you a full account of what he obſerved in both.

‘ I wiſh, my good Father, I were more worthy of your good opinion than I fear I am Report magnifies men's characters at a diſtance: but few anſwer the expectations, which from thence is raiſed of them. I bleſſe God I know my own mediocrity; and am not exalted in any opinion of my ſelfe. God has given me an honeſt mind; deſirous to act with integrity in every thing: And having long converſed with men of all perſuaſions, and found ſome to value in almoſt every way; I have learnt not only to bear with thoſe who differ from me, but, notwithſtanding any ſuch differences, to love them; to think charitably of them; and to hope that a God of infinite love and goodneſſe will pitty and accept of us all. If in this I am miſtaken, I am ſure I err on the beſt ſide; and as theſe thoughts ſhall never make me either negligent in the ſearch of what is agreeable to God's will, or prejudiced againſt it, tho' never ſo contrary to my preſent notion; ſo I am perſuaded that by keeping up ſuch a univerſal charity in my mind for thoſe who in the integrity of their hearts differ from me, I ſhall be always the beſt prepared to ſubmit to a reaſonable conviction, and to obtain God's pardon for any involuntary errors, I may after all happen to continue in. Caſſander, Eraſmus, Grotius, and the like writers, are, I freely own, my great favourites: But as I deſerve not to be compared with them in any thing, but the like Chriſtian and charitable diſpoſitions; ſo neither would I be thought ſo vain as once to think myſelfe (in learning or capacity) like to them. My picture was ſome time ago finiſhed, at the deſire of ſome perſons: the plate is intirely worn out, and the copies of it no longer to be had. I ſent my laſt by our Friend to you; and have not one more for my ſelfe, or any other remaining.

‘ With this you will receive my *Latin letter* in anſwer to your laſt enquiries; and for a ſpecimen of the wretched dealing of our Seminary Prieſts, I have alſo ſent you the little book cited as *Brook's Caſes*, which raiſed your wonder at what you heard was publiſhed by him, with permiſſion of Qu. Elizabeth's Judges. I have alſo added a very few *Strictures* on the *Two Sheets* ſent me of your book, which I do, without compliment, not ſo much approve as admire, when I conſider it as the work of a ſtranger to our conſtitution.

‘ The error concerning the *reſtitution of temporalities* only after conſecration, is what ſome of our beſt writers have run into. The practice is no other at this time, nor I believe has been in the memory of man. It is founded upon the ſtatute law of this realm; and I am confident you might venture it without danger of being reproved for it. But I would not have Truth itſelfe vindicated with that which is not true, tho' I were ſure it ſhould never be diſcovered: And by comparing the *dates* of our *Biſhops Conſecrations*, as they ſtand in our *Faſti*, publiſhed by *Le Neve*, which I ſee you have, with the writs in *Rymer* for the reſtitution of temporalities, you will find many inſtances of Biſhops who have had them, by Grace, from our Princes, before they were ever conſecrated Biſhops.

‘ But I forget myſelfe, and run on too far in this pleaſing entercourſe with you. I hope you will excuſe my length, and the haſt with which my buſineſſe obliges me to write; and be aſſured, that I am in all things ready to receive your commands, and to anſwer your deſires, as becomes,

‘ Reverend Father,
‘ Your faithful friend
‘ And ſervant in Chriſt,
‘ W. Cant.’

In another letter, dated October 29. 1722, the Archbiſhop gives ſome further directions concerning this deſign of writing the Hiſtory of our Reformation, which it ſeems was undertaken by another perſon, who had been mentioned to him by Courayer; thus: ‘ Should the perſon you mention go on with the hiſtory of our Reformation, he muſt take good care of the authors he follows: too many of which are to be truſted no farther than they carry their authentic proofs with them. Strype is honeſt, tho' not entertaining, and always writes upon good authority. Biſhop Burnet's Records are faithfully collected, and his Hiſtory muſt be tryed by them: Heylin is raſh, and often miſtaken: Fuller not to be rely'd upon: Collier writes all for a party, but I have not read enough of him to judge of his Care.’

In another letter, we have his Grace's opinion concerning Preſbyterian Ordinations, as follows. ‘ I deſired my Library-keeper, Mr Ott, before I went my viſitation, to return an anſwer to your former letter of the 11th of March N. S. (50) My eyes were at that time ſo indiſpoſed with a rheum that fell upon them, that I was not in a condition for a long while either

* Several of his Grace's letters contain a particular account, in anſwer to Courayer's requeſt, of our eccleſiaſtical conſtitution.

† Sic in originali.

(50) This letter of Mr Ott is in this collection, and is dated Lambeth, May 21ſt, 1724.

tions, as fully convinced him: whereupon he was not afraid to declare his ſentiments to the public. But at length he found it neceſſary to provide for his ſafety by flying under the ſhelter of the Archbiſhop's wing [*Y*]. He came to England in 1728, and has continued

'either to read or write. However, I will now detain you a while, in anſwer to ſome things in that, which ſeem to require a particular regard.

'To begin with your poſtſcript. The licenſe granted by Archbiſhop Grindal's Vicar-General to a Scot-Preſbyterian to officiate here in England, I freely own it, is not what I ſhould have approved of, yet dare not condemn. I bleſſe God, that I was born and have been bred in an Epiſcopal Church; which I am convinced has been the government eſtabliſhed in the Chriſtian Church from the very time of the Apoſtles. But I ſhould be unwilling to affirm that where the Miniſtry is not Epiſcopal, there is no Church, nor any true adminiſtration of the ſacraments. And very many there are among us, who are zealous for Epiſcopacy, yet dare not go ſo far, as to annul the ordinances of God performed by any other miniſtry. See for this in Biſhop *Andrews's Opuſcula*, his letters to Du Moulin; you will there find one of the moſt tenacious aſſerters of the Epiſcopal government, nevertheleſſe, far from unchurching all the other Reformed Churches for want of it. And in the caſe you mention, who can ſay how far a Biſhop may have power to licenſe a perſon, not rightly ordained, to officiate in the Church committed to his juriſdiction. In the mean time, you know your ſchoolmen have been far from cenſuring Preſbyterian Ordinations; and yet their opinions had no influence to prejudice the Epiſcopacy of your Church, in which they lived. And ſhould I (erroneouſly) think ſuch an ordination in ſome circumſtances valid; yet I do not ſee how that would affect my own orders, which I muſt always prefer exceedingly before the other. At preſent our conſtitution is otherwiſe ſettled; nor can any Archbiſhop or Biſhop licenſe any man to officiate or miniſter the holy ſacraments, eſpecially that of the bleſſed Euchariſt, who is not by an Epiſcopal ordination qualified for it.'

In proceeding, his Grace gives likewiſe his ſentiments concerning the ſacrifice in the Euchariſt, thus. 'To your other point in your letter about the *ſacrifice of the maſſe*, I will in one word tell you what I take to have been all along the ſenſe of our Church concerning it We have from the beginning of the Reformation utterly deny'd any ſuch propitiatory ſacrifice, as the Council of Trent eſtabliſhes in it; for what you call a *commemorative* or *repreſentative ſacrifice*, tho' we think thoſe terms very improper, we have never that I know of made any other exception againſt it; and ſome of our writers have been over zealous in their aſſertion of it. As to the change made in our *Communion Office* in the ſecond book of King Edw. VIth from that of the firſt, I have two obſervations to offer to your conſideration with relation to this point. 1. That Bucer, who was chiefly conſulted with by Cranmer with regard to thoſe changes, in all his obſervations upon that firſt form of Edw. the VI, no where, that I remember, makes any exception againſt ſuch a ſacrifice as you mention, or offers any change to be made on that account. (See his *Scripta Anglicana fol.*) The other obſervation I would make as to that matter is, That in the year 1551 Cranmer publiſh'd his book againſt GARDINER Biſhop of Wincheſter, upon the ſubject of this holy ſacrament. His laſt part is intirely upon the ſubject of the ſacrifice. In this he fully rejects and confutes the doctrine of a propitiatory ſacrifice in the Euchariſt; but for the other, he excepts not either againſt the words or the thing. He allows of Peter Lombard's explication of the *ſacrifice* there offered, which, if I remember aright, is much the ſame your letter expreſſes. Now, the Common Prayer-book of K. Edward was at that very time under a review. It was publiſhed the next year, 1552. Cranmer had the main hand in it; and it is not likely that he had any regard in the changes that were made to a commemorative ſacrifice; againſt which, in his own book written about the ſame time upon that very ſubject, he made no exception.

'Theſe books I have in my library at Lambeth, and I hope you have them in yours. But as I am now in the country, and depend much upon my memory; ſo I flatter myſelfe, you will excuſe me, if I make any miſtake by truſting to it. As for my ſelfe, I freely own, I have no notion of any *real ſacrifice*, that is only *commemorative* And for that reaſon do not concern my ſelfe, but for your ſatisfaction, in that way of ſpeaking at all. But I detain you too long with theſe matters: I do it in anſwer to your deſires. It is a great misfortune to us and you, that our books (moſtly written in our Engliſh language) are not better known and better underſtood * by you. I am perſuaded it would much change your notions of our Church, in all reſpects both of doctrine and government.

'Whereinſoever I can be uſefull to you, I hope you will freely write to me: I cannot always promiſe you a ſatisfactory anſwer; but an honeſt and faithfull account you ſhall be ſure always to receive from,

'Worthy Sir,

Croyden-Houſe,
July 9th, 1724.

'Your faithful friend,

'W. CANT.'

As to the firſt point here mentioned, *viz.* Preſbyterian ordination, his Grace was apparently of opinion that ſuch as had received it might be reordained Epiſcopally. This is evident from a paſſage in a letter, dated January 14. 1722, S.V. where he writes thus. 'I have ordained Mr Horner both Deacon and Prieſt, and thereby received him into the miniſtry of the Church of England. This is a work that gives the moſt offence of any to the other Reformed Churches; but I muſt agree with you, that I know no government older than Calvin's time, but what was Epiſcopal in the Church of Chriſt.' This Mr Horner was a native of Switzerland, and received Preſbyterian orders there ‡: His Epiſcopal orders were conferred on him in order to qualify him for ſome preferment here; which tho' ſeveral who had received only Preſbyterian orders did enjoy before the Act of Uniformity paſſed in the beginning of K. Charles IId's reign, yet any ſuch permiſſion or practice is well known to be ſtrictly forbidden by that Act.

[*Y*] *He took refuge under the Archbiſhop's wings.*] He came to England in 1728. The Archbiſhop had all along given him aſſurances of this kindneſs whenever he ſhould find it neceſſary to leave France. In a letter, dated Lambeth-houſe, May 19. O.S. 1722, his Grace expreſſes himſelf in theſe terms. 'As for your public affairs, I truſt in God, that he will not only defend the truth, but protect thoſe whom he is pleaſed to make uſe of in the defence of it. Should the caſe be otherwiſe, Monſr de G. [Girardin] will tell you, that we are not here ſo narrow either in our charity or our inclinations, as not to know how to value ſuch men as you are, tho' they ſtill continue in opinion to differ from us. We hope, notwithſtanding our differences, to be together united in the glorious fellowſhip of the church triumphant. Why may we not be as well united in the church militant? A catholic love and ſpirit may well conſiſt with a variety of judgment in reſpect to the doctrines of Chriſt. In all eſſentials we are agreed. I am ſure, had we lived at any time within the firſt five centuries, the ſubſcription of the Nicene and Conſtantinopolitan Creed, would have intituled us to the common name and right of Catholic Chriſtians; were it not for the love of dominion in the court of Rome, the caſe might be the ſame now. However, I will never reckon him eſtranged from the church of Chriſt here, whom I hope and am perſuaded he will receive hereafter. My principles are catholic; my heart is the ſame; and my love and prayers ſhall be ſo too. If I live, and any unhappy accident drives any of you hither, I will endeavour to ſhew you, that I do not in vain pretend to this character. I may err, but I will not be a heretic. I may and do ſeparate from the Pope and his tyranny; yet for all that I neither am nor will be a ſchiſmatic. In this diſpoſition I live, and if in this diſpoſition I die, I ſhall not fear any Anathemas from the Vatican, fulminated againſt me. To yourſelfe and all charitable and good Chriſtians, I am and will ever profeſs myſelfe

'A faithful and loving friend
'And brother in Chriſt Jeſus,
'W. CANT.'

In

---

* Courayer had declared this ignorance and miſunderſtanding in his firſt Latin letter, cited in the precedent remark.

‡ In the beginning of this correſpondence he was at Paris, and Chaplain to Sir Luke Schaub, whom he attended to England. The Archbiſhop procured him ſome preferment in Ireland, as Courayer informs me.

tinued here ever ſince (r). His Grace ſat in the Metropolitical Chair ſeveral years after this; but towards the cloſe of his life he grew ſo much diſabled by age and infirmities, that

In the ſame benevolent ſpirit, when the danger grew near, we find his Grace ſending ſtronger comfortable invitations; as follows.

'My good father, 12 Sept. 1726.

'The confident reports we had here that your papers had been ſeized, and that your perſon was under a ſort of free cuſtody, put me in a great fear and concern for you. For as I will not deny the very high value I have for you, ſo I could not but apprehend both the power and malice of thoſe, which your honeſty and integrity have made your enemies. And tho' I am in a great meaſure freed of my fears by your late letters, than which none ever came more acceptably to me; yet the new incident you mention, and of which I have alſo ſome account from another hand, makes me ſtill in pain for you. Tho' I can hardly think the Aſſembly of your Biſhops will venture, for the ſake of gratifying ſome men's private reſentments againſt you, to determine a point of ſo great moment, as the doctrine of the ſacrifice, and particularly to carry it to that extreme, which you ſhew your Church never yet to have defined, and ſome of your greateſt Divines not to admit of. Prejudice and partiality do indeed ſometimes carry private perſons into very ſtrange actions; but ſurely an aſſembly of learned and pious men will not be influenced by ſuch motives to eſtabliſh a new doctrine in your Church, different from that of your moſt wiſe and ſober writers, and, if I am not too much carried away with my opinion and the ſenſe of the Church of England in that particular, not capable of a defence. But God, I truſt, will turn the counſels of thoſe Achitophels, your enemies, into fooliſhneſſe; and protect your innocence from all their mad deſires againſt you.' He then proceeds highly in commendation of Courayer's Defence of his diſſeration, and avers his own care and integrity in ſupplying the proofs therein from our records; after which he concludes thus. 'My good Father, take all the care you can of yourſelfe and your papers. Go on ſteddily in the courſe you are in. God, I truſt, will preſerve you from the hands of your enemies; and make you a happy inſtrument of bringing our two Churches ſomewhat nearer to a Union than they have hitherto been. Should your good endeavours herein expoſe you to any ſuch dangers, as ſhould oblige you even to leave your own country, you may depend upon a ſafe and honourable retreat here; and that without changing your communion, or renouncing any principles which you think to be true, tho' different from ours. For tho' we are by no means ſo indifferent in our religion, as ſome have repreſented us, yet we are not ſuch unchriſtian zealots for it, as not to know how to eſteem an honeſt man, tho' in ſome things of a different perſuaſion from us. But I hope there will be no occaſion for you to make any tryal of this; and ſhall therefore ſay no more of it.

'If you need any good offices in France, I have again beſpoke Mr Robinſon's kindneſſe to you while he is attending the Court at Fountainebleau. You may ſafely apply to Mr Tyrwhit, our Ambaſſador's Chaplain, whom Mr Robinſon intirely truſts, and aſſures me, you and I may ſecurely truſt with any thing we deſire to have done by him.—Farewell, my good friend, and continue to love him who is, with the trueſt eſteem,

'Reverend Father,
'Your truly affectionate friend,
'W. Cant.'

Croydon, Sept. 21.
O. S. 1726.

Again in a letter, dated Lambeth-Houſe, Nov. 9. O. S. 1726, he writes thus. 'Pray God give his bleſſing to your honeſt endeavours, and preſerve you from any ſufferings upon the account of them. If you are in danger, you know where you may be not only in ſafety, but reſpected as you deſerve. I ſhall ever be,

'Good Father,
'Your faithfull friend,
'W. Cant.'

The ſame affectionate tenderneſs appears in a following letter. 'As to what you propoſe,' ſays he, 'in your letter, I cannot direct you better, than to take Mr Robinſon's advice, and by him Mr Walpole's *, whether you ſhould preſent your books (I mean both this Defence, &c. and your former diſſertation) to the King, Prince, and Princeſſe. If they think it fit to be done, you will pray Mr Walpole's favour to do it. He is coming ſpeedily into England, and will be your beſt friend at our Court, ſhould you have any occaſion for their favour. I would not have you by any means ſuffer upon the account of what you have written in this controverſie, and I hope you will not. If you ſhould, it is no harm to think beforehand whither to retire for ſafety. I pray God to direct all for the glory of his name and the benefit of his Church. I am,

'Reverend Father, with all true eſteem,
'Your faithfull friend,
'W. Cant.'

To the ſame purpoſe he writes yet more warmly in the following letter of December 7th 1726. 'I do not pretend,' ſays he, 'to merit any thing of you by my offers of contributing towards any new corrections that may be made in, or additions to your books. But it being printed at the charge of your friends, I could not tell whether they would be eaſy in ſuch a new charge, and was therefore willing to make both you and them eaſie in it. I am well ſatisfied, that you had no views, but what were perfectly free and generous, in writing upon this ſubject. But who can tell what farther deſigns the providence of God may have had in it. I hope you will meet with no occaſion for our either aſſiſtance or protection; that you will continue free and undiſturbed in your preſent retirement from the world. But if it ſhould be otherwiſe, and you ſhould be forced under your doubtful circumſtances to ſeek a refuge elſewhere; it may not be altogether uſeleſſe to you, that you know whither to go; and enjoy both the liberty of your conſcience, and a proviſion againſt the danger of want in a ſtrange country.'

In proceeding he conſiders a remark which Courayer had it ſeems made upon England, as being a country not very deſirable for a religious man to reſide in. 'Your obſervation,' continues his Grace, 'of our country with reſpect to religion is but too true. Our diviſions are many; and the liberty taken by men in treating of matters of faith and doctrine, is much beyond what either our laws permit, or, it were to be wiſhed, our government ſhould ſuffer. The ſeveral acts of parliament that have been made to reſtrain blaſphemie, profaneſſe, and hereſie (to ſay nothing of our eccleſiaſtical canons) are as ſtrict as one would deſire. But for that very reaſon are the leſſe executed, becauſe their penalties are eſteemed too ſevere. How to remedie this I cannot tell: all that I can ſay is, that no care is wanting among our clergy, to defend the Chriſtian faith againſt all aſſaults; and that I believe no age or nation has produced more or better writings againſt Atheiſts, Deiſts, Socinians, Arians, and all other the like libertines, than our country has done; and continues daily to do. And for ſuch as ſeparate from the eſtabliſhed Church, I may boldly ſay, nothing of argument has been offered by them to juſtify their ſeparation, that has not been often and fully anſwered by us. This is all we can do: Iniquity in practice, God knows, abounds too much among us, chiefly in the two extremes, the higheſt and loweſt ranks of men. The middle ſort are ſerious and religious. And I hope there is among us ſo large a remnant, as will ſtill ſecure the mercy and favour of God to us, till by his grace ſomething can be done more effectually to reclaim the reſt. This is the true ſtate of our caſe; I doubt yours is not much better. You have your diviſions not much leſſer or fewer than ours. If the morals of your people are better, I congratulate heartily your happineſs in it. For myſelfe, I live almoſt a monaſtic life. I have a large and numerous family, and I keep it under the beſt regulation I can. We have the ſervice of God within ourſelves, and that in public in my chappel and houſe, four times a day. We live orderly and peaceably together. And tho' the neceſſity 'of

---

(r) He is now [1763] fourſcore and three years of age, and in a good ſtate of health.

* This was Sir Tho. Robinſon; and in 1760 created Lord Grantham. He was then Secretary to Mr Horace Walpole, brother to Sir Robert Walpole.

that ſome part of the care of the Church was transferred to Dr Edmund Gibſon, Biſhop of London, who, in conſequence thereof, had the recommendation to all eccleſiaſtical preferments at Court (*s*). Our Archbiſhop having arrived in this feeble ſtate of b[illegible] and mind to the verge of fourſcore years, ſunk into the arms of death at his palace [illegible] Lambeth, January 24, 1736-7 (*t*), and was interred in a private manner at Croydon. Beſides his printed works already mentioned, he publiſhed *A Preparation for death, being a letter to a young gentlewoman in France under a diſtemper of which ſhe died.* The fourth edition was printed at London, 1688, 12mo. As alſo *A Letter from ſeveral French Miniſters fled into Germany on account of the perſecution in France, to ſuch of their brethren in England as approved the King's Declaration touching liberty of conſcience.* We have likewiſe Three Volumes of his Grace's Sermons, Charges, *&c.* Mr Mills of Croydon (*u*) has ſacrificed to his own rhetorical talents by throwing ſome fulſome incenſe on the Archbiſhop, wherein he ſets him on a level with his predeceſſor Dr Whitgift, which we ſhall paſs over; but as that Gentleman concludes the eloge with ſeveral inſtances of his Grace's liberality and charity, it will be proper to mention them, as being ſo many facts worthy of imitation, and which this writer muſt needs be acquainted with; and we ſhall do it in his words, ſince they exhibit a ſpecimen of that injudicious manner, which indeed rather diſgraces than decorates the truth. " Laſtly, he may be compared to Arch-
" biſhop Whitgift," ſays Mills, " in his large and beneficent charities, laying out great
" ſums in public buildings and reparations. Every town," continues this writer, " in
" which his Grace had been preferred, gives teſtimony of this his generous temper.
" Thus Exeter can ſay what repairs and improvements were made, while his Grace
" preſided there as Dean. Bugden, the ſeat of the Biſhop of Lincoln, can boaſt that
" the epiſcopal houſe was never ſo well repaired and decently fitted up, as while his
" Grace was the watchful Overſeer of that dioceſe. His Grace was no ſooner raiſed to
" the archiepiſcopal ſee at Canterbury, than an exact ſearch was immediately made,
" what decays were to be found in the two palaces at Lambeth and Croydon, the re-
" quiſite repairs of which did not coſt leſs than about eleven thouſand pounds; a pro-
" digious ſum! greater far," ſays our author, " if I am rightly informed, than has
" been expended in the ſame way by any Archbiſhop ſince the Reformation. Nor was
" this generoſity confined to the houſes that the Archbiſhop is obliged to keep habitable
" and in order. The old vicarage-houſe at Croydon was intirely taken down, and a
" new, ſtrong, and beautiful ſtructure raiſed in 1730, ſolely at the Archbiſhop's own
" charge of above ſeven hundred pounds; and what ſtill more recommends this gene-

(*s*) See Biſhop Gibſon's article, in the Supplement.

(*t*) Annals of K. George II. under that year.

(*u*) In the Dedication to his Grace of a piece intituled, An Eſſay on Generoſity and Public Spirit, ed. 1732. 8vo.

' of buſineſs draws a great number of perſons to me; ' yet I reduce even that as much as poſſible to certain ' times; and then eat openly with my friends two days ' in the week. To the court I ſeldome go, ſave when ' obliged to attend my duty, either in the public or ' cabinet councills. And when in parliament-time, I ' am rather faulty in not going ſo often as I ſhould to ' it, than in attending conſtantly upon it. So that I ' uſe my beſt endeavours to live clear of the world, ' and dye by degrees to it. My age and infirmities ' (being now ready to enter on my 70th year) admo- ' niſh me to look upon myſelfe as a citizen of another ' and better country, and ready to go from hence to ' it. Your prayers for a happy paſſage to it, will be ' a ſeaſonable and friendly help added to my own. ' In return, I ſhall not be wanting to wiſh you all ' happineſſe in your longer pilgrimage upon earth. ' And tho' we go by ſomewhat different paths, yet as ' we do in effect purſue the ſame road, ſo I truſt we ' ſhall meet together at our journey's end. In the ' mean time, I heartily commit you to the protection ' and bleſſing of our heavenly Father; and, with the ' moſt ſincere love and eſteem, remain,

' My good Father,
' Your faithfull friend and
' Servant in Chriſt,
' W. CANT.'

Lambeth-houſe,
Dec. 7th 1726.

The laſt letter in this collection, is dated January 31 S. V. 1726-7. We ſhall tranſcribe the concluſion of it, becauſe it contains a confirmation of his Grace's truly catholic ſpirit.—' I have been much out of or- ' der,' ſays he, ' this winter in my health, and am ' now entered on the 70th year of my life, and am by ' both admoniſhed to think of my removall to another ' and better ſtate. Your prayers, I truſt, will not be ' wanting for my attaining to it. I may err, and ' God knows I am ſure I have too much ſinned; yet ' as I hope I am not without a hearty ſenſe of, and ' repentance for my ſins, ſo I do aſſure you, I am far ' from being knowingly or obſtinately erroneous in any ' thing. God, who pardons our involuntary ſins, will ' no leſſe make allowance for our unknown and invo- ' luntary errors. In the mean time, I heartily wiſh for ' the Church's peace, and live in charity with all Ca- ' tholic Chriſtians; and I purpoſe, by God's aſſiſtance, ' in this diſpoſition to die. Would all men be as clear ' and candid in ſtating the other matters in difference ' between us, as you have been in the Sacrifice and ' Ordinations, I believe we ſhould ſoon come to an ' agreement, or at leaſt to a forbearance of one ano- ' ther in love. But alas! you have an obſtacle, that ' till it be removed, will fruſtrate all our good inten- ' tions and deſires. The Court of Rome can never ' bear to depart from her dominion, and Chriſtendome ' can never be truly reformed, while that exorbitant ' power ſtands.—I ſay no more; let every one who ' reads the Goſpell of Chriſt, and the Hiſtory of Chri- ' ſtianitie at its firſt plantation and in its pureſt ſtate, ' compare it with the pomp and pride of that Court; ' and ſay, if they can, that ever Chriſt appointed ſuch ' a Vicar, or St Peter ever dreamt of ſuch a Succeſſor. ' Excuſe, my Father, theſe reflections. I will not ' ſo much as deſire to know your thoughts of them. ' This only I will add, that they broke forth unawares ' from an honeſt heart, heartily deſirous of the peace ' of all Chriſtians here, and of their ſalvation here- ' after. Farewell, my good Father, and believe me ' ever to remain, with the warmeſt affection,

' Your truly loving friend,
' W. CANT.'

Among theſe letters there is one in which his Grace with great reſpect mentions Mr Baker, the famous Antiquary of St John's college, Cambridge, who communicated to him ſome informations concerning the *Hiſtoriola, &c.* relating to Archbiſhop Parker, which was diſcovered during this correſpondence with Courayer, in Bennet college library *. The Archbiſhop had before received ſome aſſiſtance from this learned Nonjuror in writing his State of the Church, and after the work was completed wrote to him a letter of thanks; and, as a teſtimony of his ſenſe of the ſervice he had done him, offered to accept his recommendation of a friend (as he could not receive it himſelf) to a benefice worth 200 *l.* a year then vacant. Mr Baker waved this offer; and very politely requeſted his Grace's favour might be to himſelf, by the preſent of a copy of the aforeſaid work, with his Grace's corrections and additions in his own handwriting. With this the Archbiſhop complied, and ſent beſides many manuſcript evidences bound up with the Volume ‡.

* See Dr Drake's edition of Archbiſhop Parker's book *De Antiquitate Britannicæ Eccleſiæ*, &c. publiſhed in 1729, folio.

‡ This book is now in the public library of the Univerſity of Cambridge. Communicated by the Rev. Mr Beauvoir, ſon to the Lord Stair's Chaplain at Paris.

“ rous action, it was ſet about, carried on, and finiſhed without any ſollicitation, except “ that of his Grace's Lady (*w*). And which ought not to be forgotten, is the kind ‘ and hoſpitable treatment of gentlemen at the palace there; conſtant charities were [illegible]ached out to the unfortunate and diſtreſſed; a great number of the poor inhabitants “ were cloathed and fed, and liberal alms conveyed to the neceſſitous and modeſt poor.” His Grace left behind him no ſon, but ſix daughters; of whom the eldeſt, Amey, was married to Henry Seymour, Eſq; of Handford in Dorſetſhire; the ſecond, Etheldred, was married to Thomas Bennet, Eſq; of Norton Bavant in Wiltſhire; the third, Heſter, firſt to Richard Broderip, Eſq; of Mapperton in Dorſetſhire, and next to Thomas Strode, of Parnham in the ſame county, Eſq; the fourth, Dorothy, to James eldeſt ſon of Sir James Pennyman, of Ormſby in Yorkſhire, Bart. the fifth, Magdalen, to William Churchill, of Henbury in Dorſetſhire, Eſq; and the ſixth, Mary, to Dr John Lynch, D. D. Dean of Canterbury. By his laſt will he bequeathed his library of printed books and MSS. together with a curious collection of coins, the whole valued at ten thouſand pounds, to Chriſt-church college Oxford, the place of his education. He was ſucceeded in the Archbiſhopric by the very learned and pious Dr John Potter. P

(*w*) She died about the year 1730.

WALKER [OBADIAH], a man of conſiderable learning in the laſt century, but ſo weak as to embrace the errors of Popery, was born at Worſperdate, or Worſput, near Barneſley, in the Weſt-Riding of Yorkſhire (*a*), in the year 1615. Towards the end of the year 1631, about the age of fixteen, he became a ſtudent of Univerſity-college, under the tuition of *Abraham Woodhead*, who proved afterwards one of the great champions for the Popiſh cauſe (*b*). On the 4th of July, 1635, Mr Walker took the degree of Batchelor of Arts (*c*); and Auguſt 10, the ſame year, was choſen Fellow of his college (*d*). Proceeding Maſter of Arts, April 23, 1638, he entered into Holy Orders, and became a noted Tutor (*e*): During the civil war, he was one of the ſtanding extraordinary Delegates of the univerſity for public buſineſs, and one of the Preachers before the Court at Oxford; for which laſt ſervice the Convocation granted him his Grace for Batchelor of Divinity, whenever he ſhould think fit to take that degree. The 22d of May, 1648, he was ejected from his Fellowſhip by the Parliamentary-Viſitors (*f*): Whereupon he went and travelled beyond ſea, and ſpent a conſiderable time at Rome, where he improved himſelf in all kinds of polite literature. After the Reſtoration he was re-inſtated in his Fellowſhip, but travelling abroad again with ſome young gentlemen, he ſpent more time in Rome; being undoubtedly become a ſecret convert to Popery. After his return he might have been elected Maſter of his college, on the death of Dr Thomas Walker, in 1665. However, he then declined that office, but accepted of it in 1676 (*g*), after the death of Dr Richard Clayton, who had ſucceeded Dr Walker in the Maſterſhip (*h*). At that time he was aſſiſtant to his tutor Ab. Woodhead, at his Seminary at Hogſdon, near London, in training up, or perverting, youths to Popery: wherein they did the nation a great deal of miſchief (*i*). For this, Mr Walker was openly complain'd of in Parliament [*A*]. After King James II. had been ſome time ſettled upon the throne, and was taking meaſures for eſtabliſhing Popery in every part of the kingdom, our author repair'd ſuddenly to London, January the 5th, 1685, in order to be conſulted and employed in that affair. At his return to college, about the end of the ſame month, he abſented himſelf from the chapel; and, in the beginning of March following, made no ſcruple of declaring himſelf a Papiſt, which expoſed him to many cenſures and inſults [*B*]. He had maſs privately in his lodgings, till he could fit up a chapel within the limits of his college; which having done by putting two lower rooms together, he opened the place for public uſe on Sunday, Auguſt the 15th, 1686. Wanting to publiſh ſome manuſcripts of his late tutor, Woodhead, and not caring to truſt them into the hands of the Licenſer of the Preſs, he obtained a ſpecial licence of the King for printing of them (*k*): But the printer permitting the ſheets to ſteal abroad into the world, as ſoon as they were compoſed (*l*); to prevent the like again, Mr Walker ſet up a preſs in the back part of his lodgings in Univerſity-college, from whence came out the moſt dangerous pieces againſt the Re-

[*A*] *For this he was openly complain'd of in Parliament.*] The firſt complaint againſt him there, was about the latter end of October, 1678, when the Popiſh Plot was newly diſcovered, and the generality of the nation were much exaſperated at the murder of Sir Edmundbury Godfrey. And the ſubject of the complaint was, his educating young men at Hogſdon in Roman Catholic principles; and expreſſing himſelf as very popiſhly affected, in his *Notes* on the *Life of King Ælfred*, then lately publiſhed; and therefore not fit to govern a college. But this affair was forced to give room to others of greater conſequence. The ſecond complaint was in April, 1679, when Sir Harbottle Grimſton, in a ſpeech to the Parliament, took occaſion to mention the printing of certain Books at the Theatre in Oxford, as the *Notes* on King *Ælfred's Life*, wherein were ſeveral matters, as he ſaid, that favoured of Popery; and Wood's *Hiſtoria & Antiquit. Univ. Oxon.* wherein alſo were certain things written againſt the Reformation of the Church of England, (which matter was put into his head by Dr Gilbert Burnet) beſides a Bible, wherein were many foul faults (1).

[*B*] *Which expoſed him to many cenſures and inſults.*] He became, upon that account, a by-word among the Proteſtants in Oxford and elſewhere; was abuſed to his face, when met with in the public ſtreets and lanes; and had ſongs made of him through the connivance of the Magiſtrate; one, in particular, which had theſe words, *Obadiah Ave Maria*, &c. The cenſure was not confined to him only. For, upon its being reported about ‘ that a Head of a College in Oxford had ‘ declared himſelf a Papiſt,’ ill-diſpoſed people did ſo much aggravate the matter, as to give out, ‘ that all ‘ the Univerſity were Papiſts;’ which gave great offence and uneaſineſs to many perſons (2).

formed Religion [*C*].—Upon King William's arrival, Mr Walker left Oxford, Nove ber 9. and both the chapel, and the other rooms, were cleared, and reduced to the former uſes (*m*). On the 11th of December, 1688, our Author, with Andrew Pult[illegible] the Jeſuit, late School-maſter at the Savoy, and others, took coach, in order to [illegible]draw into France: But, hearing that the populace were gathered together in Kent, on purpoſe to ſeize all the Papiſts that were flying beyond ſea, they turned back towards London. In their way thither being overtaken, they were carried to Feverſham, and impriſoned there; till being conveyed to London in ſafe cuſtody, Mr Walker was committed to the Tower. The 4th of February, 1688-9, the Vice-chancellor and Doctors of the univerſity of Oxford declared him Non-maſter, for being a Papiſt; and, the 15th of the ſame month, Edward Ferrer, ſenior Fellow of Univerſity-college, was elected Maſter in his room (*n*). About the 25th of October, 1689, he was brought by *habeas corpus* from the Tower to Weſtminſter-hall, and ſued for bail: but, inſtead of obtaining it, he was ſent for to the Houſe of Commons, where, ſtanding at the Bar, he was charged with ſeveral heinous offences [*D*]. Then he was remanded to the Tower for Treaſon, as having changed his Religion, and ſeduced others ſo to do. On the 31ſt of January, 1689-90, he was brought again from the Tower to the King's-Bench bar; and, being bailed upon good ſecurity given, was forthwith ſet at liberty. However, on the 23d of May following, he was excepted out of the Act of Pardon of King William and Queen Mary (*o*). From that time, he lived in a retired and ſtudious condition. For he was undeniably a man of learning, as appears by moſt of his Books, of which a particular account is given below [*E*]. He went and continued abroad for a while, as we

[*C*] *Whence came out the moſt dangerous pieces againſt the Reformed Religion.*] Moſt of theſe pieces being wrote by Mr Woodhead, have been already mentioned; to which we ſhall only add a remark upon the XV. entitled, *A compendious diſcourſe of the Euchariſt, to which is added two Appendixes*, &c. made by the author of the *Continuation of the preſent ſtate of the controverſy between the church of England and the church of Rome*, (3) as follows: 'It appears, ſays the author, by the ' heat and bitterneſs of theſe little ſatires, how much ' thoſe books [the replies to the two diſcourſes] had ' troubled him, and how unable he is to command ' himſelf even there, where he pretends the moſt to ' do it. One would have thought, after what the ' Repreſenter (4) had done, we had ſeen the height of ' what a licentious pen could ariſe to in matters of ſuch ' ſeriouſneſs. But, indeed, this poor impotent old man ' has convinced us of our error, and ſhewn ſuch an ' indecent paſſion in the management of his anſwer, ' as is much more to be pitied than valued.'

(3) Lond. 1688. 4to. p. 20.

(4) The Papiſt miſrepreſented and repreſented.

Mr Nicholſon and Mr Deane being alſo Coadjutors with Mr Walker in this cauſe, it may not be amiſs to give ſome account of them. Francis Nicholſon was the ſon of Thomas Nicholſon, of Mancheſter in Lancaſhire; was admitted of Univerſity-college, under the care of Mr Walker, at the age of 16; in 1666, took the degrees in Arts; and entring into Holy Orders, preached a while about Oxford, and afterwards at Canterbury, where he reconciled twelve fanatic pariſhioners to the Church. But being charged with maintaining ſome Popiſh doctrines in a ſermon preached before the Univerſity on Sunday, June 20, 1688, he was order'd to make a recantation; which being refuſed by him, his name was ſent to the Biſhops, to ſtop his further preferment. After King James's acceſſion, he declared himſelf a Papiſt, and acted as ſuch at London and elſewhere, and, on that King's abdication, he enter'd into the Engliſh college of Carthuſians at Newport in Flanders; but not well bearing the ſevere rules of that order, he left it in 1692 (5).

(5) Athen. Oxon. Vol. II. col. 939, 940.

Thomas Deane was ſon of Edward Deane, of Malden in Kent; admitted of the ſame college, aged 15, in 1669 took his degrees in Arts; was choſen a Fellow of his College, in Decemb. 1684, and became Tutor. Declared himſelf a Papiſt in March, 1685, much about the ſame time with his Maſter, Obadiah Walker, whoſe creature and convert he was; and with him too ſuffer'd many ſcorns and contempts in the Univerſity, till his receſs and leaving Oxford, on the arrival of the Prince of Orange in England, when he went to London, and was declared *Non ſocius*, 4 Febr. 1688. He was once or twice in priſon at London, as a Jeſuit, or Prieſt; and, December 18, 1691, ſtood in the pillory at Charing Croſs, under the name of Tho. Franks, a reputed Jeſuit, for concealing a Libel, or Pamphlet, againſt the government, written by a Fellow Lodger in the ſame houſe with him (6).

(6) Idem, Ibid.

[*D*] *He was charged with ſeveral heinous offences.*] As namely, 1. For changing his religion. 2. For ſeducing others to it. And 3. For keeping a Maſs-houſe in the univerſity of Oxford. To which he made theſe anſwers.——1. 'I cannot ſay that I ever alter'd my ' Religion, or that my Principles do now wholly agree ' with thoſe of the Church of Rome. Mr Anderſon ' was my governor and director, and from him in my ' youth I learned thoſe principles which I have ſince ' avowed. If they were Popiſh, I have not changed ' my Religion: And they will not be found to be ' wholly agreeable with the doctrine of the Roman ' Catholic church. 2. I never ſeduced others to the ' Romiſh Religion. All my Books and Precepts tend ' only to make men good Moraliſts and good Chriſtians: nor did I ever intereſt myſelf in perſuading any ' body to this or that party. This will be plain to ' every body that reads my books of *The Life of Chriſt*, ' my book *Of Education*, my book *Of Benefits* &c.'— *Parliam.* 'Thoſe very Books are not without exceptions; many Popiſh Doctrines are in them.'—— *Walker.* 'I ſuppoſe not, Gentlemen; my *Life of* ' *Chriſt* was licenſed by the Vicechancellor of Oxford, ' was reviſed by Dr J. Fell, who owned me for his ' friend, and who is ſufficiently known to have been ' no Papiſt; and it was peruſed by the preſent Profeſſor, Dr Jane.'——*Parl.* 'But there are Alterations in it from the copy reviſed, allowed, and licenſed.'——*Walk.* 'None, Sirs; I appeal to all ' that reviewed it: there is no alteration in that book, ' no paſſages therein inſerted that were expunged: ' and the like ſatisfaction ſhall be given in the reſt of ' my Treatiſes. 3. As to the Chapel, it was not ' more my gift than the Fellows of Univerſity-college. ' King James requeſted it of us, and we gave a part ' of it to the College to his uſe. The employment of ' it was according to his command, and I am only ' concern'd, as being one that obeyed him in it, *&c.*' Afterwards, Sir Henry Goodrick, Member of Parliament for Boroughbrigg in Yorkſhire, ſpoke thus:— ' I had the happineſs to be bred up under Mr Anderſon, and the misfortune to be educated with Mr ' Walker; and I affirm that he was not a man of ' thoſe Principles that Mr Walker charges him with.' (7)

we are informed (*p*); but returning to England, died at London, January 21, 1699, aged 86. And was buried in St Pancras church-yard [*F*].

V. He tranſlated the Life of King Ælfred, into Latin, from the Engliſh original of Sir John Spelman, Knight. It was elegantly printed at the Theatre at Oxford in 1678. *folio.* illuſtrated with Notes; adorned with ſeveral figures of King Ælfred, and with Five Plates of Saxon Coins, and a few Scottiſh ones. But the Notes were complained of in the Houſe of Commons, as favouring of Popery (9). How well or ill grounded that accuſation was, the Reader may beſt perceive, by peruſing thoſe Notes. The original of Sir John Spelman was publiſhed by Mr Hearne, at Oxford, in 1709. 8vo. VI. The next thing he publiſhed, was, ‘God's Benefits to Mankind.’ Oxford, 1680. 4to. VII. ‘Deſcription of Greenland. Deſcription of the Northern iſlands. Deſcription of Muſcovy and Ruſſia.’ Inſerted in the firſt volume of the Engliſh Atlas, commonly known by the name of Pitt's Atlas. Printed at Oxford, 1680. fol. VIII. ‘Some Inſtructions concerning the Art of Oratory, Collected for the uſe of a Friend, a young Student.’ Oxford, 1682. 8vo. 2d edit. corrected and augmented. IX. ‘An Hiſtorical Narration of the Life and Death of our Saviour Jeſus Chriſt, in two Parts.’ Oxford, 1685, 4to. There being ſeveral paſſages in this book favouring of Popery, the ſale of it was prohibited by the Vice-Chancellor of Oxford. X. ‘Some Inſtructions in the Art of Grammar; written to aſſiſt a young Gentleman in the ſpeedy underſtanding of the Latin Tongue.’ Lond. 1691. 8vo. XI. ‘The Greek and Roman Hiſtory illuſtrated by Coins and Medals. Repreſenting their Religions, Rites, Manners, Cuſtoms, Feaſts, Arts and Sciences. Together with a ſuccinct Account of their Emperors, Conſuls, Cities, Colonies and Families. In two Parts. Neceſſary for the Introduction of Youth into all the uſeful Knowledge of Antiquity, by O. W.’’ Lond. 1692. 8vo. This is the beſt Book of our Author, or indeed of any other upon the ſubject; and being grown ſcarce, is well worth reprinting (10). 'Tis divided into two Parts. The 1ſt of which treats, of the firſt Coin among the Romans. Of Medals, falſe, counterfeit, modern, and rare. Of Greek Coins. Of family or conſular Coins. Of the Reverſes of the *Medals.* Of the Romans Religion, Prieſts, Days, Aſſemblies, Countries, Colonies, Places, Magiſtrates, Wars, Victories, Rewards, *&c.* and their Games. In Part II. he gives a conciſe, curious, and critical account of the Roman Emperors, and of their moſt valuable Medals. At pages 24, 25, he gives theſe uſeful Directions for cleaning Braſs Medals; and for judging of the Rarity of Medals. ‘It is, ſays he, very hard to cleanſe a Braſs Medal from earth and ruſt. Some boil them half an hour in water with tartar, and a little alom, after they are cold rub them well with tanners ouze, or with bran; others paſs them over lightly with *Aqua fortis*. but this is dangerous, and by no means to be uſed in ſuch as are of mixed metals; others put them in the fire; but that commonly ſpoils them; others rub them with Tripoly, or a Wire-bruſh; but the beſt way is with the burin, or graving-tool, for them that know to uſe it, and have the patience.

‘Medals are eſteemed, 1. for their Antiquity, 2. for the goodneſs of their Maſter; the beſt Maſters were from Nero to Pertinax, a time of long peace; 3. for their well conſervation, cleanneſs, and beauty; 4. for their greatneſs; 5. for their erudition; 6. for their rarity; 7. to make up a ſeries. Now theſe Rules are obſerved by moſt of the Trade concerning their rareneſs and value. The Medals are rare, when of a perſon who reigned but a ſhort time; or but few made of him, or one that is ſingular of an Emperor of whom there are many common. Medals Contorniate, tho' of a bad maſter, are rare, and very much eſteemed, ſo are they which have the Face hollow, ſuch alſo as have two Heads upon them, whether on the ſame or divers ſides; ſuch as ſuch as have the buſt, or good part of the Body, with the Head; ſuch are many of thoſe who were only Cæſars, and not Auguſtus's; which have no reverſes, ſave only an inſcription. The Medals of the lower Emperors in great, and of the higher in little, are rarer. Great *Greek* Medals of the Emperors are not much more eſteemed than the leſſer, becauſe of their ill Maſters. Great Conſular Medals rare, if any at all. Medaglions of Gold and Silver very rare, if any at all, of Braſs alſo rare.’

[*F*] *And was buried in St Pancras Church-yard.*] The following ſhort Epitaph is cut in a ſtone, laid over his grave. ‘ⓦ per bonam Famam atque Infamiam obiit Jan. 21. 1692. Æt. 86.’ C

(*p*) From a friend's information.

(10) Mr R. Thoreſby, who commends this book, has given us learned remarks upon ſeveral of the coins in it. See Muſæum Thoreſbeian, annex'd to Ducat. Leodiens. Lond. 1714. fol.

WALLER [EDMUND], the moſt celebrated Lyric Poet that ever England produced, was the ſon of Robert Waller, Eſq; of Agmondeſham in Buckinghamſhire, by his wife, the daughter of John Hampden, of Hampden in that county, Eſq; and ſiſter to the much famed patriot of that name. She brought her conſort this ſon on the third of March (*a*) 1605, at a place called Coleſhill, which gives Hertfordſhire the honour of his birth (*b*). His father was bred to the Law, and practiſed in his profeſſion for ſome ſhort time; but ſoon growing diſguſted with the fatigue of that buſineſs, he quitted the bar, and retired to a country life (*c*): in which, following his inclination for agriculture, he managed his affairs with ſuch admirable ſkill and œconomy, as to leave his ſon an eſtate of 3500 *l. per annum*; a fortune which, together with his ancient and honorable deſcent [*A*], ſet him in the rank with ſome of the beſt gentlemen's families at that time in the kingdom. Being left an infant at his father's death, the care of his education devolved upon his mother, who at a proper age ſent him to Eton ſchool, from whence

[*A*] *His ancient deſcent.*] He was deſcended from a branch of the Wallers in Kent. Richard Waller, of Spendhurſt in that county, Eſq; was Sheriff of Kent 16th of Henry VI. of whom we have this remarkable account in the *Villare Cantium*, That he ſerved in the wars of France under Henry V. and ſignalized himſelf ſo far, that he took Charles Duke of Orleans, General of the French army, priſoner at the battle of Agencourt, whom he brought into England; and, according to the cuſtom of thoſe times, had the cuſtody of that Prince, and kept him in honourable reſtraint at Gromebridge, his ſeat, near Spendhurſt, as appears by a manuſcript in the Herald's office. The Duke was his priſoner there twenty-four years; and in the time of this receſs he rebuilt his manſion-houſe at Gromebridge on the old foundation. He was a great benefactor to the church of Spendhurſt, where his arms remain in ſtone-work over the porch; and in them we find an addition to the former bearing of the family, aſſigned by King Henry to him and his deſcendents, *viz.* a creſt, with the arms of France hanging by a label on an oak *, with this motto, *Hæc Fructus Virtutis*, in remembrance of the glorious ſervices of Richard Waller at Agencourt. From him Sir William Waller, who was Sheriff of Kent 22d of Henry VII. lineally deſcended; and tradition ſays, the family had then an eſtate of 7000 *l.* a year. But it was very much reduced in the time of Sir William Waller, who was one of the parliament generals in the wars of K. Charles I. which Sir William lineally deſcended from the former, of whom probably is that noble monument of Sir Walter Waller, and his Lady, who in the Roll of Sheriffs may by miſtake be written Sir William. We do not find at what time the Wallers of Buckinghamſhire removed thither out of Kent, and ſettled at Agmondeſham, but it ſeems not to have been long before the time of our poet's father; becauſe a family of ſuch fortune could not have eſcaped furniſhing the county with a ſheriff; and we find none of this name in the Rolls (1).

(*a*) The account of his life prefixed to his works, ed. 1711, p. 20. and inſcription on his monument. It appears from the pariſh-regiſter, that he was baptized on the 9th. Mr Wood therefore muſt be miſtaken in fixing his birth-day on the 22d of that month. Athen. Oxon. Vol. II. col. 25.

(*b*) Tho' Coleſhill is in the pariſh of Agmondeſham, it lies in the county of Hertford. Chauncey, hiſt. of Hertfordſhire.

(*c*) He often repented this choice, looking upon it as too idle. He was a man of parts and virtue, and wrote advice to his ſon; which manuſcript was in the hands of Mrs Waller, widow of Dr Stephen Waller, our poet's ſon. His life, p. 34.

* Mr Wood ſays it is a walnut-tree, Ath. Oxon. Vol. II. col. 25: which is not unlikely, as the arms are three walnut-tree leaves. See our poet's monument in Rem. [*MM*].

(1) Life of Waller, as in the text, p. 4, 5, 6.

he was removed to King's college in Cambridge (*d*); and the extraordinary proficiency he made in both thoſe nurſeries of learning is ſufficiently evinced by the ripeneſs of his parts ſo early, that he was deemed fit for a place in the great council of the nation long before his arrival at the years of manhood. He obtained a ſeat in the Houſe of Commons at the age of ſixteen or ſeventeen years [*B*]. That Houſe has been often obſerved to be the beſt ſchool in the kingdom for inſtruction in the knowledge of men, and to Mr Waller, who enter'd there ſo young, it was certainly ſuch a ſchool; and what improvements he made in it will be ſeen hereafter. At preſent his thoughts were turned to what was more agreeable at his years, the ſtudy of polite literature, and particularly to the cultivation of his genius for poetry; of which he produced ſuch a ſurprizing ſpecimen at the age of eighteen, as ſhews him to be born for excelling in that art. The Prince of Wales (afterwards K. Charles I.) having ſpent about ſix months in ſolliciting a marriage with the Infanta of Spain, was at length diſguſted at the affected delays which he met with in that Court, and reſolved on returning to England. The royal navy in which he embarked, under the command of the Earl of Rutland, arrived ſafely in the Bay of Biſcay, at the port of St Andere, whither he was attended from Madrid by the Cardinal Zapata, the Marquis Aytone, the Earls of Gondemar, Monterie, Baraias, and other Grandees, whom the Prince entertained magnificently on ſhipboard. But, in carrying them back to ſhore, there aroſe ſuch a furious tempeſt, that they could neither reach the land, nor regain the fleet; and night coming on when the rowers were fainting with toil, their horror was almoſt increaſed to deſpair. In this diſtreſs they found themſelves under a neceſſity of yielding to the mercy of the waves, till at laſt they ſpied a light in a ſhip near to which the ſtorm had driven them, wherein, not without great danger of being daſhed to pieces, they were ſafely received; and when the tempeſt abated, his Highneſs returned to the Admiral, and arrived at Portſmouth on the 4th of October 1623, when (as our Engliſh Cicero (*e*) expreſſes it) *the whole nation ſeem'd for joy to go out beyond its own ſhores to meet him.* The poem, as Mr Fenton obſerves (*f*), may ſerve as a model for thoſe who would ſucceed in panegyric, in which our Author illuſtrates a plain hiſtorical fact with all the graces of poetical fiction. Thus Mr Waller, like a true-born poet, burſt at once into perfection; and it is obſervable, that in none of his juvenile poems there are to be found any of thoſe ricketty exuberances, which generally diſgrace the productions of young poets. This was followed by another in the ſame taſte, addreſſed to the Queen, upon ſight of her Majeſty's picture. Mr Waller obtained a ſeat in the Houſe of Commons a ſecond time before he was of age of manhood, being choſen for the borough of Chipping Wycombe in Bucks in the firſt parliament of K. Charles I. which met on the 18th of June 1625 *; but in the third, which met on the 17th of March 1627, he was again choſen for Agmondeſham. This parliament being prorogued on the 26th of June 1628, to the 20th of October following, it was during that receſs that the horrid murder was perpetrated by Felton upon the Duke of Buckingham. The Court being then at Southwick, the ſeat of Sir Daniel Norton, about five miles from Portſmouth, where this tragedy was acted, his Majeſty, ſays Lord Clarendon, was at the public prayers of the church when Sir John

* From a copy of the return, communicated by Rob. Waller, Eſq; a deſcendent of our author, and member in the preſent parliament [1763] for that borough. Court Kalendar.

[*B*] *He obtained a ſeat in the Houſe of Commons at the age of ſixteen.*] So ſays the writer of his life †; and it is confirmed by ſome ſpeeches of his own, lately printed in Grey's collection of debates in parliament (2). This muſt be, therefore, in the third parliament of K. James I. which was called January 30, 1621, when he was in his ſixteenth year; and though the right of Agmondeſham, to ſend members, for which place he is ſaid to be returned, appears to have been then in ſuſpence (3), yet it was not unuſual in thoſe days for perſons in ſuch caſes to ſit there *ſub ſilentio* (4). And the right of that borough was, upon their petition to the King, re-eſtabliſhed in the enſuing parliament, which met at Weſtminſter in February 1624; but thereupon they choſe one Mr Crew, together with William Hakeville, Eſq; a lawyer, of Lincoln's Inn, who had been employed by them to draw and preſent their petition to his Majeſty (5). But as our author was then nineteen years of age, the writer of his life is apparently miſtaken in ſaying he repreſented Agmondeſham at ſixteen or ſeventeen (6) in the laſt parliament of K. James I. nor is this conſiſtent with that remarkable ſtory which is told by the ſame writer of his life, who ſays, that on the day of the diſſolution of this parliament he went to court, where he found the King engaged in a diſcourſe with the two Biſhops Neale and Andrews, of Durham and Wincheſter, to ſee the King at dinner, where he found Dr Andrews, Biſhop of Wincheſter, and Dr Neale, Biſhop of Durham, ſtanding behind his Majeſty's chair; and there happened ſomething very extraordinary, continues this writer, in the converſation thoſe prelates had with the King, on which Mr Waller did often reflect. His Majeſty aſked the Biſhops, *My Lords, cannot I take my ſubjects money when I want it, without all this formality in parliament?* The Biſhop of Durham readily anſwered, *God forbid, Sir, but you ſhould; you are the breath of our noſtrils.* Whereupon the King turned and ſaid to the Biſhop of Wincheſter, *Well, my Lord, what ſay you? Sir*, replied the Biſhop, *I have no ſkill to judge of parliamentary caſes.* The King anſwered, *No put-offs, my Lord; anſwer me preſently. Then, Sir*, ſaid he, *I think it is lawful for you to take my brother Neale's money; for he offers it.* Mr Waller ſaid, the company was pleaſed with this anſwer; and the wit of it ſeemed to affect the King: for a certain Lord coming in ſoon after, his Majeſty cried out, *Oh, my Lord, they ſay you lig with my Lady: No, Sir*, ſays his Lordſhip, in confuſion; *but I like her company, becauſe ſhe has ſo much wit. Why then*, ſays the King, *do you not lig with my Lord of Wincheſter there?* This ſtory is repeated here, though it has been already inſerted in the courſe of our work, not only becauſe for the delicacy of its entertainment it will bear to be ſerved up a ſecond time, but becauſe it muſt needs make a ſtriking impreſſion upon the mind of Mr Waller, one of the firſt rate wits of his time. Accordingly the laſt mentioned writer cloſes his account with an aſſurance that the truth of the converſation is not to be doubted, it having been often told Dr Birch by Mr Waller himſelf. It is certain, however, that the circumſtance of its being heard on the day of the diſſolution of the laſt parliament of that monarch muſt be a miſtake; ſince the laſt parliament of K. James I. had no other diſſolution except the diſſolution or death of the King. But both this circumſtance and the ſubject of the diſcourſe is perfectly agreeable to the account we have of the preceding or third parliament of this reign, which it is well known was diſſolved for the reaſon intimated in this diſcourſe (7). Conſequently this particular may be eſteemed a confirmation of Mr Waller's ſitting, as has been obſerved, in that parliament.

(3) This borough has only a preſcriptive right, which was become doubtful by a long diſuſe from the reigns of Edw. I. and II. when they ſent members, as appears in Prynne's Parliamentary Writs, vol. IV. p. 899.

(4) Grey's Debates, as before, vol. I. p. 355.

(5) Willis's Notitia Parliamentaria, under Agmondeſham.

(6) P. 8, 9. The words on his monument are, *Nondum octo decennaris inter ardua regni tractantes ſedem habuit a Burgo de Ameſham miſſus*, which correſpond very well with his being choſen for Ameſham in the 3d parliament of this reign.

(7) See the General hiſtories of England.

Hippeſley came into the room with a troubled countenance; and without any pauſe in reſpect of the exerciſe they were performing, went directly to the King, and whiſpered in his ear what had fallen out. His Majeſty continued unmoved, and without the leaſt change in his countenance, till prayers were ended; when he ſuddenly departed to his chamber, and threw himſelf upon his bed, lamenting, with much paſſion and with abundance of tears, the loſs he had of an excellent ſervant, and the horrid manner in which he had been deprived of him. The King's extraordinary behaviour on this occaſion inſpired our Author's Muſe; which produced that excellent poem, *On his Majeſty's receiving the news of the Duke of Buckingham's death.* Theſe and the above-mentioned incomparable verſes muſt needs raiſe the admiration and eſteem for their author among the poetical band [*C*]. But it was not his wit, his fine parts, nor his poetry that made him firſt publicly known; it was his dexterity and addreſs in carrying the daughter and ſole heireſs of a very rich citizen in London, Ann the daughter and heir of Edward Banks, Eſq; againſt a rival whoſe intereſt was eſpouſed by the Court (*g*), which uſually prevailed at that time. In the long intermiſſion of parliaments after the year 1628, Mr Waller retired to Beconsfield, and reaſſumed his ſtudies [*D*], in which he was particularly aſſiſted by his kinſman Mr Morley, then a ſtudent of Chriſtchurch college in Oxford, afterwards Biſhop of Wincheſter, with whom he carefully read over the beſt antient authors, and thereby greatly improved his taſte. Mr Morley, it is ſaid, attended him ſeveral years (*h*), during which interval he was introduced into that learned and polite ſociety, conſiſting of the Lord Falkland, Sir Francis Wenman, Mr Chillingworth, Mr Godolphin, and others [*E*]; and Lord Falkland introducing Mr Hyde, afterwards Earl of Clarendon, at the ſame time, there commenced a friendſhip between them, which continued till both were greater men. In the mean time Mr Waller's wife dying in childbed, left him a widower at the age of twenty-four or twenty-five years; and being of an amorous complexion, he preſently conceived a moſt ardent paſſion for the eldeſt daughter of the Earl of Leiceſter, the Lady Dorothy Sidney (*i*), whom he has rendered immortal, under the feigned name of *Sachariſſa* (*k*). From the ſucceſs he had experienced in his former flame, there was room to hope of meeting with the like favourable reception at Penſehurſt; but in this he found himſelf wretchedly miſtaken. For though he paid his adoration in ſuch ſtrains *as moved all hearts but her's he wiſhed to move* [*F*], yet all his addreſſes were ut-

(*g*) Clarendon, as before. The rival was Mr Crofts.

(*h*) See the Rem. [*E*].

(*i*) His life, p. 12.

(*k*) See his poems addreſſed to this lady, among which there is one upon her picture. Mr Waller had it at Hallburn, which he built about a quarter of a mile from Beaconsfield, his mother living in that town. That ſeat was afterwards rebuilt by Dr Stephen Waller, his ſon. Waller's life, p. 17.

[*C*] *Mr Waller's verſes muſt needs raiſe the admiration of the poetical band.*] Lord Clarendon, whoſe negligence in dates is to be lamented, ſeems to be miſtaken in the time of Mr Waller's birth, in ſaying that he did not apply himſelf to poetry till he was thirty years of age, or near it, when he ſurprized the town with two or three pieces of that kind (7); unleſs it be ſuppoſed that his firſt verſes were only handed about in MS. or printed without his name, which is ſcarcely probable. But this it muſt be confeſſed is not the only inſtance in which that noble hiſtorian turns the biaſs againſt Mr Waller; the reaſon of which will perhaps be gueſſed at before the end of this article.

[*D*] *He retired to his ſtudies.*] Lord Clarendon's account of this part of the poet's life leads to an opinion, this his preſent retirement was prompted by the nearneſs of his nature. 'Edmund Waller,' ſays the noble Earl, 'was born to a fair eſtate, by the parſimony or 'frugality of a wiſe father and mother; and he thought 'it ſo commendable an advantage, that he reſolved to 'improve it with his utmoſt care, upon which in his 'nature he was too much intent; and in order to that 'he was ſo much reſerved and retired, that he was 'ſcarce ever heard of till he had gotten a very rich 'wife in the city (8).' But there is a fine picture of Mr Waller, done by Cornelius Johnſon, now in the poſſeſſion of the family, upon which is this inſcription in letters of gold: *A. D.* 1629. *Ætat. ſuæ* 23. *Vita vix prima*——The Latin ſentence is indeed imperfect; but it has been conſtantly received in the family as a certain truth, that it was intended to inſinuate his retiring for the ſake of improving himſelf in his ſtudies at that time (9); and this is alſo conſonant to the account of this retirement by the writer of his life (10).

[*E*] *He was introduced to Lord Falkland's club.*] We have two different and even contradictory accounts of his introduction to this ſociety. The Earl of Clarendon prefaces his account of it thus. 'He [Mr Waller] 'had the good fortune to have an alliance and friendſhip with Dr Morley, who had aſſiſted and inſtructed 'him in the reading many good books, to which his 'natural parts and promptitude inclined him, eſpecially the poets; and at the age when other men 'uſed to give over writing verſes (for he was near 'thirty years of age when he firſt engaged himſelf in 'that exerciſe, at leaſt that he was known to do ſo) 'he ſurprized the town with two or three pieces of 'that kind; as if a tenth muſe had been newly born 'to cheriſh drooping poetry.' After this preface his Lordſhip proceeds as follows. '*The Doctor at that time 'brought him into that company, which was moſt celebrated for good converſation*; where he was received 'and eſteemed with great applauſe and reſpect (11).' On the other hand, the writer of Mr Waller's life, after mentioning his verſes on the Duke of Buckingham's death in 1728, tells us, that our author was then known at court, and careſſed by all the people of quality who had a reliſh of learning and wit: 'He was alſo,' continues this writer, 'one of that 'famous club with the Lord Falkland, Sir Francis 'Wainman, Mr Chillingworth, Mr Godolphin, and 'others. At one of their meetings, they heard a 'noiſe in the ſtreet, and were told, *a ſon of Ben Johnſon's* was arreſted: They ſent for him, and he proved 'Mr Morley, afterwards Biſhop of Wincheſter. Mr 'Waller liked him ſo well, that he paid the debt, 'which was no leſs than 100*l.* on condition that he 'would live with him at Beaconsfield, which he did 'eight or ten years together; and from him Mr Waller uſed to own he learned a taſte of the ancient poets, 'and got what he had of their genius. But it is evident by his poems written before this incident of 'Mr Morley's arreſt, that he had early acquired that 'excellent *Goût*, however he improved and enlarged 'it afterwards by Mr Morley's converſation and aſſiſtance, to whom this adventure proved very advantageous; for Mr Waller introduced him into that 'learned and polite ſociety, as Lord Falkland did 'Mr Hyde, Earl of Clarendon, at the ſame time, 'and the friendſhip continued between them till 'both were greater men (12).' We ſhall not abuſe the reader's time and patience by offering any conjectures in order to adjuſt theſe different accounts of our poet's admittance to Lord Falkland's club. It is a matter of little moment in itſelf, and ſhould have found no place here, had not the reputation of Lord Clarendon's memory been concerned in it. The reader will eaſily judge from the circumſtances, whether or no the balance turns on his Lordſhip's ſide by the advantage he muſt needs have of knowing the truth.

[*F*] *And move all hearts but her's he wiſh'd to move.*] In *The Story of Phœbus and Daphne applied* are theſe lines:

Yet what he ſung in his immortal ſtrain,
Tho' unſucceſsful, was not ſung in vain.
All, but the Nymph that ſhould redreſs his wrong,
Attend his paſſion, and approve his ſong.

terly

terly rejected, and even treated with diſdain. Diſappointment in love generally produces one of the two extremes, revenge or deſpair. Our lover ſunk into the latter of theſe extremes; in which unhappy circumſtance he concludes his laſt poem to the inflexible dame with declaring his reſolution to quit his home and country, and make a voyage to divert his deſpair [*G*]. It is generally reported that he was a proprietor of the Summer Iſlands; and, if ſo, it is not improbable he might go thither in company of his friend the Earl of Warwick, who had a large ſhare in that plantation. What ſtrengthens the conjecture is, that our author, in his poem on *The Battle of the Summer Iſlands*, lays the ſcene of the action that he records in that diviſion of Bermuda which bears the name of that Earl (*l*). There are ſome lines in this poem which ſhew it was written before Lady Dorothy's marriage to the Earl of Sunderland [*H*] in 1639, when the names of Sydney and Sachariſſa were laid down together, and were buried ſoon after in the arms of his ſecond wife Mary, of the family of Breſſe, or Breaux (*m*). Neither indeed was our poet of ſuch a humour, as to quarrel with the ſex for Sachariſſa's cruelty to him; we find him diverting the ſmart load of his ſufferings under that ſcorching flame, and placing himſelf in the milder beams of another beauty, the Lady Sophia Murray; for that, it ſeems, was the real name of *Amoret* [*I*]. It is evident alſo that his love for Sachariſſa did not make him forget what was due to the beauty of other ladies (*n*); and that they were not all of them ſo unjuſt to him as ſhe whom of all he moſt admired. His good fortune elſewhere might, perhaps, make him more eaſy under her treatment; and we find he was not of a diſpoſition to make any other uſe of the willow when ſhe married, than to hang his harp upon it [*K*]. There is no grounds to believe that any of Mr Waller's ladies were like the Laura of Petrarch, imaginary only; or that he wrote always like a gallant man, and not a lover: for he was in his younger years of a poetical complexion every way, and did not write of love only by theory (*o*). Among theſe, and ſuch perſons of his own ſex as were diſtinguiſhed by their genius and taſte for polite learning, he led a pleaſurable life during the long diſuſe of parliaments in this reign; enjoying his large fortune in a ſtate of independency on the court, where he was not the leſs acceptable, as he never

(*l*) Fenton's obſervations, p. 84. 8vo edition.

(*m*) It does not appear when he entered into this ſecond match, but it muſt have been ſome time before his baniſhment in 1643. ſince his daughter Margaret was born at Roan. See his life, p. 40.

(*o*) Life of Waller, p. 18.

[*G*] *In his laſt poem he concludes with a reſolution to make a voyage at ſea.*] The verſes are ſaid to be written in the Park at Penſehurſt, which conclude in theſe ſtrains.

> This laſt complaint th' indulgent ears did pierce
> Of juſt Apollo, preſident of verſe;
> Highly concerned that the muſe ſhould bring
> Damage to one whom he had taught to ſing:
> Thus he adviſ'd me; *On yon aged tree*
> *Hang up thy lute, and hie thee to the ſea;*
> *That there with wonders thy diverted mind*
> *Some truce at leaſt may with this paſſion find.*
> Ah, cruel Nymph! from whom her humble Swain
> Flies for relief unto the raging main;
> And from the winds and tempeſts does expect
> A milder fate than from her cold neglect!
> Yet there he'll pray that the unkind may prove
> Bleſt in her choice; and vows this endleſs love
> Springs from no hope of what ſhe can confer,
> But from thoſe gifts which heav'n has heap'd on her.

[*H*] *There are ſome lines in this poem which ſhew it was written before Sachariſſa's marriage.*] They are at the end of Canto I. and run thus.

> Oh! how I long my careleſs limbs to lay
> Under the plaintain's ſhade, and all the day
> With am'rous airs my fancy entertain;
> Invoke the muſes, and improve my vein!
> No paſſion there in my free breaſt ſhould move,
> None but the ſweet and beſt of paſſions, love.
> There while I ſing, if gentle love be by,
> That tunes my lute, and winds the ſtrings ſo high;
> With the ſweet ſound of Sachariſſa's name
> I'll make the liſt'ning ſavages grow tame.

[*I*] *We find him ſolacing himſelf with another beauty under the feigned name of Amoret.*] This Lady's real name remained a ſecret till it was diſcovered by Mr Fenton, who tells us he remember'd to have heard his Grace the late Duke of Buckinghamſhire [Sheffield] ſay, that the perſon whom Mr Waller celebrates under the title of Amoret, was the Lady Sophia Murray (13).

[*K*] *He hung his harp upon it.*] The letter which he wrote on this occaſion is turned in ſuch an uncommon caſt, that it will always be read with exquiſite pleaſure. It is addreſſed *To my Lady Lucy Sydney, upon the marriage of my Lady Dorothy, her ſiſter, to my Lord Spencer* (14).

Madam,

In the common joy at Penſehurſt, I know none to whom complaints may come leſs unſeaſonable than to your Ladyſhip; the loſs of a bedfellow being almoſt equal to that of a miſtreſs; and therefore you ought at leaſt to pardon, if you conſent not to the imprecations of the deſerted, which juſt heaven no doubt will hear.

May my Lady Dorothy, if we may yet call her ſo, ſuffer as much, and have the like paſſion for this young Lord whom ſhe has prefer'd to the reſt of mankind, as others have had for her; and may his love, before the year go about, make her taſte of the firſt curſe impoſed on womankind, the pains of becoming a mother!

May her firſt-born be none of her own ſex, nor ſo like her, but that he may reſemble her Lord as much as herſelf.

May ſhe, that always affected ſilence and retiredneſs, have the houſe filled with the noiſe and number of her children, and hereafter of her grand children; and then may ſhe arrive at that great curſe ſo much declined by fair Ladies, old age! May ſhe live to be very old, and yet ſeem young; be told ſo by her glaſs, and have no aches to inform her of the truth; and when ſhe ſhall appear to be mortal, may her Lord not mourn for her, but go hand in hand with her to that place, where we are told there is neither marrying nor giving in marriage; that being there divorced, we may all have an equal intereſt in her again! My revenge being immortal, I wiſh all this may alſo befall their poſterity to the world's end, and afterwards!

To you, Madam, I wiſh all good things; and that this loſs may in good time be happily ſupplied by a more conſtant bedfellow of the other ſex.

Madam, I humbly kiſs your hands, and beg pardon for this trouble from

Your Ladyſhip's moſt humble ſervant,

E. WALLER.

He lived to converſe with Lady Sunderland, when ſhe was very old. But his imprecation relating to her glaſs did not ſucceed; for my Lady knew ſhe had the diſeaſe which nothing but death can cure; and in a converſation with Mr Waller, and ſome other ladies and gentlemen, at the Lady Wharton's, at Woburn near Beaconsfield, ſhe aſked him in raillery, *When, Mr Waller, will you write ſuch fine verſes upon me again? Oh! Madam*, replied he, *when your Ladyſhip is as young again* (15). We have obſerved above that Mr Waller had a picture of her; and I have read ſome letters of her's to the Earl of Strafforde (16), which ſhew her to have been a lady of good ſenſe and politeneſs.

(13) Fenton's obſervations, p. 72.

(14) He ſucceeded at his father's death to the title of Earl of Sunderland, and was anceſtor to the preſent Duke of Marlborough.

(15) Waller's life, p. 15, 16

(16) They are printed in Stra forde's letters and ſtate paper &c.

made any application for preferments there. This gave him a favourable reception among people of all parties; his converſation being always entertaining and polite. It cannot, however, be doubted, but that his relation to the Hampden family inſtilled a diſlike to the demand of Ship-money, and ſome other practices in thoſe times; and conſequently that he never was acceptable to the reigning favourites, further than his muſe made him. He appears in that temper to have entered into the Houſe of Commons on the revival of parliaments in 1640; when, being again choſen for Agmondeſham, he not only voted but ſpoke for the redreſs of grievances before the granting of any ſupply [*L*]. This parliament, which met on the 13th of April and was diſſolved before the end of March, and has been generally called the Short Parliament, was ſucceeded the ſame year by the ever memorable Long Parliament, which met on the 3d of November following. Mr Waller repreſented Agmondeſham the third time; and continuing in the ſame ill humour at the late meaſures of the court, and particularly exaſperated by his uncle Hampden's ſufferings, when the King's right to levy the Ship-money was debated, he broke out with diſtinguiſhed ardency againſt it; and thereupon was choſen by the Commons to impeach Judge Crawley, who had been a buſy man in that affair. His ſpeech on this occaſion was inſpirited with ſuch an inflaming eloquence [*M*], as might, eſpecially if taken in conjunction with that in the preceding

[*L*] *He ſpoke for the redreſs of grievances before the ſupply ſhould be granted.*] In this ſpeech, which was ſpoken April 22d 1640, he has theſe words.

‘Let us do what poſſibly may be done with reaſon and honeſty on our parts to comply with his Majeſty's deſires, and to prevent the imminent ills which threaten us.

‘But conſider (Mr Speaker) that they who think themſelves already undone, can never apprehend themſelves in danger; and they that have nothing left, can never give freely. Nor ſhall we ever diſcharge the truſt of thoſe that ſent us hither, or make them believe that they contribute to their own defence and ſafety, unleſs his Majeſty be pleaſed firſt to reſtore them to the propriety of their goods and lawful liberties, whereof they eſteem themſelves now out of poſſeſſion. One need not tell you, that the propriety of goods is the mother of courage and the nurſe of induſtry, makes us valiant in war and good huſbands in peace. The experience I have of former parliaments, and my preſent obſervation of the care the country has had to chuſe perſons of worth and courage, makes me think this Houſe like the Spartans, whoſe forward valour required ſome ſofter muſic to allay and quiet their ſpirits, too much moved with the ſound of martial inſtruments. 'Tis not the fear of impriſonment, or, if need be, of death itſelf, that can keep a true-hearted Engliſhman from the care to leave this part of his inheritance as entire to poſterity, as he received it from his anceſtors.

‘This therefore let us firſt do, and the more ſpeedily, that we may come to the matter of ſupply; let us give new force to the many laws which have been heretofore made for the maintaining of our rights and privileges, and endeavour to reſtore this nation to thoſe fundamental and vital liberties, the propriety of our goods, and the freedom of our perſons: no way doubting, but we ſhall find his Majeſty as gracious and ready, as any of his royal progenitors have been, to grant us our juſt deſires therein. For not only the people do think, but the wiſeſt do know, that what we have ſuffered in this long vacancy of parliaments, we have ſuffered from his miniſters. That the perſon of no King was ever better beloved of his people; and that no people were ever more unſatisfied with the ways of levying monies, are two truths, which may ſerve one to demonſtrate the other: for ſuch is their averſion to the preſent courſes, that neither the admiration they have of his Majeſty's native inclinations to juſtice and clemency, nor the pretended conſent of the judges, could make them willingly ſubmit themſelves to this late *tax of ſhip-money*; and ſuch is their natural love and juſt eſteem of his Majeſty's goodneſs, that no late preſſure could provoke them, nor any example invite them to diſloyalty or diſobedience.’

Notwithſtanding the oppoſition preſſed with ſo much zeal againſt his Majeſty's meſſage to the Houſe for a ſupply, the writer of his life, having obſerved that as he did not come up to the heights of thoſe who were for an unlimited monarchy, ſo he did not go the lengths of ſuch as would have ſunk the kingdom into a commonwealth, proceeds to tell us, that ‘he had ſo much credit at court, that in this parliament the King particularly ſent to him to ſecond his demand of ſome ſubſidies to pay off the army: And Sir Henry Vane objecting againſt firſt voting a ſupply, becauſe the King would not accept it, unleſs it came to his proportion, Mr Waller ſpoke earneſtly to Sir Thomas Jermyn, Comptroller of the houſehold, to ſave his maſter from the effects of ſo bold a falſity: *For*, ſays he, *I am but a country gentleman, and cannot pretend to know the King's mind.* But Sir Thomas durſt not contradict the Secretary; and his ſon, the Earl of St Albans, afterwards told Mr Waller, that his father's cowardice ruin'd the King (17).’ The truth of this ſtory, which ſo little conſiſts with Mr Waller's ſpeech juſt mentioned, muſt reſt upon the credit of the relator.

(17) Waller's life, p. 20, 21.

[*M*] *His ſpeech againſt Judge Crawley was animated with an inflaming eloquence.*] This cannot be made to appear, but from drawing ſome extracts from it; and the wit with which they are ſharply pointed will always be entertaining. The ſpeech was ſpoken at a conference of both houſes in the painted chamber, July 6. 1641. Having by way of introduction, after the articles were read, declared his reverence to the dignity of a judge's place, he proceeds in theſe bitter terms. “But as all profeſſions are obnoxious to the malice of the profeſſors, and by them moſt eaſily betrayed, ſo (my Lords) theſe articles have told you how theſe brothers of the coif are become *fratres in malo*; how theſe ſons of the law have torn out the bowels of their mother. But this judge whoſe charge you laſt heard, in one expreſſion of his, exceeds no leſs his fellows, than they have done the worſt of their predeceſſors, in this conſpiracy againſt the commonwealth. Of the judgment for ſhip-money, and thoſe extrajudicial opinions preceding the ſame (wherein they are jointly concerned) you have already heard; how unjuſt and pernicious a proceeding that was in ſo public a cauſe, has been ſufficiently expreſſed to your Lordſhips. But this man, adding deſpair to our miſery, tells us from the bench, that ſhip-money was a right ſo inherent in the crown, that it would not be in the power of an act of parliament to take it away. Herein, my Lords, he did not only give as deep a wound to the commonwealth as any of the reſt, but dipt his dart in ſuch a poiſon, that, ſo far as in him lay, it might never receive a cure. As by thoſe abortive opinions ſubſcribing to the ſubverſion of our property, before he heard what could be ſaid for it, he prevented his own; ſo by this declaration of his, he endeavours to prevent the judgment of your Lordſhips too, and to confine the power of a parliament, the only place where this miſchief might be redreſſed: Sure he is more wiſe and learned, than to believe himſelf in this opinion, or not to know how ridiculous it would appear to a parliament, and how dangerous to himſelf; and therefore no doubt but by ſaying no parliament could aboliſh this judgment, his meaning was, that this judgment had aboliſhed parliaments.

The impoſition of ſhip money ſpringing from a pretended neceſſity, was it not enough that it was now grown annual, but he muſt entail it upon the ſtate for ever, at once making neceſſity inherent to the crown, and ſlavery to the ſubject? Neceſſity which diſſolving all law, is ſo much the more prejudicial to his Majeſty than to any of us, by how much the law has inveſted his parliament, have rendered it doubtful whether the ſweet or ſour paſſions were moſt in his nature, had the fire of this tranſient love of civil liberty in the public ſtate burned with as ſteady and uniform a flame, as did that of his fixed love for beauty in private life. But we ſhall have too much reaſon hereafter to mark the unſteadineſs of his political conduct *. In the mean time, no reſpect for his uncle Hampden could engage him to enter into that gentleman's deeper deſigns againſt his Prince, or biaſs him to any irreverence to the perſon of the King. For though he continued to vote for three years with thoſe who were moſt diſaffected to the adminiſtration, yet he kept up a fair correſpondence and underſtanding with the moderate men in the court; and when the great breach happen'd, which brought on a war between the King and parliament, if he forbore giving his attendance in the Houſe of Commons a few days, yet he returned with his Majeſty's leave to his ſeat there [*N*], *following the opinion of the then Lord Dorſet and the Neuters*; and even ſent the King a thouſand broad pieces to Nottingham, when his Majeſty ſet up his ſtandard there, on the 22d of Auguſt 1642. Yet he continued to ſtay with the parliament *(p)* till the plot, ſpeaking on all occaſions with great freedom and ſharpneſs; inſomuch that when the abſenting members alledged that *they did not come to the Houſe, becauſe they were not ſuffered to declare their opinions freely*; it was objected, *that was a groundleſs pretence, when all men knew what liberties Mr Waller took, and ſpoke every day with impunity againſt the ſenſe and proceedings of the Houſe (q)*. It is manifeſt that he was in great eſtimation among them; for after their loſs of the battle at Edge-hill, and the King's victorious march with his army towards London and thence to Oxford, he was one of the Commiſſioners appointed by the parliament to preſent their propoſitions for peace to his Majeſty at that city [*O*]. This won him a great reputation with all who wiſhed the King well; and ſuch Lords and Commons as really deſired to prevent the ruin of the kingdom entered into a great familiarity with him, as a man reſolute in their ends, and beſt able to promote them. All men ſpoke their minds freely to him, and thought themſelves ſecure in his fortune and natural warineſs *(r)*. In this ſituation he began to think that it lay in his power to do a ſingular piece of ſervice to his King and country, by forming a ſort of aſſociation to oppoſe the levying of taxes and carrying on the war. He had a ſiſter married to one Mr Tomkins, Clerk of the Queen's Council, a gentleman of a very good character, and of great intereſt and reputation in the city among thoſe who were for the old conſtitution and diſaffected to the parliament; from whom he learnt the diſpoſition of the citizens upon all accidents, which he freely communicated to his brother Waller, as the latter imparted to him what obſervations

* This part of his character has been ſeverely handled in a piece intituled *Dialogues Moral and Political*, printed in 1763, 8vo, Dialogue the firſt.

royal ſtate with a greater power and ampler fortune: for ſo undoubted a truth it has ever been that Kings as well as ſubjects are involved in the confuſion which neceſſity produces, that the heathens thought their Gods alſo obliged by the ſame; *Pareamus neceſſitati, quam nec homines nec Dii ſuperant.* This judge then having in his charge at the aſſize declared the diſſolution of the law by this ſuppoſed neceſſity, with what conſcience could he at the ſame aſſize proceed to condemn and puniſh men, unleſs perhaps he meant the law was ſtill in force for our deſtruction, and not for our preſervation; that it ſhould have power to kill, but none to protect us: a thing no leſs horrid, than if the ſun ſhould burn without lighting us, or the earth ſerve only to bury, and not to feed and nouriſh us. But, my Lords, to demonſtrate that this was a ſuppoſititious impoſed neceſſity, and ſuch as they could remove when they pleaſed; at the laſt convention in parliament a price was ſet upon it; *for twelve ſubſidies you ſhall reverſe this ſentence.* It may be ſaid that ſo much money would have removed the preſent neceſſity; but here was a rate ſet upon future neceſſity, *for twelve ſubſidies you ſhall never ſuffer neceſſity again, you ſhall for ever aboliſh that judgment.* Here this myſtery is revealed, this vizor of neceſſity is pulled off; and it now appears, that this parliament of judges had very frankly and bountifully preſented his Majeſty with twelve ſubſidies, to be levyed on your Lordſhips and the Commons."— He concludes thus: "What judgments your predeceſſors have given, and what puniſhments their predeceſſors have ſuffered for offences of this nature, your Lordſhips have already been ſo well informed, that I ſhall not trouble you with a repetition of thoſe precedents: only, my Lords, ſomething I ſhall take leave to obſerve of the perſon with whoſe charge I have preſented you, that you may the leſs doubt of the wilfulneſs of his offence.

His education in the inns of court, his conſtant practice as a counſellor, and his experience as a judge, conſidered with the miſchief he has done, make it appear, that this progreſs of his thro' the law has been like that of a diligent ſpy thro' a country, into which he meant to conduct an enemy.

Rode caper vitem, tamen hinc cum ſtabis ad aras,
In tua quod fundi cornua poſſit, erit.

He has cropt and infringed the privileges of a baniſhed parliament; but now it is returned, he may find it has power enough to make a ſacrifice of him to the better eſtabliſhment of the *laws*: and in truth what other ſatisfaction can *he* make his injured country, than to confirm by his example thoſe rights and liberties, which he had ruined by his opinion?"

[*N*] *If he forbore attending in parliament*, &c.] This matter is differently related. In the manuſcript account of his life, ſaid to be written by one of his neareſt relations, and who dwelt in his family, it is ſaid, when the war came on he did not leave the Houſe, but, as is before mentioned, followed the opinion of the Lord Dorſet and the Neuters; whereas Lord Clarendon's words are, When the rupture grew ſo hot between the King and the two Houſes, that very many of the members retired from thoſe councils, he [Mr Waller] with equal diſlike abſented himſelf. But at the time the ſtandard was ſet up, having intimacy and friendſhip with ſome perſons now of nearneſs about the King, with the King's approbation he returned to London.—By which, ſays the writer of his life (18), it is plain he did leave the Houſe; which opinion, as indeed the moſt probable, is adopted in the Text.

(18) His life, p. 23, 24.

[*O*] *He was one of the Commiſſioners ſent to Oxford with propoſals of peace.*] Whitlocke informs us, that 'When Mr Waller kiſſed the King's hand in the garden at Chriſt-church, his Majeſty ſaid to him, *Though you are the laſt *, yet you are not the worſt, nor the leaſt in our favour.*—The diſcovery of a plot,' continues Whitlocke, 'then in hand in London to betray the parliament, wherein Mr Waller was engaged, with Tomkins, Chaloner, and others, which was then in agitation, did manifeſt the King's courtſhip to Mr Waller to be for that ſervice (19).' But Mr Fenton, in relating the ſame ſtory, has given his Majeſty's words another turn. 'I am verily perſuaded, ſays he, 'that the compunction of ſoul which he [Mr Waller] received from this affectionate reproof, prevailed ſo far over the diffidence and caution of his nature, as to make him engage in that confederacy, which proved ſo calamitous to himſelf, and ſo fatal to ſome of his friends and aſſociates (20).'

* The right of precedence was due to the birth and quality of his fellow commiſſioners.

(19) Whitlocke's memorials, p. 67. edit. 1732.

(20) Fenton's obſervations on Waller's works, p. 122. 8vo edition.

he made from thoſe he converſed with. Mr Waller told him how many Lords and Commons were for a peace: Mr Tomkins made the ſame relation with reſpect to the moſt ſubſtantial men of London; which Mr Waller reported to the well affected members of both houſes, and Mr Tomkins to the well affected citizens: from whence they came to a concluſion, that if they heartily united in the mutual aſſiſtance of one another, they ſhould be able to prevent thoſe tumults which ſeemed to countenance the diſtractions, and the Houſes would be induced to terms of moderation. The Lord Conway at that time coming from Ireland incenſed againſt the Scots, and diſcontented with the parliament here, and finding Mr Waller in good eſteem with the Earl of Northumberland, and in great friendſhip with the Earl of Portland, entered into the ſame familiarity; and being a ſoldier, in the diſcourſes they had, inſinuated, that it was convenient to enquire into the numbers of the well affected in the city, that they might know whom they had to truſt to. Mr Waller telling Mr Tomkins this, the latter imparted it to his confidents there; and it was agreed that ſome truſty perſons in every pariſh and ward about London ſhould make a liſt of all the inhabitants, and by gueſſing at their ſeveral affections, compute the ſtrength of the party that oppoſed an accommodation, and of that which was for it. Lord Clarendon was perſuaded the utmoſt project in this deſign was to beget ſuch a combination among the party well affected, that they would refuſe to conform to thoſe ordinances of the twentieth part, and other taxes for the ſupport of the war; and thereby, or by joint petitioning for peace, and diſcountenancing the other who petitioned againſt it, to prevail with the parliament to incline to a determination of the war: But that as to letting the King's army into London, or raiſing an army there, or ſurprizing the parliament, or uſing any violence in or on that city, he could never ſee cauſe to believe [P]. But it unluckily happened, that while this combination was on foot, Sir Nicholas Criſp procured a commiſſion of array to be ſent from Oxford to London, which was carried by the Lady Aubigny, and delivered to a gentleman employed by Sir Nicholas to take it of her; and this being diſcovered at the ſame time that Mr Waller's plot was, the two conſpiracies were blended into one, tho' really two diſtinct deſigns (s) [Q], as has been obſerved before in theſe memoirs (t). The diſcovery of Mr Waller's plot is variouſly related: In the manuſcript written by one of his relations who lived in his family, it is ſaid, "he was betrayed by his ſiſter Price, and "her Preſbyterian Chaplain Mr Good, who ſtole ſome of his papers; and if he had not "ſtrangely dreamed the night before he was ſeized, that his ſiſter had betrayed him, "and thereupon burnt the reſt of his papers by the fire left in his chimney, he had certainly loſt his life for it." The Lord Clarendon reports it otherwiſe; that a ſervant of Mr Tomkins, who had curſorily overheard Mr Waller and his maſter diſcourſe of the ſubject, placed himſelf behind a hanging, and overheard him ſay enough to put him upon informing, in hopes of a reward: and ſo went to Mr Pym, and told him all he knew, or, adds my Lord, probably imagined. But however the diſcovery was made, the circumſtances of publiſhing it were ſuch as filled all men with apprehenſions. It was on Wedneſday the 31ſt of May, their ſolemn faſt-day, when being all at their ſermon in St Margaret's church, Weſtminſter, a letter was brought to Mr Pym, who with ſome of the moſt active members, roſe from their ſeats, and, after a little whiſpering together, went out of the church. Orders were immediately ſent to ſearch the priſoners who were malignants; and as ſoon as the Houſes met, they were told letters were intercepted going to the court at Oxford, that expreſſed ſome notable conſpiracy in hand, to deliver up the parliament and the city into the hands of the cavaliers, and that the time for the execution of it drew very nigh: upon which a committee was appointed to examine all perſons they thought fit to apprehend, and ſome nominated at that time; in conſequence whereof Mr Waller and Mr Tomkins were apprehended the ſame night, and others the next day [R]. It

(s) Ibid. p. 248, 249.

(t) Under Sir Nicholas Criſp's article, vol. III. p. 1522.

[P] *He could never ſee cauſe to believe any violence intended in it.*] The ſame is alſo profeſſed by Mr Waller himſelf. In his ſpeech at the bar of the houſe of commons, in order to ſhew that his crime was not properly cognizable by a court martial, he ſays, 'I 'ſhall humbly deſire you to conſider the nature of my 'offence; not that but I ſhould be much aſhamed to 'ſay any thing in diminution thereof: God knows, ''tis horrid enough (for the evil it might have occaſioned), but if you look near it, it may perhaps appear to be rather a civil than a martial crime, and 'ſo to have title to a tryal at the common law of the 'land; here may juſtly be ſome difference put between 'me and others in this buſineſs.

'I have had nothing to do with the other army, 'or any intention to begin the offer of violence to any 'body (21).'

His third
h inſerted
s works,

), 8vo.

[Q] *Sir Nicholas Criſp's and Mr Waller's were really two diſtinct deſigns.*] This likewiſe is averred by Mr Waller in his laſt mentioned ſpeech; where he declares, 'For ſo much as concerns myſelf and my part in this 'buſineſs (if I were worthy to have any thing ſpoken 'or patiently heard in my behalf) this might truly be 'ſaid, that I made not this buſineſs, but found it: It 'was in other mens hands long before it was brought 'to me; and when it came, I extended it not, but 'reſtrained it. For the propoſitions of letting in part 'of the King's army, or offering violence to the members of this Houſe, I ever diſallowed, and utterly 'rejected them (22).'

(22) Ibid.

[R] *Mr Waller, and Tomkins, and others were apprehended.*] Beſides this of Lord Clarendon, ſeveral other accounts are extant, particularly one by Mr Whitlocke (23), and another by Mr May (24). But the moſt authentic account of this plot is given by Mr Pym, who was appointed by the Houſe of Commons to acquaint the Lord Mayor and citizens of London with the particulars of it, as he did at a common hall in a long ſpeech; which being very ſcarce, we ſhall lay the ſubſtance of it before the reader, as follows. The title is, *A diſcovery of the great plot for the utter ruin of the city of London and the parliament, as it was at large made known by John Pym, Eſq; on Thurſday, being the* 18*th of June* 1643, *at a common hall, and afterwards corrected by his own hand for the preſs. Lond.* 1643. Having obſerved, 'that this plot aroſe from 'the aſhes of another deſign that failed, the actors 'thereof being diſappointed, fell preſently into conſultation how they might compaſs their former end 'in another way, whereby the parliament, the city, 'and

(24) May's hiſt. of the parliament of England which begun Nov. 3, 1640. b. III. c. ii. p. 45. edit. 1647. fol.

It is no wonder that ſo unexpected a cataſtrophe threw a man of Mr Waller's ſoft mold and pleaſurable caſt into the utmoſt confuſion and conſternation! Certain death with

'and the army were to be deſtroyed; he proceeds to declare the firſt ſtep in their preparation, which was to appoint a committee to meet and conſult often together.

'The next ſtep was to furniſh that committee with intelligence from the armies both of the King and parliament, and eſpecially to underſtand the proceedings of parliament.

'Having thus provided for intelligence, they projected to procure a commiſſion of array from the King to raiſe forces, and money for their maintenance, in order, as it is expreſſed in the commiſſion, to deſtroy the army under the command of the Earl of Eſſex.

He then acquaints them with the actors and agents in this buſineſs: 'That theſe were, firſt, ſome members of the city; 2. ſome members of the two houſes of parliament; 3. Mr Waller and Mr Tomkins, who were to be agents betwixt the parliament and the city; 4. Meſſengers to carry intelligence to the court at Oxford; 5. the Lord of Falkland, who kept a correſpondence with them from the court.

'They then deviſed a proteſtation of ſecrecy, and a warineſs in diſcovering the buſineſs to any of thoſe who were to be brought into the plot; that ſo if it came to examination, it ſhould never go farther than three by the ſame party that diſcovered it, and then thoſe two had the like power that any one of them might diſcover it to two others, that ſo ſtill it might be confined to three.

'Then there was a ſpecial obligation, as was pretended by Mr Waller, which he had made to thoſe that, he ſaid, were members of both houſes of parliament, and conſenting to this plot.

'In the next place, they thought of ſome means to encreaſe their numbers; for which purpoſe they reſolved to apply artfully to ſuch as were diſcontented with the tax and aſſeſſments of parliament, adviſing them to repair to the committee for eaſe.

'From this care of augmentation, they projected a way to diſcover how far their party extended; for which purpoſe they deſired a ſurvey to be made of all the wards and pariſhes in London and the ſuburbs and places adjoining; to obſerve thoſe that were for them, whom they called *right men*, and others that were againſt them, called *averſe men*, and a third ſort, whom they called *neutrals* and *indifferent men*.

'Having thus formed the deſign, they proceeded to bring it ſomewhat nearer to execution. The firſt ſtep that came into action, was procuring a commiſſion of array granted to ſeventeen perſons, whoſe names are mentioned in the proof, with power to name others to the number of twenty-one.

'In the next place, they obtained a warrant from the King to Mr Chaloner for receiving money and plate from all ſuch as, either by voluntary contribution or loan, would furniſh the King in this neceſſity; and thereby his Majeſty obliged himſelf to repay it.

'Then the liſt upon the ſurvey of the city being completed, except in ſome few pariſhes, was brought to Mr Waller; when the citizens entruſted therein declaring, that now they had done their part, and had diſcovered to them a foundation of ſtrength, they expected from them a foundation of authority and countenance; and that they would proceed no farther till they knew the names of thoſe members, that ſhould joyn them.

'Thereupon they were aſſured by Mr Waller, that they ſhould have members of both houſes to joyn them; that he himſelf was but their mouth; that he ſpoke not his own words, but theirs; that he was but their agent, and did their work; that they ſhould have of the ableſt, of the beſt, and the greateſt number; nay, that they ſhould pick and chuſe; that they ſhould not wiſh for a Lord, whom he doubted not to procure them.

'This done, Mr Waller propounded diverſe quæries, which had been framed, as he ſaid, by the Lords and Commons, in whoſe names he preſented them.

'Theſe quæries being for the removal of ſome difficulties or obſtructions that might hinder the work, were delivered to ſome of the citizens on Friday was ſev'night, and on Saturday morning were returned with anſwers.

'*Quærie* 1. What number of men are armed? Anſw. *A third part well armed, a third part with halberts, and another third with what they could get.*

'2. In what places are the magazines laid? Anſ. *At Alderman Fowkes's houſe, at Leaden-Hall, and at Guild-Hall.*

'3. Where ſhould be the rendezvous? Anſ. *At all the gates of the city, at the places of the magazines, in Cheapſide, in the Exchange, and at other places the Lords ſhould think fit.*

'4. Where was the place of retreat, if there ſhould be occaſion? Anſ. *They had Bampſtead Downs and Black-Heath in propoſition, but referred the concluſion of the place to the Lords.*

'5. What colours there ſhould be? Anſ. *At every rendezvous there ſhould be colours.*

'6. By what marks and tokens are they to be diſtinguiſhed and know their friends from their foes? Anſ. *They ſhould have white ribbons or white tape?*

'7. What ſtrength is there within and without the walls? Anſ. *Within the walls for one with them three were againſt them, but without the walls for one againſt them there was five for them.*

'8. What is to be done with the Tower? Anſ. *They could conclude nothing in that point.*

'9. Where the chief commanders dwelt? Anſ. *Every pariſh can tell what new commanders and captains they had, and who of the militia dwelt in it.*

'10. What time this ſhould be put in execution? Anſ. *The time is wholly left to the Lords.*

'Theſe quæries being thus propounded and anſwered, Mr Waller told them he would acquaint the Lords with their anſwers; and wiſhed them not to be troubled, tho' the Lords did not yet declare themſelves, for they could do them as good ſervice in the houſe.

'Being got thus far, it was propoſed to put the following things into execution.

'1. To take into their cuſtody the King's children that were here.

'2. To lay hold on all, or at leaſt a conſiderable number of perſons, whom they thought might oppoſe; ſome of whom were named, as the Lords Say and Wharton; and, beſides my Lord Major, there was named of the Commons Sir Philip Stapleton, Mr Hambden, Mr Strode, and, ſays Mr Pym, they did me the honour to mention me too.

'3. To ſeize all the committee of the city militia;

'4. To releaſe all priſoners that had been committed by the parliament.

'5. To ſeize on the magazines.

'6. To make a declaration to ſatisfy the people; ſetting forth, that they ſtood up for the preſervation of religion, the King's prerogative, the liberties of the ſubject, and the privileges of parliament. Of theſe 1000 were to be printed, and ſet upon poſts and gates in the moſt conſiderable and open parts of the city, where they were to be diſperſed as much as poſſible againſt the time it ſhould be put in execution.

'This was done upon Saturday laſt was ſev'night in the morning; and in the afternoon Mr Hazel was ſent from Mr Waller's houſe to give intelligence of their proceedings to the court at Oxford, in two meſſages; firſt, to tell Lord Falkland from Mr Waller, that he would give him a fuller notice of the great buſineſs very ſpeedily; and ſecondly, from Mr Tomkins, that the deſign was now come to good maturity, and that they had got ſo ſtrong a party in the city, that they would be able to put it in execution, tho' it ſhould be diſcovered. They promiſed to give notice to the King of the very day, and (if poſſible) of the very hour, wherein it ſhould be put in execution: and then they deſired, that when they had ſeized upon the outworks, ſome part of the King's army might come within fifteen miles of the city, who, upon knowledge of their proceedings, muſt be admitted into it. To both theſe meſſages the Lord Falkland bid the meſſenger tell Mr Waller, Tomkins, and one Hambden (25), that he could not well write, but prayed them to uſe all poſſible haſte in the main buſineſs.

'On the Tueſday following this Saturday, which was Tueſday was ſev'night, in the evening, Mr Waller being come home, told Mr Tomkins, who

'was

(25) Alexander Hambden, Mr Waller's couſin.

with all its terrors ſtarted up to his frighted imagination, and drove him to the uſe of ſuch diſhonorable means to eſcape it, as will for ever remain an indelible blot upon his memory [*S*]. Yet his unparalleled wit and dexterity in ſaving his life will be the admiration

‘ was then with him, that the very next morning, that was Wedneſday the faſt-day, he ſhould go to my Lord of Holland, and acquaint him with this plot, diſcovering ſo much to him as he thought fit; that he himſelf would go to ſome other Lords, and do the like; and both were ſo confident of ſucceſſe, that Mr Waller broke out with a great oath, that, *if they carried this plot throughout, they would have any thing*. This he ſpoke to Mr Tomkins with a very great deal of earneſtneſs and aſſurance.

‘ So far they went on in hope and expectation; but here they were cut ſhort. That very night there were warrants iſſued, upon ſome diſcoveries that were made of this plot, to the Lord Major and Sheriffs of this city, which, for the good thereof, they executed with ſo much diligence and care, that the next morning, when Mr Tomkins and Mr Waller ſhould have gone about their buſineſs, they were apprehended, and the reſt of the citizens diverſe of them; ſome eſcaped.’

He then proceeds to produce the evidence (26).

He concludes with ſeveral obſervations, ſetting forth the heinouſneſs of the crime, and the reſolutions paſſed in the Houſe of Commons on the occaſion.

‘ 1. To appoint a publick thankſgiving throughout the kingdom.

‘ 2. To acquaint the Houſe of Lords with the diſcovery and the proofs; which had been done.

‘ 3. To make a covenant, teſtifying their deteſtation of this miſchievous plot, and to joyn themſelves more cloſely in the maintenance of the common intereſt of the church and commonwealth in religion and liberty, which were ſtill in great danger (27).

‘ 4. To thank the Lord Major, Sheriffs, and other officers of the city, and to beg the continuance of their care.

‘ 5. To thank thoſe gentlemen that had the cuſtody of the priſoners.’

Laſtly, he communicated to them draughts of both the covenants [for there were two] one for the Houſe of Commons, which had been taken by all the members, and by thoſe that are named in the examinations to have been privy to the plot (which they had diſavowed); and laſtly had been reſolved on by the Lords (28).

This vow and covenant was ſo ſevere, that few, it is ſaid, ſwallowed it, but by compulſion; and many to avoid it fled to Oxford, whither alſo the Earl of Portland and Lord Conway went as ſoon as they had an opportunity (29). The conſpirators were arraigned at Guildhall, and Waller, Tomkins, Chaloner, Haſell, White, and Blinkhorne, were all condemned; and Tomkins and Chaloner were both hanged, Tomkins in Holborn, and Chaloner in Cornhill, both within ſight of their own dwelling houſes. Haſell died in priſon. Blinkhorne with others were reprieved, and afterwards ſaved by the mercy of the parliament and the Lord General.

Alexander Hambden, who was a relation of Mr Waller's, eſcaped (probably on account of his name) being proſecuted with the ſame ſeverity as others; yet the parliament ſuffered him to dye in priſon, though no judgment had been given againſt him (30).

[*S*] *His fright put him upon unjuſtifiable means to eſcape death.*] ‘ When he was ſeized,’ ſays Lord Clarendon, ‘ he was ſo confounded with fear and apprehenſion, that he confeſſed whatever he had ſaid, heard, thought, or ſeen; all that he knew of himſelf, and all that he ſuſpected of others, without concealing any perſon of what degree or quality ſoever, or any diſcourſe that he ever had upon any occaſion entertained with them: what ſuch and ſuch ladies of great honour, to whom, upon the credit of his great wit and very good reputation, he had been admitted, had ſpoke to him in their chambers of the proceedings of the Houſe; and how they encouraged him to oppoſe them; what correſpondence and intercourſe they had with ſome miniſters of ſtate at Oxford, and how they derived all intelligence thither. He alſo accuſed the Earl of Portland and the Lord Conway of being concerned in the agitations in the city, and the Earl of Northumberland of wiſhing them ſucceſs. The Earl of Portland and Lord Conway were impriſoned on his accuſation, and often confronted with him before the committee; where they as peremptorily denying as he charging them, and there being no other witneſs but he againſt them, they were kept a while in reſtraint, and then bailed. My Lord Northumberland (31), tho' charged by him to be a well-wiſher to the conſpiracy, yet on account of his great reputation, was proceeded againſt very tenderly.’

In regard to the Earl of Portland, the following letter to him from Mr Waller has been produced in his vindication by Mr Fenton *.

‘ My Lord,

‘ Having obtained leave to write to your Lordſhip, and having but a very little time to perform it in, I ſhall not make any apology to ſatisfy you (as I might do) of the way I proceed in; which, if it were to be tried by the rules of neceſſity and honour (even in the common acceptation thereof) if you knew all circumſtances, I doubt not but I ſhould be juſtified therein. My Lord, I beſeech you, know that this buſineſs was never meant for your knowledge either by the Lord Conway or Sir Hugh Pollard. The only reaſon I imparted it to your Lordſhip was, that by you (in whom I had ſo great confidence, both for your judgment and friendſhip towards me) I might be inſtructed how far that Lord Conway might be truſted, with whom Sir Hugh ſo often urged me to ſpeak. This you might perceive by ſome ſtrangeneſs towards you, when we firſt met at Pollard's chamber, and often after when that Lord whiſpered to me apart, which for the moſt part he did, when he mentioned the Earl of Northumberland. So that but for me, I think (nay I am confident) you had never known any thing of this buſineſs, which was by them prepared for another. And therefore I cannot imagine why you ſhould hide it ſo far, as to contract your own ruin by concealing it, and perſiſting unreaſonably to hide that truth, which without you already is and will every day be made more manifeſt. Can you imagine yourſelf obliged in honour to keep that ſecret, which is already revealed by another; or poſſible it ſhould ſtill be a ſecret, which is known to one of the other ſex (tho' for a time denied)? No, my Lord, be moſt aſſured, that if you perſiſt to be cruel to yourſelf for others ſakes that deſerve it not, it will, nevertheleſs, be made appear ere long, I fear, to your ruin. Sure if I had the happineſs to wait on you, I could move you to compaſſionate both yourſelf and me, who (as deſperate as my caſe is) am deſirous to dye with the honour of being known to have declared the truth, which God knows I have in every circumſtance, to the utmoſt of my remembrance. And once more I beſeech you, for God's ſake, the fountain of truth, to do the like. Much more I have to ſay (if I might be permitted to confer with your Lordſhip about it) whereby I can demonſtrate, that you have no reaſon in the conſideration of honour, profit, or friendſhip, vainly to contend to hide, what is already revealed, and ſhall at laſt be made moſt manifeſt, inconſiderately to throw yourſelf for the intereſt of others, and ſuch to whom you are leſs obliged than you are aware of, and to them to make a ſacrifice of your noble family; and (as much as in you lies) of the life and fortune of him, that has ever been moſt unfeignedly, and never more ſhew'd it than in the humble and hearty advice he now gives you, your Lordſhip's

‘ Moſt humble and moſt faithful
‘ Servant and kinſman,
‘ EDM. WALLER.

‘ May God in time direct your heart to that which is moſt pleaſing to him, and the only way to preſerve yourſelf before it be too late (32)!’

Mr Whitlocke tells us, that ‘ Mr Waller on his examination being aſked whether Selden, Pierpoint, Whitelocke, and others by name, were acquainted with the plot? He anſwered, that they were not; but that he did come one evening to Selden's ſtudy, where Pierpoint and Whitelocke then were with Selden, on purpoſe to impart it to them all; and ſpeaking of ſuch a thing in general terms, thoſe gentlemen did ſo inveigh againſt any ſuch thing, as

ration of all ages [*T*]. However, he did not eſcape without paſſing, as it were, thro' the fire: after being kept ſome time in priſon by the Council of War, he appealed to the Houſe of Commons, as one of their members; where he was condemned to perpetual baniſhment, and to pay a fine of ten thouſand pounds, and that after having diſburſed three times that ſum in bribes * to the leading men, in order to obtain their favour in procuring it. In theſe circumſtances he choſe France for the place of his exile; and being accompanied by his wife, he paſſed firſt to Rohan in Normandy; and taking up his reſidence there, his favourite daughter Margaret was born in that city, who was afterwards his amanuenſis. At length he removed to Paris, and not being diſpoſed to give into the churliſh humour of a malecontent, or the unmanly dejection of a diſgraced exile, he appeared with an eaſe and gaiety of mind which made him welcome to the greateſt men of that country: he lived with diſtinguiſhed hoſpitality, and even ſplendor, (*u*) and indulged himſelf in the delights of an elegant converſation, and often [*U*] entertained

* He is ſaid to have ſold eſtates of 1000l. per ann. on this occaſion. His life, p. 36.

(*u*) There was no Engliſh table but Mr Waller's, except that of my Lord St Albans, who was the Queen of England's prime miniſter when ſhe kept her court there. Ibid. p. 40.

'treachery and baſeneſs, and that which might be the 'occaſion of ſhedding much blood, that he durſt not, 'for the awe and reſpect which he had for Selden 'and the reſt, communicate any of the particulars to 'them, but was almoſt diſheartned himſelf to proceed 'in it (33).'

(33) Whitelocke's memorials, as before, p. 70.

[*T*] *His dexterity in ſaving his life will always be aſtoniſhing.*] The following account of it is given by the forementioned noble hiſtorian. 'After he had,' ſays the Earl, 'with incredible diſſimulation acted 'ſuch a remorſe of conſcience, that his trial was put 'off, out of Chriſtian compaſſion, till he might reco'ver his underſtanding (and that was not till the heat 'and fury of the proſecutors was reaſonably abated 'by the ſacrifices they had made) and by drawing 'viſitants to himſelf of the moſt powerful miniſters of 'all factions, had by his liberality and penitence, his 'receiving vulgar and vile ſayings from them with 'humility and reverence, as clearer convictions and 'informations than in his life he had ever had; and 'diſtributing great ſums to them for their prayers and 'ghoſtly counſel, ſo ſatisfied them, that they ſatisfied 'others; he was brought, at his ſuit, to the Houſe of 'Commons bar, where (being a man in truth very 'powerful in language, and who by what he ſpake, 'and in the manner of ſpeaking it, exceedingly cap'tivated the good-will and benevolence of his hear'ers, which is the higheſt part of an orator) with ſuch 'flattery as was exactly calculated to that meridian, 'with ſuch a ſubmiſſion, as their pride took delight 'in, and ſuch dejection of mind and ſpirit, as was 'like to cozen the major part, and be thought ſeri'ous, he laid before them their own danger and con'cernment, if they ſhould ſuffer one of their body, 'how unworthy and monſtrous ſoever, to be tried by 'the ſoldiers, who might thereby grow to that power 'hereafter, that they would both try thoſe they would 'not be willing ſhould be tried, and for things which 'they would account no crime; the inconvenience 'and inſupportable miſchief whereof, wiſe common'wealths had foreſeen and prevented, by exempting 'their own members from all judgments but their 'own *; he prevailed not to be tried by a council of 'war, and thereby preſerved his dear-bought life; ſo 'that in truth he does as much owe the keeping his 'head to that oration as Cataline did the loſs of his 'to thoſe of Tully; and by having done *ill* very well, 'he by degrees drew that reſpect to his parts, which 'always carries ſome compaſſion to the perſon, that 'he got leave to compound for his tranſgreſſion, and 'them to accept of ten thouſand pounds (which their 'affairs wanted) for his liberty. Whereupon he had 'leave to recollect himſelf in another country (for his 'liberty was to be in baniſhment) how miſerable he 'had made himſelf in obtaining that leave to live out 'of his own; and there cannot be a greater evidence 'of the ineſtimable value of his parts, than that he 'lived after this in the good affection and eſteem of 'many, the pity of moſt, and the reproach or ſcorn 'of few or none (34).' We have likewiſe a narrative of this extraordinary part which our author acted, and the reaſon of its prevalence, entirely agreeing in ſubſtance with that of Lord Clarendon, by another hiſtorian of a different ſtamp, and a bitter enemy to his Lordſhip; I mean Mr May, who was Secretary for that parliament; in theſe words. 'It was much won'dered at,' ſays he, 'and accordingly diſcourſed of 'by many at that time, what the reaſon ſhould be, 'why Maſter Waller being the principal agent in that 'conſpiracy (whereas Maſter Tomkins and Maſter 'Chaloner, who had been drawn in by him, as their 'own confeſſions even at their deaths expreſſed, were 'both executed) ſhould eſcape with life. The only 'reaſon,' continues this hiſtorian, 'which I could 'ever hear given for it was, that Maſter Waller had 'been ſo free in his confeſſions at the firſt, without 'which the plot could not have been ſo clearly de'tected, that Maſter Pym and others of the examiners 'had engaged their promiſe to do whatever they could 'to preſerve his life. He *ſeemed* alſo much ſmitten in 'conſcience, and deſired the comfort of godly mi'niſters, being extremely penitent for that foul of'fence; and afterwards in his ſpeech to the Houſe, 'when he came to be put out of it, much bewailed 'his offence, thanking God that ſo miſchievous and 'bloody a conſpiracy was diſcovered before it could 'take effect (35).' If Lord Clarendon expreſſes himſelf with greater indignation againſt the unmanly cowardice of his friend's heart, yet he does more honour than Mr May does to his eloquence.

* We are told by another author, that he was condemned by that council, and reprieved by the Earl of Eſſex the General.—Parliamentary Hiſtory under this year.

(34) Clarendon's hiſt. of this rebellion, book vii. as before.

(35) May's hiſt. of the parliament of England, &c. book iii.

[*U*] *Entertained himſelf with his muſe.*] Among others we find one addreſſed to Lady Morton, on New year's day 1650, at the Louvre in Paris, which will come under our notice hereafter. It will not be ſuperfluous to obſerve at preſent, how much reaſon Lord Clarendon had to impute his behaviour aſſumed as abſolutely neceſſary to ſave his life at ſuch a tribunal as he then pleaded before, entirely to diſſimulation, and acting a part. Conſonant to which we find him in this poem to Lady Morton lamenting the miſeries and the iniquity of the times. Thus he ſings:

Dark ſhades become the portrait of our time;
Here weeps misfortune, and there triumphs crime.

In the ſame vein he concludes with a prophetical preſage, or at leaſt a wiſh, of the reſtoration, addreſſed particularly to Henrietta Maria, youngeſt daughter of King Charles I. conveyed by Lady Morton ſecretly to France.

Born in the ſtorms of war, this royal Fair
Produc'd like lightning in tempeſtuous air,
Tho' now ſhe flies her native iſle (leſs kind,
Leſs ſafe for her, than either ſea or wind)
Shall, when the bloſſom of her beauty's blown,
See her great brother on the Britiſh throne:
Where peace ſhall reign, and no diſpute ariſe,
But which rules moſt, his ſceptre, or her eyes.

This Lady Anne Counteſs of Morton was daughter to Sir Edward Villiers, the great Duke of Buckingham's brother, and wife of Robert Douglaſs Lord Dalkeith; who on the death of his father ſucceeded to the earldom of Morton. She was one of the moſt admired beauties of that age, and the graces of her mind were not inferior to that of her perſon; for which reaſon ſhe was diſtinguiſhed by the concurrent choice of K. Charles I. and his Queen to be governeſs to the Princeſs Henrietta, whom ſhe conveyed in diſguiſe from Oatlands into France in 1646. At that time Mr Waller was there in exile, and to his private calamities had a large addition of ſorrow in ſeeing that coaſt covered with the wrecks of a royal family, which but a few years before he had beheld in ſo flouriſhing a ſecurity, that one might have reaſonably believed the greateſt violence of fortune would have beat on in vain. Nor was the reception they met with at the court of France equal to their affliction or dignity. We have the following account by Cardinal de Retz of a viſit which he paid at the Louvre. 'I 'went,' ſays he, 'to viſit the Queen of England, whom 'I found in her daughter's chamber, who hath ſince 'been tained himſelf with his muſe, and publiſhed the firſt edition of his poems in 1640 [*W*]. The chief ſupport of this magnificent way of life was derived from his wife's jewels; which he had taken along with him; but after ten years thus ſpent, being reduced, as he ſaid, to what he called the *Rump* jewel, it was time for him to think of ſome means to obtain his return. The favour was procured by the intereſt of Colonel Scroope, who had married his ſiſter; at that gentleman's interceſſion he was permitted to return to England, and to his eſtate, which, though now reduced indeed to leſs than half of that left him *(w)* by his father, yet enough remained to ſupport him handſomely; he was ſatisfied with it, and ſtill preſerved his former independency on the court, reſiding moſtly at Hall Burn, a houſe built by himſelf about a quarter of a mile from Beconsfield *(x)*, where his mother dwelt [*X*]. Oliver had now enſlaved the nation under the title of Protector, and it cannot be denied, that Mr Waller acted in his circumſtances no inconſiſtent part in wearing the chain; and if he adored the author of his redemption, gratitude may be thought in a manner to hallow the ſacrifice. Cromwell took him into an extraordinary degree of favour, and converſed with him as an intimate friend and relation [*Y*]; and our poet repaid the condeſcenſion in that noble panegyric addreſſed in 1654 *To my Lord Protector of the preſent greatneſs and joint intereſt of his Highneſs and this nation.*

(*w*) Ibid. p. 42.

(*x*) Ibid. p. 17.

'been created Dutcheſs of Orleans. At my coming in 'ſhe ſaid, *You ſee I am come to keep Henrietta company; 'the poor child could not riſe to day for want of a fire.* 'The truth is, that the Cardinal Mazarin for ſix 'months together had not ordered her any money towards her penſion; that no trades-people would truſt 'her for any thing; and that there was not at her 'lodgings in the Louvre one ſingle billet.—I remem-'ber'd,' proceeds he, 'the condition I had found her 'in, and had ſtrongly repreſented the ſhame of aban-'doning her in that manner, which cauſed the parlia-'ment [of Paris] to ſend forty thouſand livres to her 'Majeſty. Poſterity will hardly believe, that a Prin-'ceſs of England, grand-daughter to Henry the Great, 'hath wanted a faggot in the month of January, to 'get out of bed in the Louvre, and in the eyes of a 'French court *.' But it was owing to Mazarin, who, though a member of the ſacred college, ſeems to have reverenced Cromwell more than his Maker.

* Cardinal de Retz's Memoirs.

It was likewiſe in our Poet's exile, that Mr Waller wrote the epitaph on Colonel Charles Cavendiſh, in which appear theſe lines:

Cromwell, with odds of numbers and of fate,
Remov'd this bulwark of the church and ſtate;
Which the ſad iſſue of the war declar'd,
And made his taſk to ruin both leſs hard.

This gallant gentleman was a younger ſon of William Earl of Devonſhire, and brother to that beautiful and very excellent Lady Rich, celebrated by our Poet †. His genius led him equally to excel in letters and arms. After he had made the tour of France and Italy, he embarked at Venice for Conſtantinople, and after a long circuit by land thro' Natolia, ſailed to Alexandria; thence to Cairo; viſited Malta in his courſe to Spain; and from Spain returning to Paris, he arrived in England about the end of May 1641, when the courſe of his ſtudies (in which Mathematicks engaged his principal attention) being interrupted by the rebellion, he was among the firſt who drew their ſwords in the crown's defence; and after many ſignal ſervices performed for the King in the North, he was ſlain at Gainsborough in Lincolnſhire, anno 1643, in the 23d year of his age. Cromwell, who commanded that party of rebels by which he was defeated, in a letter to the aſſociation, then ſitting at Cambridge, ſays, *my Captain lieutenant ſlew him with a thruſt under the ſhort ribs*; which may very well conſiſt with another account, that he was murthered in cold blood, after quarter had been offered, and he had accepted it ‡.

† In his Poem on the Death of Lady Rich.

‡ Memoirs of the family of Cavendiſh.

[*W*] *He publiſhed the firſt edition of his poems.*] They came out under the title of *Poems, &c. written by Edmond Waller, of Beconsfield, Eſq; lately a Member of the Honourable Houſe of Commons.* To which is added, *All the Lyrick Poems in this book were ſet by Mr Henry Lawes, Gent. of the King's Chappel, and one of his Majeſty's private Muſick.* In the Preface, which is addreſſed to a lady, whoſe name is concealed, we ſee, that his gayety and wit ſhined with as much brilliancy in his exile as ever. It begins thus:

'MADAM:

'Your commands for gathering theſe ſticks into a 'faggot had ſooner been obeyed, but intending to 'preſent you with my whole vintage, I ſtaid till the 'lateſt grapes were ripe: for here your Ladyſhip has 'not only all I have done, but all I ever mean to do 'of this kind. Not but that I may defend the at-'tempt I have made upon poetry, by the examples '(not to trouble you with hiſtory) of many wiſe and 'worthy perſons of our own times, as Sir Philip Sid-'ney, Sir Francis Bacon, Cardinal Perron (the ableſt 'of his countrymen) and the former Pope, who, they 'ſay, inſtead of the Triple-crown, wore ſometimes 'the Poet's Ivy, as an ornament perhaps of leſſer 'weight and trouble. But, Madam, theſe nightin-'gales ſung only in the ſpring; it was the diverſion of 'their youth, as ladies learn to ſing and play when 'they are children what they forget when they are 'women. The reſemblance holds further; for as you 'quit the lute the ſooner, becauſe the poſture is ſuſ-'pected to draw the body awry, ſo this is not always 'practiſed without ſome villany to the mind, wreſting 'it from preſent occaſions, and accuſtoming us to a 'ſtyle ſomewhat removed from common uſe. But 'that you may not think his caſe deplorable who had 'made verſes: we are told that Tully (the greateſt wit 'among the Romans) was once ſick of this diſeaſe, 'and yet recovered ſo well, that of almoſt as bad a 'poet as your ſervant he became the moſt perfect 'orator in the world. So that not ſo much to have 'made verſes, as not to give over in time, leaves a 'man without excuſe——'

Notwithſtanding this formal declaration and vow, it is evident he did but diſſemble. Poetry is in truth no more in a man's power than love; and he who thinks he is paſt it, may carry the paſſion with him to his grave, as Mr Waller did.

[*X*] *His mother reſided at Beconsfield.*] Here ſhe often entertained Cromwell during his uſurpation, he being related to her. But notwithſtanding her relation both to him and Colonel Hampden, ſhe was a royaliſt in her principles; and when Oliver viſited her at Beconsfield, ſhe would frankly tell him how his pretenſions would end. The uſurper uſed merrily to throw a napkin at her in return, and ſaid, *He would not enter into further diſputes with his aunt*; for ſo he uſed to call her, though not quite ſo nearly related. However, finding at laſt, that Mrs Waller was more in earneſt than he was in jeſt, and that ſhe correſponded with perſons of her own principles in favour of the King, ſhe was for ſome time made a priſoner to her daughter in her own houſe (36).

(36) His life, p. 6.

[*Y*] *The Protector received him as an intimate friend.*] Mr Waller frequently waited on the Uſurper, and, as he often declared, obſerved him to be very well read in the Greek and Roman ſtory; for his rude cant, and ſpiritual ſimplicity were downright affectation: than which nothing can be more evident from Mr Waller's obſervation, and his confeſſion to him. Our author often took notice, that in the midſt of their diſcourſe a ſervant has come in to tell him ſuch and ſuch attended; whereupon Cromwell would riſe and ſtop them at the door, where he would overhear him ſay, *The Lord will reveal, The Lord will help*, and ſeveral ſuch expreſſions; which, when he returned to Mr Waller, he excuſed, ſaying, *Couſin Waller, I muſt talk to theſe men after their own way*; and would then go on where they left off. This created in Mr Waller an opinion that he ſecretly deſpiſed thoſe whom he ſeemed to court (37).

(37) Ibid. p. 43, 44.

The deſign of this poem was to perſuade the nation to think itſelf ſafe and happy under the new Protector; and it was followed by another *Of a war with Spain, and fight at ſea*, in 1656: the principal aim of which was to recommend the Protector to their reverence under the title of King, which the uſurper ambitiouſly affected [*Z*]. This poem was crowned by a third inimitable poem on his great benefactor's death *; which being lamented in ſuch elevated and ardent ſtrains on that occaſion, is a convincing evidence as of the diſintereſtedneſs, ſo of the reality of his affection. This was taken notice of by King Charles II. to whom our poet addreſſed a copy of verſes *On his Majeſty's happy return*. The date of theſe coincides with the 55th year of his age, from which time Mr. Waller's genius is obſerved to begin to decline apace from its meridian (*y*); at leaſt, there is a ſpirit of humility that runs throughout the whole, which perhaps might ariſe from a ſenſe of the public and his own guilt in particular [*AA*]. We are told in the *Menagiana*, that when he preſented this poem to the King, his Majeſty ſaid, *he thought it much inferior to his panegyric on Cromwell. Sir!* replied Mr Waller, *We poets never ſucceed ſo well in writing truth as in fiction*. He was much reſpected and careſſed at the pleaſurable court of King Charles II. and looked on as one of the reigning wits there. His Majeſty always uſed him with great civility, and in his diverſions with the Duke of Buckingham and others conſtantly made Mr Waller a party, excuſing his not drinking with the company, in which while he drank only water, yet he had the dexterity to accommodate his diſcourſe to the pitch of theirs as it ſunk: whereupon Mr Savile uſed to ſay, *No man in England ſhould keep him company without drinking, but Ned Waller* (*z*). The gracious manner in which he was always received by the King encouraged him to aſk for the Provoſtſhip of Eton College [*BB*], which became vacant by the death of Dr John Meredith

* Againſt this poem and his panegyric there came out a ſevere anſwer, entituled, The Panegyric and Storm, two poetical epiſtles by Edmond Waller, vaſſal to the Uſurper, anſwered by more faithful ſubjects to his Majeſty King Charles II. printed abroad in ſix ſheets 4to. in 1659, and dedicated to George Earl of Norwich.

(*y*) Fenton's Obſervations, p. 118.

(*z*) Waller's life, p. 47.

[Z] *His aim was to obtain the title of King for the Uſurper, which he affected.*] Oliver finding his deſign perplexed with ſome difficulties, projected the ſcheme of engaging in a war with Spain, to be enabled by foreign ſpoil to eſtabliſh his government in what form and under what denomination he pleaſed, without depending on parliamentary counſel or ſupplies. With this view he concluded a peace with France againſt Spain, which is cenſured by Ludlow, Welwood, and others, for the falſeſt ſtep that he ever made, and the moſt fatal to the tranquillity of Europe. However, his own hopes were anſwered by the ſucceſs of that naval expedition, which is the ſubject of Mr Waller's poem *Of a war with Spain, and fight at ſea*, which will be illuſtrated by Lord Clarendon's account of the action. 'Montagu, a young gentleman of a 'good family, who had been drawn into the party of 'Cromwell, and ſerved under him as a colonel in his 'army with much courage, was ſent with an addition 'of ſhips to join with Blake, and joined in commiſ'ſion of Admiral and General with him. Blake hav'ing found himſelf much indiſpoſed in his health, 'and having deſired that another might be ſent to 'aſſiſt him, and to take care of the fleet, if worſe 'ſhould befal him. Upon his arrival with the fleet, 'they lay long before Cales, in expectation of the 'Spaniſh Weſt-India fleet, and to keep all ſhips from 'going out to give notice of their being there. After 'ſome months attendance they were at laſt compel'led to remove their ſtation, that they might get freſh 'water and ſome other proviſions which they wanted, 'and ſo drew off to a convenient bay in Portugal; 'and left a ſquadron of ſhips to watch the Spaniſh fleet, 'which within a very ſhort time after the remove of 'the Engliſh fleet came upon the coaſt; and before 'they were diſcovered by the commander of the 'ſquadron, Captain Richard Stayner, who was to 'the leeward, made their way ſo faſt, that when he 'got up with them, though he was inferior to them 'in number (having with him but two frigates, be'ſides that in which himſelf failed; the Spaniſh fleet 'conſiſting of eight men of war and gallions) they 'rather thought of ſaving themſelves by flight, than 'of defending themſelves: and ſo the Spaniſh admi'ral run on ſhore in the bay, and the vice-admiral '(in which was the Marquis of Bajadox, Vice-King 'of Mexico, with his wife and ſons and daughters) 'fired, in which the poor gentleman himſelf, his wife, 'and his eldeſt daughter periſhed; his other daugh'ter and his two ſons, and near one hundred others 'were ſaved by the Engliſh, who took the rere-ad'miral and another ſhip very richly laden, having 'above two millions of plate on board, which, toge'ther with the priſoners, were ſent to England; the 'reſt eſcaped into Gibralter (38).' Mr Waller concludes his poem in theſe lines:

With theſe returns victorious Montagu,
With laurels in his hand, and half Peru.
Let the brave generals divide that bough,
Our great PROTECTOR *hath ſuch wreaths enough;*
His conq'ring head hath no more room for bays.
Then let it be as the glad nation prays:
Let the rich ore forthwith be melted down,
And the ſtate fix'd by making him a crown:
With ermin clad, and purple, let him hold
A royal ſceptre, made of Spaniſh gold.

This crown, as is ſaid above, was greatly ambitioned by Oliver, but upon ſounding the minds of the army, particularly Fleetwood and Lambert, he found them ſo much averſe to it, that he concluded the ſafeſt way was to decline it; and therefore he ſent a meſſage to his parliament, declaring, that *he could not accept the government under the title of King* (39).

[*AA*] *A ſpirit of humility might ariſe from a ſenſe of his guilt.*] This guilt is hinted in this couplet of that poem:

Like your great Maſter, you the ſtorm withſtood;
And pity'd thoſe who love with frailty ſhew'd.

In this alluſion (40) he ſeems to touch tenderly upon his want of reſolution, that put him upon ſtooping to the uſe of the moſt abject means for ſaving his life, on an occaſion in which, ſays Lord Clarendon (41) *he ought to have been ambitious to have loſt it*. But whatever was the cauſe of his muſe's fainting on this occaſion, yet the ſymptoms of decay ſeem to be abated, when he wrote his poem afterwards *On St James's Park, as lately improved by his Majeſty*, in which he concludes a handſome compliment to the King, in theſe lines:

His thoughts riſe higher, when he does reflect
On what the world may from that ſtar expect,
Which at his birth appear'd, to let us ſee
Day, for his ſake, could with the night agree.
A Prince on whom ſuch different lights did ſmile,
Born the divided world to reconcile:
Whatever heav'n, or high-extracted blood,
Could promiſe or foretell, he will make good:
Reform theſe nations, and improve them more
Than this fair park from what it was before.

And in his *Advice to a Painter*, written when he was threeſcore, his addreſs *To the King* ends in a ſtrain, little, if at all, inferior to his moſt elevated pieces, thus:

Had the old Greeks diſcover'd your abode,
Crete had not been the cradle of their god;
On that ſmall iſland they had look'd with ſcorn,
And in Great Britain thought the Thund'rer born.

[*BB*] *He aſked the King for the Provoſtſhip of Eton College.*] In the preface to the edition of his poems in 1664,

(38) Clarendon's hiſtory of the rebellion, Vol. III. fol.

Meredith in 1665, and he obtained a grant of it from his Majeſty; but when the patent was brought to the Earl of Clarendon, then Lord Chancellor, his Lordſhip refuſed to ſet the ſeal to it, alledging, that by the ſtatutes of that college laymen were excluded from the provoſtſhip † [CC]. Mr Waller had ſet his heart upon this place, and the diſappointment ſunk ſo deep into his mind, that it made a breach in that ancient friendſhip which had ſubſiſted hitherto between the Chancellor and him, inſomuch that he joined warmly with the Duke of Buckingham in the proſecution of the Earl, and both voted and ſpoke for his impeachment in 1667 [DD]. The Chancellor going thereupon into baniſhment, Mr Waller applied again for the Provoſtſhip of Eton, upon the death of Dr Alleſtre in 1668, but to his infinite regret met with the like ill ſucceſs as before, the famous Dr. Zachary Cradock being choſen by the fellows of the college. The King, on Mr Waller's application for it, referred the matter to the privy council, before whom it was argued for three days by the beſt lawyers at that time. The reſult was, the council gave their opinion, that the place could not be held by a layman, according to the act of uniformity, ſince which the provoſts had always been inſtituted to it, as to a parſonage, by the Biſhop of Lincoln, in whoſe dioceſe it lies. Whereupon the King ſaid, he could not deſtroy an act of his own making (aa). And Mr Waller never reaped any real fruit for himſelf from his ſiding with the court in this or the following reign; only about the year 1685, when his couſin John Hampden Eſq; grandſon of the patriot, was proſecuted and condemned for high treaſon, Mr Waller had the favour of obtaining his pardon, and protecting his ſon from the need of one (bb). He ſat in all the parliaments of King Charles II. tho' never for Agmondeſham [EE]: and we find him frequently bearing a part in their debates (cc). But as his indolence and love of eaſe rendered him averſe to the fatigue of buſineſs, ſo he always refuſed to be in the commiſſion of the peace or

lieutenancy.

† See Preface to Dr Alleſtry's ſermons by Dean Fell.

(aa) Communicated by Francis Godolphin, Eſq; of Bayles near Eton, member of parliament for Helſton in Cornwall, 1763. N. B. Dr Cradock never printed any thing but a ſingle ſermon, which for the excellency thereof was generally called *Dr Cradock's Works.*

(bb) Waller's life, p. 48. compared with patriot Hampden's articles, Vol. IV. p. 2529, Remark [K]

(cc) Grey's debates of the houſe of commons, as before.

1664, apparently either written by himſelf, or by his immediate direction, he mentions his ſufferings for the royal cauſe, which, as ſays Mr Fenton, ſeems deſigned for a modeſt memorial preparatory to his ſtanding candidate for the provoſtſhip of Eton college, as he did ſoon after it was publiſhed. Speaking of the additional poems inſerted in that edition, his words are, 'For what has been done ſince, and now added, 'if it commend not his poetry, it muſt his philoſophy, which teaches him ſo chearfully to bear ſo 'great a calamity, as the loſs of the beſt part of his 'fortune, torn from him in priſon (in which, and in 'baniſhment, the beſt part of his life has alſo been 'ſpent) that he can ſtill ſing under the burthen, not 'unlike that Roman,

——*Quem demiſere Philippi,*
Deciſis humilem pennis, inopemque paterni,
Et Laris & fundi.——

'Whoſe ſpreading wings the civil war had clipp'd,
'And him of his old patrimony ſtripp'd.'

'Who yet not long after could ſay,

Muſis amicus, triſtitiam & metus
Tradam protervis in mare Creticum
Portare ventis—— (42).

'They that acquainted with the Muſes be,
'Send care and ſorrow by the winds to ſea.'

(42) Horace, Ode 26. lib. 1.

[CC] *Laymen are excluded from that provoſtſhip.*] No doubt Mr Waller took pains to ſearch for precedents on this occaſion, and 'tis certain that both Sir Henry Savile, made Provoſt by Queen Elizabeth, and Thomas Murray his ſucceſſor, appointed by King James I. (43) were laymen; as alſo was Sir Henry Wotton, put in by King Charles I. but upon conſulting the ſtatutes of the college afterwards, he took deacon's orders (44), and the provoſts, if I miſtake not, have ever ſince been of the clergy (45).

(43) Athen. Oxon. Vol. II. Col. 466, 468.

(44) See his article.

(45) It is a doubt whether Francis Rous, put into the place by the parliament during the rebellion, was in orders or not. Ath. Oxon. Vol. II. Col. 231: but if not, as Mr Wood ſeem[illegible] yet his caſe happening in ſuch times, cannot be drawn into a precedent.

[DD] *He voted and ſpoke for Lord Clarendon's impeachment.*] In the debates upon the firſt article of his Lordſhip's impeachment, Mr Waller ſaid, 'The advice given to the King I look upon to be this: To 'eſtabliſh a new government: To be governed by 'Janizaries inſtead of parliaments: To have a Divan and a great miniſter of ſtate, inſtead of a Vizier-Baſhau. A worſe plot than that of the 5th of November. There, if the Lords and Commons had 'been deſtroyed, there would have been a ſucceſſion, 'but here both had been deſtroyed for ever. Then 'in order to a juſt debate, conſider how the law looks 'on it: for though we may accuſe on leſs evidence 'than we may judge, yet we muſt be cautious in naming the crime: what therefore doth the law call 'this before the 25th Edw. III. then look whether 'the power of conſtructive treaſon be taken away 'ſince.'

Again, upon the 7th, 8th, 9th, and 10th articles, Mr Waller ſaid, 'To ſhew that Dunkirk was annexed 'to England, conſider that we were paſſing a bill for '1,200,000 l. but when we were making a preamble to 'the bill, we were to ſeek for reaſons for giving the 'money, ſeeing we had no war; ſome ſaid to Dunkirk, but we were told we ſhould take heed of looking 'upon it as annexed to the crown. But it was looked 'upon as a frontier town, and accordingly needed not 'bail. Therefore the ſale of it treaſon (46).'

(46) State Trials, Vol. II. edit. 1730, p. 559, 560, 561. 567.

From theſe and Mr Waller's ſpeeches in parliament before-mentioned, it is certain, that Lord Clarendon had no good reaſon to point the end of his remark upon this part of our Author's character ſo much to his diſadvantage. 'He (Mr Waller) ſays his Lordſhip, had been nurſed in parliaments, where he ſat when he was very young; and ſo when they were reſumed again (after a long intermiſſion) he appeared in thoſe aſſemblies with great advantage, having a graceful way of ſpeaking; and by thinking much upon ſeveral arguments (which his temper and complexion, that had much of melancholic, inclined him to) he ſeemed often to ſpeak upon the ſudden, when the occaſion had only miniſtered the opportunity of ſaying what he had thoroughly conſidered, which gave a great luſtre to all he ſaid, *which yet was rather of delight than weight*" (47).

(47) Life of the Earl of Clarendon, p. 24.

[EE] *He ſat in all the parliaments under Charles II.*] Mr Fenton tells us (*) that he was a member of the Houſe of Commons from the time of his leaving Cambridge in the reign of King James I. to the end of that parliament which was diſſolved in 1678. But neither does that gentleman nor the writer of Mr Waller's life give us any account of the particular places for which he ſerved. This taſk therefore has fallen to our ſhare, and ſome pains have been taken to ſupply the defect. The difficulty of determining this matter with regard to the parliaments in James Iſt's time has been already noted, and the point diſcuſſed. In the firſt parliament of Charles I. which met in 1625, he was choſen, tho' ſtill a minor, for Chipping Wycombe in Bucks (48). We cannot find that he ſat in the ſecond parliament of this reign, which alſo met in the ſame year. In the ſubſequent parliaments of Charles I. he repreſented Agmondeſham, as is obſerved in the text. It does not appear that he ſat (and it is morally certain he did not ſit) in the convention-parliament of Charles II. but in the next parliament which met at Weſtminſter, March 8, 1661. he ſerved for Haſtings in Suſſex (49); upon the diſſolution of which, January 25, 1678, another meeting March 6, the ſame year he was returned again for Chipping Wycombe (50). It is ſaid alſo, and from the records, that he was returned with Mr Sidney Godolphin to the laſt parliament of this reign, which met at Weſtminſter, October 21, 1680, But I have found no ſuch record; and I am aſſured by Francis Godolphin, Eſq; above-mentioned, that he never was choſen with any anceſtor or relation of his family for any borough in Cornwal. 'Tis true, mention is made of a Sydney Godolphin, ſecond ſon of Sir William Godolphin of

Godolphin

lieutenancy *(dd)*. He choſe to paſs his days with his muſe, in whoſe company he was ſupremely bleſt, and notwithſtanding the promiſe he made in his letter to the lady, prefixed to the firſt edition of his poems, he wrote on. Poetry had been the ſupreme delight of his youth, and he refreſhed his old age with the ſame cordial; and it cannot be denied, that whatever traces of decay may appear in his later compoſitions, yet Longinus's obſervation of Homer is juſtly applied to our poet; *it was the Old Age of Mr Waller.* Who would think that the verſes he wrote *On the Earl of Roſcommon's Tranſlation of Horace's Art of Poetry* were the compoſition of a man twelve years beyond his grand climacteric? for he was then ſeventy-five: yet he wrote on ſtill, and ſtill with beauty and ſpirit. However, not many years after this, he turned his muſe, as became his age, towards heaven; for which flight his ſoul had evidently been preparing. And though his *Divine Poems* were written at fourſcore and after, yet the ſame elevation and fire, though with a little fainter flame, glows in them as in his earlier productions. He intended to crown all his labours with the poem *Of the laſt verſes in the book*, which can never be too much admired: ſo natural are the images, ſo lively the repreſentation of old age, ſo feelingly does the author ſpeak of its infirmities, and all is ſo poetical! Never did old bard ſing with a ſweeter and more charming voice [*FF*]. Theſe ſurely will be allowed, if any thing can be allowed, to make atonement for the follies and irregularities which he fell into in the former courſe of his life; let them be all covered with this noble veil woven in the laſt ſtage of it. Some time before his death he purchaſed a ſmall eſtate, with a little houſe upon it, at Coleſhill, his birth-place, to which he frequently retired, but did not ſtay long: being once carried to dine there, he ſaid, *he ſhould be glad to die, like the ſtag, where he was rouſed (ee).* But in that he happened not to have his wiſh. He was at Beconsfield, when finding his legs begin to ſwell, he took his ſon-in-law, Dr Birch, with him to Sir Charles Scarborough, then at Windſor in attendance as firſt Phyſician to King James II. [*GG*]; and telling the Doctor he came to him as an old friend as well as phyſician to aſk him what that ſwelling meant, Sir Charles ſaid plainly, *Why, Sir, your blood will run no longer.* Whereupon Mr Waller repeated ſome verſes out of Virgil ſuitable to the occaſion, and received his ſentence very compoſedly *(ff)*. His laſt poems ſhew us, that his laſt years were ſpent in divine ſtudies, and that he had fortified himſelf againſt this hour by ſpiritual meditations, and making his peace with Heaven. The dropſical ſymptom increaſing, he ordered Dr Birch to give him the holy ſacrament, and deſire all his children to join with him. At the ſame time he profeſſed his Chriſtian faith with great earneſtneſs; telling them, he *remembered the Duke of Buckingham once talked profanely* before King Charles, and that he told him, *My Lord, I am a great deal older than your Grace, and believe I have heard more arguments for Atheiſm, than ever your Grace did; but I have lived long enough to ſee there is nothing in them, and ſo I hope your Grace will (gg).* He died on the 21ſt of October 1687, and was interred with his anceſtors in the church-yard at Beconsfield. Preſently after his deceaſe there came out a ſmall collection of poems upon him, conſiſting of panegyrics and elegies, by Monſ. St Evremond, Sir Thomas Higgins, the Honourable George Granville, Eſq; afterwards Lord Landſdowne, Sir Robert Cotton, Mr Rymer, and others. Nor was

Godolphin near Helſton in Cornwal, who was elected a burgeſs for that town in the ſhort and long parliaments, which both begun in 1640. This gentleman was a poet, and among other things tranſlated into Engliſh verſe *The paſſion of Dido for Æneas, as it is incomparably expreſt in the fourth book of Virgil.* This, ſays Mr Wood, being done (all but a very little) by our incomparable author, as well for virtue as wit, was perfected, completed, and publiſhed by Edmund Waller, of Beconsfield in Bucks, Eſq; London, 1658. 8vo. But this gentleman was killed in January or February 1642-3, fighting for the King at Chagford in Cornwal †. In which county however it is certain, Mr Waller was returned with Sir Cyril Wych for Saltaſh in the firſt and only parliament of James II. which met in 1685 ‡. He was then fourſcore; and yet Burnet obſerves, that he entertained the Houſe of Commons at that age §.

§ In the hiſtory of his own Times, p. 388, folio.

[*FF*] *Never did old bard ſing more ſweetly.*] The two laſt lines in this poem, *viz.*

Leaving the old, both worlds at once they view
That ſtand upon the threſhold of the new,

brought to my mind the two following lines in Mr Fenton's Epitaph:

Calmly he look'd on either life, and here
Saw nothing to regard, or there to fear.

The author of this epitaph is our late much famed bard Alexander Pope, Eſq; who was in truth not ſo much diſtinguiſhed by any ſtrokes of original wit of his own, as he was for improving thoſe of others; of which this is a remarkable inſtance. Nor does the improvement he made in number and harmony of our verſification after Mr Waller, who firſt refined it from the ore, redound leſs to his honour.

[*GG*] *King James II.*] Mr Waller wrote when he was paſt fourſcore a poem, intituled *A preſage of the ruin of the Turkiſh empire, preſented to his Majeſty King James II. on his birth-day.* That Prince was very gracious to him. His Majeſty one time ordered my Lord Sunderland to bid him ſee him in the afternoon: when he came, the King carried him into his cloſet, and there aſked him, *how he liked ſuch a picture? Sir,* ſays Mr Waller, *my eyes are dim, and I know not who it is. 'Tis the Princeſs of Orange,* ſays the King. Then ſays Mr Waller, *She is like the greateſt woman in the world. Who do you call ſo?* anſwered the King. *Queen Elizabeth,* ſaid he. *I wonder, Mr Waller,* reply'd the King, *you ſhould think ſo; but I muſt confeſs ſhe had a wiſe council. And, Sir,* ſaid Mr Waller, *did you ever know a fool chuſe a wiſe one?* The writer of his life tells a ſtory, which he ſays he had from Dr Birch himſelf, as follows: Mr Waller ſome time after being known to reſolve to marry his daughter to Dr Birch, the King was prevailed with to endeavour to hinder it; and for that end ordered a French gentleman of quality to tell him, *that the King wondered he could have any thoughts of marrying his daughter to a falling church.* He made anſwer, *Sir, the King does me very great honour, to take any notice of my domeſtic affairs; but I have lived long enough to obſerve, that this falling church has got a trick of riſing again.* If we may believe the writer of his life, Mr Waller was certainly in the ſecret of the Revolution; for he would often ſay, *The King would be left like a whale upon the ſtrand.* But theſe words ſeem to be nothing more than a judicious preſage grounded upon that unfortunate monarch's arbitrary proceedings, and the general diſcontent and murmuring of the people thereupon. However, it is not improbable, as this writer maintains, that Mr Waller might charge ſome about him not to meddle, till they ſaw the Prince of Orange already landed; and that his ſon and heir Edmund Waller, Eſq; then went in to the Prince (51).

(51) Waller's life, p. 52, 53.

his

his reputation confined to England; he was known to all the polite world. La Fontaine and St Evremond ſpeak with the higheſt commendation of his genius [*HH*]; but the ſureſt teſtimony we have of his merit is, that he lived ſucceſſively in great familiarity and friendſhip with the Lord Falkland, Sir Francis Wenman, the Earl of Northumberland, the Earl of Holland, the Earl of Leiceſter, the Counteſs of Carliſle, the Earl of St Albans, the Duke of Buckingham, the Earl of Dorſet, the Earl of Rocheſter, Sir Charles Sedley, the Dutcheſs of Mazarine, Monſr Bonrepaux, Monſr St Evremond, and many other perſons of the ſame rank and character. In ſhort, he was one of the moſt polite, the moſt gallant, and the moſt witty men of his time [*II*], and he ſupported that character above half a century; and his writings will immortalize his name. He was certainly the Father of our Engliſh verſification; yet he ingenuouſly declared, that it was *to* Fairfax he owed the harmony and ſweetneſs of it (*bb*). He undoubtedly ſtands firſt in the liſt of refiners. The tongue came into his hands like a rough diamond; he poliſhed it firſt, and to that degree, that all artiſts ſince him have admired the workmanſhip, without pretending to mend it (*ii*). It is ſurprizing, that between what Spencer wrote laſt and Mr Waller firſt, there ſhould not be much above twenty years diſtance, and yet the one's language, like the money of that time, is as current now as ever; whilſt the other's words are like old coin, one muſt go to an antiquary to underſtand their true meaning and value. Such advances may a great genius make, when it undertakes any thing in earneſt! We are no leſs beholden to him for the new turn of verſe he brought in, and the improvement he made in our numbers. Before his time men rhymed indeed, and that was all; as for the harmony of meaſure, and that dance of words, which good ears are ſo much pleaſed with, they knew nothing of it. Mr Waller's rhymes are always good, and very often the better for being new. It is a decided caſe by the great maſter of writing*, *Quæ ſunt ampla & pulchra diu placere poſſunt, quæ ſunt lepida & concinna* (among which rhyme muſt, whether it will or no, take its place) *cito ſatietate afficiunt aurium ſenſum faſtidioſiſſimum.* This he underſtood very well, and therefore to take off the danger of a ſurfeit that way, ſtrove to pleaſe by variety and new ſounds. Had he carried this obſervation among others, as far as it would go, it muſt methinks have ſhewn him the incurable fault of this jingling kind of poetry, and have led his later judgment to blank verſe. But he continued an obſtinate lover of rhyme to the very laſt: it was a miſtreſs that never appeared unhandſome in his eyes, and was courted by him long after Sachariſſa was forſaken. He had raiſed it, and brought it to that perfection we now enjoy it in; and the poet's temper (which has always a little vanity in it) would not ſuffer him ever to ſlight a thing, he had taken ſo much pains to adorn (*kk*). But who is abſolutely perfect? It has been obſerved, that there are ſeveral little overſights, improprieties, and ſlips of grammar to be found up and down in his works. We may add likewiſe, that ſometimes his thoughts are not ſo very juſt as, in all probability, they would have been, if he had been at the pains to reviſe them in his cooler ſeaſons [*KK*]. He left ſeveral children by his ſecond wife behind him, and bequeathed his eſtate

(*bb*) P. 66.

(*ii*) This was written before Mr Pope's appearance.

* Cicero ad Herennium, lib. iv.

(*kk*) Preface to the ſecond part of Mr Waller's poems, printed in 1690.

[*HH*] *La Fontaine and St Evremond ſpeak of him with the higheſt commendation.*] La Fontaine writing to Monſr De Bonrepaux, then in England, and afterwards the French Envoy to the Northern Crowns, ſays, *J'aye tant entendu dire du bien de Mr Waller, que ſon approbation me comble de joie*; I have heard ſo much ſaid in praiſe of Mr Waller, that I am overjoyed with his approbation. And ſpeaking of what that gentleman had written to him of Windſor, he ſays, *Il y'a pluſieurs choſes conſiderables; entre autres, vos deux Anacreons, Monſr de St Evremond & Mr Waller, en qui l'imagination & l'amour ne finiſſent point*; There are ſome things conſiderable; among others, your two Anacreons, Monſr de St Evremond and Mr Waller, of whoſe imagination and love there is no end. Mr St Evremond in a letter to La Fontaine, ſoon after our author's death, expreſſes his concern for the loſs in theſe terms: *Monſr Waller, dont nous regrettons la perte, a pouſſé la vigueur de l'eſprit juſqu'a l'age de quatre vingt deux ans*; Mr Waller, whoſe loſs we regret, enjoyed the full vigour of his wit at fourſcore and two years of age. Again, writing to my Lord St Alban's, he ſays, *Mr Waller vous garde une converſation delicieuſe; je ne ſuis pas ſi vain de vous parler de mienne*; Mr Waller keeps a delicious converſation for you; I am not ſo vain as to mention mine. Again, in his diſcourſe *des belles lettres; Je n'ay point, dit il, connu d'homme a qui l'antiquité ſoit ſi* [redacted] *qu'a Mr Waller; il lui prete ſa belle imagination, auſſi que ſon intelligence fine & delicate; en ſorte qu'il entre dans l'eſprit des anciens, non ſeulement pour bien entendre ce qu'ils ont penſé, mais pour embellir encore leurs penſées.* I never knew a man to whom antiquity is ſo much obliged, as to Mr Waller; he lends her his beautiful imagination, as alſo his fine and delicate underſtanding; ſo that he enters into the genius of the ancients, not only to underſtand rightly what they thought, but to embelliſh their thoughts ſtill more.

[*II*] *One of the moſt polite and witty men of his time.*] In this reſpect we find the Earl of Clarendon gives his teſtimony to Mr Waller. Speaking of the principal members in the Houſe of Commons in the long parliament of King Charles I. he ſays, 'There was of 'the Houſe of Commons one Mr Waller, a gentleman 'of very good fortune and eſtate, and of admirable 'parts and faculty of wit, and of an intimate converſation with thoſe who had that reputation (52).

[*KK*] *His thoughts are not always ſo very juſt, &c.*] There are two inſtances of this fault ſo notorious, that it is no wonder they have not eſcaped the ſharp-ſighted Dean Swift, who has not ſpared to give our poet among others a place in his *Art of ſinking in poetry*; where, under the article of what he calls *the Antitheſis or See-ſaw*, his firſt inſtance is taken from our author's verſes to Lady Morton, then at the Louvre in Paris, in 1650. In it bewailing the miſeries of the time in England, he concludes his lamentation thus:

Let him that draws it hide the reſt in night,
This portion only may endure the light:

which are followed by theſe two remarkable lines:

Where the kind nymph changing her faultleſs ſhape,
Becomes unhandſom, handſomly to 'ſcape.

Here, ſays the Dean, contraries and oppoſitions are balanced in ſuch a way, as to cauſe the reader to remain ſuſpended between them, to his exceeding delight and recreation (53). Again, in the ſame piece, under the claſs of diminiſhing figures, one of which is denominated *The Anticlimax*, are quoted as a ſpecimen of that figure the two following lines from our author's poem on the death of the Protector in 1658.

Under the Tropic is our language ſpoke,
And part of Flanders hath receiv'd our yoke (54),

where the ſecond line drops quite ſhort of the firſt, than

(53) Art of ſinking in poetry, ch. x.

(54) Chap. xi.

eſtate to his ſecond ſon Edmund, his eldeſt named Benjamin being ſo far from inheriting his father's wit, that he had not a common portion; and therefore was ſent to New Jerſey in America. William, the third ſon, was a merchant in London; and his fourth ſon, Dr Stephen Waller, was an eminent civilian, and was one of the Commiſſioners appointed for the Union of the two kingdoms. There was a fifth ſon, but we have met with no account of him. Edmund Waller, his heir, uſed to be choſen for Agmondeſham; and as in parliament he never eſpouſed the court or country party, he was generally looked upon as the head of what was thence called *The Flying Squadron*. He accepted of the commiſſions [of the peace and lieutenancy] which his father refuſed; and was eſteemed in his country as a very honeſt gentleman, and a man of good ſenſe *(ll)*. Nor was he without a taſte in poetry [*LL*], and a vein which would have ſhined more, had it not been

than which nothing creates greater ſurprize. Theſe are both paſſed over in ſilence, as utterly inexcuſable, by Mr Fenton, who yet modeſtly mentions an impropriety of Mr Waller's, thro' want of judgment, in the following ſong.

Stay, Phœbus, ſtay!
The world to which you fly ſo faſt,
Conveying day from us to them, can pay your haſte
With no ſuch object, nor ſalute your riſe
With no ſuch wonder as DE MORNAY's eyes.
Well does this prove
The error of thoſe antique books,
Which made you move
About the world: her charming looks
Would fix your beams, and make it ever day,
Did not the rowling earth ſnatch her away.

The latter ſtanza of theſe verſes (which certainly, ſays Mr Fenton, are of Mr Waller's earlieſt production) alludes to the Copernican ſyſtem, in which the earth is ſuppoſed to be a planet, and to move on its own axis round the ſun, the center of the univerſe. Dr Donne and Mr Cowley, proceeds this obſervator, induſtriouſly affected to entertain the fair ſex with ſuch philoſophical alluſions; which in his riper age Mr Waller as induſtriouſly avoided (55). The author of the Tatler remarks, that Mr Waller has the beſt and worſt verſes of any among our great Engliſh poets. He is charged in the ſame papers alſo with being guilty of a piece of falſe wit in the following *Epigram under a Lady's picture.*

Such Helen was; and who can blame the boy,
That in ſo bright a flame conſum'd his Troy?
But had like virtue ſhin'd in that fair Greek,
The am'rous ſhepherd had not dar'd to ſeek
Or hope or pity; but with ſilent moan
And better fate had periſhed alone.

But here the laſt mentioned candid critic ſteps in to our author's defence. 'I can much eaſier,' ſays he, 'agree with the author of the Tatlers, that every woman thinks herſelf deſcribed in the two firſt verſes, than that they are a piece of falſe wit; and I believe all the admirers of Horace, a numerous party! will ſupport me in diſſenting from his criticiſm. This expreſſion,

————*Non pulchrior ignis*
Accendit obſeſſam Ilion,

has hitherto never been accuſed of impropriety; and I think it is particularly commended by Dacier; whoſe countryman De la Foſſe approved ſo well of the whole ſix lines of Mr Waller, as to change them into a madrigal, and print them for his own. Yet ſhall we arraign him of wit-felony? or commend the perfect notion he had of the French nation, which would never have allowed the verſes to have been polite, if he had honeſtly confeſſed that they were imported from England?

Telle fut celle dont les charmes
Mirent toute la Grece en armes!
Trop heureux le Berger qui fut ſon favori!
Mais ſi la belle Grecque eut eu cet air modeſte
Paris a ſe patrie eut ete moins funeſtes
Le reſpect l'eut fait taire, a lui ſeul eut peri (56).

Monſr de Voltaire, writing lately ſeveral remarks upon the Engliſh nation, hath obſerved, 'that our author had been much talked of in France, and that his elogium had been written both by De la Fontaine, St Evremond, and Bayle; yet ſtill,' ſays he, 'his name only is known. He had much the ſame reputation,' continues this critic, 'in London as Voiture had at Paris, and in my opinion deſerved it better. Voiture, born with an eaſy and frivolous genius, was the firſt who ſhone in this aurora of French literature. Waller, though better than Voiture, was not yet a finiſhed poet. The graces breathe in ſuch of his works as are wrote in a tender ſtrain; *but then they are languid thro' negligence, and often disfigured with falſe thoughts.* The Engliſh had not in his time attained the art of correct writing. But his ſerious compoſitions exhibit a ſtrength and vigour, which could not have been expected from the ſoftneſs and effeminacy of his other pieces. He wrote an Elegy on Oliver Cromwell, which, with all its faults, is nevertheleſs eſteemed a maſter-piece (57).' Mr Fenton plainly had his eye upon ſuch a cenſure as this of Voltaire upon our author's negligence, in his obſervation upon *The verſes written in the Taſſo of her Royal Highneſs.* 'When the court was at Windſor,' ſays he, 'theſe verſes were writ in the Taſſo of her Royal Highneſs, at Mr Waller's requeſt, by the late Duke of Bucks; and I very well remember to have heard his Grace ſay, that the author employed the greateſt part of a ſummer in compoſing and correcting them: ſo that, however he is generally reputed the parent of thoſe ſwarms of inſect-wits who affect to be thought eaſy writers, it is evident that he beſtowed much time and care on his poems, before he ventured them out of his hands. That *illaborata facilitas,* which a great critic aſſigns for the diſtinguiſhing character of Cicero's proſe, may with equal propriety be apply'd to Sir George Etherege's ſtyle in his comedies, and to Mr Waller's verſification *.'

The celebrated Mrs Katharine Philips, well known by the feigned name of Orinda, makes the following criticiſm on Mr Waller's tranſlation of the firſt act of Corneille's tragedy of Pompey. In a letter to Sir Charles Cotterel (58), ſhe writes thus: 'I muſt then tell you, that Mr Waller's own act is not free, in my opinion, from juſt exceptions. The word *Roman blade* choques me very much; his frequent double rhymes in an heroic poem; his calling Pompey a conſul, when that was not in the orignal or the hiſtory, both the conſuls being with him at Pharſalia; Pharſalian Kites, for *les Vautours de Pharſale:* I cannot reliſh his Engliſhing *le dernier preuve de leur amitie,* their *new* friendſhip; and many additions and omiſſions of the author's ſenſe. I think a tranſlation ought not to be uſed as muſicians do a ground, with all the liberty to deſcant, but as painters when they copy. And the rule which I underſtood of tranſlation, till theſe gentlemen inform'd me better, was to write ſo Corneille's ſenſe, as it is to be ſuppoſed Corneille would have done, if he had been an Engliſhman, not confined to his lines nor his numbers (unleſs we can do it happily), but always to his meaning; or to ſay all, to tranſlate as the *Temple of death* is tranſlated (59), where the original appears in its own true undisfigured proportion, and yet beautified with all the riches of a mother-tongue. But, after all this, let me aſſure you, that what I have ſaid of thoſe gentlemen's tranſlation (6[redacted] engage you to tell me your opinion, rather than to ſpeak mine; which yet is, that all together it is an excellent piece, and done with great ſpirit and happineſs; and whoſoever ſhall attack it muſt ſhew themſelves either very envious, or very idle.'

[*LL*] *His ſon Edmund had a taſte in poetry.*] The writer of Mr Waller's life tells us he had ſeen ſeveral copies of verſes written by this his ſon and heir, moſtly upon

been ſet ſo near his father's. In the latter part of his life he embraced the ſect of the Quakers, as appears by his laſt will, in which he ordered, that a certain ſum ſhould be laid out on his funeral, and if there was any overplus, it ſhould be diſtributed among his poor friends the Quakers at Bath in Somerſetſhire, where he died in 1699, and his body was interred, by his own direction, in the Quakers burying-ground, five or ſix miles from that city, the Mayor and Aldermen attending it thither (mm). The mother of this gentleman obliged him to promiſe, he would lay out three hundred pounds in a monument for his father; and it was in conſequence of that promiſe, that the fine tomb was erected over our Poet's grave by his ſon's executors, Mrs Eliza Waller, John Fanſhaw, and Henry Gould, Eſquires. This monument ſtands in the church-yard of Beconsfield, where the Wallers were buried in little better than a common grave; but the vault was on this occaſion enlarged, and the tomb has all the advantages and decorations that could be deſired to honour the remains of ſo great a man (nn) [MM]. This ſon and heir dying without iſſue, gave the eſtate to Edmund Waller, the eldeſt ſon of Dr Stephen Waller. This gentleman is ſtill living; and his ſon Robert Waller, Eſq; is one of the members of the preſent parliament for Chipping Wycombe in Buckinghamſhire (oo).

upon religious ſubjects, and particularly one on divine worſhip, alluding to ſome verſes in Horace, where he hangs up his votive offerings after a poem.

——When love divine our breaſt inflames,
It calms the mind, and all our paſſions tames:
Down ſink the hills, and mountains melt away;
The vallies riſe, and night is turn'd to day.
The waters to their bidden ſeats remove,
And with the olive leaf returns the dove;
The ark then reſts, and man's again reſtor'd.
And Noah builds an altar to the Lord.

[MM] *His monument is handſomly decorated.*] It ſtands on the Eaſt ſide of the church-yard, near the vault of the family; at the Eaſt end of which grew a walnut tree, as alſo at the Weſt end (61). The tree at the Eaſt end was down in 1711, but that at the Weſt end is incloſed within the iron rails around the tomb; and branching Eaſt and Weſt, the Eaſtern branches hang over the ſpiral pillar, that riſes into them from the monument; and being a fair tree, has a very good effect. The inſcriptions on the tomb were written by Mr Rymer, Hiſtoriographer Royal, and are as follow.

On the Weſtern end.

EDMUNDI WALLER *hic jacet quantum morti ceſſit,*
Qui inter Poetas ſui temporis facile princeps,
Lauream, quam meruit adoleſcens,
Octogenarius haud abdicavit
Huic debet Patria Lingua quod credas,
Si Græce Latineq; intermitterent, Muſæ
Loqui amarent Anglice.

On the South ſide.

Heus, Viator, tumulatum vides EDMUNDUM WALLER
Qui tanti nomines Poetæ, & idem avitis opibus,
Inter primos, ſpectabilis; Muſis ſe dedit, & patriæ.
Nondum octodecenaris, inter ardua Regni tractantes,
Sedem habuit a Burgo de Amerſham miſſus.
Hic vitæ curſus: nec oneri defuit ſenex, vixitq; ſemper
Populo charus, Principibus in deliciis, admirationi omnibus
Hic conditur tumulo ſub eodem
Rara virtute & multa prole nobilis
Uxor, Maria ex Breſſyorum familia,
Cum Edmundo Waller, conjuge chariſſimo:
Quem ter & decies lætum fecit patrem,
V Filiis, Filiabus VIII.
Quos mundo dedit, & in cælum rediit.

On the Eaſt end.

EDMUNDUS WALLER *cui hoc marmor ſacrum eſt,*
Coleſhill naſcendi locum habuit, Cantabrigiam ſtudendi,
Patrem Robertum, & ex Hampdena ſtirpe matrem;
Cæpit vivere 3 Martii A. D. 1605.
Prima Uxor Anna Edwardi Banks filia unica hæres;
Ex prima bis pater factus, ex ſecunda tredecies.
Cui & duo luſtra ſuperſtes; obiit 21 Octobris,
A. D. 1687.

On the North end.

Hoc marmore EDMVNDO WALLER
Mariæq; ex ſecundis Nuptiis conjugi,
Pientiſſimis Parentibus piiſime parentavit
EDMUNDUS *filius.*
Honores bene merentibus extremos dedit.
Quos ipſe fugit.
El. W. J. F. H. G. ex teſtamento H. M. P.
Id. Julii 1700.

The children herein mentioned by his firſt wife, were a daughter, who married Mr Dormer of Oxfordſhire, and a ſon, who died young. The daughters by his ſecond match (for the ſons are mentioned above in the Text) were, 1. Margaret, the eldeſt, already mentioned. 2. Mary, the wife of Dr Birch. 3. —— married to —— Hervey, of Suffolk, Eſq; 4. —— married —— Tipping, of Oxfordſhire, Eſq; 5. Eliza, living in 1711, unmarried, executrix to her brother Edmund Waller, Eſq; 6. Dorothy, a dwarf, who was ſent into the North of England: 7. ——, of whom we have no account. 8. Octavia, ſo called from being the eighth (62).

E

(61) The walnut leaf being the arms of the family, they were fond of this *Rebus* in the ſcituation too, to borrow a term from heraldry.

(62) His life, p. 58, 59.

WALLIS [JOHN], the moſt eminent Mathematician of his time, was born Nov. 23, 1616, at Aſhford in Eaſt Kent, of which town his Father, Mr John Wallis, a pious, prudent, and orthodox Divine (and ſon of Robert and Ellen Wallis, of Thingdon (a) in Northamptonſhire) was then Miniſter (b), but did not ſurvive the birth of this his eldeſt ſon above ſix years. He died there on the 30th of November, 1622, leaving three young ſons, beſides two daughters (c), to the care of their mother [A]; who, upon this loſs, purchaſed a houſe in Aſhford, thinking it beſt to continue in town, for the ſake of her children's education. Accordingly, our Author, the eldeſt ſon, was

(a) or Fyenden, as it is generally pronounced.

(b) He was born in Janu. 1587, and bred at Trinity college in Cambridge, where he took both degrees in arts, and entring into orders, became miniſter of Aſhford toward the end of Queen Eliz. reign. See a letter to Dr Tho. Smith from Dr Wallis in Hearne's preface to Peter Langtoft's chronicle, Appendix, no. x. edit. 1725. in 2 vols 8vo.

(c) They were born in this order: Sarah, Ellen, John (the ſubject of the preſent article) Henry, and William. Ibid.

[A] *He left five children to the care of their mother.*] His ſon ſays (1), He was an eminent and diligent preacher; and by his prudent carriage kept that great town in very good order, and promoted piety to a great degree. Beſides his preaching twice on the Lord's day, and other occaſional ſermons, and his catechiſing and otherwiſe inſtructing the younger ſort, he did, with ſome of the moſt eminent neighbouring miniſters, maintain a week-day Lecture on Saturday, their market-day, which was much frequented (beſides a numerous auditory of others) by very many of the neighbour miniſters, juſtices of the peace, and others of the gentry; who, after ſermon, did uſe to dine at an ordinary, and there confer, as there was occaſion, about ſuch affairs, as might concern the welfare and good government of that town and the parts adjacent, wherein they were reſpectively concerned.

(1) In his letter to Dr Tho. Smith, printed by Mr Hearne in his preface to Langtoft's chronicle, as above.

firſt put to ſchool there; but the plague, which broke out in 1625, raging very much in that town, he was removed to Ley Green in the pariſh of Tenterden. He was nine years old, and had juſt enter'd upon the firſt rudiments of grammar, when he came hither to one Mr James Movat, a Scotchman, by whoſe care he was well grounded in that learning. Here the turn of his genius ſoon diſcovered itſelf, by leading him from the beginning not ſo much to learn the rules merely by rote, the uſual method of other boys, as by knowing the reaſon of them, his memory being rather more judicious than technical. In 1630, Mr Movat breaking up ſchool, in order to attend two young gentlemen in their travels, would gladly have taken young Wallis along with him; but his mother, not complying with that propoſal, ſent him, at Chriſtmaſs, ſeemingly againſt his inclination [*B*], to *Felſted* ſchool in Eſſex, where the celebrated Mr *Martyn Holbeach* was then Maſter. During the Chriſtmaſs holidays, in 1631, he went home to his mother at Aſhford; where finding that one of his brothers, to qualify himſelf for an apprentice in ſome trade, had been learning to cypher, he was inquiſitive to know what that meant; upon which his brother ſhew'd him his book, and went through all the rules gradually with him. He found no difficulty in working the queſtions; and was ſo much pleaſed with it, that in ten days or a fortnight he maſter'd the whole. This was his firſt inſight into mathematics, and all the teaching he ever had in that way: but the ſubject ſtruck his humour greatly, and he proſecuted this ſtudy at ſpare hours upon his return to Felſted; where he continued a year longer under Mr *Holbeach*, by whom he was inſtructed in the Latin, Greek, and Hebrew tongues, as alſo in the rudiments of logic, muſic, and the French language. Thus accompliſhed, he was ſent by his mother, about Chriſtmaſs 1632, to Cambridge, where he was admitted of Emmanuel-college, under the tuition firſt of Mr *Anthony Burgeſs* (*d*), next of Mr *Thomas Horton* (*e*), and at laſt of Mr *Benjamin Whichcot* (*f*). At his firſt entrance upon the academical ſtudies, he found it was no diſadvantage to have ſtaid a year or more at ſchool longer than perhaps he needed to have done, ſince, by the improvement he made there, he was able to keep pace with thoſe who were ſome years his ſeniors; and in logic he preſently obtained the reputation of a good diſputant (*g*) [*C*]. From logic he proceeded through the uſual courſe of ethics, phyſics, and metaphyſics; and taking in the ſpeculative parts of medicine and anatomy, he kept his public exerciſe in that branch of natural philoſophy, under Doctor *Gliſſon*, then Profeſſor of Phyſic at Cambridge; and was the firſt of that Profeſſor's ſons, who in a public diſputation maintained the circulation of the blood (*h*), in that univerſity. At the ſame time, our Author imbibed the principles of what was then called the new philoſophy. As to the mathematics, though he could not forbear indulging his genius when books of that kind fell occaſionally in his way, yet he formed no kind of plan for thoſe ſtudies, having none to direct him what books to read, or what to ſeek, or in what method to proceed; the mathematics being at that time more cultivated at London than in the univerſity [*D*]. Soon after his admittance into Emmanuel-college, he was choſen a Scholar of the houſe upon the foundation, and ſo continued during his ſtay at that college, from whence, in Hilary-term, 1636-7, he proceeded Batchelor of Arts, and commenced Maſter in 1640; when being choſen Fellow of Queen's-college [*E*], he

(*d*) He was afterwards Rector of Sutton-Cofield, and one of the aſſembly of divines at Weſtminſter. Baxter's dedication to his aphoriſms, in 1659. 12mo.

(*e*) He was afterwards maſter of Queen's college in that univerſity.

(*f*) See his article.

(*g*) He had been uſed to ſpeak Latin at ſchool, which he now found of great ſervice to him.

(*h*) This diſcovery was firſt publiſhed by Dr Hervey, in his book *De motu cordis & ſanguinis.* Franckf. 1628.

[*B*] *Seemingly againſt his inclination.*] Mr *Movat* had been entertained, for the education of his children, in the houſe of one Mr *Finch*, who permitted him likewiſe to teach ſeveral others in the neighbourhood, and our Author among the reſt. But, when Mr Finch's eldeſt ſon became fit to be ſent to the univerſity, Mr Movat was diſcharged from that family, and thereupon attended two of his ſcholars in their travels as Tutor. There was a deſign of taking Mr Wallis into the party; but upon mentioning it to his mother, ſhe did not like to have him at ſo great a diſtance from her, and inſtead of that ſent him to *Felſted*, which was a kind of academy at that time. He was then fourteen years old; and, ſays he, ' I was as ripe for ' the univerſity as ſome that are ſent thither; and ' Mr *Holbeach*, the Maſter of the Academy, told him, ' that he came better qualified than boys uſually did ' from other ſchools (2).'

[*C*] *A good diſputant.*] ' I ſoon,' ſays he in his letter to Dr Smith, ' became maſter of a ſyllogiſm, ' as to its ſtructure, and the reaſon of its conſe- ' quences, however cryptically propoſed, ſo as not ' eaſily to be impoſed on by fallacious or falſe ſyl- ' logiſms, when I was to anſwer or defend, and to ' manage an argument with good advantage, when ' I was to argue or oppoſe, and to diſtinguiſh am- ' biguous words or ſentences as there was occaſion.' By this account it ſeems as if the diſputations were managed more in ſyllogiſms, than they are in that univerſity at preſent.

[*D*] *Mathematics were more cultivated at London than in the Univerſity.*] He made no ſcruple of diverting from the common road of ſtudies then in faſhion to any part of uſeful learning, preſuming that knowledge is no burthen; ' and, ſays he, if of any part ' thereof I ſhould have occaſion to make uſe, it would ' at leaſt do me no hurt; and what of it I might not ' might not have occaſion for, I could not then fore- ' ſee.' On this account he diverted to geography and aſtronomy, and other parts of the mathematics, tho', at that time, theſe were ſcarcely looked upon as academical ſtudies, but rather eſteemed mechanical, and the buſineſs of traders, merchants, ſeamen, carpenters, or the like, and perhaps ſome Almanack-makers in London. And, amongſt more than 200 ſtudents at that time in *Emanuel* college, he did not know of any two (perhaps not any) who had more of mathematics than himſelf, if ſo much (which was then but little) and very few in the whole univerſity (3).

[*E*] *He was choſen Fellow of Queen's.*] He happened to be rendered incapable of having a fellowſhip at his own college, by the ſtatutes, of which it was provided, that there ſhould be no more than one Fellow at the ſame time of the ſame county; and there was already a Fellow of the county of Kent. Otherwiſe the ſociety had ſo great an eſteem for him, that he could not have miſſed of a fellowſhip there: As is evident from what paſſed when he firſt declared his deſign of leaving the college. Upon this occaſion, Dr *Richard Oldſworth*, then Maſter, ſhewed ſuch a particular kindneſs for him, that he had a conſultation with the Fellows about founding a new fellowſhip on his account, that he might not remove from them: But the times growing confuſed and troubleſome, there was no room for executing ſuch a deſign. He therefore removed to Queen's, apparently by the invitation of Dr *Horton*, his quondam Tutor, who was then become Maſter of that college. Our Author always

(3) Letter to Dr Smith.

he removed thither *. Being from the firſt deſigned for the Church [*F*], he had, in all his other ſtudies, continually kept his eye upon divinity, which he made it his principal care to cultivate, and became early acquainted with the ſyſtematic and polemic branches of it. Accordingly, he enter'd, this year, into Holy Orders, which he received from the hands of Dr *Walter Curle*, Biſhop of Wincheſter; and leaving his reſidence in the college, in 1641, he went to be Chaplain to Sir *William Darley*, at Buſtercramb in Yorkſhire. The next year, 1642, he removed thence, to attend, in the ſame ſtation, upon the Lady *Vere*, Widow of Lord *Horatio Vere*. This Lady, not chuſing to live altogether in the country *(i)*, reſided ſometimes in London, by which means our Author, not long after his coming into the family, met with an occaſion that firſt diſcovered his ſurprizing talent in the art of decyphering. It was about the beginning of the civil wars, when ſitting down to ſupper, a Chaplain of Sir *William Waller* ſhewed him, as a curioſity, an intercepted letter, written in cypher †, and aſked him, between jeſt and earneſt, whether he could make any thing of it? Notwithſtanding it was the firſt thing he had ſeen written in cyphers, yet, to his friend's great ſurprize, he ſaid, at firſt view, that perhaps he might unriddle it, if it proved no more than a new alphabet. As ſoon as ſupper was over, about ten o'clock, he withdrew to his chamber to conſider it; and by the number of different characters therein (not above twenty-two or twenty-three) judging it could be nothing but a new alphabet, in about two hours he decyphered it, before he went to bed, and ſent a copy of it, ſo decyphered, next morning to his brother Chaplain. The unexpected ſucceſs he met with in this firſt attempt ſoon brought him an opportunity of convincing all that applied to him, that he was abſolute maſter of that important ſecret [*G*]. He had always joined with the friends to the Parliament, and that party thought

always retained a grateful ſenſe of the favour, and gave a public teſtimony of his gratitude after his deceaſe, when he publiſhed a volume of his ſermons, with an account of his life prefixed: Which informs us, that he was ſon of *Laurence Horton*, citizen and merchant, and member of the mercer's company in London, where his ſon Thomas had his birth and firſt education. He was admitted a Penſioner of Emanuel-college, July 8, 1623; took the degrees in arts, in 1626; and, 1630, was choſen a Fellow of his college (4), and took Holy Orders; and proceeding B. D. in 1637, was appointed one of the twelve Univerſity-preachers. The following year, he was choſen Maſter of *Queen's-college* in Cambridge, and Miniſter of *St Mary Colechurch* London, a donative of the mercers company (5). In 1641, he was elected Divinity Profeſſor at Greſham-college (6), and Preacher at Gray's-Inn in 1647 (7). He was created D. D. in 1649, and the enſuing year was choſen Vice-chancellor of Cambridge; he entered into matrimony about 1651, and to ſecure his continuance at Greſham, he procured an order from the Committee of Parliament appointed to reform the Univerſities and other colleges, not to be removed from that place in caſe of marriage (8). In 1652, he was incorporated D. D. at Oxford (9), and the next year was nominated one of the Triers for Commiſſioners for the approbation of Miniſters (10). In 1656, the Greſham Committee having elected Mr George Gifford their Profeſſor of Divinity, Dr Horton procured a freſh diſpenſation from the Protector and Council, by the intereſt of Secretary Thurloe (11). After this the Doctor continued in the quiet poſſeſſion of his profeſſorſhip till the Reſtoration, and held it with his headſhip of Queen's college; but, Auguſt 2, 1660, he was ejected from this latter, to make room for Dr *Martyn*, who had been ejected April 11, 1644 (12). However, our Doctor had intereſt enough at Court (13) to obtain a new diſpenſation from his Majeſty to retain the Greſham Lecture (14). But this did not continue long; for, March 25, 1661, the King's commiſſion was iſſued out for holding the Savoy conference, in which Dr Horton was nominated as an aſſiſtant on the ſide of the Preſbyterians; and, ſoon after, the forementioned Mr Gifford, by a petition to his Majeſty, procured the grant of the Doctor's diſpenſation to be revoked, and himſelf to be re-elected June 7, that year. In 1662, Dr Horton was in the number of thoſe divines who were ſilenced by the Bartholomew Act; but he conformed afterwards (15), and, June 13, 1666, was admitted to the Vicarage of Great St Helen in Biſhopgate-ſtreet London (16), and held it till his death; which happening in 1673, he was buried in the chancel of that church under the communion-table (17), leaving behind him a widow, but no children (18). Dr Wallis gives him the character of a pious and learned man, a hard ſtudent, a ſound divine, a good textuary, very well ſkilled in the oriental languages, very well accompliſhed for the work of the miniſtry, and very conſcientious in the diſcharge of it (19). Mr Wood, as his manner is, tells us (20), the Doctor was a *Holder-forth* ſometimes before the Long Parliament. However, he publiſhed only three ſermons himſelf, the titles of which are, 1. *Sion's diſcovery and revenge. A Sermon preached to the Right Honourable the Houſe of Peers*, 30 December 1646. Lond. 1646. 4to. 2. *A Sermon preached on the* 5*th of November* 1654, *before the Lord Mayor and Court of Aldermen, at St Paul's Church.* Lond. 1655. 4to. 3. *A Funeral Sermon for Mr William Adams.* Lond. 1661. 4to. But after his death there came out, 4. *Forty-ſix Sermons upon the whole eighth chapter of the Epiſtle of the Apoſtle Paul to the Romans.* Lond. 1674. folio. 5. *A choice and practical Expoſition upon the IVth, XXVIIth, LIſt, and LXIIId Pſalms, in forty-five Sermons.* Lond. 1675. fol. 6. *One hundred ſelect Sermons upon ſeveral Texts, fifty upon the Old Teſtament, and fifty upon the New. To which is prefixed, ſome account of the Author's life, by Dr John Wallis.* 1679. fol. He alſo left behind him, prepared for the preſs, 1. *A Volume of Sermons on the ſeventeenth chapter of St John's Goſpel.* 2. *A Volume of Sacramental Sermons.* 3. *A Volume of Funeral Sermons.* Mr Wood alſo ſays, that he, with William Dillingham, D. D. and Maſter of Emanuel-college, did publiſh, *A Chain of Principles; or an orderly concatenation of Theological Aphoriſms and Exercitations, wherein the chief Heads of the Chriſtian Religion are aſſerted and improved.* Lond. 1660. *Written by John Arrowſmith, D. D. ſucceſſively Maſter of St John's and Trinity-college, and the King's Profeſſor of Divinity in the Univerſity of Cambridge; publiſhed ſince his death, according to his own Manuſcript.*

[*F*] *He was originally deſigned for the Church.*] It is evident from his ſchool-education, ſo different from that of his younger brother, who was bred to trade, that he was deſigned for one of the three learned profeſſions; and he was more inclined to the Prieſthood, than to Law or Phyſic, by his ſtrictly religious education from a child; 'whereby, ſays he, I was not 'only preſerved from vicious courſes, and acquainted 'with religious exerciſes, but was early inſtructed in 'the principles of religion and catechetical divinity, 'and the frequent reading of ſcripture and other good 'books, and diligent attendance on ſermons (21).

[*G*] *He was maſter of that important ſecret.*] Some while after his firſt ſucceſs, there was brought to him a letter of Mr Secretary *Windebank*, then in France, to his ſon in England, in a cypher hard enough, and not unbecoming a Secretary of State: it was in numeral figures, extending in number to above ſeven hundred, with many other characters intermixed, but yet not ſo hard as ſome which he met with afterwards. However, he was then backward at firſt to attempt it, and after he had ſpent ſome time upon it, threw it by in deſpair; but, after ſome months, reſuming it again, had the good luck to maſter it (22). Encouraged by this ſucceſs beyond his own expectation, he afterwards ventured thought proper now to take more notice of him. In 1643, he had the ſequeſtered Living of *St Gabriel Fenchurch-ſtreet* granted to him (*k*). The ſame year, he publiſhed, in 4to, *Truth tried*; or *Animadverſions on the Lord Brooke's Treatiſe of the Nature of Truth* (*l*). His mother dying this year, left him poſſeſſed of a handſome fortune [*H*]. In 1644, he was appointed one of the Scribes or Secretaries to the *Aſſembly of Divines* at Weſtminſter, and ſo continued as long as the ſitting of that Aſſembly, which, ſeveral years afterwards, he vindicated from ſome cenſures that had been thrown upon it [*I*]. On the

(*k*) His letter to Dr South, ubi ſupra.

(*l*) The whole title is, *The Nature of Truth, its union and unity with the ſoul, which is one in its eſſence, faculties, acts, one with truth.*

ventured on many others, ſome of more, ſome of leſs difficulty, and ſcarce miſcarried in any that he undertook during the civil wars and afterwards. Hence he has been generally called *the Father of this Art:* nor was his claim thereto ever diſputed, that I know of, till the year 1722, when on occaſion of Biſhop Atterbury's proſecution for high crimes and miſdemeanors, the truth of the charge depending greatly upon decyphering ſome letters wrote by his Lordſhip in cypher, the art came to be much talked of, and, among other things, Dr Wallis being ſaid to be *the Father of it*, there appeared ſoon after a perſon in the London Journal, under the feigned name of *Britannicus*, who took upon him to acquaint the world, that the Doctor never could be thought to be father of an art, which was in being many hundred years before he was born. But Britannicus was ſome time afterwards taken to taſk for this cenſure by a very ingenious artiſt in this way, (23) who obſerves, that 'whoever Britannicus is, if he be a perſon of candour, he will the better bear to be freely told of the miſtake he has committed, in treating of an art, in which I preſume, ſays this Author, he does not deſire to be thought very expert. It would have been kindly done of him, if he had produced his vouchers in proof of his aſſertion, that the art was in being many hundred years before Dr Wallis was born. But I am perſuaded that he had a confuſed notion of the matter here, as he manifeſtly had in another place, and miſtook the art of cyphering, or writing in cyphers, for that of decyphering. The former we allow to have been very ancient: but the latter, if I greatly miſtake not, will prove to be a more modern diſcovery.'

(23) Mr John Davis, Rector of Caſtle-Aſhby in Northamptonſhire, in his *Eſſay on the Art of Decyphering. In which is inſerted A Diſcourſe of Dr Wallis, now firſt publiſhed from his original MS. in the public library at Oxford.* London 1737. 4to.

Dr Wallis has given ſo juſt an account of *Johannes Baptiſta Porta* (24), who wrote a piece intituled *De furtivis literarum notis, &c.* that I have but little to add to it. It was printed at Naples in 1563, and at London in 1591, and, with the title altered to *De occultis literarum notis, &c.* at Straſburg in 1606. 'But as his rules for decyphering concern only ſimple cyphers, ſuch as are commonly framed to put perſons to a trial, and which are now well known to be mere trifles. They are profeſſedly calculated for what ſhould be written in Latin or Italian, though capable of being accommodated to other languages. But the main queſtion, which I confeſs I am not able to reſolve, is this, whether he were the firſt man that ever decyphered without the help of a key.' It is certain that he thought himſelf the firſt who ever wrote upon that ſubject. *De retam implicita, præſertim autem qui neminem habuerim quem ſequi potuerim*, are his words *.

(24) See Rem. [*P*].

* The art is put *inter deſiderata* by Lord Bacon in his Advancement of Learning.

During the time in which *Porta* flouriſhed, an extraordinary accident fell out at Paris. A diſpatch of the Spaniard, written in another kind of cypher than thoſe of *Porta*, was intercepted by the French, and ſent by that King to *Vieta* (25), and decyphered by him. As Dr Wallis ſays nothing of this in his forementioned diſcourſe, it was probably unknown to him at the time when he wrote it. However that were, the ſtory is particularly told by *Thuanus*, in the 29th book of his hiſtory; where, having ſhewn the occaſion that *Spain* had for cyphers, and their abundant caution in uſing them, he proceeds thus: *Such was the cypher, conſiſting of above 500 characters, which they uſed in the deſtructive ten years war againſt us. At which time we intercepted ſeveral of their letters of very conſiderable length, giving a full account of their reſolutions and deſigns. But ſo great was the number of the characters, the common decypherers knew not what to make of them; whereupon the King ordered them to be laid before* Vieta, *who little expected ſuch a taſk, and would have been better pleaſed with applying his thoughts to any better ſubject. However, having acquired a habit of cloſe thinking to ſerious ſtudies, he decyphered the whole; and being once become maſter of the key, readily interpreted many other letters of the higheſt importance. This put the Spaniſh affairs into great confuſion for full two years; till, by intercepting letters of ours, they diſcovered the matter, and were forced to contrive a new cypher, inſtead of that, which they judged to be incapable of being decyphered: and to put the moſt odious conſtruction they could upon the caſe, they induſtriouſly gave out, eſpecially at Rome, that the King had acted in it by magic art* (*a*); *for that they were ſure the thing could have been done by no other means: But the report was entertained only with ſcorn and deriſion by men of ſenſe.* 'From this account there ariſes two following obſervables. 1. That here is mention made of common decypherers, or thoſe *qui vulgo his in rebus induſtriam ſuam exerceant*; and what wonder is it, provided Porta's book was publiſhed at Naples ſome 20 years or more before the time that Thuanus ſpeaks of? 2. That one very difficult cypher was diſcovered by Vieta, and that it is reported as a new thing attended with no ſmall ſurprize and amazement. But when the Spaniards were ſatisfied, that it really was ſo, and thereupon formed another cypher, we hear no more of his decyphering. It is pity no ſpecimens of this wondrous performance were preſerved; that ſo we might have fully ſeen what ſort of a cypher it was, and how it was uſed, the want of which gave occaſion to the compiler of the *Acta Eruditorum Lipſ.* to ſay, that *the credibility of the fact reſted upon the ſingle authority of* THUANUS. I don't believe the gentleman had the leaſt thought in this expreſſion to diminiſh the character of that celebrated hiſtorian. But I mention this to ſhew, that if Dr Wallis had known when he firſt attempted an intricate cypher, that Vieta had once ſucceeded in a like attempt, yet this could have been of no further ſervice to the Doctor, than that it might have encouraged him to undertake what was poſſible to be performed. Vieta died in 1603 (26), Porta in 1615*, and Dr Wallis was born in 1617; ſo that in all probability here is a great deduction from the many hundred years in which we were to underſtand that the art of decyphering had been in being before Dr Wallis was born. Upon the whole it is evident, that tho' Dr Wallis was not the firſt performer in this art, and ſo not in that ſenſe *the Father of it*, yet he has a claim to that title in the more proper ſenſe of the word; ſince we may ſafely challenge any one to find another before him who has given ſuch eſſential obſervations about it, and ſuch a variety of inſtances and examples in it, as have been the principal means of producing all the performances of thoſe that have excelled in the art ſince his time, who may therefore be truly called his children, and he their father.'

(25) An eminent mathematician, ſaid to be the firſt inventor of the ſpecious Algebra. Moreri's Dictionary, under his article, Vol. VIII. Edit. 1740.

(26) Thuanus.

* Collier's Dict.

[*H*] *His mother left him poſſeſſed of a handſome fortune.*] Her maiden name was Suſannah Chapman, being the daughter of Henry and Mary Chapman of Godmarſham. After the death of her huſband, ſhe refuſed ſeveral good matches that were offered to her, reſolving to continue a widow for the ſake of her children: of whoſe education ſhe took very particular care, and left them all in good circumſtances (27).

(27) Letter to Dr Smith.

[*I*] *He vindicated the Aſſembly of Divines at Weſtminſter.*] In his letter to Dr Smith, he owns himſelf to have received much advantage by the converſation and learned diſcourſes of ſo many grave, reverend, and learned Divines, on all points of divinity, while they were compiling *The Confeſſion of Faith, and the larger and leſſer Catechiſm.* This leads him to vindicate their proceedings, as follows. 'The occaſion,' ſays he, 'of that Aſſembly was this. The parliament which then was, or the prevailing part of them, were engaged in a war with the King, occaſioned partly by

---

(*a*) This notion was countenanced by a book upon the art, intituled, A Treatiſe of Polygraphy, containing ſome rules in this art, by John Trithemius, in the XVth century, who was thereupon charged with dealing in magic. (See his article in Moreri, Tome 8, Edit. 1740.) And this notion of aſcribing the art to magic, prevailed ſo much, that when Lucatello publiſhed ſome of the monks ſecrets in cypher, he ſeems to have had the fear of the *Holy Office* before his eyes: for he takes eſpecial care to inform his readers, that all this paſſage (that is, all that is written in cyphers) had been explained to, and allowed by his ſuperiors. Davis, ubi ſup.

the 4th of March this year, he married *Suſanna*, daughter of *John* and *Rachel Glyde*, of Northiam, Northamptonſhire. In 1645, the weekly meetings, which gave birth to

by diverſe innovations in ceremonies, and ſuperconformity introduced and ſtrictly urged within ten or twelve years then paſſed, tending (as was apprehended) to a nearer compliance with Popery; of which diverſe of the biſhops then in power were preſumed the authors and fomenters, together with the impoſing of biſhops, there long diſuſed, and the common prayer book on the Scots, which much enraged that nation: partly by ſeveral encroachments on liberty and property (as was apprehended) by ſevere methods practiſed for raiſing of money on the ſubject, without the conſent of parliament, with other grievances, of which there were great complaints, and the long intermiſſion of Parliaments: partly by diverſe ſentences of the *Star Chamber High Commiſſion Court* againſt perſons otherwiſe conformable, for not complying therein. The iſſue of which war proved very different from what was ſaid to be at firſt intended; as is uſual in ſuch caſes, the power of the ſword frequently paſſing from hand to hand, and thoſe who begin a war not being able to foreſee where it will end. The Parliament thus engaged, had among other things a great diſpleaſure againſt the order of biſhops, or rather not ſo much againſt the order, as againſt the men, and againſt the order for their ſakes; and had reſolved upon the abolition of Epiſcopacy, as it then ſtood, before they were agreed what to put inſtead of it: and did then convene this aſſembly to conſult upon ſome other form, to be ſuggeſted to the parliament; to be by them ſet up, if they liked it, or ſo far as they ſhould like it. The divines of this aſſembly were, for the generality of them, conformable Epiſcopalians, and had generally the reputation of pious, orthodox, and religious Proteſtants; and, excepting the ſeven *Independent*, or (as they were called) *diſſenting brethren*, I do not know of any nonconformiſt among them, as to the legal conformity then required. Many of them were profeſſedly epiſcopal, and, I think, all of them ſo epiſcopal, as to account a *well regulated Epiſcopacy* to be at leaſt allowable, if not deſireable and adviſeable: yet ſo as they thought the preſent conſtitution capable of reformation for the better. When I name,' proceeds he, 'the Divines of this Aſſembly, I don't include the *Scots Commiſſioners*, who, though they were permitted to be preſent there, and did interpoſe in the debates, as they ſaw occaſion, yet were no members of that aſſembly, nor did vote with them, but acted ſeparately in behalf of the church of Scotland, and were zealous enough for the Scots preſbytery, but could never prevail with the aſſembly to declare for it. On the other ſide, the *Independents* were againſt all united church government of more than one ſingle congregation: holding, that each ſingle congregation voluntarily agreeing to make themſelves a church, and chooſe their own officers, were of themſelves independent, and not accountable to any other eccleſiaſtical government, but only to the civil magiſtrate, as to the public peace; admitting indeed that meſſengers from ſeveral churches might meet to conſult in common, as there might be occaſion, but without any authoritative juriſdiction. Againſt theſe the reſt of the aſſembly was unanimous (and the Scots commiſſioners with them) that it was lawful by the word of God for diverſe particular congregations (beſides the inſpection of their own paſtors and officers) to be united under the ſame common government; and ſuch communities to be further ſubordinate to Provincial and National Aſſemblies; which is equally conſiſtent with epiſcopal and preſbyterian principles. But whether with or without a biſhop or ſtanding preſident of ſuch aſſemblies, was not determined or debated by them: When any ſuch queſtion chanced to be ſuggeſted, the common cry was, that this point was not before them, but was precluded by the ordinance by which they ſat, which did firſt declare the abolition of epiſcopacy (not refer it to their declaration) and they only to ſuggeſt ſomething in the room of that ſo aboliſhed. *And this is a true account of that Aſſembly, as to this point*; (*and when as they were called Preſbyterians, it was not in the ſenſe of Anti-epiſcopal, but Anti-independents*) which I have more largely inſiſted on, becauſe there are not many now living, who can give a better account of that aſſembly than I can. To this may be objected their agreement to the covenant, which was before I was amongſt them. But this, if rightly underſtood, makes nothing againſt what I have ſaid. The Covenant, as it came from Scotland, and was ſent by the Parliament to the Aſſembly, ſeemed directly againſt all Epiſcopacy, and for ſetting up the Scots Preſbytery, juſt as among them. But the Aſſembly could not be brought to aſſent to it on theſe terms, being ſo worded as to preſerve the government of the church of Scotland, and to reform that of England, and ſo to reduce it to the neareſt uniformity. But before the Aſſembly could agree to it, it was thus mollified: *To preſerve that of Scotland (not abſolutely, but) againſt the common enemy, and to reform that of England (not ſo as it is in Scotland, but) according to the word of God, and the example of the beſt reformed churches; and to endeavour the neareſt uniformity*; which might as well be by reforming that of Scotland, as that of England, or of both. And whereas the Covenant, as firſt brought to them, was againſt *Popery*, *Prelacy*, *Hereſy*, *Schiſm*, *Profaneneſs*, &c. they could by no means be perſuaded to admit the word *Prelacy*, as thus ſtanding abſolute. For though they thought the Engliſh epiſcopacy, as it then ſtood, capable of reformation for the better in diverſe things, yet to engage indefinitely againſt all prelacy, they would not agree. After many days debate upon this point (as I underſtood from thoſe who were then preſent) ſome of the parliament, who then preſſed it, ſuggeſted this expedient, That by *Prelacy* they did not underſtand all manner of Epiſcopacy or ſuperiority, but only the preſent Epiſcopacy, as it now ſtood in England, conſiſting of Archbiſhops, Biſhops, and their ſeveral courts and ſubordinate officers, *&c.* And that if any conſiderable alteration was made in any part of this whole frame, it was an abolition of the preſent Prelacy, and as much as was here intended in theſe words, and that no more was intended, but a reformation of the preſent Epiſcopacy in England. And in purſuance of this, it was agreed to be expreſſed with this interpretation: *Prelacy, that is, Church government by Archbiſhops, Biſhops, their Chancellors and Commiſſaries, Deans, Deans and Chapters, Archdeacons, and all other eccleſiaſtical Officers depending on that Hierarchy.* And with this interpretation at length it paſſed, and the Scots commiſſioners in behalf of their church agreed to thoſe amendments. I know ſome have been apt to put another ſenſe upon that interpretation: but this was the true intent of that aſſembly, and of what was done upon this occaſion.' Mr Richard Baxter gives the ſame account of this debate about the word *Prelacy* in theſe words. 'Dr Burgeſs *, ſays he, the Prolocutor, and Mr Gataker, and abundance more declared their judgments for Epiſcopacy, even for the ancient moderate Epiſcopacy; in which one ſtated Preſident with his preſbytery governed every church, though not for the Engliſh dioceſan form, in which one biſhop without his preſbyters did by a lay chancellor's court govern all the preſbyters and churches in his dioceſe, being many thouſands; and that in a ſecular manner, by abundance of ſecular officers, unknown to the primitive church. Hereupon grew ſome debate in the Aſſembly; ſome being againſt every degree of Epiſcopacy, eſpecially the Scottiſh divines; and others for a *moderate Epiſcopacy*. But theſe Engliſh divines would not ſubſcribe the Covenant, till there was an alteration ſuited to their judgment, and ſo an alteration was yielded to, which deſcribed that ſort of *Prelacy* which they oppoſed; that is, church-government by archbiſhops, biſhops, their chancellors, and commiſſaries, *&c.* all which it is acknowledged are mentioned as the deſcription of that form of church-government which they meant by *Prelacy*, as not extending to the ancient Epiſcopacy (28).'

It was thought requiſite to give this account of the proceedings in the Aſſembly of Divines at Weſtminſter at large from our author's own mouth, eſpecially with regard to Epiſcopacy, becauſe in it are manifeſtly included his own ſentiments upon that point, in which he was bred, and which he retained to the laſt, and which not improbably was the cauſe of his never riſing to that dignity in the church.

---

* The ſame who had been tutor to Dr Wallis at Emanuel College.

(28) Baxter's Vindiciæ Natalitium, p.48, 49.

the Royal Society, being propoſed by Mr *Theodore Haak* [*K*], a German, then reſident in London, Mr Wallis was among the firſt who came into that propoſal, and preſently diſtinguiſhed himſelf in thoſe aſſemblies by his ſkill in the mathematics (*). In 1647, he happened to meet with Mr Oughtred's *Clavis*, which he made himſelf maſter of in a few weeks, and diſcovered a new method of reſolving cubic equations, which he communicated to Mr *Smith*, Fellow of Queen's-college, and Profeſſor of Mathematics at Cambridge, with whom he held a literary correſpondence upon mathematical ſubjects for ſome years (*n*), about this time. The Independents having now got the upper hand againſt the Covenanters, our Author joined with ſome other Miniſters of London, who met at *Sion-college*, in ſubſcribing a paper, intituled, *A Teſtimony to the Truth of Jeſus Chriſt, and to the Solemn League and Covenant; as alſo againſt the Errors, Hereſies, and Blaſphemies of theſe times, and the Toleration of them.* Not long after this, he left *St Gabriel Fenchurch-ſtreet*, and went to *St Martin's church in Ironmonger-lane*; and, in 1648, ſubſcribed, as Miniſter of that church, to the remonſtrance againſt putting the King to death; as alſo to a paper, intituled, *A ſerious and faithful Repreſentation of the Judgments of Miniſters of the Goſpel within the Province of London, in a Letter from them to the General and his Council of War*, dated January 17, 1648. The next year, June 14th, he was appointed, by the Parliamentary Viſitors, Savilian Profeſſor of Geometry in Oxford (*o*), in the room of Dr *Peter Turner*, who had been ejected both from his Fellowſhip at Merton-college and that Profeſſorſhip, by the ſame Committee, November 9th, 1648 (*p*). The ſame year, 1649, he quitted his church in Ironmonger-lane, and went to Oxford, where, having enter'd himſelf of Exeter-college, he was incorporated Maſter of Arts of that Univerſity, October the 23d, and ſpoke his inauguration ſpeech in the geometry ſchool, the laſt day of that month (*q*). This preferment was very acceptable to him, and he was no ſooner ſettled in the poſſeſſion of it, than he quitted his church in London, and applied himſelf cloſely to the ſubject of his new profeſſion, being well pleaſed to make that ſtudy his buſineſs, which had always before been his ſingular diverſion, and was one of the firſt that ſet on foot the *Philoſophical Society* at Oxford, which began their meetings before the expiration of this year (*r*). However, as occaſion offered, he did not neglect his clerical character; for Mr *Baxter*, the famed Preſbyterian Divine, having publiſhed his *Aphoriſms of Juſtification and the Covenants*, our Author wrote and printed ſome Animadverſions on that piece, not improbably at the inſtance of Mr Baxter himſelf [*L*], who acknowledged they were very judicious and moderate (*s*). Before the end of this year, Mr Wallis, in peruſing the mathematical works of *Torricelli*, was particularly ſtruck with what he found there concerning *Cavallerius's Method of Indiviſibles*. This was the firſt time he had ſeen or heard any thing of that method; and he preſently conceived hopes of getting ſome new light by it into the deſperate problem concerning the quadrature of the circle. What encreaſed his expectation was, that the proportion of the infinite number of circles in the cone to thoſe in the cylinder were known by this method, *viz.* as 1 to 3; but all the diameters of

[*K*] *Mr Theodore Haak.*] Some account will naturally be expected of a gentleman who broke the firſt ground toward the foundation of the Royal Society. He was born at Newhauſen near Worms in the Palatinate in 1605, and being bred in the reformed religion, he came in 1625 to Oxford (29), where he ſtaid half a year, and afterwards as long at Cambridge. Thence he croſſed the ſea back, and viſited ſeveral univerſities abroad, but returned in 1629, and became a commoner of Glouceſter-hall in Oxford; continued there near three years, but took no degree; and ſoon after was ordained Deacon by Dr Joſeph Hall, Biſhop of Exeter. In the time of the German wars he was appointed one of the procurators to receive the benevolence-money which was raiſed in England to ſupport the Palatines, which, he uſually ſaid, *was a deacon's work.* On the breaking out of the civil wars, he ſided with the parliament, but, being a ſtudious man, he declined the offer made him by the Prince Elector Palatine to be his ſecretary, as he did alſo the reſidentſhip at London for the city of Hamburgh, and for Frederick III. King of Denmark. In 1648 he was recommended by the Aſſembly of Divines at Weſtminſter, for tranſlating into Engliſh the Dutch Bible, with the annotations (30) by the ſynod of Dort, to the parliament, who for his encouragement granted him March 30, 1648, a patent for the ſole printing and vending that bible for 14 years. Accordingly he completed the work, and publiſhed it with this title, *The Dutch Annotations upon the whole Bible, together with their tranſlation, according to the direction of the Synod of Dort* 1618. *London* 1657, in 2 Vol. fol. with a preface, containing a narrative both of the original and the tranſlation. Mr Haak likewiſe tranſlated into High Dutch ſeveral Engliſh books of practical divinity, as alſo into the ſame language in blank verſe one half of Milton's Paradiſe Loſt, with which J. Seobald Fabricius, the famous divine at Heidelberg, was ſo much pleaſed, as to tell him in a letter, *Incredibile eſt quantum nos omnes affecerit gravitas ſtyli, & copia lectiſſimorum verborum.* He was ſeveral years fellow and ſecretary of the Royal Society, and there are ſome papers of his in the philoſophical collections, publiſhed in May 1682. He died May 9th, 1690, at the houſe of his kinſman Dr Frederic Slare, M. D. in an alley adjoining to Fetter-lane, and was buried in a vault under the chancel of St Andrew's church, Holborn, London. Dr Anthony Horneck * preached his funeral ſermon †, in which he gave him the character of a virtuous and learned perſon.

[*L*] *Not improbably at Mr. Baxter's requeſt.*] The title of Mr. Baxter's piece is *Aphoriſms of Juſtification, with their explanation, as alſo upon the nature of the Covenants, Satisfaction, Righteouſneſs, Faith, and Works, by their unworthy teacher Richard Baxter.* London, 1650. They are dedicated to Mr Vine, and Mr Anthony Burgeſs, the latter of whom, as we have before obſerved, had been tutor to Dr Wallis. And Mr Wood (30) tells us, they were animadverted upon at their firſt coming forth by many learned men ‡, ſome of whom wrote upon the motion and deſire of their Author himſelf, among whom Mr George Lawſon, Mr John Warren, Mr Chriſt. Cartwright, and Dr John Wallis were the chief. Whereupon Mr Baxter publiſhed A ſuſpenſion, and a fuller explanation of them in his *Apology*, &c. (31) as alſo afterwards an additional explanation and defence, both in his *Confeſſion of Faith*, &c. and in his *Four Diſputations on Juſtification* (32). Dr Wallis is allowed to have explained the damnatory clauſes in the Athanaſian Creed juſtly and truly, as well as modeſtly, as the diſſenters wiſhed: and Mr Baxter declared that the damnatory clauſes excepted or modeſtly expounded, he embraced the creed commonly called Athanaſius's, as the beſt explication of the Trinity §.

§ Baxter [illegible] thod of Theology, p. 123.— See alſo The critical Hiſtory of the Athanaſian Creed, by Dr Waterland, p. 282, 2d edition, 1728, 8vo.

theſe circles in a triangle through the axis of the cone are to thoſe in a parallelogram through the axis of the cylinder as 1 to 2: In like manner, all the circles in a conoid paraboloid are to thoſe in a cylinder as 1 to 2; and alſo all the diameters of thoſe circles to the diameter of theſe are as 2 to 3. It was likewiſe manifeſt, that the right lines of the triangle are in arithmetic proportion, or as 1, 2, 3, *&c.* and therefore the circles of the cones being in a duplicate proportion of their diameters, muſt be as 1, 4, 9, *&c.* Alſo the circles of the parabolic conoid being in a duplicate proportion of their ordinates, *i. e.* in the proportion of their diameters, are as 1, 2, 3, *&c.* and their diameters as $\sqrt{1}, \sqrt{2}, \sqrt{3}$, *&c.* to wit, in the ſubduplicate proportion of their circles. He hoped, therefore, that by other means from other known proportions, which the increaſing and decreaſing ſeries of circles or ſquares have to the ſum of their equals, it might be known likewiſe what proportion their ſides or diameters had to their equals. But if this could be found by any univerſal method, the ſquaring of the circle would be ſufficiently provided for, ſince it was now known that all the parallel circles in a ſphere were to the like number in the cylinder as 2 to 3: If it could be thence known what proportion the diameters of theſe have to the diameters of thoſe, we ſhould obtain the thing ſought; for thoſe would conſtitute the circle, and theſe the ſquare of the diameter; ſo that the geometrical problem would be reduced to one which was purely arithmetical. Upon theſe grounds our Author ſpent all the year 1651, and ſome part of the next, in this enquiry; and the method ſucceeded even beyond his expectation, both in finding eaſier ways of coming at the areas of ſuch curves and ſolids as had been given before, and in ſeveral others, which no method had then produced: And this he did as well by ſimple ſeries of numbers, as by thoſe of their powers, and theſe either increaſed or diminiſhed by their ſeries. But when he came to the ſubduplicate and ſubtriplicate proportion of theſe increaſed and diminiſhed ſeries, which directly and immediately belonged to the hyperbola and ellipſe, there his method failed, and brought him into a difficulty which he could not any way conquer: He propoſed the matter to Mr *Seth Ward*, then Savilian Profeſſor of Aſtronomy, to Mr *Lawrence Rook*, Profeſſor of Aſtronomy at Greſham, to Mr *Chriſtopher Wren*, then Fellow of All-Souls College, and ſeveral others of the moſt eminent mathematicians at that time in Oxford (*t*) [*M*]; but not meeting with any ſatisfactory anſwer, he came at laſt to this concluſion, that the number he ſought for could not be expreſſed by any known way of Notation. In the mean time, the next year, 1653, he publiſhed at Oxford, in 8vo, a Grammar of the Engliſh tongue, for the uſe of Foreigners, in Latin [*N*]. To this Grammar he prefixed a Treatiſe of Speech, wherein he, firſt of any one, conſidered philoſophically the formation of all ſounds uſed in articulate ſpeech, as well of the Engliſh as other languages [*O*], by what organs and in what poſition of them each ſound was formed, with the nice diſtinctions of each (which in ſome letters of the ſame organ is very ſubtle), ſo that by ſuch organs in ſuch poſition the breath iſſuing from the lungs will form ſuch ſounds, whether the perſon do or do not hear himſelf ſpeak. The ſame year, 1653, he repoſited in the Archives of the Bodleian Library a collection of ſeveral copies of letters, that had then been decyphered by him [*P*], with this Memorandum prefixed.

[*M*] *He propoſed his difficulties to ſeveral of the moſt eminent mathematicians then at Oxford.*] This was done in the following manner. He ſelected the moſt ſimple form of a ſeries for expreſſing what he wanted, and then put this problem. *Si æqualem quandam Curvam contingat in vertice recta, unde ad Curvam diameter rectæ Axi parallelæ æqualibus ab invicem diſtantiis remotæ, quarum prima ſit* 1, *ſecunda* 6, *tertia* 30, *quarta* 140, *&c. quanta erit illa, quæ interponenda eſt media inter* 1 *&* 6? *Vel etiam Arithmetice, in ſerie numerorum* 1, 6, 30, 140, 630, *&c. quæritur Terminus medius ipſis* 1 *&* 6 *interponendus.* He likewiſe adviſed them, that the terms of the ſeries were produced by the continual multiplication of theſe numbers $1 \times 4\frac{2}{1} \times 4\frac{2}{2} \times 4\frac{2}{3} \times 4\frac{3}{4}$, whoſe numerators as well as denominators were arithmetically proportional. He further intimated, that the quadrature of the circle would be the conſequence of this ſolution. But all the ſatisfaction he got was, that one of them referred him to *Gregorius a Sto. Vincentio*, who, he ſaid, had handled the ſubject thoroughly. He had never ſeen that author; and conſulting him now found nothing to his purpoſe upon the queſtion propoſed about ſquaring of the circle, which Vincentius left as ſufficiently executed by that which is the 136th propoſition in the *Arithmetica Infinitorum*, as had been ſhewn by Mr Huygens in his Ἐξετασει (33). However, turning over Vincentius, he obſerved, that the method of indiviſibles was known to, and made uſe of by, him in this treatiſe *De Cyclometria*, as was evident from theſe words, *Ductus rectarum omnium unius plani in alterius reſpectivas rectas* (34).

[*N*] *A grammar of the Engliſh tongue.*] It was printed in 1674, much enlarged by the author, with the addition of a grammatical praxis. This is highly recommended by Dr Hickes in 1689. But in 1692 Mr Dryden, in the dedication prefixed to his tranſlation of Juvenal, complained that we had no Engliſh *proſodia*, nor ſo much as a tolerable dictionary, or a grammar, ſo that our language was in a manner barbarous, by which (if he had ſeen this grammar by our author) he muſt mean (what indeed is apparently his intention) that we had no ſuch grammar as was wrote with any view of improving the language; that being not the deſign of Dr Wallis. But this was done afterwards by Mr James Greenwood, late ſubmaſter of St Paul's ſchool, in his *Eſſay towards a practical Engliſh Grammar.* In the preface to which, deſcribing the genius and nature of the Engliſh tongue, he tells us, that he has taken in every thing that was material from our author. 'But,' ſays he, 'the doctor 'writing for foreigners, and in Latin, I have not purſued his method, as not being every where anſwerable to my deſigns.'

[*O*] *He firſt of any one conſidered philoſophically the organical formation of articulate ſounds.*] In our Author's letter to Dr Smith, ſpeaking of this treatiſe, he ſays, 'I think it was a new attempt, not undertaken 'by any that I know of before that time. For tho' it 'was obſerved, that ſome letters were labials, ſome palatines, and ſome gutturals; and ſome grammarians 'have in ſome few ſhewed a different formation of 'the ſame organ, yet it is but of very few that they 'have ſo done, and very imperfectly. None that I 'know of had before attempted it as to all, whatever 'may have been done in purſuance of what I had 'then taught.'

[*P*] *He gave ſeveral decyphered letters to the Bodleian library.*] The body of this MS. conſiſts of 227 pages in 4to. and he prefixed a preface or introduction to it, which being both curious, and very ſcarce to be met with,

(*t*) See his dedication of his *Arithmetica Infinitorum* to Mr Oughtred.

prefixed. *Hanc epiſtolarum collectionem quas cyphris ſcriptas ipſe retexerat, celeberrimæ Bibliothecæ Bodleianæ in illuſtriſſima Academia Oxonienſi, dedit Johannes Wallis, ibidem Geometriæ*

with, we ſhall lay the ſubſtance of it before the reader, as follows. Having firſt mentioned the obvious neceſſity there was for him to give ſome account of the collection, he ſets out with an hiſtorical account of the origin and progreſs of Cryptography, which, he obſerves, took its riſe from the great uſe of it in public affairs of ſtate, when engaged in war, and more eſpecially in the caſe of civil wars, where the intermingling of oppoſite parties makes it difficult, if not impoſſible, to diſtinguiſh friends from foes. However, that it was at firſt ſcarce known to any but Secretaries of ſtate, or perſons of like condition; but that during the late civil wars in England, it was grown ſo common, that there was hardly any perſon of quality who was not acquainted with it, and did not upon occaſion make uſe of it: That, heretofore, ſlight and eaſy cyphers were uſed, as being found ſufficiently ſecure from a diſcovery; but as the age improved, that danger grew greater, and thereby the art improved, 'ſo that,' ſays he, 'there is ſcarce 'any now uſed, but ſuch as might with very great 'probability be judged impoſſible to be diſcovered 'without a copy of the key whereby they were writ'ten.' He then proceeds to give an account of the accident, as already mentioned (35), which firſt occaſioned his application to the art of decyphering; in which, he ſays, he had made a conſiderable progreſs, tho' not without conſiderable pains, before he was informed that Baptiſta Porta, and one or two more, had written ſomewhat upon the ſubject: Hereupon he conſulted theſe writers, but found very little in them for his purpoſe; their buſineſs for the moſt part being only to ſhew how to write in cyphers, and that the things ſo written were beyond the ſkill of man to decypher. 'Only in Porta (who alone,' ſays he,' if I 'miſtake not, hath written any thing to the purpoſe 'about decyphering, and was, it ſeems, famous in his 'time, for his abilities that way) I found that there 'were ſome general directions, ſuch as were obvious 'from the nature of the thing, and which I had be'fore of myſelf taken notice of, and made uſe of as 'far as the nature of an *intricate cypher* would permit. 'But the truth is, there are ſcarce any of his rules 'which the preſent much-improved way of cyphering 'ſince his time doth not in a manner wholly exclude.' Hereby he ſaw there was little help to be expected from others, but that if he ſhould have further occaſion of this kind, he muſt truſt to his own induſtry, and ſuch obſervations as the preſent caſe ſhould afford. 'And indeed,' continues he, 'the nature of the 'thing is ſcarce capable of any other direction, every 'new cypher almoſt being contrived in a new way, 'which does not admit any conſtant method for 'finding it out. But he that will do any thing in 'it, muſt firſt furniſh himſelf with patience and ſa'gacity as well as he may, and then *conſilium in arena* '*capere,* and make the beſt conjectures he can, till 'he happen upon ſomething that he may conclude 'with for truth. However,' proceeds he, 'the ſuc'ceſs I had already, made me very inclinable to the 'like attempt afterwards, at the ſolicitation of di'verſe perſons of honour and quality; wherein I 'have had ſuch ſucceſs, as the following collection 'doth manifeſt; for which my greateſt reward hath 'been the ſatisfaction of my own inquiſitive curioſity, 'and the gratifying of ſome friends that have re'queſted it. And indeed I ſhould never have had the 'patience to take that incredible pains about it, which 'I have often done, had not my inquiſitive diſpoſi'tion in ſearch of difficulties been a greater argument 'to perſuade me to it, than any gains which either I 'have received or do expect from it: *Tho' I know* '*that leſs ſervices than theſe have been often rewarded* '*with greater recompences than I look for.*' In proceeding he expatiates upon the excellence of the cyphers made uſe of in this collection; wherein he maintains, that neither was it the weakneſs of the cypher that expoſed them to the danger of being decyphered, nor yet does he aver the impoſſibility of inventing any that may be free from that danger. The firſt is inferred as well from the high quality of the perſons who made uſe of them, as from the important matters in which they are uſed. That for his own part he judged, that many of them were written in as good a cypher as hath at any time been in uſe; and that if he were himſelf to make uſe of a cypher, tho' in a buſineſs of great conſequence, he ſhould not deſire a better than many, yea, moſt of theſe. As to the danger ariſing from the poſſibility of their being detected, he does not deny it (though even *that* before the decyphering of theſe would ſcarce have been believed) nor does he deny the poſſibility of contriving ſome others that may in point of ſafety exceed theſe: 'But,' ſays he, '(not to prejudge the invention of future times) I do 'ſcarce believe, that it will be an eaſy matter to con'trive a way more intricate than the *figure cypher,* or'dinarily now in practice, with the like convenience 'for uſe; and if any affect ſome more perplexed than 'any of theſe, I doubt not but his ſuppoſed better 'way will be equally obnoxious to a diſcovery (tho' 'he may perhaps have a better conceit of it) or elſe 'will be ſo extremely tedious in uſe, both to him that 'writes by it, and to him that is to read it, that it 'will not admit of any tolerable diſpatch, and would 'certainly want many of thoſe conveniences which 'in the *figure-cypher* I could eaſily demonſtrate.' He goes on to obſerve, that he who can be deterred by a bare poſſibility of danger, muſt not meddle with ſuch things as need a cypher, for, if he does, he cannot avoid far greater hazards than that is. 'But,' continues he, 'if any ſhall think that becauſe it hath 'been done by one, it is therefore ſo eaſy a matter, 'that it may be done by any, and eſtimate the dan'ger accordingly, I have for that purpoſe left ſome 'of theſe at the end undecyphered, that if they think 'good, they may try their ſkill upon them (36); 'which are not therefore ſingled out, as more diffi'cult than the reſt, for they are but of the ſame kind, 'and in the ſame cyphers with ſome of thoſe that 'went before, but becauſe they were ſome of the laſt 'that came to my hands; and the reſt had been all 'inſerted as you ſee them, before I thought of leav'ing any of this kind undecyphered. As for the 'papers that I have tranſcribed, I was not much ſo'licitous in what method to place them (37), and 'therefore have for the moſt part ſet thoſe firſt that 'came firſt to my hands. Some few of them in the 'beginning I thought it requiſite to tranſcribe, firſt in 'cypher alone, that it may be the better ſeen in what 'form they came to my hands; then the interpreta'tion in a legible character, that it might with the 'leſs difficulty be read; and afterwards, both toge'ther, the decyphering being interlined in a red let'ter, that ſo the filling of the cypher might be the 'more diſtinctly obſerved; and laſt, the key, accord'ing as it is collected out of the decyphering, at leaſt 'ſo far forth, as it is actually there made uſe of. But 'I did not think it neceſſary to continue this labour 'through the whole, and have therefore in thoſe that 'follow only once tranſcribed the papers themſelves, 'and interlined the decyphering thereof, adding the 'key thereto.

'In tranſcribing the papers I was careful to follow 'my original even to a letter; and therefore have not 'preſumed to amend either the errors in ſtile, or the 'manifeſt miſtakes of the writing, but have, when 'there was occaſion, noted them in the margin.

'In the decyphering I have ſometimes left blanks 'for ſome few words, which from the ſenſe of the 'context could not be cleared, eſpecially in names 'and numbers; though even theſe I have ſometimes 'been able to collect, either from circumſtances ap'pearing in the papers themſelves, or at leaſt by com'paring them with matters of fact, which I might 'otherwiſe attain to the knowledge of. But in theſe 'caſes I have ſometimes forborne mentioning of 'names (even when I could have done it) as being 'not at all material to my preſent purpoſe.

'In ſome few places where I might upon conjec'ture have perfected the ſenſe, yet becauſe the ſenſe 'might bear different words, and that it did not ap'pear from other circumſtances which of them was to be taken, I have choſen to leave a blank, al'lowing the reader the like liberty of conjecture 'with myſelf, for the ſupplying of the ſenſe, rather 'than by interpoſing my own uncertain conjecture 'in ſuch caſes, to give occaſion to the reader to 'think, that I have as little reaſon for other words, 'which

(35) Above in the text.

(36) There are three of theſe, one of which has been ſince decyphered by Mr Davys and another, a French one, ſubſcribed Braſſel, is inſerted in the General Dictionary, Vol. III. p. 93. decyphered by Mr Dutton, an acquaintance of Mr Davys.

(37) That which was his firſt attempt this way, as mentioned in the text above, is placed firſt, and followed immediately by others alike eaſy; after which he proceeds to the intricate ones.

triæ Profeſſor Savillianus: Servato ſibi in poſterum poteſtate addendi vel emendandi: i. e. A collection of ſeveral letters and other papers, which were at ſeveral times intercepted, written in cypher, decyphered by John Wallis, Profeſſor of Geometry in the Univerſity of Oxford, given to the public library there, *Anno Domini* 1653. On the 31ſt of May 1654, having performed the regular exerciſe (*w*), he was admitted in the Convocation to the degree of Doctor of Divinity (*x*); and took great pains in making an obſervation of the Solar Eclipſe which happened on the 3d of Auguſt following ‡. About Eaſter, 1655, the propoſition in his *Arithmetica Infinitorum*, containing the quadrature of the circle, being printed, he ſent it to Mr *Oughtred* [*Q*]; and ſoon after, in the ſame year, he publiſhed that treatiſe in 4to. dedicated to the ſame eminent Mathematician. To this he prefixed a Treatiſe of *Conic Sections* [*R*]; which he ſets in a new light, conſidering them as abſolute planes, conſtituted of an infinite number of parallelograms, without any relation to the Cone (*y*); and demonſtrates their properties from his new method of Infinities. Before theſe two pieces were intirely finiſhed at the preſs, there came out *Elementorum Philoſophiæ Sectio prima; de corpore*, part iv. 1655, by Thomas Hobbes; in which that Author pretended to give an abſolute quadrature of the circle. This pretence Dr Wallis confuted the ſame year, in a Latin tract, intituled *Elenchus Geometriæ Hobbianæ*; which being wrote with ſome tartneſs, Mr Hobbes found his mathematical reputation in danger, and therefore reſolved to defend what he had advanced; and the controverſy

‡ See the letter in the article of Mr Oughtred, to whom the doctor took this opportunity of applying for the ſolution of a ſeries there exhibited.

(*w*) He printed this Exerciſe afterwards, with a ſermon intituled *Mens Sobria*, preached before the determining Batchelors, at the end of his works in 1657, and in the 3d volume of his works in 1699.

(*x*) Wood's Faſti Oxon. Vol. II. col. 106.

(*y*) De Witt's attempt of the ſame kind was not publiſhed till 1659, in Schooten's miſcellanies.

‘ which I have taken upon me to determine. Yet I do not think but that it is poſſible that I may in ſome few ſynonimous words have taken the one for the other; as *ſoon* for *ſuddenly*, *ſecurity* for *ſafety*, or the like. But I have been ſo wary and circumſpect, in the determining even of ſuch trivial matters, if any was doubtful, that I am very confident if any ſuch miſtakes be, they are very rare.

‘ And I do in this as alſo for the truth of the decyphering in all the reſt, apply to thoſe from whom or to whom they have been written, who by thus expoſing them to view may have an opportunity of examining them by their own key, and conſequently of detecting my miſtakes, if any be; ſome of whom I preſume would not think themſelves much obliged to favour me in that kind, if they could therein detect any conſiderable errors (though neither do I know any juſt reaſon that any hath to be much offended for what I have done in the decyphering of them) of whom I deſire but this favour, or juſtice rather, that as I have been extremely careful not to wrong them in the leaſt meaſure by my miſtakes or groundleſs conjectures, that they would deal with me *bonâ fide*, if they ſhall charge me with any, and not affirm thoſe to be miſtakes which are not. And I believe, if any ſuch ſhall take the pains to examine my works that way, they will rather wonder how I ſhould be able to chooſe right in ſeeming doubtful caſes, wherein they might think I had nothing to direct me, than find an occaſion to contradict my conjectures.

‘ As for the reaſons which moved me thus to expoſe them to view, I ſhall only ſay thus much. I did not think it worth while to publiſh them in print (nor perhaps would it be convenient ſo to do) and yet I thought them ſo conſiderable, as not to be altogether ſuppreſſed, eſpecially ſince ſuch writings as theſe are not very frequent, and that others doubtleſs would be content to view them. At leaſt this advantage will undoubtedly ariſe by it; thoſe who have a curioſity to enquire into the buſineſs of cyphers, may here ſee variety of patterns, and many of them as good as they are likely to meet with any where elſe. And perhaps ſome others may be as well pleaſed to ſee, that a good cypher, which might upon very great probability be concluded to be ſafe enough, is yet in a poſſibility to be detected. And laſtly, by this means, thoſe who ſhall live hereafter may perhaps be informed what kind of cyphers thoſe were, which have been in uſe in this age.

‘ Thus much I thought it requiſite to ſay, and I think it not neceſſary to ſay more, but leave the judgment of the whole to thoſe who ſhall take the pains to view it.’

[*Q*] *He ſent the propoſition* de Cyclometria *to Mr Oughtred.*] Tho' in the ſeries $1\ \frac{1}{6}\ \frac{1}{30}\ \frac{1}{140}$, &c. $\frac{3}{2}\ \frac{15}{8}$ he could not interpolate the term between the firſt and ſecond in the order of that ſeries, yet he obſerved it to be produced by the continual multiplication of $1\times\frac{3}{2}\times\frac{5\times5\times7\times7\times9\times9}{4\ \ 6\ \ 6\ \ 8\ \ 8\ \ 10}$, &c. and found that this ſecond term was

$$\left.\begin{matrix}\text{leſſer}\\ \text{and greater}\end{matrix}\right\}\text{than}\left\{\frac{3\times5\times5\times7\times7\times9}{2\ \ 4\ \ 6\ \ 6\ \ 8\ \ 8}\ \&c.\times\right\}\begin{matrix}\sqrt{1\frac{1}{13}}\\ \sqrt{1\frac{1}{14}}\end{matrix}$$

and applying to Lord Brouncker for a better way of expreſſing it, that lord ſupplied him with the following:

$$1\frac{1}{2}\quad\frac{9}{2}\quad\frac{25}{2}\quad\frac{44}{2}\quad\frac{81}{2},\ \&c.$$

Here he left this moſt difficult enquiry, which terminated in ſomething that was ἀῤῥητον, which he therefore called an hypergeometrical decreaſing progreſſion, and putting □ for the ſquare of the circle, wrote it thus, $\square = \text{ɱ} : 1\frac{1}{2}$. Comforting himſelf for all his pains with this thought, that he had at leaſt demonſtrated the abſolute impoſſibility of expreſſing this quadrature in numbers by any known way of notation (38). This ſeries he likewiſe wrote another way, as $\sqrt{R^2-c^2}$, $\sqrt{R^3-c^3}$, &c. which he called a ſeries of univerſal roots: that is, ſuch as could only be conceived abſtractedly, or in their ſpecies, but not reduced to their individuals, of which we have no idea, concluding in theſe words: *In circulo ratio ea quam habet ille ad quadratum (quam etiam mihi præ oculis ab initio fuiſſe non nego) non ita ex voto ſuccedat, ut in aliis aliquot curvilineis, recapto aliquo notationis modo, ſed per varios mæandros me duxit, & tandem in* ἀῤῥητον *quoddam deſinat. Operæ tamen pretium eſt eatenus eam indicaſſe, quatenus natura numerorum patitur, ut nihil inſuper reliquum ſit, niſi ut inter mathematicos conveniatur, qua velint notatione, ſive mea, ſive alia adhuc excogitanda rationem illam* ἀῤῥητον *indicare* (39).

[*R*] *He publiſhed that treatiſe.*] Notwithſtanding the great diſappointment he met with in his principal deſign, his pains upon it were handſomely rewarded by the variety of diſcoveries which that enquiry led him into. And as he had carried the doctrine of infinite progreſſions farther, and applied it to the nature of many curves not known before, he digeſted it into a proper method, and publiſhed it under the title of *Arithmetica Infinitorum*, where, to paſs by others, he particularly gave the areas of a vaſt variety of curve figures, ſuch as run on *in infinitum*, Torricellius having acquired a great reputation by ſquaring only a ſingle one. As he diſcovered the truth of his propoſitions by induction, ſo he determined ingenuouſly to give them to the public in that form, by which means, added to the advantage of a good method and a clear expreſſion, this book, tho' treating of the ſublimeſt ſpeculations, both in arithmetic and geometry, is frequently read with great eaſe and equal ſatisfaction by perſons who have no more than an ordinary ſkill in the rudiments of either of thoſe ſciences.

[*S*] *His treatiſe on Conic Sections.*] In this treatiſe he firſt gave a ſpecimen of his new invention of Indiviſibles, by the help of which he applies his infinite numerical progreſſions to Geometry. The method of Cavallieri had been often charged by the beſt mathematicians with being ungeometrical, and the improvements made by it conſidered as not fairly proved, and conſequently liable to ſuſpicion: ſeveral in-

(38) Propoſition CXC of Arithmetica Infinitorum.

(39) Idem, Prop. CXCI.

controverſy between him and the Doctor (z) was kept up for ſome years [S]. In 1656, he publiſhed his piece upon the angle of contact, wherein he expoſes the opinion of Peletarius, aſſerting that angle had no magnitude at all [T]. In 1657, our Author having completed the firſt plan he laid for the ſubject of his Lectures, digeſted the whole into a proper form, and publiſhed the work in two parts, under the title of *Matheſis Univerſalis, ſive Opus Arithmeticum* [U]. While this book was in the preſs, the Doctor

ſtances being produced, wherein the concluſions ariſing from it were erroneous. Our author here endeavours to clear the method from thoſe objections. Inſtead of ſuppoſing a plane to conſiſt of an infinite number of lines, he conſiders theſe ſuperficies as conſtituted by an infinite number of parallelograms, each of an infinitely ſmall altitude; hereby avoiding the abſurdity in the former method, of ſuppoſing that any, even an infinite number of lines, which have each abſolutely no breadth at all, could conſtitute a ſurface. Our author makes uſe of this, which he takes to be a conſiderable improvement all along in his *Arithmetica Infinitorum*. He likewiſe ſhews in ſeveral propoſitions of this treatiſe a new method of drawing Tangents, which is the ſame with that made uſe of afterwards by Dr Barrow in his Geometry.

But by this new improvement, it has been obſerved, that the doctor in avoiding one abſurdity has the miſfortune to run into another, which is, that in this method theſe infinitely little parallelograms are ſuppoſed actually to fill up the ſeveral ſuperficies in which they are inſcribed, are here preſented to the imagination, as having an actual and poſitive exiſtence, whence infinity is ſignified to be comprehended within the limits of our finite underſtanding. The ἀγεωμετρισία of this poſtulatum our author was very ſenſible of on other occaſions; and has expoſed it very clearly in his piece againſt Clavius, upon the angle of contact. But to this it may be anſwered, that the ſuppoſition here advanced by the doctor has been eſpouſed by the greateſt modern mathematicians, ſince Mr Leibnitz made no ſcruple to aſſume the ſame *poſtulatum* for the foundation of his *infiniteſimal method* on the *calculus differentialis*: not to inſiſt on what our author many years afterwards ſhewed to Mr Leibnitz, that in the doctrine of Tangents treated of in this piece of Conic Sections, he had no occaſion of neglecting the infinitely little quantities, as heterogeneous to finite ones (which poſtulate is conſtantly aſſumed in the *differential method*) ſince in this caſe this infinitely little difference actually vaniſhed and became nothing.

There is a remarkable expreſſion in his dedication to the Conic Sections, where, in ſhewing the preference of his method to that of Cavallieri, he obſerves, that his line (not like that of Cavallieri) is ſuppoſed to be dilatable, or to have ſo much ſpiſſitude as by an infinite multiplication to be capable of acquiring a certain altitude, equal to the figure in which it is inſcribed. *In hac*, ſays he, *differunt* [*Cavalierii & mea methodus*] *quod Linea hæc ſupponitur dilatabilis eſſe, ſive tantillam ſpiſſitudinem habere, ut infinita multiplicatione certam tandem altitudinem ſive latitudinem poſſit acquirere, tantam nempe, quanta eſt figuræ altitudo.* Here the word *dilatabilis* conveys an idea very different from the increaſe made by the appoſition of parts, and plainly evinces, that tho' he repreſents his infinitely little parallelograms as filling up the plane by an infinite multiplication, yet he did ſometimes at leaſt conceive that parallelogram as an infinitely little augment ſwelling by dilatation, till it filled completely the propounded ſpace, which is the very idea of the generation of quantities in the *method of fluxions*. And in his letter to Mr Leibnitz our author obſerves, that his *method of Tangents* may juſtly be called *Methodus de magnitudine evaneſcente*, from the idea he had at the writing of this treatiſe upon Conic Sections, that in the angle of contact this infinitely little augment denoted by the letter *a* was there ſuppoſed to decreaſe till it vaniſhed.

[S] *The controverſy with Mr Hobbes was kept up ſeveral years.*] Our author's firſt anſwer ſo much provoked Mr Hobbes, that he publiſhed his book in Engliſh, with the addition of what he called *Six Leſſons to the Profeſſor of Mathematics in Oxford.* Upon this Dr Wallis wrote an anſwer in Engliſh, intituled, *Due correction for Mr Hobbes; or, ſchool diſcipline for not ſaying his leſſon right.* Oxford, 1656, 8vo. Mr Hobbes replied in a book which he called Στιγμας, *or, the marks of the abſurd geometry, rural language, &c. of Dr Wallis.* London, 1657. This was immediately rejoined to by the Doctor, in his *Hobbiani puncti diſpunctio, in anſwer to Mr Hobbes's* Στιγμας. Oxford, 1657. Here this controverſy ceaſed for a while; but was renewed four years after by Mr Hobbes, who in 1661 printed a piece which he called *Examinatio & emendatio mathematicorum hodiernorum, in ſex dialogis,* which occaſioned Dr Wallis the next year to publiſh *Hobbius Heautontimoroumenos.* Oxford, 1663. 8vo. This piece was addreſſed to Mr Robert Boyle. Our author had egregiouſly the better in this controverſy. However, none of the pieces which he wrote in it were put into the collection of his mathematical works, in three volumes folio, 1699; becauſe, as he ſays himſelf, after the death of his antagoniſt he had no inclination to trample upon the aſhes of the dead, though he was induced to expoſe the bad reaſoning of that *pſeudo-geometrician* at the time of his writing; ſince by the advantage of his mathematical reputation he found means of ſpreading the poiſon of his principles in religion. *Opuſcula quædam contra Thomam Hobbes pſeudo-geometram non hic habentur, ne velle videar de homine jam demortuo triumphare: quamvis enim prout tunc res erat, id omnino faciendum, quando ſub prætextu magni Geometræ qualem ſe venditabat, auſus eſt in religionis negotio incautis adoleſcentibus perperam ſentiendi materiam ſubminiſtrare.*

[T] *The angle of contact has no magnitude.*] He afterwards wrote a defence of this piece, wherein he obſerves, that the ancient *method of exhauſtions* is founded upon the principle in Euclid's Elements, that *thoſe quantities whoſe difference is leſſer than any aſſignable one, are equal* (40). Whence he ſhews, that the quantity called *ſomewhat* by Clavius, as conſtituting the difference between the two angles made by the tangent, and the circle with the diameter in the point of contact, is really no magnitude, at leaſt is conſidered as ſuch in geometry. In this treatiſe our author introduces the notion of inceptive quantities, which, in reſpect to the given ones, he calls *prima principia quod ſic*, ſuch a definition as perhaps it would be very hard to find a better for thoſe called *naſcent quantities* in the method of fluxions. He likewiſe takes notice in the entrance on this defence, how cautious the ancient geometricians were in ſpeaking of what we call the point of contact, which, he obſerves, is never called by the name of a point, either by Euclid or Apollonius: as if they either apprehended a difference of this contact in ſome reſpect or other from the true notion of a point, or at leaſt were careful to avoid all occaſions of being drawn into any diſpute upon ſo nice and delicate a ſubject. Sir Iſaac Newton has ſhewn, that within the angle of contact made by a right line touching the vertex of the common parabola there may be inſerted an infinite number of other angles of contact made by the ſame right line touching the vertices of other parabolas, each of which beginning from that of the common parabola, is infinitely leſs than the preceding one (41).

[U] *Matheſis Univerſalis.*] The whole title runs thus: *Matheſis univerſalis, ſive opus arithmeticum, tum philologice tum mathematice traditum; arithmeticam tum numeroſam tum ſpecioſam ſive ſymbolicam complectens.* In it he has delivered the application of arithmetic to geometry, eſpecially upon the intricate ſubject of imaginary and impoſſible roots, in ſo clear and eaſy a manner, that, what before had been generally thought too myſterious to be looked into, became neglected as too tireſomely obvious. He dedicates it to Dr Gerard Langbaine, provoſt of Queen's College, Oxford, Dr Wilkinſon, canon of Chriſt Church, and to the Doctors Wilkins and Goddard, wardens of Wadham and Merton. He likewiſe dedicated his *Conic Sections* to Rook and Ward, the two aſtronomy-profeſſors at Greſham and Oxford, and his Arithmetica Infinitorum to Mr Oughtred, *non maximo viro,* but, as he ſays, *ut oportet, maximo mathematico.* This was the ancient method, not to pick out patrons for their fortune, but for their merit:

(z) Upon this occaſion Mr Henry Stubbe (of whom we have a long article in Mr Wood's Athen. Oxon. from fol. 560 to 568) wrote his Oneirocritica, in defence of Mr Hobbes, which was printed in 1657.

(40) The Newtonian geometry, or the doctrine of prime and ultimate ratios is expreſly declared by the author to be founded in this poſtulatum.

(41) See his method of fluxions, edit. 1737.

Doctor received a challenge from Mr *Fermat* at Tholouſe, which engaged him in an epiſtolary diſpute with that Author, as well as Mr *Frenicle* at Paris [*W*]. The letters on each ſide paſſed through the hands of Sir Kenelm Digby, then in France; who had the ſatisfaction to ſee the point in diſpute yielded, the following year, to Dr Wallis, with the higheſt encomiums, by both his Antagoniſts; and the Doctor, with the conſent of Sir Kenelm, publiſhed the letters, under the title of *Commercium Epiſtolicum*, in 1658. In the mean time Dr *Gerard Langbaihe* dying, Dr Wallis was choſen to ſucceed him in the place of *Cuſtos Archivorum* [*X*] to the Univerſity, February 17, 1657-8. On the

merit: which is mentioned here, as it ſhews Dr Wallis's temper: far from being troubleſomely ambitious, he ſtuck cloſe to the buſineſs of his place. The natural bent of his humour was gratified in this ſtudy, and his deſire was to make himſelf *non vir magnus, ſed magnus mathematicus*; and he was ſo happy as to obtain his wiſh by the univerſal vote of all Europe.

[*W*] *A diſpute with Fermat and Frenicle.*] Our author received a letter from Lord Brouncker, dated March 5, 1656-7, wherein was incloſed the following paper, inſcribed, A challenge from Mr Fermat and Mr Frenicle for Dr Wallis, with the hearty commendation of the meſſenger Thomas White. The problem was, *Invenire Cubum, qui additis omnibus ſuis partibus aliquotis conficiat quadratum.* The challenge had been ſent by Mr Fermat to Mr Frenicle, and to Schooten and Huygens. Dr Wallis ſent a ſolution of it before the end of March, which being objected to both by Mr Frenicle, who had ſolved it before, and Mr Fermat, occaſioned a diſpute, which was carried on this year, and ſome part of the next: till both the French gentlemen acknowledged the ſufficiency of the doctor's ſolution, with the encomium of being the greateſt mathematician in Europe. The doctor being informed that Mr Frenicle was about printing the letters, was apprehenſive, from what he had obſerved from the conduct of that gentleman, that ſome artful practice might be uſed therein, he therefore deſired Sir Kenelm Digby, then at Paris, through whoſe hands the whole had paſſed, to give his conſent to the publiſhing of them by the doctor himſelf, which being readily granted, he publiſhed them accordingly, under the title of *Commercium Epiſtolicum*, &c. 1658. Whence it appeared, that Mr Fermat, amongſt other things, had occaſionally made ſome objections to the doctor's *Arithmetica Infinitorum*, which he diſparaged on account of its want of demonſtrations; urging, that *ſuppoſitis ſpeciebus analyſeos problemata geometrica via Euclideana & Apolloniana exequatur, ne pereat paulatim elegantia & in conſtruendis & in demonſtrandis problematibus, cui præcipue operam dederunt veteres:* intimating at the ſame time, that he could demonſtrate the doctor's propoſitions in fewer words than he made uſe of in his method of induction. To this the doctor replies, that he could eaſily have evinced the truth of his inventions by ſuch original demonſtrations and deductions *ad impoſſibile*, as are frequently made uſe of by Archimedes, had not he obſerved how juſtly the practice of the ancients, in being more ſtudious to demonſtrate the truth, than diſcover how they came at it, had been complained of by the beſt modern mathematicians; and that he rather expected thanks for his ingenuity. *Grates ſiquidem ego potius expectaſſem; quam ut eo nomine criminis inſimularer, quod aperte & ſine fuco non modo quo perveneram, ſed & quibus paſſibus indicaverim; nec (quod de aliis non pauci conqueruntur) pontem illum ipſe demolitum iverim, quo ego flumen tranſieram* (42). Sir Kenelm Digby having acquainted him with the prodigious character of his antagoniſts, who were, he ſaid, acknowledged to be the ableſt mathematicians in France; and particularly, that Mr Frenicle was moſt ſurpriſingly quick in anſwering any queſtions, the doctor, in a letter to Lord Brouncker, who ſhared with him in this diſpute, which was managed with an extraordinary affectation of pleaſantry by the two French mathematicians, deſcribes the different genius of each of theſe antagoniſts in the following manner: *Gravitatem Hiſpanorum, cum quibus eſt vicinior* (43) *magis fortaſſe ſapit alter* [Fermat], *Gallorum alter alacritatem* (44). *Acutos ambos & ſummos viros lubens agnoſco, nec tamen eſſe credo (quicquid de me ſtatuatur) cur gentem noſtram habeant deſpicatui, niſi quod minus fortaſſe ſimus jactalundi.* As to the latter part of Mr Fermat's aſſertion, that the method of induction in the *Arithmetica Infinitorum* was not ſatisfactory, and that he could give demonſtrations in leſſer room, the doctor doubted of this laſt aſſertion very much, and the juſtice of his doubt was plainly ſhewn afterwards by Mr Fermat himſelf, in a piece publiſhed by him in 1660 (45); where he gave one of thoſe boaſted demonſtrations, which proved to be a great deal longer than that proof from induction by the Doctor; who had obſerved before to Lord Brouncker, that if the *Arithmetica Infinitorum* had been executed according to Mr Fermat's ſcheme, it would have ſwelled to a large folio. The truth of this aſſertion was abundantly verified by Bublialdus's comment upon it, wrote in the demonſtrative way, which the doctor received as a preſent from the author in 1683. As to the firſt part of Mr Fermat's aſſertion, that the method of induction was not altogether ſatisfactory, the doctor in another place obſerves, that in ſome caſes it is ſo ſatisfactory, as to make any demonſtration needleſs; as where by induction we are brought to ſome obvious truths, as to the continuation of ſome ſeries (46). However, he refers him for the method of demonſtrating his propoſitions to *Cavallieri de uſu indiviſibilium in poteſtatibus coſſicis*, and Van Schooten's treatiſe in the *ſecond part of Des Cartes's Geometry*. Our author afterwards gave a ſpecimen of ſuch a demonſtrative method, in a demonſtration of the tenth propoſition of Archimedes's treatiſe *De Spiralibus*, which, with another of the eleventh propoſition, he ſent (47) to Sir Charles Scarborough, at whoſe requeſt they were done. Before this correſpondence now under conſideration was at an end, Sir Kenelm Digby ſent our author a rectification of a curve, done by Fermat, and given to Sir Kenelm as a new invention; but the doctor immediately returned an anſwer, wherein he ſhewed this curve to be the very ſame, tho' under another name, with that which had been before rectified by Mr Neil, and of which the doctor had with many others given the demonſtration, in his treatiſe *De Cycloide*, publiſhed in 1659, before Mr Fermat did this, which was not till 1660; and he had mentioned that the foundation of both was laid in his *Arithmetica Infinitorum*, which Mr Fermat (as Sir Kenelm very well knew) had ſeen; but there was ſome reaſon to doubt whether he had conſidered it, ſince he had in this treatiſe in 1660 given the ſquare of ſome infinite hyperbolic ſpaces, which he affirmed had not been conſidered in the *Arithmetica Infinitorum*, whereas the quadrature of thoſe ſpaces was actually given in the 101ſt, 102d, 103d, 104th, and 105th propoſitions of that book.

[*X*] *He ſucceeded to the place of Cuſtos Archivorum.*] The famous Mr Henry Stubbe, an inveterate enemy to our author (48), wrote upon this occaſion *The Savilian Profeſſor's caſe ſtated, together with the ſeveral reaſons urged againſt his capacity of ſtanding for the public office of Antiquary in the Univerſity of Oxford, which are enlarged and vindicated againſt the exceptions of Dr John Wallis*, London, 1658. Mr Wood tells us (49), 'that 'Dr Richard Zouch, who had been an aſſeſſor in the 'chancellor's court for thirty years or more, and well 'verſed in the ſtatutes, liberties, and privileges of the 'Univerſity, did upon great intreaties ſtand for the 'ſaid place of Antiquary, or Cuſtos Archivorum 'thereof, but he being eſteemed a Royaliſt, Dr J. 'W. was put up and ſtood againſt him; though al'together uncapable of that place, becauſe he was 'one of the Savilian Profeſſors, a Cambridge man, 'and a ſtranger to the uſages of the univerſity. At 'length by ſome corruption, or at leaſt connivance 'of the Vice-chancellor, and perjury of the Senior 'Proctor, Byfield (50), J. W. was pronounced elected. 'Whereupon our author Stubbe, who was an eye 'and ear-witneſs of all that had moſt unjuſtly paſſed, 'therefore wrote the ſame book.' We have given this account in Mr Wood's own words, as a convincing ſpecimen of his prejudice againſt Dr Wallis, which will be of uſe to help us in forming a judgment concerning the truth of another much more important fact charged upon him by that author and ſome others, as will appear preſently.

(50) Adoniram *Byfield*, who had been a brother ſecretary with Dr Wallis to the Aſſembly of Divines.

17th of July following he received a letter from Sir *Kenelm Digby*, in which was contained two prize queſtions propoſed by Mr *Paſcal*, for ſquaring and finding the gravity of ſome ſections of the cycloid [*Y*]; and though he had never before conſidered that curve, yet he ſent a ſolution to both the queſtions, Auguſt 19th following: but finding himſelf prevented in this matter by Mr *Wren*, as well as Mr *Huygens*, he ſent a copy of what he had done, then juſt performed, to the latter; who, in return, acquainting him with the rectification of the parabolic curve, as abſolutely a new invention, with ſeveral additions, containing the quadrature of that curve, by *Heurat* (*aa*); Dr Wallis preſently informed him of Mr *Neil*'s ſucceſs in that invention the year before (*bb*); ſhewing him in the *Arithmetica Infinitorum* the foundation of both the methods whereby this diſcovery was made. In 1659, the Doctor publiſhed this letter to Mr Huygens, with this title, *De Ciſſoide & Corporibus inde genetis:* to which he prefixed another tract, *De Cycloide* (*cc*) *& Corporibus inde genitis*, wherein he gave a demonſtration of Mr Neil's invention (*dd*). In the midſt of theſe mathematical ſtudies, the Doctor had never neglected ſuch opportunities as offered of exerciſing his Cryptolitical talent, and upon ſome occaſions had thereby done good ſervices to the Royal cauſe [*Z*]; and he had always ſhewn

(*aa*) Mr Huygens aſcribes the rectification to a propoſition he had before ſhewn to Heurat.

(*bb*) Viz. in July or Auguſt 1657.

(*cc*) In this piece he likewiſe printed Mr Wren's quadrature of that curve.

(*dd*) He put theſe two tracts into his book *De Motu*.

[*Y*] *Two prize queſtions propoſed by Mr Paſcal.*] This letter of Sir Kenelm Digby was dated July 17th. The rewards were forty gold doublons for the quadrature, and twenty for the center of gravity, to be given for the firſt that ſent a ſolution within the time, which was the firſt day of October following. The propoſal came from Carcavi at Paris; but he only tranſacted the affair for Mr Paſcal, who for ſome (as appeared afterwards) obvious reaſons choſe not to be ſeen at firſt in it. Our author got his ſolution on the 19th of Auguſt atteſted by a public notary, to comply (as he underſtood it) with the terms of the propoſal, and finding, upon a reviſal of his copy, ſeveral errors in his firſt ſolution, he ſent the corrections September 3d following; he likewiſe afterwards in the ſame month wrote ſome more corrections and additions to it, being ſtill, as he thought, within the propoſed terms, of which the words were, *ſalvo errore calculi.* But before he ſent this laſt letter, he found by a letter of Mr Paſcal to Mr (afterwards Sir Chriſtopher) Wren, dated the 13th of this month, that he had miſtaken the conditions of the prize. It being the propoſer's meaning, that the order of the ſeveral ſolutions ſent ſhould be reckoned according to the time that they came to the hands of Mr Carcavi. It was plain, that the French had all the advantage that could be had from the delays of the carriage, but *that* was the author's intention in favour of his own country. Whereupon Dr Wallis being informed likewiſe, that his ſolution ſent 19th Auguſt did not come to Mr Carcavi till 10th September, found it would be to no purpoſe to ſend his additions and alterations, it not being likely, that Mr Carcavi would receive them before the time limited was expired, viz. the 1ſt of October. Mr Wren alſo acquainted him with his having ſent a ſolution, which was as ſoon, or ſoon after the propoſals came to the hands of our author. At laſt came out *Hiſtoire de la Roulette*, by Mr Paſcal, under the borrowed name of *Detonvilius*, wherein nothing was ſaid of the prize-queſtions, only it was hinted, that all muſt wait, till ſentence was paſſed by Mr Carcavi. About the end of November, ſeveral copies of this hiſtory came to the hands of Dr Wallis, with a requeſt to diſperſe them among his friends. In the mean time, having put together in ſome form what he had wrote on this occaſion of the *cycloid*, he ſent a copy of it to Mr Huygens; who in his anſwer, dated June 9th, 1659, deſired the doctor's opinion of Mr Paſcal's book, which was immediately complied with by the doctor, who obſerved, that tho' the piece was indeed well enough executed, yet there was nothing extraordinary in it, conſidering the great aſſiſtance the author had received from the ſolutions of the prize-problems, which, upon recollecting the varying ſteps that had been taken in that extraordinary affair, and comparing the ſeries of the conduct with ſeveral paſſages in the courſe of the work, he could not but be of opinion, was a mere decoy to procure France the honour of the invention (51). Among other things, the author aſſerted, that Merſennus was the firſt who propoſed this curve to be conſidered by the mathematicians in 1625, and Robervallius the firſt who ſquared it in 1634; the ſame being done afterwards by Fermat and Carteſius, all Frenchmen. Thus what had been done by others was utterly paſſed over in ſilence, his deſign, as he profeſſes, being to do honour to his own country. He even goes ſo far as to charge Torricelli with having taken his demonſtration from a paper of Mr Roberval, found by him in the ſtudy of Galilæo, to whom it had been communicated by Mr Beaugrand. Dr Wallis takes notice, that this pretence of Mr Roberval's paper is a mere *ipſe dixit*, without any kind of proof to ſupport it; and that Merſennus was ſo far from being the firſt that conſidered this curve, the cycloid, that it had been not only conſidered, but ſomething very near the ſquaring of it demonſtrated, by Cardinal Cuſa in 1547.

[*Z*] *He had done ſome ſignal ſervices to the royal cauſe.*] Many letters being intercepted at the dawn of the Reſtoration, it was eaſy for our artiſt to deliver up the interpretation of ſome, and to ſuppreſs that of others, under pretence of not being able to decypher them. That he actually did ſo ſeems to be agreed on all hands, and is evident from the following paſſage in the life of Dr Berwick, where the author ſpeaking of the royaliſts, has theſe words; 'Although 'every different perſon's letter was written in a different cypher, and that contrived with great thought, 'yet they were all decyphered by the art and ingenuity of a certain very famous mathematician, who 'was hired by the rebels. Yet he had now at laſt 'this in him of a good ſubject, that at this time he 'diſcovered nothing to the rebels, which much concerned the public ſafety; tho' he ſatisfied ſome of 'the King's friends, that he could have diſcovered a 'great deal. But all thoſe whom it concerned being 'ſufficiently aſſured, that no key of any cypher had 'fallen into the enemy's hands, it was thought nothing but vain boaſting, when the rebels bragged, 'that by the help of their friends they were able to 'find out the moſt hidden ſecrets of the royaliſts; till 'Matthew Wren, ſon to the right reverend the Biſhop 'of Ely, who was intimately acquainted with this 'mathematician, obtained of him ſome copies of thoſe 'letters, as he had decyphered them, and took care 'to have them delivered ſeverally to the perſons that 'wrote the letters, who all acknowledged them for 'their own, and left no room to doubt of the decypherer's art.' What my Lord Clarendon's thoughts were upon the point of decyphering appears in his letters of February 20th, and March 8th, 1659-60. which ſhew he did not then believe it poſſible. But that he was very ſoon after thoroughly ſatisfied that the thing could be done, may be inferred from a letter of Lord Mordaunt to the Marquis of Ormond, the 23d of the ſame month of May (52): *Oblige me ſo far as to ſhew this to him whom you live with, for now he will be convinced when he ſees his own letter returned by me.* Our author himſelf did afterwards give an account of his conduct in this matter, in a letter dated April 8th, 1695. to Biſhop Fell, wherein he likewiſe atteſts his ſervices to the royal cauſe, as appears from the following extract of that letter: *It is true*, ſays he, *afterwards*, [i. e. after the battle of Naſeby] *where the King's cabinet with his letters was taken, ſome other letters of other perſons, which had been occaſionally intercepted, were brought to my hands, ſome of which I did decypher, and ſome of them I did not think fit to do, to the diſpleaſing of ſome who were then great men. And I managed myſelf in that whole buſineſs by ſuch meaſures, as your Lordſhip, I think, would not be diſpleaſed with. I did his Majeſty who then was (K. Charles I.) and his friends many good offices, as I had opportunity both before and after that King's death, and ventured further to do* *that*

(51) One of theſe ſteps was, that the ſolutions ſent by Mr Huygens and Mr Wren, were diſſembled, and afterwards a new queſtion propoſed.

(52) In Carte's collection of letters, &c. p. 317. Vol. II. 8vo.

ſhewn himſelf zealous for the honour of his country in points of mathematical learning: ſo that, notwithſtanding the high credit he had conſtantly lived in with the oppoſite party to the Crown, yet, at the Reſtoration, King Charles the Second received him very graciouſly, and he was not only confirmed in both his places, of Savilian Profeſſor and Keeper of the Archives at Oxford, but likewiſe admitted one of the King's Chaplains in ordinary *(ee)*. And, in 1661, he was one of the Divines who were appointed to review the Common Prayer Book *(ff)*. He afterwards complied with the terms of the Act of Uniformity, and continued a ſteady Conformiſt to the Church of England till his death. By the obſervations which our Author had formerly made upon ſpeech, he had been led to think it poſſible to teach a deaf man to ſpeak, by directing him ſo to apply the organs of ſpeech, as the ſound of each letter required, which he obſerved children learned by obſervation and frequent attempts, rather than by art *(gg)*. Accordingly, in the year 1660, he was importuned by ſome friends that were privy to his ſkill, to make trial of it on one Mr *Daniel Whalley*, who had been deaf and dumb from five years old. On his conſenting to it, Mr Whalley came to the Doctor, who, about January 1661-2, began to teach him; and had ſuch ſucceſs, that, in little more than a year's time *(hh)*, he taught him to pronounce diſtinctly any words ſo as he directed him [*AA*]. Soon afterwards, he likewiſe taught Mr *Alexander Popham*, ſon of the Lady *Wharton* by her former huſband, Admiral *Popham*; which gave occaſion to a diſpute betwixt our Author and Dr *Holder* [*BB*]. The Royal Society being founded in 1663, Dr Wallis became one of the firſt members

(hh) *Viz.* May 21, 1663.

that King-ſervice, than perhaps many of thoſe who now complain of me, would have had the courage to do, had they been in my circumſtances. And I did to his late Majeſty [K. Ch. II.] *many good ſervices both before and ſince his reſtoration, which himſelf hath been pleaſed to profeſs to me with great kindneſs; and if either my Lord Chancellor Clarendon, or Mr Secretary Nicolas, or his late Majeſty were now alive, they would give me a very different character from what it ſeeems ſome others have done. And I think his Majeſty that now is knows ſomething of it, and ſome other perſons of honour yet alive.* Here we ſee that his particular friends at this time (*i. e.* at the reſtoration of K. Ch. II.) beſides the King himſelf, were the Earl of Clarendon, and Sir Edward Nicolas, Secretary of State, who valued him for his great learning and integrity, and were ſenſible of his affection for the royal cauſe, and his loyalty to the King, and the many good ſervices he had done his Majeſty before the reſtoration (53).

[*AA*] *He could pronounce diſtinctly*, &c.] Even ſome of the moſt difficult words of the Poliſh language, which a Poliſh Lord then in Oxford could propoſe to him by way of trial of thoſe five or ſix ſelect hard words, which the people of that nation uſed to propoſe to foreigners, as not to be pronounced by any but themſelves. Mr Whalley was likewiſe taught in good meaſure to underſtand the Engliſh language, and to expreſs his mind in writing. He had alſo in that time read over to the Doctor very diſtinctly the whole or greateſt part of the Engliſh Bible, and did pretty well underſtand it, at leaſt the hiſtorical part. He had even attained ſo much ſkill, as to expreſs himſelf intelligibly in ordinary affairs, to underſtand letters written to him, and to write anſwers to them, tho' not elegantly, yet ſo as to be underſtood (54).

[*BB*] *He had a diſpute with Dr Holder.*] Mr Popham's mother, it ſeems, when ſhe was big with him, received a ſudden fright, by occaſion whereof his head and face were a little diſtorted, the whole right ſide being ſomewhat elevated, and the left depreſſed, ſo that the paſſage of his left ear was quite ſhut up, and that of the right ear proportionably diſtended, and too open. However, we are told (55), that he was not ſo deaf, but that he could hear the ſound of a lute ſtring, holding one end thereof in his teeth; and when a drum was beat faſt and loud by him, he could hear thoſe who ſtood behind him, calling him gently by his name. At the age of ten or eleven years he was recommended to the care of Dr William Holder, then Rector of Blechingdon in Oxfordſhire, and taken by him into his houſe in 1659, where he learned to ſpeak and pronounce his name and ſome other words: but being called home by his friends, he loſt what he had been taught by Dr Holder, and was ſent three years afterwards, *viz.* in 1662, to Dr Wallis, who had the like ſucceſs with him, as he had with Mr Whalley. In 1669 Dr Holder publiſhed a piece, intituled *The Elements of Speech: an eſſay of inquiry into the natural production of letters, with an Appendix concerning perſons that are deaf and dumb:* wherein he relates the caſe of Mr Popham, whom he had taught to ſpeak, ſhewing how ſoon, and by what method he did it. Hereupon a letter ſent by Dr Wallis to the Royal Society, concerning Mr Popham's caſe, was inſerted in their Tranſactions of July 1670, wherein no notice being taken of what had been done by Dr Holder, he in anſwer thereto publiſhed in 1678, in 4to, a piece, intituled *A Supplement to the Philoſophical Tranſactions of July* 1670, *with ſome reflections on Dr Wallis's Letter there inſerted*; in which he charges the Doctor home with vanity, in aſſuming to himſelf the whole glory of teaching this young gentleman. To this Dr Wallis replied the ſame year, intituling his papers, which were addreſſed to the Lord Viſcount Brouncker, Preſident of the Royal Society, *A Defence of the Royal Society, and the Philoſophical Tranſactions, particularly thoſe of July* 1670, *in anſwer to the cavils of Dr William Holder*, 1678. *4to.* with which, Dr Holder making no rejoinder, this diſpute ended between the two principals. But Mr Wood, in his Faſti Oxon. vol. II. printed in 1697, engaged as a ſecond to Dr Holder; and taking up his cauſe, gave the following account of the matter. 'He [Dr Holder] has obtained,' ſays our antiquary, 'a great name, for his wonderful art 'in making a young gentleman, Alex. Popham, who 'was born deaf and dumb, to ſpeak. This great cure 'was performed by him (whereby he is the firſt that 'is remembered ever to have ſucceeded therein in 'England, or perhaps in the world) in his houſe at 'Blechingdon *ann.* 1659. And becauſe it was a won'derful matter, many curious perſons came to ſee and 'hear the perſon ſpeak; but he being afterwards called 'home by his friends, began to loſe what he had been 'taught by Dr Holder. Afterwards a great noiſe be'ing made, that Dr John Wallis had by his art made 'another young gentleman, named Mr Whalley, who 'had loſt his ſpeech from five years of age, to ſpeak, 'the ſaid Mr Popham was by his relations ſent to the 'ſaid Dr Wallis; which he effecting, he afterwards 'very vainly aſſumed the glory of it to himſelf, with'out taking notice of what had been before done to 'him.' Mr Wood afterwards mentions, according to the plan of his work, Dr Holder's *Elements of Speech*, &c. and his Supplement to the Philoſophical Tranſactions, and then ſubjoins theſe remarkable words. *This laſt was written by him to vindicate himſelf, that he had taught Mr Popham to ſpeak, which Dr Wallis did claim to himſelf; whereupon, ſoon after, Dr Wallis, who at any time can make white black, and black white, and hath a ready knack of ſophiſtical evaſion, as the writer of this matter doth know full well, did ſoon after publiſh an anſwer*, &c. (56). Upon this, our author giving an account of ſome paſſages of his life to Dr Smith in 1696-7, ſays, that Dr Holder had indeed attempted to teach Mr Popham to ſpeak, but had given it over; which ſeems not unlikely, ſince his friends did not ſend him again to Dr Holder, but deſired Dr Wallis to teach him. However, Dr Wallis confirms the probability of Mr Wood's ſuggeſtion, that Mr Popham in three years time, for want of an inſtructor, had loſt what Dr Holder had taught him. For he obſerves, that 'both Mr Whalley and Mr 'Popham, notwithſtanding the proficiency they had 'made under him in learning to ſpeak, were apt to 'forget

(55) By Dr Holder in his Elements of ſpeech, mentioned below.

(56) Wood's Faſti Oxon. vol. II. col. 139.

members of it; and Mr Whalley's cure making a great noiſe, he was brought to one of their firſt meetings, and did there, to their great ſatisfaction, pronounce diſtinctly enough ſuch words as were propoſed to him by the company; and though not altogether with *the uſual tone or accent, yet ſo as eaſily to be underſtood (ii).* The ſame year, at the *requeſt of Sir Robert Moray, our Author wrote his Cono-cunæus* [CC], or *Shipwright's circular Wedge (kk). And was very ſerviceable in eſtabliſhing the reputation of the Royal Society, not only by frequently communicating curious papers of his own writing, but alſo by giving, at their requeſt, an account of ſuch as were ſent by others upon mathe*matical ſubjects. For executing the laſt mentioned part of their deſign, eſpecially in ſome controverted points, he had ſome qualifications rarely to be met with in another [DD].

In

(ii) He did the like ſeveral times at Whitehall in the preſence of his Majeſty, Prince Rupert, and divers others of the nobility.

(kk) It was re-printed in the 2d volume of his mathematical works in 1696.

'forget after their departing from him, much of that nicety which they had before in the diſtinct pronouncing of ſome letters, which they would recover, when he had been occaſionally with them to ſet them right; they wanting the help of an ear to direct their ſpeaking, as that of the eye directs the hand in writing. For which reaſon,' continues he, 'a man that writes a good hand, would ſoon forget ſo to do, if grown blind. And therefore one who thus learns to ſpeak, will, for the continuance and improvement of it, need ſomebody continually with him, who may prompt him, when he miſtakes.' In 1698 the Doctor gave a particular account of his method of teaching, wherein he takes notice, 'That he had then taught thirty four or thirty five perſons to ſpeak plainly and diſtinctly, who did before heſitate and ſtutter very much, and others to pronounce ſuch words or letters as before they thought impoſſible for them to do, by teaching them how to rectify ſuch miſtakes in the formation, as by ſome impediments or acquired cuſtoms they had been ſubject to.' Upon the whole, it is certain, that Dr Wallis in his treatiſe *De loquela* firſt diſcovered the true theory of this art; that this tract was printed at leaſt ſix years before Dr Holder undertook to teach Mr Popham, ſo that it can hardly be ſuppoſed but that Dr Holder had ſeen it and improved by it; whereas it does not appear that Dr Wallis could have the leaſt hint from him, when he firſt taught Mr Whalley.

For the ſatisfaction of ſuch as are curious in theſe matters, it will not be amiſs to give an account of the origin of this art of reſtoring ſpeech to the dumb, lately publiſhed *. This rare ſecret, ſays my author, ſeems to have been firſt diſcovered by Peter de Ceſtro, Phyſician to the Duke of Mantua; at leaſt, it has been found among his MSS. as follows. The dumb perſon muſt be firſt purged according to his conſtitution, and afterwards in a particular manner with black hellebore, or its extract, in the form of pills, or a decoction is made of a drachm of the root of that plant, of which the author of the remedy took three ounces, wherein were infuſed during a night two drachms of agaric, adding to what was ſtrained off two ounces of ſyrup of cuſcute. The brain of the dumb perſon being ſufficiently purged by this remedy, which is to be repeated as occaſion may require, his head is ſhaved a hand's breadth on the coronal ſuture, and on that part anointed with the following liniment. ℞ Brandy three ounces; ſaltpetre, or nitre purified, two drachms; oil of bitter almonds an ounce. Boil the whole till the brandy is evaporated; then add of the water of nenuphar an ounce; and by ſtirring the mixture with a ſlice it is reduced to a liniment, with which the ſhaved part of the head muſt be rubbed, particularly at night when the patient is going to bed, and in the morning; after he has thoroughly waſhed his ears, noſtrils, and palate, has chew'd a ſmall grain of maſtic, or a bit of liquorice, or rather a paſte made of the juice of liquorice, maſtic, amber, and muſk, has combed the hind part of his head with an ivory comb, and has waſhed his face. In ſpeaking to him over the coronal ſuture, one will be greatly ſurprized to find, that tho' born deaf and dumb, he will diſtinctly hear the voice of the perſon ſpeaking to him, which he never would have done by the ears †. His tutor may then begin teaching him the letters of the alphabet, repeating often each letter till he can himſelf form the ſounds of them and pronounce them properly, which muſt be continued ſeveral days, paſſing from letters to words. He muſt alſo be ſhewn different things in common uſe, to help him to learn their names. Afterwards he may be ſpoken to in ſentences, which muſt be often repeated to him, that he may learn the manner of digeſting in order the parts of a continued diſcourſe. During the firſt fortnight he will learn ſurprizingly the denominations of abundance of things; and if he has in the beginning ſome difficulty in retaining them, he will ſoon get over it by his conſtant application to acquire a facility of ſpeaking.

* In the Univerſal Magazine for January 1762. p. 15. & ſeqq.

† As there is a free paſſage thro' a duct which runs between the ears and the mouth, it is eaſy to conceive how deaf perſons may hear ſometimes by the mouth, tho' they cannot by the ears. Dr Buſbequius gives an account of a deaf woman he was acquainted with, who putting a horn into her mouth, and making thoſe, who wanted to communicate any thing, to ſpeak thro' its broad orifice, heard diſtinctly all that was ſaid to her.

Helmont's method was this; he firſt taught the deaf the meaning of words by ſhewing them different objects, which he ordered to be brought to him, and which he called for before them with a loud voice, that they might the more eaſily obſerve the different motions of his mouth, tongue, lips, chin, and throat, which were to them as the characters and figures of letters are to thoſe who are taught to know them. He afterwards found no difficulty in teaching them to read, by placing before their eyes the ſame letters they had ſeen in ſome meaſure formed by the motion of the tongue, &c. And he pretends, that one might the ſame way with equal facility teach them to ſpeak by placing them before a looking-glaſs, to ſee and imitate themſelves thoſe different motions of the mouth, and by animating them as much as poſſible by the voice in pronouncing them. By this method, Helmont aſſures us, he had in three weeks time brought a perſon born deaf to anſwer any queſtions that could be put to him ‡. Upon the whole, the intelligent reader will be convinced, that all theſe methods ſerve only as ſo many foils to the much more compleat one of Dr Wallis.

‡ Helmont's alphabet natural colloq. where he obſerves, that the orientals would ſucceed better than the Europeans in this art, becauſe having occaſion to breathe a great quantity of air, on account of the heat of their climate, and keeping always the mouth much open, they ſpeak chiefly from their throat, ſo that it is eaſy to take notice in them of all the different motions of the tongue; whereas the inhabitants of the North open the mouth but very little in ſpeaking.

[CC] *Cono-cuneus*, &c.] This problem was propoſed at Sir Rob. Moray's houſe by Mr Pet, of his Majeſty's navy, who produced on a plain baſe which was the quadrant of a circle like that of a quadrantal cone or cylinder, an erect ſolid which was double of the radius of that quadrant, and from every point of its perimeter ſtreight lines drawn to the vertex meet there, not in a point, as in the *apex* of a cone, nor in a parallel quadrant, as in a quadrantal cylinder, but in a ſtreight line or ſharp edge like that of a wedge or *cuneus*, which was therefore called by our author *cono-cuneus*. By the various ſections of this ſolid in ſeveral poſitions, Mr Pet rightly conceived, that diverſe new lines muſt ariſe in great variety different from thoſe ariſing from the ſection of a cone, ſome of which he ſuppoſed might be of good uſe in building ſhips; in order to which it was propoſed to conſider of it. Accordingly Dr Wallis being in company, ſet about it preſently after, which produced this treatiſe, wherein he has repreſented the true nature of all ſuch lines, and ſhewn how to draw them; but which of them was moſt, or whether any was, for the purpoſe intended, he was not able to tell (57).

(57) Introduction to the cono-cuneus.

[DD] *Qualifications rarely to be met with in another.*] Beſides his acknowledged ſkill, and wide ſpread fame, ſufficient to procure a general good reception to any productions of his pen on thoſe ſubjects, he had not only impartiality and candor, qualities which are indiſpenſibly neceſſary to beget an unforced ſubmiſſion to his judgment, but he was likewiſe endued with (what is rarely found in ſuch ſuperior talents) a comprehenſive latitude of temper, which gave each party in any controverſy room enough to be eaſy in his deciſions. This moderation was extremely uſeful to the ſociety in many caſes: and that learned body never gave a clearer atteſtation to their ſenſe of it, than in remitting the account of Mr Hevelius's *Annus Climactericus* to the Doctor (58). That celebrated aſtronomer had put the iſſue of the diſpute concerning the advantage of his plain ſights in cœleſtial obſervations upon this book, which he had openly declared in the title of *Annus Climactericus*, intimating that if they ſurvived that critical year, their accuracy would be eſtabliſhed. The Doctor was well known to Mr Hevelius, and in 1673 had ſent him a method of dividing the arc in the limb of a quadrant by concentric circles

and

(58) It is inſerted in Philoſoph. Tranſ. No. 175.

In 1663, he publiſhed a treatiſe *De Proportionibus*, which he dedicated to Lord Brouncker [*EE*], with whom he lived in the moſt friendly communication of ſtudies till his Lordſhip's death. The ſame year 1663, he gave the firſt demonſtration of that moſt important and uſeful problem, concerning *the laws of motion in the colliſion of bodies* [*FF*] (*ll*). In 1666, he framed a new hypotheſis to ſolve the phænomena of the tide, of which no tolerable account had then appeared: He proſecuted the ſame ſubject the following year; and publiſhed it in 1668, under the title *De Æſtu maris hypotheſis nova* (*mm*); and the next year he produced the firſt part of his celebrated treatiſe *De motu* [*GG*]. The other two parts came out in the two ſucceeding years; and the whole was compleated in 1671, under the title of *Mechanica, ſive de motu tractatus geometricus.* In 1673, he publiſhed, in Latin, *Horoccii Opera poſthuma*, to which he ſubjoined Mr Flamſtead's *Diſcourſe of the equation of time* *. In the mean while, he employed ſome of his leiſure hours in correcting, for his own private uſe, and ſupplying the defects found in the manuſcript copies of *Archimedes's Arenarius & Dimenſio Circuli*; and the deſign of printing a collection of all the ancient mathematicians miſcarrying a few years after for want of encouragement, he readily complied with Dean Fell's propoſal to put this piece to the preſs, in order to convince the public in ſome meaſure, by this ſpecimen, of the true merit of that deſign [*HH*]. Our Author added the commentary of *Eutocius* upon the

(*ll*) See the Phil. Tranſ.

(*mm*) He accounted for this phænomenon from the continual change in the center of gravity of the earth and moon, and his calculations are very ingenious and exact; but for want of conſidering the action of the ſun in producing this effect, his hypotheſis was superſeded by that of Sir Iſaac Newton.

---

and right lined diagonals (59). What deciſion he gave in this vexatious affair is ſeen in a letter to Mr Flamſtead; and tho' the reſtleſs ſpirit of Mr Hooke was not to be ſatisfied with any deciſion that croſſed his own froward ambition, yet even he choſe in his defence afterwards to point directly to what had been urged in his disfavour by another perſon, *viz.* Mr William Molyneaux (60). The Doctor's letter to Mr Flamſtead is dated Oxford, Febr. 12. 1685-6, and begins thus.

'Sir,

'Mr Caſwel hath done me the favour, by your direction, to ſhew me your letter to him of February 4th. I ſaid ſo little in the account I gave of Hevelius's book of what had paſſed between you and him, becauſe I would not have any difference remain between you, as I hope there does not. And beſides printing what letters had before paſſed to ſet forth matter of fact, I don't ſee that he does anew ſay any thing ſevere of you in his preſent narrative, but ſeems as to you to be ſatisfied: only as you think well of your way ſo doth he continue to do of his; and you muſt allow each other to follow the way he thinks beſt. But I could not do ſo as to Mr Hooke; becauſe it is the main deſign of his book, and ſo declared to be, to vindicate himſelf as to what Mr Hooke had written againſt him and made public, and to juſtify the credit of his inſtruments and obſervations againſt his exceptions, which unconcerned ſpectators think he had juſt reaſon to do. And therefore when deſired by the ſociety to give them an account of the contents of that book, I could not avoid the taking notice of what was ſaid againſt him. But I was ſo tender therein, that I am very ſure there is not one hard clauſe, ſentence, or expreſſion, for which I cannot ſhew the page and line where in the book it is to be found, and moſt of them more than once, and which, to ſatisfy any who ſhall doubt of it, I have cited in the margin of my own book (61).'

[*EE*] *Dedicated to Lord Brouncker.*] This treatiſe was written in vindication of Euclid's definition in the 5th book of his Elements. In the dedication he mentions that Lord's invention of the quadrature of the hyperbole, as a thing that he had then done; which was a year before it was publiſhed in the Philoſophical Tranſactions. But more than this, the Doctor, in the ſcholium to his 91ſt propoſition, acquaints the world, that my Lord had then ſhew'd him two methods of performing that quadrature; and, in the ſecond edition of that book, the Doctor ſays, he liked that better, which was not publiſhed by his Lordſhip.

[*FF*] *The laws of motion in the colliſion of bodies.*] The Royal Society being ſenſible of the many errors which Des Cartes had run into for want of a more accurate determination, drew up the ſtate of the problems, and ordered their Secretary Mr Oldenburg to publiſh it in the Tranſactions. This had been done in the latter end of the foregoing year; and they received three ſolutions this year, at no great diſtance of time from one another. The firſt that came was that of Dr Wallis; next, Sir Chriſtopher Wren's; and the third was by Mr Hooke. Sir Iſaac Newton found theſe laws of ſo much ſervice in writing his *Principia*, that in a ſcholium to Cor. VI. ſubjoined to Axiomata or Leges Motus of that work, he mentioned all the three; by which means their fame ſeems to be ſecured to the lateſt poſterity.

[*GG*] *His celebrated treatiſe* De motu.] This is generally eſteemed the Doctor's maſter-piece. The dignity of the mechanic philoſophy was particularly raiſed by it. It is very comprehenſive, highly laboured, and executed in ſome very intricate inſtances with the exacteſt accuracy. The Oxford editor of the *Opuſcula Mathematica* of Mr Oughtred in 1677, ſpeaking of thoſe pieces of that author upon this ſubject, concludes his remarks in this elegant Latin eulogium. *In inſtitutionibus mechanicis ſi quid deſideretur abunde ſuppleri poteſt ex accuratiſſima tractatu Cl. Walliſii; qui ſolus pro dignitate hanc partem Matheſeos tractavit, & de quo ſi cui poſteà ſcribere libuerit, ab illo mutuetur, neceſſe eſt.*

[*HH*] *To convince the world of the benefit of that deſign.*] An account of it was drawn up in Latin, and prefixed to this work, by Dean Fell, Curator of the Oxford preſs, who writes thus. *Ante tres annos jam publice teſtatum fuit, & nobis in animo fuiſſe veterum omnium mathematicorum opera hic loci adornare & typis noſtris excudere. In eam porro rem ſcriptores pro ſeculorum in quibus vixerunt & argumentorum quæ tractarunt ratione in claſſes atque ordines diſtinximus; adnotatis ſubinde Neotericorum inventis quæ aut artem promoverunt aut laboris compendium fecerunt. Quinimo Bodleianæ aliorumque noſtratium bibliothecis, quæ MSS. codicibus abundant, ſcrinia excuſſimus, cujuſque ineditorum exemplaria ibidem deſiderarentur viris idoneis in exteras partes tranſmiſſis de iiſdem procurandis ſategimus: nominatim Apolionii Pergæi tres libros poſteriores Arabice, Serenum de Sectione Cylindri Græce Lugduni & Pariſiis tranſcribendis curavimus. Inſuper conſultiſſimum videtur, ut Euclides agmen duceret.* He then gives an account what had been done by Dr Bernard (62), and concludes thus. *Sed poſt hæc omnia cum conatus noſtri tantum aberant ut Macænatem ſortirentur, ut vix laudatorem unum & alterum invenerint, conſilium hoc ceu prorſus deſperatum ultro depoſuimus. Nihilominus ut cognoſcerent ſtudioſi, quam minime ſupervacua futura eſſet illa opera quæ in veterum ſcriptis collocatur, placuit nunc temporis breves hoſce Archimedis tractatus una cum Eutocii in eorum alterum ſcholiis ex recenſione Walliſii in lucem emittere, quibus tot mendæ olim irrepſerant quot fuerunt voces; quarum pleræque non tam criticum aut grammaticum videbantur deſiderare quam Vatem aut Hariolum.* To this preface is ſubjoined the following epigram by Dr Bernard.

In Arenarium Archimedis.

Conflatum ex micis Epicurus credidit orbem
Maximaque in rebus polline creta levi
Verum atomos quot terra capit, quot Inania cœli
Dicere, ut ex numero granula nulla cadat;
Hoc opus, hec compti ſuperat Doctoris acumen,
Parque Syracuſio calculus ingenio eſt.

The account mentioned by Dean Fell of the defects in the MSS. is confirmed by Dr Wallis, whoſe judgment in ſupplying them has never I believe been called in queſtion. The great curioſity of theſe pieces induced the Doctor to publiſh them, ſince in them we ſee the ancient arithmetic, by which the great advantage of the modern invention of the Arabic numbers

is

(59) Inſerted in his Algebra, ch. vi.

(62) See his article.

the former of theſe tracts; and the whole came out in 1676. In the interim, the juſt mentioned diſappointment putting the Univerſity upon the deſign of publiſhing what is now called the *Oxford Almanack*, their privilege was controverted by the company of Stationers at London. Upon which occaſion, the conducting of that ſuit fell to the ſhare of Dr Wallis, then *Cuſtos Archivorum*, who managed it with extraordinary diligence as well as prudence; whereby the right of the Univerſity was confirmed. In 1680, he publiſhed from the MSS. *Claudii Ptolemæi opus harmonicum* [*II*], in Greek, with a Latin verſion, and notes; to which he afterwards added an Appendix, *de Veterum harmonica ad hodiernam comparata*; as alſo *Porphyrii in harmonica Ptolemæi Commentarius ex codd MSS. Græce & Latine editus, & Manuelis Bryennii harmonica ex codd. MSS*: In 1684, he publiſhed his *Algebra* (*nn*), in Engliſh, containing the hiſtory of that art, and the ſucceſſive improvements, from its firſt appearance in Europe to his own invention of the *Arithmetic of Infinites*; to which he afterwards added the infiniteſimal method of Mr Leibnitz, and that of Fluxions by Sir Iſaac Newton [*LL*]. A rumour, about this time, being ſpread about, and generally believed, that he had decyphered King Charles the Firſt's letters, taken by the rebels at the battle of Naſeby, he wrote a letter, in April 1685, to Biſhop Fell, in vindication of himſelf from that charge [*MM*]. The ſame year,

is made illuſtriouſly conſpicuous. For inſtance, the numbers here in line 398, ſaid by Archimedes to proceed in a decuple proportion from unity, and are written thus, α, β, γ, δ, ε, &c. are the very ſame which we now write, 1, 10, 100, 1000, &c. and thus our 1675 (the year when the doctor made this remark) was in their writing 1δ, 6γ, 7β, 5α, or rather (ſince they had not the marks 1, 2, 3, &c.) thus, $\alpha\,\Delta\ \overline{{}^{,}\varsigma\,\Gamma}\ \overline{\xi\,B}\ \overline{\varepsilon\,A}$ or in ſome ſuch way. It is further remarkable, that the numbers αβγδε are not only accommodated to a progreſſion in a decuple proportion, but to any other ſeries of continual proportionals in any ratio whatſoever. To wit, if α be put for 1, then any number whatever being put for β, the operation equally ſucceeds, and they are the ſame as what we now call unity, ſquare, cube, biquadrate, &c. whatever be the value of the root α. For altho' the names, *coſſic numbers*, *denominators*, and *algebra*, are ſuppoſed to be introduced either by the Arabs or the modern Greeks ſince the time of Euclid and Archimedes, yet the thing in effect obtained among them, as is conſpicuous from theſe numbers of Archimedes αβγδε: Nor is it any thing elſe than this which Euclid means in his definition X. lib. 5. in which he comprehends all magnitudes or quantities, as well as numbers, where he defines the duplicate, triplicate, and quadruplicate, proportion, viz. in any number of continual proportionals from unity, as αβγδε, &c. or 1, *a*, *aa*, *a*3, *a*4, &c. the duplicate of any proportion whatever expounded by 1 to a, is as a^2 to 1, the triplicate as a^3 to 1, &c. that is, let the denominator of any ratio (by Euclid called ϖηλικοτητα) be expreſſed by α, which you may call the root, then the duplicate (called by Enclid διπλαſιον) is that which is denominated by a^2 the ſquare of that root, &c. Wherefore this is not a new doctrine by the coſſic numbers (though new in name and notation) but was long ago taught by Euclid, and applied by Archimedes to theſe things. *Quæ monere* (ſays the doctor) *viſum eſt, ut doctrinæ veterum recentiorum doctrinæ, utut notatione & loquendi formulis diverſa, concordiam, quam non omnes forte pariter animadvertunt, obiter inſinuarem.*

[*II*] *Ptolemæi Harmonica*, &c.] Theſe pieces of ancient harmonics, with thoſe before publiſhed by Mydorgius, completed the whole of what they have left upon that ſubject. Reducing the ancient to the modern muſic was a very curious and uſeful performance, and made thereby what had been before hardly at all intelligible in the various modes of the ancient muſic, eaſily underſtood, ſince they are all here reduced to the reſpective notes of Guido's ſcale, with its cliffs and keys. The doctor has a diſcourſe relative to this ſubject, concerning the imperfection of organs, and the remedy applied to it. The imperfection he obſerves is this, that from every note you cannot find any interval in its juſt proportion (by intervals he means thoſe in the ſcale of ſemitones) 'and therefore,' ſays he, 'inſtead of theſe proportions, it is ſo ordered, if I miſtake not the practice, that the thirteen pipes within an octave as to their ſounds with reſpect to acute and grave ſhall be in continual proportion; whereby it comes to paſs, that each pipe does not expreſs its proper ſound, but ſomething varying from it, which is called bearing, and this is an imperfection in that noble inſtrument.' He obſerves likewiſe, that the ſemitones being all made equal, they do indifferently anſwer all poſitions of mi, i. e. of the two natural (as they were then called) ſemitones in an octave, and though not exactly to any, yet nearer to ſome than to others, whence it is that the ſame ſong ſtands better in one key than another. He likewiſe ſhews that a ſcale of degrees accurately equal, which will coincide with the terms of the natural ſcale is not poſſible. However, this was generally thought to be performed afterwards by Mr Huygens, and both Dr Pepuſch and Mr Abraham de Moivre falling into the ſame opinion, did attempt to demonſtrate the truth of it. But ſince that the defects of Mr Huygens' was firſt diſcovered by Mr Harriſon (63), and has been lately further explained by Dr Robert Smith, maſter of Trinity College in Cambridge, who has given a new ſcale ſo contrived, as to be capable of having all theſe degrees as near as poſſible in an equal diviſion *.

[*KK*] *His Algebra.*] It was put to preſs at London in 1676, and one ſheet then printed by way of ſpecimen. In this work, which he reprinted with large additions in the ſecond volume of his works in folio, he inſerted the greateſt part of thoſe papers of his, which had been at any time publiſhed in the Philoſophical Tranſactions, as well as other curious things. Among the reſt, we have here an extraordinary inſtance of the ſtrength of his memory (64) in extracting the ſquare root of the following number, conſiſting of no leſs than fifty three places, 24681 3579 1012 1411 1315 16182017 1921 42242628 30232527 2931 of which he found the ſquare root to be 157103016 87148280181 7152171 fere. What increaſes the wonder is, that he performed this operation as he lay abed in ſome ſleepleſs nights, occaſioned by a quartan ague, which had held him for a twelvemonth paſt.

[*LL*] *A letter to Biſhop Fell.*] We have already given the latter part of this letter, in purſuance to our deſign of obſerving a juſt order of time. It is dated April 8, 1685, and begins thus:

'My Lord,

'I underſtand there have of late complaints been made of me, that I decyphered the late King's letters, meaning thoſe taken in the late King's cabinet at Naſeby fight, and after printed. As to this, without ſaying any thing whether it be now proper to repeat what was done above 40 years ago, the thing is quite otherwiſe. Of thoſe letters and papers, whatever they were, I never ſaw any one of them, but in print, nor did thoſe papers, as I have been told, need any decyphering at all, either by me or any body elſe, being taken in words at length, juſt as they were printed; ſave that ſome of them were, I know not by whom, tranſlated out of French into Engliſh.'——

Though the doctor's veracity in denying that he decyphered any of theſe letters ought not to be called in queſtion without very good proof, yet in regard to impartiality we muſt not omit to obſerve, that he ſeems to have been miſinformed as to the fact, that none of them were wrote in cypher, as appears from a letter of Sir Edward Hyde, afterwards Lord Clarendon, where he writes thus: *Nor did I ever hear, that more of the King's letters that were found at Naſeby than thoſe they found decyphered, or found the cyphers in which they were written, were decyphered. And I very well remember,*

(*nn*) In the title page it is dated 1685, according to the practice of the bookſellers, of beginning the year at Michaelmas preceding the common æra.

(63) The inventor of the clock for finding the longitude at ſea.

* In a piece intituled, Harmonies, or the doctrine of muſical ſounds. 2d Edit. 1759.

(64) In chap. CIII.

year, he publiſhed three diſſertations, a piece upon Melchiſedeck, Job, and the titles of the Pſalms. In 1687, he publiſhed his *Inſtitutio Logica.* In 1682, he publiſhed *Ariſtarchus Samius de magnitudine Solis & Lunæ*; to which he ſubjoined *Pappi Alexandrini, Libri ſecundi, Collectionum Mathematicarum hactenus deſiderati fragmentum* [NN]; and, the ſame

member, that in the volume they publiſhed, there was much left in cypher, which could not be underſtood, and which I believe they would have explained, if it had been in their power (65).' This fact had been charged upon the doctor ſoon after his depoſiting in the Bodleian Library, in 1653, ſome letters he had then decyphered. Mr Henry Stubbe, in a piece publiſhed in 1657, tells us (66), *that the doctor decyphered (beſides others, to the ruin of many loyal perſons) the King's cabinet taken at Naſeby, and as a monument of his noble performance, depoſited the original with the decyphering in the public library at Oxford.* The ſame charge is repeated in Dr Berwick's life, the writer of which having obſerved, that our mathematician had ſurpriſingly decyphered other letters, proceeds to declare, that the ſame artiſt, too officious to gratify the rebels, decyphered his Majeſty's papers, written alſo in characters, and taken at Naſeby fight (67). And in the Oxford Catalogue of MSS. *in Hyperoo Bodleiano* (68), it is ſaid, That Doctor Wallis decyphered ſeveral of King Charles the Iſt's letters, and that they are in the book of cyphers which he gave to the univerſity-library in the year 1653. But this being declared by Dr Thomas Smith to be a great and ſcandalous ſlander, no ſuch letters being found after the Reſtauration in this collection among thoſe ſo depoſited by the doctor (69), Mr Antony Wood gave the following account of that matter, March 1660. *The latter end of this month Dr Wallis got by flattering, good words, &c. his book of decyphering the King's letters, &c. from the public librarian Dr Barlow, when he altered what he pleaſed* (70). The whole weight of the proof therefore reſts upon Mr Wood's evidence, which, from what has been already obſerved, is far from being unexceptionable in this point. The time indeed is well laid, the long parliament having diſſolved itſelf in the middle of March; ſo that a leſs ſagacious perſon than the doctor might eaſily conclude what would turn up next. But if upon that view he ſet himſelf to alter the manuſcript, how came he to let this paſſage remain, *I know that leſs ſervices than theſe are, have been often rewarded with greater recompences than I look for* (71)? He thought he had done the powers in being conſiderable ſervices by decyphering letters: if ſo, he had thereby done the royal cauſe proportionable diſſervices: and if leſs ſervices had been often rewarded with greater recompences than he looked for, leſs diſſervices might be thought to deſerve greater puniſhment than he cared for. But he ſeems to have at that time a better game to play than what Antony Wood ſpeaks of, which he accordingly purſued, as has been ſhewn already, where we ſee him not only in the character of an eminent decypherer, but of a ſubject who was diſpoſed to make ſome atonement for his former tranſgreſſion. Beſides, if he did get the book of decyphering from the public librarian, it is not likely he ſhould make uſe of any flattering words, to wheedle him into a compliance with ſuch a requeſt, ſince when he gave the book to the univerſity, he reſerved to himſelf the power of making what alterations in it, and when he pleaſed: *Reſervata ſibi in poſterum poteſtate addendi vel emendandi* are the very words in the beginning, and are not denied to be there from the beginning. Add to this, that the MS. has been carefully examined more than once with this view, from one end to the other, and no marks could be found of its being tampered with in the manner Mr Wood ſuggeſts. However Mr Thomas Hearne, in his preface to Peter Langtoft's Chronicle, having the doctor's *memorandum* above-mentioned prefixed to this collection of papers decyphered by him, tells us, that 'he rather 'takes notice of that memorandum, becauſe the be'ing acquainted with the liberty that Dr Wallis re'ſerved to himſelf, may be of ſervice to ſuch as are 'concerned to defend, as well the title of his book in 'the printed catalogue as what hath been ſaid of his 'MS. by Henry Stubbe, as abovementioned; as alſo 'by Mr Wood in the genuine edition of his Athenæ 'Oxon. who, ſays he, looked upon this buſineſs of de'cyphering as a baſe act (72). And it may be ſup'poſed, that the learned Dr Smith would have ſpared 'his note on the occaſion, had he been either aware 'of the aforeſaid memorandum, or given any credit 'to what Anthony à Wood had ſaid, of the doctor's 'being able at any time to make black white, and 'white black for his own ends; and of his having a 'ready knack of ſophiſtical evaſion, a character 'which Anthony afterwards inlarged (73), notwith'ſtanding it does not appear in the late ſpurious edi'tion of his Athen. Oxon. in which he is made to 'have written things tranſacted after his death. On 'the other hand, Dr Wallis hath been often heard to 'ſay of Mr Wood, that *he was a ſad man.*'— Thus it was thought proper to lay before the reader all the reaſoning on each ſide, tho' ſomewhat of the longeſt, upon a diſpute, in the iſſue of which Dr Wallis's reputation is ſo nearly concerned. Therefore we ſhall cloſe the whole with the determination of Mr Davys, an author eminently ſkilled in this art of decyphering, who firſt publiſhed a diſcourſe of the doctor upon the ſubject, and who, after having ſifted this matter throughly to the bottom, and having obſerved, that not one of the letters taken at Naſeby appeared in the MS. collection in the Bodleian library, gives his opinion with great candor and impartiality, in theſe words: 'Had 'the doctor decyphered thoſe letters, I know not 'whether he would have ſcrupled to inſert ſome one 'or more of them among the reſt; but I believe that 'he decyphered none of them.' He then refers to the opinion and remark of Lord Clarendon above-mentioned; 'and indeed,' continues Mr Davys, 'the thing 'ſeems to ſpeak itſelf. For if the cabinet were taken, '(as it is agreed on all hands that it was) how could 'the key of the cyphers eſcape? Where can we ima'gine the king to have lodged them, but in his ca'binet, together with the letters which were written 'by them? So that after all the clamour that has 'been raiſed, and all the credit it has obtained, it is 'moſt probable, that Dr Wallis had no hand in de'cyphering the King's cabinet taken at Naſeby. For 'the reſt, as I don't undertake to acquit this very 'great man of having done conſiderable diſſervice to 'the royal cauſe, ſo I gladly embrace the preſent op'portunity of making the beſt apology for him that 'his cauſe will bear. I obſerve then, that a little be'fore the reſtoration we meet with him again appear'ing not only under the character of an eminent de'cypherer, but of a ſubject who was diſpoſed to make 'ſome atonement for his former tranſgreſſion (74).' For proof of this he cites the paſſage from Dr Berwick's life, which has been already produced.

[NN] *Ariſtarchus Samius & Pappi fragmentum.*] The firſt of theſe the doctor ſeems to have been led to publiſh by having done the ſame for *Archimedes's Arenaria,* who quotes Ariſtarchus Samius, and takes the magnitude of the earth and its orb from him. I ſay, the earth's orbit, for the Pythagorean, *i. e.* the Copernican ſyſtem, was embraced by Ariſtarchus in this tract, which is the moſt ancient we have left where that ſyſtem is taught, and this ſeems to be another recommendation to our author to publiſh it. But the fragment of the ſecond book of Pappus was a ſtill greater curioſity; the whole book, as well as the firſt, having always before been given up for loſt. The fragment is likewiſe, as the doctor obſerves, the more acceptable, as by it we ſee, the ſubject not only of the ſecond, but of the firſt book of that author's collections, was the ancient arithmetic. Whence it is perceived, that we have no great reaſon to regret the loſs of it, ſince *that* is ſo much better taught in the modern Saracen numbers, as is evident both from what we ſee of the tedious way of working the common operations of multiplication, diviſion, and extraction of roots in Eutocius's commentary upon the Arenarius of Archimedes, and is ſtill further abundantly confirmed by this very fragment of the ſecond book of Pappus. The whole doctrine which is taught therein, though with the Latin verſion it fills ſeven pages in folio, amounts to little more than this, That if 30000 and 2000 and 10 and 4 be continually multiplied into each other, the product will be that of the ſignificant figures $3\times2\times1\times4=24$, added to the 8 cyphers, that is 2400000000; the reading of which, according to the way of the ancients, is, twenty-four myriads of myriads, or

ſame year, he wrote a letter (*oo*) to Sir Samuel Morland at Utrecht, to prove that *Des Cartes* borrowed his pretended improvements in Algebra from our countryman, Mr Harriot [*OO*]. In 1690, came out his piece intituled, *The Doctrine of the ever-bleſſed Trinity explained*; which engaged him in a diſpute with the Unitarians that and the following year; and, in 1692, he had a controverſy with Mr Thomas Bampfield, in defence of the Chriſtian Sabbath [*PP*]. About this time, the Curators of the Univerſity-preſs at Oxford began to collect the mathematical works of the Doctor, and to publiſh them in the Latin tongue. Accordingly, the firſt Volume, in folio, was put to preſs, in 1692; and the ſame year he gave a ſolution of the Florentine problem, ſent to him, as a challenge, from Italy (*pp*). There being a deſign this year on foot for changing the old ſtile of computing the year for the new one, it was thought proper to conſult the Doctor thereupon; accordingly a letter was ſent to him by Biſhop Lloyd for that purpoſe. In

twenty-four double myriads; a myriad containing four places.

The doctor makes another remark, which in juſtice to his honeſt fame muſt not be omitted, viz. that it appears from the concluſion of this fragment, that Apollonius (from whom theſe two books were tranſcribed by Pappus) in the following book proceeded to geometry, but which was analytically treated by him in ſome books, at leaſt of his *Loca*, one of theſe being called Αναλυομενος τοπος, or, *An analytical locus*. This I choſe to mention, that the reader may be able to apprehend the juſtice of a charge lately brought againſt the doctor. He had ſaid in his Algebra (75), that the ancients had an Algebra, or Art of Invention, but this they ſeem very ſtudiouſly to have concealed, contenting themſelves to demonſtrate by apogogical demonſtrations: of which Nunez or Nonius in his Algebra in Spaniſh, fol. 1146. ſpeaks thus: *How well had it been, if thoſe authors who have written in mathematics had delivered to us their inventions in the ſame way, and with the ſame diſcourſe, as they were found out! And not, as Ariſtotle ſays of artificers in mechanics, who ſhew us the engines they have made, but conceal the artifice, to make them the more admired. The method of invention in diverſe acts is very different from that of tradition, wherein they are delivered. Nor are we to think that all thoſe propoſitions in Euclid aud Archimedes were in the ſame way found out as they are now delivered to us.* This has been animadverted on, in the preface to a late treatiſe, as follows: *Nonius quidem excuſandus, quem Pappi Alexandrini collectionum mathematicarum nunquam vidiſſe veriſimile eſt; Nonii enim Algebra Antwerpiæ impreſſa fuit anno* 1567, *Pappi autem collectiones non ante annum* 1588 *edita fuerunt. Walliſius vero* [*& Schootenius* *] *viderant Pappi præfationem ad librum ſeptimum collectionum, in qua prædicti libri Veterum Analyticarum numerantur: Ex quorum argumentis in eadem præfatione plane recenſitis clariſſime liquet tantum abfuiſſe, ut veteres artem analyticam ſupprimerent & abſconderent, ut eam non ſolum multo ſtudio excoluerunt, ſed de ea tot libros conſcribendos promulgaverint. Quos quidem libros geometræ verſabant ſexcentos & plures annos, a tempore ſcilicet Apollonii Pergæi uſque ad Pappum. Adeo igitur abſurda eſt hæc Veterum accuſatio, ut ſoli Recentiorum incuriæ debeatur, & minime vera habenda ſit* (76). Now it is evident, that Dr Wallis was far from denying that theſe books of Apollonius were written in the analytical way, or demonſtrated by a geometrical analyſis, as diſtinct from the ſynthetical method. Nay, the ſuppoſition that theſe loca were made uſe of as elements by the ancients, and referred to, either tacitly or expreſsly, in ſome of their works, is very conſiſtent with what the doctor here ſays, that they concealed their logiſtical method or algebra, by which they were led to their inventions; there being a wide difference between algebra, as an art, in the full extent of the word, and the analytical method of demonſtrating geometrical propoſitions ‡. And it muſt be remembered, that this paſſage of the doctor's Algebra ought to be interpreted by what he ſo often and upon every occaſion aſſerts concerning the way in which he had delivered his inventions in his *Arithmetica Infinitorum*, ſo as not only to ſhew the thing invented, but the very way that he invented it, contrary, as he obſerves, to the general method of the ancients, who choſe (but for what reaſon they have not told us) to deliver their inventions in the ſynthetic method: or, which is the ſame thing, ſtudiouſly concealed their algebra, that is, the particular method that brought them firſt to thoſe concluſions. Neither has Mr Simſon been ſo fortunate as to diſcover that method of theirs, which Dr Wallis here calls their algebra, plainly meaning by that word ſomething of the ſame nature, though in a different way of notation, which he has ſhewn from the Arenarius of Archimedes to be the caſe in reſpect to their arithmetic.

[*OO*] *Carteſius borrowed his improvements in algebra from Harriot.*] In this letter he convicts Des Cartes of this plagiariſm in at leaſt fifty inſtances, and afterwards, when Mr Baillet pretended, that this charge was then given up, the doctor takes him to taſk ſmartly, as may be ſeen in Harriot's article. The account was inſerted by the doctor in his preface to the laſt edition of his Algebra, and for the ſpirit of it, beſides the honour of his country, well deſerves to be peruſed. He takes notice, that he was ſenſible the French were no friends of his, nor indeed had they occaſion to be ſo. This was not the firſt piece of French craft that he had expoſed. He even ſeems to think it inherent in the nature and genius of that nation. That they could not let ſlip any opportunity of exerciſing their talent in it. This will not be thought too much, when we ſee what he ſays upon this ſubject in a letter to Mr John Collins (77), after that gentleman had ſent to Paris an account of the improvements in mathematics made in England, where the doctor writes thus: 'I ſuſpect that of ſuch communications of things unpubliſhed they make but ill uſe beyond ſea, and particularly, that Comier's new method of the two mean proportionals, &c, was borrowed from thoſe papers, where you mention Mr Newton's making uſe of two moveable angles. And no doubt but many particulars therein imparted will ſhortly be printed as French Inventions.'

[*PP*] *He was engaged in a diſpute with the Unitarians and another on the chriſtian Sabbath.*] He had likewiſe ſuch another occaſion of writing his piece *De Pædobaptiſmo*: It was drawn up in anſwer to a letter which he received againſt infant-baptiſm, dated Feb. 29, 169$\frac{5}{6}$. As to that on the Sabbath, Mr Bampfield, a counſellor at law, publiſhed in 1692 a book on the Sabbath, which he thought ſhould rather be obſerved on Saturday than Sunday. In anſwer to this, Dr Wallis publiſhed his *Defence of the Chriſtian Sabbath*, which being preſently ſold off, a ſecond edition was printed the year following. Mr Bampfield wrote a reply, to which the doctor ſoon after made a rejoinder, and no more was heard of the controverſy.

He had preached his firſt ſermon on the Trinity at Oxford ſoon after the Reſtoration, and ſeems to have publiſhed his treatiſe on that ſubject at this time on occaſion of the famous diſpute about Dr Sherlock's book on the Trinity, which began then to be much talked of. We have already obſerved (78), that our author is generally thought in this diſpute, which conſiſts of eight letters, to have expreſſed himſelf ſo, as to give room to ſuſpect he was not exactly orthodox in this point of faith. The ſlip which the doctor made on this occaſion furniſhed great matter of triumph to his antagoniſts the Unitarians. One of the moſt conſiderable of theſe, animadverting upon the creed which had been drawn up by Mr Edwards, and unjuſtly imputed to them, writes thus: 'I have examined ſome of his principal references, and can ſay of them, they are either perverſions or downright falſifications of what the authors referred to did intend. Dr Wallis,' continues he, 'whoſe diſhoneſt quotations out of the Socinians have been detected by every body, is hardly more blameable in that kind, than Mr Edwards; ſaving that the doctor being, as one rightly tells him, ſomewhat more than a Socinian, did but foul his own neſt by forgeries (79).'

(*oo*) It is dated Jan. 8, 1688-9.

(*pp*) It was ſent by one Mr Bridgeman, an Italian merchant at London, to the doctor, who though he ſoon returned a true ſolution of it, yet he proved much miſtaken in the propoſer's view therein.—See Dr David Gregory's article.

anſwer to which the Doctor declared his opinion againſt the alteration; alledging, that it would breed great confuſion in the aſtronomical calculations, as well as in the ordinary national tranſactions; that the Gregorian or new ſtile did not exactly agree with the motions of the celeſtial bodies, and conſequently would in proceſs of time ſtand in need itſelf of a correction; and laſtly, that ſuch an adoption of a ſtile which had been made by the Pope, would greatly encourage that party, who would not fail to make uſe of it as an argument that we were coming over to the Church of Rome: and ſuch was our author's reputation, that the deſign was thereupon entirely laid aſide, tho' ſince that carried happily into execution. The two firſt volumes of his works coming out in 1696, ſome paſſages in the former were animadverted on in the *Leipſic Acts*, which occaſioned the doctor to write a defence of himſelf; wherein, againſt Mr Leibnitz, he aſſerted Sir Iſaac Newton's right to the firſt invention of the method of Fluxions *(qq)*. In the third volume of his Works, which came out in 1699, the letters written upon this occaſion, together with many more upon mathematical and other ſubjects, from the year 1671. to that time, were printed, under the title of *Commercium Epiſtolicum* [QQ]; and the collection concludes with a letter *concerning the annual parallax of the earth*, from Mr Flamſtead, whoſe opinion in that point was warmly eſpouſed by our Author [*RR*], who was, it ſeems, but

little

(qq) See the articles of Dr John Keil, and Sir Iſaac Newton.

[QQ] *Upon mathematical and other ſubjects.*] In one of theſe letters Mr Leibnitz, in order to make the moſt of the pretended improvements he had made in mathematics, had branched his *Infiniteſimal method* into a variety of particular ones, each of which he diſtinguiſhed by a peculiar high-ſounding title. In anſwer to this, the doctor ſhews how every one of theſe particulars were contained in his *Arithmetica Infinitorum*, and other inventions of his by that method, before Mr Leibnitz had produced the like. In this letter it is pleaſant enough to ſee how the doctor accommodates the manner of proof in the *Arithmetica Infinitorum* and *Conic Sections* to the method of fluxions which had been communicated to him before that time. I have already taken notice of his grafting his method of tangents into (what he calls) the method of *vaniſhing quantities*. But there is another particular which I muſt not omit, on account of the relation it has to a late controverſy about the method of fluxions. Speaking in his method of tangents, of the *vaniſhing triangle*, he ſays, *it has then no magnitude, yet it is conſidered abſtractedly, and as a ſpecies (like that of an equilateral triangle in general) and in that view the proportion of its ſides may be conſidered without ſuppoſing it to have any magnitude [in concreto]*. This conceit of conſidering the proportion in the parts of an abſtracted ſpecies after the individual quantity or ſubſtance is vaniſhed or become actually nothing, ſeems to be the ſource from whence the author of the *Analyſt* (80) derived the mirth of that arch remark upon fluxions, where he aſks, *May we not call them the ghoſts of departed quantities?*

(80) Dr Berkeley, Biſhop of Cloyne in Ireland.

The doctor is likewiſe, not without cauſe, charged with frequently making too free with infinity, eſpecially where in his Arithmetica Infinitorum and in his Algebra, ſpeaking of the quadrature of hyperbolic ſpaces infinitely extended, he talks of ſeveral ſuch as are *more than infinite*. No doubt, thoſe expreſſions were taken up by him without duly conſidering the abſurdity of the conception, and tho' they are capable of a chaſt ſenſe, and by all candid cenſurers will be excuſed to the doctor in a tranſport of joy upon the prodigious extent of his new diſcoveries, yet all are not ſo equitably diſpoſed. The juſt mentioned author ſeems to have had the doctor among others in his eye, where he ſays of the mathematicians, that they are more eager to proceed faſt and far, than careful to go upon good grounds.

[*RR*] *He eſpouſed Mr. Flamſtead's opinion.*] The following letters of the doctor to Mr Flamſtead are worth peruſing, as they diſcover his ſentiments more freely than elſewhere, upon ſome aſtronomical points. The firſt is dated Oxford, May 9, 1695.

Sir,

'I am told by Mr Caſwell, which I am very glad 'to hear, that you ſeem to have obſerved a diſcernible parallax as to the earth's annual orb in the polar ſtar, which is a noble obſervation, if you make 'it out, and therefore I earneſtly deſire you to purſue that buſineſs with great care. I have ſuggeſted 'ſomewhat to that purpoſe in my Latin Algebra, and 'ſomewhat more fully in ſome letters to Mr [Will.] 'Molyneux, which, if I do not miſremember, are 'printed in the Tranſactions. I think we may reaſonably preſume, that the fixed ſtars are not all at 'an equal diſtance from us, but ſome of them at a 'diſtance vaſtly greater than others. That ſome 'which are nearer may have a diſcernible parallax, 'though the remoter have not. And thoſe may be 'thought neareſt (though we are not ſure of it) which 'look biggeſt and brighteſt: and if we fail in ſome 'one of them, we may try ſome other, and more than 'one or two. Again, ſtars, tho' equally near, are 'not all equally fit for this purpoſe, and thoſe are 'fitteſt which are neareſt to the pole of the zodiac, 'for thoſe in or near the zodiac will have none or 'little parallax, tho' that of thoſe which are further 'from it may be diſcernible. Now in both reſpects 'the polar ſtar is very proper, as being of the ſecond 'magnitude (tho' not very bright) and not far from 'the pole of the zodiac; and therefore I am well 'pleaſed, that you pitch upon that. There is yet another in the ſhoulder of the little Bear, which is nearer 'to the pole of the zodiac, and, I think, a brighter 'ſtar; I would adviſe you therefore carefully to obſerve that alſo; and, if you think fit, ſome others, 'and ſet down carefully the times of the obſervations; 'and the meridional altitudes obſerved. And they 'are, I hope, ſuch ſtars as by your teleſcope ſights 'you may diſcern in the day-time, which will be a 'great advantage. The greateſt meridional altitude 'above the pole ſhould be at the ſummer ſolſtice, and 'the leaſt at the winter ſolſtice; and therefore moſt 'carefully to be obſerved about thoſe times; but in 'the intermediate times alſo, to ſee at what rate they 'vary and change their altitudes. But I would adviſe you alſo not to talk too freely of it, unleſs to 'truſty friends, till you have a conſiderable number 'of obſervations to juſtify it; and when you have, to 'print them, leſt others perhaps ſupplant you: and 'I would not have you loſe the reputation of it. Excuſe this freedom of

'Sir,

'Your friend and humble ſervant,

'John Wallis.

Mr Flamſtead, in anſwer to this, aſſuring him that he had great ſtore of ſuch obſervations, the doctor replied as follows:

'Sir, Marſton, near Brackley in Northamptonſhire, May 25, 1695.

'I am well pleaſed to underſtand, by yours of May '14 (which came to my hands yeſterday where I am 'at preſent) that you are ſo well ſtored with obſervations for the earth's annual parallax; and therefore 'deſire you will ſuffer them to be made public forthwith for the reaſons mentioned in my laſt, which I 'need not repeat. The briſk light of the ſtar mentioned, tho' ſmall, may argue it to be nearer perhaps than ſome which ſeem bigger; and its ſituation is very convenient. Yet I would not have you 'neglect the ſhoulder of the leſſer Bear. Perhaps, by 'darkening your room, you may gain a ſight of them 'in the day-time. I am not diſpleaſed to find you 'diſtinguiſh between the thread's touching and covering a ſtar, which ſeems to argue they have ſome 'apparent magnitude, contrary to what ſome good 'obſervers would perſuade us. Your diligence to 'perfect your catalogue of fixed ſtars, I approve likewiſe, and your reaſons for it are good: yet I would 'not have you delay that of the parallax; for the

'ob-little ſkilled either in the technical or phyſical part of Aſtronomy [*SS*]. As ſoon as theſe three Volumes were finiſhed, the Doctor bid adieu to the preſs: he was then ſome years

obſervations being already made, it will require no great time to digeſt them: and if you think that little time may not be ſpared for it, be pleaſed to furniſh us with materials, and either Mr Caſwel or I will help to digeſt them for you: and if you be excluded elſewhere, we will take care to have them printed at Oxford. You are to be careful alſo in ſo nice a point, that the motion in longitude (as it is wont to be called) of the fixed ſtars do not impoſe upon you, and that ſome very ſmall variation of the meaſuring thread may not deceive you. I could ſuggeſt ſome other things in order to this parallax, which I may hereafter do at leiſure; but I would not divert you from what is before you. I am,

‘ Sir,
‘ Your friend to ſerve you,
‘ John Wallis.’

Notwithſtanding theſe very preſſing letters of the Doctor to perſuade the royal aſtronomer to print his obſervations on this point, yet it ſeems he ſtill deferred it; ſo that above three years after, Dr Wallis having almoſt finiſhed the third volume of his works, and being very deſirous to have this important diſcovery inſerted in that volume, addreſſed to him the following letter.

‘ Sir, Oxford, Aug. 13, 1698.

‘ I have underſtood from Mr Caſwel a good while ſince, that you had very conſiderable obſervations (for divers years together) to prove a parallax of the fixed ſtars to the earth's annual orb. I have deſired Mr Caſwel to preſs you to let us have an account of them, ſo as to have them publiſhed. I do again requeſt it of you, and hope you will not refuſe it. I am now drawing towards an end of publiſhing a third volume of mathematical tracts, wherein will be a collection of letters relating to ſuch matters. If you will do me the favour to draw up thoſe obſervations in form of a letter to me (or to whom elſe you pleaſe) and to let me have it, I will (with your leave) publiſh it amongſt thoſe letters. The thing will be an honour to you and to our nation. I know your hands are full of other work; but I hope you may ſpare ſo much time as to draw up ſuch a letter in Latin, and I will take upon myſelf the trouble of ſeeing it printed here: and you ſhall command from me, the employing of as much time to ſerve you, in what way you ſhall propoſe to me. But let it be done quickly, leſt it come too late. 'Tis pity you ſhould loſe the honour of being the firſt who hath made ſuch a diſcovery, I am,

‘ Sir,
‘ Yours to ſerve you,
‘ John Wallis.’

This letter prevailed; and Mr Flamſtead promiſed to comply with the requeſt, as appears from the next letter of Dr Wallis, as follows.

‘ Sir, Oxford, Aug. 26, 1698.

‘ Yours of Auguſt 23d I received this morning. I am glad you are inclinable to draw up thoſe obſervations of yours concerning the parallax of the earth's annual orb. The time you mention will I believe be ſoon enough; for I find our printers more ſlow than I could wiſh. I ſaw your letter to Mr Caſwel, with which I was pleaſed. I think, ſo much of it as concerns the rectifying your inſtrument, may be ſpared. It will be ſufficient to give us the obſervations, as they would have appeared if the inſtrument had been rectified; and as to the rectifying of your inſtrument, we may truſt you. Nor will it be neceſſary to give a large account of the form of your inſtrument; it will be ſufficient to ſay it is a mural quadrant, or larger arch fixed to a wall in the plain of the meridian, and furniſhed with teleſcopic ſights, ſuch as to diſtinguiſh a very ſmall arch of a few ſeconds; for I think this is the caſe. And then that (the poſition and ſights of the inſtrument being duly rectified) the obſervations were ſuch as there ſet down. A more large account of particulars may afterwards be done at leiſure, with more obſervations to be henceforth made: but I am willing that at leaſt a ſhort account be given of the obſervations you have, to preſerve the memory and reputation of it to yourſelf, as the firſt who has effectually diſcovered it. The letter to Mr Caſwel (if I don't miſremember) gives but the obſervations of one year; but intimate more to have been made in confirmation of it. It is not neceſſary that the parallax of other ſtars ſhould juſtly agree to that of the polar; for we are not to preſume that they be all at an equal diſtance from us; ſome may poſſibly have a diſcernible parallax, and others not. The greater ſtars may be reaſonably thought (but we are not ſure) to be neareſt, and thoſe neareſt to the pole of the zodiac moſt liable to a parallax: But if it can be diſcerned in any, it is a demonſtration of the earth's motion. I am,

‘ Sir,
‘ Yours to ſerve you,
‘ John Wallis.’

When the Doctor's third volume was finiſhed to the Appendix, he applied again to Mr Flamſtead, as follows.

‘ Sir, Oxford, November 8, 1698.

‘ I am entering upon the printing of ſome Latin letters in an appendix to a third volume of mine, which has been now in the preſs for ſome years; amongſt which I would be glad of yours concerning the parallax of the pole-ſtar. Mr Caſwel tells me, it will contain your obſervations thereof for ſeven years. I deſire I may have it by the end of this month, that it may not come too late; for we are now drawing to an end. I need not encumber it with thoſe particulars which relate to the rectifying of your inſtrument; but give us the obſervations as they would appear, ſuppoſing the inſtrument to be rectified. It will I think be not to your diſadvantage to have it there; and it will be to the reputation of our nation to be the firſt that hath been able to make out the parallax. I am,

‘ Sir,
‘ Yours to ſerve you,
‘ John Wallis.’

Accordingly, the paper was at laſt ſent by Mr Flamſtead in Engliſh; the Doctor having fitted it for his work by a Latin tranſlation, put it to the preſs, and ſent him the two firſt ſheets printed, with the following letter.

‘ Sir, Oxford, Decemb. 10, 1698.

‘ I have finiſhed the tranſlation of your letter into Latin ſome while ſince. I find nothing of it but what is fit to be publiſhed, and therefore leave out nothing of it. I ſent you the two firſt ſheets of it by Dr Gregory, who ſaid he ſhould ſee you, and would give them to you. If you deſire I ſhould ſend you the third ſheet, it ſhall be done. I am well ſatiſfied with it; and I think it proper that the Engliſh letter be publiſhed in the Tranſactions, for it well deſerves a place there. And to that end, I ſhall return you the Engliſh letter, when you give me order ſo to do. But I would adviſe that it be printed at Oxford (as in ſuch caſes is ſometimes done) that I may ſee to its being correctly printed; for I find the correctors of the preſs in London are apt to miſtake in things mathematical. Mean while I deſire you will look carefully to the numbers that they be truly written, and then return me the two ſheets I have ſent you, particularly in the tenth collation, if I do not miſremember, where I think you ſubtract 5″ inſtead of adding it. I am,

‘ Yours to ſerve you,
‘ John Wallis.’

This laſt unlucky ſtep, of employing Dr Gregory to carry the printed ſheets, proved to be the ruin of this conceived hopeful diſcovery of the parallax of the pole-ſtar. That mathematician firſt communicated the thing to Sir Iſaac Newton, and afterwards took pains to demonſtrate that Mr Flamſtead's obſervations to prove that parallax, were deficient and inconcluſive. We have already given a ſpark of the royal aſtronomer's reſentment on this occaſion (81), which with regard to him muſt have been mortifying enough; but as to Dr Wallis, tho' he was actually miſled by that aſtronomer, yet his reputation could not ſuffer much, becauſe he never pretended to any ſkill in that ſcience, as is further ſhewn in the enſuing remark.

[*SS*] *He was not ſkilled in aſtronomy.*] His little ſkill in obſerving he ingenuouſly mentions himſelf (82); and how little he was verſed in the philoſophical part, eſpecially

(81) See Dr Halley's article, Rem. [*FF*] p 2510.

(82) In Rem. [*K*] in Dr Halley's article.

years above fourſcore; under the weight of which he ſunk into the arms of death, on the 28th of October, 1703, aged eighty-ſeven years, three months, and five days. He was interred in the Quire of St Mary's, the Univerſity-church, at Oxford, by his eldeſt ſon, *John Wallis*, Eſq, of Soundneſs, near Nettlebed, in that county [*TT*], who erected a monument for him in the body of the church. The Doctor had the happineſs of a vigorous conſtitution both of body and mind, and of enjoying ſuch a calm as was not to be ruffled. The eaſineſs of his temper will never be queſtioned by any, who, reflecting upon that merit, which made him the boaſt of his own country, as well as the envy of the reſt of Europe, ſees him ſhewing no kind of diſcontent at being neglected; tho' he ſaw his two Co-rivals, *Ward* and *Wilkins*, equally obnoxious to the government with himſelf, yet raiſed to the higheſt dignity in the church. Several conjectures have been ſtarted, to account for this coldneſs of the Court to him. Among the reſt, it had been ſaid, that the promotion of Judge *Blenco* [*UU*], who married the Doctor's eldeſt daughter *(rr)*, being

eſpecially as to comets, is diſcovered in the following letter, dated Oxford, Auguſt 13, 1681.

'Sir,

'I ſaw, by Mr Bernard's favour, a letter of yours to him concerning the laſt comet. What I had here obſerved was not much, and but with the bare eye, without inſtrument (and therefore you may be ſure it could not be exact) leaving it to younger eyes to be more accurate. That it was very low (the neareſt to us of any that I have yet ſeen) I judged by the prodigious length of the tail, and by the great angle which the tail made with a line from the ſun thro' the head of the comet, both which I take to ariſe from its nearneſs to us, and being ſo near a conjunction with the ſun. Of this (with what elſe I had obſerved) I gave an account in Trinity term laſt in a letter to Dr Marſh, of Dublin, incloſed (but unſealed) in one to Dr Gale, that he might peruſe and communicate it, if he thought fit, and then ſend it forward. Of the origin of comets I am not ſo well ſatisfied as to deliver an opinion. I can hardly think them to be permanent bodies, making, as ſome have thought, excurſions in certain periods into our ſyſtem or ſolar world. I ſhould rather think them to be made by the collection of exhalations or effluvia from the æther or ætherial bodies, and (as much as any) from the ſolar; to which I find Mr Horrox heretofore and Dr Marſh of late do incline alſo. The tail I take to be little more than the tinging of the ſun beams paſſing through the head. As to what you ſay of worlds dying as well as men (which to Ariſtotle and his followers, as to the incorruptibility of or in the celeſtial bodies, would be a paradox) it doth not ſeem ſo ſtrange to me, ſince that diverſe of the ſtars noted by the ancients are now wanting, and ſome others do now appear and diſappear uncertainly; which yet argues that the diſappearing of a ſtar is no certain argument, that ſuch a ſtar is periſhed, ſince that ſometimes it appears again. But I can hardly think ſuch diſſolutions ſo frequent as our ſight of comets. And yet if they were much more frequent, it is ſtill a great chance if any of them or their ſatellites do ſtray into our world, which is ſo inconſiderable a part of the vaſt regions they have to make ſuch incurſions into, that perhaps one of a thouſand would be more than would come to our ſhare. As to the *Feculæ ſolares*, which you ſeem to diſbelieve, I can ſay nothing, having never ſeen any, and ſcarce any of the *maculæ*. But tho' it be now rare to ſee thoſe ſpots, yet I am not prone to diſbelieve the obſervations of others heretofore; ſince the ſame perſons who formerly ſaw ſuch ſpots frequently, do themſelves agree, that of late times they have been very rare; and that till within a few years laſt paſt, wherein they have again begun to be more frequent, ſcarce any, or but very few, had been obſerved for near twenty years together; which makes me think the difference to be in the heavens, not in the glaſſes. For otherwiſe the ſame glaſſes to the ſame perſons would repreſent the ſame appearances as before. And I do not know, but that a great frequency of ſuch ſpots may preſage a comet ſoon to follow. I have time to add no more, but that I am

Yours to ſerve you,

'John Wallis.'

[*TT*] *John Wallis, Eſq*;] He was born December 26, 1760, and placed by his father in Trinity college, Oxford, whence he was removed to the Inner Temple, where he proceeded Barriſter at law in 1681; and afterwards marrying Elizabeth daughter of John and Mary Harris, of Soundneſs, near Nettlebed, in Oxfordſhire, ſhe became heireſs to her brother Taverner Harris, by which means Mr Wallis came into the poſſeſſion of a good eſtate, called Soundneſs. She died Auguſt 8th, 1693, leaving three children, who ſurvived her, *viz.* John, Mary, and Elizabeth (82).

[*UU*] *Judge Blenco.*] It has generally paſſed current, that the Doctor diſcloſed more of his art of decyphering to this gentleman than to any body elſe, by whom it was communicated to Mr (afterwards Biſhop) Wills, the King's decypherer, who ſhewed himſelf ſo great a maſter of it on the trial of Biſhop Atterbury in 1722, when he decyphered ſome letters of that prelate ſo truly, as baffled all his endeavours to invalidate the evidence founded upon them. For this purpoſe the Biſhop employed the reverend Mr John Davies, already mentioned, Rector of Caſtle-Abbey in Northamptonſhire, a friend and acquaintance. But that gentleman, who has given ſuch an illuſtrious proof of his extraordinary ſkill in the art, after the moſt careful examination, comparing the copies of the letters with thoſe in which they had been decyphered by Mr Wills, aſſured the Biſhop's Counſel, Sir Conſtantine Phipps, that he believed them in the main to be rightly decyphered, and that if he was called upon to appear before the Houſe of Lords, he ſhould be obliged to aſſert the ſame thing; which was the reaſon, as he ſuppoſes, that he never was called upon to appear there. But at the ſame time this gentleman was of opinion, that this part of the evidence againſt the Biſhop was ſo managed as to render it liable to ſome ſuſpicion. 'I agree,' ſays he, 'upon the expediency and propriety of producing decyphered letters in evidence, provided the whole evidence be produced and fairly examined, which it ſeems was not done in Biſhop Atterbury's caſe, as appears from the following paſſage in Sir Conſtantine Phipps's ſpeech. *It was very neceſſary*, ſays this Counſellor, *I think, to have printed the letters in the cyphers and characters in which they were written, and alſo as they are decyphered. Then the perſons accuſed would have an opportunity of employing men ſkilled in that way, to ſee if they were rightly decyphered. This was done in* Coleman's *caſe* (83). Again, I have ſaid, ſays this gentleman, that the letters were rightly decyphered in the main; it is fit that I ſhould add, that in the copies the words *may* and *people* were ſupplied (as I ſuppoſe) by the decypherers, and the words *write his*, *draw*, and *forward*, were dotted underneath, as if they doubted whether they were right: which particulars we could not have known, but from a ſight of the copies.' This writer, who had public leave to inſpect the copies of theſe three letters, makes ſome other remarks upon them which are worth reading, as follows. 'The cypher,' ſays he, 'made uſe of in theſe letters is in ſeveral reſpects very difficult, but the difficulty is much abated by the careleſs or the unſkilful manner in which it is uſed, as upon occaſion I could eaſily ſhew; one inſtance may ſuffice for a ſample: In the letter to Jackſon was this paſſage, 719 *had taken this reſolution before Hatfield's return, and A. M. pleaſed to find*, &c. What great ſkill is here required to gueſs at the true meaning?' Again, Britannicus is pleaſed to inform us, in anſwer to an obſervation, that it required ſome time to tranſcribe the whole letters, and to put the proper parts into cypher (84): he writes thus. 'For what reaſon this circumſtance is inſiſted on, I forbear to mention, reſolving not to concern myſelf in the argument, otherwiſe than as a decypherer. I have computed how many words, or any parts of a word whatever

---

(rr) She was born June 4th, 1656, and married Decemb. 3. 1675, Mr Blenco being then a barriſter; but he was afterwards knighted, and made a puiſne baron of the exchequer, and thence promoted to be one of the Juſtices of the King's Bench.

(82) Life of Dr Wallis by Mr Lewis.

(83) See his ſpeech in State trials, vol. VI. as before.

(84) In Remarks upon the Biſhop's ſpeech by a perſon under the feigned name of Britannicus.

being done at his requeſt, was accepted by him in lieu of a biſhopric which was offered to him. However that be, it is certain he was maſter of a very dangerous ſecret in the art of decyphering [*XX*]; and the cautious and moderate uſe he conſtantly made of it to each ſide in the ſeveral changes of the government [*YY*], was laid hold of by thoſe who had more ambition than was incident to his nature, as a good handle to inſtill a jealouſy of his having no hearty affection for the Royal family, or the preſent conſtitution either in church

'(there being no nulls *) was put into cyphers throughout the three letters, and the account ſtands thus. In the letter to Chivers, 24; in the poſtſcript to the ſame, 45; in the letter to Muſgrave, 69; in the letter to Jackſon, 114; ſo that the whole number amounts very nearly to the number of words contained in the ſhorteſt of the letters. This being the exact ſtate of the caſe, how long time it would require to tranſcribe the whole letters, thus much of them being put into cypher, and that, in my opinion, very injudiciouſly, is humbly ſubmitted to the reader. But tho' thro' the unſkilfulneſs of the writer the work was rendered eaſier to the artiſts, yet ſtill ſome few words eluded their art, and their places were ſupplied by points or dotts in the printed report. Two or three of the undecyphered numbers were very high ones, and one of them named five ſeveral times; but whether none were publiſhed for either of theſe reaſons, I take not upon me to determine. Again, notwithſtanding theſe unuſual omiſſions, the very blanks furniſhed us with an objection, which would have been offered in evidence, if the copies had not been delivered up. But when theſe copies had been fully conſidered, the objection was not thought ſufficient to weigh down another, namely, that now the queſtion would be aſked, whether the letters were rightly decyphered? to which I muſt have anſwered, *that in the main I believed they were.* And this I apprehend to have been the true reaſon why I was not called. Another objection before the copies were delivered to us was this. It had been obſerved from the print, that one undiſcovered word began with G, and another with C, but by the manner of the dotting, there ſeem'd to be ſeven other vacancies, without any initial letter prefixed. Afterwards upon ſight of the written copies, it appeared to be really ſo: with this circumſtance, that five of the ſaid vacancies were to be filled with one and the ſame number. This muſt be the undecyphered number which was uſed to ſtand for two words, if I take that expreſſion right. Sir Conſtantine Phipps ſeems to have underſtood it as if one number had ſtood for two words in the ſame place (85). My interpretation is, that the ſame number had ſtood for this word in one place and for that word in another place. Upon which I obſerve, 3dly, That for the ſame number in the ſame cypher without the leaſt note of diſtinction to be thus originally intended for two words differing from each other in ſenſe and ſound and ſpelling, is what I have never known or heard of before. It was reaſonable to conclude, that an artiſt might have been in ſome diſtreſs, if he were urged to explain, how he could be aſſured of the initial letters of two or three unknown words, and yet be wholly in the dark as to the initial letters of ſeveral others: and that at laſt he would have found it convenient on this occaſion to take ſanctuary in the ſecrets of his art.' How far he might go without diſcovering that ſecret, is likewiſe conſidered by this ingenious author. 'I am now,' ſays he, 'ſeaſonably to touch the celebrated queſtion, whether by delivering up the key of a cypher, the art of decyphering is diſcovered. That it is not ſo is very clear to me both from reaſon and experience. Beſides what Dr Wallis has left of that kind in MS. he gave up in print the key of two others. I have now given up a third. By ſo doing we have enabled the readers the more readily to judge whether the letters are rightly decyphered; but have we informed him how we did it? Can any body tell me how Dr Wallis decyphered this letter from the Duke of Buckingham? if he can, it is more than I can tell him, tho' I have decyphered it myſelf (86); and I am under no manner of apprehenſion, that any body can find out, how I did it: nay, if I ſhould name a certain number which by coming but ſeldom was extremely uſeful to me in doing it, I ſhould, without further explaining myſelf, hardly be believed. If indeed I ſhould declare what were my firſt obſervations, and why I made them; which of them proved right, and which wrong; which of them I afterwards utterly laid aſide; which I altered; and which I finally proceeded to abide by; if I ſhould finally declare where the firſt glimpſe of light broke in upon me, and brought me to proceed with courage and hopes of ſucceſs; what were my next immediate ſteps, and when I began plainly to ſee the way before me; ſuch declaration might be of uſe to an induſtrious man, and help to guide him in the diſcovering other cyphers of the like kind. This I own is more than is fit to be publicly told: yet even this would be far from making a thorough diſcovery of the art; for *pro vario ferarum genere varianda eſt venatio*, different game different hunting; and there is little or no relation between the proceſſes I made in decyphering the Duke of Buckingham's letter, and that which will ſoon follow from the Earl of Clanrickarde (87). But if Dr Wallis had complied with Mr Leibnitz's large demand of the 29th of December 1698, this might have given a fatal blow to the art. That learned foreigner had ſeen ſome of the Doctor's performances in this kind, and was ſufficiently amazed at them, but wanted to know how the thing was done (88). He had before this (89) intimated his fears, that the Doctor and the art might die together; being told that there was no certain method in the art, he acknowledged it, and for that reaſon wiſhed that ſome inſtances might be preſerved of the manner in which the Doctor made his gradual advances in theſe analytical operations; and not having yet received a ſatisfactory anſwer, he again obſerved that the want of rules might be ſupplied by examples, if the traces of the procedure were always marked. Hereupon he earneſtly preſſed the Doctor, that he would be prevailed upon not to deny poſterity ſo great a benefit (90). But the Doctor remained proof againſt all his importunity, and wiſely ſhifted off the requeſt (91), well knowing how far he might go without prejudicing, and where he was to ſtop without ruining the art.'

[*XX*] *Decyphering a dangerous art.*] This talent had brought him into many difficulties, and proved a very troubleſome (though much admired) part of his ſagacity, eſpecially as he was poſſeſſed of it at a time when the world in general, not being apprehenſive of the poſſibility of ſuch an art, were therefore leſs curious in perplexing their cyphers, ſo that the Doctor ſcarce miſſed in decyphering any that fell into his hands during the civil wars, and ſeveral years afterwards. But ſome time before he died, the French, whoſe ingenuity has often appeared foremoſt in ſuch kind of crafty ſubtleties, had contrived ſome ſo intricate, that they baffled his ſkill; yet he maſtered diverſe of them lately contrived. Whether upon this account of his being baffled by new inventions inclining him to think his art would ſoon become bootleſs, or whether the ſenſe he had of its being a dangerous art indiſpoſed him for publiſhing any method of attaining it, it is certain he very ſteadily perſiſted in refuſing that favour to the repeated requeſts of Mr Leibnitz; though he went ſo far as to ſend a letter in cypher to the publiſher of the Leipſic Acts, which had been very lately wrote; and according to Mr Leibnitz's propoſal, he ſent alſo a key with it, to ſhew how it was done.

[*YY*] *The moderate uſe he made of it.*] That he did ſo has been ſufficiently ſhewn already, but that he had any eye to that part of his conduct in the following account given by himſelf to Dr Smith, both of his moderation, and the conſequences of it in reſpect to his promotion, is what I won't undertake poſitively to aſſert, but muſt leave it to the conſideration of the reader, after he has peruſed it. 'It has been my lot,' ſays the Doctor, 'to live in a time wherein have been many and great changes and alterations; and it hath been my endeavour all along to act by moderate principles between the extremities on either hand in a moderate compliance with the powers in being in thoſe places where it has been my lot to live, without the fierce and violent animoſities uſual in ſuch caſes againſt all that did not act juſt as I did; knowing that there were many worthy perſons engaged on either ſide, and willing, whatſoever ſide was uppermoſt, church or ſtate. Theſe inſinuations muſt needs alſo gain the greater credit, as it was obſerved that there was no good reaſon to think he ever changed his firſt ſentiments in regard to the hierarchy.

---

* That is, non-ſignificants. Theſe are mentioned by Bacon in his Advancement of learning, l. vi. ch. 1. They had been before introduced into the art of cryptography by Trithemius, who calling them *ſpiritus nocturni*, and the ſignificants *ſpiritus diurni*, in a diſcourſe with one Bouville, this latter imagining that he ſpoke of ſo many demons, thereupon accuſed him as a magician. Moreri, ubi ſupra.

(85) His ſpeech in State trials, vol. VI. p. 401. col.

(86) It is inſerted in his Eſſay, p. 51.

(87) In his Eſſay he decyphered this, and gave ſeveral others at Mr Carte's requeſt.

(88) His letter to Dr Wallis, dated March 24, 1697-8, in Commerc. Epiſtolic. in the Doctor's works, vol. 3d.

(89) In another letter, dated March 19, 1697. Ibid.

(90) A third letter, dated Sept. 28. S. V. the ſame year. Ibid.

(91) It is ſaid, that being once queſtioned about it in a free way by Biſhop Burnet, he returned this general anſwer: My Lord, nothing is too hard for diligence and induſtry. Davies, ubi ſupra.

'moſt, to promote, as far as I was able, any good 'deſign for the true intereſt of religion or learning 'and the public good, and ready to do good offices 'as there was opportunity; and if things could not 'be juſt as I could wiſh, to make the beſt of what is, 'and hereby thro' God's gracious providence have 'been able to live eaſy and uſeful, tho' not great.' (92)

P

(92) Letter to Dr Smith.

WALSYNGHAM [*A*] [Sir Francis], one of the moſt compleat and eminent Stateſmen that this or any other nation ever produced, was born at Chiſelhurſt in Kent, (*a*) [*B*] of a knightly family, originally ſprung, and denominated, from the town of Walſingham in Norfolk (*b*). He was bred at home under a private tutor, and received his univerſity-education in King's college in Cambridge [*C*]. From the univerſity he was ſent very young abroad to travel, for the reſt of his learning (*c*): and being a perſon of excellent ſenſe and uncommon capacity, he made himſelf a perfect maſter of the laws, cuſtoms, manners, languages, and polity of the ſeveral nations with whom he converſed; as his ſubſequent practice fully ſhewed. He had the happineſs of being out of England, in a kind of voluntary exile, during the cruel and perſecuting reign of Queen Mary I. [*D*], which exempted him from the troubles and dangers to which moſt gentlemen were then expoſed (*d*). At his return home in Queen Elizabeth's time, being an accompliſhed gentleman, with a quick apprehenſion, a ſolid judgment, and accounted the beſt linguiſt in his time, he was ſoon obſerved by the great Sir William Cecil, as a fit inſtrument to be one of his agents: and, under his conduct, he came to be employed in the chiefeſt affairs of ſtate. The firſt of his public employments was an embaſſy into France, where he reſided ſeveral years, in very troubleſome times, during the heat of the civil wars in that kingdom (*e*) [*E*]. In Auguſt 1570, he was ſent again Embaſſador there, to treat of a marriage between Queen Elizabeth and Francis Duke of Alençon, with other matters of the higheſt conſequence; and continued at the court of France till April 1573 (*f*) [*F*]. He acquitted himſelf in that ſtation with uncommon capacity, faithfulneſs, and diligence, ſparing neither pains nor money to promote the Queen's ſervice to the utmoſt (*g*) [*G*]. And, in order to keep her powerful, treacherous, and ambitious neighbours ſo well employed at home, that they might not be able to give England

(*g*) Strype's Annals of the Reformation, vol. II. p. 25.

[*A*] *Walſyngham.*] So he writ his name, as appears from ſeveral letters of his in our poſſeſſion. By others it is generally written Walſingham.

[*B*] *Was born at Chiſelhurſt in Kent.*] The Walſingham family was of ſome conſideration in Kent, about that time. For, we find, that James Walſingham, Eſq; was Sheriff of that county the 12th of Henry VII. as Thomas Walſingham, Eſq; was, on the 5th of Qu. Elizabeth (1). In Sir Francis's Epitaph it is ſaid, that his family had been illuſtrious for many ages. *Ortus familia multis ſeculis illuſtri*... And by Naunton, 'that 'he was a gentleman of a good houſe.'

[*C*] *He received his univerſity education in King's college in Cambridge.*] And to the Library of that college he gave his own books; amongſt which was, a Bible that had belonged to the King of Spain (2).

[*D*] *From the univerſity he was ſent abroad very young to travel* ... and he was *in a kind of voluntary exile during the reign of Qu. Mary.*] Theſe particulars we learn from the following paſſages in his Epitaph... 'Puer, ingenuè *domi educatus,* generoſis moribus artibuſque optimis animum excoluit. Adoleſcens, peregrinatus in exteras regiones, earum inſtituta, linguas, politiam, ad civilem ſcientiam reique publicæ uſum didicit. Juvenis, exilium Maria regnante ſubiit 'voluntarium, religionis ergo.'

[*E*] *The firſt of his public employments was an embaſſy into France, where he reſided ſeveral years, in very troubleſome times.*] This alſo we learn from his epitaph... '*Sereniſſimæ Reginæ Elizabethæ*, matura jam ætate, 'Orator fuit apud Gallum, turbulentiſſimo tempore, 'annis compluribus.'

[*F*] *In Auguſt* 1570, *he was ſent again Embaſſador there,* &c.] On one hand a meſſenger of peace, and on the other an honorable ſpy, as Mr de Wicquefort obſerves (3). His negotiations and diſpatches, during that embaſſy, were collected by Sir Dudley Digges, Kt. Maſter of the Rolls, and publiſhed by A. H. in 1655. fol. with this title, 'The Compleat Ambaſſa'dor: or Two Treatiſes of the intended marriage of 'Qu. Elizabeth of glorious memory; compriſed in 'Letters of Negotiation of Sir Francis Walſingham, 'her Reſident in France. Together with the Anſwers 'of the Lord Burleigh, the Earl of Leiceſter, Sir 'Thomas Smith, and others. Wherein, as in a clear 'mirror, may be ſeen the faces of the two courts of 'England and France, as they then ſtood; with many 'remarkable paſſages of ſtate, not at all mentioned 'in any hiſtory.'... Theſe papers manifeſt our great ſtateſman's exquiſite abilities, and his fitneſs for the truſt that was repoſed in him.

[*G*] *He acquitted himſelf in that ſtation with uncommon capacity, faithfulneſs, and diligence, ſparing neither pains nor money to promote the Queen's ſervice.*] 'His 'head was ſo ſtrong, that he could look into the depth 'of men and buſineſs, and dive into the whirlpools 'of ſtate. Dexterous he was in finding a ſecret, cloſe 'in keeping it: Much he had got by ſtudy, more by 'travel; which enlarged and actuated his thoughts. 'His converſation was inſinuating and reſerved: He 'ſaw every man, and none ſaw him. His ſpirit was 'as publick as his parts; and it was his firſt maxim, '*Knowledge is never too dear:* yet as debonnair as he 'was prudent; and as obliging to the ſofter but pre'dominant parts of the world, as he was ſerviceable 'to the more ſevere: and no leſs dexterous to work 'on humours, than to convince reaſon. He would 'ſay, he muſt obſerve the joynts and flexures of af'fairs; and ſo would do more with a ſtory, than 'others could with a harangue. He always ſurprized 'buſineſs, and preferred motions in the heat of other 'diverſions; and if he muſt debate it, he would hear 'all; and with the advantage of aforegoing ſpeeches, 'that either cautioned or confirmed his reſolutions, he 'carried all before him in concluſion beyond reply... 'This Spaniſh proverb was familiar with him, "Tell 'a lye, and find a truth;" and this, "Speak no more 'than you may ſafely retreat from without danger, or 'fairly go through without oppoſition." Some are 'good only at ſome affairs in their own acquaintance; 'Walſingham was ready every where, and could make 'a party in Rome as well as England. He waited on 'mens ſouls with his eye, diſcerning their ſecret hearts 'through their tranſparent faces (4).' The judicious Mr de Wicquefort obſerves, that Mr Walſingham, who was employed in this negotiation, was one of the ableſt men that England ever produced; that the intereſt of the Reformed, wherewith he was charged, was a very nice affair; and that he had to deal with Charles IX. and his mother, the moſt ſuſpicious and treacherous of Princes; notwithſtanding which, he acquitted himſelf with great honor (5). To which it

land any diſturbance; he laid the foundation of the civil wars in France; and alſo of thoſe in the Low-Countries, which put a final ſtop to the vaſt deſigns of the houſe of Auſtria. Upon which occaſion he told the Queen at his return from his embaſſy to France, ‘ That ſhe had no reaſon to fear the Spaniard; for tho’ he had a ſtrong appetite, ‘ and a good digeſtion, yet he had given him ſuch a bone to pick, as would take him ‘ up twenty years at leaſt, and break his teeth at laſt: ſo her Majeſty had no more to ‘ do, but to throw into the fire, he had kindled, ſome Engliſh fuel from time to time, ‘ to keep it burning (*h*).’ In the beginning of the year 1573, he was appointed one of the principal Secretaries of State (*i*); ſworn a Privy-Counſellor; and knighted ſome time after. Being put into that place of great truſt, he exerted himſelf in a very uncommon manner [*H*]: ‘ For he was one of the great engines of ſtate, and of the times, high in ‘ the Queen’s favour, and a watchful ſervant over the ſafety of his miſtreſs (*k*).’ As long as he lived, her crown and life were preſerved from daily attempts and conſpiracies, chiefly by his vigilance and addreſs (*l*). His conſtant method for that purpoſe, was the utmoſt ſecrecy, patience, and the beſt intelligence poſſible; he maintaining, as we are aſſured, no leſs than fifty-three agents in foreign courts, and eighteen ſpies (*m*). By theſe means he undermined all the plots of the Papiſts, Jeſuits, and other private as well as public enemies of this nation [*I*]. He was ſent on an embaſſy to the Netherlands in

can be no exception, that he did not ſuſpect the court of France’s perfidiouſneſs; being himſelf an honeſt man, he could never imagine that ſo black a villainy could enter into man’s heart, as the maſſacre of Paris, executed by order of the deſpicable Charles IX.—— From our Embaſſador’s letters, it appears, that his expences were ſo great, very probably in gaining intelligence; that, to uſe his own words, ſometimes he ‘ had neither furniture, money, nor credit (6).’

[*H*] *He exerted himſelf in a very uncommon manner.*] For he had devoted abſolutely himſelf, his life, time, and eſtate in the ſervice of his Queen and country. And to compaſs his ends, he guided himſelf by ſuch maxims as theſe. ‘ He ſaid, that an habit of ſecrecy ‘ is policy and vertue. To him mens faces ſpoke as ‘ much as their tongues, and their countenances were ‘ indexes of their hearts. He would ſo beſet men ‘ with queſtions, and draw them on, and pick it out ‘ of them by piece-meals, that they diſcovered them‘ ſelves whether they anſwered or were ſilent.——He ‘ ſerved himſelf of the factions at court, as the Queen ‘ his miſtreſs did, neither advancing the one, nor de‘ preſſing the other: Familiar with Cecil, allied to ‘ Leiceſter, and an oracle to Suſſex. He could over‘ throw any matter by undertaking it, and move it ‘ ſo as it muſt fall. He never broke any buſineſs, yet ‘ carried many: He could diſcourſe any matter with ‘ them that moſt oppoſed; ſo that they, in oppoſing ‘ it, promoted it. His fetches and compaſs to his ‘ deſigned ſpeech, were things of great patience and ‘ uſe.—So patient was this wiſe man, that his native ‘ place never ſaw him angry, the univerſity never paſ‘ ſionate, and the court never diſcompoſed. Religion ‘ was, in his judgment, the intereſt of his country, ‘ and it was the delight of his ſoul; therefore he ‘ maintained it as ſincerely as he profeſſed it: it had ‘ his head, his heart, and his purſe. He laid the ‘ great foundation of the Proteſtant conſtitution as to ‘ its policy, and the main plot againſt the Popiſh as to ‘ its ruine (7).’ His great ſervices to this nation are acknowledged in the following part of his Epitaph. ‘ Quibus in muneribus tanta cum prudentia, abſtinen‘ tia, munificentia, moderatione, pietate, induſtria & ‘ ſollicitudine verſatus eſt; ut a multis periculis Pa‘ triam liberarit, ſervarit Rempublicam, conformarit ‘ pacem, juvare cunctos ſtuduerit; imprimis quos ‘ doctrina aut bellica virtus commendarit: ſeipſum ‘ denique neglexerit, quo prodeſſet aliis, eoſque va‘ letudinis & facultatum ſuarum diſpendio ſublevaret.’ i. e. In his employments, he behaved himſelf with ſo much prudence, temperance, generoſity, moderation, piety, induſtry, and care, that he delivered his country from many dangers, ſaved the ſtate, eſtabliſhed peace, ſtudied to help all, eſpecially thoſe who were recommendable for their learning or military ſkill: and in ſhort neglected himſelf to ſerve others, and aſſiſted them at the expence of his health and eſtate.

[*I*] *By theſe means he undermined all the plots of the Papiſts, Jeſuits,* &c.] ‘ He outdid the Jeſuits in their ‘ own bow, and over-reached them in their own equi‘ vocation and mental reſervation; never ſettling a ‘ lye, but warily drawing out and diſcovering truth. ‘ So good was his intelligence, that he was Confeſſor ‘ to moſt of the Papiſts before their death, as they had ‘ been to their brethren before their treaſons.... For ‘ two piſtoles an order, he had all the private papers ‘ of Europe. Bellarmine read his Lectures at Rome ‘ one month, and Reynolds had them to confute the ‘ next. Few Letters eſcaped his hands, whoſe con‘ tents he could read and not touch the ſeals... The ‘ Queen of Scots Letters were all carried to him by ‘ her own ſervant, whom ſhe truſted, and decyphered ‘ to him by one Philips, as they were ſealed again by ‘ one Gregory; ſo that neither that Queen, or her cor‘ reſpondents, ever perceived either the ſeal defaced, ‘ or the letters delayed, to her dying day (8).’—— ‘ He had the wonderful art of weaving Plots, in ‘ which buſy people were ſo entangled that they could ‘ never eſcape, but were ſometimes ſpared upon ſub‘ miſſion, at others, hanged for example (9).’—— ‘ He would cheriſh a plot ſome years together, ad‘ mitting the conſpirators to his own and the Queen’s ‘ preſence familiarly, but dogging them out watch ‘ fully: his ſpies waited on ſome men every hour for ‘ three years; and leſt they could not keep counſel, ‘ he diſpatched them to foreign parts, taking in new ‘ ſervants (10).’ But, as Sir Robert Naunton obſerves (11), ‘ it is inconceivable why he ſuffered Dr ‘ Parry to play ſo long on the hook, before he hoyſed ‘ him up.... That Parry, intending to kill the Queen, ‘ made the way of his acceſs by betraying of others, ‘ and impeaching of the Prieſts of his own correſpon‘ dency, and thereby had acceſs and conference with ‘ the Queen, and alſo oftentimes familiar and private ‘ conference with *Walſingham*, will not be the quære ‘ of the myſtery; for the Secretary might have had ‘ his end of diſcovery on a future maturity of the ‘ treaſon. But, that after the Queen knew Parry’s ‘ intent, why ſhe ſhould then admit him to private ‘ diſcourſe, and Walſingham to ſuffer it, conſidering ‘ the condition of all aſſailings, and permit him to go ‘ where and whither he liſted, and only on the ſecu‘ rity of a dark ſentinel ſet over him, was a piece of ‘ reach and hazard beyond my apprehenſion.’—— Dr Welwood gives a remarkable inſtance of Sir Francis’s dexterity, in employing and inſtructing his ſpies how to get him intelligence of the moſt ſecret affairs of Princes. ‘ The court of Queen Elizabeth (ſaith ‘ he) had reaſon to have an eye upon the King of ‘ Scots, as being the next heir to the crown, and who ‘ they knew was courted with all poſſible inſinuations ‘ into the French intereſt. In order to fathom King ‘ James’s intentions, there was one Wigmore ſent to ‘ Scotland, who, pretending to be diſobliged in Eng‘ land, fled thither for protection. Sir Francis Wal‘ ſingham gives him above ten ſheets of paper of in‘ ſtructions, all writ with his own hand, which I have ‘ read in the Cotton library, ſo diſtinct and ſo digeſted, ‘ as a man of far inferior parts to Wigmore could ‘ hardly fail to be a maſter in his trade. In theſe ‘ papers he inſtructs him *how to find out King* James’s ‘ *natural temper*; *his morals*; *his religion*; *his opinion* ‘ *of marriage*; *his inclinations to Queen* Elizabeth, *to* ‘ France, *to* Spain, *to the* Hollanders, *and in ſhort to* ‘ *all his neighbours*. He likewiſe directs him how to ‘ behave himſelf towards the King, *at table*; *when a* ‘ *hunting*; *upon his receiving good or bad news*; *at his* ‘ *going to bed*; and indeed in all the publick and pri‘ vate ſcenes of his life. Walſingham was not miſ‘ taken in this man; for tho’ there paſt a conſtant

‘ correſpondence

1578 (*n*). And in the year 1581, he went a third time Embaſſador into France; to treat of a marriage between Qu. Elizabeth and Francis late Duke of Alençon, now become Duke of Anjou, upon his brother Henry the Third's obtaining the royal dignity; and alſo to conclude a league offenſive and defenſive between both kingdoms. He reſided in France from about the middle of July till the end of the year (*o*). Upon the young King of Scotland's putting himſelf into the hands of James Steuart Earl of Arran, a perſon odious to the Engliſh court, our wiſe Miniſter was diſpatched by Qu. Elizabeth, in 1583, to that unexperienced Prince, out of her great care, leſt now in his flexible years he ſhould by bad counſellors be alienated from the amity of the Engliſh, to the damage of both kingdoms [*K*]. But, through the Earl of Arran's influence, Sir Francis's negotiation was fruitleſs (*p*). We may reaſonably ſuppoſe, that a perſon of ſo public a ſpirit as our worthy Secretary, was an encourager of all attempts and endeavours to promote the trade and navigation of England, which began then to ſpread itſelf with more vigour and ſucceſs in all parts of the world, than it had ever done before. Accordingly, he not only encouraged the moſt valuable and induſtrious Mr R. Hakluyt in his ſtudies for the diſcovery of foreign parts [*L*]; but alſo forwarded Sir Humphrey Gilbert's voyage for the ſettling of Newfoundland, by procuring him a ſum of money, and two ſhips, from the merchants of Briſtol (*q*). And, undoubtedly, he promoted all other diſcoveries and ſettlements of the like nature, tho' there is no mention of it upon record. In 1586, he founded a Divinity Lecture at Oxford (*r*) [*M*]. The ſame year, he diſplay'd his uſual diligence

'correſpondence betwixt them, Wigmore lived in the greateſt familiarity with King James for nine or ten years together, without the leaſt ſuſpicion of his being a ſpy (12).' To conclude this note; our vigilant Stateſman's abilities were commemorated, in a tablet hanging near his tomb, on which were painted theſe verſes, among others.

A famous Knight doth here interred lye,
Noble by Birth, Renown'd for Pollicie.
Confounding Foes, which wrought our jeopardie.
In foreign countreys their intents he knew;
Such was his zeal to doe his countrie good,
When dangers would by Enemies enſue,
As well as They themſelves He underſtood (13).

[*K*] *Our wiſe Miniſter was diſpatched by Qu. Elizabeth, in* 1583, *to that unexperienced Prince, &c.*] As he was then ſickly, and not able to bear riding poſt, he was long by the way, being carried in a chariot; but he had a noble retinue of ſeven ſcore horſe. When K. James gave him audience, their firſt reaſoning was upon his Majeſty's liberty [from his confinement in Ruthven-caſtle], and wherefore he had left the company [the Earls of Marr, Angus, Goury, &c.] who were about him, being the beſt and moſt religious ſort of the nobility, and of his Majeſty's beſt acquaintance, and by whom Queen Elizabeth would deal in her affairs more friendly, than ſhe could do with others, whom ſhe could not ſo well credit (14). The King anſwered readily to this purpoſe. 'That he, being a free Prince, was not to be reduced to ſuch ſtreights that others muſt impoſe Counſellors upon him, whom he did not like. That he had done nothing but what ſtood with his honor, and was for his ſecurity. That he had long ſince vowed the firſt-fruits of his friendſhip to his deareſt ſiſter the Queen of England, and now offered them gladly and deſervedly.' Sir Francis, afterwards, wiſhed him not to impute to Qu. Elizabeth thoſe things which had lately fallen out in Scotland: then he ſhewed him, how advantageous to him and to both kingdoms a friendſhip with England had been heretofore, and might be hereafter, if it were not neglected; and which, he ſaid, would be firmly eſtabliſhed, if the differences betwixt the nobility of Scotland were by authority of parliament buried in oblivion, if thoſe noblemen that were removed from court might be received again into favor, religion maintain'd inviolate, and a firm league betwixt both kingdoms eſtabliſhed The King anſwered, 'That he would maintain amity with England: That he would be wanting in no good offices towards the Queen, and conſtantly defend the received religion (15).' Sir James Melvil adds, that the next day his Majeſty appointed four of the council, and himſelf, to reaſon with Sir Francis, and to ſound what he would be at. But he refuſed to deal with any, but with his Majeſty, who heard him again. He diſcourſed long with his Majeſty, and when he came out, he told Sir James Melvil, that he was the beſt content man that could be, for he had ſpoken with a notable young Prince, ignorant of nothing, and of ſo great expectation, that he thought his travel well beſtowed. The Earl of Arran deſired to enter into familiar conference with him, but he refuſed to ſpeak with him; and much lamented, that this Earl was again in court, and in ſuch credit with his Majeſty; which, he ſaid, if he had underſtood before he took his journey, he would have ſhifted the ſame, and ſuffered ſome other to have been ſent: for he could ſee no ſure courſe could be taken between their Majeſties, ſo long as ſuch inſtruments had ſuch credit about him. For he eſteemed the ſaid Earl a ſcorner of religion, a ſower of diſcord, and a deſpiſer of true and honeſt men: He was himſelf of a contrary nature, religious, true, and a lover of all honeſt men; therefore he refuſed to enter into acquaintance with the Earl... K. James marvelled, that the chief Secretary of England, burthened with ſo many great affairs, ſickly, and aged, ſhould have enterpriſed ſo painful a voyage without any purpoſe; for it could not yet be perceived, what was his errand, ſave only that he gave his Majeſty good counſel. (16) Sir James Melvil is miſtaken, when he ſays in the ſame place, that Sir Francis 'ſhortly after his return to court, took ſickneſs, and died:' For he lived about ſeven years after.

[*L*] *He not only encouraged the moſt valuable and induſtrious Mr R. Hakluyt in his ſtudies for the diſcovery of foreign parts.*] That he did by a letter written to him, which is as follows. 'I underſtand aſwel by a letter I long ſince received from the Maior of Briſtoll, as by conference with Sir George Pekham, that you have endevoured, and given much light for the diſcovery of the Weſterne partes yet unknowen: as your ſtudie in theſe things is very commendable, ſo I thanke you much for the ſame; wiſhing you do continue your travell in theſe and like matters, which are like to turne not only to your owne good in private, but to the publike benefite of this Realme. And ſo I bid you farewell. From the Court the 11 of March 1582.

'Your loving Friend,
'Francis Walsingham.'

[*M*] *In* 1586, *he founded a Divinity Lecture at Oxford.*] The reader was to diſcourſe upon the fundamentals of religion and the text of the holy ſcriptures, by way of common place; in order that the controverſies ariſing from thence might be more particularly diſcuſſed. This lecture, we are told by A. Wood (17), was ſet up on purpoſe to widen the breach, and enflame the difference between the churches of Rome and England. However, the lecture was much commended and thronged by the young ſtudents; but ſome people maliciouſly cenſured the foundation, as a colour to convey the ſacrilege of the founder out of ſight, under a pretence of propagating the true religion. 'The cenſure was uncharitable and impertinent; and there are never wanting men of malignity enough, tho' it is a diabolical diſpoſition, to put the worſt conſtruction upon the beſt and moſt uſeful actions. The Queen had granted her Secretary ſome of the lands of the vacant biſhoprick [of Oxford], and if he founded a lecture in divinity out of them,

‘ when knowledge of that kind was become extremely
‘ ſcarce, he ſhewed a generoſity which he was not
‘ obliged to from any other motive but the propriety
‘ of it (18).’

(18) Dr F. Warner's Eccleſiaſt. Hiſt. vol. II. p. 460.

[*N*] *In* 1586, *he diſplay'd his uſual diligence and ſagacity, in finding out and defeating a conſpiracy*, &c.] The chief of the conſpirators were, J. Savage, J. Ballard, Maud, Antony Babington, Windſore, Saliſbury, Tilney, and others; eſpecially one Polly, a cunning diſſembler, perfectly acquainted with the Queen of Scots affairs, who is thought to have revealed all their conſultations from day to day to Secretary Walſingham, and to have encouraged the reſt in this deſperate undertaking. Their deſign was, to kill Qu. Elizabeth, invade England with foreign troops, and releaſe the Queen of Scots from her impriſonment. In order to ſecure and haſten theſe foreign troops, Babington reſolved to go over to France; and, that there might be no ſuſpicion of him, he inſinuated himſelf into Sir Francis Walſingham by means of Polly, and earneſtly beſought him to procure him a licence from the Queen to travel into France, promiſing to do her extraordinary good ſervice, in pumping out and diſcovering the ſecret deſigns of the fugitives in behalf of the Queen of Scots. Walſingham commended the young gentleman's purpoſe, and promiſed him not only a licence to travel, but alſo many and great matters, if he performed what he undertook. Yet did he linger and delay him, ſifting out, in the mean time, by his own and other mens cunning and diligence, the whole plot, when they thought that the very ſun was a ſtranger to it. One Gilbert Gifford, a prieſt, was a great inſtrument in finding it out. He was employed privately to lurk in England, as a meſſenger to convey letters betwixt the fugitives and the Queen of Scots: But diſcovering himſelf and his employment to Walſingham, promiſed to impart unto him all the letters he ſhould receive either from the Queen of Scots, or the fugitives. Walſingham entertaining Gifford kindly, ſent him into Staffordſhire, where the Queen was then confined; requeſting Sir Amias Poulet, who was her keeper, to connive at the corrupting of one of his men by Gifford. Sir Amias deſired to be excuſed, yet permitted him to corrupt a brewer, or ſome ſuch man, that dwelt hard by. Gifford with a few pieces of gold ſoon bribed the brewer, who privately put in the letters, and received anſwers to them, privately through an hole in the wall, which was ſtopped with a looſe ſtone; and the letters forthwith came to Walſingham's hands by meſſengers ready to carry them. Walſingham opened them, wrote them out, found out the cyphers through the ſingular art and ſkill of Thomas Philips, and by the direction of Arthur Gregory ſealed them up again ſo cunningly, that no man could ever judge they had been opened; and then cauſed them to be ſent to thoſe whom they were directed to. Thus were intercepted the letters of the Queen of Scots to Babington, and his in anſwer to her, and another of hers in anſwer to him; wherein was cunningly added (after opening) a poſtſcript in the ſame characters, deſiring him to ſet down the names of the ſix gentlemen, alſo the letters which were written the ſame day and date to Mendoza the Spaniſh Embaſſador, to Charles Paget, the Lord Paget, the Archbiſhop of Glaſgow, and Sir Francis Inglefield; all which were firſt copied out, and then ſent over ſea. Queen Elizabeth, as ſoon as ſhe underſtood by theſe letters what imminent danger ſhe was in, ordered Ballard to be apprehended. Accordingly Ballard was ſeized in Babington's own houſe. Alarmed at this, Babington preſſed Walſingham by letters and earneſt intreaties, that he might now at length have his licence granted to travel into France, and withal ſollicited him for the releaſe of Ballard, who would be of ſpecial uſe and ſervice to him in the buſineſs he had undertaken. Walſingham fed him with fair promiſes from day to day; laid the blame of his apprehenſion upon the purſuivants; and, as it were out of friendſhip, warned him to beware of that kind of men. And now he adviſes the young man to lodge in his houſe at London, till the Queen had ſigned his licence, and till himſelf could return to London (for he was with the court in the country), that they might have the more ſecret and ſecure conference about matters of ſuch moment and conſequence, and that no ſuſpicion of him might ariſe amongſt the fugitives when he ſhould come into France, upon account of his frequent repair to his houſe. In the mean time Scudamore, Walſingham's man, was commanded to have a diligent and watchful eye over him, and to keep him company in all places, under pretence of ſecuring him from purſuivants. Thus far Sir Francis Walſingham had ſpun this thread alone, without acquainting the reſt of the Queen's council; and longer he would have drawn it, but ſhe interpoſed, ‘ Leſt (as ſhe ſaid
‘ herſelf) by not heeding and preventing the danger
‘ while ſhe might, ſhe ſhould ſeem rather to tempt
‘ God, than to truſt in him.’ A note, therefore, was ſent from the court from Walſingham to his man, that he ſhould more ſtrictly obſerve Babington. This note being unſealed, was delivered ſo to him, that Babington, ſitting at table next him, read it along with him. Hereupon his conſcience accuſing him, and ſuſpecting that all was come to light; the next night, when he and Scudamore and one or two more of Walſingham's men had ſupped plentifully in a tavern, he roſe from the table as if he intended to pay the reckoning, and leaving his cloak and ſword behind him, made his eſcape. But he, and the reſt of the conſpirators, were ſoon apprehended, and executed ſhortly after (19). We have related ſo much of that affair, in order to diſplay Sir Francis's addreſs in unravelling a plot, and keeping the conſpirators playing upon the hook till he had ſecured them all, and could ſafely draw them up.

(19) Camden's Annals, under the year 1586.

[*O*] *Nay ſome pretend, that he ſcrupled not to order her to be privately deſtroyed.*] That injurious opinion is grounded upon a joint letter of Sir Francis, and Secretary *Daviſon*, to Sir Amias Poulet, ſaid to be ‘ *found* amongſt Sir Amias Poulet's writings:’ but it is not mentioned when, and by whom; though now it is lodged in the Harleian Library, with Sir Amias's anſwer. As far as we can find, it was firſt inſerted by one W. Freebairne, in the Romance of the Queen of Scots, tranſlated from the French, and publiſhed by him (20), and ſince tranſmitted into the Hiſtory of Mary Queen of Scots by Dr Jebb (21). However, the letter is as follows. ‘ After our hearty commen-
‘ dations, we find by ſpeech lately uttered by her
‘ Majeſty, that ſhe doth note in you both (22) a lack
‘ of that care and zeal for her ſervice that ſhe looketh
‘ for at your hands, in that you have not in all this
‘ time (of yourſelves without other provocation)
‘ found out ſome way to ſhorten * the that Queen,
‘ conſidering the great peril ſhe is hourly ſubject to ſo
‘ long as the ſaid Queen ſhall live. Wherein beſides
‘ a kind of lack of love towards her, ſhe noteth greatly
‘ that you have not that care of your own particular
‘ ſafeties, or rather of the preſervation of religion, and
‘ the publick good and proſperity of your country,
‘ that reaſon and policy commandeth; eſpecially
‘ having ſo good a warrant and ground for the ſatiſ-
‘ faction of your conſciences towards God, and the
‘ diſcharge of your credit and reputation towards the
‘ world, as the oath of the Aſſociation, which you
‘ both have ſo ſolemnly taken and vowed: eſpecially,
‘ the matter wherewith ſhe ſtandeth charged, being ſo
‘ clearly and manifeſtly proved againſt her. And
‘ therefore ſhe taketh it moſt unkindly that men pro-
‘ feſſing that love towards her that you do, ſhould in
‘ a kind of ſort for lack of the diſcharge of your
‘ duty caſt the burthen upon her, knowing as you do
‘ her indiſpoſition to ſhed blood, eſpecially of one of
‘ that ſex and quality, and ſo near to her in blood as
‘ the ſaid Queen is. Theſe reſpects we find do greatly
‘ trouble her Majeſty, who we aſſure you hath ſundry
‘ times proteſted, that if the regard of the danger of
‘ her good ſubjects and faithful ſervants did not more
‘ move her than her own peril, ſhe would never be
‘ drawn to aſſent to the ſhedding of her blood. We
‘ thought it very meet to acquaint you with theſe
‘ ſpeeches lately paſſed from her Majeſty, referring

‘ the

(22) Viz. Sir Amias Poulet, and Sir Drue Drury.

* So in the MS.

to try that Queen, for compaſſing and imagining, among others, divers things to the hurt of Qu. Elizabeth (u). At her tryal, ſhe indirectly charged Sir Francis with counterfeiting her cyphers and characters; and with practiſing both againſt her life and her ſon's: of which imputations he vindicated himſelf (w) [P]. Soon after, he was made Chancellor of the Duchy of Lancaſter (x). About this time, when preparations were making in Spain for invading and conquering England, Sir Francis, by a refined piece of policy, defeated for a whole year together the meaſures Spain had taken for fitting out their Armada; of which we have this particular account. The vaſt preparations that were making for a conſiderable time in Spain, kept all Europe in ſuſpence, and it was not certain againſt whom they were deſigned; tho' it was the general opinion they were to ſubdue the Netherlands all at once; which Spain was ſenſible could not be done without a greater force by ſea as well as land, than had been hitherto employed for that ſervice. Queen Elizabeth thought fit to be upon her guard, and had ſome jealouſies that ſhe might be aim'd at; but how to find it out was the difficulty, which at length Walſingham overcame. He had intelligence from Madrid, That K. Philip had told his council, he had diſpatched an expreſs to Rome with a letter writ with his own hand to the Pope, acquainting him with the true deſign of his preparations, and aſking his bleſſing upon it; which for ſome reaſons he would not yet diſcloſe to them, till the return of the courier. The ſecret being thus lodged with the Pope, Walſingham by the means of a Venetian Prieſt retained at Rome as his ſpy, got a copy of the original letter, which was ſtolen out of the Pope's cabinet by a gentleman of the bed-chamber, who took the keys out of the Pope's pocket while he ſlept. Upon this intelligence, Sir Francis Walſingham found a way to retard the Spaniſh invaſion for a whole year, by getting the Spaniſh bills proteſted at Genoa, which ſhould have ſupplied them with money to carry on their preparations (y). After this great event, we hear very little of our wiſe Miniſter, only that in 1589 he entertained Queen Elizabeth at his houſe at Barn-Elms (z). Probably he was now worn out with age, as well as with infirmities, occaſioned by his too intenſe application in the ſervice of his country. Beſides his other dignities and employments, we find that he was a Knight of the Garter (aa), and Recorder of the Burgh of [Q] Colcheſter.

(aa) Camden's Annals, under the year 1590.

'the ſame to your good judgment. And ſo we com'mit you to the protection of the Almighty.

'Your moſt aſſured Friends,

At London, 1 Feb. 1586.

'Fra. Walsingham.

'William Davison.'

Secretary Daviſon, in a letter of the ſame date, is ſaid to have this paſſage. 'I pray you let both this and 'the incloſed be committed to the fire, which meaſure 'ſhall be likewiſe met to your anſwer, after it hath been 'communicated to her Majeſty for her ſatisfaction.

In a letter from Mr Secretary Daviſon, of the 3d of February 1586, we are told there is this poſtſcript. 'I intreated you in my laſt letters to burn both the 'letters ſent unto you for the Arguments ſake; which 'by your anſwer to Mr Secretary (which I have ſeen) 'appeareth not to be done. I pray you let me in'treat you to make Hereticks both of th'one and th'o'ther, as I mean to uſe yours after her Majeſty hath 'ſeen it.'

And in the end of the poſtſcript... 'I pray you let 'me know what you have done with my letters, be'cauſe they are not fit to be kept, that I may ſatisfy 'her Majeſty therein, who might otherwiſe take of'fence thereat, and if you intreat this poſtſcript in 'the ſame kind, you ſhall not err a whit.

A. Poulet. D. Drury (23).'

A few animadverſions upon theſe poſtſcripts are neceſſary.—Secretary Daviſon's capacity makes no very great figure in hiſtory. But we are ſure it is quite inconſiſtent with Sir Francis Walſingham's known cautiouſneſs, cunning, or call it what you pleaſe, to truſt a dangerous letter out of his hands, and ſtand to the chance of having it burnt or otherwiſe deſtroyed by thoſe whom it was ſent to: when he might as effectually have conveyed his orders or directions by a written meſſage, which ſhould have been brought back to him by the meſſenger. This latter part is more conſiſtent with his character.—However, the moſt effectual way of determining this point, is to examine the pretended original letter, and ſee whether it is ſigned by Sir Francis Walſingham's own hand, which is well known, there being ſo many letters of his about in different places.——It is certain, that Sir Francis was not ſo ready to order the Queen of Scots to be clandeſtinely deſtroyed. For, when the Earl of Leiceſter was for taking her off by poiſon, and ſent 'a Divine privately to Walſingham, to ſatisfy him 'that it was lawful, Walſingham proteſted he was ſo 'far from conſenting that any violence ſhould be 'done to her, that he had of late croſſed Morton's 'counſel, who adviſed that ſhe ſhould be ſent back 'into Scotland, and put to death in the very frontiers 'and borders of both kingdoms (24).' From the collection of pieces relating to Mary Queen of Scots, publiſhed by Dr Jebb, it is manifeſt, that Sir Amias Poulet had not that extreme tenderneſs and civility for the Queen of Scots, which his *Anſwer* to the letter above (inſerted after that letter, by Dr Jebb, in the Appendix to his Hiſtory of Mary Queen of Scots) ſeems to imply. See particularly, in Tome Second, *Martyre de Marie Stuart* (25).

[P] *At her trial, ſhe indirectly charged Sir Francis with counterfeiting her cyphers and characters,* &c.] For, when one of her letters was produced, wherein Babington's plot was commended and approved; her Majeſty ſaid, That it was an eaſy matter to counterfeit the cyphers and characters of others; as a young man did very lately in France, who gave himſelf out to be her ſon's baſe brother (26). That ſhe was alſo afraid this was done by Walſingham, to bring her to her end, who (as ſhe heard) had practiſed both againſt her life and her ſon's. She proteſted, that ſhe never ſo much as thought of the deſtruction of the Queen.—Whereupon, Sir Francis proteſted, that his heart was free from all malice. 'I call God, ſaid he, to witneſs, 'that as a private perſon I have done nothing unbe'ſeeming an honeſt man; neither in my publick con'dition and quality have I done any thing unworthy 'of my place. I confeſs that, out of my great care 'for the ſafety of the Queen and realm, I have cu'riouſly endeavoured to ſearch and ſift out all plots 'and deſigns againſt the ſame. If Ballard had of'fered me his aſſiſtance, I ſhould not have refuſed it, 'yea I would have rewarded him for his pains and 'ſervice. If I have tampered any thing with him, 'why did he not diſcover it to ſave his life?'... With this anſwer the Queen ſaid ſhe was ſatisfied. She prayed him 'not to be angry that ſhe had ſpoken 'ſo freely what ſhe had heard reported, and that he 'would give no more credit to thoſe that ſlandered her, 'than ſhe did to ſuch as accuſed him. Spies (ſhe ſaid) 'were men of doubtful and little credit, who make ſhew 'of one thing and ſpeak another; and deſired him, That 'he would not in the leaſt believe that ever ſhe had 'conſented to the Queen's deſtruction (27)!

[Q] *And Recorder of the Burgh of Colcheſter.*] He chiefly conducted the affairs of that Burgh, and directed in particular, or nominated (28), what perſons they ſhould chuſe for their Repreſentatives in Parliament: ſo that it is no new Court practice, but what was done even in the admired reign of Qu. Elizabeth. All that is manifeſt from the following letters of Sir

Francis

Colcheſter. He died April 6, 1590 (*bb*) [*R*]; and, after all the ſervices he had performed for his Queen and country, he gave a remarkable proof at his death how far he had preferred the public intereſt to his own; for he died ſo poor, that his friends were obliged to bury him privately in the night, for fear his body ſhould be arreſted for debt. A fault which few ſtateſmen ſince his time have been guilty of! as Dr Welwood obſerves (*cc*). He was a perſon of great prudence and induſtry; a moſt ſteady aſſerter of the Reformed Religion; a ſtudious and temperate man; ſo public-ſpirited, that he ſpent his eſtate to ſerve the kingdom; ſo faithful, that he beſtowed his years on his Queen; ſo learned, that he provided a library for King's college. Finally, he equalled all the ſtateſmen former ages diſcourſe of, is a pattern to all, and hardly hath been equalled by any (*dd*). What further character Mr Camden gives of him, is ſet down below [*S*]. By his Lady, which was of the family of St Barbe (*ee*), he left only one daughter, that was married thrice: firſt to Sir Philip Sydney; ſecondly to Robert Devereux, Earl of Eſſex; and thirdly to Richard Bourk, Earl of Clanrickard, in Ireland. By the firſt, ſhe had one daughter, married to Roger Earl of Rutland; by the ſecond, a ſon, and two daughters; and by the laſt a ſon and a daughter (*ff*). There is aſcribed to him a book, intituled, ‘ *Arcana Aulica*: or Walſingham's Manual of Prudential Maxims, for the

Francis to the Magiſtrates of Colcheſter, of which the originals are in our poſſeſſion.

‘ After my harty commendations. I have receaved your letter and underſtande by the ſame that before myne cam unto you the election for the Burgeſſes of your towne was already paſſed with Mr James Moryce and Mr Frances Harvye: which choiſe I do veary well like and allowe of bothe for that it was ſo ordered by her Majeſtie if thoſe gentlemen were extante, as alſo in reſpect of theire ſufficiency for that place. I hartely thanke you that at my commendation you wold ſo gladly have choſen Mr Gorge: which I wold not have deſired, if I had knowne of your good choiſe already made. And ſo I byd you hartely farewell. From Baronelmes the vith of October 1586.

‘ Your very lovinge frende,
‘ FRA. WALSYNGHAM.’

‘ After my harty comendations. Whereas you are according to the writte directed unto you to chuſe two Burgeſſes of the Parlement I am to recommend unto you Mr Arthur Throckmorton a Gent. of very good creditt and abillity to be choſen for one of them who as he is a Gent. to whom I beare ſpeciall good will ſo I doubt‡ but he will diſcharge himſelfe to your contentment. And ſo byd you hartely farewell. From the Court at St James the viiith of October 1588.

‘ Your very loving frend
‘ FRA. WALSYNGHAM.’

‡ *Not* is wanting.

‘ After my hartie commendacions. Whereas I underſtande that the Scholemaſter of your Towne hath a determynation to geve over his place mynding to retourne backe againe to the univerſitie: Foraſmuch as I am earneſtlie moved on the behalf of this bearer Marke Sadlington to recomend him unto you to be preferred to the ſame place, a man of whom both for his ſinceritie in relligion and ſufficiencie of learning I do heare a verie good reporte, as being a maſter of arte of fower yeares ſtanding, and a fellowe of Peterhouſe in Cambridge, where he hath ben choſen to be the hedd lecturer, which cannot but argue extraordinarie ſufficiencie in him, I am therefore to praie you moſt earneſtlie that you wil be content for my ſake to graunte him the preferrement of the ſaid place, which I doe not thincke that you can furniſhe of a perſon more meete and fitt for the ſame, and therefore I hope that you will not refuſe to gratifie me in ſo reaſonable a ſuite, for whom I will thincke my ſelf much behoulding unto you, and be readie to requite this frendſhippe towardes you. And ſo I comitt you to God. From the Court the ſecond of October 1588.

‘ Your verie loving frend
‘ FRA. WALSYNGHAM.’

‘ After my harty commendations. Wheras certein of the Straungers reſident in your towne have as I am informed by them a ſuite depending before you againſt one William Allen one of your towneſmen who about a yere paſt being hired by them to cary certain bayes in a ſmall bark of his owne to Middleborough in Zeelande did contrary to his bargaine take his courſe with the ſaied bayes directly to Dunkircke, where the goods were immediately confiſcate and loſt to the great hindraunce and dammage of the proprietaries and owners of the ſame: Foraſmuch as by divers preſumptions the ſaied Allen is very vehemently ſuſpected to have don this of purpoſe and for his owne private lucre, being otherwiſe founde to be but of a badde diſpoſition, and for that the Dutchmen do rather deſire to ſubmitt themſelves to your order in this mater then to proceede to triall by a partie queſt wherin the ſaid Allen will peradventure take exceptions againſt the ſufficienteſt men of the Straungers as parties in the cauſe: I have therefore thought it the moſt indifferent way, in reſpect the Straungers are generally unſkilfull of our maner of proceeding by a Jury, that you upon hearing the allegations, proofs, and anſweres of both ſides ſhould take the full determination of the cauſe into your owne handes, and ſet downe ſuch final order therin as you ſhall ſynde to be moſt agreable with equitie and conſcience, wherin I pray you to deale effectually and with as much expedition as you can certifieng me of your proceedings in this behalf: And ſo I committ you to God. From the Savoy the firſt of Novemb. 1588.

‘ Your loving frende
‘ FRA. WALSYNGHAM.’

‘ After my hartie comendacions. I have receaved your letter together with th'examination of the Scottiſheman, and cannot but comend the great care you ſhewe for th'execution of her Majeſtie's ſervice. I would be gladd to underſtand from you, for that the partie pretendeth to have had a meaning before his apprehenſion to have come unto me, to have revealed the thinge, whether he did utter anie ſuch ſpeaches unto you. And ſo I comitt you to God. From London the 17th of Februarie 1588.

‘ Your verie loving frend
‘ FRA. WALSYNGHAM.’

[*R*] *He dyed April* 6. 1590.] *Ex carne dura intra teſtium tunicas increſcente, aut potius medicamentorum violentia*; as Mr Camden's own words are (29): i. e. of a fleſhy excreſcence about his privities, or rather by taking too violent medicines.

(29) Annales, ad annum 1590.

[*S*] *What further character Mr Camden gives of him, &c.*] It is as follows. — ‘ He had been concerned in ſeveral honorable embaſſies; underſtood well the intrigues of government, and as well how to gain and improve the good affections of the people, ſo as to ſerve his own turn; inſomuch that his quickneſs and diſpatch of buſineſs made him conſidered by the Queen, as a man that even out-did himſelf; and the Papiſts found him, to their great mortification, a perſon of that intelligence and penetration, and ſo dextrous at finding out their tricks and deſigns againſt religion, his Prince, and country, that they complained of him as a very ſubtle and inſidious man. Indeed he watched the practices of theſe men with ſo great an expence, that he leſſened his eſtate by that means, and brought himſelf ſo far in debt, that he was buried privately by night in St Paul's church, without any manner of funeral ſolemnity (30).

The Lord Henry Howard gives alſo this further character of him, That the ſweetneſs of his diſpoſition, the frankneſs of his mind, the credit of his place, the level

(30) Camden's Annals, as above.

‘ the Stateſman and Courtier;’ printed ſeveral times; but it may juſtly be queſtioned whether it was of his own compoſition.

level of his long experience, and the depth of his judgment, were means ſufficient and ſtrong enough, to draw the minds of perſons well diſpoſed both to love and honour him (31).’ And Dr David Powell ſtyles him, ‘ a man, for his zeal of God’s glory, and ‘ love towards them that feared God unfainedly, well ‘ known to the world (32).’ Finally, an excellent Poet gives him the well choſen titles of Frugal and Wiſe.

Frugal and wiſe a Walſingham is thine (33).

WALTON, [Brian] the moſt learned and diligent editor of the *Engliſh Polyglot Bible*, and Biſhop of Cheſter in the laſt century. This worthy man deſerves to be mentioned with particular reſpect, his great work being an honour to this nation. He was born, in the year 1600, in that part of the North Riding of Yorkſhire, called Cliveland. After a proper ſchool-education, he was admitted in Magdalen College in Cambridge, in 1615; and thence removing, on the 4th of December, 1616, to Peter-houſe (a), he took there the degree of Batchelor of Arts in 1619; as he did that of Maſter in 1623 (b). About this time he was a Curate, and maſter of a ſchool in Suffolk. Thence removing to London, he became aſſiſtant to Mr Richard Stock, rector of Alhallows, Breadſtreet. After whoſe death, in 1626 (c), he was made rector of St Martin’s-Orgar in that city (d); where he became noted for a man of ſtrong parts, great activity and diligence; an extraordinary reach and prudence, whereby he could command any learning, tho’ he had not much ſtudied it; very judicious in laying, and indefatigable in purſuing, any deſign. Of which he gave ſufficient evidence, in his proſecution of the affair of the Tythes of the London clergy (e) [A]. On the 15th of January 1635-6, he was inſtituted to both the rectories, of St Giles’s-in-the-fields, London, and Sandon in Eſſex; being preſented to them by King Charles I. whoſe chaplain he is then ſuppoſed to have been (f): but quitted St Giles’s again ſoon after (g). He is alſo ſaid to have been collated to the Prebend of Twiford in St Paul’s Cathedral (h). In 1639, he commenced Doctor in Divinity (i); being highly valued both for his learning and piety, and his ſtrenuous vindication of his brethren’s rights. But theſe valuable qualities ſerved only to expoſe him to the reſentment of the diſaffected vulgar. For, upon the breaking out of the rebellion, he was ſent for by the Houſe of Commons as a delinquent, aſſaulted, ſequeſtered from his living of St Martin’s, plundered and forced to fly (k): but, whether directly to Oxford, where he reſided afterwards for ſome time, or elſe to his other living of Sandon, we cannot learn with any certainty. At what time ſoever it happened, he was moſt barbarouſly uſed at that living likewiſe, being grievouſly harraſſed there; and once when he was ſought for by a party of horſe, he was forced to ſhelter himſelf in a broom field. And the manner of his being ſequeſtered from this living is very remarkable: For Sir Henry Mildmay and Mr Aſh, two members of parliament, firſt drew up articles againſt him themſelves, tho’ no way at all concerned in the pariſh, and then ſent them to Sandon to have them witneſſed and ſubſcribed (l). After he was thus diſpoſſeſſed of both his livings, being in danger of being murdered (m), he fled for refuge to Oxford. Whilſt he was

[*A*] *In his proſecution of the affair of the Tythes of the London clergy.*] The revenues of the London clergy accrued, anciently, from offerings made to them by their pariſhioners, upon certain days and occaſions. At length, conteſts ariſing about them, it was ſettled by Roger Niger, Biſhop of London in the 13th century, ‘ That, according to the yearly rent the inhabitants paid for their dwelling houſes, ſo their offerings ſhould be; that is, after the rate of a *farthing* ‘ for a houſe rented at 10s. a year, and a *halfpenny* ‘ for a houſe rented at 20s. a year, and ſo proportionably.’ And the times of payment were ſettled, afterwards, to every Sunday in the year, and twenty two holidays beſides, that is 74 in all; or three ſhillings and a penny in the pound: which, in proceſs of time, came to be uſually ſettled to 3s. 6d. in the pound. So they continued till Statute 37 Henry VIII. which altered, and ſettled them at 2s. 9d. in the pound, to the great diſadvantage of the London clergy: the citizens alſo contending to pay after the old rents, not according to later improvements. And, to defraud the clergy, and conceal the advancement of their rents, they invented ſeveral means; as yearly and quarterly fines, annuities, new years gifts, intereſt of money for improvement, or houſhold ſtuff. Some reſerved it by ſeveral bonds; ſome by double leaſes, wherein was mentioned a ſmall rent, by which the parſon muſt have his tithe; another, wherein was reſerved the full rent, according to which they paid their landlord. To remedy this grievance, a bill was brought into the firſt parliament of King James I. anno 1604, but did not paſs into a law. The miniſters in London, next, petitioned that King in 1615; without any effect. At laſt the London clergy, in the year 1634, preſented another petition to King Charles I. wherein they ſet forth, how the benefices of London, an hundred years before, were very great, but that they were then very ſmall and mean; many of them not worth 40 l. per annum, the moſt not 100l. ſhewing at the ſame time the cauſes thereof. This petition the King referred to the Archbiſhop of Canterbury, the Lord Keeper, the Earl Marſhal, the Lord Biſhop of London, and others. Upon this, ſix citizens, ſuch as were moſt faulty by double leaſes and other frauds, were warned to appear before the privy-council, January the 9th. And the lords of the council did expreſs themſelves againſt the practices of the city, as mere frauds. Afterwards committees met on each ſide to treat of ſome accommodation: three aldermen being appointed for the city, and three clergymen nominated by the Biſhop of London, for the clergy; viz. Sir Chriſtopher Clithero, Sir Edward Bromfield, Mr Abdy, aldermen; Dr Holdſworth, Dr Brough, Dr Walton, parſons. Some time after the King declared he would hear the cauſe himſelf. This buſineſs was in hand, and tranſacting ſeveral years, namely till the year 1638, and nothing brought to any concluſion. And then the national troubles coming on, put an abſolute ſtop thereto (1). Upon this occaſion, Mr Walton, with great labour and induſtry, drew up a learned and exact Collection of Cuſtoms, Preſcriptions, Laws, Orders, Proclamations, Compoſitions, &c. about the above-mentioned tythes, for many hundred years together: and was ſo ſtrenuous an advocate for them, that the judges declared, there was no dealing with the London miniſters, if Mr Walton pleaded for them. His MS. Collections came into the hands of Mr Spence of Sion-college, and an abſtract of them was printed (2).

there,

there, he formed the moſt noble and glorious deſign of publiſhing the Polyglot Bible, in a more complete and convenient manner than it had been before [B]. And returning afterwards to London (at the houſe of his father-in-law, Dr William Fuller, Vicar of St Giles's Cripplegate) he earneſtly ſet about, and began, that great work in the year 1653 (n) [C]. And though he had infinite diſturbances for his loyalty, and met with many other diſcouragements and difficulties; ſo little ſenſe had thoſe who then prevailed of any thing that was noble, or for the common good of learning, or rather indeed of Religion and Chriſtianity itſelf; yet, with diligence and application almoſt incredible, he ſurmounted them all, and got that moſt incomparable edition of the Bible compleated and publiſhed [D] in

(n) See the inſcription under his picture, prefixed to the firſt volume of the Polyglot.

[B] *Of publiſhing the Polyglot Bible, in a more complete and convenient manner than it had been before.*] There had been, before this time, three conſiderable editions of the Polyglot Bible. 1. The firſt, commonly known by the name of the *Complutenſian*, was undertaken by Francis de Ximenes, cardinal and archbiſhop of Toledo, and printed at his own charge: The compilers were the divines of his univerſity of *Complutum*, or Alcala, which he had newly founded. It was printed in the year 1514, &c. in ſix tomes, fol. It contains the Hebrew Text, with the Latin vulgate; the Greek Septuagint, with a Latin tranſlation; Onkelos's Chaldee Paraphraſe on the Pentateuch, with a Latin tranſlation, the New Teſtament in Greek, without accents, but with a Latin tranſlation. 2. The *Antwerp* Polyglot, was printed at Antwerp in 1571, in 8 tomes, fol. and it being at the expence of Philip II. King of Spain, it is upon that account ſtiled The Royal Polyglot. It contains the following articles; the Hebrew Text, with St Jerom's verſion: and theſe improvements above the former, the Chaldee paraphraſe, entire; the paraphraſe of Jonathan on the Prophets; and of Joſeph Cæcus, or others, on the Hagiographa. In the New Teſtament, the ancient Syriac verſion, both in Syrian and Hebrew characters, with a Latin verſion. An Apparatus, in 3 tomes. It is a very beautiful edition, by ſome ſtiled *orbis miraculum*, the world's wonder. The editor was Arias Montanus, a learned and moderate perſon. Though his work was approved of by the Pope himſelf, to whom it was preſented; and though he did nothing without the advice of the univerſity of Lovaine, and of ſeveral other learned men; yet all could not protect the publiſher from the jealouſies and calumnies of malignant ſpirits of his own brethren, againſt whom he was fain to write apologies, and hardly eſcaped the Inquiſition (3). 3. The third Polyglot was the *Paris* Polyglot, or rather Heptaglot, as being in ſeven languages, printed at Paris, 1645, in ten volumes, fol. on royal paper, at the expence of Michael le Jay. This is the ſame as the laſt, except the interlinear verſion and Apparatus: but there are added in it, the Samaritan Pentateuch in the ancient Hebrew character, uſed, as is ſuppoſed, by the Jews before the Babyloniſh captivity; with a Samaritan and Latin verſion; a Syriac tranſlation; and an Arabic tranſlation both of the Old and New Teſtament. The editors were, Gabriel Sionita, John Morin, and Abraham Echellenſis. This is a ſplendid edition, but imperfect in ſome reſpects, as wanting an Apparatus, Plates, various readings, indexes, &c. It was ſeverely criticized upon by Simeon de Muis, Regius Profeſſor of the Hebrew tongue at Paris.—— To theſe Polyglots we may add that of *Elias Hutter*, publiſhed at Hamburgh in 1597, in four languages, Hebrew, Greek, Latin, and German; to which he afterwards added the Italian, French, Sclavonian, and Saxon. His New Teſtament was printed in the year 1600, in twelve languages, viz. Syriac, Hebrew, Greek, Latin, German, Bohemian, Italian, Spaniſh, French, Engliſh, Daniſh, and Poliſh. But in the edition of 1603, he reduced it to theſe four, Hebrew, Greek, Latin and German. (4)

(3) Dr Walton's Conſiderator conſidered, 8vo. 1659, p. 4.

(4) Bayle's Dictionary under the article HVTTERVS.

[C] *And began that great work in the year* 1653.] About that time, he wrote the following letter to the Lord Primate Uſher; which we ſhall preſent the reader with, as it gives a right notion of our author's great care and induſtry.

‘ May it pleaſe your Grace,

‘ I made account to have waited upon your Grace before you went out of town, but was prevented by your early departure from Lincoln's-Inn, where I was about an hour after you were gone. I have been with my Lord of Ardah (5), and have left with him the copy of the LXX, which he is to follow. I perceive he will be engaged in work of his own for this half year; yet I hope he will not neglect this, but take ſome care of it himſelf, becauſe we cannot rely upon Mr Huiſh. I would gladly know whether Mr Young's executor will let us have his notes, or upon what terms; they will be of very great uſe, if they may be had: if your Grace pleaſe to give me order to write, or call to Mr Atwood (6) about them, and to make uſe of your name, I will ſee what may be done. If your Syriack copy be come out of France, Mr Thornedike would gladly have it to collate, both with the Paris, and your other manuſcript, for all may be done with the ſame labour. If yours cannot be had as yet, I will borrow ſome part of Mr Pocock's, till the other come over. Mr Whelock hath ſent me a ſpecimen of what he hath done about the Samaritane verſion; where it differs from the Heb. Samaritane I have ſent your Grace a copy of it. Dr Lightfoot, as I hear from a friend, is willing, if it be deſired, to undertake the ſame taſk, or part of it: and becauſe of Mr Wheelock's infirm body, I would gladly have ſome ſubſidiary help. He accounts it a thing eaſy (the Samar. being a dialect of the Chaldee) and I would gladly have ſomething done in it, both to ſatisfy the deſires and expectations of many that write about it; as alſo, that we may have ſomewhat more than is in the Paris Bibles, if your Grace thinks fit. Mr Whelock propounds another thing concerning the whole work, which I look upon as a thing hardly practicable, or which will at leaſt require a great deal of time, viz. to have all the homogeneal languages together, and one Latin tranſlation of them all, as the Hebrew Chald. Samar. and our Latin tranſlation for all. So the Roman LXX. with the Complutenſe, and that of Tecla's, and our Latin tranſlation, &c. This I look upon as a fancy, yet I promiſed to acquaint your Grace, and others, with it, and to deſire your opinions. I hope we ſhall ſhortly begin the work, yet I doubt the founders will make us ſtay a week longer than we expected: as ſoon as the firſt ſheet is printed, I ſhall make bold to ſend one to your Grace. In the mean time, with my prayers for your Grace's health and happineſs, I take leave, and reſt

(6) He had married Mr Patrick Young's daughter, and was his executor. He lived at Bromfield in Eſſex.

(7) Letters at the end of Archbiſhop Uſher's Life by R. Parr, p. 590.

[D] *Publiſhed in 1657, in ſix volumes folio.* What this valuable edition contains, will beſt appear from the title page, which is in theſe words. *Biblia Sacra Polyglotta, complectentia Textus Originales, Hebraicum, cum Pentateucho Samaritano; Chaldaicum; Græcum: Verſionumque antiquarum, Samaritanæ, Græcæ LXXII. Interp. Chaldaicæ, Syriacæ, Arabicæ, Æthiopicæ, Perſicæ, Vulg. Lat. quicquid comparari poterat. Cum Textuum & Verſionum Orientalium Tranſlationibus Latinis.* Ex vetuſtiſſimis MSS. undique conquiſitis, optimiſque Exemplaribus impreſſis, ſumma fide collatis. Quæ in prioribus Editionibus deerant ſuppleta. Multa antehac inedita de novo adjecta. Omnia ea ordine diſpoſita, ut Textus cum Verſionibus uno intuitu conferri poſſint. *i. e.* “ The holy Polyglot Bible, comprehending the original Texts, viz. the Hebrew, with the Samaritan Pentateuch; the Chaldee; and the Greek. And of the ancient Verſions, namely, the Samaritan, Greek Septuagint, Chaldee, Syriac, Arabic, Ethiopian, Perſian and Latin Vulgate, all that could be procured. With Latin Tranſlations of the Texts, and Oriental Verſions. Publiſhed from the ancienteſt MSS. any where extant, and beſt printed copies very faithfully collated. What was wanting in the in 1657, in ſix volumes folio (o). The aſſiſtants in that great undertaking [E], and the chief encouragers of it [F] are ſet down below. About the year 1656, he was one of the committee, appointed by the then parliament, to conſider of the tranſlations and impreſſions of the Bible (p) [G]. As the beſt deſigns are apt to be miſunderſtood or miſrepreſented by weak and contentious perſons; ſo it fared with our learned editor; and his Polyglot. For J. Owen publiſhed Conſiderations againſt it [H]; which were refuted by our

the former editions is ſupplied. And many things now newly added. The whole being diſpoſed in ſuch order, that the original texts may at one view be compared with the tranſlations."

The ſhare Dr Walton had in this great Work was as follows. I. He diſpoſed the whole into that excellent order it is placed in. II. He prefixed to it An Apparatus, in Latin; containing, 1. *Chronologia ſacra*; or, The Sacred Chronology, from the Creation of the World to the Birth of Chriſt, and thence to the Jewiſh captivity; ſent him by Lewis Cappell, Hebrew Profeſſor in the univerſity of Saumur. 2. Edw. Brerewood, of the weight and value of ancient Coins. 3. Dr Walton's Supplement, concerning the form and inſcriptions of the Sicles, or Shekels, with an explanation of them. 4. A treatiſe of the ancient Weights, Money, and Meaſures of the Hebrews, Greeks, and Romans, collected from ſeveral authors. 5. An explication of the Hebrew and Greek Idioms, occurring often in the Scriptures. 6. A deſcription of the Holy Land, from Adrichomius. 7. The notes of James Bonfrere on the ſame. 8. Dr John Lightfoot's Obſervations on the Maps of the Holy Land. 9. Τρισαγιον, or a threefold Deſcription of the Temple of Jeruſalem: the firſt, from the Scriptures, according to Villalpandus; the ſecond, from Joſephus; and the third, from the Jews in their Talmud, according to the deſcription and meaſures there given. Drawn up by Lewis Cappell. III. Then follow Dr Walton's learned *Prolegomena*, under theſe ſixteen heads. 1. Of the nature, origin, diviſion, number, changes, and uſe of Languages. 2. Of Letters or Characters, their wonderful uſe, origin and firſt invention, and their diverſity in the chief languages. 3. Of the Hebrew Tongue, its antiquity, preſervation, change, excellency and uſe, ancient characters, vowel points, and accents. 4. Of the principal Editions of the Bible. 5. Of the Tranſlations of the Bible. 6. Of the various Readings in the Holy Scripture. 7. Of the integrity and authority of the Original Texts. 8. Of the Maſora, Keri, and Ketib, various readings of the Eaſtern and Weſtern Jews, Ben Aſcher and Ben Nepthali; and of the Cabala. 9. Of the Septuagint, and other Greek tranſlations. 10. Of the Latin Vulgate. 11. Of the Samaritan Pentateuch, and the Verſions of the ſame. 12. Of the Chaldee language, and Verſions. 13. Of the Syriac tongue, and verſions. 14. Of the Arabic language, and verſions. 15. Of the Ethiopic tongue, and verſions. 16. And of the Perſian language, and Verſions.

[E] *The aſſiſtants in that great undertaking.*] The adviſers and directors of that great work, jointly with Dr Walton, were, James Uſher, Archbiſhop of Armagh, Dr William Fuller, Dr Gilbert Sheldon, Dr Bruno Ryves, Dr Robert Sanderſon, Dr Richard Sterne, Dr Samuel Baker, Dr Henry Hammond, Dr Henry Fearne, Mr Herbert Thorndike, Richard Johnſon, Richard Drake, D. D. Abraham Wheeloc, Arabic Profeſſor at Cambridge, Edward Pococke, Hebrew and Arabic Profeſſor at Oxford, Thomas Greaves, formerly Arabic Profeſſor at Oxford, and Thomas Smith, B. D. Fellow of Chriſt's College, Cambridge, Meric Caſaubon, &c

Thoſe that collated MSS. and corrected the preſs, were *Edmund Caſtell*, or Caſtle, B. D. a man in whom were united the moſt conſummate learning and the greateſt modeſty, *virum in quo eruditio ſumma, magnaque animi modeſtia convenere*, as Dr Walton acknowledges in his Preface. He was at the pains of carefully reviſing the Samaritan, Syriac, Arabic, and Ethiopian; tranſlated from the latter into Latin the Pſalms and Canticles, where they differ from the verſion of the LXX; and the Syriac Verſion of Job, where it differs from the Arabic, with Annotations. And tranſlated ſome of the books of the New Teſtament from the Ethiopic. This learned man alſo compiled, afterwards, that laborious work of the Lexicon in ſeven languages, 2 vol. fol. for the better underſtanding of the Polyglot Bible, and commonly ſold with it. After all, he was but ſlenderly rewarded for his pains; having, at firſt, but the poor vicarage of Hatfield-Peverell, then Wodeham-walter rectory, in Eſſex: In 1666, he was made Regius Profeſſor of Arabic in Cambridge; ſome time after, Rector of Higham Gobyon in Bedfordſhire; and in 1685, a few months before his deceaſe, Prebendary of Canterbury. He was born at Hatley in Cambridge-ſhire, educated at Emanuel College, where he was admitted in 1621: and buried at Higham Gobyon (8).—— The other Aſſiſtants in the edition of the Polyglot, were, *Alexander Huiſh*, of Wadham College, B. D. who took ſome pains about the Septuagint, the Greek Text of the New Teſtament, and the Latin Vulgate; and collated the Alexandrian MS. with the other editions.— *Samuel Clerk*, M. A. of Merton College, Architypographus of the univerſity of Oxford, beſtowed ſome labour upon the Hebrew Text, the Chaldee Paraphraſe, and the Perſian verſion of the Goſpels, part of which he rendered into Latin.——*Thomas Hyde*, a young man of great hopes, who had made a progreſs in the oriental languages beyond his years, *ſummæ ſpei juvenis, qui in Linguis Orientalibus ſupra ætatem magnos progreſſus fecerat*, as Dr Walton characterizes him, aſſiſted in correcting the Syriac and Perſian, and in writing the Pentateuch in Perſian characters, which before was only in the Hebrew letters; and making a Latin tranſlation (9).—— *Dudley Loftus*, I. U. D. of Dublin, tranſlated the Ethiopic Verſion of the New Teſtament into Latin.—— *Claude Hardy* communicated, from Paris, a more complete copy of the Ethiopic verſion, which helped to ſupply ſome imperfections that were in the others (10).—— Dr *David Stokes*, once Fellow of Eton College, was alſo an aſſiſtant in the work.

[F] *And the chief encouragers of it.*] Theſe were, Charles Elector Palatine, William Marquis of Hertford, William Earl of Bedford, William Earl of Strafford, Montague Earl of Lindeſey, George Earl of Rutland, Mildmay Earl of Weſtmoreland, John Earl of Exeter; William Lord Petre, William Lord Maynard, Arthur Lord Capel, Thomas Lord Fairfax, Baptiſt Viſcount Campden; Sir Robert Shirley, Sir William Courtney, Sir Antony Cheſter, Sir William Farmer, Baronets; Sir Norton Knatchbull, Knight and Baronet; Sir Francis Burdett, Knight; John Aſhburnham, John Selden, John Sadler, John Hele, Tho. Wendy, Eſquires; John Wall, D. D. William Lenthall, Maſter of the Rolls.——— William Humble, Eſq; was Treaſurer of the Subſcriptions.—— And the Council of State, and the Protector Oliver Cromwell, permitted the paper to be imported duty-free (11).

[G] *About the year* 1656, *he was one of the committee appointed*, &c.] This we learn from Mr Whitelock. —" 1656. January 16th. At the grand Com'mittee for Religion. Ordered, That it be referred 'to a ſub-committee to ſend for and adviſe with Dr '*Walton*, Mr Hughes, Mr Caſtle, Mr Clark, Mr 'Poulk, Dr Cudworth and ſuch others as they ſhall 'think fit, and to conſider of the tranſlations and im'preſſions of the Bible, and to offer their opinions 'therein to this committee; and that it be eſpecially 'commended to the Lord Commiſſioner Whitelocke 'to take care of this buſineſs.——'This committee' (adds Mr Whitelock) 'often met at my houſe, and 'had the moſt learned men in the oriental tongues to 'conſult with in this great buſineſs, and divers ex'cellent and learned obſervations of ſome miſtakes 'in the Tranſlations of the Bible in Engliſh; which 'yet was agreed to be the beſt tranſlation in the world; 'I took pains in it, but it became fruitleſs by the par'liament's diſſolution.' (11)

[H] *For J. Owen publiſhed Conſiderations againſt it.*] The title of this piece of Dr Owen, was, 'Conſidera'tions on the *Prolegomena*, and Appendix of the late '*Biblia Polyglotta*.' And it was annexed to theſe two tracts of his, 1. 'Of the divine Original, Authority, 'ſelf-evidencing Light and Power of the Scripture, '&c.' 2. 'Vindication of the Integrity and Purity 'of the Hebrew and Greek Text of the Scripture.' Oxford 1659. 8vo. (12)——— Dr Owen aſſigns the follow-our author, in a book intituled, The Conſiderator conſidered [*I*]. Soon after the reſtoration of King Charles II. namely Auguſt 12, 1660, he was incorporated Doctor in Divinity

following cauſe or motive for publiſhing his Conſiderations, viz. That he had ‘ written a treatiſe of the ‘ divine Original of the Scriptures, their authority ‘ and ſelf-evidencing light, and of the Providence of ‘ God in their preſervation, which being ready for ‘ the preſſe, the *Prolegomena* and *Appendix* came to his ‘ hands, wherein the great bulk of various readings, ‘ and ſome opinions maintained in the *Prolegomena*, ‘ did in his apprehenſion much weaken the arguments ‘ by him inſiſted upon in that treatiſe, and therefore ‘ a neceſſity was incumbent upon him, either to deſiſt ‘ from publiſhing it, or elſe of giving an accompt of ‘ theſe things in the *Prolegomena* and *Appendix*, which ‘ tended to the diſadvantage of that great truth which ‘ he had pleaded for (13).’ The two main faults he finds with the Polyglot Bible, and the *Prolegomena*, are, 1. The *Various Readings* therein mentioned, and ſet down; which, according to him, imply, That the original texts, or copies of ſcripture are corrupted, yea have groſs corruptions in them: and this voluminous bulk of various lections, as nakedly exhibited, ſeems ſufficient to beget ſcruples and doubts about the preſervation of the Scripture by the care and providence of God; ſo that they are no ground for faith to reſt upon. 2. The learned editor, Dr. Walton's, embracing the opinion of Cappell, and others, That the Hebrew Points are not coæval with the text or language itſelf, and affixed either by Moſes or Ezra; but were invented by the Maſorites about five or ſix hundred years after Chriſt (14). . . . Theſe two points Dr Owen repreſents as a plot, or deſign, among Proteſtants, after they are come out of Rome. And in ſeveral places drops theſe odious inſinuations. ‘ The ‘ leproſie of Papiſts, crying down the original texts is ‘ broken forth among Proteſtants, with what deſign, ‘ to what end or purpoſe he knows not; God knows, ‘ and the day will manifeſt. That this deſign is owned ‘ in the *Prolegomena* to the Bible, and in the *Appendix*; ‘ That they print the original and defame it, gathering up tranſlations of all ſorts, and ſetting them up ‘ in competition with it. That they take away all ‘ certainty in and about all ſacred truth. That there ‘ is nothing left unto men, but to chooſe whether they ‘ will turn Papiſts or Atheiſts. That there are groſs ‘ corruptions befallen the originalls, which by the help ‘ of old tranſlations, and by conjectures may be found ‘ out and corrected: as pernitious a principle as ever ‘ was fixed upon ſince the foundation of the Church ‘ of Chriſt. That it is the foundation of Mahumetaniſme, the chiefeſt and principall prop of Popery, ‘ the only pretenſe of phanaticall Antiſcripturiſts, and ‘ the root of much hidden Atheiſme in the world; ‘ enough to frighten unſtable ſouls into the arms of an ‘ infallible guide. That theſe various tranſlations, as ‘ upon triall they will be found to be, are ſuch, as ‘ many will be ready to queſtion the foundation of all; ‘ and therefore he had rather all tranſlations ſhould ‘ be conſumed out of the earth, than ſuch a figment ‘ ſhould be admitted.'—— All this he unfairly repreſents as a ‘ dreadfull diſtemper, which may well ‘ prove mortall to the truth of the Scripture;’ as a ‘ horrible and outragious violence offered to the ſacred verity;’ and as ‘ mens taking upon them to ‘ correct the Scripture, the word of God (15).’ . . . . . Mr Arnold Boate found alſo great fault with this edition of the Polyglot Bible, as appears by theſe extracts from two Letters of his.

He thought it ‘ very ſuperfluous to give the Perſian Pentateuch, as being tranſlated not out of the ‘ original, but out of the Chaldee and the Hebrew Samaritan; whereof it were ſufficient to give the diſcrepancies from our Hebrew Pentateuch.—And the ‘ Syriack and Arabick being that which chiefly muſt ‘ make that edition to be conſiderable (for every body hath the Hebrew, and the Vulgar Latin, and ‘ moſt men the Greek and the Chaldee) they ought ‘ to give us thoſe two texts as authentical as may be; ‘ whereas if they take them only out of the Paris-Bible, they will not be worth a ruſh, Gabriel Sionita having interpolated them in innumerable places, and ſo utterly ſpoiled the authenticalneſs of ‘ them; there beſides, the Hebrew character is a very ‘ ſcurvy one, and ſuch as will greatly diſgrace the ‘ work.’ . . . . .

He likewiſe expreſſes his ſurprize at ‘ that honourable and moſt notoriouſly falſe character they give ‘ to that adulterine Samaritan Pentateuch, the Morinian and Capellian, calling of the true Hebrew text ‘ by the name of Modern; and at their making ſo ‘ great an account of *Critica Capelli*; and of the *Variæ Lectiones* to be collected out of the ſame; whereas of *Veræ Variæ Lectiones*, there is not one to be ‘ found there, but what he hath borrowed from others, ‘ being vulgarly known (16).’

In another letter he ſays. ‘ I would think it much ‘ more commendable, and of much more utility for ‘ the public, and for themſelves too (in regard of the ‘ ready venting of the impreſſion) to print nothing ‘ elſe but the Syriac, Chaldee, Arabick, Ethiopick, ‘ and the Pentateuch in the Samaritan language, with ‘ the Latin tranſlations. And that edition too will ‘ not be worth a ruſh, if it be not done with the ſelf ‘ ſame exactneſs as the Biblia Regia was; whereas ‘ thoſe of Le Jay are baſely defaced with innumerable faults, and therefore fit for nothing but to be ‘ burnt (17).

[*I*] *Which were refuted by our Author*, &c.] He intituled his book, ‘ The Conſiderator conſidered: or, ‘ A brief View of certain Conſiderations upon the *Biblia Polyglotta*, the *Prolegomena* and Appendix thereof. Wherein, amongſt other things, the certainty, ‘ integrity, and Divine Authority of the Original ‘ Texts, is defended, againſt the Conſequences of ‘ Atheiſts, Papiſts, Antiſcripturiſts, &c. inferred from ‘ the Various Readings, and Novelty of the Hebrew ‘ Points, by the Author of the ſaid Conſiderations. ‘ The *Biblia Polyglotta*, and Tranſlations therein exhibited, with the various Readings, *Prolegomena*, and ‘ Appendix, vindicated from his Aſperſions and Calumnies. And the queſtions about the punctation ‘ of the Hebrew Text, the various Readings, and ‘ the ancient Hebrew Character briefly handled.’ London 1659. 8vo. In the beginning he obſerves, that, ‘ Whereas he had laboured to aſſert the *purity*, ‘ *integrity*, and *ſupream authority* of the *Originall Texts*, ‘ againſt thoſe of Rome on the one ſide, rejecting ‘ ſome *Jewiſh* opinions, unwarily ſwallowed by ſome ‘ amongſt ourſelves on the other, he had incurred the ‘ diſpleaſure of both; the one complaining that too ‘ much is aſcribed to the *Originall Texts*, the other, ‘ too little: which is a good argument that he hath ‘ kept cloſe to the truth, from which thoſe that do *extrema ſectari* [run into extremes] do uſually ſwerve ‘ (18).’ Then, after taking notice of the diſingenuous means uſed by his adverſary, to prejudice the world againſt that great and good work (19), he ſhews, That the *Various Readings* are no proof of groſſe corruptions having befallen the Originals of the Bible, or any impeachment of the care and providence of God in the preſervation of the holy Scriptures, as the other had invidiouſly ſuggeſted (20). But he repeats, as his ſettled opinion, what he had more fully made out in his Prolegomena, namely, ‘ 1. That the Hebrew ‘ Text is not corrupted by the Jews, either before or ‘ after Chriſt. 2. That neither the Hebrew nor Greek ‘ Texts of the Old and New Teſtament are corrupted ‘ by Hereticks or others, but that they remain pure ‘ and entire, and that they always were, and ſtill are, ‘ the authentick rule in all matters of faith and religion, and that by them all tranſlations are to be ‘ tried and examined. 3. That though by the negligence or inadvertency of Tranſcribers ſome caſual miſtakes or involuntary errors may creep into ‘ the text, from whence various readings have riſen ‘ both in the Old and New Teſtament, yet the original text remains pure and authentick, becauſe thoſe ‘ varieties are not in matters of any moment, whereby ‘ any point of faith or ſalvation is prejudiced in the ‘ leaſt, nor are there means wanting, whereby ſuch ‘ errors may be amended, and the true reading eſtabliſhed (21). That there have been caſual miſtakes ‘ by tranſcribers in matters of no concernment, or ‘ that there are various Readings in the Hebrew and ‘ Greek Texts,’ he ſhews to have been the opinion of Abp. Uſher, J. Buxtorf, and other the greateſt *Patrons* of the Hebrew Text (22).— And then as to the *Multitude*, or great Bulk of various readings, collected in the laſt volume of the Polyglot, which Owen was greatly offended at, our learned Author ſays, that ‘ whereas the whole volume conſiſts of above two ‘ hundred vinity at Oxford: two days after, he was collated by the Biſhop of London to the prebend of Wenlakeſbarn, in the church of St Paul, London (*q*). And having preſented his Polyglot Bible to his Majeſty, it was ſo well accepted, that he was not only made Chaplain in ordinary to the King; but alſo, for his great virtues, learning, loyalty, ſufferings, and indefatigable induſtry for the public benefit of the world, nominated Biſhop of Cheſter, and conſecrated in Weſtminſter-abbey, December 2, 1660 (*r*). In 1661, he was one of the commiſſioners at the Savoy-conference, and attended once or twice (*s*) [*K*]. The 3d of September he ſet out from London, to go and viſit his cathedral church and city; and on the way was met by great numbers of people of the beſt faſhion, who received him with great civilities and applauſe (*t*) [*L*]. But, how ſhort are all human enjoyments! after he had continued ſome time at Cheſter, returning to London, he fell ſick, and died the 29th of November at his houſe in Alderſgate-ſtreet. The 5th of December following he was buried on the ſouth ſide of the cathedral church of St Paul; and ſoon after, a noble monument was put over his grave, with a large inſcription (*u*) [*M*]. Beſides the

‘ hundred ſheets, there are not above two ſheets of the *Hebrew various Readings*, viz. only the Keri and Ketib, with thoſe of Ben Aſcher and Ben Naphtali; the Oriental and Occidental Jews (which are in divers other editions of the Hebrew Bibles) reckoning in alſo the Annotations about the Keri and Ketib, yea, the bare readings themſelves might be reduced into almoſt one ſheet. And as for thoſe of the *New Teſtament*, gathered out of above fourty old Greek MSS. they are all contained in *nine Sheets*, of which the very names of ſo many MSS. ſo often repeated upon neceſſity upon every difference, with the preſent reading of the text, and the noting down the chapter and verſe at every various reading, takes up the moſt of thoſe ſheets; ſo that I durſt undertake (ſays he) that all theſe differences noted out of thoſe MSS. if they were printed by themſelves, (without any thing elſe added) might be reduced into *one* or *two ſheets*, ſo that here this great voluminous bulk is ſhrunk from two hundred ſheets, to two or three.’ (23)

As to the other capital fault, alledged by Dr Owen againſt the learned editor of the Polyglot Bible, namely, his believing that the *Hebrew Points* were not of the ſame antiquity as the original Text, but deviſed and fixed by the Maſorites about five hundred years after Chriſt; Dr Walton obſerves, that by the outcry made againſt that opinion by his adverſary, ‘ one would think the *Prolegomena* had delivered ſome ſtrange and dangerous opinion, never heard of before, which overthrows all *Certainty*, and by conſequence all *Authority* of Scripture, whereas it is there proved [and he makes it appear] that the ſame doctrine of the *Originall of Points* was delivered by the greateſt reformers, the moſt *eminent Proteſtant Divines*, both at the beginning of the Reformation, and ſince, and the beſt ſkilled in the Eaſtern learning, and the greateſt patrons of the integrity of the Hebrew text, That as the ſame is by the *Prolegomena* maintained, there is no prejudice at all ariſing to the certainty of the Hebrew text. For we neither affirm (ſaith he) that the *vowels* and *accents* were invented by the Maſorites, but that the Hebrew tongue did always conſiſt of *vowels* and *conſonants*. *Aleph*, *Vau*, and *Jod* were the vowels before the points were invented, as they were alſo in the Syriack, Arabick, and other Eaſtern tongues: nor that theſe points which are now uſed for vowels and accents, were the arbitrary invention of the Maſorites, but that they pointed the text according to the true and received reading, and not as they pleaſed; nor that it is lawful for any to reject their reading at pleaſure, but that all are tyed to it, unleſſe ſome error, or better reading can be clearly proved; nor that the authority of the reading depends upon the Maſorites, but that they pointed it according to the received reading, which expreſſed the true ſence of the Holy Ghoſt (24).’ And in this opinion, he proceeds to ſhew, he had the concurrent judgment of the learnedſt Proteſtant Divines, and ableſt Linguiſts, namely, Luther, Zuinglius, Brentius, Pellican, Oecolampadius, Calvin, Beza, Muſculus, Paulus Fagius, Mercer, Cameron, Chamier, Piſcator, Scaliger, Caſaubon, De Dieu, Erpenius, Sixtinus Amama, Grotius, Jac. and Ludov. Capellus, Druſius, Schindler, Martinius, Salmaſius, Schickard, Rivet, Spanhemius, Feſt. Hommius, Mayer, Bootius; and, amongſt ourſelves. Archbiſhop Uſher, Biſhop Prideaux, Mr Selden, Mr Mede, Mr Eyre, and innumerable others. (25)

[*K*] *And attended once or twice.*] At one of thoſe meetings, when R. Baxter alledged, that he ‘ had been in judgment for caſting out the utterly inſufficient and notoriouſly ſcandalous, indifferently, of what opinion or ſide ſoever; but had publickly written againſt the ſilencing or diſplacing any worthy man for being againſt the Parliament:’ Biſhop Walton ſaid, upon that, “ Indeed, Mr Baxter did write againſt the caſting of us out. But, Mr Baxter, did not you ſay, That if our churches had no more than bare liberty, as others had, without the compulſion of the ſword, none but drunkards would join in them?” R. Baxter anſwered, ‘ No, my Lord, I did not. I only ſaid, That as they had been ordered, if they had but equal liberty for volunteers, they would be like ale-houſes, where many honeſt men may come, but the number of worſe comers is ſo great, as maketh it diſhonourable (26).’

(26) Life of R. Baxter, written by himſelf.

[*L*] *Who received him with great civilities and applauſe.*] The 7th of September, when he came within ſix miles of Litchfield, ſome perſons of very good worth met him, who came purpoſely from Cheſter, above 50 miles.—— The 9th between Litchfield and Stone, he was met by more perſons of quality, who alſo came from Cheſter: and, the next day, almoſt all the gentry of the whole county, and the militia both of the county and city went out to meet him. Five troops of horſe met him at Nantwich the 10th at night: and, the next day, the clergy came alſo to him on the road. The militia of the city received him at the confines of their liberties with much gladneſs, and, with many of the aldermen, conducted him into the town, which he had no ſooner entered, but many thouſands of the people, bleſſing God for ſo happy a ſight, made many and loud acclamations (27).

(27) Publick Intelligence, No. 38, and Wood, Faſti, as above.

[*M*] *With a large inſcription.*] It begins thus (28):

“ Manet heic noviſſimam reſuſcitantis angeli tubam,
“ BRIANVS WALTONVS, olim Ceſtrienſis
“ Epiſcopus.

“ Epitaphium aliud ne quæras, Viator, cui
“ Datum eſt vel ipſum nomen Epitaphium,
“ Quod ſi explicatius velis,
“ Famam conſule, non tumulum,” &c.

(28) It is very incorrectly printed in the General Dictionary, in Dr Browne Willis, and elſewhere.

i. e. Here awaiteth the laſt trump of the angel, at the reſurrection, Brian Walton, late Biſhop of Cheſter. Reader, look for no other Epitaph on him, whoſe very name is a ſufficient Epitaph. If you would have a larger one, conſult his Fame, not this marble. Nevertheleſs (if you can be ignorant of it) let me inform you, This was that excellent Doctor, who, with the firſt, brought aſſiſtance to this Church, groaning under the late Tyranny: He took off the ſcandalous aſperſions caſt upon the Clergy, whilſt they were trampled upon by the rebellious and profane rabble: He brought Honor to the Reformed Religion profeſſed among us; when, with uncommon application and fortitude (notwithſtanding all helliſh oppoſition) he carried on, and publiſhed the fine edition of the Polyglot Bible. So that the Old and New Teſtament are his own monument, which he erected at a great expence. *He* therefore little needs the pride of a long pageantry of Titles, whoſe name is already written in the Book of Life. He died on the eve of St Andrew, in the 62d year of his age, the firſt of his conſecration, and of our Lord 1661.

Polyglot Bible, and Conſiderator conſidered, he publiſhed a few other pieces [*N*], of which an account is given below. He was twice married [*O*].

[*N*] *He publiſhed a few other pieces.*] I find only theſe two mentioned any where; 1. Anſwer to an ungodly Pamphlet, in defence of the Church of England, &c. written at Oxford (29). 2. *Introductio ad Lectionem Linguarum Orientalium.* An Introduction to the reading of the Oriental Languages. Lond. 1655, 8vo.

(29) Publick Intelligence, and Biſhop Kennett's Regiſter, p. 323.

[*O*] *He was twice married.*] His firſt wife was Anne, of the Claxton family of Suffolk. She dyed 25 May 1640, aged 43, and was buried in the chancel of Sandon church, where a handſome monument is erected to her memory (30). His ſecond wife was ———, daughter of Dr William Fuller, Vicar of St Giles's Cripplegate, London.

(30) Hiſtory of Eſſex, in Chelmsford Hundred, p. 27.

WARD [Seth], a learned Philoſopher and Mathematician, ſucceſſively Biſhop of Exeter and Saliſbury, in the laſt century, was the ſecond ſon of Mr John Ward, attorney at law, of Buntingford in Hertfordſhire [*A*]; a man of good reputation for his fair practice, but not rich. His mother's maiden name was Martha Dalton (*a*). He was baptized there the 15th of April 1617 (*b*) [*B*]. His father taught him common arithmetic, and the reſt of his education he received at Buntingford-ſchool; having at the ſame time the advantage of his mother's inſtructions, who appears to have been a very accompliſhed woman. When fit for the univerſity, in 1632, he was ſent to Sidney college in Cambridge; the maſter of which, Dr Samuel Ward, being pleaſed with his ingenuity and induſtry, and the ſweetneſs of his temper, ſoon made him a Scholar of that houſe (*c*): and ſome time after he was choſen Fellow. His genius naturally inclining him to the mathematics, he cloſely applied himſelf, among other parts of learning, to that ſtudy, which requires a clear head, and unwearied attention; in both which he was extremely happy. Very few helps he could then find in the univerſity to forward him in thoſe ſciences, except his own diligence, and a lucky acquaintance he happened to contract with ſome bright young ſtudents, particularly with Mr Charles Scarborough (*d*) [*C*]. When he kept his act for his Bachelor of Arts degree, he did not fetch his queſtions from the old Ariſtotelian Philoſophy, but they treated of the old and new ſtyle, or of the Julian and Gregorian account of the year (*e*). After the breaking out of the civil wars, Mr Ward felt, among many others in the univerſity, the direful effects of them: And his friend and patron Dr Samuel Ward being impriſoned in St John's college, he attended him there voluntarily; as he did afterwards on his death-bed, and till the time of his deceaſe, which happened September 7, 1643 (*f*). In the Spring following, he refuſed to take the Covenant, and other oaths tendered to him; and joined with Mr Peter Gunning, Iſaac Barrow, afterwards Biſhop of St Aſaph, John Barwick, and others, in drawing up a well-written treatiſe againſt the Covenant [*D*], which was then publiſhed. Neglecting, upon ſummons, to take the Covenant, he was deprived of his Fellowſhip in Auguſt 1644. His ſupport thus failing him in Cambridge, he ſpent ſome time with Dr Samuel Ward's relations in and about London, and with Mr Oughtred at Albury, where he continued to improve himſelf in the mathematics. Invitations he received from the Earl of Carliſle, and other perſons of quality, with offers of large and honorable penſions, to come and reſide in their families; but he preferred that of his friend and countryman Ralph Freeman, of Aſpenden-hall, Eſq; (*g*) whoſe ſons he inſtructed, and reſided there moſtly till the year 1649. Then he went and was Chaplain to Thomas Lord Wenman, of Tame-park in Oxfordſhire (*h*). About that time, the learned John Greaves, Savilian Profeſſor of Aſtronomy (*i*), being turned out of this office, went to London, to adviſe with ſome of his friends, particularly with Dr Scarborough, how he could procure an able and worthy perſon to ſucceed him in his Profeſſorſhip. They recommended Mr Ward to him; who, through Sir John Trevor's intereſt, was admitted (*k*). But he was ſoon after forced to take the engagement [*E*]. At his coming to Oxford, he entered himſelf a gentleman-commoner in Wadham-college, for the ſake of the excellent Dr John Wilkins, then Warden of that houſe;

(*k*) Pope, p. 18—21.

[*A*] *Was the ſecond ſon of Mr John Ward, attorney at law, of Buntingford.*] Our Biſhop's grandfather lived near Ipſwich in Suffolk, and had the misfortune to loſe a conſiderable hereditary eſtate; though we are not told how. Whereupon John, the Biſhop's father, ſettled himſelf at Buntingford, where he was buried January 17, 1655, and his wife March 7, 1645 (1). Dr Pope ſays, he never heard the Biſhop ſpeak of his father; but he often heard him commend his mother extraordinarily, for her virtue, piety, and wiſdom, to whoſe good inſtructions and counſels, he uſed to ſay, he owed whatever was good in him. They had three ſons; John, who died a bachelor; *Seth*; and Clement, who left three ſons, and ſeveral daughters, which were provided for, afterwards, by the Biſhop (2).

[*B*] *He was baptized the 15th of April* 1617.] Dr Pope ſays, he was born in 1618 (3). But the account, as above, from A. Wood, is more agreeable to truth, as well as to his Epitaph, wherein it is ſaid, that he was at the time of his death, January 6, 1688-9, in the 72d year of his age: *Anno ætatis* LXXII. See alſo Sir Henry Chauncy, as above.

houſe; and, October 23, 1649, was incorporated Maſter of Arts in this univerſity (*l*). His firſt care was to procure Mr Greaves the full arrears of his ſalary, amounting to five hundred pounds; for the lands allotted for the payment of the Savilian Profeſſors lying chiefly in Kent, the rents of them had been ſeized and detained by the Parliamentarians. Next, he took ſome pains to bring the Aſtronomy-Lectures into reputation, which had been for a conſiderable time diſuſed, and entirely neglected (*m*) [*F*]. May 31, 1654, he proceeded Doctor in Divinity, with the learned John Wallis, Savilian Profeſſor of Geometry (*n*). In 1656 Dr Ward was collated by Biſhop Brounrig, whoſe Chaplain he was, to the Precentorſhip of Exeter [*G*]. He could indeed have no preſent enjoyment of it, but he was inſtalled September 15, 1660, after the Reſtoration (*o*), and it proved a very advantageous preferment to him (*p*). He was one of thoſe learned Philoſophers, that had their ſtated meetings at the apartments of Dr Wilkins in Wadham college; which meetings gave afterwards riſe to the Royal Society: And of this Dr Ward was nominated Fellow in 1661; as he was ſeveral years the Second Preſident of the ſame (*q*) [*H*]. In 1657, upon Michael Roberts's reſignation, he was elected Principal of Jeſus college, by the direction of Dr Francis Manſell, the former Head of that houſe, ejected in 1648; but Oliver Cromwell put in one Fr. Howell, with a promiſe however of 80*l.* a year to Dr Ward, which was never paid. Sept. 14, 1659, he was more ſucceſsfully choſen Preſident of Trinity college, and enjoyed it till Auguſt 1660, when he was forced to make room for the legal owner, Dr Hannibal Potter, who had been unjuſtly diſpoſſeſſed in 1647 (*r*). Dr Ward loſing this, and reſigning his Savilian Profeſſor's place about the ſame time, was preſented by K. Charles II. to the Vicarage of St Laurence-Jewry in London, to which he was admitted January 19, 1660-1 (*s*). The 26th of December following, he was elected Dean of Exeter (*t*) [*I*]. For he now had the art of making a merit of his former ſufferings, and of his ejection from the univerſity of Cambridge (*u*): And, by his genteel behaviour, he ſo ingratiated himſelf with the gentry of Devonſhire, many of them members of the Houſe of Commons, and with George Monk Duke of Albemarle, the Earl of Clarendon [*K*], and others, that they procured for him the Biſhopric of Exeter (*w*). He was elected July 8, 1662, confirmed the 19th, and conſecrated the next day (*x*). Immediately he ſet about repairing the Epiſcopal palace; augmented the poor Vicarages; encreaſed the Prebends, from four to twenty pounds a year; procured the Deanry of Burien to be annexed to the Biſhopric of Exeter: and by theſe acts of munificence, with many inſtances of his capacity for buſineſs, became the moſt conſiderable man on the Biſhops bench (*y*). In

the Committee for the Reformation of the Univerſity, and as the Clerk belonging to that Committee informed Mr Ant. Wood and others.—— Biſhop Burnet alſo ſays, that ' he complied during the late times, ' and held in by taking the Covenant (8).' However, this compliance of Mr Ward was common to him with many other great and worthy men, his contemporaries. And he was, as Dr Richardſon obſerves (9), *temporibus ſervire doctus, ſuique memor.*

[*F*] *Which had been for a conſiderable time diſuſed, and entirely neglected.*] Mr Ward read his Lecture very conſtantly, and that being known, he never failed of a good auditory. He told Dr Pope, that in all the time he enjoyed the Aſtronomy Profeſſor's place, he never miſſed one reading day. Beſides this, he taught the Mathematics *gratis* to as many of the univerſity, or foreigners, as deſired that favour of him.—And he preached frequently, though he was not obliged to it; for Sir Henry Savile had exempted his Profeſſors from all univerſity exerciſes, that they might have the more leiſure to mind the employment he deſigned them for. (10)

[*G*] *In 1656 Dr Ward was collated by Biſhop Brounrig, whoſe Chaplain he was, to the Precentorſhip of Exeter.*] The Biſhop having been deprived of his Biſhopric in the beginning of the troubles, reſided moſtly at Sunning in Berkſhire (11), where Mr Ward uſed frequently to wait upon him. On the former Præcentor's death, the Biſhop ſent for Dr Ward, and collated him to that office, telling him at the ſame time, ' That he was confident the King would be ' reſtored, and you may live, ſaid he, to ſee that ' happy day, though I believe I ſhall not; and then ' this, which ſeems now δῶρον ἄδορον [a gift, and no ' gift] may be of ſome emolument to you.' It fell out as the Biſhop foretold; for he died in the dawn of the Reſtoration, and Dr Ward lived to enjoy this benefice, which was worth to him ſeveral thouſand pounds.—This was the firſt fair flower that ever grew in his garden, and the foundation of his future riches and preferment (12).—With his Precentorſhip he was alſo inſtalled to a Canonry and Prebend (13).

[*H*] *As he was ſeveral years the Second Preſident of the ſame.*] He gave the Royal Society, in memory of his friend the learned Laurence Rooke, a large pendulum-clock, made by Fromantel, and then eſteemed a great rarity; on which is engraved the following inſcription. ' Societati Regali ad Scientiam Naturalem promovendam inſtitutæ dono dedit Reverendus ' in Chriſto Pater Sethus Epiſcopus Exon' ejuſdem ' Societatis ſodalis, in memoriam Laurentii Rooke ' viri in omni literarum genere inſtructiſſimi, Collegii ' Greſhamenſis primum Aſtronomiæ deinde Geometriæ Profeſſoris dictæque Societatis nuper ſodalis, qui ' obiit Junii 26. Anno Dom. 1662.'

[*I*] *He was elected Dean of Exeter.*] At his entering on this office, he found, that a partition had been drawn acroſs the cathedral; which by that traverſe was divided between the Preſbyterians and Independents, for their reſpective uſes. And ſuch was their confidence, that they petitioned the King, after the Reſtoration, to have that partition ſtand, and to enjoy half the church; being content, that the other part ſhould be allowed for the uſe of the epiſcopal party. But their deſign was prevented, by the Dean's early application to the King and Council, from whom he procured an order to reſtore the church to its ancient form, and remove the innovations. Accordingly, he cauſed the partition to be pulled down, and repaired and beautified the Cathedral, at the expence of twenty-five thouſand pounds. He alſo bought a new Organ, which coſt two thouſand pounds. All this was not indeed paid out of the Dean's private purſe, but from the fines which came in, upon renewing the Leaſes of this Church's revenues (14).

[*K*] *The Earl of Clarendon,* &c.] Biſhop Burnet informs us upon this occaſion (15), that Biſhop Ward, on account of his having complied with the late times, and taken the Covenant, ' was hated by the high men ' as a time-ſerver. But the Lord Clarendon ſaw, that ' moſt of the Biſhops were men of merit by their ſufferings, but of no great capacity for buſineſs. He ' brought Ward in, as a man fit to govern the Church: ' for Ward, to get his former errors to be forgot, ' went into the high notions of conformity.'

Dr Pope relates the following ſtory, which having relation to Dr Ward's being made Biſhop, we ſhall ſet down here.—He uſed to viſit a Lady near Oxford,

who

1667 he was tranſlated to the Biſhopric of Saliſbury, being elected the 5th, and confirmed the 12th of September (*z*). He was very acceptable to the chief perſons in that dioceſe, and obtained great reſpect and eſteem by his extenſive charity, and cheerful hoſpitality. As he had done at Exeter, he cauſed here the Cathedral, and his own palace, to be thoroughly repaired; the latter at the expence of above two thouſand pounds. And contributed largely towards making the river Avon navigable to Saliſbury, not only with his money, but advice, and intereſt, and his application to thoſe in power. To his own ſee he was a great benefactor, by cauſing the honorable office of Chancellor of the Order of the Garter to be reſtored and annexed to it for ever, after it had been withheld from his predeceſſors a hundred and thirty two years (*aa*) [*L*]. But the nobleſt monument of his beneficence, was the College of Matrons in Saliſbury [*M*], founded by him in 1682, for the reception and maintenance of Ten Women, the widows of orthodox Miniſters of the Dioceſe of Saliſbury. Two years after, he erected a fair building at Buntingford [*N*], his native place, conſiſting of eight manſions, and each manſion of four rooms, two above ſtairs, and two below, for the reception and maintenance of four poor men, and four poor women, who had lived handſomely, and by misfortune were reduced to poverty: the allowance to each is ten pounds a year. He alſo augmented the ſtipend of the miniſter and of the ſchoolmaſter in that town. And gave ſix hundred pounds to be laid out in land, and the rent employed in putting out three poor children apprentices yearly out of Aſpenden and Layſton (*bb*) [*O*]. To place his other public benefactions together; he founded four ſcholarſhips, of 12l. a year each, in Chriſt's College in Cambridge, for ſcholars from Buntingford-ſchool; but through a flaw in the purchaſe, they are deficient. And, in 1679, he gave a thouſand pounds to Sidney College in the ſame univerſity (*cc*) [*P*]. He alſo gave two hundred and ſixty pounds towards the rebuilding St Paul's cathedral. In order to qualify himſelf the better for diſcharging the office of a biſhop, he took a kind of ſurvey of his reſpective dioceſes at his firſt entering upon them; with the names and qualifications of the clergy under his government [*Q*]. And he took great care to ſettle able miniſters in the great market and borough-

who was afterwards married to a peer of this realm. This lady once drolling with him, uſed theſe words. 'Dr Ward, I am confident you believe the King will 'come in, and that you ſhall be a Biſhop.' 'Madam,' replied he, 'I think neither the one nor the other im'poſſible.' 'But I eſteem it ſo improbable,' ſaid ſhe, 'that if it happens in my life-time, I promiſe 'before theſe witneſſes, to preſent you with a pair of 'lawn-ſleeves of my own handy-work, which would 'be no ſmall mortification to one of our perſuaſion,' ſaid ſhe laughing, for ſhe was a Preſbyterian. Dr Ward returned her his humble thanks, adding, 'If 'there ſhould be an occaſion, he would give her La'dyſhip timely notice.'—— And he was as good as his word, giving her advice of his nomination to the Biſhopric of Exeter. She alſo was no worſe than hers, preſenting him with the firſt lawn-ſleeves he ever wore (16).

(16) Pope, p. 32, 33.

[*L*] *The honourable office of Chancellor of the Order of the Garter.*] The firſt chancellor of the garter was biſhop Beauchamp, Anno Dom 1450. and that honour was enjoyed by his ſucceſſors the biſhops of Saliſbury, till the time of cardinal Campeggio, who having incurred the diſpleaſure of King Henry VIII. for differing from him in the matter of the divorce, retired to Rome, and dyed there A. D. 1539. Then had the biſhops of Saliſbury enjoyed that honour 89 years. Since which time it was in the hands of laymen, till it pleaſed King Charles II. upon the humble petition and claim of Dr Ward, to reſtore it to him and his ſucceſſors the biſhops of Saliſbury for ever, after the death of Sir Henry de Vic, the laſt lay chancellor, and after it had been out of the ſee one hundred and thirty two years. The letters-patent bear date November 25, 1671. (17)

(17) Pope, p. 78. 92.

[*M*] *The College of Matrons*, &c.] This college is a ſtrong regular building, within the cloſe of Saliſbury-cathedral. It is fitted for the reception of ten widows of orthodox miniſters of the dioceſe of Saliſbury: and in caſe there ſhould not be found ſo many therein, their vacancy is to be ſupplied out of the biſhopric of Exeter. They have each two rooms and a little garden peculiar to themſelves. For their maintenance the biſhop ſettled more than two hundred pounds in free land, which lies in the neighbourhood. During his life he put in the widows himſelf, and at his death he left a catalogue of the names of others whom he knew, or by the recommendation of others believed, to be fit objects of his charity, theſe were next in ſucceſſion; and afterwards the election was to be in the dean and chapter, and the biſhop of Saliſbury, by turns. Over the gate is this inſcription, in letters of gold:

D. O. M.
Collegium hoc Matronarum
Humillime Dedicavit
Sethus Epiſcopus Sarum
Anno Domini
MDCLXXXII.

i. e. To the Honour of Almighty God—This College of Matrons—Was moſt *humbly* dedicated—*By* Seth Biſhop of Saliſbury—*In the year of* our Lord 1682.

[*N*] *He erected a fair building at Buntingford.*] It ſtands near the chapel in that town. The beneficent founder conſtituted Ralph Freeman, Eſq; Sir William Fitch, Knight, Seth Ward, Chancellor of Saliſbury, William Freeman, Peter Soame, Charles Crowch, Thomas Stone, Eſqrs. and their heirs, Truſtees, to put in thoſe poor perſons from time to time, out of the pariſhes of Aſpenden and Layſton. On the front of the Hoſpital is this inſcription.

Anno Domini 1684.
This Hoſpital was erected and endowed
By Seth Ward, Doctor of Divinity,
Lord Biſhop of Saliſbury, and
Chancellor of the moſt noble Order
Of the Garter.
Who was born in this Town, within the
Pariſh of Aſpenden, and educated
In the free School of Buntingford. (18)

(18) Pope, p. 81, 82. and Chauncy, as above, p. 132.

[*O*] *And gave* 600l. *for putting out three poor children apprentices*.] This ſum he gave in his will; and directed, that two of the children ſhould be taken out of Aſpenden, and one out of Layſton, one year; and two out of Layſton, and one out of Aſpenden, another year; and ſo on, by turns (19).

(19) Chauncy, as above, p. 127.

[*P*] *Gave* 1000l. *to Sidney College.*] He once deſigned to have founded the four ſcholarſhips in this college; but, upon ſome diſguſt, altered his intention. (20)

(20) Pope, p. 82.

[*Q*] *With the names and qualifications of the Clergy under his government.*] At his firſt coming both to Exeter and Saliſbury, he drew up *Notitiæ* of thoſe dioceſes, wherein were particularized all the rectories and vicarages, the patrons names, with their undoubted and diſputable titles; as alſo the names of all the incumbents, with their ſeveral qualifications, as to conformity or non-conformity, learning or ignorance, peaceable or contentious converſation, orthodox or heretical opinion, good or ſcandalous lives; for all which he had framed particular marks. He found by

daily

borough-towns, ſuch as Abingdon, Reading, &c. and becauſe they are for the moſt part vicarages of ſmall value, as prebends in his church became void, he beſtowed them on the miniſters of theſe towns *(dd)*. A method worthily purſued by his ſucceſſor Biſhop Burnet, but which he was forced to relinquiſh, on account of ſome abuſes this good deſign was found liable to [*R*]. Though he was not of a perſecuting ſpirit, he uſed his endeavours to ſuppreſs conventicles [*S*], chiefly in obedience to orders he received from time to time from the court *(ee)*. Upon the death of Dr John Coſin, Biſhop of Durham, in 1672, Dr Ward was offered that rich biſhopric: but he declined it, becauſe he did not like the conditions *(ff)*. In the year 1660, he had a violent fever, which through miſmanagement brought him into a bad habit of body *(gg)*; which however he cured by conſtant exerciſe, eſpecially riding on horſeback, preſcribed to him by the learned Dr Sydenham. But he diſuſing it as he advanced in years, the conſequence was, a fatal decay not only in his body, but in his intellectual faculties. For, to the great mortification of all human ſufficiency and wiſdom, this great maſter of reaſon ſo entirely loſt the uſe of his underſtanding, as to become an object of compaſſion, an uneaſineſs to himſelf, and a burden to his friends and attendants *(hh)*. His infirmities were encreaſed by a vexatious conteſt he had in 1683, with the Dean of his church, Dr Thomas Pierce, becauſe he would not, or rather could not, give his ſon a prebend, which he had promiſed to another *(ii)* [*T*]. After ſome years dragged on in this helpleſs and melancholy ſtate, he departed this life January 6th, 1688-9, in the 72d year of his age. He was buried in his cathedral at Saliſbury, where a monument was erected to his memory [*U*] by his nephew Seth Ward, treaſurer of that church. He died unmarried. Of what works he publiſhed there is an account in the note [*W*]. Mr Oughtred gives him the character of a prudent

---

daily experience, that this ſtood him in great ſtead, and did him eminent ſervice. For when any clergyman of his dioceſe came to him, as ſoon as he heard his name, he knew his character, and could give a ſhrewd gueſs at his buſineſs, and ſo was out of danger of being ſurprized (22). J. Walker ſays, that he had ſeen a tranſcript of that for Exeter (23).

[*R*] *On account of ſome abuſes this good deſign was found liable to.*] The abuſes were, That when the clergy who were collated to thoſe prebends happened to get afterwards good preferment, and removed from thoſe towns, they would not reſign their prebends, as they had promiſed at their admiſſion. And the Biſhop could not legally oblige them to give bonds of reſignation, nor to quit thoſe prebends.

[*S*] *He uſed his endeavours to ſuppreſs Conventicles.*] ‘ But this ſo angered the diſſenters, (24) that in 1669, ‘ they forged a petition againſt him, under the hands ‘ of ſome chief clothiers, pretending that they were ‘ moleſted, and their trade ruined; and that ſome of ‘ them employed 1000 men, others 800, and that this ‘ perſecution took away the livelihood of 8000 men, ‘ women, and children. But it was made appear at ‘ the council-table, that this petition was a notorious ‘ libel, and that none of theſe there mentioned to be ‘ perſecuted and ruined, were ſo much as ſummoned ‘ into the eccleſiaſtical court; as alſo, that many whoſe ‘ names were ſubſcribed to that petition, knew nothing ‘ of it: So that inſtead of leſſening the biſhop's fa- ‘ vour with the King, they augmented it. Let this ‘ be ſaid once for all (adds Dr Pope) he was no vio- ‘ lent man, nor of a perſecuting ſpirit, as theſe peti- ‘ tioners repreſented him; but if at any time he was ‘ more active than ordinary againſt the diſſenters, it ‘ was by expreſs command from the court, ſometimes ‘ by letters, and ſometimes given in charges by the ‘ Judges of the Aſſizes, which councils altered fre- ‘ quently; now in favour of the diſſenters, and then ‘ again in oppoſition to them. 'Tis true, he was for ‘ the act againſt conventicles, and laboured much to ‘ get it to paſs, not without the order and direction of ‘ the greateſt authority, both civil and eccleſiaſtical, ‘ not out of enmity to the diſſenters perſons, as they ‘ unjuſtly ſuggeſted, but of love to the repoſe and ‘ welfare of the government; for he believed if the ‘ growth of them were not timely ſuppreſſed, it would ‘ either cauſe a neceſſity of a ſtanding army to preſerve ‘ the peace, or a general toleration.'— But the event hath ſhewn that he was miſtaken.—— Dr Pope informs us further, ‘ That, upon a proper execution of ‘ the Conventicle-act, there was not one conventicle ‘ left in Saliſbury, and but a few in the ſkirts of Wilt- ‘ ſhire, where the diſſenters met ſometimes in woods; ‘ but, upon complaint, their meetings were ſuppreſſed, ‘ and his Majeſty was pleaſed to own and accept this ‘ as good ſervice to the public, and to encourage the ‘ biſhop in it. But a little after, the weather-cock of ‘ the court-council turning to the contrary point, ‘ Bloud, that notorious villain, who had ſtolen the ‘ crown, and was now unaccountably become a great ‘ favourite at court, and the chief agent of the diſſent- ‘ ers, brought the biſhop of Saliſbury a verbal meſ- ‘ ſage from the King, not to moleſt the diſſenters, ‘ eſpecially two that were moſt particularly trouble- ‘ ſome (25).

[*T*] *Which he had promiſed to another.*] Upon this refuſal, Dr Pierce raiſed a controverſy, maintaining, that the diſpoſal of the dignities in the church of Saliſbury was in the King, and not in the biſhop. Which controverſy being laid before his Majeſty's commiſſioners for eccleſiaſtical promotions, they ordered Dr Pierce to write a narrative of that matter: which Biſhop Ward anſwered; and Pierce replied, in a ‘ Vin- ‘ dication of the King's ſovereign Right, &c.' printed at London in 1683, twelve ſheets fol. (26) This controverſy being carried on with great violence, it did ſo much diſcompoſe the poor old Biſhop, eſpecially by ſeveral journeys he was forced to take to London in unſeaſonable time and weather, that by degrees his ſpirits were exhauſted, his memory gone, and totally unfit for buſineſs. However in the end Dr Pierce was caſt, and forced to aſk the Biſhop's pardon (27).

[*U*] *Where a monument was erected to his memory.*] There is upon it a long epitaph in Latin, wherein what is ſaid of him by way of character, is, that he was remarkable for prudence, piety, knowledge of the world, and eſpecially for moderation—— an eloquent and powerful preacher; an unblameable example to his flock.——Ready to do good offices to all men, of whatſoever condition and degree; very obſervant of juſtice and decency——lived in inviolable union with his brethren the biſhops——and treated his clergy as brothers and beloved children——was munificent and liberal—But his chief care was that of the poor (28), to whom his charity was without bounds. . . . . ‘ Pru- ‘ dentia, pietate, uſu rerum, & præcipue moderato ‘ animo ſpectabilis . . . . concionator facundus & po- ‘ tens, inculpabile gregis exemplar——in officiis erga ‘ omnes, cujuſcunque ſortis & ordinis homines exe- ‘ quendis, æqui & decori obſervantiſſimus, &c. . . . . ‘ Sed præcipue & palmaria illi fuit Pauperum cura, in ‘ hac neque metas neque terminos aut vivens aut mo- ‘ riens pietati ſuæ præſcripſit.'

[*W*] *The works he publiſhed*, &c.] They were, I. Epiſtle ‘ to the Reader,' at the beginning of Thomas Hobbes's *Humane Nature*, ſigned F. B. being written in the name of Francis Bowman the bookſeller (29). II. ‘ A philoſophical Eſſay towards an eviction of the ‘ Being and Attributes of God, the Immortality of the ‘ Souls of Men, and the Truth and Authority of ‘ Scripture.' Oxford 1652, 8vo. III. A treatiſe of Comets. The title of which is, ‘ De Cometis, ubi de ‘ Cometarum natura diſſeritur. Nova Cometarum ‘ Theoria, & noviſſimæ Cometæ hiſtoria proponitur. ‘ Prælectio Oxonii habita, & Inquiſitio in Iſmaelis ‘ Bullialdi Aſtronomiæ philolaicæ fundamenta.' Ox-

He alſo publiſhed the following Sermons; 1. Againſt Reſiſtance of lawful Powers. Preached November 5, 1661, on Rom. xiii. 2.—2. Againſt the Antiſcripturiſts, preached Feb. 20. 16'9. on 2 Tim. iii. 16.—3. Concerning the Sinfulneſs, Danger, and Remedies of Infidelity, preached Feb. 16, 1667, on Heb. iii. 12. Lond. 1670. 8vo.—4. Sermon preached before the Peers, in the Abbey-church at Weſtminſter, October 10, 1666, [the faſt day for the fire of London] on Eccleſ. ii. 9. 4to.—5. Sermon concerning the ſtrangeneſs, frequency, and deſperate conſequence of Impenitency. Preached April 1, 1666, ſoon after the great plague, on Rev. ix. 20.—6. Sermon againſt Ingratitude, on Deut. xxxii. 6.—7. An Apology for the Myſteries of the Goſpel, preached Feb. 16. 1672. on Rom. i, 16. Some of which Sermons having been publiſhed ſingly at ſeveral times, they were all printed in one volume, in 1673 and 1674. London 8vo. and then ſaid to have been all preached at Whitehall, except the 4th.—8. The Chriſtian's Victory over Death, preached at the funeral of George [Monk] Duke of Albemarle, &c. in the Collegiate Church of St Peter's Weſtminſter, April 30, 1670, on 1 Cor. xv. 7. Lond. 1670. 4to.—9. The Caſe of Joram, preached before the Houſe of Peers, Jan. 30, 1673. on 2 Kings vi. laſt verſe. Lond. 1674. 4to.

He alſo collected and reviſed Dr Samuel Ward's Works, which he publiſhed under this title, ‘ Determinationes Theologicæ, Tractatus de Juſtificatione, ‘ & Prælectiones de Peccato Originali.’ Lond. (30)

[*X*] *What hath been ſaid further of him, by way of character.*] A. Wood repreſents him in an unfavourable light in the *Vindication* of himſelf *and his works* (31) *from the Reproaches of the Biſhop of Saliſbury, in his Letter to the Biſhop of Coventry and Litchfield*, referred to above.—— The words of A. Wood are, . . . ‘ The next matter that his Lordſhip of Saliſbury takes ‘ notice of, is, his [i. e. Wood's] barbarous attacking ‘ the memory of his predeceſſor Biſhop Ward, who was ‘ in ſo many reſpects one of the greateſt men of his ‘ age.

‘ Had his lordſhip known Dr Ward before his Majeſty's Reſtoration, he would have been of another mind; but his knowledge of him was not, I preſume, till after he was biſhop, when then, and to the time of his death, he was eſteemed a good and excellent man. The truth is, he was a man of parts, and a great Royaliſt for a time; but when he ſaw that King Charles the Firſt was beheaded, and monarchy never in a poſſibility of returning again, then did he change his orthodox principles, ſubmit to the men then in power, and eat the bread of two Royaliſts (32) (that had been ejected) ſucceſſively. And tho' his friends ſay, that he never took the oath called the Engagement, yet it appears that he did ſo, in the regiſter belonging to the Committee for the Reformation of the Univerſity of Oxon, as I was many years ſince informed by the clerk belonging to that committee. What his life and converſation was, while he lived in Oxon, the poor remnant of the Royaliſts that then remained there, would have told you, who uſually ſaid, ‘ That had not Dr Ward degenerated from his principles of loyalty, he would not have launched out into ‘ ſeveral immoralities, &c.’ for the doing of which he alſo loſt the opinion that the then ſaints in the Univerſity had of him.’

‘ Biſhop Ward [ſays Dr Thomas Wood (33)] *was a* ‘ noted mathematician and aſtronomer, a good divine, ‘ a profound reaſoner, of an affable, courtly, gentlemanlike temper, a publick ſpirit, and a good friend. ‘ But before he was advanced to the Epiſcopal See, he ‘ was ſuſpected to waver in his opinions about Government, and his good nature *formerly* betrayed him ‘ into ſome irregularities; inſomuch that I cannot ſee ‘ the neceſſity why he ſhould be ſet in the calendar ‘ for a Saint, or canonized. But for all that, to the ‘ honour of the Church of England, I wiſh all his ‘ ſucceſſors may deſerve as good a character, and have ‘ a better *hiſtorian*.’——— The hiſtorian he means in this laſt word, is Dr Walter Pope, upon whom he makes the following reflections. (34) . . . . ‘ Your narration is dreſt up in a comical and bantering ſtile, ‘ full of dry ſcraps of Latin, puns, proverbs, ſenſeleſs ‘ digreſſions, long tedious unedifying tales, and not ‘ without an inſipid * bawdy jeſt, and an impious † ‘ ridicule of the morality of the fourth commandment. ‘ ——You have borrowed your method, tranſitions, ‘ and the arguments of your chapters from the ridiculing Hiſtory of Don Quixote;’——as he ſhews in many inſtances.

His father took more than ordinary care of his education: and finding he anſwered his moſt hopeful expectations, by the great and early advances he made in learning, ſpared nothing for his encouragement. He cauſed him to be well grounded in the Latin and Greek languages; and when he found him fitly qualified for academical ſtudies, which was in 1610, and the 16th year of his age, he entered him a Fellow-Commoner of Trinity-college near Dublin; where he was put under the immediate tuition of Dr Antony Martin, then Fellow, afterwards Provoſt of the College, and Biſhop of Meath: but Dr Joſhua Hoyle, another of the Fellows, was his private Tutor and chamber-fellow. The college was then under the government of Mr William Temple, the Provoſt, knighted May 4, 1622. and grandfather of the late eminent Sir William Temple (b). Under a provoſt of ſuch worth, and tutors of ſuch abilities, a perſon of Mr Ware's talents could not fail of improving exceedingly; and the fruits thereof ſoon appeared, in that he was admitted to his Maſter of Arts degree before the uſual time. After having continued ſix years at the univerſity, he left it, and proſecuted his ſtudies at his father's houſe with the utmoſt diligence. Here he fell under the notice of Dr James Uſher, then Biſhop of Meath, who diſcovering in him a great propenſity to the ſtudy of Antiquities and Records, encouraged him to that ſort of learning, in which he ſo much delighted himſelf: and from that time a cloſe and intimate friendſhip remained between them. His father thinking it convenient he ſhould marry, procured him a match to both their ſatisfactions. It was Mary, the daughter of Jacob Newman of Dublin, Eſq; But this alteration in his condition did not take him off in the leaſt from his beloved ſtudies. He had begun to gather manuſcripts, and make collections from the libraries of Iriſh Antiquaries and genealogiſts, and from the regiſters and cartularies of cathedrals and monaſteries, in which he ſpared no expence. He had recourſe, when he pleaſed, to the choice collections made by Biſhop Uſher, as well as thoſe of Daniel Molyneux, Ulſter king at arms, a very curious perſon, between whom the ſimilitude of their ſtudies had cemented a ſtrict friendſhip. When he had gleaned all he could for his purpoſe at home, he reſolved to take a journey to England, not doubting but he ſhould reap a plentiful harveſt by conſulting the libraries both publick and private there. He arrived at London in the beginning of April 1626, where he had the ſatisfaction to find his dear friend Dr Uſher, then Archbiſhop of Armagh, who introduced him to the acquaintance of Sir Robert Cotton, and obtained for him a ready acceſs to his curious and valuable library. Sir Robert entertained him with much friendſhip, and kept up a conſtant correſpondence with him the five remaining years of his life. Having furniſhed himſelf with many materials from Sir Robert's vaſt treaſure, and from many other places, particularly from the Records in the Tower of London, great collections from all which places, in his own hand-writing, are now in Dublin College-library, he returned to Ireland, in company with the Primate of Armagh. In the latter end of the year 1628 he paſſed again into England, and carried with him ſome manuſcripts, which he knew would be acceptable to Sir Robert Cotton, particularly a fair cartulary formerly belonging to St Mary's Abbey near Dublin. In this journey he added conſiderably to his collections, and having been made acquainted with Mr Selden and other learned and curious men, he returned home about the end of the ſummer 1629. Soon after, he received the honour of Knighthood from the Lords Juſtices, Sir Adam Loftus, Lord Chancellor, and Richard Boyle, Earl of Cork, Lord Treaſurer (c) [*B*]. His father was ſtill living; ſo that there were two knights of the ſame name and ſurname reſiding together in one houſe at the ſame time, they always living together. In 1632 his father dying ſuddenly, he ſucceeded him both

(b) See the article TEMPLE [Sir WILLIAM]

(c) Harris, as above, p. 148. and Wood, Faſti, Vol. II. col. 42.

rally educated, and when he came to maturity, was ſent to puſh his fortune in the court of Queen Elizabeth, where he ſoon diſtinguiſhed himſelf in ſuch a manner, as to obtain the favour of the great men then at the head of affairs. In 1588 Sir William Fitz William being for the laſt time ſent over Lord Deputy of Ireland, James Ware found credit enough with that governor, to attend him as his Secretary, which was the firſt appearance of any of our author's family in Ireland. He had not been long in that employment before he was advanced, firſt to the office of Clerk of the Common-Pleas in the Exchequer, by patent dated 9th September 1595, as long as he behaved well, with a clauſe, that he ſhould not be removed for any default in his office, until the ſame was heard and approved before the government and council of Ireland, and by them tranſmitted for the conſideration of the Queen and council of England. He afterwards obtained a reverſionary patent for the office of Auditor-general, to commence on the death, forfeiture, or ſurrender of the then preſent officer, Chriſtopher Peyton, dated 28 July, 1602. This laſt was an employment of good reputation and conſiderable profit, which continued the beſt part of a century in his family, except for a ſhort interval during the uſurpation of Oliver Cromwell, and the ſeveral ſucceeding governments till the Reſtoration. The benefit and income of this office enabled him to make ſeveral conſiderable purchaſes in the county and city of Dublin, and elſewhere. In a journey to England, he was honoured with knighthood by King James I. who, as a mark of his favour, granted a reverſionary patent of his office of Auditor-general to his eldeſt ſon [our author] which he enjoyed after his father's deceaſe. He alſo ſerved as a member of the parliament aſſembled at Dublin on the 18th of May 1613, for the borough of Mallow, in the county of Cork. At length having lived a very ſtrict and truly religious life, he died ſuddenly, which was his conſtant wiſh for many years before, as he was walking home through Fiſhamble-ſtreet, to his houſe in Caſtle-ſtreet, in 1632. He married Mary, ſiſter of Sir Ambroſe Briden of Maidſtone in Kent, by which he had five ſons, and as many daughters. Of the daughters, Mary was married to Chriſtopher Conway, Eſq; Anne to Emanuel Downing, Eſq; Ruſſel to Humphrey Reynolds, Eſq; Martha to Sir William Piers; and Cæcilia to Sir Dudley Loftus. Of the ſons, three were married; but none of them left any iſſue-male behind them, but our author Sir James Ware (8).

[*B*] *And Richard Boyle Earl of Cork, Lord Treaſurer.*] This noble lord had a great friendſhip for him, and by his laſt will, 'as a teſtimony of his affection and 'love, bequeathed to his worthy friend Sir James 'Ware a gelding of his own breed.' (9)

(8) Harris, p. 145, 146.

(9) Harris, p. 148.

in his eſtate, and office of auditor-general [C]. Though he was now placed in a ſtation which interrupted his beloved ſtudies, yet he applied himſelf cloſely to public buſineſs; eſpecially after the arrival of the Lord Deputy Wentworth, afterwards Earl of Strafford, in 1633; who perceiving his great abilities, took him into his particular confidence, and conſulted him upon all occaſions. To make him more uſeful in the King's ſervice, he called him into the Privy Council; becauſe he took him to be a very honeſt and able officer (d). It was not the Lord Deputy only that placed great confidence in him, but the biſhops, and the whole body of the clergy held him in the higheſt eſteem, and made uſe of his advice in all things relating to their public concerns. And he was not wanting on his ſide to cultivate this good opinion conceived of him, not only by his ſervices to them upon all occaſions, but alſo in the affairs of his office of Auditor-general, by remitting the fees due therein to clergymen and clergymen's widows, which he never would receive. In 1639, he was choſen a member of the Houſe of Commons for the univerſity of Dublin, in the parliament of Ireland, which met the 16th of March, that year. From his attachment therein to the Lord Deputy, the Earl of Strafford, and his unſhaken loyalty to his Prince, proceeded the many hardſhips he endured in the enſuing troubleſome times; while others, who were more complying, ſat eaſy in their fortunes. The parliament having granted four ſubſidies, and paſſed other acts, was, April 1ſt, 1640. prorogued to the 1ſt of June following, and on the 16th of that month to the 1ſt of October. They met again, according to their Prorogation, but with a temper quite different from what they ſhewed in the former ſeſſion: for a high ferment was raiſed in both houſes againſt the Earl of Strafford. Our author exerted his utmoſt zeal in his defence upon all occaſions, and vigorouſly oppoſed the ſending a committee into England, to impeach him there. But nothing prevailing, the Lord Deputy Wandesford, by advice of our author, and other diſintereſted members of the privy council, prorogued the parliament to the 26th of January following. The temper of the Houſe of Commons was not quieted by this receſs. For having met again according to the prorogation, the violent party in the houſe, both Proteſtant and Papiſt, joined, on the 27th of February 1641, in an impeachment againſt Sir George Radcliffe, Sir Richard Bolton, Lord Chancellor, John Bramhall, Biſhop of Derry, and Sir Gerard Lowther, chief Juſtice of the Common-pleas. Our author oppoſed theſe meaſures with all his might. And the impeachment, having no juſt foundation, fell to the ground; it being indeed only deſigned to hinder the perſons impeached from being witneſſes on the Earl of Strafford's behalf (e). The execrable Iriſh Rebellion breaking out October 23, 1641, Sir James Ware did all the ſervice in his power upon that occaſion, by cloſely attending the buſineſs of the Council, and joining in all acts of ſtate againſt the rebels (f). He engaged alſo with others of the privy-council, in ſecurities for the repayment of conſiderable ſums advanced by the citizens of Dublin, for the ſupport of the Engliſh forces ſent to quell the Rebellion (g). The Marquis of Ormond, lieutenant-general of theſe forces, repoſed great truſt in Sir James, and adviſed with him in all caſes of moment and difficulty [D]. In 1642, King Charles I. wanting to bring thoſe troops back to England, in order to employ them againſt his revolted ſubjects at home (h) [E]; he determined to make a ceſſation for one year with the Iriſh Rebels. Whereupon the Marquis conſulting with a ſelect committee of the Council, in the number of which Sir James was, they unanimouſly agreed, That a ceſſation was neceſſary, to preſerve the kingdom to his Majeſty, and the Proteſtant intereſt there. In conſequence of which, the ceſſation was concluded September 15, 1643, with the approbation of this committee, and other great men and chief commanders then with the Marquis of Ormond (i). The news of this treaty was received with joy by King Charles and his court, then at Oxford; but the Parliament, apprized of its deſign, publiſhed, September 30, a ſevere Declaration againſt it, wherein they condemned it as being treated and carried on without their advice; as prejudicial to the Proteſtant religion; to the many poor exiled proteſtants, deprived of their eſtates; an encouragement to Popery, &c (k). In anſwer to which, the King publiſhed the grounds and motives of the ceſſation (l). Not ſatisfied with this truce, the confederate Papiſts ſent agents [F] to the King at Oxford, to ſolicit him about a treaty for a final peace. The Lords Juſtices

[C] *And office of Auditor-general.*] In 1643 Sir James had intereſt enough with the Marquis of Ormond, then Lord Lieutenant, to obtain a reverſionary grant of this office, for his eldeſt ſon, named alſo James. There is a letter of the Marquis to Secretary Nicholas, dated April 13, 1643, (10) whereby he inforces Sir James's ſuit in theſe words, 'I conceive myſelf 'obliged by my duty to the King to aſſure you, that 'he [Sir James] hath, even when his Majeſty's af'fairs were moſt neglected, and when it was not held 'ſafe for any man to ſhew himſelf for them, then ap'peared very zealouſly and ſtoutly for them, and ſtill 'continues, upon all occaſions, with very great and 'neceſſary freedom, ſo to declare himſelf, which I 'ſuppoſe his Majeſty will adjudge worthy of the en'couragement he now petitions for.' His ſon ſucceeded him in this place in 1666, and enjoyed it till his deceaſe in 1689.

(10) Among T. Carte's Collections, No. 146.

[D] *And adviſed with him in all caſes of moment and difficulty.*] The Marquis repoſed very great truſt in him, as is manifeſt from many of the Marquis's expreſſes to the Lord Digby, and others. In one of them particularly he hath theſe words. 'I muſt again re'commend Sir Henry Tichborn and Sir James Ware 'to your favour, as perſons entirely addicted to the 'King's ſervice, to whom you may boldly give cre'dit, and who deſerve very high encouragement.' (11)

(11) T. Carte's Life of the Marquis of Ormond. Vol. 3. Letter 340.

[E] *In order to employ them againſt his revolted ſubjects at home.*] The King, in his commiſſion, dated April 23, 1643, to treat about this ceſſation, calls it, 'a ſervice of very great concernment to Us, and Our 'preſent affairs . . .' (12)

(12) See Ruſhworth, Vol. 5. p. 537.

[F] *Sent agents.*] Theſe Popiſh agents were, the Lord Viſcount Muſkerry, Sir Robert Talbot, Dermond Mac-Teig O Brian, &c. They arrived at Oxford

Juſtices of Ireland ſent likewiſe Commiſſioners thither [*G*], with a petition, repreſenting the grievances and ſufferings of the Proteſtants. But theſe commiſſioners not being thought ſufficiently warm in the Proteſtants ſervice, another ſet of them, more devoted to the Engliſh parliament, and headed by the Earl of Kildare, ſent alſo Commiſſioners of their own [*H*]. This procedure implying an undue diſtruſt of the others, cauſed diſorder and uneaſineſs among the Proteſtants, and induced the Earl of Roſcommon and Sir James Ware to enter a proteſt in the council-book [*I*]. The Popiſh agents, and Proteſtant commiſſioners, arrived at Oxford about the beginning of April 1644; but ſo contradictory and irreconcileable were the expectations of each of the parties, that they returned without coming to any concluſion (*m*) [*K*]. So the ſettling of a further ceſſation and of a final peace was committed to the Marquis of Ormond, who had been ſworn Lord-Lieutenant, January 21, 1643-4. In September, the ceſſation was renewed to the firſt of December, and afterwards continued to a longer day: but the buſineſs of the peace was a work of much greater difficulty. The demands of the confederate Catholics were ſo exorbitant (*n*), that in the beginning of October the treaty was adjourned, until the King's pleaſure was known. The Marquis having occaſion to ſend ſome perſons in whom he could ſafely confide, to the King at Oxford, to inform his Majeſty of the poſture of his affairs in Ireland, and to know his pleaſure in relation to thoſe particulars of the treaty which remained to be adjuſted, fixed upon the Lord Edward Brabazon, Sir Henry Tichborne, and Sir James Ware, as perſons acceptable to the King, and not inclined to favour either the Popiſh or Parliament intereſt. They left Ireland about the beginning of December, 1644, and arrived ſafely at Oxford. While they ſtayed there, Sir James employed all the time he could ſpare from his public buſineſs, in converſing with the learned men of that univerſity, or in ſtudying in the libraries, and collecting whatever materials he judged might be afterwards uſeful in compiling the books he intended to publiſh. During his attendance he was highly careſſed by moſt of the conſiderable men then at Oxford; and complimented with the honorary degree of Doctor of Laws (*o*). The buſineſs theſe commiſſioners went about being concluded, towards the end of December they took leave of his Majeſty, not without many kind expreſſions of favour. On their return to Ireland, they were purſued at ſea, and taken by one of the parliament's ſhips: Sir James finding no hopes of eſcaping, juſt as the enemy were boarding the veſſel, caſt the King's packet of letters directed to the Marquis of Ormond into the ſea. They were brought priſoners to the Tower of London, where they continued upwards of ten months; but were at laſt releaſed, in exchange for ſome that had been impriſoned in Dublin, for an attempt to betray the town of Drogheda to the Scottiſh Covenanters. Being diſcharged from his impriſonment he returned to Dublin, and had an order from the Lord Lieutenant and Council on the Treaſury for 718 l. for the expences of his journey [*L*]. The King's affairs began now to grow deſperate in both kingdoms. Loth to loſe Ireland entirely, from whence he could draw conſiderable ſuccours, and cauſe a very great diverſion to his rebellious ſubjects, his Majeſty ſent directions to the Marquis of Ormond, of which an extract is given below [*M*]. In that exigence, he connived, at leaſt, at

---

ford before the Proteſtants, and went away about the middle of May (13).

[*G*] *The Lords Juſtices of Ireland ſent likewiſe Commiſſioners thither.*] Namely, Sir William Steuart, Sir Gerard Lowther, Sir Philip Percival, and Juſtice Donelan; to which Sir George Ratcliff, and Sir William Sambach, being then at London, were added (14).

[*H*] *Another ſet of them ... ſent alſo commiſſioners of their own.*] The commiſſioners diſpatched by theſe latter, were, Sir Francis Hamilton, Knight and Baronet, Capt. William Ridgeway, Capt. Michael Jones, and Mr Fenton Parſons; but Mr Jones declining to accept of the agency, the Proteſtants nominated, February 26th, two others, viz. Sir Charles Coote, Knight and Baronet, and Capt. W. Parſons. They embarked at Dublin April 2d, arrived at Oxford the 7th, and took leave of the King May 30 (15). Capt. Hamilton's and Ridgeway's companies of foot were then tranſported to England; but, rather than remove his company, Capt. Jones declined the voyage.

[*I*] *To enter a proteſt in the council-book.*] That proteſt was as follows. ‘The ſenſe of divers of his ‘Majeſty's Proteſtant ſubjects, who have ſigned to ‘the late petition directed to his Majeſty. Suffering ‘under the miſconſtruction of our petition, we hold it ‘fit to declare, that we exhibited not the ſame thro' ‘want of aſſurance of his Majeſty's care of the Proteſtant Religion, and of his ſubjects, nor yet to divert ‘any ſupplies that may be drawn from hence, againſt ‘ſuch as in his kingdom of England have taken up ‘arms againſt him; but merely in right of God's ‘cauſe, and in our right, humbly to inform his Majeſty, when the Iriſh agents repair unto him, if the ‘ſaid agents ſhall endeavour to ſurprize or prejudice ‘us in either; this is the commiſſion we give; and ‘if any perſon or perſons employed by us ſhall go ‘further, or otherwiſe buſy themſelves in diſturbance ‘of his Majeſty's ſervice, againſt ſuch we do and ‘ſhall proteſt, as being in our intentions no parties ‘thereunto; which, as it may ſerve to vindicate our ‘faith to his moſt ſacred Majeſty, ſo it may ſhew how ‘cauſeleſs the jealouſies are of this addreſs to him.’ (16)

[*K*] *That they returned without coming to any concluſion.*] Sir Richard Cox rightly obſerves (17), ‘That ‘the Iriſh agents, filled with the contemplation of ‘their own power, and the evil circumſtances of his ‘Majeſty's affairs, thought that the King would purchaſe their aſſiſtance at any rate; and therefore inſiſted upon ſuch exorbitant and unreaſonable demands, as would have ſubverted the laws and conſtitution of the government, and would have rendered the Proteſtant Religion at moſt but tolerated, ‘and that itſelf but poorly and precariouſly.’

[*L*] *And had an order ... for* 718 l. *for the expence of his journey.*] “This ſhews,” as Mr Harris obſerves, “(18) that his ſtay at Oxford was but ſhort: For at forty ſhillings a day, the ſum allotted each of theſe gentlemen out of the Treaſury, the whole time of his abſence from Dublin was only three hundred and fifty nine days, of which he was above ten months impriſoned in the Tower.”

[*M*] *His Majeſty ſent directions to the Marquis of Ormond.*] Part of thoſe directions was as follows.... ‘It being now manifeſt, that the Engliſh Rebels have ‘(as far as in them lyes) given the command of Ireland to the Scots, that their aim is a total ſubverſion ‘of Religion and Regal power, and that nothing elſe ‘will content them, or purchaſe peace here; I think ‘myſelf bound in conſcience not to let ſlip the means

at the peace concluded with the Iriſh Catholics by Edward Earl of Glamorgan. But his Lordſhip being thought to have exceeded his commiſſion; Secretary Digby, then in Ireland, accuſed him at the council-table, on the 26th of December 1645, of ſuſpicion of treaſon (*p*). Whereupon being reſtrained of his liberty, Sir James Ware, together with the Earl of Roſcommon, and the Lord Lambart, were appointed a committee to inquire into his conduct [*N*], and take his examination; which, on the 5th of January following, was tranſmitted to the King (*q*). During the remainder of the troubles, Sir James remained firm to the King's intereſt, and zealouſly adhered to the Marquis of Ormond, who ever after entertained a great and perſonal affection for him. He continued in Dublin, till the Marquis, by the King's orders, ſurrendered that place to the Parliamentarians, on the 19th of June 1647. At that time he was conſidered as a man of ſuch conſequence, that the Parliament inſiſted on his being one of the hoſtages for the performance of that treaty: Accordingly he repaired, with the Earl of Roſcommon, and Col. Arthur Chicheſter, to the Committee for the management of Iriſh affairs at Derby-houſe, London. After the execution of the treaty for the ſurrender of Dublin, the hoſtages being permitted to depart, Sir James returned to Dublin, where he lived for ſome time in a private condition, having been deprived of his employment of Auditor-general. Michael Jones, Governor of Dublin, took umbrage at him ſoon after; not thinking it convenient, that a perſon of ſuch unſhaken loyalty to the royal family, and one who had obſtinately refuſed their darling Covenant, ſhould continue in that city: and the rather, as the Marquis of Ormond was returned into Ireland, and began to be formidable by an union with the Army of the ſupreme Council. Jones therefore ſent him a peremptory order to depart the city, and tranſport himſelf beyond the ſeas into what country he pleaſed, except England. Having choſen France for the place of his baniſhment, Jones furniſhed him with a paſs for himſelf, his eldeſt ſon, and one ſervant, ſigned April 4, 1649. He landed at St Malo's, from whence he removed not long after to Caen in Normandy, and from thence to Paris; where he contracted an acquaintance with ſome eminently learned men [*O*]. After having continued in France about two years in the whole, he left it in 1651; and by licence from the Parliament of England came to London, where he had ſome buſineſs to ſettle. He ſtayed in London near two years, and then returned to Ireland to look after his eſtate; the war in that country being ended, and all things quiet (*r*). Hitherto we have conſidered Sir James Ware in his political capacity, we come now to take a view of him in point of Learning, wherein he was truly eminent. From the year 1626 to 1665 he favoured the world with Twelve Books [*P*], of which we give an account in the note, according to the order of time wherein

(*p*) See theſe Negotiations in Huſbands's Collection, vol. II. fol. p. 811. and Ruſhworth, vol. VI. and in other places.

(*q*) R. Cox, p. 152. 154. and Appendix, No xxviii.

(*r*) Harris, as above. Wood, col. 43.

'of ſettling that kingdom (if it may be) fully under 'my obedience, nor to loſe that aſſiſtance which I 'may hope from my Iriſh ſubjects, for ſuch ſcruples 'as in a leſs preſſing condition might reaſonably 'be ſtuck at by me: For their ſatisfaction, I do 'therefore command you to conclude a peace with 'the Iriſh, whatever it coſt, ſo that my Proteſtant 'ſubjects there may be ſecured, and my Regal 'Authority preſerved; but for all this, you are to 'make the beſt bargain you can, and not diſcover 'your enlargement of power till you muſt needs, and 'though I leave the managing of this great and neceſſary work intirely to you, yet I cannot but tell 'you, That if the ſuſpenſion of Poynings Act for 'ſuch Bills as ſhall be agreed upon between you 'there, and the preſent taking away of the Penal 'Laws againſt Papiſts by a Law, will do it, I ſhall 'not think it a hard bargain, ſo that freely and vigorouſly they engage themſelves in my aſſiſtance, 'againſt my Rebels in England and Scotland, for 'which no conditions can be too hard, not being 'againſt conſcience or honour (19).'

(19) Ruſhworth, vol. V. p. 979.

[*N*] *Were appointed a Committee to inquire into his conduct.*] The Rev. Dr Birch has lately thrown ſome light upon this negotiation, in his 'Enquiry into the 'ſhare K. Charles I. had in the Tranſactions of the 'Earl of Glamorgan;' which we ſhall refer the Reader to (20). Only ſhall beg leave to inſert here a few candid and ingenious obſervations, made by the Honourable H. W. upon the ſame ſubject (21).... 'With the King's enemies I cannot but believe he 'commiſſioned the Earl to fetch Iriſh forces.... With 'his favourers, I cannot think him ſo much to blame 'if he did. It requires very primitive reſignation in a 'Monarch to ſacrifice his crown and his life, when perſecuted by ſubjects of his own ſect, rather than preſerve both by the aſſiſtance of others of his ſubjects, 'who differed from him in ceremonials or articles of 'belief. The *dreadful Iriſh Papiſts* [and they certainly 'were horrid men] ſounded very pathetically in a 'party remonſtrance of the Parliament: But when 'he was dipped in a civil war, can we in this age 'ſeriouſly impute it to him as a crime that he endeavoured to raiſe an army wherever he could? His 'fault was not in propoſing to bring over the Iriſh, 'but in having made them neceſſary to his affairs. 'Every body knew that he wanted to do without 'them, all that he could have done with them. He 'had found the Crown in poſſeſſion of greater power 'than is fit to be truſted in a ſingle hand: He had 'exerted it to the utmoſt. Could a man, who had 'ſtretched every ſtring of prerogative, conſent with a 'good grace to let it be curtailed?—I argue for the 'man, not for the particular man. I think Charles 'to be pitied, becauſe few men in his ſituation would 'have acted better.'

(20) Lond. 1747. 1756.

(21) Catalogue of Noble Authors, vol. I. p. 236, &c.

[*O*] *He contracted an acquaintance with ſome eminently learned men.*] Particularly with the famous Samuel Bochart; and was ſo delighted with his agreeable converſation, that he could have been contented to ſpend the remainder of his life in his company. He highly admired that truly learned man, and had ſo great an eſteem for his works, that, upon his return to Ireland, he thought his *Hierozoicon* a preſent worthy to be made to the library of the univerſity of Dublin. (22)

(22) Harris, p. 154.

[*P*] *From* 1626 *to* 1665 *he favoured the world with Twelve Books.*] They were publiſhed in the following order. I. *Archiepiſcoporum Caſſilienſium & Tuamenſium Vitæ, duobus expreſſæ commentariolis.* Dublinii 1626. 4to. i. e. The Lives of the Archbiſhops of Caſhell and Tuam, in two books. II. *De Præſulibus Lageniæ, ſive Provinciæ Dublinienſis, Lib. unus.* Dublinii 1628. 4to. i. e. Of the Biſhops of the Province of Leinſter, or Dublin, One book. Theſe two Treatiſes were afterwards incorporated into his more general work, *De Præſulibus Hiberniæ.* III. *Coenobia Ciſtercientia Hiberniæ.* The Ciſtercian Monaſteries of Ireland: afterwards included into his *Diſquiſitiones de Hibernia.* IV. He publiſhed, in 1633, 'A View of 'the State of Ireland, written dialogue-wiſe betweene 'Eudoxus and Irenæus, by Edmund Spenſer, Eſq. in 'the yeare 1596. Whereunto is added The Hiſtory 'of Ireland, by Edmund Campion, ſometime fellow 'of St John's colledge in Oxford.' Together with, 'The Chronicle of Ireland: Collected by Meredith 'Hanmer, wherein they were publiſhed. At the Reſtoration in 1660, he was reinſtated into his office of Auditor-general, by ſpecial order from K. Charles II. And a Parliament being ſummoned to meet May 8, 1661, the Univerſity of Dublin, to ſhew their particular reſpect for him, unanimouſly elected him a ſecond time one of their Repreſentatives. The Duke of Ormond alſo, being conſtituted Lord Lieutenant of Ireland in 1661, was pleaſed to diſtinguiſh him in a very peculiar manner, by adviſing with him upon all occaſions; and when the gout hindered his attendance at the council-table, the Duke would frequently viſit him at his own houſe. By his Grace's favour he was made the firſt of the four commiſſioners of appeal in cauſes of the exciſe, with a ſalary of 150 l. a year. He was alſo appointed one of the commiſſioners for the execution of the King's declaration for the ſettlement of the kingdom; and conſtituted, by the King's inſtructions, of the quorum in that commiſſion, without whoſe preſence and concurrence no act could be done in execution of that declaration. Further, his Majeſty, in conſideration of his faithful ſervices for many years, and poſſibly not forgetting a handſome ſum of money which he

'Hanmer, Doctor of Divinity:' At the end of which is a 'Continuation, taken out of the Chronicles of 'Henry Marleburrough.' Dublin, fol.—The View of the State of Ireland was publiſhed, from a manuſcript in the library of the great Archbiſhop Uſher. It was a poſthumous piece of the moſt excellent Poet, Edmund Spenſer, author of the Faerie Queene, &c.—Edmund Campion, writer of the next piece, was the famous Jeſuit, executed at Tyburn in 1581. His hiſtory contains but 138 pages, tho' it reaches from the earlieſt times to the year 1571. It was publiſhed from a MS. in the Cottonian library.—Of Meredith Hanmer an account may be ſeen in Wood's Athenæ. He was Treaſurer in Chriſt's church in Dublin, where he died of the plague in 1604. His Hiſtory was in two parts; the firſt of which ran up even into the moſt fabulous times. The ſecond only is here publiſhed; and comes down to the year of Chriſt 1284 (23). From whence it is continued out of Henry Marleburrough's Chronicle to the year 1421. V. The next book publiſhed by Sir James Ware, was, *De Scriptoribus Hiberniæ, Lib.* II. *Prior continet Scriptores in Hiberniâ natos; Poſterior Scriptores alios; qui in Hiberniâ Munera aliqua obierunt.* Dublin, 1639. 4to. This Account of the Iriſh Writers begins at the firſt appearance of Chriſtianity in Ireland, and is carried down to the cloſe of the ſixteenth century; including in the ſecond part ſuch Writers, who, though they were not natives, yet bore offices or employments in Ireland. VI. *De Hibernia & Antiquitatibus ejus Diſquiſitiones.* i. e. Enquiries concerning Ireland, and the Antiquities of the ſame. Lond. 1654. 8vo. He publiſhed a ſecond edition of this work, enlarged by the addition of the four laſt chapters, and much corrected, Lond. 1658. 8vo. To which are added, VII. *Rerum Hibernicarum regnante Henrico* VII. *Annales.* 'The Annals of Ireland, during the reign of K. Henry VII.' This treatiſe of his, on the Antiquities of Ireland, is by good judges reckoned his maſter-piece. It was exceedingly well eſteemed, and raiſed his reputation among the learned, many of whom coveted his friendſhip and acquaintance. VIII. Next he collected the works aſcribed to St Patrick into one volume, with this title, *Opuſcula Sancto Patricio, qui Hibernos ad fidem Chriſti convertit, adſcripta.* Lond. 1656. 8vo. IX. After the Reſtoration, he publiſhed, Two Letters of Venerable Bede; together with the Lives of the Abbots of Wiremouth and Jarrow: And a Dialogue of Egbert Archbiſhop of York. *Venerabilis Bedæ Epiſtolæ duæ; necnon Vitæ Abbatum Wiremuthenſium & Gerwienſium. Acceſſit Egberti, Archiepiſcopi Eboracenſis Dialogus de Eccleſiaſtica Inſtitutione; ex antiquis MSS. in lucem emiſit, & notis ad rem Hiſtoricam & antiquariam ſpectantibus illuſtravit* Jacobus Waræus, *Eques auratus.* Dublin. 1664. X. Having publiſhed in 1662, in a ſeparate piece, *Annales Henrici* VIII. 8vo. he included it in the following volume, in 1664, XI. *Rerum Hibernicarum Annales, regnantibus Henrico* VII. *Henrico* VIII. *Edwardo* VI. *& Maria, ab anno ſcil. Domini* 1485, *ad annum* 1558. Dublin. 1662. fol. XII. The year following, he put out his large and complete Hiſtory of the Biſhops of Ireland. *De Præſulibus Hiberniæ Commentarius; a prima Gentis Hibernicæ ad Fidem Chriſtianam Converſione ad noſtra uſque Tempora.* Dublin, 1665. fol. In this are comprehended the two firſt pieces he publiſhed, as mentioned above, at No. I and II. namely, The Lives of the Archbiſhops of Caſhell and Tuam; and the account of the Biſhops of the Province of Leinſter. He was ſet upon this work now, and encouraged in the proſecution of it, by many perſons of reputation and learning, particularly by Dr James Margetſon, Primate of Armagh.

Theſe various Books of our learned Author being in ſeveral ſcattered volumes, of different ſizes; ſuch of them as related to the Hiſtory and Antiquities of Ireland, were tranſlated into Engliſh, and collected together in one volume folio, Lond. 1705, by his ſon Robert Ware, Eſq; and others.—But a much more compleat, elegant, and every way more valuable edition of them (24), hath been ſince publiſhed by the learned and ingenious *Walter Harris*, Eſq; who hath married Sir James Ware's great grand-daughter. He hath divided them into *Three Volumes* folio: whereof the *Firſt* contains the Hiſtory of the Biſhops of that Kingdom, and ſuch Matters Eccleſiaſtical and Civil, in which they were concerned, from the firſt Propagation of Chriſtianity therein to the year 1739. Adorned with Prints of ſeveral of the Cathedrals, Seals, and other Sculptures. Dublin. 1739. fol.—The *Second* Volume contains The Antiquities of Ireland. Sir James's *Diſquiſitiones*, of which this is an improved tranſlation, comprehended only xxviii chapters. In the edition of 1705 four new chapters were added: and *this* Mr Harris hath inriched with eight chapters entirely new. As alſo throughout with numberleſs Improvements, incloſed within crotchets to diſtinguiſh them from the original edition; taken not only from Sir James's MSS. but likewiſe from public and private Libraries, Records, &c. It is moreover adorned with prints of antiquities found in that kingdom; of the Iriſh coins; and 18 copper plates of the religious orders, engraved by the beſt hands in Paris. The ſubjects it treats of, are equally curious and intereſting; namely, the origin and language of the ancient Iriſh; diviſions and dimenſions of the country; names and ſurnames, dreſs, buildings, funerals, and other cuſtoms of the inhabitants: Their form of government, laws, exactions, taxes, &c. Their great officers, and governors, from Henry II. to 1744, in a ſynoptical table: Of the Druids, and Bards: Of the natural advantages and commodities of Ireland: And a curious account of the monaſteries, and monaſtical ſtate there.—Biſhop Nicolſon obſerves, that this 'treatiſe was Sir James's 'maſter-piece.' He ſtyles him, upon account of it, 'the Camden of Ireland.' And ſays, that 'this 'kingdom is everlaſtingly obliged to him for the 'great pains he took in collecting and preſerving their 'ſcattered monuments and antiquities.'—That this work 'will be a laſting proof of his indefatigable in'duſtry and conſummate judgment; both in his en'quiries and diſcoveries (25).' This ſecond volume was printed at Dublin, in 1745, fol.—The *Third* Volume contains the Writers of Ireland, in two Books. 1. Of ſuch Writers who were born in Ireland. 2. Of ſuch Writers, who, though foreigners, enjoyed preferments or offices in Ireland, or had their education in it. In this, as in the former volumes, are numberleſs corrections, and *additions*; particularly of *ſeventy eight* new articles, in that part which had been publiſhed before by Sir James. The 14th chapter of the firſt book, and the 6th chapter of the ſecond book, conſiſting of 313 articles, are alſo entirely new. In theſe chapters ſome lives are very full and large, eſpecially thoſe of Roger Boyle, Earl of Orrery, Sir James Ware, Luke Wadding, and Sir Richard Cox. This third volume was printed at Dublin in 1746. folio.—Sir James left in manuſcript, 'An imaginary Voyage to an Utopian iſland;' compoſed during his impriſonment in the Tower: and *Itinerarium Gallicum*, now in the Cottonian Library.

(24) But among them are not included 'Rerum 'Hibernicarum 'Annales,' edit. 1664, mentioned above.

(25) Iriſh Hiſtorical Library, ed. Dublin, 1724. 8vo. p. 20.

had ſent him in his exile, was pleaſed to offer to create him a viſcount of the kingdom of Ireland: but he thankfully declined that honour, becauſe his eſtate, by a general intail created on the marriage of his eldeſt ſon, as we ſhall ſhew preſently, was likely to go to a female heir. For the ſame reaſon he refuſed to be created a Baronet. He had a great love for his native country, and could not bear to ſee it aſperſed; which put him upon doing it all the juſtice he could in his writings, by ſetting matters in the faireſt light, yet ſtill with the ſtricteſt regard to truth. That unfeigned love for his country induced him to ſerve every part of it to the utmoſt of his power. As, for inſtance, when the chief magiſtrate of the city of Dublin was dignified with the title of Lord Mayor, in 1665, he was very inſtrumental, thro' his intereſt with the Duke of Ormond, in obtaining a grant from the crown of 500l. a year, for the maintenance and ſupport of that new dignity (s). Beſides his ſeveral books mentioned before, he had an intention of publiſhing more relating to Ireland, towards which he had prepared large materials: but he was prevented by death, which deprived the world of ſo valuable a perſon (t), on the firſt of December, 1666, when he was juſt entered into his 73d year. He was buried in the church of St Werburg in Dublin, in a vault belonging to his family, without either ſtone or monumental inſcription. He married, as we have obſerved above, Mary, daughter of Jacob Newman, of Dublin, Eſq; and by her he had ten children, of whom only two ſons and two daughters arrived to maturity. Of the latter, Mary was married to Sir Edward Crofton, Baronet: and Roſe to the Lord Lambart, afterwards Earl of Cavan. His eldeſt ſon, *James*, ſucceeded him in his eſtate [Q], and office of Auditor-general, and died in 1689. His ſecond ſon *Robert* was in his youth troubled with epileptic diſorders, and afforded no hopes to his father; which was the cauſe of his conſenting to create a general intail, upon the eldeſt ſon's marriage. But he afterwards recovered a vigorous ſtate of health, and gave Sir James room for ſevere but too late reflections on what he had done. To make Robert all the amends in his power, he laid up 1000l. every remaining year of his life, which was not above ſix or ſeven; and from this fund the preſent fortune of the family ariſes. This Robert publiſhed ſeveral books [R]. He married Elizabeth, daughter of Sir Henry Piers of Triſternagh in the county of Weſt-Meath, Bart. but had only one ſon that ſurvived, named *Henry*, who died ſome years ago; leaving iſſue, by Mary his wife, daughter of Peter Shaw, of Egerton in Lancaſhire, Eſq; two ſons, James and Henry; and Elizabeth, married to Walter Harris, Eſq; the publiſher of the late elegant edition of Sir James's works. As to our valuable Author's reputation, it is fully eſtabliſhed by his excellent works, which have been greatly commended (u) both at home and abroad: and, with reſpect to his moral qualifications, he was of a very charitable diſpoſition, and frequently contributed good ſums of money to the relief of the indigent and neceſſitous, eſpecially to the decayed Cavaliers, whom he often invited to his plentiful table, being noted for hoſpitality, generoſity, and other virtues. In the courſe of his ſtudies, and to enable him to proſecute them more effectually, and with better ſucceſs, he gathered together, at conſiderable pains and expence, a large and fine collection of valuable manuſcripts relating to the hiſtory of Ireland. In 1686, they came into the hands of Henry Hyde, Earl of Clarendon, when he was Lord Lieutenant of Ireland, who brought them with him into England, and depoſited them in Dr Tenniſon's library at Weſtminſter. They were purchaſed afterwards by the late magnificent Duke of Chandois. A Catalogue of them was printed at Dublin in the year 1641; and another at Oxford, in 1697, in the Catalogue of the Manuſcripts of England and Ireland (w). Among thoſe manuſcripts are two of Sir James's own compoſition, namely, The Annals of Ireland, from the year of Chriſt 428, to the Conqueſt of Ireland by King Henry II. And a ſecond part of the ſame, down to the end of King Henry III's reign, i. e. from the year 1169 to 1272. N° 29. and again, from the year 1199 to 1307. N° 66.

[Q] *His eldeſt ſon, James, ſucceeded him in his eſtate.*] He was, in the life-time of his father, married to Elizabeth, daughter of Dixie Hickman of Kew in Surrey, ſiſter to Thomas Lord Windſor, created afterwards Earl of Plymouth. By a general intail raiſed on this marriage, the eſtate of the family came to an only daughter, Mary, who took for her ſecond huſband Sir John St Leger, Knight, late one of the Barons of the court of Exchequer in Ireland, in whom the eſtate veſted (26).

[R] *This Robert publiſhed ſeveral books.*] Namely, 1. 'The Examination of Faithful Commin, and Thomas Heath,' (the firſt taken from Sir William Cecil, Lord Burghley's papers; and the other from the regiſtry of the ſee of Rocheſter) Dublin, 1671 and 1678, 4to. 2. 'The Converſion of Philip Coruine, a Franciſcan Friar, to the Proteſtant Religion in 1569.' Dublin, 1681, 4to. 3. 'The Reformation of the Church of Ireland, in the Life and Death of George Brown, ſometime Archbiſhop of Dublin.' Dublin, 1681. 4to. being the ſame that ſtands in the firſt Engliſh edition of Sir James Ware's works. Dublin, 1705. 4. 'Foxes and Fire-brands, or a Specimen of the Danger and Harmony of Popery and Separation: wherein is proved, from undeniable matter of fact and reaſon, that Separation from the Church of England is, in the judgment of Papiſts, and by ſad Experience, found the moſt compendious way to introduce Popery, and to ruine the Proteſtant Religion.' In two parts. London. 1680, 4to. Dublin, 1682, 8vo. The firſt part, with the examinations of Commin and Heath, was publiſhed by Dr John Nalſon in 1678, 8vo. and the ſecond part was added by our author Robert Ware. 5. 'The hunting of the Romiſh Fox, and the quenching of Sectarian Firebrands; being a Specimen of Popery and Separation.' Dublin, 1683, 8vo. 6. 'Foxes and Firebrands, &c.' The third part. Lond. 1689, 8vo. 7. 'Pope Joan: or an account that there was ſuch a She-Pope, proved from Romiſh Authors before Luther, &c.' Lond. 1689, 4to.—— The Hiſtory and Antiquities of the City and Univerſity of Dublin, MS. unfiniſhed and very imperfect.— He had by his writings appeared ſo averſe to the Roman Catholic intereſt in Ireland; that fearing the reſentment of that party, which he had reaſon to believe would be ſevere enough in the reign of K. James II. and being adviſed to it by the Earl of Clarendon, then Lord Lieutenant; he removed with his family into England, on the ſame day that the Lord Tyrconnell landed in Ireland, to take on him the government, and continued here till the deliverance of Ireland by King William. He died in March 1696 (27). C

WARNER [John] Biſhop of Rocheſter in the laſt century, diſtinguiſhed by his loyalty to King Charles I. and his munificent charities, was the ſon of Herman Warner, citizen of London, and born in the pariſh of St Clement Danes in Middleſex about the year 1585 (*a*). After a proper foundation of grammar-learning, in which he made a quick progreſs, he was ſent very young to Oxford in 1598 (*b*), and the year following was elected Demy of Magdalen College in that univerſity (*c*); where, being placed under the care of a good tutor, he proceeded ſucceſsfully in his ſtudies, and taking the degree of A. B. December 13, 1602, he commenced A. M. the 12th of June 1605; in which year he was made Fellow of his college, having the reputation of a witty perſon, and a good philoſopher (*d*). However, in 1610 he reſigned his Fellowſhip *, but accepted of the rectory of St Michael's Crooked Lane, which was given him by Archbiſhop Abbot in 1614 †. Yet this he reſigned too in 1619, and ſeems to continue unpreferred till 1625 ‡, when he was preſented by the ſame metropolitan to the rectory of St Dionis Backchurch in London (*e*). In the interim he had taken both his degrees in divinity at Oxford (*f*); and the archbiſhop continuing his patron, collated him to the prebend of the firſt ſtall in the cathedral of Canterbury (*g*). He was alſo appointed Governor of Sion College in London, and was made Chaplain to King Charles I. before whom, in the ſecond year of his reign, the parliament ſitting, he preached a ſermon at Whitehall in the paſſion-week, on Matth. xxi. 28. in which he urged the conſequence of that parliament's proceedings ſo far, as very highly provoked ſome members of both houſes, then preſent; from the effects of whoſe reſentment nothing but the diſſolution of that parliament, which enſued ſhortly after, could ſecure him, by making room for his Majeſty's moſt gracious pardon (*h*). In 1633, he attended his royal Maſter in his expedition to be crowned in Scotland, and the ſame year was collated by him to the Deanery of Lichfield (*i*). In 1637, the King alſo advanced him to the higheſt order in the church, by a nomination to the See of Rocheſter (*k*); in conſequence whereof he was elected November 13, confirmed January 1, conſecrated thereto the 15th, inſtalled the 21ſt, and received the temporalities the 30th of that month (*l*) the ſame year. Hereupon, notwithſtanding the very ſmall revenues of this ſee, he reſigned his Deanery and his Prebend, beſides a donative of 200*l.* *per annum* in Kent (*m*). In 1640 he aſſiſted the King with fifteen hundred pounds on the Scottiſh invaſion of England, and gave his attendance, when there was only one Prelate beſides himſelf, in the council at York. The ſame year he alſo oppoſed and ſpoke againſt the Præmunire in the Houſe of Peers, and aſſerted the rights of the Biſhops ſitting in parliament. In the ſame ſpirit he likewiſe concurred with ſome others of the epiſcopal order, who took the proteſtation May 14, 1641 [*A*]. In reality his whole conduct was regulated by the ſame principles in this parliament as before, ſhewing himſelf a zealous advocate for epiſcopacy [*B*], and ſtanding up ſtrenuouſly for it in the Houſe of Lords as long as he had a place there; till he was ſilenced by the general calamity and ruin wherein the epiſcopal order was involved, which happened ſoon after. For Auguſt 4th, 1641, he was impeached with twelve other biſhops, for acting in the convocation aſſembled in 1640, making then canons and conſtitutions, and granting his Majeſty a benevolence (*n*). In this laſt diſtreſs Biſhop Warner was choſen by joint conſent of all the reſt, to ſolicit their defence; and he ſpared neither coſt nor pains therein [*C*]. But their total ſubverſion being determined, nothing availed. However, his loyalty was ſtill the ſame to his Prince, at whoſe command, not long before his death, our prelate, without the aſſiſtance of his books, or any other help, wrote a treatiſe againſt the ordinance for the ſale of church-lands *: and after the death of that martyr for the church, he publiſhed ſeveral ſermons, to his no ſmall hazard, againſt that barbarous murder †. Under the influence of the ſame principles, he refuſed to pay any tax or loan to the par-

Several of the particulars in this article were communicated by Dr Zachary Pearce, Biſhop of Rocheſter, from an account of Biſhop Warner, written ſeveral years ago by one of his family.

(*a*) This is collected from his commencing D. D. in 1616, and in the 31ſt year of his age, according to the above mentioned account.

(*b*) This is inferred from the time of his taking the degree of A. B. which muſt be in the fourth year after his admiſſion, ſuppoſing him to have proceeded at the regular times to his degrees, as he appears to have done.

* It was printed in 1646 and 1648 in 4to. under the title of *Church-Lands not to be ſold: or, a neceſſary and plain anſwer to the queſtion of a conſcientious Proteſtant, whether the lands of biſhops and churches in England and Wales may be ſold.*

† Account, as before.

[*A*] *He took the proteſtation*] The tenor of it was to maintain and defend, as far as lawfully they might, with their life, power, and eſtate, the true reformed Proteſtant religion, expreſſed in the doctrine of the Church of England, againſt all popery and popiſh innovation within this realm; and maintain and defend his Majeſty's royal perſon, honour, and eſtate; alſo the power and privilege of parliaments, the lawful rights and liberties of the ſubjects, and endeavour to preſerve the union and peace between the kingdoms of England, Scotland, and Ireland (1).

[*B*] *He was a zealous advocate for epiſcopacy.*] His zeal for that cauſe drew from Dr Fuller the following expreſſion: ‘ It was he in whom dying epiſcopacy gave the laſt groan in the Houſe of Lords, one of good ſpeech and a cheerful ſpirit, and, which made both, a good purſe, and, which made all three, a good cauſe, as he conceived in his conſcience, which made him very pertinently and valiantly defend the antiquity and juſtice of the biſhops votes in parliament (2).’

[*C*] *He ſpared neither coſt nor pains.*] The biſhops deſired time till Michaelmas term, to put in their anſwer, which was ſpent by their ſollicitor in preparing matters, and procuring counſel to plead for them, in which he met with very unuſual difficulties. Moſt perſons being ſo terrified, as Dr Fuller relates, and overawed by the violent, not to ſay tyrannical, proceedings of the Commons, that of the counſel retained by him two only appeared; Serjeant Jermin, who declined to plead for them, except the biſhops would firſt procure him a warrant from the Houſe of Commons (which they refuſed to do) and Mr Chute, or Shute, who being demanded of the Lords whether he would plead for the biſhops, *Yea*, ſaid he, *ſo long as I have a tongue to plead with:* and ſoon after he drew up a demurrer in their behalf, that their offence in making canons could not amount to a *præmunire*. This being ſhewn to the biſhop of Lincoln, he proteſted that he never ſaw a ſtronger demurrer all the days of his life *, and the notice to the Lords was probably, continues Fuller, the cauſe that they waved any farther proſecution of the charge, which henceforward ſunk in ſilence (3).—— The counſel which Biſhop Warner retained were theſe four, Serjeant Jermin, Mr Heron, Mr Shute, and Mr Hale. But when he requeſted to have them, the houſe of lords ordered he ſhould, with this proviſo, ‘ That if any of the ſaid counſel ſhall upon juſt cauſe deſire to be excuſed, and this houſe approve of the ſaid excuſe, that then he or they ſhall not be compelled to be of the ſaid biſhops counſel (4).’

liament; whereupon his eſtate, eccleſiaſtical and temporal, was ſequeſtered, his books ſeized, and by a new piece of barbarity, all bonds due to him from any perſon whatſoever releaſed. They threatened him alſo with impriſonment, which would certainly have been put in execution againſt him, had he not providentially eſcaped their hands, by withdrawing into Wales, where he continued ſhifting about from place to place for 3 years; conſtantly performing the duty of his epiſcopal function, as he did wherever he ſojourned till the happy Reſtoration. After the King's garriſons were given up, he was forced to compound for his temporal eſtate, now four years ſequeſtered, at the rate of the tenth part real and perſonal. But he refuſed all oaths to the laſt(o). However, by thus parting with ſome of his eſtate to ſave the reſt, he was enabled to aſſiſt his ſuffering brethren, and was accordingly a great ſupport to the ſequeſtered clergy and their families, as well as to other indigent perſons [*D*]. He ſent an hundred pounds to King Charles II. in his exile, deſigning, as that ſucceeded, to continue the offering; but he was betrayed by his ſervant, who diſcovering it to Cromwell in council, the treachery would certainly have coſt the maſter his life, had he not prevailed on that ſervant by money to fly into Ireland. But having no account of his ſmall preſent to the King, he was prevented from ſending any more(*p*). Upon his Majeſty's Reſtoration in 1660, our prelate was reſtored to his biſhopric, and enjoyed it till his deceaſe, which happened October 11, 1666. His body was interred in the cathedral-church of Rocheſter, where a ſtately monument was ſoon after erected to his memory [*E*]. In the vigour of his age he married the widow of Dr Robert Abbot, Biſhop of Saliſbury [*F*], and had iſſue by her one daughter, his heireſs, who by her huſband, Thomas Lee of London, had a ſon named John [*G*], to whom and his ſons our biſhop bequeathed ſo conſiderable an eſtate, as excited the curioſity of many, who viewing his extraordinary charities, were ſurprized how all could ariſe from ſo mean a biſhopric as that of Rocheſter, and ſo ſmall fines at the Reſtoration. They who judged by his way of living in his old age, attributed this to parſimony [*H*]. But ſuch

(o) Ibid.

(*p*) Account by one of his family.

[*D*] *He aſſiſted the ſequeſtered clergy, and other indigent families.*] To this purpoſe Biſhop Kennett gives the following relation of him. ' When,' ſays he, ' in ' the days of uſurpation an honeſt friend paid a viſit ' to him, and upon his lordſhip's importunity told ' him freely the cenſures of the world, as being of a ' cloſe and too thrifty a temper, the biſhop produced a ' roll of diſtreſſed clergy, whom in their ejectments ' he had relieved with no leſs than eight thouſand ' pounds; and enquired of the ſame friend, whether ' he knew of any other like objects of charity: upon ' which motion the gentleman ſoon after by letter re' commended a ſequeſtered divine, to whom at the ' firſt addreſs he gave 100l(5).

[*E*] *A ſtately monument was erected to his memory.*] It ſtands at the eaſt end of the north iſle, in a ſmall chapel incloſed with iron rails, and paved with black and white marble. It is compoſed altar-wiſe, having at top two pillars of black marble ſupporting a compaſs-corniſh, whereon is ſet his arms. And next to the wall is a marble table, upon which theſe lines are cut in two columns.

En tandem in tumulo dignum meliore Catonem,
Qui vita & donis aurea ſecla dedit.
Ille Deo templiſque olim ſua jura redemit,
Atque patres fruſtra non ſinit eſſe pios.
Nec ſatis hæc vivis pietas, poſt funera cleri
Quod reliquum eſt viduis conſulit ille toris.
Magdaleas muſas, pariter dilectus, & ipſe
Diligit, hinc libros, dat geniumque libris.
Sic vivis phœnix fatoque ſibique ſuperſtes,
Dum tibi Magdaleas muſa coronat odor,
Unica papales ſuperat tua dextra Coloſſos,
Nec tamen in cælis ſic meruiſſe putas.
At qui ipſi te ſponte vocant, & conſcia terra
Gaudet ſe cælo reddere poſſe ſuum.
En animi exuvias terra ſibi cætera cælum
Vendicat: O quantum eſt ſic licuiſſe mori!
Flete patrem, viduæ: pudeat fleviſſe maritos.
Vivitur a cujus funere, flete patrem.
Magnus opes, majorque animum cui maxima poſſe,
Fortuna, & virtus maxima velle, dedit.
Hoc aliis fatum commune eſt, vivere poſſe.
Hoc, Warnere, tuum eſt, non potuiſſe mori.

On the altar part of the tomb is likewiſe the following inſcription:

Hic jacet cadaver Johannis Warneri,
Totos annos XXIX *Epiſcopi Roffenſis,*
In ſpem Reſurrectionis
Ad vitam æternam.
Anno Domini 1666.
Ætatis 86.
Charus poſtgenitis.

On another tablet is alſo the ſame inſcription as the laſt, with the addition of theſe two verſes:

Invidiam eſt extra, quicquid donatur olympo,
Quas dederit cælo, ſemper habebit opes.

But it muſt not be omitted, that theſe monumental high-ſtrained compliments were rather diſcouraged by our prelate's will: in which he ordered only the following ſhort inſcription to be ſet on his grave-ſtone.

Hic jacet cadaver JOHANNIS WARNER,
totos annos XXIX *Epiſcopi.*

[*F*] *He married the widow of Robert Abbot, biſhop of Saliſbury.*] This marriage was probably contracted ſoon after the year 1629, the lady, whoſe name was Bridget, being then ſtill Dr Abbot's widow, and ſhe had before been the wife of John Cheynel, M. D. ſometime fellow of Corpus Chriſti College in Oxford, and by whom ſhe had a ſon, Francis Cheynel (7), of whom ſome account may be ſeen in this work (8). It is ſomewhat remarkable, that no account of this lady's being wife to Biſhop Warner can be found in any monumental inſcriptions, either in London, Rocheſter, or Saliſbury; nor is there at Bromley, where the Biſhop of Rocheſter's palace ſtands, any other tradition but that he lived and died a batchelor (9): taken perhaps from Mr Wood, who ſays he always lived a ſingle life.

[*G*] *A ſon named John, to whom our biſhop left a conſiderable eſtate.*] Some light is thrown upon this matter by the Oxford antiquary, who tells us, that this John Lee, being A. M. and ſome time fellow of Magdalen College, Oxford, proceeded D. D. Auguſt 1ſt, 1660. being then Prebendary and Archdeacon of Rocheſter. That he afterwards wrote himſelf John Lee alias Warner, becauſe he was heir to the ſaid Biſhop *: That having publiſhed one or more ſermons, he died about the beginning of June 1679, at which time he left behind him a ſon named Henry Lee Eſq; and laſtly, that he was ſucceeded in his archdeaconry by Tho. Plume, D. D. of Cambridge (10).

[*H*] *Some imputed his large fortune to parſimony.*] This reflexion is countenanced by David Lloyd, the memoir-writer, where he tells us with the ſame want of candor, that the biſhop's father left him a conſiderable fortune acquired by trade well managed, and he had

(8) In the article of Chillingworth and Jaſper Mayne.

(9) From the information of the reverend Mr Bagſhaw, chaplain of Bromley college.

* Whom the antiquary here calls *Harman* Warner, by a palpable miſtake.

(10) Faſti Oxon. as in the text.— This Dr Plume it was, that about 1705, founded at Cambridge a *Profeſſorſhip of Aſtronomy and Experimental Philoſophy*, which goes by his name.

ſuch a natural diſpoſition is hardly reconcileable to his accepting a biſhopric by the ſurrendry of an equivalent at 1000 l. charge for firſt fruits, &c. The truth is, that he lived as decently and hoſpitably as any other prelate till the unhappy rebellion. And if his trouble and exceſſive charities taught him to practiſe his uſual expreſſion, *That he eat the ſcrags of mutton to be enabled to give the better part to the poor*, it is no wonder if he continued it during the few years he lived after the King's return. But the ſurprize will be entirely taken off, when it is known, that he had no leſs than 16,000 l. left him in his youth by a relation, who was his godmother. This was the real foundation of his eſtate, which, with the intereſt, while he confined his expence to his ſpiritual income, grew to ſo great a bulk (*q*). The nobleſt part of his character ſhines forth in his munificent charities, a particular account of which is inſerted below [*I*]. And he is ſaid beſides to have been an accurate logician, philoſopher, and ſchool-divine: a man of accurate parts, a good ſpeech, a cheerful and undaunted ſpirit, promiſing leſs than he performed, and more hearty within than courtly without (*r*). Beſides the books already mentioned, ſome letters of his to Dr Jeremy Taylor, concerning the chapter of original ſin in the *Unum Neceſſarium* are printed in the ſaid Biſhop Taylor's Collection of polemical diſcourſes (*s*).

had increaſed it himſelf by oeconomy, being uſed to ſay in behalf of his frugal and cloſe way, that he *eat the ſcraggy necks of mutton, that he might leave the poor the ſhoulder* (11). But Bp Kennett obſerves, that tho' he was condemned by the fanaticks of that age for a covetous man, his memory needs no vindication (12).

[*I*] *An account of his charities.*] His Lordſhip's private charities have been already mentioned (13). The public ones are as follows. 1. While he was Prebendary of Canterbury, having obſerved, that a fixed font was wanting in that cathedral, he erected in 1639 a very curious and coſtly one at his own charge (14), Mr Somner gives a print of it, and another author deſcribes it thus: 'It hath three aſcents [ſteps] to it, 'paled about with high gilded and painted iron bars, 'having under the cover of it a carved image of the 'Holy Ghoſt in a form of a dove, and round about 'it are placed carved images of the 12 Apoſtles, and '4 evangeliſts, and a band of angels; and over it 'a carved image of Chriſt. And all this was done, ſays he, 'at the coſts of Dr Warner, &c. now parſon 'of Back-church in London, parſon of Barham in 'Eaſt Kent near Dover, and parſon of Biſhop's-Bourn 'and Lord Biſhop of Rocheſter. The ſame writer like'wiſe informs us, that on Candlemas day at night, '1641, thoſe images were all demoliſhed, and taken 'away, they knew not how or by whom. But in a 'few days after, ſome of them were found in a pul'pit in the ſaid cathedral (15).' But here are ſome miſtakes about the time of his lordſhip's giving this benefaction, which could not be beſtowed after his promotion to the ſee of Rocheſter, and while he was parſon of Back-church, Barham, and Biſhop's-Bourn, if he reſigned thoſe parſonages upon that promotion, as in the account of his life cited in the text it is ſaid he did. Mr Somner, who ſays it was erected in 1639 [when his lordſhip was biſhop of Rocheſter] enquired with great diligence for all the ſcattered pieces, bought them up at his own charge, kept them ſafe till the return of King Charles II. and then delivered them to Biſhop Warner; who in 1660 cauſed his font to be re-edified in a more beautiful and coſtly manner than before (16). How much this font coſt we ſee is not mentioned by theſe writers, but ſomewhat of it may be collected from the following liſt in the account of his life by one of the family, thus:

He gave to the Demys of Magdalen College Oxon in 11 years	1100 l.
——— To the repairing of St. Paul's, London	1050
——— To the redemption of captives, &c.	2500
——— To the library of Magdalen College (18)	1200
——— To the cathedral of Canterbury for fonts and library (19)	1200
——— To the cathedral of Rocheſter, towards a library	500
——— For repairs in that cathedral	200
By his will	800
——— For augmenting poor vicarages in the Dioceſe of Rocheſter, by the annual intereſt of it at 6 *per cent.*	2000
Paid by his executors for the building of Bromley College	8500
For the repairs of the Palace	800
Total is	19850

He alſo gave by his will to a chaplain and twenty widows annually for ever 450 l. and to four Scotch ſcholars in Baliol college, Oxon, annually for ever 80l. Both which, being a rent charge, at the moderate rate of 24 years purchaſe amounts to 12,720l. to which add as above, 19,850l. total is 32,570l. beſides 600l. per annum to ſequeſtered miniſters and widows of ſuch during the rebellion, and 1500l. to K. Charles I. on the Scots invading England, both together could not amount to leſs than 10000 l. which being added above to 32,570, makes in the whole 42,570l. not to mention 20l. left to the church of St Clement Danes, 20l. to Bromley, and a yearly penſion to St Dionis Back-church. Such an unbounded diſpoſition to every kind of charity is a conſpicuous evidence of the goodneſs of that heart which prompted him to chooſe always for his motto, *Non nobis tantum nati.*

To this account, for the ſatisfaction of the curious in theſe matters, we ſhall add the following particulars concerning the two charities, of Bromley College, as it is now called, and the Scotch exhibitions at Baliol College in Oxford. By his will he left part of his perſonal eſtate for an hoſpital or alms-houſe, to be built as near as conveniently might be to the cathedral-church of Rocheſter *, and lands for the maintenance therein of twenty poor widows, the relicts of orthodox and loyal clergymen, and a chaplain to adminiſter in holy things according to the church of England; bequeathing 50l. a year to him, and to each of the widows 20 l. a year, always reſerving ſo much out of their ſtipends as may keep the hoſpital in good repair. The chaplain to be elected out of Magdalen College, Oxford, and no other houſe; and the election of the widows to be in his executors, with power to appoint ſucceeding truſtees, as they ſeverally deceaſed. He alſo by will gave 80 l. per ann. to iſſue out of his manor of Swayton in Lincolnſhire, for the maintenance of four ſcholars of the Scotch nation to live and abide in Baliol College, Oxford, to be choſen by the Archbp. of Canterbury, and Biſhop of Rocheſter, and their ſucceſſors, each to have yearly 20 l. till they were Maſter of Arts, and then to return to their own country, and there be miniſters of God's word †. Such is the tenor of his lordſhip's will, which was proved, February 7, 1666. But the Oxford antiquary informs us, that the truſtees there, not being diſpoſed to place the ſaid ſcholars in that college, and the maſter and fellows not altogether willing to receive them, there was an intention of making Glouceſter-Hall a college for them ‡, and there they were placed till the parties concerned came to a determination. At length, in 1672, when Dr Thomas Wood became maſter of Baliol-College, he took order that they ſhould be tranſlated thither, where they have remained ever ſince §, and the benefaction has produced ſeveral eminent ſcholars, particularly Dr John Keil, Savilian Profeſſor of Aſtronomy, and Mr James Stirling, author of ſeveral ingenious mathematical pieces. P

WATERLAND [DANIEL] the famous Defender of the Faith againſt the Arians (*a*), was the ſecond ſon by a ſecond wife of Mr Henry Waterland, Rector of Waſely in the Lindſey-diviſion of Lincolnſhire, at which place he was born on the 14th of February

* The executors placed it at Bromley, the ſeat of the biſhop's palace.

† But this part being only a requeſt, is variouſly obſerved, as occaſions vary.

‡ This hall was not made a college then, but has been ſince, by the name of Worceſter-College, being endowed with ſeveral additional benefactions, and enlarged with new buildings.

§ Athen. Oxon. vol. II. col. 374.

(*a*) Moſt of the particulars of this article were communicated by Dr Theodore Waterland, our author's elder brother.

February 1683. His father being poſſeſſed alſo of the rectory of Flixborough, not far diſtant, ſent him there very early to his curate, Mr Sykes, who had the pleaſure of teaching him to read, which he was able to do with ſurpriſing readineſs at four years of age. Returning home he was inſtructed by his father in the firſt rudiments of grammar, and afterwards ſent to the free-ſchool at Lincoln, then in great repute. His uncommon diligence and ſuitable parts ſoon recommended him to the particular notice and favour of Mr Samuel Garmſtone and Mr Anthony Read, the two ſucceſſive maſters of that ſchool, at whoſe requeſt, beſides the ordinary exerciſes, he frequently performed others, which always gave great ſatisfaction, and were by them handed abroad for the honour of their ſchool. With this promiſing character he went to Cambridge, and being admitted March 30, 1699, of Magdalen College, under the tuition of Mr Samuel Barker, a very worthy gentleman, he obtained a ſcholarſhip, December 4, 1702, and proceeding A. B. in Lent-term following, he was elected Fellow of the college, February 15, 1703-4. whereupon taking pupils, he became a great ſupport to that ſociety. In 1706, he commenced A. M. and Dr Gabriel Quadrin, Maſter of the college, dying in February 1713, the Earl of Suffolk and Binden, in which family the right is veſted, conferred the maſterſhip upon Mr Waterland, who having taken holy orders, was alſo preſented by that nobleman to the rectory of Ellingham in Norfolk. But this made little or no addition to his finances; for he gave almoſt the whole revenue of it, which indeed was but ſmall, to his curate, his own reſidence being neceſſary at the college, on account of his pupils, of whom he took extraordinary care; and among other inſtances thereof, he drew up a tract under the title of *Advice to a young Student, with a method of ſtudy for the firſt four years* (*b*). In 1714 he took the degree of B. D. having performed the exerciſe for it with the greateſt applauſe [*A*], and upon the death of Dr James, Regius Profeſſor of Divinity, our author was generally pointed out as the ableſt perſon in the univerſity to fill that chair, tho' his great eſteem for Dr Bentley, who ſucceeded to it, would not ſuffer him to puſh his intereſt on the occaſion. However, he was ſhortly after appointed one of the chaplains in ordinary to his Majeſty [King George I.] who on a viſit to that univerſity in 1717 honoured him with the degree of D. D. without his application; and he was incorporated ſome time after in this degree at Oxford, being preſented with a large encomium by Dr Delaune (*c*), preſident of St John's college in that univerſity. In 1719 he gave the world an illuſtrious proof of his preheminent abilities in his profeſſion, by publiſhing the firſt *Defence of his Queries* in vindication of Chriſt's divinity [*B*], and in the

course

(*b*) It has gone through ſeveral editions.

(*c*) A divine of diſtinguiſhed learning and eloquence, author of an excellent ſermon on original ſin.

[*A*] *Having performed the exerciſe with the greateſt applauſe.*] He gave a remarkable proof of his uncommon abilities, in performing the exerciſe for this degree. He choſe for his firſt queſtion, upon which conſequently his Theſis was made, Whether Arian ſubſcription be lawful; a queſtion, as has been well obſerved (1), worthy of him who had the integrity to abhor with a generous ſcorn all prevarications, and the capacity to ſee through and deteſt thoſe evaſive arts, with which ſome would palliate their diſingenuity. When Dr James the Profeſſor had endeavoured to anſwer his Theſis, and embarraſs the queſtion with the dexterity of a perſon long practiſed in all the arts of a ſubtle diſputant, he immediately replied in an extempore diſcourſe of above half an hour long, with ſuch an eaſy flow of proper and ſignificant words, and ſuch an undiſturbed preſence of mind, as if he had been reading what he afterwards printed, *The caſe of the Arian ſubſcription conſidered, and the Supplement* to it. He unraveled the Profeſſor's fallacies, reinforced his own reaſoning, and ſhewed himſelf ſo perfect a maſter of the language, the ſubject, and himſelf, that all agreed no one ever appeared to greater advantage. There were ſeveral perſons of the ſiſter-univerſity preſent, who after the doctor's death ſpoke of the great applauſes he received, and the uncommon ſatisfaction which he gave. He was happy in a firſt opponent (2), one of the brighteſt ornaments of the church, and fineſt writers of the age, who gave full play to his abilities, and called forth all that ſtrength of reaſon of which he was maſter. It is worth obſerving that Dr Clarke, in the ſecond edition of his Scripture-Doctrine, publiſhed in 1719, left out theſe words which were in his former introduction to that book (3), *It is plain that a man may reaſonably agree to ſuch forms,* [of ſubſcription to the xxxix articles of religion] *whenever he can in any ſenſe at all reconcile them with ſcripture.* This is remarked by our author in the Preface to his vindication of Chriſt's divinity, to be for that doctor's honour, and it ſeems to reflect a good ſhare of honour on our author's act now under conſideration, an account of which muſt have come to the doctor's ears, and probably the arguments which he found had been urged therein, were a great means of bringing him to chenge his opinion. And it is well known that afterwards he conſtantly refuſed the ſubſcription.

(3) The 1ſt edition of the ſcripture-doctrine was publiſhed in 1712.

[*B*] *His Quæries.*] How theſe were in a manner forced from him, he has told us in the preface; to which we ſhall add, that the friends there mentioned were members of a club jointly with our author at Cambridge. The gentleman for whoſe uſe they were intended was Mr Jackſon, Rector of Roſſington in Yorkſhire, to whom they were conveyed by Mr Lewis Peirſon, who with ſeveral others had at that time a good opinion of Mr Jackſon's ſincerity and ingenuity, with whom the deſign was to carry on the diſpute only in a private correſpondence. But Mr Jackſon having ſent an anſwer to the Queries, and received our author's reply, then acquainted him, that he had put the Queries, together with his anſwer, to the preſs, ſignifying, that our author muſt follow him thither, if he intended any thing farther. This occaſioned the publication of his reply, under the title of *A vindication of Chriſt's divinity, being a defence of the queries, &c. in anſwer to a clergyman in the country*, 1719. In it he has purſued his antagoniſt with the moſt ſcrupulous exactneſs in every particular; not contenting himſelf with giving a clear anſwer to every argument, but having obſerved, that Dr Clarke's ſcheme was thought to contain ſomething new, only by being dreſſed up in a new method, he hunted him thro' all the ſubtle wiles and crafty doublings of it, and thus ſtripping his notion of all its diſguiſes, he brought the whole into full light, whereby it is ſeen to be nothing elſe but downright Arianiſm, notwithſtanding all the ſubterfuges contrived to elude that odious name. In adapting his reply to the doctor's method, he thought it neceſſary to diſcover the little artifices made uſe of in the introduction, to uſher his notions into the good opinion of the world, notwithſtanding the almoſt univerſal oppoſition then made to them; this being done by drawing a parallel between his own caſe and that of biſhop Bull, in reſpect of the doctrine of Juſtification (4). Our author in his Preface ſhewing the difference between the two caſes, has with equal art, tho' without artifice, marked the ſeveral defects and blemiſhes of his antagoniſt's book. In this preface he likewiſe takes notice, that Dr Clarke had lately publiſhed a 2d edition of his *Scripture Doctrine*, where he had made ſeveral additions and alterations, but had neither retracted nor defended thoſe parts, which Mr Nelſon's friend had judiciouſly replied to in his

(4) This will appear the more appoſite, when it is conſidered that Dr Clarke entertained a ſtrong fancy, which he had frequently declared in a prophetic ſpirit, that the time would come when his doctrine of the trinity (like that of Biſhop Bull on juſtification) ſhould be as univerſally embraced as it was then rejected.

True

courſe of the controverſy he eſtabliſhed his reputation of being the ableſt (unleſs perhaps Biſhop Bull may be excepted) that had ever entered into the diſcuſſion of that moſt arduous ſubject [*C*]. Accordingly, the Lady Moyer founding her lecture in defence of our Lord's Divinity, Dr Waterland was appointed by Dr Robinſon, Biſhop of London, to preach the firſt courſe of theſe lectures (*d*), which he performed in 1720; the ſame year he publiſhed an anſwer to Dr Whitby's reply upon that ſubject [*D*]. The following year,

True Scripture Doctrine continued: 'I hope,' ſays he, 'the impartial reader will take care to read one along 'with the other, in juſtice to both theſe gentlemen.' But it muſt be obſerved, that ſoon after in the ſame year Dr Clarke did publiſh an anſwer to that piece, under the title of *A Letter to the Author of a Book intituled* 'The true Scripture Doctrine of the Trinity con'tinued and vindicated,' recommended firſt by Mr Nelſon, and ſince by Dr Waterland (5). As to the merits of this diſpute, it was preſently obſerved, that the main ſtreſs of the difference between the two combatants lay in the point of the ſubordination of the Son to the Father, which Dr Clarke aſſerted from 300 texts of ſcripture to be ſomething real, and inferred from thence a real inferiority, the reality of which he ſuppoſes to conſiſt in the Son's being derived and generated, not being ſelf-exiſtent and independent, as the Father is. To this our author anſwers, that the ſame titles, attributes, and worſhip are aſcribed in thoſe texts to the Son, as well as to the Father; and therefore that this ſubordination is only of office, and not one of nature, which is individually the ſame in both, whence he infers, that the Son is *ſelf-exiſtent and independent*, if by thoſe terms be indicated any real perfection or eſſential character. 'But, as to my own part,' continues he, 'I never pretend that ſelf-exiſtence is an 'eſſential character of God. You might have conſi'dered, that we deny it abſolutely, we ſuppoſe it 'merely negative, and call it a perſonal character. 'Neceſſary exiſtence is an eſſential character, and be'longs equally to Father and Son; if that be what 'you mean by ſelf-exiſtence, then that alſo belongs 'to both. Explain yourſelf, and deal not ſo much 'in ambiguous terms, which we have juſt reaſon to 'complain of (6). The doctor [Clarke] knows how 'ſelf-exiſtent ſounds by cuſtom among common read'ers, ſo that denying the Son to be ſelf-exiſtent may 'be thought by many the ſame thing with denying 'him to be God. Had he pleaſed in his tranſlations 'of αγεννητος and elſewhere, to ſay oftner unbegotten 'or underived, inſtead of ſelf-exiſtent, it would have 'been kind towards his readers: perhaps as kind to 'himſelf, for it will be elſe thought beneath a grave 'writer to take the poor advantage of an equivocal 'word, as it is a diſparagement to any cauſe to be 'ſerved by it.' Further, *intelligent agent* is another plauſible term made uſe of by Dr Clarke to inſinuate that Being and Perſon is the ſame, and that there is no medium between Sabellianiſm and Tritheiſm. The argument being urged alſo by Mr Jackſon thus: *If by one perſon he* [Mr Waterland] *means one* INTELLIGENT AGENT, *he makes the Sabellians Catholicks, and condemns his own friends for Tritheiſts.* 'I certainly mean,' anſwers our author, 'a real perſon, an hypoſtaſis; no 'mode, attribute, or property, as you might eaſily 'have perceived. The charge of Tritheiſm I have 'ſufficiently anſwered before, and returned it to its 'proper owners. I ſhall only add here, that each di'vine perſon is an individual *intelligent agent*; but as 'ſubſiſting in one undivided ſubſtance, they are all 'together in that reſpect but one undivided *intelligent* '*agent*. Thus my friends ſtand clear of Tritheiſm (7).' Theſe two particulars were chiefly laid hold on by Dr Clarke for writing an anſwer, which being publiſhed in 1720 (8), our author printed a Reply to it in 1723 intituled, *A ſecond Vindication of Chriſt's Divinity: or a ſecond Defence of ſome Queries relating to Dr Clarke's ſcheme of the Holy Trinity, in anſwer to the Country Clergyman's Reply. Wherein the learned Doctor's Scheme, as it now ſtands, after the lateſt correction, alteration, and explanation, is diſtinctly and fully conſidered.* This, which is the longeſt, has always been eſteemed his moſt accurate performance upon the ſubject, and yet we are aſſured it was finiſhed in two months, and ſent to the preſs (9). However the controverſy did not end here. In 1724 his antagoniſt publiſhed *Obſervations on the ſecond defence*, &c. to which Dr Waterland publiſhed, the ſame year, the following piece, *A farther defence of Chriſt's divinity*, in anſwer to a pamphlet intituled *Obſervations on Dr Waterland's Second Defence of ſome Queries*, &c. Upon the whole, the main difference between thoſe two very learned antagoniſts, lies, if I miſtake not, in this; Dr Clarke is allowed to have collected faithfully all the texts relating to the Trinity, and interprets them by the univerſally received maxims and rules of right reaſoning upon all ſubjects: Dr Waterland rejecting that way of reaſoning, as not applicable to the Trinity, a ſubject above reaſon, takes the texts in their literal grammatical ſenſe, which he confirms by the ſuffrage of the fathers. And hence may be unriddled that enigmatical remark, aſcribed to the late Queen Caroline, that Dr Clarke had moſt reaſon, but Dr Waterland moſt truth.

[C] *The beſt writer of his time upon the Trinity.*] In 1719, the Earl of Nottingham publiſhed a treatiſe upon the ſubject (10), in anſwer to Mr Whiſton; where, p. 19, he expreſly calls upon that gentleman, or any man elſe, to give a juſt anſwer to the excellent tracts written by Dr Waterland in vindication of Chriſt's divinity *; and it is well known, that, in the ſame ſpirit, both the Univerſities, the London Clergy, as alſo great Bodies of Divines in all parts of England, addreſſed his Lordſhip with their thanks upon the occaſion, in which our author was manifeſtly comprehended. Directions alſo by the King were printed and ſent to the Archbiſhops and Biſhops, for preſerving unity in the church, and the purity of the Chriſtian faith, particularly upon the doctrine of the holy Trinity (11). How agreeable this was to our author's ſentiments, appears from the following paſſage in his firſt defence of his Queries, publiſhed in 1720. ——— 'Many,' ſays he, 'have been prying and 'inquiſitive into this matter, hoping to know ſome'thing more particularly of it, till they have come to 'doubt even of the thing itſelf, and ſo have fallen 'into hereſy; and Catholics have ſometimes exceeded 'in this way, endeavouring to explain beyond their 'ideas, which is really nothing elſe but multiplying 'words. The notion is ſoon ſtated, and lies in a little 'compaſs; all that words are good for after, is to fix 'and preſerve that notion, which is not improveable '(without a new revelation) by any new idea, but 'may be obſcured and ſtifled by a multitude of words.' This declared, he proceeds thus. 'The moſt uſeful 'words for fixing the notion of diſtinction, are perſon, 'hypoſtaſis, ſubſiſtence, or the like: for the divinity 'of each perſon, ομοιυσιος, αγεννητος, or eternal, un'created, immutable: for their union, περιχωρεσις, 'interior generation, proceſſion, or the like. The 'deſign of theſe terms is not to enlarge our views, 'or to add any thing to our ſtock of ideas, but to ſe'cure the plain fundamental truth, That Father, Son, 'and Holy Ghoſt are all ſtrictly divine and uncreated, 'and yet are not three Gods, but one God. He that 'believes this ſimply and in the general, as laid down 'in ſcripture, believes enough, and needs never trou'ble his head with new queſtions, whether the union 'of the three perſons ſhould be called individual or 'ſpecific, whether Perſon and Being are reciprocal 'terms, whether every Perſon may be properly ſaid 'to be ſelf exiſtent, how three perſons can be all in 'the ſame place, whether all perfection might not as 'well have been confined to one perſon only, and 'whether *One* might not have been as good as *Three*. 'Theſe are difficulties, *difficiles nugæ*, moſtly verbal, 'or vain enquiries, and do not concern common Chri'ſtians any further than to be upon their guard, that 'they be not impoſed on by theſe ſubtleties invented 'to puzzle and perplex a plain ſcripture truth, which 'is eaſily perceived and underſtood in the general, 'that is, as far as required to be believed. Minute 'particulars about the *modes* may be left to the *Diſpu*'*ters of this world*, as a trial of their good ſenſe, their 'piety, modeſty, and humility (12).'

[*D*] *Dr Whitby.*] The poſition he attacked is in Dr Whitby's *Diſquiſitiones modeſtæ in Bulli Defenſionem Fidei Nicenæ*, publiſhed in 1718; and that Doctor publiſhing the ſame year *A reply to Dr Waterland's objections againſt Dr Whitby's Diſquiſitiones*, our author immediately drew up *An anſwer to Dr Whitby's reply*, being

* His Lordſhip alſo preſented our author with a handſome and rich pair of ſilver candleſticks on the occaſion.

(11) Gen. Hiſt. of England.—— Our author himſelf likewiſe intimates the ſucceſs of his writings, particularly in the province of York, where the new hereſy, as he calls it, died in a manner as ſoon as it firſt aroſe; and no ſooner began to lift up its head, but ſunk down again in ſhame and confuſion.— Dedicat. of the Critical Hiſtory of the Athanaſian Creed.

(12) Quære 21. p. 321.

year, 1721, he was preſented, by the Dean and Chapter of St Paul's, London, to the Rectory of St Auſtin's and St Faith there (*e*). In 1723 he publiſhed his *Hiſtory of the Athanaſian*

being a vindication of the charge of fallacies, miſquotations, miſconſtructions, miſrepreſentations, &c. reſpecting his book intituled Diſquiſitiones modeſtæ, *in a Letter to Dr Whitby*, which was printed the ſame year in 8vo. And in the liſt of our author's works, ſubjoined to Mr Berryman's Sermons at Lady Moyer's lectures, we are directed for the charge of fallacies, &c. to the firſt Defence of the Queries, &c. from p. 399. to p. 430. incluſive. Add to this, that our author had before taken notice, in the preface to the ſame book, of the *Diſquiſitiones*; and it is to a paſſage in the preface of that book that we owe ſuch an excellent explication of what is meant by believing in myſteries, as, for the ſatisfaction of our readers, ought not to be omitted. For the clearing up of this point, he reduces what relates to it to the following particulars, as ſo many diſtinct caſes; and puts the firſt caſe to be where the terms of a propoſition, ſubject, and predicate, or either of them, are not at all underſtood by the perſon to whom it is given. For inſtance: The words *Mene, Mene, Tekel, Upharſin* (13), conveyed no idea at all to King Belſhazzar, who therefore could give no kind of aſſent to them. In ſuch a caſe, viz. where the language is unknown, a man neither admits nor rejects a propoſition, becauſe to him it is no propoſition, but merely ſounds or ſyllables. 2. The ſecond caſe is, when the language or words of a propoſition are underſtood, but ſo put together as to furniſh us with no certain and determinate meaning. A late anonymous writer has given a very proper example of this, *A woman ought to have power on her head* (14), *becauſe of the angels.* The words *woman, power, head, angels*, are all plain words, and carry with them obvious familiar ideas, and yet a man may have no idea of what is aſſerted in that propoſition, and therefore can give no aſſent to it, more than this, that it is true in ſome ſenſe or other, or that ſomething ſhould be believed, if he underſtood what; which is not aſſenting to that propoſition, but to another, namely, that whatever ſcripture aſſerts is true. The aforeſaid author obſerves very ſhrewdly, that having no certain ideas of the terms of the propoſition, it is to him a myſtery; and the juſtice and equity of his drawing a parallel between this and the myſteries of Chriſtianity, properly ſo called, muſt be a myſtery to as many as cannot perceive either the ſenſe or the ingenuity of doing it. But 3dly, Another caſe may be, when the terms of a propoſition are underſtood, but are ſo connected or divided, as to make a propoſition manifeſtly repugnant: a triangle is a ſquare, a globe is not round; ſuch we reject, not becauſe we do not underſtand them, but becauſe we do. Sometimes indeed a contradiction lies concealed under the words it is couched in, till it be reſolved into plainer: For inſtance, *The Exiſtence of a firſt cauſe is demonſtrable a priori*; as it lies under theſe terms, it ſeems to be reducible to caſe the ſecond, as being found without ſenſe; but reſolve it into this, There is a cauſe prior to the firſt, and then the repugnancy appears. Again; *Neceſſity of exiſtence is antecedently in order of nature the cauſe and ground of that exiſtence*; theſe are only ſo many ſyllables: but put it thus, A property is in order of nature antecedent to the ground and cauſe of the ſubject which ſupports it, and the contradiction is manifeſt. Once more; *Neceſſity abſolute and antecedent exiſtence is antecedently in order of nature to the exiſtence of the firſt cauſe muſt operate every where alike.* This propoſition ſeems to fall under caſe the ſecond; but let it be reſolved into plainer words, and then it will appear that this is the proper place for it. 4. The fourth caſe is, when the terms of the propoſition carry with them ideas really but not plainly repugnant. *God certainly foreknows events depending on uncertain cauſes: The omnipreſent ſubſtance is not extended.* Propoſitions of this kind may be and are aſſented to, becauſe there may be a greater appearance of repugnancy on the oppoſite ſide of the queſtion, or becauſe there is not reaſon ſufficient for ſuſpending aſſent. 5. A fifth caſe is, when a propoſition is formed in general terms, and reaches not to minute particulars. *The pure in heart ſhall ſee God:* the phraſe of *ſeeing God* carries ſome idea, but not particular, preciſe, or determinate. *At God's right hand are pleaſures for evermore*, we have only general confuſed ideas of, yet ideas we have, and we aſſent as far as our ideas reach; having no more than a general confuſe conception, our faith in ſuch points can riſe no higher, nor reach any further, nor can more be expected of us. 6. The ſixth caſe is, where the terms of a propoſition convey ideas, but ideas of pure intellect, ſuch as imagination can lay no hold of. Philoſophers have illuſtrated this by the inſtances of a *chiliagon* and a *triangle*. It is underſtood what is meant by a figure of a thouſand ſides as clearly as we do what is meant by one of three only; but we imagine one more diſtinctly than the other. This inſtance belongs more properly to diſtinct and confuſe imagination, than to the purpoſe it is brought, for ideas of numbers in the abſtract are properly ideas of pure intellect; ſo are or ſhould be ideas of our own ſouls, of angels, of God: we may underſtand ſeveral things of them, but imagination has very little to do in ſuch matters; however, our not being able to imagine, provided we do but underſtand, is no hindrance to our aſſent in propoſitions of this kind. 7. The laſt and eaſieſt caſe is, when the terms convey full and ſtrong ideas to the underſtanding and imagination alſo: For inſtance; *The man Chriſt Jeſus ate, drank, ſlept, was crucified, died, and was buried*; here all is very clear and plain, even to thoſe who love not to think upon the ſtretch, or to be at any pain in aſſenting.

Now to apply theſe particulars to the point. Whatever is reducible plainly to the three firſt or the laſt of theſe caſes, is either no matter of faith at all, or no myſtery. There remains three other caſes, where the ideas are either ſeemingly repugnant, or ſuch as reach not to particulars, or ſuch as imagination has no concern with. As aſſent may be given in all theſe, ſo it is poſſible we may here find articles of faith; and, if ſome gentlemen will give us leave, after we have thus explained what we meant by the term, we will call ſuch articles myſteries. For example, the belief of three perſons, every one ſingly God, and all together one God, ſeems to fall under caſe the fourth. The ideas are ſeen ſingly not really repugnant; we know what we mean by ſaying every one as clearly as if we ſaid any one is God, a perſon having ſuch and ſuch eſſential perfections. We ſee not perfectly how this is reconciled with the belief of one God, as we ſee not how preſcience is reconciled with future contingents, yet we believe both, not doubting but there is a connexion of the ideas, though our faculties reach not up to it.

Omnipreſence, I think, is another myſtery, and falls chiefly under caſe the fifth: we have a general confuſe idea of it, and mean ſomething by it; the particular manner how it is, we have no notion of, and therefore are not obliged to believe any particular *modus:* for upon this or that there are appearing repugnancies and inconſiſtencies; and ſo far this is reducible to caſe fifth as well as fourth.

The incarnation is another myſtery, and comes under caſe the fourth and fifth. There are ſome ſeeming not real repugnancies, and the ideas we have of it are general and confuſe, not particular or ſpecial. Such as are our ideas, ſuch our faith muſt be, and we cannot believe faſter than we conceive; for believing is conceiving, confuſely, if our ideas are confuſe; generally, if general; diſtinctly and adequately, if diſtinct and adequate.

The generation of the Son of God is another myſtery: Ideas we have of it, and know what we mean by it; but being ſpiritual, imagination can lay no hold of them; being general and confuſe, we cannot reach to particulars; and being ſeemingly repugnant, we cannot make out the entire connexion. Equality of nature, which is part of the notion, is a general idea, and well underſtood; reference to a head or fountain is general too, but more confuſe, and beſides figurative: eternal reference very confuſe, as the idea of eternity generally muſt be. Inſeparability is general, obſcure, negative; and we know but very imperfectly what the ſeries of ſpiritual things means; nevertheleſs we underſtand enough (though we can imagine little) to make it properly an article of belief; and no man can reaſonably pretend to reject it, as having no meaning, or carrying no ideas at all with it.

The ſimplicity of God is another myſtery, of which we have ſome, but a very imperfect, general, and obſcure, idea: it may fall under caſe fifth and ſixth. Scripture ſays little of it, and we have taken it chiefly

from

(*e*) He was firſt recommended by Dr Godolphin, Provoſt of Eton, and approved by Dr Stanley, both Reſidentiaries, and by Dr Hare, the Dean.

(13) In the book of Daniel, ch. v. v. 25.

(14) 1 Corinth. xi. 10.

Athanaſian Creed [*E*], having a little before been promoted to the Chancellorſhip of the church of York by Sir William Dawes, Archbiſhop of that province. In 1727, by the application of the Lord Townſend, Secretary of State, and Dr Gibſon, at that time Biſhop of London, his Majeſty collated him to a Canonry in the church of Windſor; and upon the promotion of Dr Booth to the Deanery, our author was preſented, in 1730, by that Chapter, to the Vicarage of Twickenham in Middleſex; upon which he reſigned the rectory of St Auſtin and St Faith, not being willing to hold two benefices at once with the cure of ſouls: but this principle was deemed conſiſtent with his holding the Archdeaconry of Middleſex, which he accepted this year, on the collation of his Dioceſan,

from metaphyſicks, which are ſhort and defective. When we come to enquire whether all extenſion, plurality, diverſity, compoſition of ſubſtance, and accidents, be conſiſtent with it, then it is that we diſcover how confuſe and inadequate our ideas are: and hence it is, that while all parties admit the divine ſimplicity in the general, yet when they come to be preſſed with it in diſpute, they often give and ſtate the notion ſo as to make it ſuit with their particular ſchemes. To this head belongs the perplexing queſtion attended with difficulties on all ſides, whether the divine ſubſtance be extended or no? and if this extenſion be admitted, ingenuous thoughtful men will divide again upon another queſtion, whether infinite or no? ſome thinking it very abſurd for any attribute of God not to be infinite, others thinking it no leſs abſurd to admit any infinite extenſion, number, or the like, at all. They that ſuppoſe the divine ſubſtance extended, leſt they ſhould conceive it as a point, and leſt they ſhould admit that any thing can act where it is not, are, when preſſed with difficulties about aliquot parts, forced to admit, that any part of that ſubſtance, how great ſoever, or of whatever dimenſions, muſt be conceived only as a point in proportion to the whole. From whence it follows, that unleſs the world be infinite, all that acts of that infinite ſubſtance in the world is but a point; and ſo the whole ſubſtance (except that point) either acts not at all in the world, or acts where it is not.

Self-exiſtence is another myſtery of which we know little, and the learned are hardly agreed whether it be a negative or poſitive idea, yet every body believes it in the groſs, confuſely, and indeterminately. It is manifeſt, on one hand, that the firſt cauſe has no cauſe, neither itſelf, nor much leſs any property of itſelf, nor any thing elſe; yet it may ſeem very wonderful how any thing ſhould exiſt without a reaſon *a priori*, that is, without a cauſe for it.

To name no more, *Eternity* itſelf is the greateſt myſtery of all. *An Eternity paſt*, is a thought which puzzles all our philoſophy, and is too hard for the ſharpeſt wits to reconcile. The *nunc ſtans* of the ſchools, though older than the ſchools, has been exploded, and yet ſucceſſion carries with it inſuperable difficulties. There is nothing peculiar to the doctrine of the Trinity any thing near ſo perplexing as eternity, yet the gentlemen who are for diſcarding myſteries are forced to believe it. I know no remedy for theſe things, but an humble mind, a juſt ſenſe of our ignorance in many things, and of our imperfect knowledge in all.

We have in the preceding remark given an inſtance of our author's excellently artful conduct in this controverſy, and the preſent extract is produced as a ſpecimen of the ſame adroit turn. The whole account of myſteries is thrown into a digreſſion, and in that he has very appoſitely found a place to lay open to his readers, what kind of metaphyſical philoſophy it was which had led Dr Clarke into his notions about the Trinity; and we ſhall find him afterwards making it profeſſedly the ſubject of a ſet diſcourſe (15).

[*E*] *The critical hiſtory of the Athanaſian Creed.*] Our author goes on to purſue his antagoniſt, Dr Clarke, in this piece, which he expreſly intimates was undertaken by him in order to reſcue the excellence of this form of Faith from the diſparagements thrown upon it by the Doctor, who had with ſome earneſtneſs applied to the governors of the church to get it laid aſide. The Doctor's reaſons being the cloſeſt and ſtrongeſt that can be offered for his opinion, we ſhall lay them before the reader, with the anſwers of our author. Object. 1. *This Creed is confeſſed not to be Athanaſius's, but the compoſition of an uncertain obſcure author, written in one of the darkeſt and moſt ignorant ages of the church, having never appeared till about the year* 800, *nor received in the church till ſo very late as about the year* 1000. Anſw. To detect the falſe facts here advanced, had been the buſineſs of the firſt part of our author's deſign, where he has ſhewn, that it was certainly compoſed before the year 431; that it was received in the Gallican church in 773, and into the church of England in 800. He allows it to be none of Athanaſius's, but obſerves that our church does not receive it upon the authority of the compiler, nor determines any thing about its age or author (16), but receives it becauſe the doctrines contained in it may be proved by moſt certain warrants of holy ſcripture. The uſe of it is to be a ſtanding fence and preſervative againſt the wiles and equivocations of moſt kind of Heretics. Luther calls it *a Bulwark to the Apoſtles Creed* (17); and it is in high eſteem among all the reformed Churches. Obj. 2. is, *That it is ſo worded, as that many of the common people cannot but be too apt to underſtaud it in a ſenſe favouring either Sabellianiſm or Tritheiſm.* In anſwer our author obſerves, That this objection is equally levelled againſt all Creeds containing the doctrine of a coeternal Trinity in Unity, and therefore againſt the faith of the church, rather than of this particular form of expreſſing it. That the common people can be in no danger, if they attend to the Creed itſelf (which fully obviates and confutes both theſe hereſies) inſtead of liſtening to thoſe who firſt deceive them into a falſe conſtruction, and then diſingenuouſly complain of their being too apt to miſunderſtand it. 3. The third objection is, *That there are in this Creed many phraſes which may ſeem to give Unbelievers a needleſs advantage of objecting againſt religion, and amongſt Believers themſelves cannot but to the vulgar have too much the appearance of contradictions, and ſometimes (eſpecially the damnatory clauſes) to the moſt pious and learned, and were the principal reaſon of Mr Chillingworth's refuſing to ſubſcribe the* 39 *articles.* To this it is anſwered, That as to Unbelievers, the church has always been able and willing to anſwer them; ſorry at the ſame time to find that any who call themſelves Chriſtians ſhould join with the unbelievers in the ſame trifling objections, thereby giving them a very needleſs advantage, and the moſt pernicious encouragement. As to vulgar Believers, they ſuſpect no contradictions, till ſome labour to create ſuch a ſuſpicion in them. As to Mr Chillingworth's caſe, ſee his article in this work. The 4th objection is, *The church declares particular forms of divine worſhip to be alterable according to the exigency of the times.* Anſw. The Church, no doubt, has ſuch a power; but the revival of Arianiſm cannot be looked upon as one of thoſe exigencies, but a reaſon rather for retaining them. Object. 5. *Scripture alone is ſufficient: The primitive Church was very cautious about multiplying Creeds; the Council of Epheſus forbad by an Anathema any other Creed but that of Nice to be propoſed or received in the church.* Anſw. The whole deſign of Creeds is to preſerve the *Rule of faith* as contained in the holy ſcriptures, and not in the falſe gloſſes and corrupt inventions of men. And when endeavours are uſed to poiſon thoſe fountains of truth by ill comments and forced conſtructions, preſervatives muſt be thought on to keep the fountain pure, and the faith ſound and whole. The conſtant way of the primitive churches was to enlarge their Creeds in proportion to the growth of hereſies. The Council of Epheſus made no order againſt new Creeds, that is, Creeds more and more enlarged, if there ſhould be occaſion, but againſt a new faith (πίϛιν ἑτέραν) a faith different from, and repugnant to, that of Nice, ſuch as was offered by the Neſtorians in that Council. Obj. 6. *In the year* 1689, *many wiſe and good Prelates of our own, commiſſioned to review and correct our Liturgy, unanimouſly agreed, that the uſe of the Athanaſian Creed ſhould be no longer impoſed.* Anſw. The fact is miſrepreſented, as is manifeſt from the Rubric agreed on, which was in the following terms. Upon theſe Feaſts, Chiſtmas day, Eaſter day, Aſcenſion day, Whitſun day, Trinity Sunday, and upon All Saints day, ſhall be ſaid at morning prayer, by the Miniſter and People,

---

(15) In Remark [*I*].

(16) He aſcribes it as moſt probable to Hilary Biſhop of Arles in France. Hiſt. of the Athan. Creed, ch. viii. p. 213. & ſeqq. 2d edit. 1728. 8vo.

(17) His words are, Eſt hoc velut pro pugnaculum primi illius Apoſtolici Symboli. Luther de tribus ſymbolis. Oper. tom. vii. p. 138.

Dioceſan, Dr Gibſon. Dr Clarke's Expoſition of the Church Catechiſm being publiſhed the ſame year, our author immediately printed Remarks upon it [*F*], wherein he obviated all the pretences alledged therein for introducing the new Doxology. In this piece he advanced a poſition concerning the comparative value of poſitive and moral duties, which

ple, ſtanding, inſtead of the Creed commonly called the *Apoſtles Creed*, this confeſſion of our Chriſtian Faith, commonly called *the Creed of St Athanaſius*, the artic'es of which ought to be received and believed as being agreeable to the holy ſcriptures. And the condemning clauſes are to be underſtood as relating only to thoſe who obſtinately deny the ſubſtance of the Chriſtian Faith (18). Obj. 7. *The Apoſtles Creed is the Rule of Faith, and this only is neceſſary to Baptiſm; that which was once ſufficient to bring men to heaven muſt be ſo now*; *and that there is no occaſion for being ſo minute and particular*; with more to the like purpoſe. In anſwer to this, which our author takes notice is moſtly taken from the words of Biſhop Taylor, he obſerves, that the Biſhop goes upon a falſe ſuppoſition, that the Creed called the Apoſtles Creed was compoſed by the Apoſtles: as he has alſo another falſe preſumption, that the Apoſtles Creed was always the ſame that it is now, whereas it was not brought to the preſent intire form till after the year 600; being only the baptiſmal creed of the Roman Church, and deſignedly ſhort, for the uſe of thoſe who were to repeat it at baptiſm. But to ſet this whole matter right, it ought to be conſidered, that Creeds were never intended to contain as it were a certain quantity of Faith as neceſſary to bring men to heaven, and no more than is neceſſary: were this the caſe, all Creeds ought preciſely to have conſiſted of an equal number and the ſame individual articles, whereas no two Creeds are to be found which anſwer to ſuch a preciſion: a plain argument that the church in forming Creeds early and late went upon no ſuch view, but on quite another principle. The deſign of all was to keep up as ſtrictly as poſſible the whole compages or fabric of the Chriſtian faith, as it ſtands in ſcripture; if any part came to be attacked, then to bend all their cares to ſuccour and relieve that part, in order ſtill to ſecure the whole. There is nothing more in this than the very nature and circumſtances of the thing neceſſarily leads to. Therefore, if any man would talk ſenſe againſt the uſe of this or that Creed in any church, he ought to ſhew either that they contain ſuch truths as no man ever did, and probably never will, oppoſe, which will be a good argument to prove the Creed to be ſuperfluous, or that it contains articles which are not true, or at beſt doubtful, which will be a good argument to prove ſuch a Creed hurtful. As to the Athanaſian Creed, it can hardly be thought ſuperfluous ſo long as there are any Arians, Photinians, Sabellians, Macedonians, Apollinarians, Neſtorians, or Eutychians, in this part of the world. And as to its being hurtful, that may then be proved, when it can be ſhewn that any of thoſe forementioned hereſies were no hereſies, or have not been juſtly condemned. As to the Vulgar, they will underſtand in the general, and as far as is ordinarily to them neceſſary, the main doctrines of a Trinity in Unity, and of God incarnate; and as to particular explanations, whenever they have occaſion to look farther, they will find the true ones laid down in this Creed, which will be uſeful to prevent their being impoſed upon at any time with falſe ones. It is not pretended, that all are capable of ſeeing through every nicety, and of perceiving the full intent of this form, and what it alludes to; but as many as are capable of being ſet wrong in any one branch by the ſubtlety of ſeducers, are as capable of being ſet right by this rule given them, and they will as eaſily underſtand one ſide as t'other. Upon the whole, I look upon it as exceeding uſeful and even neceſſary for every church to have ſome ſuch form as this, or ſomething equivalent, open, and common to all its members; and as to this particular form, it has ſo long prevailed, and ſo well anſwered the uſe intended, that, all things conſidered, there can be no ſufficient reaſon for changing any part of it, much leſs for laying the whole aſide. To conclude; as long as there ſhall be any men left to oppoſe the doctrine which this Creed contains, ſo long will it be uſeful and even neceſſary to continue the uſe of it, in order to preſerve the reſt. I ſuppoſe, when we have none remaining to find fault with the doctrines, there will be none to object againſt the uſe of the Creed, or ſo much as to wiſh to have it laid aſide. Theſe laſt words cannot, I think, be underſtood to point at Dr Tillotſon: but, however, it is remarkable, that our author paſſes by in ſilence an objection made by Dr Clarke from the words of the Archbiſhop of that import. It is true, Dr Clarke only mentions it as an hearſay, which might be the reaſon no notice was taken at this time of it by our author; but it has ſince been confirmed by a letter of his Grace to Dr Burnet (19).

[*F*] *Remarks upon Dr Clarke's catechiſm.*] It might eaſily be ſuſpected, that an expoſition of the catechiſm by Dr Clarke would be ſuch as was agreeable to his own notions: our author therefore, ever watchful of all the arts of his antagoniſt, thought it neceſſary to prevent the deſign of their being introduced under ſo ſpecious a cover. The buſineſs conſequently of theſe remarks, is to point out all the dangerous paſſages in that expoſition. The chief of theſe, he obſerves, lie in the Doctor's having dropt the worſhip of the Son and Holy Ghoſt; and, as he had alſo in The modeſt plea continued, publiſhed in 1719, contended for the manner of worſhipping the Father through Chriſt, in oppoſition to every other mode of worſhip, or in oppoſition to the direct worſhip of any perſon beſides the Father only, our author examines all that had been there urged on that head; he afterwards runs through all the articles of the creed, reſcuing them from inſidious comments of his antagoniſt. In ſpeaking of the ſacraments, eſpecially of the Lord's Supper, he obſerves, that Dr Clarke is miſtaken in expounding John vi. ver. 35. and 36. of imbibing and digeſting his doctrine, though ſome very judicious moderns had gone before him in it; to which may be added, that Biſhop Hoadly followed him in that interpretation (20), notwithſtanding it had before been obſerved by our author, who ſays, whoſoever will attentively read over that chapter, may eaſily enough perceive, that our Lord is not there ſpeaking either of his doctrine then taught, or of the euchariſt to be inſtituted, but of the great atonement to be made by his paſſion. It is obſervable, that this ſenſe of that paſſage is entirely dropped by the Biſhop, who maintains ſomewhat largely the ſame ſenſe that had been put upon it by Dr Clarke againſt the inſtitution of the Euchariſt, without taking the leaſt notice of this other by Doctor Waterland, viz. that the eating his fleſh, and drinking his blood there mentioned, means the having a part in that atonement, as being partakers of Chriſt's death and ſatisfaction. By this and only this we live, without it we die. All that ſhall be ſaved, are ſaved by his meritorious death and paſſion. This, continues our author, I take to be the doctrine of John vi. which, out of figure, comes plainly to this, That there is no ſalvation given to men, but in and through the ſatisfaction of Chriſt. But there is a better harmony between theſe two doctors, I mean Biſhop Hoadly and our author, in reſpect to Dr Clarke's expoſition of 1. Cor. x. 16. *The bread which we break, is it not the communion of the body of Chriſt?* by which Dr Clarke underſtanding the communion of all the members of Chriſt's body one with another, this interpretation our author and the biſhop afterwards declare to be irreconcileable to the words immediately preceding, *The cup of bleſſing which we bleſs, is it not the communion of the blood of Chriſt?*—St Paul (ſays the biſhop) is not here in this verſe ſpeaking of the body of Chriſt, i. e. Chriſtians partaking of the Lord's ſupper, but of that body of Chriſt, of which Chriſtians partake. However, in explaining what is meant by that body of Chriſt, he declares it to be that in the Lord's Supper where we do not eat bread and drink wine, as at an ordinary meal, but as memorials of the body and blood of Chriſt, in honour to him as the Head of that body of which we are all members; thus utterly rejecting that interpretation, though eſpouſed by ſome learned men, of the words ſignifying a communion or partaking of the benefits of Chriſt's body broken, and blood ſhed. And to confirm this opinion, he labours to ſhew, that St Paul's argument neither requires nor admits ſuch a ſenſe. Whereas our author tells us, the plain meaning of theſe words is, that in the euchariſt there

(18) To this tranſcript is ſubjoined the following atteſtation. This, word for word, is the Rubric, as it was ſettled and finally agreed on by the Commiſſioners in 1689, as it ſtands in the original book, now in the hands of the Lord Bp of London, Nov. 7. 1727. *Preface to the Hiſt. of the Athan. Creed,* in a Poſtſcript, Nov. 7. 1727.

(19) See Dr Tillotſon's article, vol. VI. part i. p. 3952.

(20) See his article in the Appendix.

which drew him into a controverſy with Dr Arthur Aſhley Sykes [*G*], whom he ſuffered however to have the laſt word in a diſpute, which indeed was little more than verbal, and from which he was called by his attention to another affair of much greater importance. For this year the truth of revelation in general was attacked in a piece intituled, *Chriſtianity as old as the Creation (f)*. Our author therefore made it his immediate buſineſs to vindicate religion againſt infidelity, which cauſe employed his pen the latter end of this and the whole two following years [*H*]. Having effectually pointed out the defects of Dr Clarke's

(*f*) By Dr Tindal.—See his article.

there is a real communication or participation of Chriſt's broken body, of which we actually partake as often as we worthily partake of this holy Sacrament; and he confirms this ſenſe of the paſſage from its being the doctrine of our church in the 28th article, which quotes the very text, verſe 16. *The bread which we break is a partaking of the body of Chriſt*, and likewiſe, *The cup of bleſſing is a partaking of the blood of Chriſt:* and this acceptation of the words, he obſerves, is perfectly coherent with the 17th verſe immediately following; becauſe the bread is one, *We being many are one body, for we are all partakers of that one bread:* ſo he renders the text with the late learned Dr Wells.

[*G*] *A diſpute with Dr Sykes.*] Dr Clarke, in ſpeaking to that part of the catechiſm concerning the Lord's Supper, where to the queſtion, What are the benefits which we receive thereby? the anſwer is, *The ſtrengthening and refreſhing of our ſouls by the body and blood of Chriſt, as our bodies are by the bread and wine*, has this comment: As impenitency is the death, and ſins are the diſeaſes of the ſoul, ſo a habit of virtue is its health and life, and religious acts are its food and nouriſhment. This, our author thinks, is ſhort of the whole truth intended by theſe words in the catechiſm, which, in his opinion, is here ſpeaking not of the efficacy of habits of virtue to ſalvation, which after all are conditions only, and have no proper efficacy, but of the force and power of the great atonement. The expoſitor therefore ſhould rather have ſaid thus: As the being excluded from having a part in the merits of Chriſt's paſſion is the death, and the neglect of the means of grace is the diſeaſe of the ſoul, ſo the participating of the merits of Chriſt's paſſion is its health and life, and the uſe of the proper means is its food and nouriſhment. And thus we come to the uſe of worthy receiving, the means inſtituted, and one of the moſt effectual and moſt direct of any: It ſuppoſes or takes in virtue, moral virtue, with it, and goes far beyond it, uniting us to Chriſt, which moral virtue alone never can do. For it is by faith, by grace, that we are ſaved. Again, I know not how to approve what the expoſition ſays, p. 182. of the two ſacraments in common with other poſitive inſtitutions, that they have the nature only of means to an end, and that therefore they are never to be compared with moral virtues. I cannot underſtand why poſitive inſtitutions, ſuch as the two ſacraments eſpecially, ſhould be ſo ſlightly ſpoken of. Moral virtues are rather to be conſidered as means to an end, becauſe they are previous qualifications to the ſacrament, and have no proper efficacy towards procuring ſalvation, till they are improved and rendered acceptable by the chriſtian performances. Beſides, I ſee but very little reaſon for ſlighting poſitive inſtitutions in the general, in compariſon of moral virtue. It was breaking a poſitive precept that turned the firſt man out of paradiſe, and entailed mortality upon the whole kind. He goes on to confirm this notion, by the inſtance of Abraham, who, tho' a perſon of great moral virtue, yet is chiefly celebrated for his obedience to one poſitive command. The love of God is the firſt and great commandment, and obedience to his poſitive inſtitutions is an exerciſe of that love, and it is ſometimes the nobleſt and beſt exerciſe of it, ſhewing the greater affection and prompter reſignation to the divine will; and on this account he argues that there may in ſome caſes be greater excellency and more real virtue in obeying poſitive precepts, than in any moral virtue. In ſhort, if the love of God be moral virtue, ſuch obedience being an act of love is an act of moral virtue, and then there is no ground for the diſtinction; but if a diſtinction muſt be made, then let one be called moral virtue, and the other Chriſtian perfection; and let any man judge which ſhould have the preference. Indeed they ſhould not be oppoſed, ſince both are neceſſary, and are perfective of each other: but if they muſt be oppoſed and compared, I ſay moral virtue is but the handmaid leading to the door of ſalvation, which the uſe of the ſacraments at length opens and lets us in. He adds, that any contempt of them may, for any thing he knows, be more provoking to God than that of moral virtue, carrying greater defiance in it, and having leſs temptation to it. This opinion appearing to be ſomewhat derogatory to that of Archbp Tillotſon, who had often inculcated the greater comparative value of moral virtue, an anſwer was publiſhed to our author's remarks by Dr Sykes in 1730, 8vo. To this Dr Waterland replied in a piece, intitled, *The nature, obligation, and efficacy of the chriſtian ſacraments conſidered: as alſo the comparative value of moral and poſitive duties diſtinctly ſtated and cleared. By the author of the Remarks.* 1730. This occaſioned Dr Sykes's ſecond pamphlet, intituled, *A defence of the anſwer to the remarks upon Dr Clarke's expoſition of the Church Catechiſm, wherein the difference between moral and poſitive duties is fully ſtated, being a reply to a pamphlet, intitled, The nature, obligation, &c.* 1730, 8vo. An anonymous writer alſo publiſhed *The comparative excellence and obligation of moral and poſitive duties fully ſtated and conſidered, in anſwer to a pamphlet, intituled, The nature, obligation, &c.* And alſo another called *The comparative value of moral and poſitive duties diſtinctly ſtated and cleared*, both in 1730, 8vo. After this, but in the ſame year, our author publiſhed *A ſupplement to the nature, obligation, and efficacy of the chriſtian ſacraments, wherein the nature and value of poſitive inſtitutions is more particularly examined, and objections anſwered.* Dr Sykes writing a reply to this, intitled, *The true foundation of natural and revealed religion aſſerted, being a reply to the ſupplement of the treatiſe, intitled, The nature, obligation, &c.* This came out in 1730. But our author engaging ſoon after in a cauſe of much greater importance to Chriſtianity in general, contented himſelf with giving ſome ſtrictures upon this laſt performance of Dr Sykes, in a poſtſcript to his piece (written in that cauſe) intitled, *Scripture vindicated.* Part II. 1731. A method taken, as it ſhould ſeem, by him, in the view of avoiding the miſchiefs uſually occaſioned by the heats of a direct engagement. However, Dr Sykes thought proper to publiſh *An anſwer to the poſtſcript of the ſecond part of* Scripture vindicated, *wherein is ſhewn, That if reaſon be not a ſufficient guide in matters of religion, the bulk of mankind for* 4000 *years had no ſufficient guide at all in matters of religion.* And by this means he obtained that which alone can ſatisfy ſome, I mean the pleaſure of having the laſt word in this controverſy, which indeed was at any time little more than merely verbal.

[*H*] *His pen was employed upon the ſubject*, &c.] He publiſhed the following pieces on this occaſion. 1. *Scripture vindicated, in anſwer to* Chriſtianity as old as the Creation. Part I. 1730. To the third edition he prefixed a general preface, which is alſo ſold ſeparately, giving *an account of the literal, figurative, and myſtical interpretations of ſcripture.* 2. *Scripture vindicated, &c. Part II.* 1731. 3. *Scripture vindicated. Part III.* 1732*. 4. *Chriſtianity vindicated againſt infidelity. A Charge to the clergy of the archdeaconry of Middleſex.* 5. *Chriſtianity vindicated againſt infidelity. A Charge. Part II.* In the firſt charge, delivered May 19, 1731, he obſerves, that ‘ we live in a diſputing ‘ age, and infidelity has been growing upon us. It ‘ began with exploding myſteries in general, and from ‘ thence proceeded to a denial of our Lord's divinity ‘ in particular. Low notions of the perſon of Chriſt ‘ are apt to bring in low notions of his merit and ſa‘ tisfaction, and of the uſe and value of the Chriſtian ‘ ſacraments, which repreſent and apply them; and ‘ when faith in Chriſt's blood is once depreciated and ‘ fruſtrated, it is natural to ſet up works, not only as ‘ the conditions, but as the efficacious, or even meri‘ torious cauſe of ſalvation. The next ſtep is to exalt ‘ morality in oppoſition to Faith, and mere morality ‘ in oppoſition to inſtituted religion, which again pre‘ pares the way for looking on all revealed religion ‘ as needleſs or uſeleſs, which comes to the ſame thing

* In this diſpute he was attacked by Dr Conyers Middleton, and defended by Dr Zachary Pearce, the preſent Bp of Rocheſter, and others. See Middleton's works, Vol. II. p. 135——317 edit. 1752. 4to.

Clarke's ſcheme of the Trinity, he was led thereby to examine another moſt celebrated treatiſe of that author upon the *Being and Attributes of God*; and puſhing his enquiries into the genuine force of a moſt favourite argument there advanced to prove the exiſtence of the Deity, the reſult was, the publication of his *Diſcourſe of the argument à priori, for proving the exiſtence of a Firſt Cauſe* [*I*], which came out in 1734. In this piece he explains

‘ with denying its truth, becauſe an Allwiſe God can do nothing in vain. Such is the connection or gradation of error †.’ How low notions of the perſon of Chriſt are apt to bring in low notions of his merit and ſatisfaction, is thus expreſſed in his remarks upon Dr Clarke's catechiſm, where he obſerves ‡, that author inſiſts, that the method wherein, and the terms upon which God will extend his mercy and compaſſion towards ſinners depends entirely upon the good pleaſure and wiſdom of God, p. 300, ‘ which,’ ſays our author, ‘ is as much as to ſay that God has appointed and accepted of this method of ſalvation by Jeſus Chriſt, but that this method ſo underſtood carries any proper ſatisfaction or atonement, appears not. It is admitting indeed the name of ſatisfaction, but is denying the thing. The queſtion is not, what God might do in right of his abſolute ſovereignty, as to pardoning of ſinners; neither is it about what infinite wiſdom might have found out, as to any other methods of doing it. But the queſtion is, whether when God has pitched upon a method of expiation, which according to ſcripture accounts does carry real merit and ſatisfaction in it, it may be right ſo to underſtand and interpret that method, as to take from it the very foundation, upon which the true notion of ſatisfaction or merit is built.’ Again, in anſwer to the queſtion put by another perſon (21), *How we can be ſure that God cannot accept of the ſacrifice of the firſt and moſt excellent of created beings?* ‘ I ſay not,’ ſays he, ‘ what God can or cannot accept. I know nothing *a priori* of it. But ſcripture §, as before obſerved, reſts not this notion upon the foot of divine acceptance, but upon the infinite value of the ſacrifice (22) What he had ſaid before upon it ſeemed to reſolve the ſatisfaction into the Divinity of the perſon ſuffering. *It was Jehovah that bought—it was God that purchaſed the Church with his own blood*. It was ὁ Δεσπότης, the high Lord that bought us †. It was the Lord of glory that was crucified ‡.* He further aſſerts this by the text, Heb. x. 4. *It is not poſſible that the blood of bulls and goats ſhould take away ſins*; words which appear to reſolve the ſatisfaction and mercy not into God's acceptance, but into the intrinſic value of the ſacrifice; and while we reſt it upon that foot [of ſcripture] I do not ſee why we may not ſay, that it is not poſſible for the blood of any creature to take away the ſins of the world; ſince no creature can do more than his duty, nor can have any ſtock of merit to ſpare for other creatures. In this light the ſcripture doctrine of the ſatisfaction infers the divinity of him that made it. And hence it is that thoſe who have denied our Lord's proper divinity, have commonly gone on to deny any proper ſatisfaction.’

[*I*] *Diſſertation on the argument* à priori.] He had in the defence of his Queries given ſeveral broad hints of the weakneſs of this argument (23). But here he enters into the bottom of it, and having given an hiſtorical account of the firſt riſe of the ſcholaſtic term, *neceſſary exiſtence*, he ſhews that the fathers had no ſuch term, but rejected the name of neceſſity, as not applicable to the Deity at all, underſtanding it in its ancient proper comparative ſenſe. That it was never applied to the divine exiſtence till the 13th century by the ſchoolmen; and as the ſuppoſed proof *à priori* of Dr Clarke is built in a manner upon that word, and ſinks with it, ſo it is plain that the Fathers rejected this argument after the introduction of the term. He then proceeds to ſhew, that the ſchoolmen alſo, from Albertus Magnus and Thomas Aquinas in the 13th century, rejected the proof *à priori* from it, and concludes this part with obſerving, that the ableſt and wiſeſt men have aimed no higher than the proof *à poſteriori*, which indeed is ſtrictly demonſtrative, and if it was not, is yet convincing enough to found a rational belief of it, which is all that is required. Biſhop Ward for inſtance, in his treatiſe of the exiſtence and attributes, and the Biſhops Wilkins and Pearſon on the ſame ſubject, and Dr Barrow, Mr Locke, and Mr Woollaſton, beſides a great many more that could not have failed to take in the argument *à priori*, had they not been perſuaded that there was no ſoundneſs, no ſolidity in it. After this he enters into the merits of the debate §: wherein he ſhews, 1. That the argument § is very looſe and precarious, ſtanding upon little elſe but an ill uſe of equivocal terms or phraſes. 2. That moreover, when fully underſtood, it is palpably wrong and abſurd. 3. That the ſeveral pleas or excuſes invented for it are fallacious, and of no real weight. As to the firſt, he obſerves, that the equivocal word meant is *neceſſity*, which he clears up, and divides into logical, moral, phyſical, and metaphyſical neceſſity, or immutable exiſtence proper to God only, or inſeparable connexion between exiſtence and ſubject or eſſence. Thus the exiſtence of the Deity is immutable, firm, and enduring from everlaſting to everlaſting. This permanency of being is conſidered as a mode of exiſtence, preſuppoſing exiſtence, as a modal being always ſuppoſes pure being. It may be called modal neceſſity, as expreſſing that perfect manner of exiſtence proper to the Deity. This, which he alſo calls, ſelf-ſufficiency, is diſtinguiſhed from cauſal neceſſity, as metaphyſical from phyſical. Cauſal neceſſity is antecedent, effective, operative. Modal is poſterior in order of nature and conception to the exiſtence or exiſting ſubject whereof it is the mode. Metaphyſical neceſſity is what our preſent argument is ſolely concerned in. It has been ſometimes ſtiled ſimple or abſolute neceſſity, as oppoſed to relative. Phyſical neceſſity is abſolute only as oppoſed to limited or conditional, not as oppoſed to relative, becauſe it ſtands in the relation between cauſes and effects; but metaphyſical neceſſity has no relation to any thing extraneous to the ſubject of it. It ſubſiſts only in the divine eſſence. This is that pure, ſimple, abſolute, tranſcendental neceſſity, which the later ſchoolmen and metaphyſicians ſpeak of. He then proceeds to enquire what it is that ſupports the argument *à priori*. The way of coming at it is firſt to prove *à poſteriori* the exiſtence of an independent being; thus, ſomething now is, therefore ſomething has exiſted from all eternity, therefore ſome one unchangeable and independent being, one at leaſt; therefore there is ſome one ſelf-exiſtent or neceſſarily exiſtent Being. Thus far all is right and well for the coming at neceſſary exiſtence *à poſteriori*. Call it neceſſity of exiſtence, and then that neceſſity imports a mode of exiſtence before proved ſubſequent in the order of nature and conception to the exiſtence, and referred up to the ſubject of it. This modal neceſſity is a property of the independent being, denoting his immutable permanency, his infinite ſtability. But this modal neceſſity is ſoon after dropped, and cauſal, phyſical, antecedent neceſſity ſlipped upon us in its room; and under this cover of an ambiguous name, the idea which we firſt began with is changed for another altogether new and foreign; and then enters the argument *à priori* with all its train. There is now I know not what antecedent neceſſity and internal cauſe, and prior reaſon, ground, and foundation of the independent being; all built upon the equivocation and quick tranſition from neceſſity, conſidered in the modal and proper ſenſe, to neceſſity taken in a cauſal and foreign meaning. This *neceſſity*, it is ſaid, *muſt be antecedent in the natural order of ideas to our ſuppoſition of its being.* Why ſo? no neceſſity had been proved before, but what was conceived ſubſequent to, as being a mode, and referred up to, the independent being. There is no reaſon at all for its antecedency, but that an argument *à priori* would drop with it. Put but *immutability*, *independence*, or *durability*, inſtead of *neceſſity* of exiſtence, which really ſignifies no more than the other, and it will be ſeen how the notion of antecedency drops and diſappears. Whence it is plain that the notion is here falſe and foreign, not deducible from any regular train of ideas, but admitting of two ſenſes, is brought in arbitrarily, to ſerve the purpoſe of ſinking one idea, and bringing in another.

In favour of this new notion of antecedency it is added, that this neceſſity muſt antecedently thruſt itſelf upon us, whether we will or no, even while we are endeavouring to ſuppoſe that no ſuch being exiſts. For example, when we are endeavouring to ſuppoſe

that

plains the true and real uſe of the ſchoolmen and metaphyſical divines [*K*]. The Convocation meeting this year, our archdeacon was pitched upon for prolocutor of the lower houſe, and an elegant Latin ſpeech was prepared to be ſpoken, on preſenting him to that houſe by the learned Dr Cobden (*g*), archdeacon of London. But he thought proper to decline that office, which in the then ſtate of the church muſt have been attended with extraordinary trouble; as was foreſeen by the King, who therefore preſently diſſolved it. This ſtep left our author more at leiſure to complete his celebrated treatiſe on the *Importance of the doctrine of the Trinity* [*L*], which he publiſhed the ſame year; and having in that piece occaſionally

that there is no being in the univerſe that exiſts neceſſarily, we always find in our minds (beſides the foregoing demonſtration of ſomething's being ſelf-exiſtent from the impoſſibility of every thing's being dependent) we always find in our minds, it is ſaid, ſome ideas, as of infinity and eternity; which to remove, that is, to ſuppoſe no being, no ſubſtance in the univerſe, to which theſe attributes or modes of exiſtence are neceſſarily inherent, is a contradiction in the very terms. In anſwer to this Dr Waterland obſerves, 1ſt, That there is no arguing from real to ideal exiſtence. 2dly, Allowing a kind of order of antecedency in our conceptions, it does not prove any real antecedency with reſpect to the divine exiſtence, as if that were proved by ſomething *prius* in order of nature to it. 3dly, If we ſhould grant a neceſſity of conceiving or imagining thus or thus, we are under no antecedent neceſſity of believing that theſe conceptions or imaginations do infer the exiſtence of a Deity, till it can be clearly ſhewn what certain connexion there is between ideas and realities. 4thly, If ſuch certain connexion could be proved, yet ſuch proof would not amount to a demonſtration *à priori*, ſeeing that the proceſs of ſuch an argument is altogether *à poſteriori*. For thus it runs, we have ſuch and ſuch ideas, which ideas muſt have objective realities as their cauſe or ground, and theſe objective realities or real attributes muſt have their ſubject, as all modes and attributes have: And thus at length, by this analyſis, or in the way of aſcent, we come up to a firſt cauſe, which is antecedent in order of nature to every mode and attribute ſuppoſed to inhere in it, and to belong to it. So that in this way we can never arrive at any thing which can be juſtly conceived prior or antecedent in order of nature to the exiſtence of a firſt cauſe.— Having thus ſhewn the arbitrary introduction of this term *neceſſity of exiſtence*, he proceeds to mention the uſes it is made to ſerve in proving the eternity, omnipreſence, and unity, where proper epithets are given to it, ſuch as the occaſions ſeverally required, but equally precarious, and without any ſolid foundation.— In the laſt place he obſerves, that this term is arbitrarily diſmiſſed, there being indeed as much reaſon for going on with it *in infinitum* as for taking it in at all. If every thing that exiſts, and every circumſtance of it muſt have a reaſon *à priori*, why it is, rather than not, a ſuppoſition which the argument *à priori* is built upon, then the antecedent neceſſity itſelf muſt have a reaſon *à priori* to fix and determine it, and that another, and ſo on infinitely.— The ſecond general head, which was to prove its abſurdity, is ſoon diſpatched, thus: it is demonſtrable *à priori*, that there neither is nor can be any proof *à priori* of the exiſtence of a firſt cauſe, becauſe there is no cauſe prior to the firſt. To be more diſtinct and particular. There are but three poſſible ſuppoſitions, and all of them flatly contradictory and abſurd. The ſubſtance itſelf, or ſome property of that ſubſtance, or ſomething extrinſic to both. The firſt is both abſurd in itſelf, and rejected by the advocates for the proof *à priori*. 2. The ſubſtance to be conceived prior to itſelf is abſurd, and confeſſed ſo on all hands. 3. The third is more abſurd, if poſſible, than the preceding. An antecedent property is as great a ſoleciſm, and almoſt as flat a contradiction, as an antecedent ſubſequency, or a ſubſequent antecedency. Every property or attribute, as ſuch, preſuppoſing its ſubject. Some attribute or property of the ſelf-exiſtent being is to be ſuppoſed prior in the order of nature to the ſame being, its ſubject. It is confeſſed indeed that *the ſcholaſtick way of proving the exiſtence of the ſelf-exiſtent being, from the abſolute perfection of his nature is ὕϛερον πρότερον*. For all or any perfections preſuppoſe exiſtence, which is *petitio principii*; but then it is immediately ſaid, that *bare neceſſity of exiſtence does not preſuppoſe, but infer exiſtence*. That is, ſays Dr Waterland, if ſuch neceſſity be ſuppoſed to be a principle extrinſic. But if it be a mode or property, it muſt preſuppoſe the exiſtence of its ſubject, as certainly and evidently as it is a mode or property. It might perhaps *à poſteriori* infer the exiſtence of its ſubject, as effects may infer a cauſe: but to infer in the other way *à priori* is altogether as impoſſible as that a triangle ſhould be a ſquare; which is joining repugnant ideas together. The truth is, that to make out an argument *à priori* there muſt be a cauſe, or however a priority or antecedency brought in to argue upon, and to draw an inference from to the exiſtence of a Deity; and yet no ſooner is the idea of cauſe or priority or antecedency, though in conception only, introduced, but we immediately ſubvert the idea of a property, and of a firſt cauſe. It is a vain thing to inſiſt one while on the antecedency, for the ſake of the pretended demonſtration, and then preſently to drop it, by retreating to the idea of a property, for the ſake of warding off inſuperable objections. Either there is no antecedency in this caſe at all to form the argument upon, or if there be, the antecedent principle is no property, but a principle extrinſic. So then either the antecedency muſt be dropped, and the argument *à priori* dropped with it, or if the antecedency be kept up, the idea of a property is deſtroyed inſtantly, and we are yet to ſeek for a firſt cauſe. Turn the thing which way you will, the preſumed argument *à priori* is all over contradictory and abſurd. It is not merely abſtruſe or unintelligible, but plainly and clearly repugnant to reaſon, and to itſelf. Laſtly, he anſwers the ſeveral pleas, amounting to fourteen, advanced to ſupport the argument *à priori*. But in this we ſhall follow his example in referring to another author, who has conſidered this point at large (24). He concludes with a brief intimation of the hurtful tendency of inſiſting ſo much upon the pretended argument *à priori*, both with regard to religion and ſcience; in which he again refers to the laſt-mentioned treatiſe. Our author's piece on the argument *à priori* was printed at the end of *An Enquiry into the Ideas of ſpace, time, &c.* by Edmund Law of Chriſt's College, Cambridge, who in that treatiſe, and in his notes on Archbp King's *origin of evil*, inſerted the ſubſtance of what our author wrote upon that ſubject, in ſome letters to a gentleman; where in oppoſing Dr Clarke's notion of God's being the ſubſtratum of ſpace, he was led into ſuch a metaphyſical perplexity, as to deny the reality of ſpace, maintaining it to be no more than an abſtract idea, in which he has few followers *, among whom are Meſſrs Pope and Warburton †.

[*K*] *The uſe of the ſchoolmen and metaphyſical divinity.*] The ſchoolmen, ſays he, though they deſervedly lie under a diſrepute for their exceſſes in many things, may yet be juſtly looked upon as carrying greater authority with them in a point of this nature, where they had no bias to miſlead them, (being inclined to the ſide of Theiſm (25);) and where a queſtion turned upon a right underſtanding of technical terms or phraſes, and a thorough acquaintance with logic and metaphyſic, being a matter of pure abſtract reaſoning. They were undoubtedly great maſters in that way. For *where they argued barely upon the principles of reaſon* (as a very judicious writer obſerves †) *they have often done exceeding well, and have improved natural reaſon to an uncommon height*. And I will venture to add, that if the ſharpeſt wits of theſe later days ſhall undertake upon their own ſtock to furniſh out a new ſcheme of ſchool-divinity or metaphyſical theology, it will be a long while, perhaps ſome centuries, before they arrive to ſuch perfection in ſome parts as many of the ſchoolmen arrived to; unleſs they ſhall be content, within a while, to take thoſe deſpiſed ſchoolmen into conſultation with them, and to extract the beſt things from them (26).

[*L*] *The importance of the doctrine of the Trinity.*] In the introduction to this treatiſe he informs us, that he was principally led to this underaking by a pamphlet publiſhed in 1732, 8vo. intitled, *A ſober and*

(*g*) That divine printed it together with his own Poems in 1748. 8vo.

(26) Diſſertation upon the argument *à priori*, &c. ch. 1. p. 8, 9.

occaſionally given his ſentiments concerning the fundamentals of chriſtianity, he purſued that ſubject in two charges delivered to the clergy of his archdeaconry this and the following year. In 1736, entering into the ſubject of the euchariſt, he printed an archidiaconal charge every year of his life afterwards upon that ſacrament, wherein he defended the eſtabliſhed doctrine of the church, as well againſt the extreme of Biſhop Hoadley (*b*), that it is no more than a bare commemorative feaſt, without any ſpecial privileges annexed to it, as againſt the other extreme of Mr Johnſon and Dr Brett, of its being a proper propitiatory ſacrifice. The laſt of theſe charges, intituled, *The diſtinctions of ſacrifice ſet forth*, was delivered at the Eaſter viſitation in 1740 (*i*); not long after which a complaint which he had many years too much neglected (*k*), obliged him in July the ſame year to call in the aſſiſtance of a ſurgeon at Cambridge [Mr Lunn] under whoſe hands finding no relief, and his pain ſtill increaſing, he removed to London, and put himſelf under the care of Mr Cheſelden. But it was now too late, a bad habit of body, contracted by too intenſe an application to his ſtudies, rendered a recovery impoſſible; and after undergoing ſeveral painful operations, to which he ſubmitted without reluctance, and bore with an exemplary patience (*l*), every thing tending to a mortification, he expired with the ſame compoſure that he had lived, Dec. 24th that year. His body was interred, according to his own requeſt, in one of the ſmall chapels on the ſouth ſide of the collegiate church of Windſor, under a plain ſtone, with this inſcription: *Daniel Waterland, S. T. P. hujus eccleſiæ Canonicus, obiit Decemb.* 23, 1740. *Ætatis* 58 (*m*). He had publiſhed ſeveral ſermons in his life-time, particularly one before the ſons of the Clergy, Dec. 14, 1721. 2. One before the Lord Mayor, at St Paul's, on the reſtoration-day in 1723. 3. A familiar diſcourſe upon the doctrine of the holy Trinity, and the uſe and importance of it, preached at St Auſtin's church, 1723. 4. Religious education of children, &c. at St Sepulchre's, on Thurſday in Whitſun-week, 1723. And after his death there came out in 1742, two volumes more on ſeveral ſubjects of religion and morality, to which were added two tracts. 1. *A ſummary view of the doctrine of juſtification* [*M*]. 2.

An

(*b*) He mentions not the Biſhop's name, but endeavours to prove his doctrine to be the ſame with that of Socinus upon this ſubject.— The concluſion of the 1ſt charge, intituled, The doctrinal uſe of the ſacraments.

(*i*) A liſt of theſe charges, with his other works, is printed at the end of Mr Berryman's ſermons at Lady Moyer's lecture.

(*k*) The nail growing into one of his great toes.

(*l*) This account which comes from his brother is confirmed by Mr Seed, as mentioned in the ſequel, and their joint teſtimonies will hardly be diſparaged by Dr Middleton's ſtory inſerted in his article, remark [*P*] p. 3099, vol. 5.

(*m*) He died, as appears, by comparing dates, a little before the entrance into his 58th year.

and charitable diſquiſition concerning the importance of the doctrine of the Trinity; endeavouring to ſhew, that thoſe in the different ſchemes ſhould bear with each other in their different ſentiments, and ſhould not ſeparate communion: which he declares to be written in a good manner, and with a chriſtian ſpirit, and therefore deſerving notice. He mentions alſo the other pieces intimated in his title-page, as further inducements to it *. He further obſerves ſomething of the general principles upon which they build, who aſſert the importance of the doctrine of the Trinity, and who refuſe communion with the open impugners of it. Thus, 1. It is laid down as a certain and undiſputed principle, that there are ſome ſcripture-doctrines of greater importance than others; and the eſtimate of greater importance is made by the connexion of it with chriſtian practice or worſhip, or the whole oeconomy of man's ſalvation by Chriſt †, or by its being frequently, plainly, or ſtrongly inculcated in holy ſcripture. That ſuch doctrines are commonly ſtiled *fundamentals*, that there is no giving an exact catalogue of theſe important or fundamental doctrines; though it is for the moſt part eaſy to determine of any particular doctrine. That we cannot give a complete catalogue of virtues, any more than of articles of faith, ſo as to be poſitive that thoſe particular virtues, and in ſuch a particular degree, are neceſſary to all perſons, or to any perſon that ſhall be named. The preciſe quantity of virtue abſolutely neceſſary to ſalvation being no more to be defined than the preciſe quantity of faith; yet we know in the general, that ſincere and univerſal obedience to what God commands, allowing for the infirmities of our nature, is neceſſary for ſalvation; and in like manner ſincere and univerſal aſſent to what God reveals, makes up the other part of the terms of acceptance; as faith and obedience together make up the whole. He maintains, That the doctrine of the Trinity is ſufficiently clear and practical, and inſiſted on in ſcripture as much as the nature of the thing needs or requires. Having confirmed his opinion from the judgment of the Fathers, following therein Biſhop Bull, as he had done formerly in his vindication of the Trinity, he enters into that moſt conteſted point, the uſe and value of the fathers concerning articles of faith, in which he ſhews the errors of Daillé ‡ and Barbeyrac §, upon the ſubject, which laſt, referring to a noted treatiſe of Le Clerc ‖, our author animadverts upon that treatiſe in theſe words: ‘A treatiſe,’ ſays he, ‘ſo indefinite and looſe, that one ſcarce knows what he aims at, except it be, that nothing ſhould paſs for a fundamental, which has been ever diſputed by men calling themſelves Chriſtians, and profeſſing ſcripture, however interpreted, to be their rule, which is judging of important truths, not by the word of God, ſoberly underſtood, nor by catholic tradition, nor by the reaſon of things, but by the floating humours and fancies of men, as if all chriſtian doctrines were to be expunged out of the liſt of neceſſaries, which have had the misfortune to be diſputed among us, and a ſhort creed were to be made out of the remainder. But if others, with Baron Herbert of Cherbury, and the author of the fundamental conſtitutions of Carolina [Mr Locke] building upon the ſame principles of latitude, and *willing* to compound all differences, ſhould adviſe us to admit nothing for a fundamental, but what all mankind have hitherto agreed in, and for the future ſhall agree in, Atheiſts only excepted, where will then at length theſe preſumptuous ſchemes end? Or when will weak men leave off dictating to an all-knowing God, preferring their own fond devices to the wiſdom of heaven (27)?

[*M*] *Doctrine of Juſtification.*] Mr Clarke gives the following account of this piece. He obſerves, that the ſubject of juſtification was the occaſion of great controverſy during twenty years of great confuſion in the laſt century. That Biſhop Bull had exhauſted the ſubject *. But Mr Whitefield, in anſwer to the late Biſhop of London's paſtoral letter †, having maintained the *ſolifidian doctrine*, aſſerting good works to be only fruits and conſequences of juſtification; there ſeemed to be wanting a diſcourſe upon it in Engliſh, which was the occaſion of publiſhing this tract: wherein our author ſhews, 1. What the name imports. 2. What the thing contains. 3. How it ſtands diſtinguiſhed from renovation and regeneration. 4. What are the concurring cauſes on God's part and man's, to produce and preſerve it. 5. What are the common extremes run into on this head, and how they may be avoided. The ſum is, that we are juſtified by God the Father, conſidered as principal; and by God the Son, as meritorious purchaſer; and by God the Holy Ghoſt, as immediate efficient; and by baptiſm, as the ordinary inſtrument of conveyance; and by faith, of ſuch a kind, as the ordinary inſtrument of reception; and laſtly, by faith and holineſs, as the qualifications and conditions in adults, both for the firſt receiving, and for the perpetual preſerving of it. As baptiſm had been too often admitted, or but ſlightly mentioned in treatiſes on the ſubject of juſtification, our author gives it a large and diſtinct conſideration, wherein he ſhews, that baptiſm is the immediate and proximate form and rite of conveyance on God's part, and conſequently of reception on man's, from texts of ſcripture and the antients, from 70 years after Chriſt, to the end of the 4th century and later, and from the doc-

trine

* In his Harmonia Apoſtolica, written about 1660, his Examen Cenſuræ, and his Apologia pro Harmonia.

† P. 24, 25.

An enquiry concerning the practice of Infant-communion [N] *as founded on the notion of its neceſſity, publiſhed from the originals, in purſuance of the requeſt of the author, by Joſeph Clarke*, A. M. to whom he committed the care of his MSS. to ſelect and reviſe for the preſs ſuch of them as ſhould be thought moſt uſeful and proper for the public view (*n*). Mr Jeremy Seed, his curate at Twickenham, has given us a noble ſpecimen of his own oratorical talent, in drawing the character of his Patron at full length (*o*), to which the reader curious in ſuch things muſt be referred, as being too long to be inſerted here in the full extent and beauty of it. It is ſufficient for our purpoſe to mention the diſtinguiſhing marks of it. What is obſerved of his works (*p*) has been already occaſionally taken notice of in the proper places. His ſtile, eſpecially in ſome of his lateſt compoſitions, is, as Mr Seed intimates, not excellent. 'In regard to his life and converſation, the liberty and extent of his mind appears in this, that being ſo intenſely ſtudious, yet he could be immediately free and diſengaged, if company came in, attend to and join in the converſation with life and vivacity: but was always very tender upon the ſubject of any man's character. He chiefly delighted in the converſation of the learned, who came to conſult him; upon which occaſions he was unreſervedly communicative, and always gave entire ſatisfaction. He had an excellent turn for buſineſs; would both talk and write upon things quite foreign to the track of his ſtudies with uncommon penetration. He was always eaſy of acceſs. Free and familiar, his heart, and his countenance open to you, without any ſhy and reſerved manner, without ſtatelineſs and ſo-

trine of our church; concluding this head with noting and accounting for a miſtake in ſome eminent moderns, who have taught that the firſt juſtification in adults is antecedent to baptiſm, and that baptiſm rather ſeals and confirms it than conveys it, for which doctrine he ſees no ſufficient ground in ſcripture or antiquity, or the public offices of our church, but much the contrary. Laſtly, he takes occaſion to diſcourſe upon the phraſe, *the inſtrumentality of faith*, which, he ſays, had been diſliked by Hammond, Ibbotſon, Bull, and Freeman, who had alſo rejected the thing. He therefore diſtinguiſhes upon the queſtion, rejecting it according to the falſe notion ſome had conceived, but contends for it in the true and proper ſenſe. He diſtinguiſhes the inſtrumentality of faith for juſtification into an active and a paſſive ſenſe, rejecting it in the former, and maintaining it in the latter. It cannot, ſays he, be the inſtrument of conveyance in the hand of the efficient cauſe, but may very properly be looked on as the inſtrument of reception on the part of the recipient. It is not the means whereby the grace is effected or conveyed; but may be and is the means whereby it is accepted or received; but it is obſerved by Mr Clarke the editor, that Biſhop Bull does not reject the inſtrumentality, only in the ſame ſenſe as Dr Waterland does. In proof of which he cites the following words from the *Harmonia*, diſſert. I. c. II. § 9. p. II. *Si inſtrumentum ſtricte & proprie ſumatur pro cauſa efficiente minus principali, clarum eſt idem juſtificationis inſtrumentum nullo modo poſſe dici. Si fides inſtrumentum eſſe velimus, fieri non poteſt ut recipiatur alio modo inſtrumentum eſſe quam quatenus eſt opus ex proſcripto & per gratiam Dei a nobis præſtitum. Conditio enim quatenus præſtita eſt aliquo modo medium ſive inſtrumentum dici poteſt, quo conſequimur rem quæ ſub conditione promittitur.* Which ſhews, that tho' he diſlikes the phraſe, yet he rejects the thing as the inſtrument of conveyance only, not as the inſtrument of reception, tho' he chooſes to call it by another name (28).

[*N*] *On the ſubject of infant-communion.*] This piece ſeems to have been written in order to explain what has been ſaid in his review of the doctrine of the Euchariſt *, a charge in 1737, where he had obſerved, That the fathers, both of the Greek and Latin church, for the firſt four centuries, or ſomewhat more, never interpreted John vi. directly of the Euchariſt, but by the frequent applying the general doctrine of ſpiritual feeding there ſpoken of, to the particular caſe of the Euchariſt, many among the Latins eſpecially, came, about the beginning of the fifth century, to interpret it directly of the Euchariſt, and ſo to think that John vi. 53. was as deciſive a text for the neceſſity of the Euchariſt, as John iii. 5. was for the neceſſity of baptiſm. Hereupon enſued a common practice of giving the communion to mere infants. Pope Innocent I. is believed to have been the firſt that brought up ſuch a doctrine of the neceſſity of communicating infants. In the margin, after referring to Wall and Bingham, he ſays, conſult Pierce's eſſay on infant-communion, who carries it much higher than others, upon ſuggeſtions, which bear a probable appearance, and are worth examining by ſome perſon of learning and leiſure. But in the mean while I acquieſce in Dr Wall's account, as one that was well conſidered, and, in my opinion, cannot be far from the truth. In another marginal note, after referring to Wall and Voſſius for St Auſtin's being ſuppoſed to have interpreted John vi. 5. of the neceſſity of the euchariſt to ſalvation, he adds, that Thornidike diſputes it with ſome ſhew of reaſon. Accordingly, he himſelf enquired deeper into it, before the book was publiſhed, as appears by an advertiſement prefixed to it in theſe words. 'The practice of communicating mere infants, under a notion of its neceſſity, and as built upon John vi. came not in before the 8th or 9th century, and never was general, or however laſted not long in the weſt, where it firſt began: my reaſons for this perſuaſion are too long to give here, but I thought this ſhort hint might be proper to prevent miſconceptions as to that article.' The tract now under conſideration is the reſult of our author's further enquiry into this ſubject, wherein the reader will find the reaſon referred to in the juſt mentioned advertiſement in his *Review*, where, tho' nothing is built upon it, yet he eſteemed it a point worth clearing up. Some, as Daillé, had cenſured the ancients for this error, in order to detract in general from the authority of the fathers; concluding thence, that their opinions are not of weight enough to ſhew the truth of any controverted point †, whence it plainly appears, that he was willing to deny that authority in general, which others have made a bad uſe of, as it muſt be obvious they would do, tho' with little reaſon. For tho' it be true, that the fathers were not infallible, and may have erred in points of leſs conſequence, yet it is running into unjuſtifiable extremes to conclude thence, as ſome have done, that therefore there is no credit to be given to the verdict of antiquity at all, that they have erred in fundamentals, or in delivering down the canonical books of ſcripture, and the fundamental doctrines therein contained. Daillé has made their errors more and greater than they really were ‡. There have been others on the contrary, who have pleaded the practice and opinion of the fathers for the revival of it, Biſhop Bedel §, and Mr Pierce of Exeter ||. Theſe were the motives which excited Dr Waterland to examine whether the fact be true. It was the common opinion, that the practice was as high as the Cyprianic age, and practiſed on to the 5th century, upon a belief of baptiſm's neceſſity to ſalvation, as taught by St Auſtin and Pope Innocent I. The deſign of the preſent tract is to ſhew this to be a miſtake; that the early ages never gave the communion to mere infants, except in the inſtance mentioned by Cyprian, but to children of ten, or perhaps of ſeven years old, and that only upon prudential reaſons, or the general reaſon of education purſuant to chriſtian principles, ſuch as is among us, to bring them to church, training them up in the way they ſhould go: or, if founded upon ſtronger motives, they were ſuch as reſolved into the then preſent expediency or provident occaſion. It is remarkable, that Dr Waterland agrees in this point with the council of Trent. P

(*n*) Preface to theſe ſermons by the editor, who had been the doctor's pupil, and profeſſeth he very willingly undertook this taſk out of gratitude to that great and good man, by whom he had the honour to be educated.

|| In an eſſay in favour of the practice of giving the euchariſt to children, edit. 1728.

‘ lemnity. Cautious, but not artful; honeſt, but not unguarded; glad to communicate, ‘ tho’ not ambitious to diſplay, his great knowledge: ſubſtantially good, without ſtudy‘ ing appearances, he hated all party, and would never have gone the lengths of any. ‘ Tho’ unmoveable after he had formed a reſolution upon juſt grounds, yet he judged ‘ candidly, and ſpoke advantageouſly of many, who thought very differently from him.’ It was this happy diſpoſition that recommended him to the notice of the late Queen Caroline, before whom, when Princeſs of Wales, he held ſome conferences with Dr Clarke; and tho’ theſe dropped after our author declared his full conviction of the truth and importance of the doctrine of the Trinity, and his reſolution to maintain it (*q*), yet there continued a perſonal friendly acquaintance between them, till the death of Dr Clarke, who in one of his laſt journeys to Norwich paid a viſit to Dr Waterland at Cambridge (*r*). ‘ When any virulent pamphlet was wrote, as ſcarce any perſon had more wrote againſt ‘ him, it did not diſconcert or ruffle his temper. He abhorred all thoughts of perſecu‘ tion; cool and prudential meaſures entirely ſuited his frame of mind: thoſe who en‘ tertained a different opinion of him were ſtrangers to him. Controverſy had not at all ‘ imbittered or ſet an edge upon his ſpirits: the meek and candid chriſtian was not loſt ‘ in the diſputer of this world. I never ſaw him,’ continues Mr Seed, ‘ in a different ‘ humour, no not even in his laſt illneſs. The ſame unaffected chearfulneſs, and the ‘ ſame evenneſs and ſedateneſs, which was his diſtinguiſhing character, appeared from the ‘ firſt commencement of our acquaintance to the laſt period. In a domeſtic light he ‘ was very amiable. Tho he felt great torments in his laſt illneſs, he gave none but ‘ what aroſe from a fellow-feeling of his ſufferings, even then humane and benevolent to ‘ all about him, but eſpecially to Her with whom he had lived in an uninterrupted har‘ mony for twenty-one years (*s*).’ Mr Seed likewiſe aſſures us, that as the preferments which he had were beſtowed upon him without any application from himſelf directly or indirectly, ſo it lay in his power to have been advanced much higher by the recommendation and intereſt of Archbiſhop Potter, and the biſhopric of Llandaff was once offered to him, but he declined the acceptance of it (*t*).

WENTWORTH [Sir THOMAS], the great and unfortunate Earl of Strafforde, a ſtateſman of ſingular abilities, the incidents of whoſe variouſly chequered life make one of the moſt intereſting paſſages in the Engliſh Annals. He was the eldeſt ſon of Sir William Wentworth, of Wentworth-Woodhouſe in the county of York, by his Lady Anne, a wiſe, virtuous, and religious Lady, and daughter of Robert Atkinſon (*a*), Eſq; of Stowell in Glouceſterſhire, a Bencher of Lincoln’s Inn (*b*), at whoſe houſe in Chancery-lane, London, this great ſtateſman was born, on Good Friday, April 13, 1593 (*c*), O. St. He was deſcended from a very ancient family [*A*], ſeated at Wentworth

[*A*] *Deſcend d from an ancient family in Yorkſhire.*] The name of this family was taken from the lordſhip of Wentworth, in the Wapentake of Strafforde, in the county of York (1), where at the time of the conqueſt lived Reginald de Wintewade (as wrote in Domeſday book) whoſe great grandſon had a ſon named Hugh, who dying anno 1200, left a ſon, William Wyntword of Wyntword, whoſe ſon Robert marrying Emma the daughter and heireſs of William Wodehous de Wodehouſe, the family from that time was called Wentworth of Wentworth Woodhouſe. This Robert’s great grandſon (2), William Wentworth, married Iſabella, daughter and coheir of William Pollington, of Pollington in Com. Ebor. Eſq; (3). This William’s eldeſt ſon, named alſo William, was knighted, and married Lucy (4), daughter and heir to Robert Hooton, of Hooton Roberts in Com. Ebor. which lordſhip ſtill remains in the family; and his ſon William, by a marriage with Lucy, daughter and heireſs of Walter de Tynneſlow, of Tynneſlow in the ſame county, obtained that lordſhip, which is alſo ſtill in the family. This laſt William’s ſon Thomas married the daughter of Sir William Fleming, of Waith, Knt. which barony is in the preſent Marquis of Rockingham’s titles. The ſaid William’s great great grandſon Thomas married Beatrix, daughter of Sir Richard Woodrove, of Wooley, Knt. 5th Hen. VIII. and being very rich, was called Golden Thomas: he paid a fine to be excuſed from being created Knight of the Bath, and in 1528 obtained from the laſt mentioned King an uncommon licence to wear his bonnet and be covered in his Majeſty’s preſence, becauſe he was infirm. He died in 1548, aged 70 years (5), leaving William his eldeſt ſon (6), who married Catharine, daughter of Ralph Beeſton, of Beeſton, Eſq; anno 1549, and died December 4th, in the 3d of Edward VI. ſeiſed of Wentworth Woodhouſe-hall in Wentworth, the manor of Frezehouſe in Wentworth, parcel of the monaſtery of Bolton’s in Craven, the manors of Pollington, Hooton, Berbryth-hall in Grayſebroke; half the manors of Tynneſlowe and Waithe, and divers other lands and tenements in Yorkſhire. His ſon and heir William married Margaret, daughter and heir of William Gaſcoign, of Gawthorp, Eſq; and died poſſeſſed of lands to the then value of ſix thouſand pounds ſterling per ann. in the county of York. His ſon Wil. Wentworth, of Wentworth-Woodhouſe, and of Gawthorp, &c. was created a Baronet at the firſt inſtitution of the order, in 1611, by K. James I. and was the 22d in precedence (7): by his wife Ann, daughter of Robert Atkins, of Stowel in the county of Glouceſter (8), Knt. he had eight ſons; the eldeſt of whom is the ſubject of the preſent article. This is the account of Mr Collins; who likewiſe tells us, that the name Wentworth is of Saxon original, as is agreed by all genealogiſts: but Mr Thoreſby, of Leeds, who has given us a fuller pedigree of this family (9), obſerves, that it does not perfectly anſwer to Mr Collins’s remark, that the name is of Saxon original: however, ſays he, if the name be deduced from the Roman *Venta*, the initial letter whereof was certainly pronounced W, it carries the original ſtill higher as to the antiquity (though not as to the knighthood) (10). Thus the greateſt part of Monmouthſhire, and part of the counties of Glouceſter and Hereford, were of old called Went-ſet, or Went-land, from the ancient *Venta Silurum* (11), perhaps originally from the Britiſh Guen, or Gwyn, candidus, albus; for, by a late moſt induſtrious author (12), it appears, that V conſonant is never a dictionary (or primary) initial in the Welch, Corniſh, or Armoric; but that the initial V in Latin is changed into Gu in the Britiſh as well as French

worth at the time of the Conqueſt, from which are deſcended all of the name within this kingdom (*d*). Having received the groundwork of his education probably under a private Tutor at home (*e*), he was ſent to St John's college in Cambridge, the Foundreſs of which is ranked among his anceſtors [*B*]. After a ſufficient time well employed in the univerſity, he travelled abroad, in order to complete the gentleman, and in 1611 made the tour of France, being attended by Mr John Grenewode as his governor, then Fellow of Univerſity college in Oxford, a perſon of learning and prudence, for whom he retained an extraordinary reſpect ever after [*C*]. He returned home in Feb. 1612-13 (*f*), and

(*d*) Dedication of Strafforde's letters, &c.

(*e*) This conjecture is grounded upon the ſilence of all authors about the firſt part of his education.

French, Spaniſh, and Italian; ſo that Guent or Wentworth ſignifies the White hall, court, or town (13). If any, continues the ſame antiquarian, chuſe rather to deduce it from the river of that name, it only moves it a degree further, the family from the place, that from the water, and that from the colour, as was cuſtomary with moſt nations, not only the Greeks and Romans of later ages, but the Hebrews of old; witneſs the Red-ſea (14), &c.

[*B*] *He was admitted of St. John's college.*] What directed the choice of his friends to this college is not ſaid, perhaps the alliance of the family, as appears by the preamble to his patent for the barony (15), to Lady Margaret, Henry the Seventh's grandmother, the foundreſs, might have ſome weight in the determination, However that be, it is certain he proved a ſingular ornament and honour to it, making the beſt uſe poſſible of the opportunities he met with there for his improvement (16). There are ſeveral letters in the collection of his papers, which ſhew that he always preſerved a hearty kindneſs both for his college and univerſity. For inſtance, in the conteſted election between Mr Oldiſworth, or Holſworth, and Dr Lane for the Maſterſhip, in 1633, he made uſe of his intereſt with Archbiſhop Laud to obtain the determination of it in the beſt manner he could for the benefit of the college and univerſity; to which his Grace returned the following anſwer: 'For your St John's buſineſs, it is yet under examination at Cambridge by commiſſion, and what will become of it I cannot tell: For my own part, I have done Mr Oldiſworth all right to his Majeſty; and for Dr Lane, I never ſaw him five times in my life, and, to my remembrance, never ſpake to him but once. God ſend the buſineſs a good end, for the univerſity and college ſake; for I heartily wiſh the publick well; and to ſpeak clearly, if the one be not ſober enough for the government, I doubt the other may be found too weak: honeſt and learned is not enough for government (17).' Again, before the cloſe of the ſame year, the Deputy having ſent the ſame friend a petition againſt the Biſhop of Waterford, who had been a fellow of St John's in Oxford, a ſociety equally dear to his Grace, makes uſe of this expreſſion. I am ſorry to ſpeak it, but truth will out, this Biſhop is a St John's man, of Oxford I mean, not of Cambridge; our Cambridge panniers never brought ſuch a fairing to the market (18): the Archbiſhop in return makes this pleaſant remark upon it. 'A St John's man you ſay he is, and of Oxford; your *Cambridge Panniers* never brought ſuch a Fairing to the market. Yes, my good Lord, but it hath; for what ſay you of Dean Palmer? who, beſides his other virtues, ſold all the lead from off the church at Peterburgh, yet he was brought in your *Cambridge Panniers*; and ſo was Biſhop Howland too, who uſed that biſhopric as well as he did the deanry. I muſt confeſs, this man's baſeneſs hath not many fellows, but his bribery may have ſtore: and I pray is that ever a whit the worſe fault, becauſe it is gentleman-like, for hundreds and thouſands? whereas this man deals for twenty ſhillings and leſs. I hope you will not ſay ſo; and if you do not, then I pray you examine your *Cambridge Panniers* again; for ſome ſay, ſuch may be found there, but I, for my part, will not believe it, unleſs your Lordſhip make me (19).' With the like mirthful humour is the ſame ſtring touched by the Archbiſhop in 1634, thus. 'In the next place, ſays he to the Deputy, you begin to be merry with your Heifer, and I wonder you have ſo little pity as not to let it reſt, when I have ploughed with it. By St Dunſtan (if it were not for ſwearing) I ſee you gueſs unhappily, that your friends can tell how to be merry as well as ſerious together, and you ſhall not need to intreat us to continue it.—From your mirth you leap into thoſe directions, which at your intreaty I gave.—— For the holding of two livings, and but two, with cure, ſince you approve me in the ſubſtance, I will yield to you in the circumſtance of time. Indeed, my Lord, I knew it was bad, very bad in Ireland, but that it was ſo ſtark naught I did not believe. Six Benefits not able to find the Miniſter cloaths: In ſix pariſhes ſcarce ſix to come to church. Good God! ſtay the time you muſt till there be more means, and ſome more conformable people. Yet in this ſober diſcourſe, I pray what means this *Ionniſm* of yours, till the rights of the Paſtors be a little more ſettled? You learned this from old *Aboye* or *Billy Nelſon*. For where I pray in all the ancient Fathers do you find *Paſtor* applied to any but a Biſhop? Well, I ſee the errors of your breeding will ſtick by you; *Paſtors* and *Elders* and all will come in, if I let you alone.——Now you are merry again: God hold it. And what? Dr Palmer acted like a King. Be it ſo: but he was another card in the pack. As for Biſhop Howland, you never heard of him. What? nor of *Jeames* his wife neither? Good Lord, how ignorant you can be when you liſt. Yea, but you have taken St John's, Ox. *Flagrante crimine*, and I put you to your memory. Is it ſo? Come on then; you know there is a cauſe in the *Star-chamber*, ſome were to anſwer, and they brought their anſwers ready written. If the Biſhop of Lincoln ſent them ready for his turn, hath he not an excellent Forge? What if this appear? I hope you will not then ſay I put you to your memory. 'Tis now under examination, and is not this &c. *Flagrante crimine*. Go brag now (20).'——— Thus does the Archbiſhop in the ſtrongeſt terms intimate his friend the Deputy's regard for his college. Nor did the college on their part neglect to make proper atteſtations of their gratitude. Upon his firſt coming to England in 1639, we find Dr Beale, the Maſter, and ſeveral of the Fellows, preſenting to him at London an addreſs of thanks for paſt favours, and begging a continuance of them, which was likewiſe very graciouſly accepted by him (21). To conclude; we are ſenſible that enough, and more than enough, is here produced upon the point which occaſioned the preſent remark. Such long extracts it is allowed will deſervedly be thought tedious and idle, if conſidered only as evidences in a matter of no more moment than is our Deputy's friendſhip for his college and univerſity. But this is far from being the whole of our deſign in them. It cannot, I conceive, but be ſeen, in peruſing them, that their view does not terminate there. They open to us a proſpect of that entire confidence and union of heart and ſoul, which makes a moſt intereſting part of the characters both of Laud and Strafforde, which could not have been ſeen in a ſingle narrative only of the facts, and which demands a ſtill further diſplay, that ſhall be executed by and by.

[*C*] *Mr Charles Grenewoode attended him as his governour.*] Whoever recommended Mr Grenewoode to this honourable truſt, had the happineſs of doing a ſingular piece of ſervice to both. The Tutor, by his fidelity in the diſcharge of it, engroſſed the particular eſteem of his Pupil; and the Pupil in the firſt part of his life never undertook any thing of moment in his private affairs without conſulting the Tutor (22), and, upon the vacancy of the Deanery of Rippon in 1624, applied to Archbiſhop Abbot for his intereſt with the King to procure Mr Grenewoode that dignity: to which his Grace returned the following anſwer.

'Good Sir Tho. Wentworth,

'You aſk my opinion to your letter concerning Mr Greenwood for the Deanery of Rippon, and I will tell you what I think thereof.

'The Deanery is ſmall, not being worth one hundred pounds by the year *viis & modis*; ſo that he that ſhall have it, had need of other means to ſup-

and it was probably ſoon after, and not before, that he engaged in a marriage with Lady Margaret, eldeſt daughter of Francis [Clifford] Earl of Cumberland, and was knighted (*g*). Upon the death of his father, ~~about~~ Michaelmas 1614, the family eſtate, which was not leſs than ſix thouſand pounds per annum (*h*), devolved to him [*D*], together with the title of Baronet, his father having received that honour from K. James, at the firſt inſtitution of the Order (*i*). Sir George Savile, his brother in law (by a marriage with his eldeſt ſiſter Anne) dying the ſame year 1614, appointed him Truſtee for his children. This charge, which he executed with a remarkable fidelity, brought upon him the trouble and expence of a law ſuit, in ſolliciting the buſineſs whereof, he ſpent eight years time, beſides his pains and money, going every term to London about that only, without miſſing one term in thirty (*k*). In 1615 he ſucceeded Sir John Savile in the poſt of Cuſtos Rotulorum for Yorkſhire [*E*]; and in 1621 he was elected one of the Repreſentatives

(*g*) Sir G. Radcliffe places this marriage, and his knighthood before his travels in 1611; but as that writer expreſly intimates that he might be miſtaken in the order of time, we have ventured to place theſe two incidents after his travels, as more probable in the nature of things, which however is left to the reader's judgment.

(*h*) But it was incumbered ~~with~~ the charge of younger children's fortunes, to the number of 7 boys and 4 girls. See Remark [*D*].

(*i*) He was the 22d Baronet from the firſt inſtitution of that order. Salmon's Chron. Hiſt. and the dedication to Strafforde's letters, &c.

(*k*) As I verily believe. ſays Sir G. Radcliffe.

port it, if he will live in any faſhion. Now, true it is that Mr Greenwood is very well provided for, and is that countryman; ſo that the place may very well fit him, and he the place, if his Majeſty may be pleaſed to beſtow it upon him. Mr Greenwood beſides is a wiſe and learned man, a good preacher, and one who in his younger years by his travels beyond the ſeas gained much more experience than common ſcholars have. Theſe things are moſt true concerning him, if you can make any uſe of them; but a ſuitor I may not be in his behalf, although he was brought up in the college under me more than twenty years ſince (23). I have now anſwered your queſtion; and ſo commending me unto you, I reſt

'Your very loving friend,

'Lambeth, Nov. 28, 1624. 'G. CANT (24).'

It is true, this letter ſhews that Sir Thomas's kind endeavours in this caſe proved ineffectual; but hence it appears, that Mr Grenewoode was then poſſeſſed of a good living. This was undoubtedly the Rectory of Thornhill (25), in the Weſt Riding of Yorkſhire, which ſeems to have been obtained for him by Sir Thomas, who thereupon excuſed him from his attendance upon himſelf as one of his privy counſellors mentioned above; a favour which had been requeſted by Mr Grenewoode, that he might apply himſelf wholly to the duties of his parſonage (26). This living ſeems to have been given him by Sir George Savile, brother in law to Sir Tho. Wentworth, from whom we have a long letter of advice to one of his nephews, in 1633, then lately come of age, wherein having given him ſome directions for the management of his private affairs, he proceeds thus. 'In theſe and all things elſe, you ſhall do paſſing well to conſult Mr Greenwood, who hath ſeen much, is very well able to judge, and certainly moſt faithful to you. If you uſe him not moſt reſpectively, you deal extream ungrateful with him, and ill for yourſelf. He was the man your father loved and truſted above all men, and did as faithfully diſcharge the truſt repoſed in him, as ever in my time I knew any man do for his dead friend; taking exceſſive pains in ſettling your eſtate with all poſſible cheerfulneſs, without charge to you at all. His advice will be always upright, and you may ſafely pour your ſecrets into him, which, by that time you have converſed a little more abroad in the world, you will find to be the greateſt and nobleſt treaſure this world can make any man owner of: and I proteſt to God, were I in your place, I would think him the greateſt and beſt riches I did or could poſſeſs *.' Accordingly, we find Sir Thomas occaſionally making uſe of his aſſiſtance afterwards. We have a very uncommonly long letter, filling not leſs than eight pages in folio, written to him from Dublin by Sir Thomas, on the death of his ſteward, which begins thus.

(23) This was Univerſity college, Oxford, of which his Grace was ſeveral years Maſter, and Mr Greenwood had been a Fellow, and was Senior Proctor of the Univerſity in 1609. Wood's Faſti, vol. I. col. 183.

(25) Ibid. vol. I. p. 480. and vol. II. p. 338.

(26) The Earl's life by Sir G. Radcliffe, as before.

* State papers, vol. I. p. 170. in a letter from Dublin Caſtle, Dec. 29, 1633. to Sir Will. Savile, Bart.

'Good Mr Greenwood,

'Upon this ſad accident befallen Richard Morris, I reſt infinitely much beholden unto yourſelf and the reſt of my private friends, that had ſo much care, and beſtowed ſo ſeaſonable pains upon my private affairs, ſo as now I truſt I ſhall not ſuffer much, where otherwiſe I fear I might have been put to much prejudice by his needy and diſordered kindred; and being now in this ſtreight, I have none I can in ſo much aſſurance apply myſelf as unto you, whoſe charity in that kind to others, and your particular affection to me, I have ſo often been a witneſs of; ſo as preſuming on you ſo much as I do, I am like to be very troubleſome unto you in preſent, till, upon my coming over, there may be ſome further order taken, that I may not be more craving upon you, than in civility and good manners I ought; only this I will ſay, you cannot lend your help to any that loves you better, or will be more ready to miniſter to the occaſions either of you or your friends, as often as you ſhall require it of me, than myſelf. The particulars I ſhall be forced to mention will be many.'——Having finiſhed theſe, which amount to upwards of forty, he concludes thus.

'By this time I have given you more particulars to remember than you ever had in any one ſermon, I believe, you ever preached. And now I crave two things of you. Firſt, that the neceſſity my affairs are in may plead my excuſe for thus unmannerly troubling of you. And ſecondly, that out of your charity you would not deny your help to him that upon a good occaſion would not deny his life to you, that am and always will be

'Your moſt affectionate faithful friend,

'WENTWORTH (27).'

(27) Strafforde's letters, vol. I. p. 480. to 488, incluſive.

[*D*] *He came to an eſtate of* 6000 *l. per annum.*] But it was loaded with ſeveral rent charges for younger childrens fortunes, ſome of which proved very troubleſome to him. In the letter to Mr Grenewoode juſt quoted, is this particular among the reſt. 'My ſiſter Elizabeth writes me a letter concerning my brother Matthew's eſtate, which I know not how to anſwer, till I ſee the will; nor do I know what it is ſhe claims, whether money alone, or his rent charge forth of my lands, or both. Therefore I deſire the copy of the will may be ſent me, and her demand, and then ſhe ſhall have my anſwer. This brother that ſhe ſaith was ſo dear unto her, had well tutored her, or ſhe him, being the couple of all the children of my father, that I conceived loved me leaſt; it may be they loved one another the better for that too. However it prove I know not; but this I am moſt aſſured, that in caſe any of the three brothers died without iſſue, my father ever intended their rent-charge ſhould revert to me, and not lye ſtill as a clog upon my eſtate, or that any daughter of his, whom he had provided for forth of the eſtate, ſhould thus intercept his intention towards his heir. But how often hath he been pleaſed to excuſe unto me the liberal proviſions taken forth of my eſtate for my brothers and ſiſters? And as often hath been aſſured by me, I thought nothing too much that he had done for them; and yet I can make it confidently appear he left not my eſtate better to me than my grandfather left it to him by two hundred pounds a year; nay ſome that underſtand it very well, have, upon ſpeech had with me about it, been very confident, he left it me rather worſe than better than he received it. But I ſhall and can, I praiſe God, and have heretofore patiently looked upon their peeviſhneſs and frowardneſs towards me, and all their wiſe and prudent counſels and ſynods they have held againſt me, as if they had been to have dealt with ſome cheater or cozener, not with a brother, who had ever carried himſelf juſtly and lovingly towards them; nor do I, or will I deny them the duties I owe unto them, as recommended unto my care by my father (28).'

[*E*] *He was appointed Cuſtos Rotulorum, &c.*] Sir John Savile's miſbehaviour in the poſt had, it ſeems, been complained of to the Lord Chancellor Elleſmere, in 1613, by Sheffield Earl of Mulgrave, then Lord Preſident of the North (29), and the matter was become ſo notorious and inexcuſable in 1615, that a reſolution was taken to remove him; which the Knight being

(28) Ibid. p. 484.

(29) His letter is inſerted among thoſe of Strafforde in vol. I. p. 2. where it appears, the complainant was Sir Tho. Fairfax.

Repreſentatives in parliament for that county (*l*): upon which occaſion he removed his family from Wentworth-Woodhouſe to London, and took a houſe in Auſtin Friars; but being ſeized there with a dangerous fever, he removed, as ſoon as he began to recover, about July 1622, to Bow, where his wife, the Lady Margaret, died ſhortly after. Hereupon he removed his family again into Yorkſhire (*m*). On the 24th of February 1624-5, he entered into a ſecond marriage with Lady Arabella Holles [*F*], ſecond daughter

(*l*) See remark [*G*].

(*m*) Radcliffe's Eſſay, where it is ſaid, that the next ſpring he had a double tertian, and after his recovery a relapſe into a ſingle tertian, which was followed by a burning fever.

being ſenſible of, wrote a letter to the Chancellor, wherein, to prevent as far as poſſible the diſgrace of being turned out, he reſigned; aſſerting his own innocence and upright carriage (30), and giving it out that he had recommended Sir Thomas Wentworth for his ſucceſſor (31). But this was very far from being done heartily and willingly. On the contrary, he reſolved not to ſit down contentedly under the diſgrace; and puſhing his intereſt with Buckingham, complains to that minion of it as an affront and indignity put upon him which he had no way deſerved; laying all to the charge of his ſucceſſor, who he ſaid had obtained his ends in ſupplanting a perſon to whom he had long bore an unreaſonable grudge. Inſomuch that Buckingham was prevailed on to write the following letter to Sir Thomas.

(30) This letter is alſo in the collection, p. 2, 3. with the following note underneath. There is nothing but his own fault, and his diſorderly and paſſionate carriage of himſelf (ill beſeeming a man of his place and calling) that draws on theſe his troubles, for which I am ſorry: And therefore I commend him in making this ſuit, which I had rather ſhould be done upon his own requeſt, than otherwiſe. Th. Elleſmere. Canc. 9. 1 Dec.

(31) See a letter of Mr Cartwright to Sir Thomas Wentworth, dated Newland, 26 Dec. 1615. in the collection, vol. I. p. 3.

'Sir,

'Theſe are to let you underſtand, that whereas his 'Majeſty is informed that Sir John Savile yielded up 'his place of Cuſtos Rotulorum voluntarily unto you, 'whom now his Majeſty hath received into favour 'again, and purpoſeth to employ in his ſervice, his 'Majeſty will take it well at your hands, that you 'reſign it up again unto him with the ſame willingneſs, and will be mindful of you to give you as 'good preferment upon any other occaſion. And ſo 'I reſt

'Your very loving friend,

Warwick, Sept. 5, 1617.

'Buckingham (32).'

(32) Ibid. p. 4.

Upon this Sir Thomas drew up a full ſtate of the caſe, as it really had paſſed; and ſending it to the Earl, received the following anſwer.

'Sir,

'The reaſons ſet down in your letter are ſo ſubſtantial to prove that Sir John Savile made no voluntary reſignation of the place to you, but yielded 'it up rather out of a neceſſity, to avoid that which 'otherwiſe would have fallen upon him, that I ſee it 'was a miſinformation given to his Majeſty and to 'me, which occaſioned the writing of my letter unto 'you. Neither was that the only cauſe thereof, but 'beſides it was alledged, that you were willing to give 'over the place again, and deſired it might be wrought 'in that manner, leſt if you ſhould do it of your motion, his Majeſty might take it as a deſire in you to 'ſhun his ſervice, and ſo conceive ſome diſpleaſure 'againſt you.

'Upon theſe grounds, I thought it could neither 'be any wrong nor diſgrace to move you in that 'buſineſs: but I pray you believe, that I am ſo far 'from doing the leaſt indignity to any gentleman of 'your worth, that I would be ready upon any occaſion to do you the beſt ſervice I could. Therefore 'I deſire you not to trouble yourſelf either with any 'doubt of further proceeding in this matter, which 'went ſo far only upon miſunderſtanding, or with ſo 'long a journey to give me ſatisfaction, ſeeing I have 'fully received it by your letter, and have acquainted 'his Majeſty with the true ſtate of the buſineſs, as you 'have ſet it down. So I reſt

'Your very aſſured friend,

'G. Buckingham.'

'I beſeech you to excuſe me to my Lord of 'Cumberland and my Lord Clifford, that I write 'not to them now, as I propoſe to do at more 'leiſure: for now I made haſte to ſignify that which 'I have to you, that I might ſpare you ſo troubleſome 'a journey (33).'

Theobalds, Sept. 23, 1617.

(33) Idem, ibid.

Thus the conteſt was cloſed at preſent; but the truth is, the ſore was only ſkinned over, and the poiſon being left within not well digeſted, it feſtered, and broke out again (as will be ſeen) not long after. And from this beginning ſprung that ill blood to each other, which ran in the veins of theſe two great ſtateſmen, till the unfortunate death of the minion.

[*F*] *He married Lady Arabella Holles.*] He was extremely happy in this Lady, and had a true affection for her; but this conjugal felicity was but of ſhort duration; ſhe died, exceedingly lamented by him, in the beginning of October 1631 (34), having brought him two ſons and two daughters; William, Thomas, Anne, and Arabella. Of the two eldeſt, William and Anne, we ſhall have occaſion to ſpeak hereafter. His younger ſon, Thomas, died very young, in July 1630, and Arabella, the youngeſt daughter, was born in October the ſame year. She was afterwards married to Juſtin Maccarty, ſon of Donald Earl of Clincarty. In 1637, the Counteſs of Clare, their grandmother, deſired to have the pleaſure of breeding the eldeſt Lady, Anne, under her care and inſpection. They were all then in Ireland with their father, who readily complied with this requeſt, and wrote to her Ladyſhip on the occaſion a letter, which, as it contains ſome account of the children, claims a place here, as follows.

(34) Ibid. p. 59, 60.

'May it pleaſe your Ladyſhip,

'My Lord of Clare having wrote unto me, you 'deſired to have my daughter Anne with you for a 'time in England, to recover her health; I have at 'laſt been able to yield ſo much from my own comfort, as to ſend both her and her ſiſter to wait your 'grave, wiſe, and tender inſtructions. They are both, 'I praiſe God, in good health, and bring with them 'from me no other advice, but intirely and cheerfully 'to obey and do all you ſhall be pleaſed to command 'them, ſo far forth as their years and underſtanding 'may adminiſter unto them.

'I was unwilling to part them, in regard thoſe that 'muſt be a ſtay one to another, when by courſe of 'nature I am gone before them, I would not have 'them grow ſtrangers whilſt I am living; beſides, the 'younger gladly imitates the elder, in diſpoſition ſo 'like her bleſſed mother, that it pleaſes me very 'much to ſee her ſteps followed and obſerved by the 'other *.

'Madam, I muſt confeſs, it was not without difficulty before I could perſuade myſelf thus to be deprived the looking upon them, who, with their 'brother, are the pledges of all the comfort, the 'greateſt at leaſt, of my old age, if it ſhall pleaſe 'God I attain thereunto. But I have been brought 'up in afflictions of this kind, ſo as I ſtill fear to have 'that taken firſt, that is deareſt unto me, and have in 'this been content willingly to overcome my own 'affections in order to their good, acknowledging 'your Ladyſhip capable of doing them more good 'in their breeding, than I am; otherways in truth I 'ſhould never have parted with them, as I profeſs it 'a grief unto me not to be as well able as any to 'ſerve the memory of that noble Lady in theſe little 'harmleſs infants.

'Well, to God's bleſſing and your Ladyſhip's 'goodneſs I commit them. Wherever they are, my 'prayers ſhall attend them, and have of ſorrow in 'my heart till I ſee them again I muſt, which I truſt 'will not be long neither. That they ſhall be acceptable to you, I know it right well; and I believe 'them ſo graciouſly minded, to render themſelves ſo 'the more, the more you ſee of their attention to do, 'as you ſhall be pleaſed to direct them, which will be 'of much contentment unto me; for whatever your 'Ladyſhip's opinion may be of me, I deſire and have 'given it them in charge, ſo far as their tender years 'are capable of, to honour and obſerve your Ladyſhip daughter to the then newly created Earl of Clare*, a Lady of exceeding great beauty, and of a noble mien, and yet much more lovely in the endowments of her mind. A new Parliament being called on the acceſſion of K. Charles I. to the Crown this year, Sir Thomas was again choſen to repreſent his county in the Houſe of Commons (n), where he ſteadily oppoſed the arbitrary meaſures of the Court, yet without departing from that decency and reſpect, which he always apprehended due to the Crown (o). But he had ſo great a ſhare in the determinations of that Houſe, that he was one of the ſeven who were nominated by the King to ſerve as Sheriffs in 1625 [G], with a view of diſabling them

---

* Sir Will. Pennyman, who had the care and inſpection of the children in their father's abſence, writes thus to him from York, March 12, 1630. "Your Lordſhip's children are all very well, and your Lordſhip needs not fear the going forward of your building, when you have ſo careful a ſteward as Mrs Anne. She complained to me very much of two rainy days, which, as ſhe ſaid, hindered her from coming down, and the building from going up, becauſe ſhe was inforced to keep her chamber, and could not overlook the workmen." N. B. She was then not many months above three years of age. Strafforde's letters, vol. I. p. 55.

above all the women in the world, as well knowing, that in ſo doing they ſhall fulfill that duty, whereby of all others they could have delighted their mother the moſt; and do infinitely wiſh they may want nothing in their breeding, my power or coſt might procure them, or their condition of life hereafter may require: for, Madam, if I die to-morrow, I will, by God's help, leave them ten thouſand pounds a piece, which I truſt, by God's bleſſing, ſhall beſtow them to the comfort of themſelves and friends, nor at all conſiderably prejudice their brother, whoſe eſtate ſhall never be much burthened by a ſecond venter, I aſſure you.

'I thought fit to ſend them with one that teacheth them to write; he is a quiet ſoft man, but honeſt, and not given to any diſorder; him I have appointed to account for the money to be laid forth, wherein he hath no other direction, but to pay and lay forth as your Ladyſhip ſhall appoint, and ſtill as he wants to go to Woodhouſe, where my couſin Rockley will ſupply him: and I muſt humbly beſeech you to give order to their ſervants, and otherwiſe to the taylors at London, for their apparel, which I wholly ſubmit to your Ladyſhip's better judgment; and be it what it may, I ſhall think it all happily beſtowed, ſo as it be to your contentment, and theirs; for coſt I reckon not of, and any thing I have is theirs ſo long as I live, which is only worth thanks, for theirs and their brother's all I have muſt be, whether I will or no; and therefore I deſire to let them have, to acknowledge me for before.

'Nan, they tell me, danceth prettily, which I wiſh, if with convenience it might be, were not loſt; more to give her a comely grace in the carriage of her body, than that I wiſh they ſhould much delight or practiſe it when they are women. Arabella is a ſmall practitioner that way alſo; and they are both very apt to learn that, or any thing they are taught.

'Nan, I think, ſpeaks French prettily, which yet I might have been better able to judge, had her mother lived; the other alſo ſpeaks, but her maid being of Guernſey, the accent is not good; but your Ladyſhip is in this excellent, as that, as indeed all things which may befit them, they may and I hope will learn better with your Ladyſhip than they can with their poor father, ignorant in what belongs to women, and otherways, God knows, diſtracted, and ſo wanting unto them in all, ſaving in loving them; and therein, in truth, I ſhall never be leſs than the deareſt parent in the world.

'Their brother is juſt now ſitting at my elbow, in good health, God be praiſed; and I am, in the beſt ſort I may, accommodating this place for him, which in the kind I take to be the nobleſt, one of them, in the King's dominions, and where a graſs-time may be paſſed with moſt pleaſure of that kind. I will build him a good houſe, and, by God's help, leave him, I think, near three thouſand pounds a year, and wood on the ground, as much, I dare ſay, if near London, as would yield fifty thouſand pounds; beſides a houſe near Dublin, the beſt in Ireland, and land to it, which, I hope, will be two thouſand pounds a year; all which he ſhall have to the reſt, had I twenty brothers of his to ſet beſides me. This I write not to your Ladyſhip in vanity, or to have it ſpoken of, but privately to let you ſee I don't forget the children of my deareſt wife, nor altogether beſtow my time fruitleſly for them. It is true, I am in debt; but there will be beſides ſufficient to diſcharge all I owe, by God's grace, whether I live or die. And next to theſe children, there are not any other perſons I wiſh more happineſs than to the houſe of their grandfather, and ſhall be always moſt ready to ſerve them, what opinion ſoever be had of me; for no other's uſage can abſolve me of what I owe not only to the memory, but alſo to the laſt legacy, that nobleſt creature left with me, when God took her to himſelf. I am afraid to turn over the leaf, leſt your Ladyſhip might think I would never come to a concluſion; and ſhall therefore add to all the reſt this one truth more, that whenever I be happied thro' the occaſion, there is not any [one*] more

'Your Ladyſhip's
'Obedient and moſt humble
'Son and ſervant,
'WENTWORTH (35).'

'Fainwood-Park, the
'10th of Auguſt 1739.

[G] *He was one of the ſeven marked for High Sheriffs.*] He left no means untried that were in his power to prevent this appointment, but all to no purpoſe. The thing was unalterably fixed by the Duke of Buckingham, as appears from a letter to Sir Thomas by his friend Sir Arthur Ingram, in theſe terms. 'God give you joy. You are now the greateſt Officer of Yorkſhire; tho' you had the endeavours of your poor friend to have prevented it. But, I think, if all the council that was at court had joyned together in requeſt for you, it would not have prevailed: for it was ſet and reſolved what ſhould be done before the great Duke's going over (36), and from that the King would not change a tittle. You go along with good company; five parliament-men beſides yourſelf, and a ſeventh cometh in to prevent him from doing hurt. Sir Edward Coke is captain, yourſelf, Sir Francis Seymour, Sir Robert Philips, Sir Guy Palmes, Mr Edward Alford, and the laſt, who was not of the laſt parliament, is Sir William Fleetwood. The judges proceeded in their old courſe, and ſo went it to the King; but when the names came to the King, the King declared himſelf, that he had the names of ſeven, that he would have Sheriffs; and ſo named them himſelf, and my Lord Keeper ſet them down. It was told me by two Counſellors, that in the naming of you, the King ſaid, you were an honeſt gentleman, but not a tittle to any of the reſt. This much advantage have you that way. For your being choſen, my poor opinion is, that there did not any thing befall you in the whole courſe of your life, that is and will be more honour to you in the publick, who ſpeak moſt ſtrangely of it. There is now no more to ſay to it, but to undergo it cheerfully. Myſelf and my houſe, and what I can do, is at your command. I think, you muſt ſend up one about it preſently. Sir John Gibſon and myſelf will enter bond for you. And ſo I reſt

'Your faithful friend,
'Nov. 1625. 'AR. INGRAM (37).'

The diſtinction here mentioned to be made by his Majeſty to him above the reſt of his aſſociates, no doubt, had its weight in determining him to ſubmit quietly to the nomination, without thwarting the King's deſign in it by an attempt to procure a ſeat in the enſuing parliament, notwithſtanding the contrary conduct of Sir Francis Seymour, Sir Edward Coke, and Sir Robert Phillips. However, before he came to a final reſolution, he thought fit, out of reſpect to his father in law, the Earl of Clare, to have his opinion and direction in a matter of ſuch importance to his private affairs, as well as the public. The letter which he wrote on this occaſion was anſwered, from Haughton, Nov. 27, 1625, by the Earl, as follows.

'SON,

'You reſolve, in my opinion, of this particular rightly; for we live under a prerogative government, where Book law ſubmits unto *Lex Loquens*, then be theſe Extraordinaries, that rely rather upon inference, or interpretation than the Letter, too weak ſtaves for ſuch ſubjects to lean upon. This is a novelty and a ſtranger, that a Sheriff, who, according to the received rule of our forefathers, is tied to his county as a ſnail to his ſhell, may cauſe himſelf to be choſen a Burgeſs, or Servant for a Borough, and

them to ſit there in the ſecond parliament of that reign; and notwithſtanding he ſubmitted to that appointment, yet even when he was actually ſitting upon the bench in the diſcharge of his office, a writ was put into his hands removing him from the place of Cuſtos Rotulorum, by the intereſt of the Duke of Buckingham [*H*]. Thus perſecuted
as

‘ ſo in a ſort quit the greater and the King's ſervice for a Subject's and a leſs: Therefore as a novelty it is rather to be followed than to begin it, and as a ſtranger to be admitted as a probationer, and to be embraced upon further acquaintance. For my part, I ſhall be glad, if Sir Edward Coke and Sir Robert Phillips can make their undertaking good; and I could wiſh Sir Francis Seymour were a Burgeſs, ſo you were not ſeen in it: and if any of them, without your knowledge or conſent, ſhall confer any ſuch place upon you, you are no way in fault thereby; and yet Cæſar's wife muſt be free from ſuſpicion: ſo, as I may conclude, it is not good to ſtand within the diſtance of abſolute power. But I ſee the iſſue; the queſtion will fall between the King and the Parliament; the Houſe will demand her Member, and the King denies his Officer, and the King's election was prior; ſo as in concluſion ſome drops of diſpleaſure may fall upon the Borough, whoſe Charter is always in the King's reach. But this is my Chimæra, and the Lion may be leſs terrible than the picture. Howſoever, this well ſucceeding, will put the Courtier out of his Trick, ſecure the Parliament better, and the Subject in general, and make great ones more cautious in wreſtling with that High Court. Yet as you write, Son, this buſineſs is of ſuch a nature, as it is much better to be a Spectator than an Actor. And in this I give you no opinion; I only confirm yours (38).’—This letter, which lets us into the true motives of his compliance with the appointment, was abſolutely deciſive. Accordingly he entered upon the office; but in no good humour. He knew from what quiver this ſhaft againſt him was taken, and did not ſpare to declare it in his firſt ſpeech from the Sheriff's chair, as follows.

‘ GENTLEMEN,

‘ After having had the honour to repreſent you twice in parliament, I have now the honour of ſerving you out of it. The buſineſſes indeed are of a different kind, yet in both there is room to ſhew that warm regard for the advantage and benefit of this county, which hath and ſhall always be the rule of my conduct in public matters, be the employment given by yourſelves or enjoined me by my Sovereign. Since his Majeſty hath been induced to appoint me to this office, I ſhall not any ways ſhew myſelf refractory, as if I declined to ſerve my country, by whomſoever appointed. A deep ſenſe of the miſeries and calamities brought upon theſe nations by ſome evil minded perſons, and out of hopes conceived by me, that it may prevent the further proſecution of ſuch meaſures as are plainly inconſiſtent with the juſt rights of the people, under which they now ſuffer, and in a view of reſtoring them to quietneſs and happineſs, to make his Majeſty's goverment graciouſly intended by him a bleſſing to us, deliver the kingdom in general from thoſe ſlaughters, depredations, rapines, and ſpoils, which always accompany a war, encourage the ſubjects and others with comfort to betake themſelves to trade, traffick, commerce, manufacture, and all other things, which uninterrupted may encreaſe the wealth and ſtrength of the kingdom, beget in all his Majeſty's ſubjects of this kingdom a perfect unity among themſelves, after the too long continued diviſions among them. So his Majeſty aſſures himſelf, that all his ſubjects of this his kingdom, duly conſidering the great and ineſtimable bleſſings which they may find in theſe appointments, will with all duty render due obedience thereunto. And we, in his Majeſty's name, do hereby declare, that all perſons ſo rendering due obedience to the ſaid peace, ſhall be protected, cheriſhed, countenanced, and ſupported by his Majeſty and his royal authority (39).’

[*H*] *He was diſplaced by the intereſt of the Duke of Buckingham.*] Notwithſtanding all the courtly compliments made to Sir Thomas by his Grace in the letter above cited *, yet we find Sir John Savile was in reality never out of his favour; and tho' he could not then, without hurting himſelf, reſtore him to a poſt which had been reſigned purely to avoid the diſgrace of a removal, yet, when occaſion offered, he took care to revenge his quarrel, and contrived to return the blow given to Sir John in the loſs of the Cuſtos-ſhip, by throwing Sir Thomas out of the ſaddle in the moſt diſgraceful manner. His diſmiſſion was preſented to him in the open county court, where he was diſcharging the office of High Sheriff, into which he had been thruſt by the Duke's means. How he reſented it, appears by his ſpeech on the occaſion, as follows.

‘ My Lords and Gentlemen,

‘ I have here, even as I ſit, received his Majeſty's writ for putting me out of the Cuſtos-ſhip I held in the Commiſſion of the Peace, which ſhall by me be dutifully and cheerfully obeyed: yet I could wiſh they who ſucceed me had forborn this time this ſervice; a place in ſooth ill choſen, a ſtage ill prepared, for venting ſuch poor, vain, inſulting humour. Nevertheleſs, ſince they will needs thus weakly breath upon me a ſeeming diſgrace in the public face of the County, I ſhall crave leave to wipe it away as openly as eaſily, ſeeing I deſire not to overlive the opinion of an honeſt man amongſt you, which in the courſe of the world we ſee others regard ſo little.

‘ Shortly then; I have for divers years ſerved the laſt King, of ever bleſſed memory, his Majeſty that now is, and this Country, in the Commiſſions of Oyer and Terminer, that of the Peace and Counſel. I have been employed from hence in Parliament as oft as moſt men of my age, and now attend, albeit unworthy, as Sheriff. Thorowout, I am ready, under the great goodneſs of God, yet with all humility and modeſty, to juſtify myſelf, in ſpite of any detraction or calumny, even upon the price of my life, never to have declined forth of the plain and open ways of loyalty and truth towards their Majeſties, never to have falſified in a tittle the precious and general truſt of my country, never to have injured or overborn the meaneſt particular under the diſguiſed mark of Juſtice or Power.

‘ Therefore, ſhame be from henceforth to them that deſerve it: for I am well aſſured now to enjoy within myſelf a lightſome quiet, as formerly. The world may well think I knew the way, which would have kept my place: I confeſs, indeed, it had been too dear a purchaſe, and ſo I leave it, not conſcious of any fault in myſelf, nor yet guilty of any vertue in my ſucceſſor, that ſhould occaſion this removal (40).’ Thus effectually did he take care to prevent any ill impreſſions that might be made in the County to his prejudice by this affront ſo publicly put upon him. Neither did he reſt contented here. This perſecution by the prime miniſter gave him ſuch an opportunity of proving the connexion which he ſtill retained with another courtier, as could not be neglected. He therefore addreſſed himſelf the very next day to his friend at Court, Sir Richard Weſton, Knt. Chancellor of the Exchequer, in theſe terms.

‘ SIR,

‘ I have been beholden to you for many curteſies, which in your own particular I will undoubtedly ever thankfully acknowledge. Give me leave then to put you in remembrance of ſome things wherewith you formerly have been acquainted; as alſo to give you an account of ſome things which have happened ſince.

‘ At the diſſolved parliament in Oxford, you are privy how I was moved from and in behalf of the Duke of Buckingham, with promiſe of his good eſteem and favour; you are privy that my anſwer was, I did honour the Duke's perſon, that I would be ready to ſerve him in the quality of an honeſt man and a gentleman; you are privy, that the Duke took this in good part, ſent me thanks, as for reſpects done him; you are privy, how during that ſitting, I performed what I had profeſſed. The conſequence of all this was, the making me Sheriff the winter after. It is true, the Duke, a little before Whitſuntide laſt, at Whitehall, in your preſence, ſaid, it was done without his Grace's knowledge;
‘ that

(40) Strafforde's Letters, p. 36.

as he was by that Minion, he perſevered to oppoſe, with the forementioned temper, the unparliamentary proceedings of the Court. Whereupon, in May 1627, he was firſt impriſoned in the Marſhalſea, and ſix weeks afterwards confined within a circle of two miles from the town of Dartford in Kent, for refuſing to comply with the loan, which had been impoſed without conſent of Parliament [*I*]. After ſix months baniſhment being releaſed, he was elected Knight of the ſhire for the county of York in the third parliament of King Charles I. (*p*) when he applied the whole weight of his influence in promoting the famous *Petition of Right*; but that being granted in its full extent, he was ſatisfied, and freely declared his diſlike and even deteſtation of every inſtance where he obſerved any animoſity againſt the King (*q*). In this diſpoſition, being reconciled to the Duke of Buckingham, an offer was made him of the Peerage. This he gladly accepted, and was accordingly created Baron Wentworth, Newmarſh, and Overſley, July 22d, 1628 (*r*). So ſudden a leap from the country gentleman to the courtier, made a great noiſe among people of all ſorts, which alſo grew much greater in a few months, when he was raiſed to the degree of a Viſcount, taken into the privy council, and likewiſe made Lord Preſident of the court and council of the North (*s*) [*K*], in the room of the Lord

(*p*) Radcliffe's Eſſay. See alſo a letter of his brother in law, Denzil Holles, to him, in the collection, p. 40, 41.

(*q*) See Rema [*H*], as befor

(*r*) Radcliffe's Eſſay.

(*s*) Idem, ibid.

'that he was then in Holland. At Whitehall, Eaſter 'term laſt, you brought me to the Duke; his Grace 'did before you contract (as he pleaſed to term it) a 'friendſhip with me, all former miſtakes laid aſleep, 'forgotten. After, I went at my coming out of town, 'to receive his commands, to kiſs his Grace's hands, 'where I had all the good words and good uſage 'which could be expected, which bred in me a great 'deal of content, a full ſecurity. Now the conſequence here again is, that even yeſterday I received 'his Majeſty's Writ, for the diſcharging me of the 'poor place of Cuſtos Rotulorum, which I held here, 'whoſe good pleaſure ſhall be cheerfully obeyed: 'yet I cannot but obſerve, as ill luck of it, that the 'reward of my long, painful, and loyal ſervice to 'his Majeſty in that place is to be thus caſt off, without any fault laid to my charge that I hear of, and 'that his Grace too was now in England. I have 'therefore troubled you with this unartificial relation, 'to ſhew you the ſingleneſs of my heart, reſting in 'all aſſurance juſtly confident, you ſhall never find 'that I have for my own part in a tittle tranſgreſſed 'from what hath paſſed betwixt us. All which I 'confeſs indeed to this bare intent and purpoſe and 'no other, that I might preſerve myſelf in your opinion a man of plainneſs and truth; which obtained, 'I have fully my end. And ſo I reſt in the conſtant 'condition of

'Your truly affectionate friend
'To diſpoſe of,
'TH. WENTWORTH (41).'

The policy of this addreſs, in the view of cultivating his intereſt as much as poſſible at court, needs no comment to illuſtrate it. But he puſhed the occaſion ſtill farther in a ſecond letter to the ſame friend, as follows.

'SIR,

'Calling to mind the faithful ſervice I had the honour to do his Majeſty now with God, how graciouſly he vouchſafed to accept and expreſs it openly 'and ſundry times, I enjoy with myſelf much comfort and contentment. On the other ſide, albeit 'therein ſtill ſtrongly dwell intire intentions, and by 'God's goodneſs ſhall with me to my grave, towards 'his ſacred Majeſty that now is, yet I may well apprehend the weight of his indignation, being put 'out of all commiſſions, wherein formerly I had 'ſerved and been truſted. This makes me ſenſible of 'my misfortune, tho' not conſcious of any inward 'guilt which might occaſion it; reſting infinitely ambitious not of any new employment, but much rather 'to live under the ſmile than the frown of my Sovereign. In this ſtreight, therefore, give me leave to 'recommend to you the protection of my innocence, 'and to beſeech you at ſome good opportunity to 'repreſent unto his Majeſty my tender and unfeigned 'grief for his diſfavour. My fears alſo that I ſtand 'before his juſtice and goodneſs clad in the malevolent interpretations and prejudiced by the ſubtle inſinuations of my adverſaries; and laſtly, my only 'and humble ſuit, that his Majeſty will princely 'deign, that either my inſufficiency or fault may be 'ſhewn me; to this only end, that if inſufficiency, I 'may know where and how to improve myſelf, and 'be better enabled to preſent hereafter more ripe and 'pleaſing fruits of my labours in his ſervice; if a 'fault, that I may either confeſs my error and beg 'his pardon, or elſe, which I am moſt confident I 'ſhall do, approve myſelf throughout an honeſt, 'well affected, loyal ſubject, with full, plain, and upright ſatisfaction to all, that can by the greateſt malice or diſguiſed untruth be objected againſt me. 'The contentment of others in my actions is but 'ſubordinate, and conſequently neither my principal 'ſtudy nor care. Thus have I preſumed upon you, 'further than any particular intereſt of mine can warrant, out of a general belief in your wiſdom and 'nobleneſs; the rather too, becauſe I conceive you 'can beſt witneſs the opinion, nay I might ſay, the 'eſteem his late Majeſty held of me. All which nevertheleſs, as in good manners and diſcretion I 'ought, I ſubmit wholly to your beſt pleaſure, without importunately preſſing further herein, than may 'ſtand with your conveniency, your other reſpects, 'and however retain with me the laſting truth of

'Your Honour's
'Moſt humbly and readily to be commanded,
'TH. WENTWORTH (42).'

After reading this addreſs, it will hardly be controverted, that during the courſe of his oppoſition to the meaſures of the miniſtry, our Stateſman kept an undeviating eye upon the view of puſhing his fortune at a convenient opportunity with the King.

[*I*] *He refuſed to pay the loan, &c.*] In this ſtep he withſtood the warmeſt ſollicitations of ſome of his friends and relations, who earneſtly preſſed him to comply (43). But they ſeem all to be reconciled to his conduct after the ſpeech that he made on this occaſion at the Council-board. We are ſo unfortunate as not to have the ſpeech, which is probably loſt; but from the obſervations of his friends upon it we may collect, that his refuſal was tempered with all poſſible reſpect and deference to his Sovereign, and ſtrongeſt aſſurances of his beſt ſervices to relieve his wants in a parliamentary way (44). His commitment to the Marſhalſea was matter of great triumph to his rival and antagoniſt, Sir John Savile. 'It was ſuppoſed 'this humour of committing had been ſpent,' ſays Lord Haughton to him, 'till that your antagoniſt did 'revive it, who, I hear, brags he hath you in a Toil 'or Dilemma; if you refuſe, you ſhall run the fortune 'of other Delinquents; and if you come at the laſt 'hour into the Vineyard, he hopes it will leſſen you 'in the country.' No doubt the Duke of Buckingham was at the head of the counſel who adviſed this arbitrary proceeding; and in this letter of Lord Haughton there is a particular relating to his Grace, which muſt not be omitted. 'The Duke's [Buckingham's] going '[on the expedition to Rochelle], ſo often adjourned, 'makes men ſuſpect he will not ſtir at all: And I 'heard from a good hand, he moved the King to that 'purpoſe, who would not conſent unto it; ſaying, 'his honour was engaged, the eyes of the kingdom 'were upon him; whereupon his Grace grew melancholy (45).'

[*K*] *He was made a Baron, Privy Counſellor, and Preſident of the North.*] This change, ſo ſudden to outward appearance, from the country gentleman to the courtier, was variouſly cenſured. Among others, it could not eſcape the notice of that great dealer in news, James Howell, who indeed was particularly concerned

Lord Scrope (afterwards Earl of Sunderland) who reſigned, and whoſe remiſſneſs in that poſt threw an uncommon weight of buſineſs upon his ſucceſſor [*L*]. This was a

lucky

concerned in the laſt of theſe promotions. In a letter to his miſtreſs the Counteſs of Sunderland (46), dated Auguſt 5, 1629, he writes thus. ‘Sir Thomas Wentworth and Mr Warnsford are grown great Courtiers lately, and are come from Weſtminſter-Hall * to Whitehall (Sir John Savile their countryman having ſhewn them the way with his white ſtaff (47). The Lord Weſton tampered with one, and my Lord Cottington took pains with the other, to bring them about from their violence to the prerogative. And I am told, the firſt of them is promiſed my Lord's place at York, in caſe his ſickneſs continues (48).’ In another letter to his father, dated December 30, 1630, he begins with theſe words, ‘Sir Tho. Wentworth hath been a good while Lord Preſident of York, and ſince is ſworn Privy Counſellor, and made Baron and Viſcount. The Duke of Buckingham himſelf flew not ſo high in ſo ſhort a revolution of time. He was made a Viſcount with a great deal of high ceremony upon a Sunday in the afternoon at Whitehall. My Lord Powis, who affects him not much, being told, that the Heralds had fetched his pedigree from the blood royal, viz. from John of Gaunt, ſaid, *Dammy, if ever he comes to be King of England, I will turn rebel* (49).’ Mr Howell's news in the firſt part of the letter is confirmed by one from Lord Wentworth himſelf to Weſton, wherein he aſcribes his advancement to the Preſident's poſt in the North chiefly to that friend, *As he was then altogether a ſtranger to the King* (they are his own words) *in ſervice and perſon* (50). And as to his deſcent, mentioned in the latter, the preamble of his patent actually ſets forth that he was lineally deſcended from John of Gaunt, and from the ancient Barons of Newmark, Overſley, &c. and that his anceſtors either by father or mother had matched with diverſe houſes of honour, as with Maud Counteſs of Cambridge, daughter to the Lord Clifford of Weſtmoreland; with Margaret, daughter and heir to the Lord Philip de Spencer; the Lords D'Arcy of the North; Latimer, Talboys, Ogle, Ferrers Earl of Digby, Quincy Earl of Wincheſter, Beaumont Earl of Leiceſter, Grantmeſnil Baron of Hincley and Lord High Steward of England, Peverel Earl of Nottingham, Leofric Earl of Mercia, and from Margaret Dutcheſs of Somerſet, grandmother to Henry VII. (51) Thus it was thought proper to diſplay his pretenſions to the peerage from his deſcent, ſince his perſonal merit to the crown could not, as himſelf acknowledges, be at this time alledged. He had been indeed well received at the court of King James, and in 1620 had thrown the whole weight of his intereſt to procure the election of Sir George Calvert (*a*), then Secretary of State, to repreſent the county of York in parliament, together with himſelf (52); but this appears to be done purely in oppoſition to his inveterate Enemy and Rival, Sir John Savile, and conſequently to Buckingham, with regard to whom his conduct was ſteady and uniform. It cannot however be denied, that as the natural warmth of Sir Thomas's temper was far from being unapt to kindle into violent reſentments, which to be ſure were not cooled by ſuch reflections as his fortune and family would ſuggeſt; ſo it is not improbable that the oppoſition he ſupported in the Houſe of Commons againſt that Minion's meaſures, might in ſome degree be more inflamed by this reſentment. Nor is it to be imagined that the Duke was leſs ſuſceptible of that paſſion. Friends on both ſides laboured to cloſe the breach; and we ſee it was brought ſo far in 1625, that the Duke at Oxford ſhook hands with him, and profeſſed an obliteration of all that had paſſed, and hearty good-will for the future. But this was a meer political reconciliation, far enough removed from a hearty liking of each other; and accordingly the rupture between them ſoon broke out again. Now at laſt indeed, if we may believe Sir George Radcliffe, all their animoſity was extinguiſhed (53); and no doubt the Duke was not without a ſhare in the merit of raiſing Sir Thomas to the Peerage, at leaſt negatively, by not oppoſing it. Yet, upon occaſion of the Duke's death, we find, after all, Sir Thomas's principal friend at Court, Weſton, who was then become Lord Treaſurer, ſuggeſting, that now (and not before) the great Bar between him and the Royal favour was removed (54).

After all, from what has been already ſaid, there is too much reaſon to think that the Earl of Strafforde's change of ſides was the natural growth of the innate loftineſs of his temper, which prompted high ambition and a fondneſs of power. When viewed in this light, his conduct appears altogether ſteady and uniform. In this natural diſpoſition we ſhall find motives enough for the extraordinary change of his meaſures in regard to the prerogative, the full height of which he ſupported in every inſtance after this change, ſo far, as even to exact the ſhip-money with rigour in all parts that came within his juriſdiction †. The ſame principle, a fondneſs for power, will account too for his procuring thoſe unlimited powers in the commiſſion of the Preſident's court at York, which has been ſhewn before (55) to be the cauſe of aboliſhing that court. It is obſervable that this ambitious principle was ſo notoriouſly the prompter of his change, that the Editor of his Letters, &c. under the inſpection of his Lordſhip's lineal deſcendant, in making an apology (which therefore we may conclude is the beſt that can be made) for it, found it neceſſary to draw the reader's eye from it by the following artifice. Having taken notice of his Lordſhips ſufferings for the cauſe of liberty in conjunction with thoſe friends he had now left, he proceeds thus: ‘Sir Edward Coke might have his particular diſguſt, Sir John Elliot his warmth, Mr Selden his prejudice to the Biſhops and Clergy, and others farther deſigns upon the conſtitution itſelf, which might cauſe them to carry on their oppoſition; but Sir Thomas Wentworth, who was a true friend to epiſcopal government in the church, and to a limited monarchy in the ſtate, could have no reaſon, when the *Petition of Right* was granted, to refuſe to bear his ſhare of toil and pains in the ſervice of the public, or to withſtand the offer of thoſe honours his Majeſty was graciouſly pleaſed to make him, eſpecially when it gave him an opportunity of ſetting an example of a wiſe and juſt and ſteady adminiſtration. This was his only view, and there could be no other temptation to a gentleman to accept of thoſe offers, who was born to an eſtate, which deſcended to him thro' a long train of anceſtors, who had matched with many heireſſes of the beſt families in the North, worth at that time ſix thouſand pounds a year (56).’

[*L*] *His predeceſſor's remiſſneſs threw an extraordinary weight of buſineſs upon him.*] It is true, this remiſſneſs of his predeceſſor had afforded matter of juſt complaint, as is evident from the ſtate in which he left the affairs of the North: the militia never muſtered, and the Recuſants never queſtioned; both which were immediately put under a more exact œconomy by

(*a*) The following letter to this friend by Sir Thomas lets us into a part of his character, that muſt not be omitted.

‘Sir Thomas Wentworth, Bart. to Sir George Calvert, Knt.
‘Principal Secretary of State.

‘Sir,

‘I have written to my couſin Wandesford, as being a Statiſt, how that at Rufford the French match was broken, and Marquis Fiat reputed a weak man; that after at Derby the match not only knit again, but finally concluded, and the Ambaſſador held of able parts. But here with you I have matters of other gueſs ſtuff to relate, that our harveſt is all in, a moſt fine ſeaſon to make fiſh-ponds, our plumbs all gone and paſt, peaches, quinces, and grapes almoſt fully ripe, which will I trow hold better reliſh with a Thiſtleworth palate, and approve me how to have the ſkill to ſerve every man in his right cue. Theſe only we countrymen muſe of, hoping in ſuch harmleſs retirements for a juſt defence from the higher powers, and poſſeſſing ourſelves with contentment, pray with Dryope in the Poet:

Et ſiqua eſt pietas, ab acuto vulnere falcis,
Et pecoris morſu, frondes defendite noſtras.

‘Thus you ſee Ovid ſerves us at every turn: how bold we are with you, ſince you entred our Liſt, and how we take time, while time ſerves. For, Michaelmas once come, and your Secretary's cloak on your ſhoulders, I truſt you ſhall find us better manner'd than to interrupt your ſerious hours with our toys. God bleſs you in all your ways, and that they may all terminate in your heart's deſire, which will be, I dare ſwear, juſt and noble.

‘Your Honour's
‘Moſt humbly, moſt readily to be commanded,
‘Th. Wentworth.’

‘Gawthorp, Aug. 31, 1624 *.

* Strafforde's letters, vol. I. p. 24.

lucky criſis for a perſon of Lord Wentworth's active ſpirit. He had now fixed his reſolution to devote himſelf wholly to his Majeſty; and the unexampled induſtry, unvarying fidelity, and unaſſoiled wiſdom, which appeared in his management of this important truſt, ſet his diſtinguiſhed worth in the moſt favourable light before his Majeſty, who preſently took him into his neareſt counſels and confidence, having lately loſt the Duke of Buckingham. It was about this time that our Stateſman contracted that intimate, entire, and unreſerved friendſhip with Archbiſhop Laud [*M*], for which both became ſo conſpicuouſly remarkable. In October 1631, he loſt his much-beloved conſort, the Lady Arabella Holles (*t*), after ſhe had brought him three lovely children. This loſs touched him very nearly, and was exceedingly lamented by him to the laſt period of his life. However, his grief at this misfortune in his private domeſtic affairs was much alleviated, and even in a manner diſſipated, by an overballance in the happineſs of his public ſtation, through the kindneſs of his Royal Maſter, with whom he grew daily more and more into

(*t*) Sir G. Radcliffe tells us, he took his Lordſhip out of bed, and carried him to receive his laſt bleſſing from her.

Lord Wentworth. Yet much of this remiſſneſs may be aſcribed to the bad ſtate of Lord Scroop's health for ſome years before his reſignation, which he did not long ſurvive. It is certain, that whatever faults may have been laid to his charge, they were overlooked by the King, who created him Earl of Sunderland while he held this poſt, and upon his reſignation declared, he was never better ſerved, nor with more exactneſs of fidelity and juſtice by any; and therefore intended to ſet a ſpecial mark of his favour upon him, when his health would ſerve him to come to Court (57). What ſhall be ſaid then for thoſe coarſe reflections which are caſt upon this Lord by Mr Wandesford, who compliments his kinſman, our Viſcount, on this promotion, in theſe terms. 'You tell me, God hath bleſſed you much in theſe late proceedings. Truly I believe it; for by theſe circumſtances we know, we may gueſs at them we know not. The opportunity of this ſucceſſion adds no ſmall comfort to the thing itſelf. Your predeceſſor, like that candle hid under a buſhel, while he lived in this place, darkned himſelf and all that were about him, and dieth towards us (excuſe me for the phraſe) like a ſnuff unmannerly left in a corner.' What follows is penned in the ſtrain of adulation. 'The Papiſts,' continues he, 'already hang their heads like bulruſhes, and think themſelves like water ſpilt upon the ground, which cannot be gathered up again: They ſay plainly, their days of ſecurity and quietneſs, in which they were lulled aſleep by the indolence of the laſt, muſt now be turned into anxiety and watchfulneſs to defend themſelves from the vigilancy of your Juſtice (58).' Accordingly we find ſeveral complaints were made of his Lordſhip's ſharp proceedings the following year, of which he was friendly advertiſed by his Patron Weſton. 'Your proceedings,' ſays this friend to him, 'with the Recuſants is here, where it is well underſtood, well taken, tho' there be different rumours. For it is ſaid, that you proceed with extreme rigour, valuing the goods and lands of the pooreſt at the higheſt rates, or rather above the value, without which you are not content to make any compoſition. This,' continues he, 'is not believed, eſpecially by me, who know your wiſdom and moderation. And your laſt too gave much ſatisfaction, even to thoſe who informed me, when they ſaw thereby that you had compounded with none but to their own contentment (59).' In reality, theſe complaints in general ſeem to be nothing more than the genuine effects of what Mr Wandesford had remarked concerning the Recuſants; and as for this laſt mentioned accuſation in particular, the author of it, Sir David Fowlis, was proſecuted thereupon by our Preſident; and the charge being found to be groundleſs, he was puniſhed for it as a malicious calumny (60). On the other hand, the Preſident's compoſitions were with no greater juſtice complained of as being too eaſy, ſo that the Recuſants increaſed by his indulgence (61). His Lordſhip abſolutely denies this to be fact, and ſays, he is confident he had done more towards a reformation, ſo far as a pecuniary mulct inflicted could effect it, than any that went before him in the Preſident's poſt of the North (62). The truth is, his conduct with regard to the Papiſts, eſpecially in Ireland, was ſo far from being rigorous, that his character has ſuffered by the imputation of being too much a friend to them, as is obſerved by the editor of his letters (63).

[*M*] *He contracted a friendſhip with Archbiſhop Laud, &c.*] This friendſhip was connected by all the ties which Cicero reckons up as requiſite to compleat that dear union. They were exactly of the ſame temper, had the ſame paſſions, the ſame inclinations, the ſame principles with regard to public affairs, and the ſame ſpirit directed in the ſame method of acting up to thoſe principles. The correſpondence between them, as far as it appears in the collection of Strafforde's letters, is perhaps the moſt intereſting part of that collection. Much hath been written upon the characters of both; but there are ſome characteriſtic life ſtrokes in each to be found in their own letters, that have eſcaped the diligence, or mocked the utmoſt art and ſkill, of all other hands; nor indeed is it poſſible for any other pencil beſides their own exactly to hit them. Some ſpecimens, therefore, may be expected here, which take as follows.

The Archbiſhop to the Lord Deputy [of Ireland].

'My very good Lord,

'I heartily thank your Lordſhip for all your love, and for the joy you are pleaſed both to conceive and expreſs for my tranſlation [from London] to Canterbury: For I conceive all your expreſſions to me are very hearty, and ſuch I have hitherto found them; and now, ſince I am there (for my tranſlation is to be on Thurſday, Sept. 19.) I muſt deſire your Lordſhip not to expect more at my hands, than I ſhall be able to perform, either in church or ſtate, and this ſuit of mine hath a great deal of reaſon in it; for you write, that ordinary things are far beneath that, which you cannot chuſe but promiſe yourſelf of me in both reſpects. But, my Lord, to ſpeak freely, you may eaſily promiſe more in either kind, than I can perform: for as for the church, it is ſo bound up in the forms of the common law, that it is not poſſible for me or for any man to do that good which he would, or is bound to do. For your Lordſhip ſees, no man clearer, that they which have gotten ſo much power in and over the church, will not let go their hold; they have indeed fangs with a witneſs, whatſoever I was once ſaid in paſſion to have. And for the ſtate, indeed, my Lord, I am for *Thorough*, but I ſee that both thick and thin ſtays ſomebody, where I conceive it ſhould not; and it is impoſſible for me to go thorough alone. Beſides, private ends are ſuch blocks in the public way, and lye ſo thick, that you may promiſe what you will, and I muſt perform what I can, and no more.—— Now, my Lord, why may you not write as whilom you did to the Biſhop of London? The man is the ſame, and the ſame to you; but I ſee you ſtay for better acquaintance, and till then you will keep diſtance. I perceive alſo my predeceſſor's awe is upon you, but I doubt I ſhall never hold it long, and I was about to ſwear by my Troth, as you do, but that I remember oaths heretofore were wont to paſs under the Privy Seal, and not the ordinary ſeal of Letters *. Well, wiſer or not, you muſt take that as you find it; but I will not write any long letters, and leave out my mirth; it is one of the recreations I have always uſed with my Friends, and it is hard leaving an old cuſtom, neither do I purpoſe to do it; though I mean to make choice of my friends, to whom I will uſe it (64).'—The Deputy, in his anſwer (no ſhort one) to this letter, not yet venturing out of the ordinary rules of prudence in common life, which imply ſuch a reſtraint as is inconſiſtent with the intire and unreſerved confidence of a generous friendſhip, was reminded of it by his Grace in his next, which begins thus: 'In all your Lordſhip's very large letter, which I lately received——

into favour. Inſomuch that he was made Lord Deputy of Ireland this ſame year (u); the Lord Viſcount Falkland being removed from that poſt to make way for him (w), and this too at a juncture when he could not be ſpared to take poſſeſſion of the Iriſh ſword. He ſtill held as it were *in commendam* the preſidency of the North, and the ſervices he was doing the crown there (x) were judged to be of ſuch importance, that his ſtay in England ſome time longer could not be diſpenſed with. In the mean time the care of Ireland was not neglected. He preſently drew up a plan for regulating the government of that kingdom in the civil, military, and eccleſiaſtical ſtate (y), whereby he propoſed to improve the King's revenue there, to provide a ſurer fund for the payment of the army upon that eſtabliſhment, and to reform both the doctrine and diſcipline of the church, and improve its temporalities. In the midſt of theſe weighty public concerns, he found time to conſider of his private domeſtic affairs; and reſolving upon a third wife, he married, in October 1632, Elizabeth, the daughter of Sir Godfrey Rhodes [N]; which

---

received——there is not one word of your wonted recreation: ſo it may be either you are not well enough acquainted at Lambeth, or elſe you are afraid that ſome ſouer ghoſt walks there. But to that which you have written, I ſhall give your lordſhip a very clear anſwer, and as free as I uſed to do.'——Having accordingly gone through ſeveral particulars relating to the bad ſtate of the churches both in England and Ireland, and ſeveral amendments of the latter begun to be made by the deputy, he proceeds thus: ‘ My lord, when I ſay, the leſs aſſiſtance, the more merit, I did not put you off with a compliment, for my anſwer was real. 'Tis true, able and well-affected men are brave aſſociates, and great ſervices are done at eaſe by ſuch inſtruments. But wot you what? Where many are employed at once, and all very able, there uſually proves to be in ſome a fretting canker-worm of ambition, and that for particular aims makes ſuch a diviſion, as gives far greater impediment to the greateſt affairs, than any want of ſufficiency can make: and therefore by your lordſhip's leave, the conceit, which you expreſs, of being all able, and all hearty, and all running one way, and none caring for any ends ſo the King be ſerved, is but a branch of Plato's commonwealth, which flouriſhes at this day no where but in *Utopia*, and thither I have no purpoſe to ſend your Lordſhip (65).' The principal ſubject of their correſpondence being the reformation of the Iriſh church, reducing it to the model of the church of England, wherein the deputy conſtantly followed the inſtructions of the archbiſhop as much as poſſible in every particular, and at length being brought alſo to follow him in ſeaſoning buſineſs with mirth, he is congratulated thereupon by his grace in theſe terms: ‘ Since you have learnt the way to be a little merry, I would you and your couſin Sibbes had been the other day at the council-table, where I never heard, you know whom, in a better mood verily.' He then enters upon the buſineſs as follows: ‘ I am very glad to read your lordſhip ſo reſolute, and more to hear you affirm, that the footing of them, which go *thorough* for our maſter's ſervice, is not now upon Fee, as it hath been. But you are withall upon ſo many *ifs*, that by their help you may preſerve any man upon Fee, be it ever ſo ſlippery. As firſt, *if* the common lawyers may be contained within their ancient and ſober bounds; *if* the word *Thorough* be not left out (as I am certain it is); *if* we grow not faint; *if* we ourſelves be not in fault; *if* it come not to a *Peccatum ex te Iſrael*: *if* others will do their parts as *thoroughly* as you promiſe for yourſelf, and juſtly conceive of me. Now, I pray, with ſo many and ſuch *ifs* as theſe what may not be done, and in a brave and noble way? But can you tell when theſe *ifs* will meet, or be brought together? Howſoever I am reſolved to go on ſteadily in the way which you have formerly ſeen me go, ſo that (to put in one *if* too) *if* any thing fail of my hearty deſires for the King, and the church's ſervice, the fault ſhall not be mine.' His grace afterwards expreſſes the higheſt ſatisfaction in the deputy's proceedings. ‘ My Lord,' writes he, ‘ I did not take you to be ſo good a phyſician before, as I now ſee you are; for the truth is, a great many Church-Cormorants have fed ſo full upon it, that they are fallen into a fever: and for that no phyſick better than a vomit, if it be given in time; and therefore you have taken a very judicious courſe to adminiſter one ſo early to my Lord of Cork. I hope it will do him good, though perchance he thinks not ſo, for if the fever hang long about him or the reſt, it will certainly ſhake either them or their eſtates in pieces. Go on, my Lord, I muſt needs ſay this is *thorough* indeed, and ſo is your phyſick too; for a vomit never ends kindly, that doth not work both ways, and that is *thorough* (66).' In his anſwer to this, the deputy, among other things, writes as follows. ‘ For the *ifs* your Lordſhip is pleaſed to impute unto me, you ſhall hereafter have more poſitive doctrine. I know no reaſon then but you may as well rule the common lawyers in England, as I poor beagle, do here; and yet that I do, and will do in all that concerns my maſter's ſervice, upon the peril of my head. I am confident that the King, being pleaſed to ſet himſelf in the buſineſs, is able by his wiſdom and miniſters to carry any juſt and honorable action *thorough* all imaginable oppoſition, for real there can be none; that to ſtart aſide for ſuch panick fears, phantaſtick apparations as a Prynn or an Elliot ſhall ſet up, were the meaneſt folly in the whole world; that the debts of the crown taken off, you may govern as you pleaſe; and moſt reſolute I am, that work may be done without borrowing any help forth of the King's lodgings, and that is as downright a *Peccatum ex te Iſrael*, as ever was, if all this be not effected with ſpeed and care (67).' Accordingly, in a letter to the ſame friend, wrote within a year after, having obſerved, that he had gallantly overcome all difficulties in ſettling the affairs there, both in church and ſtate, he concludes thus: ‘ So as now I can ſay, the King is as abſolute here as any prince in the whole world can be, and may be ſtill, if it be not ſpoiled on that ſide. For ſo long as his Majeſty ſhall have here a deputy of faith and underſtanding, and that he be preſerved in credit and independent upon any but the King himſelf, let it be laid as a ground, it is the deputy's fault, if the King be denied any reaſonable deſire (68).' We need not mention, that it was this *thorough* principle which brought the heads of both to the block.

[*N*] *He married a daughter of Sir Godfrey Rhodes.*] He was ſomewhat aſhamed of this unequal match*, and made an apology for it to his laſt-mentioned ghoſtly father, who in return declared himſelf entirely ſatisfied therewith. ‘ And now, my Lord,' writes he to the Deputy, ‘ I heartily wiſh you and your Lady all mutual content that may be, and I did never doubt, that you undertook that courſe but upon mature conſideration, and you have been pleaſed to expreſs to me a very good one, in which God bleſs you and your poſterity, tho' I did not write any thing to you as an Examiner (69).' He did not think proper to carry her over with him to Ireland, but left her to the care of his truſty friend, Sir G. Radcliffe, who brought her ladyſhip thither in January 1633 (70). She behaved very dutifully, and he lived very well with her; nor indeed would the noble generoſity of his honour have ſuffered him to treat her ill, if there had been provocation ſufficient for it. This is one good effect of ſupreme pride, in diſdaining every thing that may any ways diſparage the dignity of that union, which makes the wife one fleſh with her huſband. We are able to pleaſure the reader with ſeveral of his letters to this lady, which have been copied by us from the originals in *Muſæo Thoreſbeiano*, and which are the more curious as they have never yet appeared in print, are not in the collection of his printed letters and ſtate papers, and probably not in the poſſeſſion of any of his family. The firſt was apparently wrote ſoon after the marriage, which being performed in ſo private a manner, he imagined ſome ſcruples and uneaſy thoughts

which being a match ſomewhat beneath his preſent dignity, the ceremony was performed in private, and he kept as much as poſſible the marriage from tranſpiring till he had croſ-
ſed

thoughts might poſſibly ariſe in her mind about the validity of it, and ſome doubts of his fidelity in obſerving it, therefore to free her from any ſuch jealouſies he ſent her the following addreſs:

‘ MADAM:

‘ I have in little much to ſay to you, and in ſhort terms to profeſs that which I muſt appear all my life-long, or els one of us muſt be much to blame. But in truthe I have that confidence in you, and that aſſeurance in myſelf, as to reſt ſecure, the faulte will never be made on either ſide. Well then; this little and this much, this ſhort and this long, which I aim at, is no more, than to give you this firſt written teſtimony, that I am your huſbande, and that huſbande of yours, that will ever diſchardge thoſe dutyes of love and reſpect towards you, which good women may expectt, and are iuſtly due from good men to diſchardge them with a hallowed care and continued perſeverance in them; and this is not only much, but all which belongs me; and wherein I ſhall treade out the remaindure of life, which is left me; more I cannot ſay; nor perform much more for the preſentt, the reſt muſt dwell in hope, untill I have made it up in the ballance, that I am and muſt be noe other than your ever loving huſbande,

Yorke, this 30th of October, 1632. ‘ WENTWORTH.’

‘ If you will ſpeak to my couſin Radcliffe for the paſte I told you on for your teeth, and deſire him to ſpeak to Dr Moore in my name for 2 potts of it, and that the doctor will ſee it be good, for this laſt indeed was not ſoe, you may bring me one downe *, and keepe the other yourſelf.’

On the back of this letter are theſe words in a woman's hand:

‘ Tom was borne the ſeventeenth of September, being Wedneſday, in the morning betwixt two and three o'clock, and was chriſtened of the ſeventh of October 1634.’

Having received an acknowledgment of this kind letter from her, drawn up, as he thought, in ſomewhat too humble a ſtrain, he returned the following anſwer:

‘ DEAR BESSE:

‘ Your firſt lines were wellcum unto me, and I will keepe them, in regard I take them to be full, as of kindneſſe, ſoe of truth. It is noe preſumption for you to write unto me, the fellowſhippe of marriadge ought to carry with itt more of love and equality than any other apprehenſion. Soe I deſire itt may ever be betwixt us, nor ſhall it breake of my partte. Vertue is the higheſt valew we can ſett upon ourſelves in this world, and the cheafe which others are to eſteeme us by. That preſerved, we becum capable of the nobleſt impreſſions which can be imparted unto us. You ſucceed in this family two of the rareſt ladies of their time; equall them in thoſe excellent diſpoſitions of your minde, and you becum every wayes equally worthy of any thing that they had, or that the reſt of the world can give: And be you ever aſſeured to be by me cheriſhed and aſſiſted the beſt I can thorow the whole courſe of my life, whearein I ſhall be noe other to you, then I was to them, to witt,

‘ Your loving huſbande,

Yorke, the 19th day of November 1632. ‘ WENTWORTH.’

The next letter to her is dated from Sligo, July 27, 1635, wherein he ſends his bleſſing to little Tom. It is about domeſtic affairs; as is alſo the next, dated from Caſha, 6th September, 1638. He ſet out for England in 1639, in a bad ſtate of health; therefore he had no ſooner croſſed the ſea, and entered Cheſter, than he diſpatched a letter to her from that city, dated Eaſter Tueſday, three o'clock in the afternoon, wherein having given her a particular account of the ſtate of his health, occaſioned by the gout, and a flux, he concludes with God's bleſſing to the child. In the next letter, which is dated from Whitehall, December 19th, 1639, he acquaints her with the time of his intended return to Ireland; ‘ When,’ concludes he, ‘ God willing, by his good pleaſure you will ſee the Lieutenant of Ireland, but never like to have a Deputy of Ireland to your huſbande any more.’——The next is dated from Covent Garden, 16th February, 1639, wherein, after ſome other domeſtic affairs, he writes thus: ‘ The two wenches are in perfect health, and now at this inſtant in this houſe, lodged with me, and rather deſirous to be ſoe, then with their grandmother *. I am not yet fully reſolved what to do with them.’ The next is dated October 8, 1640, but no place is mentioned, and the ſuperſcription is loſt, he concludes with his bleſſing to the baby, and his three ſiſters: ‘ Tell ſuch of them,’ ſays he, ‘ as can ſpeak, I will write to them by George Carré: howbeit, this paſſage I write to nobody but their mother.’

He was taken into cuſtody of the black rod on his general impeachment, Nov. 11, and in a few days after he wrote to his lady as follows:

‘ SWEET HART:

‘ You have heard before this what hath befallen me in this place: but be you confident, that if I fortune to be blamed, yet I will not by God's help be aſhamed. Your carriage upon this misfortune I ſhould adviſe to be calm, not ſeeming to be neglective of my trouble, and yet ſo as there may appear no dejection in you. Continue on the family as formerly, and make much of your children. Tell Will, Nan, and Arbella, I will write to them by the next. In the mean time I ſhall pray for them to God, that he may bleſs them, and for their ſakes deliver me out of the furious malice of my enemies, which yet I truſt through the goodneſſe of God ſhall do me no hurt. God have us all in his bleſſed keeping.

‘ Your very loving huſbande,

16 Nov. 1640. ‘ STRAFFORDE.’

The articles of his impeachment being carried up to the lords, he was committed to the Tower, Nov. 25. And on the 13th of December he addreſſed his lady in theſe endearing terms:

‘ SWEET HART:

‘ I never pityed you ſo much as I do now, for in the death of that great perſon the Deputy, you have loſt the principal friend you had there, whilſt we are here riding out the ſtorm, as well as God and the ſeaſon ſhall give us leave. Yet I truſt Lord Dillon will ſupply unto you in part that great loſs, till it pleaſe God to bring us together again. As to my ſelf, albeit all be done againſt me, that art and malice can deviſe, with all the rigour poſſible, yet I am in great inward quietneſſe, and a ſtrong beliefe God will deliver me out of all theſe troubles. The more I look into my caſe, the more hope I have, and ſure, if there be any honour and juſtice left, my life will not be in danger, and for any thing els, time I truſt will ſalve any other hurt which can be done me. Therefore hold up your heart, look to the children and your houſe, let me have your prayers, and at laſt by God's good pleaſure we ſhall have our deliverance, when we may as little look for it, as we did for this blow of misfortune, which, I truſt, will make us better to God and man.

‘ Your loving huſbande,

13 December 1640. ‘ STRAFFORDE.’

‘ I praiſe God my health is very good, ſo is Sir Geo. Radcliffe. We now expect Sir Robert King daily.’

The next is dated Tower of London, 16th of Jan. 1640. It is to the ſame purpoſe as the preceding one. Among other things he makes the following remark: ‘ Sir George Radcliffe,’ ſays he, ‘ is charged for treaſon, but has as good an opinion of my caſe as of his own.’ He writes to her again from the Tower in theſe terms:

‘ It is now long ſince I wrote to you, for I am here
‘ in

---

* This expreſſion intimates her Ladyſhip to be then in London, where probably the marriage rite was performed.

* He had ſent them to their grandmother Lady Clare, at her own requeſt. See Rem. [F].

ſed the ſea into Ireland, which was not before the latter end of July the following year, 1633 (z). He brought with him a ſet of inſtructions, which were drawn by himſelf, and which inveſted him with power to the full extent of his wiſhes [O] at that time; yet upon his arrival in Ireland we find him applying for a farther enlargement of his power [P]. However at the ſame time he ſet himſelf immediately upon the execution of the forementioned plan, and in a few days obtained the council's conſent to make ſuch a proviſion for the ſupport of the army, as had been declared by themſelves before his arrival to be an impoſſible work (aa). He had carried this point purely by the hopes he gave them of having a parliament. The meeting of a parliament was a matter of the laſt conſequence, and the niceſt delicacy (bb), and the Deputy's conſummate abilities ſhine forth in no part of his adminiſtration with greater luſtre than they do in compaſſing the King's conſent to have one called, and in the conducting the courſe of it to the deſired iſſue (cc). His Majeſty had conceived an utter diſguſt and even dread of thoſe aſſemblies, and had reſolved to govern England without them, nor had there been one for many years in Ireland. But all obſtacles of every kind were removed by the Deputy. The

'in ſuch a trouble as gives me little or no reſpit. The 'charge is now come in, and I am now able, I praiſe 'God, to tell you, that I conceive there is nothing 'capital, and for the reſt, I know at the worſt His 'Majeſty will pardon without hurting my fortune, and 'then ſhall be happy. Therefore comfort yourſelf, 'for I truſt theſe clouds will away, and that we ſhall 'have fair weather afterwards. Farewell.

'Your lovinge huſbande,

Tower of London,
Feb. 4, 1640.

'STRAFFORDE.'

His laſt letter to her is dated likewiſe from the Tower, 19 April, in which he ſays, his trial as to fact was at an end, and there only remained matter of law to be ſpoken to; that the king continued very gracious to him, and his friends increaſed rather than leſſened; he truſts all will end well, and prays her to be of good cheer.

In his laſt letter to his only ſon (71), he recommends her to his kindneſs in theſe terms; 'Be ſure you give 'all reſpect to my wife, that hath ever had a great 'love unto you, and therefore will be well becoming 'you'——— She ſurvived his untimely end many years, and did not die till the 10th of April, 1688. One of her daughters by his Lordſhip, namely, Lady Margaret Wentworth, died unmarried *.

[O] *He obtained ſome extraordinary powers for the government of Ireland.*] They were drawn up by himſelf, as propoſitions to be conſidered of by his Majeſty, and are as follows: (1.) That his Majeſty may declare his expreſs pleaſure, that no Iriſh ſuit by way of reward be moved for by any of his ſervants or others, before the ordinary revenue there become able to ſuſtain the neceſſary charge of that crown, and the debts thereof be fully cleared. (2.) That there be an expreſs caveat entered with the ſecretaries, ſignet, privy ſeal, and great ſeal here; that no grant of what nature ſoever concerning Ireland be ſuffered to paſs, till the deputy be made acquainted, and it hath firſt paſſed the great ſeal of that kingdom, according to the uſual manner. (3.) That his Majeſty ſignify his pleaſure, that eſpecial care be taken hereafter, that ſufficient and credible perſons be choſen to ſupply ſuch biſhopricks as ſhall fall void, to be admitted of his privy council, to ſit as judges, and ſerve of his learned council there: That he will vouchſafe to hear the advice of his council, before he reſolve of any in theſe caſes: That the deputy be commanded to inform his Majeſty truly and impartially of every man's particular diligence and care in his ſervice there, to the end his Majeſty may timely and graciouſly reward the well-deſerving, by calling them home to better preferments here. (4.) That no particular complaint of injuſtice or oppreſſion be admitted here againſt any, unleſs it appear the party made his firſt addreſs to the deputy. (5.) That no confirmation of any reverſion of offices within that kingdom be had, or any new grant of a reverſion hereafter do paſs. (6.) That the places in the deputy's gift, as well of the civil as of the martial liſt, be left freely to his diſpoſe; and that his Majeſty will be graciouſly pleaſed not to paſs them to any upon ſuit made unto him here. (7.) That no new office be erected within that kingdom before ſuch time as the deputy be made therewith acquainted, his opinion firſt required, and certified back accordingly.

To theſe were added the following private propoſitions upon the ſame ſubject. (1.) That all propoſitions moving from the deputy, touching matters of revenue, may be directed to the lord treaſurer of England, without acquainting the reſt of the committee for Iriſh affairs. (2.) That the addreſs of all other diſpatches for that kingdom be by ſpecial direction of his Majeſty applied to one of the ſecretaries ſingly †. (3.) That the Lord Viſcount Falkland be required to deliver in writing in what condition he conceives his Majeſty's revenue and the government of that kingdom now ſtand, together with a particular of ſuch deſigns for advancing his Majeſty's ſervice as were either unbegun or unperfected by him, when he left the place, as alſo his advice how they may be beſt purſued and effected. (4.) That his Majeſty would be pleaſed to direct, that ſo much as his wiſdom approves of the publick propoſitions, may be delivered to the ſecretary to be read at the board, with order that the ſame there approved may be entered in the council-book, that his Majeſty's pleaſure may be publickly known, and uniformly obeyed. Out of theſe private propoſitions Mr Secretary Coke taking ſo much as he held fit to be entered, gave direction that the ſame, together with the ſeven former propoſitions, ſhould be entered in the council-book; which ſeven propoſitions firſt entered, were read and approved at the council-board the 17th of February 1631 (72). After which both the public ones, approved at the council-table, and the private, allowed by the King himſelf, were by his order entered in the council-book, to be conſtantly obſerved. The whole being ſigned by Mr Secretary Coke, who before his departure for Ireland ſent him, by the King's command, the following advices: 'Your inſtructions, as you know, as well as 'the eſtabliſhment, are changeable upon occaſions for 'the advancement of the affairs. And as you will be 'careful not to change without cauſe, ſo when you 'find it neceſſary, his Majeſty will conform them, by 'his wiſdom to that he findeth fit, upon your advice. (73)'

[P] *We find him applying to his friend the Treaſurer for a ſtill farther enlargement of power.*] 'I find them, 'in this place,' writes he to this ſure friend, 'a company of men the moſt intent upon their own ends 'that ever I met with, and ſo as thoſe ſpeed, they 'conſider other things at a very great diſtance.

'I take the crown to have been very ill ſerved, and 'altogether impoſſible for me to remedy, *unleſs I be 'intirely truſted, and lively aſſiſted and countenanced by 'his Majeſty*; which I am bold to write unto your 'lordſhip once for all, not for any end of my own, 'but ſingly for his Majeſty's ſervice.

'Beſides, what is to be done muſt be ſpeedily exe'cuted, it being the genius of this country to obey a 'deputy better upon his entrance than upon his de'parture from them, and therefore I promiſe your 'lordſhip, I will take my time: For whilſt they take 'me to be a perſon of much more power with the 'King, and of ſtronger abilities in myſelf, than indeed 'I have reaſon, either in fact or right, to judge my'ſelf to be, I ſhall, it may be, do the King ſome ſer'vice: But if my weakneſs therein once happen to 'be diſcovered by them in this kingdom, for the love 'of God, my lord, let me be taken home; for I ſhall 'but loſe the King's affairs, and my own time after'wards, and my unprofitableneſs in the former, I 'confeſs, will grieve me much more than any preju'dice that may happen to my own particular by the 'expence of the latter.'

(z) Radcliffe, who carried her into Ireland in January following.

(aa) Strafforde's letters, &c. vol. I. p. 71. The army had been paid from 1628 out of a grant of 120,000 *l.* to be raiſed by contribution; which being nearly exhauſted, he obtained the grant of a new contribution of 20000 *l.* to pay the army till Dec. 31. 1632. Ib. p. 99.

(bb) Idem ibid. p. 134. Before his departure from England he had obtained the conſent thereto of his Majeſty, who after the Deputy's arrival in Ireland confirmed that conſent, and the Deputy at his requeſt ſettled the plan of it entirely to his ſatisfaction. Ibid. p. 113. & ſeqq.

(cc) Which at laſt by the additional collections from the clergy and nobility, amounted ſoon after to 54000 *l.* each.

(71) Strafforde's letters, vol. 2. p. 416. The letter is dated Tower, 11th of May, 1641, the day before his execution.

* Thoreſby's Ducatus Leodienſis, p. 91 and 141. But we have not found any account of the reſt.

† *This I will have done by Secretary Coke*, ſo written by the King himſelf upon the original paper, whereby it alſo appears that the firſt and third of theſe private propoſitions were added by his Majeſty's ſpecial command.

(72) Idem, p. 91. in a letter dated 11th June 1633.

(73) It is ſomewhat remarkable, that among the names of the counſellors is that of Lord Viſcount Falkland, who was removed from the government of Ireland, and ſucceeded by our Deputy, whom under a fair outſide he laboured all he could to diſparage, which was equally reſented by Wentworth. See vol. I. letters in p. 102. 138. 179. and 162, 163.

(74) p. 96. Letter dated Dublin 3d Aug. 1633.

King expreſsly approved his conduct [Q], and having received freſh aſſurances of his Majeſty's countenance and protection [R], he ſent out ſummons on the 2d of June 1634, for the meeting of a parliament on the 14th of July following. They met accordingly on that day, and with the greateſt ſplendor and ſtately magnificence Ireland had ever ſeen [S]. Next morning (for the former day was wholly ſpent in the ceremonial) the Deputy

---

[Q] *The King expreſsly approved his conduct.*] Having ſent a full account of his proceedings in every particular to Secretary Coke, he received the following anſwer. ‘ Your letter, dated the 3d of Auguſt, containeth that large declaration of your proceedings which you promiſed in the end of the former. Your lordſhip's civil viſit made to the juſtices that morning before you took your oath and the ſword, is very much commended. Your calling a full board the next day, and your effectual expreſſion of his Majeſty's juſt offence and reſolution for the puniſhment of the inſolence committed by the Biſhop of Kilfanora, by the Lord Balfour, and others (75); the charge and proofs given by Mr Radcliffe, and avowed by Sir William Reeves, and the order given thereupon for proceeding againſt them by information, or *ore tenus*; and particularly the preſſing of the Lord Balfour to his anſwer, are all approved by his Majeſty as good and worthy ſervices. As are alſo both the charge and the letters given to the judges *, and your reſolution to require an account at their return, by which you may make your directions to be obeyed. But your maſter peece followeth, in procuring the contribution to be continued for the army, which formerly was cried down as an impoſſible work (76). The neceſſity was well grounded upon their own counſels (77), and the manner well referred to their ſeveral opinions to be given in ſuch ſort as you might repreſent them to the King: the time alſo was well granted for mature deliberation; and the particular recommendation to thoſe that had commands in the army was no leſs important; and all theſe his Majeſty underſtandeth as moſt pertinent to his good ſervice. So the entrance made the next day upon the commiſſion for defective titles was alſo to good purpoſe, that no time might be loſt. That your lordſhip next recites is the debate of the main buſineſs at the appointed time, wherein the teſtimony you give to Sir Adam Loftus, who firſt brake the ice, and adviſed the continuance of the contribution for a year longer, with the deſire of a parliament (78) in the mean time, hath given his Majeſty ſo good an aſſurance of his affection for his ſervice, that he requireth you to let him know how well he doth accept it, and that he will be mindful of him, as there ſhall be cauſe. The doubts which ſome made, not pertinent to the buſineſs (79) are interpreted as diverſions out of an ill intent to embroil the debate, and to make good thoſe former letters, which were written in the ſame ſtyle: and this his Majeſty will be ſenſible of, when he thinketh fit. But whatſoever the meaning was, they were bravely encountered by your lordſhip's wiſe and preſent reſolution to undertake of yourſelf to make the army ſubſiſt: whereby you did not only ſtop any further adherence to oppoſition, but confirmed the well-affected, and drew all the reſt to a conformable ſenſe, which produced a general conſent to that fair propoſition, of making offer to his Majeſty under their hands of this next year's contribution, with deſire of a parliament. This offer his Majeſty hath accepted moſt graciouſly from them all, and with particular thanks to the Lord Chancellor, the Earls of Ormond and Corke (80), and the Lord Mountnorris, for their forwardneſs above the reſt.

‘ It remaineth that like offer be procured from the Popiſh party, which your lordſhip aſſureth will be obtained in a ſhort time: and ſo to ſettle the ordinary payments for a year and a half longer, which his Majeſty eſteemeth as a work worthy of that truſt and confidence he repoſeth in you, and as a pledge of that fruit in your government there, which he doth expect. And by this beginning he diſcerneth the difference in the carriage of his affairs, when ſuch a deputy reſideth upon the place.

‘ For the parliament which is deſired, your lordſhip knoweth, that his Majeſty hath had it heretofore in his intention, and now on this occaſion will in ſhort time declare his pleaſure in it, and expecteth your opinion within the appointed time. The laſt clauſe of this letter declareth the help you have at the council-board by the Maſter of the Rolls [Sir Chriſtopher Wandesford] and Mr [afterwards Sir George] Radcliffe: of whoſe good ſervices his Majeſty taketh notice, and according to your deſire hath ſigned a warrant to ſwear Mr Radcliffe of the council there, which Mr Railton * will ſend unto you (81).’ There cannot be a more conſpicuous proof of the entire harmony that at this time ſubſiſted between the King and his deputy, than is furniſhed by theſe two letters, of which the latter is a complete echo to the former, as is obſerved to be the caſe of the addreſſes of the parliament upon his Majeſty's ſpeech at the opening of every ſeſſion, while the like harmony ſubſiſts between them.

[R] *Received freſh aſſurances of encouragement from the King.*] The letter begins in theſe terms:

‘ May it pleaſe your lordſhip:

‘ Your large heart and generous pen are well met, and it were pity that ſo much nobleneſs ſhould ever want ſuch full expreſſions. Their only misfortune is, that they are beſtowed upon an object ſo much below them, which yet will be repaired, if not in the honour that reverts to your lordſhip in deſcending ſo much from yourſelf, for my ſake, yet I am ſure in that which remains upon me. I preſent my humble thanks to your lordſhip for this ſingle favour, and wiſh I were able to lend that light to the ſun, which it is contented to borrow from me. Any interpoſition of mine muſt rather cauſe an eclipſe, which his Majeſty's ſervices in thoſe miſty and cloudy parts (eſpecially as your lordſhip finds them, and as affairs have been managed heretofore) have little need of. Yet becauſe your lordſhip adjures me by ſo high and ſacred an obligation as the true friendſhip you do me the honour and right to promiſe yourſelf from me, I will take the liberty (rather than diſobey your lordſhip) to repreſent unto you ſome particulars concerning your carriage in that great and weighty ſervice, which are come to my knowledge.’

‘ Firſt, My Lord, his Majeſty obſerves, and hath expreſly commanded me to let you know it, that he finds you very able and dextrous, and as direct and entire in all his affairs there, and that through your judicious carriage and diligence, he doubts not but to reduce that kingdom into a flouriſhing eſtate, and to raiſe the revenue thereof to a fair improvement. To which purpoſe beſides this gracious acceptance, he hath been pleaſed likewiſe to will me to aſſure your lordſhip, you ſhall have no impediments, but all encouragement and furtherance, from his Majeſty; and therefore, what letters ſoever may be won from him by importunity, his expreſs pleaſure is, that you depart not from ſuch rules and inſtructions as have been given you, or you have ſettled to yourſelf, for the advancement of his ſervice. Only to free his Majeſty from harſh and flat denials, you muſt be contented to take upon you the refuſing part, as you did in the buſineſs of the Earl of Carliſle to his Majeſty's extreme ſatisfaction (82).’ Mr Secretary Coke alſo ſent him a letter of the ſame date, with the fulleſt aſſurances of the King's entire ſatisfaction with every particular of his proceedings, the army and plantations, which are there run over, and a freſh engagement to ſupport him therein (83), which was alſo confirmed by a letter to him from the King himſelf (84).

[S] *The parliament met in great ſtate*, &c.] The manner of their proceeding was ſo extraordinary, that the following particular account thereof it is ſuppoſed will be acceptable. They proceeded then in this order:

One foot company.
Two Trumpets.
One Troop of Horſe.
Two Meſſengers.
Gentlemen, two and two.

Eſquires,

(75) For refuſing to pay their ſhares of the contribution for the ſupport of the army. Poſtſcript of Deputy's letter to Lord Cottington in p. 88.

* To vindicate in their charges on the circuits the continuance of the contribution, and the iſſuing out a commiſſion of defective titles. See Deputy's letter, p. 97—100. to which this is the anſwer. The judges on their return reported, that the people had expreſſed their ſatisfaction in both, p. 133.

(76) See the King's letter dated April 14, 1632. to the Lords Juſtices of Ireland in p. 71.

(77) In a letter to the Deputy from the Lords Juſtices, Adam Loftus and R. Corke, dated at Dublin-Caſtle, Feb. 26. 1631. p. 67—70.

(78) It was the hopes of a parliament that drew their conſent to the contribution, in the view of preventing it from being entailed annually upon them for ever. See the Deputy's letter as before.

(79) Principally Sir Will. Parſons, Maſter of the wards, whom the Deputy charges with having penned the letter referred to in note (77). Letters, p. 99.

(80) This Earl was ſilent in the debate, till the Deputy propoſed a parliament, and then he effectually concurred with the reſt. Deputy's letter. He had oppoſed the deſign of continuing the contribution, and preſſed the levying the 12d. a Sunday upon the recuſants with diligence. p. 75.

* This gentleman was a faithful agent of the Deputy's, as appears through the whole courſe of his letters.

(81) P. 114, 115. Letter from Secretary Coke to the Deputy, dated Sept. 20, 1633.

(82) p. 160.—The letter is dated Nov. 20, 1633. Secretary Coke had aſſured him before, that however his ſeverity was apprehended before his going over, yet he had heard no exception, but much applauſe of his juſtice and moderation, as well as his integrity and induſtry in advancing the King's ſervice. p. 138. letter of Oct. 24, 1633.

(83) p. 158—160.

(84) p. 164, 165.

puty opened the ſeſſion with a ſpeech to both houſes, declaring what his Majeſty expected from them, to wit, an hundred thouſand pounds debt to be diſcharged, and twenty thouſand pounds a year conſtant and ſtanding revenue to be ſettled for payment of the army: That his Majeſty intended to have two ſeſſions of this parliament, the one for himſelf, the other for them; ſo as if they without condition ſupplied the King in this, they might be ſure his Majeſty would go along with them in the next meeting through all the expreſſions of a gracious and good King. All which he fortified (they are his own words) *(dd)* with the beſt reaſons and in the mildeſt manner he could, not departing from the dignity of the perſon he had the honour to repreſent [*T*]. Conformably to this ſpeech he proceeded to urge the ſupply, and moſt ſurprizingly worked them up to paſs a grant for no leſs than ſix ſubſidies of thirty thouſand pounds each, to be paid within the ſpace of four years. Prompted by the merit of this important ſervice, and encouraged by the conſtant ſupport in all his meaſures by his Majeſty, who had yielded to every requeſt he had made for the enlargement of his powers in the exerciſe of his poſt, he ventured to petition for an Earldom. But here for the firſt time he met with a repulſe [*U*]; which yet

The Maſter of the Court of Wards.

The Lord Chief Juſtice of the chief place.

The Treaſurer at War. *He being a Baron, went elſewhere.*

The Vice Treaſurer. *He alſo walked elſewhere, being a Baron.*

The Marſhal, *He walked among the Viſcounts, being one of them.*

The Lord Preſident of Munſter.

Two Meſſengers.

Barons in their Robes, two and two; youngeſt foremoſt. *There were in all* 39, *preſent and abſent.*

Biſhops, *according to their conſecration, two and two, the youngeſt foremoſt, except the* Biſhop of Meath, *who precedes the reſt, without reſpect to conſecration. There were* 20 *of theſe.*

Two Trumpets.

Athlone Purſuivant at Arms.

Viſcounts *in their Parliament Robes, two and two, the youngeſt foremoſt; theſe preſent and abſent amounted to* 44.

Earls in their Parliament Robes, two and two, the youngeſt foremoſt. Of theſe were 16 preſent and abſent. But the Earls of Corke, Ormond, and Kildare, walked in another place: the firſt being Lord Treaſurer, the ſecond bore the Sword, and the third bore the Cap of Eſtate.

Lord Treaſurer,
Archbiſhop of Tuam.
Archbiſhop of Caſhell.
Archbiſhop of Dublin.
Archbiſhop of Ardmagh, Lord Primate of Ireland.

The Lord Chancellor, with the Seal, alone.

A Gentleman Uſher.

Ulſter King at Arms.

A Gentleman Uſher.

A Serjeant at Arms.
A Serjeant at Arms to flank the ſword
The SWORD,
born by
The Earl of ORMOND.
A Serjeant at Arms to flank the ſword.

A Cap of Eſtate, borne by the Earl of Kildare.

Footmen.
Yeomen of the Horſe.
The
LORD DEPUTY.
His Train borne up by
the Lord Brabazon,
Sir Robert Loftus, and
Mr Arthur Jones.
A Secretary of Foot.
Footmen.
Yeomen of the Horſe.

The Gentleman of the Horſe, leading an Horſe of Eſtate.

The Colonel.

The Guard.

Two Trumpets.

A Troop of Horſe.

And thus they proceeded to church.

The Lord Deputy being arrived at St Patrick's church, was received by the dean, prebendaries, and choriſters, going before the Lords Archbiſhops of Tuam and Caſhell, ſinging *Te Deum laudamus*; and when the Lord Deputy was come into his ſeat, then the Lords took their places which were prepared for them; the Biſhops by themſelves, and the Temporal Lords by themſelves: but all the Lords did ſtand till the Lord Deputy was placed in his ſtate. Sermon ended, they returned to the Caſtle in the ſame manner that they went to church (85).

(85) p. 285, 286.

[*T*] *Not departing from the dignity of the perſon he had the honour to repreſent.*] The following paragraph in this ſpeech is ſomething remarkable. ‘Let me adviſe you,’ ſays he, ‘ſuffer no poor ſuſpicions or jea‘louſies to vitiate your judgments, much rather become ‘you wiſe by others harms. You cannot be ignorant ‘of the misfortunes theſe meetings have run of late ‘years in England; ſtrike not therefore upon the ſame ‘rock of diſtruſt, which hath ſo often ſhivered them. ‘For whatever other accident this miſchief may be ‘aſſigned unto, there was nothing elſe that brought it ‘upon us, but the King's juſt ſtanding to have the ho‘nour of our truſt, and our ill-grounded obſtinate ‘fears, that would not be ſecured. This was that ſpi‘rit of the air that walked in darkneſs, abuſing both; ‘whereon if once one beam of light and truth had ‘happily reflected, it had paſſed over, as clouds with‘out rain, and left the King far better contented with ‘his people, and them much more happy, albeit as ‘they are (thanks to God and his Majeſty) the hap‘pieſt of the whole world (86).’

(86) p. 289.

[*U*] *He met with a repulſe.*] His addreſs on this occaſion to the King begins thus:

‘May it pleaſe Your Sacred Majeſty:

‘So many have been your Majeſty's conſtant favours yet was tempered with ſo much goodneſs, beſides a freſh aſſurance of protecting him in the further proſecution of his meaſures, that how much ſoever he laid the diſappointment (as he really did) to heart, yet he reſolved to go on with unabated vigour in the ſervice of his royal Maſter, and in the next ſeſſions of parliament which met for the redreſs of grievances in the beginning of October the ſame year, he managed with ſo much dexterity, that every motion for any grant from the crown, which was deemed to treſpaſs in the leaſt upon the prerogative, was immediately ſtifled in the birth (*ee*), and no graces paſſed but ſuch as both in the matter and manner of granting them, eſtabliſhed the King's abſolute and unconditioned ſovereignty. The parliament being ſo well affected, and compoſed as it was, was ſuffered to continue ſitting, with ſome prorogations, till the middle of April 1635 (*ff*) [*W*], when it broke up, and left the Deputy in a broken ſtate of health, through the fatigue he underwent in managing it. But he comforted himſelf with the full perſuaſion that it was the happieſt parliament Ireland ever had, having done more for the King, more for the church, and more for the ſettling and ſecuring of the ſubject than any that had gone before it. 'Very confident,' ſays he, 'I am, his Majeſty hath now made himſelf more abſolute maſter of this kingdom by his wiſdom, than any of his progenitors were ever able to do by their ſwords (*gg*).' But ſuch extraordinary changes being never wrought without creating ſome malecontents, the Deputy did not reap his glorious harveſt without a mixture of ſuch tares. He was informed that the Jeſuits and friars in particular threatened him with a Felton or a Raviliac [*X*]. Theſe however were not his

moſt

(*ff*) Several of the Deputy's letters ſoon after.

(*ee*) One of theſe was a motion for repealing Poyning's act, which was abſolutely denied by the Deputy, p. 345. who entered his proteſt againſt it in writing.

(*gg*) Letter of Deputy to Lord Danby, p. 414.

'vours towards me, as I find a great conflict in myſelf to become a ſuitor for any thing to be added, where it is not in me to merit the leaſt of thoſe already received; nor could I have been drawn to the boldneſs of ſuch a requeſt, but that the conſideration of your Majeſty's ſervice doth partly harden me thereunto.

'The affairs here, as I conceive, are in a very proſperous way, and under your ſovereign power and wiſdom by few other means ſo much to be improved, as by the credit you ſhall vouchſafe to him that hath the truſt to ſerve your Majeſty in this place. Believe me, Sir, if I do not much miſtake myſelf, there fall into conſideration very great ſervices to be done in this kingdom, far greater than either are yet effected, or by me tranſmitted, or than indeed I dare propound, till I have a little better prepared them for your Majeſty's judgment. In the interim, the ambition which moves me powerfully to ſerve your Majeſty, as my obligations are above thoſe that preceded in this employment, ſuggeſt unto me an hope I may be more enabled in thoſe reſtleſs deſires of mine, if I might before our meeting again in parliament receive ſo great a mark of your favour as to have this family honoured with an earldom. I have choſen therefore with all humbleneſs to addreſs theſe lines immediately to yourſelf, as one utterly purpoſed to acknowledge all to your princely grace, and without deriving the leaſt of the privity or thanks elſewhere. And yet retaining ſo much modeſty, as I ſhall with an equal and contented ſubmiſſion expect your Majeſty's good pleaſure, fully ſatisfied, if either you ſhall be pleaſed to grant my ſuit, or vouchſafe ſo to ſilence me herein, as no other perſon know hereafter, your Majeſty found it in your wiſdom not fit to be done,' &c. (87)

(87) p. 301, 302.

Notwithſtanding the caution herein given for privacy, the deputy applied to Archbiſhop Laud (his other ſelf) to further his ſuit (88). But the King anſwered that to himſelf in theſe terms:

(88) p. 331.

'WENTWORTH,

'Before I anſwer any of your particular letters, I muſt tell you, that your laſt public diſpatch has given me a great deal of contentment, and eſpecially for keeping off the envy of a neceſſary negative from me of thoſe unreaſonable graces, that people expected from me, not in one particular diſſenting from your opinion (that is of moment as I remember) but concerning the tallow, and that but *ad referendum* neither. Now I will begin concerning your ſuit, though laſt come to my hands; and firſt for the form, that is to ſay, in coming to me not only primarily, but ſolely, without ſo much as acquainting any body with it, the bearer being as ignorant as any: This I do not only commend, but recommend to you to follow always hereafter, at leaſt in what concerns your own particular. For to ſervants of your quality (and ſome degrees under too) I allow of no mediators, tho' friends are commendable; for the dependence muſt come merely from me and to me. And as for matter, I deſire you not to think, that I am diſpleaſed with the aſking, though for the preſent I grant it not. For I acknowledge that noble minds are always accompanied with lawful ambitions. And be confident that your ſervices have moved me more than it is poſſible for any eloquence or importunity to do. So that your letter was not the firſt propoſer of putting marks of favour on you; and I am certain that you will willingly ſtay my time, now ye know my mind ſo freely, that I may do all things *a mi modo*; and ſo I reſt

'Your aſſured friend,

Hampton-Court, the 23d
of October 1634.

'CHARLES R. (89)'

(89) p. 331, 332.

[*W*] *The parliament continued ſitting till April* 1635.] The deputy had prevailed for continuing their ſeſſion ſo long, againſt the firſt intention and mind of the King, who gave order for their diſſolution in January 1634 (90). 'My reaſons, ſays his Majeſty, are grounded upon my experience of them here. They are of the nature of cats, they ever grow curſt with age, ſo that if ye will have good of them, put them off handſomely, when they come to any age; for young ones are ever moſt tractable. And in earneſt you will find, that nothing can more conduce to the good beginning of a new, than the well ending of the former parliament; wherefore now that we are well, let us content ourſelves therewith.'——The deputy, writing about this aſſembly after its concluſion, has theſe remarkable words: 'The parliament is ended here; the King, I truſt, well ſatisfied, and the ſubject too, which indeed is the happy effects of parliaments, and yet this is the only ripe parliament that hath been gathered in my time; all the reſt have been a green fruit broken from the bow [bough] which, as you know, are never ſo kindly or pleaſant.

(90) In a letter to the Deputy, dated 22d Jan. 1634. p. 365.

'Happy were it, if we might live to ſee the like in England; every thing in its ſeaſon; but in ſome caſes it is as neceſſary there be a time to forget, as in others to learn; and howbeit the peccant (if I may without offence ſo term it) humour be not yet wholly purged forth, yet do I conceive it in the way; and that once rightly corrected and prepared, we may hope for a parliament of a ſound conſtitution indeed: but this muſt be a work of time, and of his Majeſty's excellent wiſdom, and this time it becomes us all to pray for, and wait for, and when God ſends it, to make a right uſe of (91).'

(91) Deputy to his couſin Mr George Butler, dated Dublin, May 6, 1635. p. 420.

[*X*] *The friars threatened him with a Felton.*] The deputy, before and after his firſt going to Ireland, had made his court to the Papiſts out of policy. He had for inſtance forborne to levy the 12d. a Sunday, in the view of winning them to a compliance with the contribution of the ſupport of the army, &c. In fabricating the parliament afterwards, he endeavoured to procure ſuch a number of them to ſit in the houſe of commons as might be a ſufficient balance to curb any ill humour of the Proteſtants there (92), but as ſoon as he found himſelf able to carry all his points by theſe alone, againſt the will and weight of the former, he put on another countenance, and took care to counter-work all their deſigns of getting the ballance of power to

turn

(92) p. 186. in Deputy's letter to the King, containing his opinion concerning a parliament, in which he propoſes to make as many officers of the army burgeſſes as he can for the ſame purpoſe, but that was diſapproved by his Majeſty, p. 187.

moſt dangerous enemies. He had in the courſe of his adminiſtration given great offence to ſome of the prime nobility, by proceeding ſharply againſt them on certain occaſions *(bb)*; particularly the proſecution, even to a ſentence of death againſt the Lord Mountnorris [*Y*] this year 1635, was univerſally complained of, and even cenſured by the Governor's turn in their favour (93). At the ſame time he did his utmoſt to ſtop the pernicious practices of the Friars and Jeſuits to abſolve before-hand any witneſs in a court of juſtice from the ſin of taking a falſe oath in favour of the party, as alſo their ſending large ſums of money out of Ireland to ſupport their friends and adherents abroad.

[*Y*] *A ſentence of death againſt Lord Mountnorris.*] As this ſentence lies the heavieſt on the Deputy's memory of any part of his adminiſtration, it will be proper to give the ſubſtance of it as follows After a ſuitable preface, containing the King's declaration of the heinouſneſs of the offence in general, the neceſſity of making *reparation* to the Deputy, and empowering the council to bring him to his trial, and puniſh him accordingly for it, the ſentence proceeds thus; ‘ In obedience to his Majeſty's command, We, the Lord Deputy called a council of war, who being this day aſſembled, We the Lord Deputy, in the preſence of the ſaid Lord Mountnortis, did charge him with this offence, that within three or four days, or thereabouts, after the end of the parliament, it being mentioned at the Lord Chancellor's table, that after We the Lord Deputy had diſſolved the parliament then ſitting down in the preſence-chamber, one of our ſervants in moving a ſtool happened to hurt our foot, then indiſpoſed through an acceſſion of the gout; that one then preſent at the Lord Chancellor's table, then ſaid to the Lord Mountnorris, being there likewiſe, that it was Anneſley, his Lordſhip's kinſman, and one of the Lord Deputy and General's gentlemen uſhers that had done it: whereupon the Lord Mountnorris then publickly, and in a ſcornful contemptuous manner anſwered, Perhaps it was done in revenge of that publick affront which my Lord Deputy had done him formerly, but he has a brother that would not take ſuch a REVBNGE. Which charge being ſo laid, the Lord Mountnorris was required by this council of war to make anſwer thereunto, who going about to anſwer it, and yet neither confeſſing nor denying the words, this council, after ſome time ſpent therein, required him to anſwer the ſaid charge, either negatively or affirmatively, yet he would not confeſs or deny them. Whereupon the witneſſes vouched for proof thereof were called, namely, the Lord Viſcount Moore and Sir Robert Loftus, ſon to the Lord Chancellor, who upon their oaths affirmed the ſaid words to be ſo ſpoken, at the time and place aforeſaid, where and when they were preſent. Whereupon the Lord Mountnorris ſubmitted himſelf at laſt to the judgment of this council, proteſting, that what interpretation ſoever his words might have put upon them, he intended no prejudice or hurt to the perſon of us the Deputy and General, affirming, that by theſe words, *But he hath a brother that would not take ſuch a revenge,* his Lordſhip meant only, that he the ſaid brother would die before he would give us the ſaid Deputy and General occaſion to give him ſuch a rebuke. We fell,’ continue they, ‘ in the next place to conſider, as of the nature of the offence, ſo of the puniſhment due thereunto. And firſt, for the nature of the offence, we conceive it to contain firſt a calumny againſt the perſon of us the Deputy and General of the army, inſinuating that by theſe words, *the public affront, or the diſgrace which my Lord Deputy had done him formerly*, that indeed there had been ſuch an affront or diſgrace put upon him by us the Lord Deputy; whereas in truth it was nothing ſo, but that which was pretended by the Lord Mountnorris to have been the ſaid diſgrace or affront to his kinſman, was this; That his ſaid kinſman being one of the horſe troop commanded by us the Lord Deputy, in the time of exerciſing the ſaid troop, was out of order on horſeback, to the diſturbance of the reſt then in exerciſing: for which we the Lord Deputy in a mild manner reproving him, as ſoon as we turned aſide from him, we obſerved him to laugh and jeer us for our juſt reproof of him, which we diſliking, returned to him, and laying a ſmall cane which we then carried, on his ſhoulder, yet without any blow or ſtroke then given him therewith, told him, that if he did ſerve us ſo any more, we would lay him over the pate *. Which ſaid act was by this whole council adjudged to have been a far milder proceeding with Anneſley, than ſuch an inſolence and diſobedience to any commander, much more to his General, merited. And therefore it was a ſpeech ſavouring doubtleſs of malice, to inſinuate that as an affront or diſgrace which was indeed a juſtly-merited, but mild and modeſt reprehenſion and admonition. Secondly, we conceive the offence to contain an incitement to a REVENGE in theſe words, *But he has a brother that would not take ſuch a revenge:* which incitement might have given encouragement to that brother, being then and now in this kingdom, and Lieutenant of the ſaid Lord Mountnorris's foot-company, to the ſaid Anneſley himſelf, being continually ſo near the perſon of us the Deputy and General, or to ſome other, to have taken up reſolutions of dangerous conſequences. And the manner of ſpeaking the words does ſo far aggravate them, as there is no place left for any indulgent conſtruction, but ſuch as renders the ſpeaker a delinquent in an high and tranſcendent manner againſt the perſon of his general, and his Majeſty's authority, whence we derive our power †. And the revenge thus inſolently vaunted to have been taken upon him being done, when we the Deputy and General had that great and high honour (which we always eſteem ourſelf in ourſelf far unworthy of) to be apparelled and robed with his Majeſty's own robe of majeſty and ſovereignty. We conſidered likewiſe the time when theſe words were ſpoken, when part of the army was in motion, and when there were diverſe companies of foot and troops of horſe in town, and daily in exerciſing and training, whereat for the moſt part We the ſaid Deputy were preſent, and the town full of people from all parts of the kingdom, as then unreturned back to their own dwellings, from their ſitting in parliament.

‘ In the next place, for the puniſhment due to this offence, We judge it to be an apparent breach and contempt of the 41ſt article of the printed laws and orders of war ‡, eſtabliſhed for the good conduct of the ſervice of Ireland, dated 13th of March 1633, and publiſhed in print by us the Lord Deputy, ſoon after our acceſs to this government; and which is more, in like breach and contempt of the 13th article of the ſaid printed laws and orders of war §. Which articles are no other than the very ſame articles this army had always been governed by in the time of the late Lord Falkland, Lord Wilmot, and other generals before them. And therefore this council of war, in conformity to his Majeſty's gracious pleaſure ſignified as aforeſaid, and as well to vindicate the honour of us his Majeſty's Deputy and General of his army from the wrong and contempt under which we now ſuffer, to the ſcandal of this government, and to the ill example of others; as alſo to deliver over to all which bear office, or are liſted as members of the army under the rule and government of us his general, an example of juſtice for them to take warning by, how they preſume to offend againſt the authority intruſted with us by his Majeſty, do adjudge hereby, order and decree, that the ſaid Lord Mountnorris ſtands juſtly and deſervedly liable to undergo the cenſures, pains, and puniſhments, by the ſaid 41ſt and 13th articles provided againſt the breakers of all good diſcipline, and the tranſgreſſors againſt thoſe orders: And therefore according to the ſaid articles this council do unanimouſly with one joint conſent (not one of us being of other opinion) adjudge the ſaid Lord Mountnorris, for his ſaid high and great offences to be impriſoned, to ſtand from henceforth deprived of all the places, with the entertainments due thereunto, which he holds now in the army, to be diſarmed, to be baniſhed the army, and diſabled for ever bearing office therein hereafter, and laſtly to be ſhot to death, or to loſe his head at the pleaſure of the General.

(*bb*) Particularly the Earls of Corke, St Albans, Wilmot, and others, who ſuffered greatly in their eſtates by the Deputy's ſtrict execution of the new law for examining into defective titles.

(93) The particulars are contained in Deputy's letter to Secretary Coke, dated Dec. 16th, 1634. p. 350, 351, 352.

* The truth of which was witneſſed by two captains, the Lord Kirkudbright and Sir Fred. Hamilton, Knt. who then ſaw the manner, and now ſat as members of this council.

† This council alſo took it into conſideration, that if the like words had been ſpoken of the King, they had amounted to little leſs than high treaſon, which by ſome rule of relation apply themſelves over to his Majeſty, being directed to the perſon of his Deputy.

‡ The words of which are, That no man ſhall offer any violence or contemptuouſly diſobey his commander, or do any act, or ſpeak any words, which are like to breed any mutiny in the army or garriſon, or impeach the obeying of the general or principal officer's directions, upon pain of death.

§ Viz. in theſe words, No man ſhall give any diſgraceful words or commit any act to the diſgrace of any perſon in his army or garriſon, or any part thereof, upon pain of impriſonment, public diſarming, and baniſhment from the army, as men for ever diſabled to carry arms.

vernor's beſt friends. At the ſame time he was known to be in ſuch high favour with his Majeſty, that Weſton Earl of Portland, Lord High Treaſurer of England, dying this year, the White Staff in the general opinion was adjudged to the Deputy; but he declined making any application to his Majeſty for that office [Z]. He well knew his preſence was moſt uſeful and neceſſary to his Maſter in Ireland, and therefore determined to complete by a ſuitable execution thoſe ſervices which had been ordained in parliament. In this reſolution he puſhed the proceedings on the commiſſion for defective titles, with the natural activity of his vigour, and particularly procured the King's right to be aſcertained to all the lands in the four counties of Connaught, Sligo, Roſcommon, and Galway (*ii*), the profits thereof brought a conſiderable revenue to the crown. He was wholly intent upon this buſineſs, when he received the news of his principal ſteward's death in Yorkſhire (*kk*), which requiring his preſence there to look after his private affairs, he obtained leave to come to England. He arrived in June 1636 at London, and preſently before the King in full council at Hampton Court, gave an account of his government in Ireland, concerning the reſtitution of the rights of the church, the eſtabliſhing of Engliſh laws, the reformation of the army, the King's revenue, and the diſcharge of his debts, the ſecuring of the ſea, and the advancement of trade, &c. with ſome future deſigns for the King's ſervice in that kingdom (*ll*). This contained a liſt of the ſeveral articles completed ſince his employment there, together with other particulars wherein the ſaid revenue might

The whole proceeding was univerſally condemned, and the ſentence beyond all example ſevere. The Deputy himſelf was apparently conſcious of it, and was at the pains of drawing up a declaration in his own defence. But this was far enough from ſtopping the cry againſt him, which indeed was ſo great, that his true friend Mr G. Garrard thought fit to lay before him the particulars. ‘ Your declaration,’ ſays that friend to him, ‘ I have ſeen. It gave me much ſatisfaction, yet others make ſome queries, and more we ‘ ſhall hear of after it is ſpread abroad; every man is ‘ covetous of it. They except, that you were preſent ‘ at the cauſe which concerned yourſelf: they aſk ‘ why he [Mountnorris] was called no ſooner to a ‘ marſhal's court, ſince the King's letter of the 31ſt ‘ of July commands your Lordſhip ſpeedily to do it. ‘ The word *Reparation* mentioned in his Majeſty's letter ſticks much with ſome, for they conceive by that ‘ word, that his acknowledgment of his fault, with ‘ his ſubmiſſion on his knees to you the Lord Deputy ‘ was the fartheſt extent of that word. With the ſentence your Lordſhip hath nothing to do, but to ſee ‘ the execution thereof, ſo that they are a little bolder ‘ with your captains and council of war. 'Tis held ‘ by many a ſevere ſentence. They ſay, if he had ‘ meant any ill, or that any ſhould have come thereof, ‘ he would have whiſpered thoſe words in corners ‘ amongſt ſwordſmen, and not been ſo great a fool as ‘ to utter them at the Lord Chancellor's table, a great ‘ officer, and counſellor of the kingdom. They wonder, that the Viſcount Moore ſhould be a witneſs ‘ and a judge. And in fine conclude that it cannot be ‘ parallelled in any time, *conſideratis conſiderandis*, that ‘ any man for the like words, no enemy in the country, ſo long time after, ſhould be adjudged to die (95).’ Thus does this friend, obſerving his diſtance of ſtation, communicate to his Lordſhip his own concurrence in the general cenſure of this action. And in the ſame friendly diſpoſition, though pointed with a ſmart rebuke, he proceeds to contraſt it with an account of the very different ſpirit ſhewn lately at the Iſle of Rhé by the Duke of Buckingham, who was King's General there, which has been already related (96).—— Upon the whole, it is obſervable, how much pains are taken, and how many words ſpent, in order to aggravate the charge, by enlarging upon ſuch circumſtances attending it, as are culled out for the purpoſe, even ſo far as expreſly to ſet it cloſe to (if not quite within) the border of high treaſon.— Was there not a divine Nemeſis then in his Lordſhip's loſing his head by a proſecution for that crime, in the ſupport of which his ſentence againſt Mountnorris was made an article?

(95) p. 510. in a letter dated Jan. 25. 1635.

(96) Viz. in the article of George Villiers, firſt Duke of Buckingham of that name.

[Z] *He declined the treaſurer's place.*] Among others who courted him to apply for that place, was his couſin Sir George Butler, to whom he wrote a letter which begins with ſuch an account of himſelf in this particular, as he manifeſtly deſired at leaſt ſhould be tranſmitted to poſterity, thus:

‘ SIR,

‘ This ſhall be in anſwer of yours of the 5th of ‘ April laſt, wherein I find you retain me in your memory, albeit remote and abſent, for which I pay ‘ you many and hearty thanks.

‘ It is true, I hear of the death of the Treaſurer, ‘ and my Lord Cottington's being maſter of the wards. ‘ This death (the great and final ſilencer of all our ‘ words and thoughts) hath laid the former to reſt, but ‘ ſo has not this office the latter, for by that which I ‘ hear his aim is at the ſtaff, in which purſuit he ſhall ‘ have no oppoſite of me directly or indirectly, and if ‘ his Lordſhip be but in himſelf ſatisfied that really it ‘ is ſo, I have what I look for upon the death of the ‘ other. Believe me, I have no ambition, nay, no ‘ inclination to that place; for it is moſt certain I ‘ have an inward and obſtinate averſion from it. I ‘ do not ſerve the King out of the ordinary ends that ‘ the ſervants of great princes attend them with; ‘ great wealth I covet not; greater powers than are ‘ already intruſted with me by my Maſter, I do not ‘ deſire; I wiſh much rather abilities to diſcharge ‘ theſe I have as becomes me, than any of thoſe I ‘ have not. Again, I ſerve not for reward, having ‘ received much more than I ſhall be ever able to deſerve. Beſides, there ſhould, and I truſt in God there ‘ ſhall be a time for me in ſtillneſs and repoſe to conſider myſelf, and theſe other more excellent and ‘ needful duties, than thoſe momentary trifles below, ‘ which the treaſurer's place admits not, at leaſt to ‘ my ſatisfaction; for this is certain, that a treaſurer ‘ muſt die ſo, or be diſhonoured, if not altogether ‘ ruined. And to be tyed to the importunity of affairs all my life, in good faith, all the preferments, ‘ and what elſe ſoever men moſt eſteem in this world, ‘ ſhall, I truſt, never ſo far lay aſleep or infatuate the ‘ ſenſe I ought to have of that much better which ‘ remains after his life. Hence it is, that I have not already writ to any of my friends ſince the treaſurer's ‘ death, to ſhew them that they might forget him that ‘ forgets himſelf. And it is my misfortune that there ‘ ſhould be ſuch a dearth of men, as that ſo unfit a ‘ man as myſelf ſhould once come to be thought of ‘ for ſuch a place, and that no friend I have can do ‘ me a greater favour than to rectify this common ‘ error, that I am a perſon qualified for that employment; for in good faith I am not, or to be thought ‘ of for it, by any other more than I am by myſelf, ‘ which as I am a Chriſtian is not at all; and ſo you ‘ have inwards and outwards a full account of me in ‘ this matter (97).’

(97) p. 419, 420. in a letter dated Dublin this 6th of May, 1635.

For the peremption and licences of tobacco —— —— ——	8000 0 0
Salt, if peace with France ——	10000 0 0
Sum total —— ——	51500 0 0

To be ſaved, which is now ſpent.

Forth of the army, according as I have ſhewn your Majeſty ——	15000 0 0
By victualling and furniſhing the ſhips for guarding the Iriſh coaſt, as appears by my propoſition ——	3000 0 0
Total —— ——	18000 0 0
So the total of all improvements and ſavings comes to —— —	96450 0 0

Beſides this crown eaſed of ſeven thouſand pounds charge for the ſhipping appointed to the guard of that coaſt; and powder for the ſervice of that kingdom; which ſtood his Majeſty in 500l. per annum.

‘ If your Majeſty be pleaſed to lay this paper by you, within a few years it will appear whether I be deceived in my opinion of thoſe affairs, which indeed I truſt will be in that time effected (98).’

[*BB*] *He applied again for an Earldom, and was again denied.*] His letter to the King was as follows:

‘ May it pleaſe Your Sacred Majeſty:

‘ In purſuit of the command received at Rufford, I have effectually both in publick and private recommended the juſtice and neceſſity of the ſhipping-buſineſs, and ſo clearly ſhewed it to be not only for the honour of the kingdom in general, but for every man's particular ſafety, as I am moſt confident the aſſeſſment this next year will be univerſally and cheerfully anſwered throughout this whole juriſdiction.’

He then mentions a complaint of my Lord Marſhal's againſt him, from which having vindicated himſelf, he proceeds in theſe terms:

‘ If this were the only diſpleaſure I had contracted in ſerving faithfully (as I ſhall ever do) it might be born eaſily and ſilently; but it is much otherwiſe with me, as I have heard ſince I attended Your Majeſty. My carriage on this ſide hath been towards all ſo circumſpect and obſervant, as I well truſted there had not been the leaſt offence or ſcandal given or taken: Yet it ſeems I have left ſome great and powerful perſons in ſuch a diſtemper towards me, and themſelves, as in a manner every where to avow a reſolution ſet for my ruin.

‘ It is likewiſe diſcourſed much to my prejudice, as they think, that my return muſt be without any mark of Your Majeſty's favour, whereby my innocency and juſt acquittal might be declared to the hearing of others, or myſelf ſtrengthened or graced in the courſe of my ſervice; albeit they ſay, I had been defamed for barbarous and cruel uſage of the late Earl of St Albans, and the Lord Mountnorris; ſlanted upon by Sir James Gallway and Mr Barr, in their propoſition to your Majeſty, as a cozener and impoſtor in the cuſtoms, under a pretence of doing great ſervice: charged by Sir Piers Croſby with an horrid murder, the ſilly man daily countenanced and fomented by ſome at court in his ſenſeleſs calumnies, and in a word, reported to all the world rather for a Baſhaw of Buda, than the miniſter of a pious and Chriſtian King.

‘ Little do I find myſelf moved with any or all of theſe; I can ſmile at their vanity, that glorify themſelves in being reported the contrivers and procurers of this imputed coldneſs and diſregard, nay, eſteem them as little powerful as they would be thought almighty in ſuch a caſe; and, which is far above all the reſt, ſecurely repoſe myſelf, and humbly wait upon Your Majeſty's gracious promiſe, that I ſhall receive ſuch a mark of your favour, as will ſilence theſe ſpirits, and ſet me right again, as well in the opinion of others, as for your own ſervice.

‘ Yet where the ſtorm ſets ſo dark upon me, and my abſence likely to be of ſome continuance, I cannot conceal that there are many things upon this occaſion which I deſire to offer, ſome for the proſperity of your affairs, ſome for my own defence and ſafety, and all of them fitter to be diſcourſed than written. So as if it be poſſible, and that Your Majeſty will admit me thereunto, I purpoſe to wait at court a day or two in my paſſage towards the charge Your Majeſty intruſteth me with in Ireland, and there attend your future commands with and through all the expreſſions of

‘ Your Majeſty's

‘ Moſt faithful and moſt humble

‘ ſubject and ſervant,

Wentworth-Woodhouſe,
23d Aug. 1636.
‘ WENTWORTH (99).’

He likewiſe deſired the Archbiſhop to back his ſuit for the ſame reaſons: ‘ Upon the whole matter’ (ſays he to this ſure friend, ſpeaking of the complaints againſt him) ‘ I foreſee that the uttering of this coin, how falſe or adulterate ſoever, by perſons not well affected towards me, will ſharpen and ſtir ill humours, and put a huge prejudice upon me in the ſervice of the crown. And therefore I beſeech your Grace, taking your hint from theſe grounds, to move his Majeſty that I may receive ſome mark of his favour, and that it may be conferred upon me ſome ſuch way, as ſhall render it comely and publick. I ſubmit it to your Grace's wiſdom, whether you ſhall be pleaſed to move in the general, or for an earldom in the particular, which, if I flatter not myſelf too far, I may without offence pretend unto.

‘ Whatever the ſucceſs be, I will ſerve his Majeſty by the help of God with the ſame diligence, labour, and faith, as formerly; yet to confeſs a plain truth to your Grace, with whom I neither muſt nor can ever diſſemble, with leſs cheerfulneſs in myſelf hereafter.

‘ Wentworth-Woodhouſe,
‘ 26th of Aug. 1636. (100).’

The Archbiſhop did accordingly move his Majeſty fully, both in general, and particularly for the Earldom.

(99) p. 26, 27.

(100) p. 28.

pected blow did at firſt ſhake his reſolution, and he had ſcarcely recovered it, when he ſet out on his return to Ireland, where he arrived in November the ſame year 1636, and proceeded in his adminiſtration with the ſame diligence and fidelity to his Majeſty as ever, though not with the ſame cheerfulneſs in himſelf *(mm)*. In this diſpoſition he had actually made a good progreſs toward completing his promiſes in the further increaſe of his Majeſty's revenue *(nn)*, and in improving the ſtrength and condition of that kingdom, both in church and ſtate, when the troubles breaking out in Scotland, put an end to all his deſigns for Ireland. That unfortunate affair drew his thoughts off from cultivating the arts, and ripening the fruits of peace, to the diſagreeable care of guarding againſt the dangers and miſchiefs of a civil war. This however gave him, though againſt his will, an occaſion of diſplaying his excellent talents in the military, as he had already done in his civil capacity. He found means to keep the Iriſh quiet, notwithſtanding the continual attempts of their Scottiſh friends and neighbours, as they are particularly to thoſe in the province of Ulſter, who were in general of Scottiſh extraction *(oo)*, and intirely united in principles to that Kirk [*CC*]. The Deputy therefore having procured a petition

(*mm*) Radcliffe, and the Letters. See Remark [*BB*].

(*nn*) Before the end of 1638 he had bettered it 50,000*l*. per ann. p. 270.

(*oo*) Their numbers amounted to no leſs than 60000, not ten hours ſail from Scotland: but they were awed by a corps of 400 horſe placed round them, p. 270.

dom. His Majeſty's anſwer was, that he would do that which ſhould ſtrengthen the Deputy enough againſt any practiſing at court: but that for the particular and all that concerned it, he would give the Deputy an anſwer himſelf, ſo ſoon as he came to his next place of leiſure (101). He did ſo in the following terms:

(101) Wrote by the Archbiſhop from Oxford, Aug. ult. 1636. p. 31, 32.

‘ Wentworth,

‘ Certainly I ſhould be much to blame not to admit ſo good a ſervant as you are to ſpeak with me, ſince I deny it to none that there is not a juſt exception againſt; yet I muſt freely tell you, that the cauſe of this deſire of yours, if it be known, will rather hearten than diſcourage your enemies; for if they can once find that you apprehend the dark ſetting of a ſtorm, when I ſay no, they will make you leave to care for any thing in a ſhort while, but for your fears. And believe it, the marks of my favours that ſtop malicious tongues are neither places nor titles, but the little welcome I give to accuſers, and the willing ear I give to my ſervants: This is not to diſparage thoſe favours (for envy flies moſt at the faireſt mark) but to ſhew their uſe; to wit, not to quell envy, but to reward ſervice; it being truly ſo, when the maſter without the ſervant's importunity does it, otherwiſe men judge it more to proceed from the ſervant's wit, than the maſter's favour. I will end with a rule that may ſerve for a ſtateſman, courtier, or a lover, Never make a defence or apology before you be accuſed. And ſo I reſt

‘ Your aſſured friend,

Lindhurſt, 3d Sept. 1636. ‘ Charles R.

‘ For my Lord Marſhall, as you have warned me, ſo I warrant you (102).’

(102) p. 32.

How the Deputy ſtomached this denial, in ſome meaſure appears by his anſwer thereto, which begins thus:

‘ May it pleaſe Your Sacred Majeſty;

‘ The letter vouchſafed me from Lindhurſt awakens me with your gracious favour to expreſs myſelf farther in ſome few particulars, leſt perchance my deſires and the grounds of them, might be conceived otherwiſe than I meant.

‘ The dark ſetting of a ſtorm was not with the leaſt apprehenſion that your Majeſty's gracious and cheerful favours were either leſſened or languiſhing towards me, but had relation merely to ſome near your Majeſty, who publickly profeſs my ruin.

‘ Nor was or ever can this or any other the like ſtorm be able to affright or ſhake me from the duties or faith I owe unto your Majeſty's commands. I truſt ſuch a poverty of ſpirit ſhall not be imputed unto a mind long ſince reſolved freely to ſacrifice a life, as often as required, for the leaſt of your good pleaſures. It is indeed altogether impoſſible I ſhould begin to care leſs for your ſervice, meanly or at all to weigh my greateſt dangers, when your Majeſty's ſmalleſt intereſts are concerned; much leſs under favour to care for nothing but my own fears. And yet (I find it) this immoveable purpoſe doth conſiſt well enough with a moderate foreſight ſo to provide for a ſafety, as it may be without your trouble, judging otherwiſe my being or well being leſs in value, than that it ſhould coſt your Majeſty ſo much as a diſpute to preſerve me.

‘ Whatever your Majeſty appoints ſhall pleaſe me moſt, it being certainly beſt for me rather really to live in your gracious good opinion, than only to be thought ſo by others: Yet better for your affairs in Ireland, I might ſeem and appear ſo to them on that ſide. So then whilſt I did moſt confidently truſt, through your Majeſty's goodneſs, that I had the beſt for myſelf, it will, I hope, be very pardonable, if I did deſire to better my condition alſo, as I ſtood in relation to thoſe affairs, and the greatneſs of the ſervice now in view amongſt them.

‘ As for wit or importunity, in the former I did never affect other than a ſingle plainneſs, nor is my nature poſſibly to be hardened into the latter. Beſides, I too well know, and more reverence your Majeſty's wiſdom and courage, than (had I been that way inclined) to attempt you by either. And I do moſt earneſtly beſeech you, Sir, to be aſſured that I never went diſguiſedly forward with you in all my life, nor could I ever yet ſo far value any thing as to proſtitute modeſty for it.

‘ And therefore conſidering nothing can more comfort me, or be more for my advantage than to be rightly underſtood by your Majeſty, I do moſt humbly acknowledge your favour in admitting my attendance at court for a few days in my paſſage for Ireland, where I ſhall not only ſet my own thoughts again at eaſe and liberty, but withal ſettle ſome of your buſineſs, which otherwiſe myſelf at Dublin may not chance to find any other ſollicitor that can attend upon them, undiſtracted by other your Majeſty's affairs (103).’

[*CC*] *United in principles with that Kirk.*] The principal fomenter of this rebellion, it is well known, was the Earl of Argyle, whoſe eſtate bordering upon Ireland, the greateſt danger to that kingdom aroſe from him. The Deputy therefore reſolved to try how far the force of his eloquent pen might work upon him to deſiſt. Several letters paſſed between them on this occaſion, but Argyll was immoveably fixed and rooted in his rebellious principles. It will not be amiſs to ſee the grounds which led him to that deſperate courſe, as they are laid open by himſelf in the laſt letter he wrote to the Deputy, as follows:

‘ My very honourable good Lord:

‘ Your Lordſhip's of the 25th of November came not to my hands till the 4th of this inſtant, whereby I find a new occaſion to thank your Lordſhip for the continuance of your good opinion; and although your Lordſhip's modeſty will not ſuffer you to aſſume any thing to yourſelf, yet I have your Lordſhip's wiſdom in ſo great eſtimation, that I think your Lordſhip will do nothing in vain; ſo whether in general or particular, your Lordſhip being pleaſed to take notiſh of me by your letter, I find it my duty to thank your Lordſhip. And although I do not undertake to excuſe any thing his Majeſty is pleaſed to diſallow, yet with your Lordſhip's favour I believe you ſhall find, that the complaints of that presbytery your Lordſhip mentions, which we call our Church or General Aſſembly, is concerning very eſſential differences betwixt the reformed church and that of Rome; and ſo far only againſt Biſhops, as they tranſgreſs the laudable laws and conſtitutions of this church and kingdom. For whether or not that be

‘ any

petition for the purpoſe of ſeveral lords, knights, and gentlemen, and others of the Scottiſh nation to the number of 42, inhabiting in the kingdom of Ireland, proceeded to paſs an act of council (*pp*), commanding all perſons of the Scottiſh, of the age of 16 years and upwards, who inhabited and had any eſtate whatſoever in Ireland, to take the following oath: I N. *do faithfully ſwear, profeſs, and promiſe, that I will honour and obey my Sovereign Lord King Charles, and will bear faith and true allegiance unto him, and defend and maintain his royal power and authority; and that I will not bear arms or do any rebellious or hoſtile act againſt him, or proteſt againſt any his royal commands, but ſubmit myſelf in all due obedience thereunto: And that I will not enter into any covenant, oath, or band of mutual defence and aſſiſtance againſt all ſorts of perſons whatſoever, or into any covenant, oath, or band of mutual defence and aſſiſtance againſt any perſons whatſoever by force, without his Majeſty's ſovereign and regal authority. And I do renounce and abjure all covenants, oaths, and bands whatſoever, contrary to what I have herein ſworn, profeſſed, and promiſed. So help me God in Chriſt Jeſus.* He alſo diſpatched a regiment of five hundred foot-ſoldiers, for the garriſon of Carliſle before the pacification; after which, when the Scots began to move again, the King commanding his preſence in England [*DD*], he repaired thither in September 1639, and on the

(*pp*) This act was paſſed May 16, 1639. and the proclamation thereupon on the 21ſt of the ſaid month, p. 345, 346. and 1000 foot troops with 500 horſe were diſpoſed into proper places of Ulſter, p. 337. an able pinnace was likewiſe ſent to cruize upon that coaſt, p. 361, 362.

any fundamental point in religion, is not here queſtioned nor determined; nor what is fundamental excluſive do I think any man will preſume to define ſo as it may be ane ſufficient rule for others.

‘ So I ſhall be very ſorry to wrong the memory of theſe reverend men, who ſealed their departure from Rome with their bloods. And I think I do it not, though I ſay, they were not arraigned becauſe they allowed ſuch things as are queſtioned here, but rather becauſe they would not allow much more; yea, even ſuch things as are complained of and diſallowed here; for it is the cauſe, and not the pain, that makes the martyr. And theſe men were only in *eccleſia conſtituenda*; and thought it a great journey for the firſt day (as it fares with all other travellers) to leave ane good town, with many friends and acquaintances, wher they had lived for many years; but we have ours conſtitute by her laudable aſſemblies, wherein your Lordſhip will find great difference.

‘ So with your Lordſhip's good leave, I muſt ſay ſtill, your Lordſhip is miſtaken, if you think the book that was offered and preſſed here was only the Engliſh ſervice, for in the very reading ane man may ſee the contrair.

‘ Yet truly I think all his Majeſty's ſubjects ought to thank God for his Majeſty's paternal care of his own children. And as all (I hoip) we acknowledge it to proceed from his Majeſty's own goodneſs, ſo I believe they are the loather to come under the hands of indiſcreet Pedantis, or rude Taſk-Maiſters, that wants the affection and moderation of a Father.

‘ And I am very ſorry, with your Lordſhip's favour I ſay it, that you wreſt the meaning of theſe your Lordſhip mentions, in their expreſſion of ſincerity and want of hypocriſy, as if they oppoſed them to their obedience to the lawful and undeniable ſubjection which they owe to their gracious ſovereign, when truly they only oppoſe voluntair and conſtrained actions in religious duties in relation to Him who requires cheerfulneſs at our hands, which I hoip no Chriſtian will deny.

‘ Nor beleive I any man will eſteem of antiquity, but where it is warranted with verity, and no verity is ſure in religion, but ſcripture. So I will not deny to your Lordſhip, if ſuch antiquity be not their warrant, they deſerve to have their portion with hypocrites, and to be unto every good work reprobate. Bot it ſeems they deſire rather to be like Moſes, who would not ſuffer any huiſe to remain in Egypt, leſt it ſhould give occaſion to return, nor the people that longed for the fleſh-pots again; or like Lot that durſt not look bak to Sodom, nor his wife that got her reward; or like Paul when he was converted, adviſing no mair with fleſh and blood, nor Ananias and Sapphira ſtill keping bak ſomething.

‘ So I wiſh your Lordſhip and all others of the reformed church (not knowing the conſtitutions of this) were as charitable to it, and meddled as little in diſquieting her peace, as (I hoip) they have cairfully prevented that fault by their proceedings here: And whoſoever is guilty of this treſpaſs, I pray God they may both repent it and mend it according to their power, and not bring upon us all greater evils which we may all repent when it cannot be ſo eaſily mendit. And ſo I reſt,

‘ Your Lordſhip's

‘ Moſt humble ſervant,

Inverraray, Feb. 20, 1638. ‘ ARGYLL.’ (104)

This earl actually appearing in arms ſoon after, the Deputy wrote to him for the laſt time, and ſent incloſed the King's proclamation, in a letter dated 19th March 1638. charging his former letters with maintaining Jeſuitical principles (105). In the mean time the Marquis of Antrim, who had an eſtate joining to that of Argyll, propoſed to raiſe ſome forces there to oppoſe the earl, and for that purpoſe applied to his Majeſty for aſſiſtance from the Deputy in Ireland, and being encouraged therein, he was very troubleſome to the Deputy, who never approved his propoſal, as being made purely out of vain-glory, by a perſon who was far enough from having means to compaſs it, and of a character not to be truſted. This was the unkindneſs complained of by the Marquis's conſort the Ducheſs of Buckingham, in a letter inſerted in that duke's article (106).

[*DD*] *The King ſent for him, &c.*] His Majeſty's letter on this occaſion runs thus:

‘ WENTWORTH,

‘ Hen. Bruce hath delivered yours of the 3d of July, and had likewiſe had full diſcourſe with me of all thoſe affairs; and though I eſteem him a better ſoldier than a ſtateſman, yet he has made ſome propoſitions in the politick way, ſomewhat mixed with the martial, not to be deſpiſed, yet not to be haſtily embraced without ſuch a good commentaire as you are able to make on them.’

‘ This cauſe only I confeſs were too ſleight to draw you, though but for a time, from your weighty charge; but I have much more, and indeed too much to deſire your counſel and attendance for ſome time, which I think not fit to expreſs by letter more than this. The Scots covenant begins to ſpread too far: Yet for all this I will not have you take notice that I have ſent for you, but pretend ſome other occaſion of buſineſs, as to be preſent at the hearing of the chancellor's appeal *, or what you will elſe; whom ſince I have named, I muſt tell you freely, I would wiſh ye would ſend him over without delay, if he have performed moſt, though not all (his friends pretend all) which I enjoyned him to do before his departure; if yet he ſtood not in ſome high contempt, which if it be, were moſt fit to be made clearly appear. It is very well done to go on with the Scotſmens oaths. So I reſt

‘ Your moſt aſſured friend,

Berwick, 23 July 1639. ‘ CHARLES R.’ (107)

‘ Received 5th of Auguſt at Naas.’

The proſecution here ſignified of the Lord Chancellor Sir Adam, Lord Viſcount Loftus of Ely, was a proceeding which, next to that againſt Lord Mountnorris, raiſed the greateſt clamour, and created the moſt ill blood againſt the deputy. What his firſt offence was, is ſeen in the following paper drawn up by the deputy and council for him to ſubſcribe, under the title of

(104) p. 290, 291.

(105) p. 299, 230.

(106) Several letters in the collection, vol. II. towards the concluſion, particularly p. 266. 278.

* He did make uſe of that pretence in a letter to the Lord Conway, dated 13th Auguſt 1639, p. 381, 382.

(107) p. 372, 373.

the 12th of January following was raiſed to his long coveted title, and created Earl of Strafforde, &c [*EE*]. And at the ſame time raiſed alſo from the title of Deputy to that of Lord Lieutenant of Ireland. When the ſcene of affairs was opened unto him, it was

The humble Petition of Adam *Viſcount* Loftus, *Lord Chancellor of Ireland.*

'To the Right Honourable the Lord Deputy and Council,

Whereas I Adam, Viſcount Loftus, Lord Chancellor of Ireland, did on the 24th of July laſt openly at this board charge the Lord Deputy to be principal in the decree paſt, and principal in the proſecution againſt me in the cauſe depending at the council-board, wherein Sir John Gifford Knight, is plaintiff againſt me and my ſon, Sir Edward Loftus, defendants; which proſecution being denied by the Lord Deputy otherwiſe than as a perſon intruſted to ſee his Majeſty's authority in the acts of his council board obeyed, I did then ſay again, *I wiſh to God I had not found it ſo.*

Now better recollecting myſelf, I do humbly acknowledge to have ſpoken thoſe words very unadviſedly in regard of the place and joint reſpect, which I owe to the dignity of the Lord Deputy and council, with ſcandal and diſreſpect to the particular perſon of his Majeſty's Deputy, thus upon my own ſurmiſes, without proof to impute unto his lordſhip the undue making himſelf a proſecutor, conſequently a party, in a cauſe where his lordſhip had been and was to be a judge; as alſo thus (his lordſhip denying the proſecution) unwarrantably to diſaffirm that which the Lord Deputy had ſo publickly affirmed, and by conſequence tacitly and injuriouſly imputing to his lordſhip the ſpeaking of an untruth.

And whereas I did the ſame day, in the ſame place confidently ſay, that *one of the deputy's ſervants had ſolicited and perſuaded Edward Jacob to complain againſt me, that the then petitioner Jacob had told me ſo in preſence of divers witneſſes, that I could name that ſervant and prove it*; whereupon the ſaid Jacob then called to the board, did abſolutely in my preſence deny that ever he had been ſolicited or perſuaded by any of the Lord Deputy's ſervants to the preferring of that or any ſuch complaint; and that he never told me any ſuch thing as I affirmed: whereunto I replied, that Jacob had told me, he had been dealt with by perſons of power to complain, and that ſome of my ſervants had told me Jacob had ſaid ſo.

I do humbly acknowledge, that this latter juſtification doth much vary, and not at all ſupport, though it were granted to be true, what at firſt I ſo confidently affirmed; and that in ſuch my aſſertions and informations to the board, I have through want of due circumſpection in my words, tranſgreſſed againſt that juſt regard I owe to truth, to the dignity and reverence becoming the Deputy and board ſitting in open council, and to that tender care which ought to be had by a perſon of my quality and place, to the employment and honour which his Majeſty intruſted and graced me withal.

Whereas I at the ſame time and place ſo diſavowed by Jacob did nevertheleſs again affirm, that the Lord Deputy's ſervants had wooed forty more beſides that petitioner, to exhibit petitions againſt me, without fixing upon any one particular, howbeit then called unto, and required by, the Lord Deputy:

I do humbly acknowledge it did not become me, ſo great a magiſtrate, to the evil example of others, ſtill to take the liberty to caſt ſo foul a ſcandal of maintenance upon the ſervants and family of the Deputy at large. And ſo the prejudice of ſuch a ſcandal not only reſt with them, but even in ſome degree reflect alſo upon the perſon of the Deputy.

Finally, whereas I did the ſame day in the debate of that buſineſs often and at ſeveral times interpoſe and interrupt the Lord Deputy, whilſt his Lordſhip was ſpeaking, hardly permitting his Lordſhip to come to a period in ſuch things as he then offered to ſpeak:

I do humbly acknowledge, I did therein very miſbeſeemingly tranſgreſs againſt the reverence I ought to his Lordſhip, then ſet in council, and ſo immediately repreſenting his Majeſty's perſon, as alſo againſt that juſt regard due to the dignity and gravity of the reſt of the Lords, and others then in council alſo.

All which my ſeveral miſcarriages, injuries, neglects, and incivilities, as I do humbly acknowledge, ſo I do hereby profeſs I am ſorry for the ſame; and do very heartily and humbly hereby petition and crave the pardon of the Lord Deputy and council in that behalf, promiſing for the future that I will have more attention and regard to what I ſhall affirm or alledge at the board, and more care to the reſpect and obſervance which both myſelf and all others ought to afford and perform before ſo high and ſupreme an authority as the Lord Deputy and council are intruſted with.'

This paper was ſent incloſed in a letter from the Deputy and Council to the King's ſecretary Coke, and dated 20th of December 1638 (108). It was afterwards ſigned by the chancellor in the view of obtaining his releaſe from impriſonment, in which he had been confined near half a year; but ſome other leſſer offences being brought againſt him (109), and purſued with the ſame temper as the firſt, he did not obtain his liberty before Auguſt the next year 1639. (110). Whereupon having appealed to the King and council in England, he went thither, where the cauſe of his appeal was heard before himſelf and the Deputy then preſent, and adjudged to be groundleſs, and an order of the Engliſh privy council was made accordingly at Whitehall, 19th of November 1639, confirming the decree made in Ireland, and requiring both the chancellor, and his ſon Sir Edward Loftus, to give due obedience thereunto (111), which they preſently complied with.

[*EE*] *His ſpeech on his creation.*] It is in theſe terms:

'Sir,

'It is acknowledged with reverence and truth, that Kings on the throne are ſacred pictures of divine Majeſty, but no where more expreſſive, than when excellent princes are delighted in themſelves, and magnified by others, rather through their favours than corrections.

'Nor doth ſovereignty at any time more eminently diſtinguiſh and exalt itſelf, than when we find power and will in contention, *or rather in conſent*, for doing of good more *effectually* and in larger meaſure, than can conſiſt with the condition of a ſubject to accompliſh.

'This method kept by great and magnanimous Kings hath bequeathed them famous and glorious to poſterity; and amongſt theſe Your Majeſty hath the preheminence; for ſuch is the caſe; the propenſeneſs, and, I may ſay, the tranquillity of your goodneſs, that what in them were habits acquired by long obſervation and practice, ſeems to be coeſſential to Your Majeſty's nature.

'Nor ſhall I need fetch an evidence to this truth forth of myſelf: a grateful mention only of the progreſs of your multiplied favours towards me your humble ſervant, will ſufficiently and clearly evince it.

'Your Majeſty of your mere and free grace made me a baron, when you had ſcarce heard of me, and that too rather by ill report than good.

'Not many days after, you were pleaſed to prevent any pretence of merit, in me, indeed to exceed my thoughts, through a gracious promiſe to make me viſcount and preſident of your council in the north, which was royally fulfilled within a few months after.

'Succeſſive to theſe you did me the honour to call me to your council-board; a deputy I was of your own choice; and at this preſent created an earl.—Theſe, Sir, in themſelves are exceeding great and laſting honours; yet are unto me in no relation ſo well pleaſing, as when I conſider myſelf by theſe degrees here upon my knees humbly at your feet, to attend the honour of your commands, and to be informed by your wiſdom.

'And I do moſt humbly beſeech Your Majeſty, that you may vouchſafe the continuance of theſe dear pledges unto me, and that I may from your inſtructions ſtill borrow light how to guide and direct myſelf in the future courſe of my ſervice to that which may be of moſt advantage to your affairs (112).'

(108) p. 260, 261.

new and ſurprizing: he had ſpent his time theſe laſt ſix years in Ireland, and the Scotch affairs had been managed againſt his opinion by a cabinet-council of their own countrymen. His Lordſhip finding the Scotch had gone too far to be brought to reaſon and obedience by gentle means, adviſed a war. He then moved the King for a parliament, there, which was inſtantly ſummoned, and afterwards for a parliament in England againſt the beginning of the next year 1640. In Lent he returned into Ireland, where he ſtaid about a fortnight, in which time he ſat in parliament, had four ſubſidies given there, appointed a council of war, and gave orders to levy eight thouſand foot there, which together with two thouſand foot, and a thouſand horſe, which was the ſtanding army in Ireland, and five hundred horſe to be joined with them, were to be ſent into Scotland under his Lordſhip's command. At the ſame time the Earl of Northumberland was to be general over 30,000 foot and 3000 horſe to be levied in England for the Scottiſh expedition, and James, then Marquis, afterwards Duke of Hamilton, was appointed to command a fleet of ſhips for the ſame deſign (*qq*). On the 3d of April 1640, being Good Friday, he imbarked again for England, being ſick of a flux and the gout, ſo that he was not able to reach London, and that in a litter, before the middle of that month. There he found the parliament, which he had adviſed, ſitting. Every one knows the ſpeedy and unlucky iſſue of that which was called The Short Parliament. In the mean time, the Earl's ſickneſs increaſing, brought him to ſuch a weakneſs, that he was not able to ſit up out of his bed half an hour in a day. Upon his recovery, the Earl of Northumberland fell ſick; whereupon the Earl of Strafforde was ſtayed from going into Ireland, and made Lieutenant General of the Engliſh forces, and ſent into the North to that army. But before his arrival they were defeated at Newborne under the command of Viſcount Conway. In November a new parliament, ſince called The Long one, begun to ſit in England, where our ſtateſman was firſt generally, afterwards particularly, impeached of ſundry facts, in the whole charged to amount to Treaſon. He came up from the northern army to the parliament, was committed by the Lords firſt to the black rod, and ſhortly after to the Tower. What his charge and anſwers were, appear beſt by the copies of both printed in his trial. He was allowed witneſſes, and the warrant to ſummon them was granted on the Friday next before his trial, which was on the Monday following; the witneſſes being moſt of them in Ireland, and for things alledged to be done in that kingdom. He had council alſo allowed, not to aſſiſt him in diſproving any matter of fact objected againſt him, but for matter of law, to make it good, if they could, that his charge did not contain treaſon (*rr*). But the proceeding in a judicial way againſt him was at laſt laid aſide, the reaſons whereof were declared in a ſpeech of Mr St John's in print. One reaſon was, that ſince the beginning of Henry IV. when a law was made againſt trials for treaſon in parliament, there had been no precedent of any man that had been condemned in parliament. Mr St John in that ſpeech ſaid, *that unto Wolves and Beaſts of Prey no law was to be given.* Hereupon a bill of attainder was provided. When it came to the queſtion in the Commons houſe, ſome members gave negative votes, and their names were preſently ſet upon poſts through the city as Straffordians: One gentleman came to a friend of his Lordſhip, aſking pardon for giving his affirmative vote for the bill, ſaying, He did it againſt his opinion, for he thought him not guilty; but he deſired to preſerve his credit in the houſe, being confident that neither King nor Lords would paſs the bill, and ſo his vote might do him no hurt. The reader's patience muſt not be abuſed by repeating a trial ſo well known. We ſhall only mention the evidence of Sir Henry Vane, becauſe it is referred to in a remark upon the caſe of Lord Mountnorris. It was concerning theſe words, ſuppoſed to be directed to the King in council, *You have an army in Ireland to reduce them.* None of the committee could teſtify theſe words. Sir Henry Vane twice examined, remembered them not, but the third time he did call them to mind, which made the Lord Digby declare in the Commons houſe, that he was not ſatisfied (*ss*); howbeit the words were voted by the Lords to be proved, and the word *them* (TO REDUCE THEM) was interpreted to be meant of the people of England, not of Scotland; whereas mention was made before of war with Scotland, and a ſupply from England to maintain that war. When the King ſigned the commiſſion to paſs the bill, he ſaid with tears, that *My Lord of Strafforde's condition was more happy than his* (*tt*). On the Friday before, my Lord writ to the King, releaſing all his former promiſes and engagements to ſave his life* [*FF*], which his Lordſhip thought would be the beſt diſcharge of the King's conſcience (*uu*). He prepared himſelf for death with ſingular piety: Dr Carre his antient chaplain ſaid, that he was the moſt ſevere judge of himſelf that ever he knew: He had great humility and charity towards his enemies beyond expectation, which being much above his natural ſtrength, gave him great com-

(*qq*) General hiſtory of England.

(*rr*) There was an order made by the Lords in parliament in the beginning of the King's reign in the Earl of Briſtol's caſe, that peers accuſed of treaſon ſhould have both counſel and witneſſes, but the Earl of Straſforde had not a copy of that order.

(*ss*) This Lord declared of the Earl, that God had given him excellent parts, but the Devil gave him the uſe of them. Gen. hiſtory of England.

(*tt*) He paſſed it contrary to the dictates of his own conſcience.

(*uu*) Yet Whitelocke in his memoirs tells us, that when news was brought to him that the King had paſſed the bill by commiſſion, he cried out in the words of the Pſalmiſt, *Put not your truſt in princes, nor in any child of man, for there is no help in them.*

* Though all agree he did write ſuch a letter, yet they differ in the date, ſome fixing it on the 4th of May, others, with Sir Geo. Radcliffe, on the 7th. But the letter has not yet been found. Knowler, in a letter to myſelf.

[*FF*] *The King's promiſes to ſave his life.*] His Majeſty's letter to him on this occaſion remarkably ſhews by the careleſs ſpelling, his great diſturbance and trouble of mind, as follows:

'STRAFFORDE,

'The misfortune that is falen upon you by the 'ſtrange miſtaking and conjunctur of theaſe tymes 'being ſuch that I muſt lay by the thought of em'ploing you heereafter in my affaires; yet I cannot 'ſatisfie my ſelf in honnor or concience without aſ'ſeuring you (now in the mideſt of your trobles) that 'upon the word of a King you ſhall not ſuffer in lyfe, 'honnor, or fortune: This is but juſtice, and therefore a verie meane rewarde from a maiſter to ſo 'faithefull and able a ſervant as you have ſhewed 'yourſelf to bee: yet it is as much as I conceave 'the preſent tymes will permitt, though none ſhall 'hinder me from being

'Your conſtant faithfull Friend,

'CHARLES R. (113)'

fort

fort [*GG*], as was teſtified by the Archbiſhop of Armagh. Of all perſons he was freeſt from fear, going to death without the leaſt perturbation that way. He cauſed his chaplain to ſay prayers upon the ſcaffold, according to the common prayer book, and made uſe of the 25th pſalm in proſe, praying God to forgive his enemies. In his laſt ſpeech he foretold part of the enſuing troubles which this kingdom felt afterwards. He dyed like a gentleman and a chriſtian, a martyr for the church and King. His Majeſty in December following by letters patent reſtored his ſon William to all his dignities and titles; and after the reſtoration the bill of attainder was reverſed, as a ſtain to the juſtice of the nation (*ww*). His ſon dying without iſſue, made his nephew the honourable Tho. Watſon, third ſon of Edward Lord Rockingham, by Anne, eldeſt daughter of Thomas Earl of Strafforde, heir of his eſtates in England and Ireland, requiring him to take the name of Wentworth. He was generally called his honour Wentworth, and by his great benefactions to the clergy, his numerous augmentatious of ſmall livings, and his endowment of ſchools for the inſtruction of youth in proteſtant principles, made the name of Wentworth dear to every Engliſh heart (*xx*). Our ſtateſman's character is drawn with remarkable diligence by Sir George Radcliffe, who knew him intimately. He tells us then, that in the managing of his eſtate and domeſtic affairs, he uſed the advice of two friends, Ch. Gr. [Charles Greenwoode] and G. R. [George Radcliffe] and two ſervants, Richard Marris his ſteward, and Peter Man his ſolicitor. Before every term they met, and Peter Man brought a note of all things to be conſidered of, which being taken into conſideration one by one, and every one's opinion heard, reſolution was had, and ſet down in writing, whereof his Lordſhip kept one copy, and Peter Man another. At the next meeting an account was taken of all that was done in purſuance of the former orders, and a new note made of all that reſted to be done, with an addition of ſuch things as did ariſe ſince the laſt meeting, and were requiſite to be conſulted of. His whole accounts were ordered to be made up twice every year, one half-year ending 20th of September, the other the 20th of March. For by that time the former half-year's rents were commonly received, or elſe the arrears were fit to be ſought after, it being no advantage either to the tenant or landlord to ſuffer arrears to run longer. He never did any thing of any moment concerning either political or domeſtic buſineſs without tak-

(*ww*) Gen. hiſt. of England.

(*xx*) Thoreſby's Ducatus Leodinenſis.

[GG] *Before his death he had great humility and charity towards his enemies*, &c.] His letter to his ſon William, afterwards Earl of Strafforde, is ſome proof of this. It is dated Tower, 11th of May 1641, and runs thus:

‘ My dearest Will:

‘ Theſe are the laſt lines that you are to receive from a Father that tenderly loves you. I wiſh there were a greater leiſure to impart my mind unto you; but our merciful God will ſupply all things by his grace, and guide and protect you in all your ways; to whoſe infinite goodneſs I bequeath you; and therefore be not diſcouraged, but ſerve him, and truſt in him, and he will preſerve and proſper you in all things. Be ſure you give all reſpect to my wife, that hath ever had a great love unto you, and therefore will be well becoming you. Never be a wanting in your love and care to your ſiſters, but let them ever be moſt dear unto you; for this will give others cauſe to eſteem and reſpect you for it, and is a duty that you owe them in the memory of your excellent mother and myſelf. Therefore your care and affection to them muſt be the very ſame, that you are to have of yourſelf, and the like regard muſt you have to your youngeſt ſiſter; for indeed you owe it her alſo, both for her father and mother's ſake.

‘ Sweet Will, be careful to take the advice of thoſe friends, which are by me deſired to adviſe you for your education. Serve God diligently morning and evening: and recommend yourſelf unto him, and have him before your eyes in all your ways. With patience hear the inſtructions of thoſe friends I leave with you, and diligently follow their counſel; for till you come by time to have experience in the world, it will be far more ſafe to truſt to their judgments than your own.

‘ Loſe not the time of your youth, but gather thoſe ſeeds of virtue and knowledge, which may be of uſe to yourſelf, and comfort to your friends for the reſt of your life. And that this may be the better effected, attend thereunto with patience, and be ſure to correct and refrain yourſelf from anger. Suffer not ſorrow to caſt you down, but with cheerfulneſs and good courage go on the race you have to run in all ſobriety and truth. Be ſure with an hallowed care to have reſpect to all the commandments of God, and give not yourſelf to neglect them in the leaſt things, leſt by degrees you come to forget them in the greateſt: For the heart of man is deceitful above all things. And in all your duties and devotions towards God, rather perform them joyfully than penſively; for God loves a cheerful giver. For your religion, let it be directed according to that which ſhall be taught by thoſe which are in God's church the proper teachers therefore, rather than that you ever either fancy one to yourſelf, or be led by men that are ſingular in their own opinions, and delight to go in ways of their own finding out: For you will certainly find ſoberneſs and truth in the one, and much unſteadineſs and vanity in the other.

‘ The King, I truſt, will deal graciouſly with you, reſtore you thoſe honours and that fortune which a diſtempered time hath deprived you of, together with the life of your father. Which I rather adviſe might be by a new gift and creation from himſelf than by other means, to the end you may pay the thanks to him, without having obligation to any other.

‘ Be ſure to avoid as much as you can to enquire after thoſe that have been ſharp in their judgments towards me; and I charge you never to ſuffer thought of revenge to enter your heart. But be careful to be informed who were my friends in this proſecution, and to them apply yourſelf to make them your friends alſo; and on ſuch you may rely, and beſtow much of your converſation amongſt them. And God Almighty of his infinite goodneſs bleſs you and your childrens children; and his ſame goodneſs bleſs your ſiſters in like manner, perfect you in every good work, and give you right underſtandings in all things. Amen.

‘ Your moſt loving father,

‘ T. Wentworth.’

‘ You muſt not fail to behave yourſelf towards my Lady Clare your grandmother with all duty and obſervance: for moſt tenderly doth ſhe love you, and hath been paſſing kind unto me. God reward her charity for it! And both in this and all the reſt, the ſame that I counſel you, the ſame do I direct alſo to your ſiſters, that ſo the ſame may be obſerved by you all. And once more do I from my very ſoul beſeech our gracious God to bleſs and govern you in all, to the ſaving you in the day of his viſitation, and join us again in the communion of his bleſſed ſaints, where is fulneſs of joy and bliſs for evermore. Amen. Amen (114).’

(114) p. 416, 417.

ing

ing advice; not ſo much as a letter written by him to any great man of any buſineſs, but he ſhewed it to his confidents, if they were near him. The former part of his life Ch. Gr. and G. R. were conſulted with; and in the latter part Chr. Wandesforde came in Chr. Greenwoode's room, he deſiring not to be taken away from his cure. They met almoſt daily, and debated all buſineſſes and deſigns *pro & con.* By this means his own judgment was very much improved, and all the circumſtances and probable conſequences of the things conſulted were diſcovered and conſidered; a courſe which ſome great men have practiſed, and is very efficacious to make a wiſe man, even though he adviſe with much weaker men than himſelf: For there is no man of ordinary capacity that will not often ſuggeſt ſome things, which might elſe have been let ſlip without being obſerved; And in the debatings of things a man may give another hints and occaſions to obſerve and find out that which he that ſpeaks to it perhaps never thinks on. *Fungor vice cotis exors ipſe ſecandi.*

He was exceeding temperate in meat and drink and recreations, being no whit given to his appetite; though he loved to ſee good meat at his table, yet he ate very little of it himſelf. Beef or rabbits were his ordinary food, or cold powdered meats, or cheeſe and apples, and in moderate quantity. He was never drunk in his life, as I have often heard him ſay, and for ſo much as I had ſeen, I had reaſon to believe him. Yet he was not ſo ſcrupulous, but he would drink healths where he liked his company, and be as ſociable as any of his ſociety, and yet ſtill within the bounds of temperance. In Ireland, where drinking was grown a diſeaſe epidemical, he was more ſtrict publickly, never ſuffering any health to be drunk at his publick table, but the King's, Queen's, and Prince's on ſolemn days. Drunkenneſs in his ſervants was, in his eſteem, one of the greateſt faults.

He loved hawking, and was a good falconer: yet in his later days he got little time to ſee his hawks fly, though he always kept good ones. He played excellently well at *Primero* and *Mayo*, and for company's ſake in Chriſtmas and after ſupper he would play ſometimes; yet he never was much taken with it, nor uſed it exceſſively, but as a recreation ſhould be uſed. His chief recreation was after ſupper, when if he had company which were ſuitable to him, that is, honeſt cheerful men, he would retire into an inner room, and ſit two or three hours, taking tobacco, and telling ſtories with great pleaſantneſs and freedom. And this he uſed conſtantly with all familiarity in private, laying then aſide all ſtate, and that due reſpect, which in publick he would expect. He loved juſtice for juſtice itſelf, taking great delight to free a poor man from a powerful oppreſſor, or to puniſh bold wickedneſs, whereof there are ſundry inſtances to be given, both at York and in Ireland. This loſt him ſome mens good will, which he thought better to be loſt than kept upon thoſe terms. One perſon of quality, whom he had ſeverely puniſhed at York, came to be one of his judges in the Lords Houſe, and there did him all juſtice and favour (as the caſe then ſtood) in his laſt troubles; who therefore deſerves to be honoured, eſpecially by us that had relation to him.

He was excellently well ſtudied in that part of the Engliſh laws which concerns the office of a juſtice of peace; inſomuch as one of the judges of aſſize, a great lawyer, was well pleaſed to learn his opinion in a matter about the poor, and the ſtatutes made concerning them. By conſtant attendance at the *Star-Chamber* for ſeven years together, he learned the courſe of that court, and many directions for his carriage towards the publick. This in thoſe days was a moſt pleaſant and uſeful employment for a young gentleman, who is like to have any part in the government of his country.

He bore a particular perſonal affection for the King; and he was always a lover of monarchy, although ſome that have obſerved him in former parliaments, thought not ſo; but they little knew with what reſpect and kindneſs King James had uſed him; ſo as certainly that prince thought him no enemy to his power: It is true, he was a ſubject, and ſenſible enough of the people's liberties; and he always thought, that regal power and popular privileges might well ſtand together, and then only they were beſt preſerved, when they went hand in hand, and maintained one another. He always diſliked the abuſe of regal authority to the oppreſſion of ſubjects for private ends and intereſts; yet it being moſt hard and difficult to keep the intereſts of the King and People from incroaching one upon another, the longer he lived, his experience taught him, that it was far ſafer the King ſhould increaſe in power, than that the people ſhould gain advantages on the King: *That* may turn to the prejudice of ſome particular ſufferers; *This* draws with it the ruin of the whole.

His prudence and diligence are beſt ſhewn by the government of Ireland, wherein he never undertook any buſineſs, that he would give it over till he had finiſhed it. He was conſtantly at work himſelf, and ſet out able inſtruments in every kind proper for his aſſiſtance. To them he gave little reſt, ſtill calling on and encouraging them to be doing, and to give accounts of what they had done, and rewarding plentifully all that deſerved it. If thoſe he employed were diligent and dextrous to diſpatch the King's buſineſs, they needed not ſtudy for ſuits for themſelves; his watchfulneſs and bounty would prevent them, wherein I could give a multitude of inſtances.

The particulars of all theſe affairs he duly gave account of to the King, by the ſecretary of eſtate in England, and other miniſters (yy). The copies whereof fairly written out are a treaſure to him that hath them.

(yy) Moſt of theſe are printed in Strafforde's letters, &c. eſpecially in thoſe to the King, the Archbiſhop, the Lord Treaſurer, and Secretary Coke. January 1633.

In the compaſs of ſeven years, whereas the King's revenue in that kingdom before he came thither had fallen every year ſhort above 20,000l. of defraying the public charge, he brought the King's revenue not only to pay all, but to yield above 60,000l. yearly, above all payments; and it was in a growing condition, ſtill increaſing. He diſcharged the King's debts there, which were great, near 80,000l. He got reſtored to the church lands and tythes, ſacrilegiouſly interverted, above 30,000l. in yearly value. He brought in all the laws in England into force to his time (zz), (except ſome penal laws, which are commonly ſnares to the people, rather than producers of any reformation); for inſtance, he did not exact of the Recuſant the 12 d. a Sunday, but he ſecured the Proteſtant intereſt by more noble and effectual means than penal laws, viz. in repairing churches, and building manſion-houſes for miniſters; introducing a learned clergy, and injoining them ſtrict reſidence; affording them countenance and protection againſt the encroachments of the powerful; reſtoring to them means of hoſpitality, and looking carefully to the education and marriages of the King's wards; ſo as the Iriſh and Engliſh might live together now as one people. He indenized all the *ante-nati Scots*, which were born before Qu. Elizabeth's death; a favour of very great advantage to that nation, which it may be hoped ſome of them will conſider, and remember how ſome of their countrymen reputed that benefit. He ſaw the army compleat, duly paid, duly cloathed, and duly exerciſed, whereof his own eyes every year were his witneſſes. He ſecured the ſeas from pyracies, ſo as only one ſhip was loſt at his firſt coming, and no more all his time; whereas every year before not only ſeveral ſhips and goods were loſt by robbery at ſea, but alſo Turkiſh men of war uſually landed and took prey of men to be made ſlaves. By this means, and other encouragement of merchants, trading did increaſe to full treble of what it was formerly; and for every ton of ſhipping, which he found in Ireland, he left an hundred tons, as may be particularly ſhewed by a liſt of all the ſhipping found and left in every harbour of that kingdom. In the mean time he cauſed the merchants to pay their cuſtoms more duly than they had done; whereof many in corporations were more ſenſible and diſpleaſed at it, than the great ſecurity and benefit which they received in their trading did recompence, in their apprehenſion. But the whole kingdom felt the benefit, inſomuch as all lands throughout Ireland increaſed near double in yearly value and rents within the compaſs of theſe ſeven years; inſomuch as it was generally obſerved that Ireland never lived in that tranquillity and plenty, and liberty from oppreſſion, and other bleſſings that make a nation flouriſh, as it did under his government. That all people ſhould be ſatisfied it is impoſſible; but when the complaints of diſcontented perſons are duly heard and conſidered, they will very eaſily be anſwered by any that knew thoſe times: Indeed generally their frivolous complaints confute themſelves, and generally all the complaints which I have heard were either apparently cauſeleſs, and for the moſt part grounded on hearſay, or the reports of perſons who had ſuffered juſtly for their offences.

(zz) All the beſt laws made ſince the time of Hen. VII. as well as the articles and canons of the Church of England in the ſecond ſeſſion of the parliament appointed, as has been ſeen, for granting graces by the King.

He was naturally exceeding cholerick, an infirmity with which he had great wreſtlings; and though he kept a watch over himſelf concerning it, yet it could not be ſo prevented, but ſometimes upon ſudden occaſions it would break out. He had ſundry friends that often admoniſhed him of it, and he had the great prudence to take in good part their admonitions: Nay I can ſay, that I, one of his moſt intimate friends, never gained more upon his truſt and affection than by this freedom with him, in telling him of his weakneſſes: For he was a man and not an angel, yet ſuch a man as made a conſcience of his ways, and did endeavour to grow in virtue and victory over himſelf, and made good progreſs accordingly.

He was defamed for incontinence, wherein I have reaſon to believe that he was exceedingly much wronged. I had occaſion of ſome ſpeech with him about the ſtate of his ſoul ſeveral times, but twice eſpecially; when I verily believe he did lay open unto me the very bottom of his heart. Once was when he was in a very great affliction upon the death of his ſecond wife, and then for ſome days and nights I was very few minutes out of his company. The other time was at Dublin on a Good-Friday (his birth-day) when he was preparing himſelf to receive the bleſſed ſacrament on Eaſter-day following. At both theſe times I received ſuch ſatisfaction, as left no ſcruple with me at all, but much aſſurance of his chaſtity. I knew his ways long and intimately; and tho' I cannot clear him from all frailties (for who can juſtify the moſt innocent man?) yet I muſt give him the teſtimony of conſcientiouſneſs in his ways, that he kept himſelf from groſs ſins, and endeavoured to approve himſelf rather unto God than unto man, to be religious inwardly and in truth, rather than outwardly and in ſhew.

I need ſay little of his eloquence and abilities in ſpeech: Both Houſes of Parliament in England, and the Star-chamber and Council-table there, as alſo the Preſidential court of York, and the Council-chamber and Star-chamber and Parliament in Ireland, and as much as any of theſe his laſt defence at his trial in Weſtminſter-hall before the King, Queen, Lords, Houſe of Commons, and multitudes of auditors of all ſorts, are moſt full and abundant witneſſes hereof, to omit his private and public letters, which ſhewed that he writ as well as he ſpoke. This perfection he attained firſt by reading well-penned authors in French, Engliſh, and Latin, and obſerving their expreſſions; ſecondly, by hearing of eloquent men, which he did diligently in their ſermons and public ſpeeches; thirdly, by a very great care and induſtry which he uſed when he was young, in pen-

ning

ning his epiſtles and miſſives of what ſubject ſoever; but above all, he had a natural quickneſs of wit and fancy, with great clearneſs of judgment and much practice, without which his other helps of reading and hearing would not have brought him to that perfection to which he attained. I learned one rule of him, which I think worthy to be remembered; when he met with a well-penned oration or tract upon any ſubject or queſtion, he framed a ſpeech upon the ſame argument, inventing and diſpoſing what ſeemed fit to be ſaid upon that ſubject, before he read the book; then reading the book, he compared his own with the author, and noted his own defects, and the author's art and fulneſs; whereby he obſerved all that was in the author more ſtrictly, and might better judge of his own wants to ſupply them.

But amongſt all his qualities, none was more eminent than his friendſhip, wherein he did ſtudy, and delighted to excel: a ſubject whereon I can worſt expreſs myſelf, though I have moſt to ſay, and greateſt ſcope to enlarge myſelf. For I cannot think of it, without remembring what I loſt in his death; a treaſure which no earthly thing can countervail; ſuch a friend as never man within the compaſs of my knowledge ever had, ſo excellent a friend, and ſo much mine. He never had any thing in his poſſeſſion or power, which he thought too dear for his friends. He was never weary to take pains for them, or to employ the utmoſt of his abilities in their ſervice. No fear, trouble, or expence, deterred him from ſpeaking or doing any thing which the occaſions of his friends required. He was never forgetful, nor needed to be ſollicited, to do or procure any courteſy, which he thought uſeful for, or deſired by, his friends (*aaa*). The Lord Baltimore and the Lord Keeper Coventry both of them on their death-beds gave him a moſt ſingular teſtimony of their ſenſe of his moſt conſtant kindneſs and induſtrious promoting of their intereſt at the Court, above the ordinary courſe of Court-friendſhip. How he beſtirred himſelf in an arbitration between the Earls of Arundel and Surrey and Philip Earl of Pembroke, wherein he was named of the Earl of Arundel's part, the particulars are more than I can well ſet down, and the conſequence thereof I am willing to forget (*bbb*). It will be too long for me to deſign to expreſs the obligations his kindneſs laid on particular men. There are very many, that have cauſe to remember them, and they or their poſterity enjoy the fruit thereof. In fine, he did not ſeek friendſhip with all men; but where he deſired intimacy, his kindneſs did appear much more in effect than in words. He never failed where he did profeſs friendſhip; yet the time was when he might have ſecured himſelf from the great oppoſition raiſed againſt him in parliament, if he would have conſented to have done and forborn to have done ſome things concerning ſome, whom he accounted his friends, which ſome men would not have ſcrupled at: and God knows whether he was repaid again with the like kindneſs and fidelity. His ſon, who was reſtored to the title, leaving no iſſue, that came to William, ſecond brother of our Stateſman (*ccc*). P

(*aaa*) His kindneſs to his nephews, Sir Geo. and Sir Will. Savile, has been already mentioned.

(*bbb*) Mr Howell, as we have ſeen, mentions the Earl of Pembroke's reſentment; and he was one of the 22 Lords that paſſed the bill of attainder againſt Straſforde.

(*ccc*) Radcliffe's Eſſay, p. 433. to p. 436. in Appendix to Straſforde's Letters, vol. II.

WHARTON [HENRY], a very learned Engliſh Divine in the XVIIth century, was born November the 9th, 1664, at Worſtead in Norfolk, of which his father was then Miniſter [*A*]. His education was under his father; who, obſerving in his ſon a great inclination to learning even in his tender years, and withal a happy conjunction of moſt excellent natural parts, gave his utmoſt diligence to cheriſh the one and improve the other; and did ſo thoroughly inſtruct him in the Latin and Greek tongues, that, at his entrance into the univerſity, he had the reputation of an extraordinary young man. On the 17th of February 1679-80, and of his age the ſixteenth, he was admitted Penſioner into Gonvil and Caius college in Cambridge (whereof his father had formerly been Fellow) under the tuition of Mr John Ellys (*a*), one of the ſenior Fellows of the ſame; a perſon of eminent learning, ſingular piety, and ſtrictneſs of life. Under his good care Mr Wharton purſued his ſtudies with an indefatigable induſtry, ſeldom ſpending in them leſs than twelve hours a day. By means of which, and the excellent foundation of learning he had brought along with him, joined to a very good memory and judgment, he improved himſelf much in a little time. He alſo read through moſt of the claſſic authors, particularly the Greek and Latin hiſtorians; beſides ſeveral conſiderable Engliſh writers: and attained to a competent knowledge of the French tongue, a great proficiency in philoſophy, and no mean ſkill in mathematicks. Which laſt was much improved by the kindneſs of Mr (afterwards Sir) Iſaac Newton, then Fellow of Trinity-college, and Lucas-profeſſor, who inſtructed him in that noble ſcience in his own private chamber, amongſt a ſelect company. At Michaelmas 1680, he was unanimouſly choſen by the Fellows into one of thoſe Scholarſhips of the Houſe, which had been founded by his great uncle Mr Matthew Stockys, formerly ſenior Fellow of the ſaid college; the profits of which he continued to receive till Michaelmas 1687, the utmoſt term the ſtatutes could permit, and a favour ſeldom granted to non-reſidents, as he was for ſome part of the time (*b*). He commenced Bachelor of Arts in Hilary-term 1683-4 (*c*), with great reputation: and continued to reſide in the college till about Mi-

(*a*) He was afterwards knighted.

(*b*) The Life of Mr Wharton, prefixed to the firſt volume of his Sermons.

(*c*) Ibid. and from the Univerſity Regiſters.

[*A*] *Of which his father was then Miniſter.*] His father, Mr Edmund Wharton, was Vicar of Worſtead, and afterwards Rector of Saxlingham in the ſame county. He had the great affliction of outliving his valuable ſon, and publiſhed in 1700 The Memorials, or Second Part of the Life, of Archbiſhop Laud, which his ſon had left ready for the preſs.—A. Wood ſays, that he was deſcended from an ancient and genteel family (1).

(1) Athenæ, vol. II. col. 874.

chaelmas 1686; when obſerving no likelihood of the vacancy of any Fellowſhip therein, or, if any ſhould happen, that there were always ſeveral of his ſeniors waiting, who had juſt pretenſions before him, he entertained thoughts of retiring to ſome other place [*B*]. Dr Barker, ſenior Fellow of the ſame college, and afterwards Chaplain to Archbiſhop Tillotſon, being acquainted with his deſign, thought the greateſt kindneſs he could do him, was to procure him the converſation of the beſt men, and acceſs to the beſt books, which he very well knew him ſo admirably prepared for. Accordingly he recommended him to the famous Dr William Cave, whom he aſſiſted in compiling his *Hiſtoria Literaria* [*C*], as that great man acknowledges in his *prolegomena*; teſtifying, that the Appendix of the three laſt centuries was almoſt wholly owing to Mr Wharton, and therefore deſervedly bear his name. In that ſtation, our young Author had the beſt opportunity that could be to improve himſelf: as having not only the benefit of the converſation of ſo learned and communicative a perſon, but alſo the uſe of his library full of the choiceſt and beſt books. That he might be further aſſiſting to that great man, he entered into Deacon's orders in 1687. And in July 1688, he proceeded Maſter of Arts, by proxy; (*d*) which favour was indulged him by the Univerſity, by reaſon of his lying then dangerouſly ill of the ſmall pox. About this time, the reputation he had gained upon ſeveral accounts recommended him to the particular notice of Dr Teniſon, Vicar of St Martin's in the Fields, London, and afterwards Archbiſhop of Canterbury; who employed him to prepare for the preſs a Treatiſe againſt the Roman Church [*D*], and likewiſe recommended him to the Lord Arundel of Trerice, as a fit tutor for the education of his only ſon (*e*). Soon after, being preſented to Archbiſhop Sancroft, as a perſon of very pregnant parts [*E*], and uncommon learning for his age (*f*), his Grace put into his hands, April 12, 1688, Archbiſhop Uſher's dogmatical Hiſtory of the Holy Scriptures, in manuſcript, with a command to publiſh it [*F*]: which he performed, with additions. He alſo publiſhed, about the ſame time, ſeveral excellent Treatiſes againſt Popery [*G*]. In June

[*B*] *He entertained thoughts of retiring to ſome other place.*] During his ſtay in college, he was in all his converſation exemplary for Sobriety and good Government of himſelf, and innocent and obliging in his behaviour, duly obſervant of College-orders, and conſtant in frequenting the Prayers and Sacraments in the Chapel (2).

(2) Life of Mr Wharton, as above.

[*C*] *Whom he aſſiſted in compiling his* Hiſtoria Literaria.] As a work of that extenſive nature required immenſe pains, in reading, digeſting, and methodizing ſuch an infinite number of the ancient Monuments of Learning as are compriſed therein, it could hardly have been brought to the perfection wherein it appears, in the Age of any one Man, without the aſſiſtance of friends: whom therefore the Doctor mentions in his Preface with ſuitable acknowledgments, eſpecially our learned and indefatigable Author. And he was more particularly uſeful then to the Doctor, he being afflicted with a dangerous ſickneſs, which hindered him from proſecuting his deſign any further at that time (3).

(3) Life, &c. as above.

[*D*] *Who employed him to prepare for the preſs a Treatiſe againſt the Roman Church.*] It was a Manuſcript concerning *The incurable Scepticiſm of the Church of Rome*, written in Latin, and after a ſcholaſtical manner, by Mr John Placette of Hamburgh. The Doctor deſired Mr Wharton to epitomize it in a plain way of argumentation, and to tranſlate it into Engliſh.

[*E*] *Soon after, being preſented to Archbiſhop Sancroft, as a perſon of very pregnant parts, &c.*] He ſaith himſelf, that his Grace made him his Chaplain, without any recommendation. — *Qui me nullis meritis, ſed neque amicis intercedentibus commendatum, ad clientelam tuam aſciviſti, rebus ſacris obeundis adhibuiſti* (4).

(4) Angl. Sacr. pars i. in Epiſt. Dedicat.

[*F*] *His Grace put into his hands Archbiſhop Uſher's dogmatical Hiſtory of the holy Scriptures, &c.*] He publiſhed it under this title, *Jacobi Uſſerii Armachani Archiep. Hiſtoria Dogmatica Controverſiæ inter Orthodoxos & Pontificios de Scripturis & ſacris vernaculis.* And his Additions, at the end, were ſtyled, *Auctarium Hiſtoriæ Dogmaticæ Jacobi Uſſerii Armachani de Scripturis & ſacris vernaculis.* Lond. 4to.

[*G*] *He alſo publiſhed, about the ſame time, ſeveral excellent Treatiſes againſt Popery.*] The author of his Life mentions them in the following order. 1. 'The '*Speculum Eccleſiaſticum* conſidered, in its falſe Rea'ſonings and Quotations.' Lond. 1687. 4to. This was an Anſwer to '*Speculum Eccleſiaſticum*: Or an 'Eccleſiaſtical Proſpective Glaſs;' written by T. Ward, a Popiſh ſoldier. Mr Wharton's Anſwer was begun and finiſhed in the ſpace of one day; and he added thereto, by way of Preface, two further Anſwers; the firſt to the *Defender of the Speculum* (for having got a ſight of T. Ward's *Defence* while it was in the preſs, his Anſwer to it came out as ſoon or ſooner than the Defence itſelf); and the ſecond to the half ſheet againſt the *Six Conferences*, concerning the Euchariſt (5).—In November 1687, Mr Wharton was requeſted by ſeveral eminent Divines in London to go down to Cambridge, and tranſcribe ſuch Manuſcripts as were of better note: which, ſo far as the time permitted, he performed by the aſſiſtance of Mr Cory and Mr Sagg, two of the then Fellows of Corpus Chriſti college, and of Mr John Laughton, the Univerſity Library-keeper. At his return from thence he printed one of them, intitled, 2. 'A Treatiſe 'proving Scripture to be the Rule of Faith; writ by 'Reginald Peacock, Biſhop of Chicheſter, before the 'Reformation, about the year 1450.' To which he joined a large and learned Preface, proving the Holy Scriptures to be the adequate Rule of Faith. Lond. 1688. 4to. 3. The next thing he publiſhed, was, 'A Treatiſe of the Celibacy of the Clergy, wherein 'its Riſe and Progreſs are Hiſtorically conſidered.' Lond. 1688. 4to. The *Imprimatur* bears date Nov. 3. 1687. His deſign in this Treatiſe (as he declares in the Preface) was, 'to vindicate the injured Cauſe 'of Marriage, and ſhew that the antient Eſteem of 'Celibacy was neither Rational nor Univerſal; that 'both antient and modern Impoſition of it is unlaw'ful; and that the Antient Uſe of it is no reaſonable 'nor neceſſary precedent of the Modern Practice of 'it; to ſhew the occaſions of that Eſteem and Begin'nings of this Impoſition; and carry the Hiſtory of 'the Celibacy, and Marriage of the Clergy, through 'the ſeveral ages of the Church.'——The ſubſtance of the whole Book is compriſed in theſe four Propoſitions. 'Firſt, Celibacy of the Clergy was not inſti'tuted either by Chriſt or his Apoſtles. Secondly, 'It hath nothing excellent in it, and bringeth no 'real advantage to the Church, or to the Chriſtian 'Religion. Thirdly, The Impoſition of it upon any 'Order of Men is unjuſt, and contrary to the Law 'of God. Fourthly, It was never univerſally im'poſed or practiſed in the Antient Church (6).' More particularly, he ſhews, 'That the extraordinary af'fection and reverence of Virginity, was firſt ſtarted 'and introduced by a Heretick, *Tertullian*; who, de'ceived by the enthuſiaſms of *Montanus*, endeavoured 'to refine the Chriſtian Religion, and advance it into 'a ſyſtem of angelick perfection. He led the way 'to the Writers of the Latin Church, who receiving 'this prejudice from him, propagated it in ſome 'meaſure among the Greeks, although it never was 'by them embraced with that zeal, and purſued with 'that fervour, which always accompanied it in the 'Weſtern Church (7).' He further ſhews, in the Hiſtorical part of his deſign (8), 'That the Celibacy 'of the Clergy was looked upon as a thing indifferent

(8) p. 50, &c.

June 1688, though as yet no more than a Deacon, he was honoured by the Archbiſhop with a licence for preaching through the whole province of Canterbury; a favour which his Grace never granted to any but him. He moreover admitted him, in the September following, into the number of his Chaplains; at the ſame time, as his cuſtom was, giving him a living. But his inſtitution to it being deferred till he ſhould be of full age, in the mean while a better, namely the Vicarage of Minſter in the iſle of Thanet, became void, to which he was collated November 12, the ſame year (and afterwards to the Rectory of Chartham, September 19, 1689); being firſt ordained Prieſt by the Archbiſhop, on his own birth-day, November 9, 1688. By the advice and encouragement of that generous and learned patron, and of Biſhop Lloyd (g), he undertook his laborious work, intitled *Anglia Sacra* [*H*], of which an account is given below. In 1692, he

‘ in the Two firſt centuries, Propoſed in the Third, ‘ Magnified in the Fourth, and in ſome places im‘ poſed in the Fifth, yet ſo, as that even that impo‘ ſition did infinitely differ from the preſent doctrine ‘ and diſcipline of the Church of Rome; that, how‘ ever commanded in ſome provinces of the Weſt, it ‘ was no where univerſally practiſed; that in a few ‘ ages this impoſition became obſolete, this yoke in‘ tolerable, and marriage univerſally prevailed, till ‘ condemned and forbidden by the Popes of the *Ele*‘ *venth* age; that even their decrees and canons be‘ came ineffectual by an univerſal oppoſition of the ‘ whole Church; and the lawfulneſs of marriage in ‘ the clergy was afterwards allowed and permitted by ‘ many Popes, and one General Council of the Ro‘ man Church; that all this while Celibacy never was ‘ impoſed or practiſed in the *Eaſtern* Church from the ‘ Apoſtles time; but the impoſition of it was rejected ‘ by one, and condemned by another Council of the ‘ univerſal Church; and obtained not even in the ‘ *Weſt*, till the Ambition and Uſurpation of the Popes ‘ drawing to themſelves the diſpoſition of all greater ‘ Eccleſiaſtical preferments, Poverty became neceſſary ‘ to the Married Clergy; which cauſed Marriage to ‘ be wholly laid aſide by them about *Two hundred* ‘ *years* before the Reformation.’ In this Treatiſe, he ſhewed ſuch ſharpneſs of wit, clearneſs of reaſoning, and vaſtneſs of reading, as mightily raiſed his eſteem among all. The learned eſpecially had extraordinary thoughts of him, that a perſon *ſo young*, having hardly yet exceeded *twenty three years of age*, ſhould be able to compoſe ſuch exquiſite works, and to write ſuch excellent diſcourſes as he had done (9). But, to proceed to the reſt of our Author's Tracts againſt Popery, 4. He tranſlated from French into Engliſh, *The Hiſtory of the Inquiſition as it is exerciſed at Goa.* Written in French by Monſieur Dellon, &c. Printed without his name, as the former were. Lond. 1688. 4to. It ſeems to have been done in haſte. 5. He turned ſome ‘ Homilies of St Macarius, the Prologue ‘ and the Epilogue of Eunomius his Apologetick ‘ Treatiſe’ (formerly tranſcribed by him out of a manuſcript of the Rev. Dr Teniſon) with ‘ a Treatiſe of ‘ Pſeudo-Dorotheus,’ found by the learned Mr Dodwell in the Bodleian Library, out of Greek into Latin; and the ‘ famous Bull in *Coenâ Domini*,’ out of Latin into Engliſh, annexing a ſhort Preface, containing ſome Reflexions upon the Bull, and Animadverſions on the late account of the Proceedings of the Parliament of Paris. Lond. 6. He publiſhed, ‘ A ‘ brief Declaration of the Lord's Supper, written by ‘ Dr Nicholas Ridley, Biſhop of London, during his ‘ impriſonment. With ſome Determinations and Diſ‘ putations concerning the ſame argument, by the ‘ ſame Author.’ Together with ſome Extracts from the *Diallacticon*, &c. a Latin Diſcourſe written by John Poynet, Biſhop of Wincheſter, in the time of K. Edward VI. Lond. 1688. 4to. 7. ‘ The Enthuſiaſm ‘ of the Church of Rome demonſtrated in ſome Ob‘ ſervations upon the Life of Ignatius Loyola:’ [founder of the Jeſuits order.] Lond. 1688. 4to. His argument in this Tract, is, That if the moſt admired Saints of the Church of Rome are, in the higheſt degree, guilty of Enthuſiaſm (as he proves Loyola to have been) then the ſo much boaſted Order and Diſcipline of the Church of Rome will be intirely ruined; the certainty of Oral Tradition will be overthrown; and their doctrine of the Invocation of Saints will hence receive a fatal blow. 8. He offered his aſſiſtance likewiſe towards a new edition of, Dr James's ‘ Corruption of the Scriptures, Councils, and Fathers, ‘ by the Prelates of the Church of Rome, for the ‘ maintenance of Popery.’——And, at the requeſt of Mr Watts, he reviewed the Verſion of *Philalethe & Philirene*, fitting it for the preſs. Theſe ingenious and learned performances extorted commendations of him, even from the Romaniſts themſelves; who took no ſmall pains to bring him over to their ſide: To that end, Matthews, a Prieſt, who privately ſaid maſs in Windſor-caſtle, had a conference with him. Others in like manner tried their ſkill; and the beſt of the Popiſh pieces were ſent him out of France, in hopes to make a proſelyte of him, but he remained immoveable. For, as he ſays himſelf, *Quo magis Pontificiorum ſcripta pervolvi, eo leviora ac futiliora illorum argumenta mihi ſemper viſa ſunt*: i. e. the more I have read their writings, the weaker and more trifling did their arguments always appear to me (10).

[*H*] *Anglia Sacra.*] The title of this laborious work (which is compriſed in two volumes folio) ſhews its deſign and nature; viz. *Anglia Sacra, ſive Collectio Hiſtoriarum, partim antiquitus, partim recenter ſcriptarum, de Archiepiſcopis & Epiſcopis Angliæ a prima Fidei Chriſtianæ ſuſceptione ad annum* 1540 (11). i. e. A Hiſtory of the Archbiſhops and Biſhops of England, from the firſt planting of Chriſtianity here to the year 1540; partly written by ancient authors, and partly compiled by Mr Wharton himſelf. The *firſt* Part, or *Volume*, contains the Lives of the Archbiſhops and Biſhops of thoſe Cathedrals, which were poſſeſſed, or ſerved, by Monks; namely, Canterbury, Wincheſter, Rocheſter, Norwich, Coventry and Lichfield, Worceſter, Bath and Wells, Ely, and Durham. And the chief ancient Authors inſerted therein, are, Stephen Birchington's Hiſtory of the Archbiſhops of Canterbury; Thomas Rudborne's Hiſtory of Wincheſter-Church; Ernulf's, Edmund de Hadenham's, and William de Dene's, Accounts of that of Rocheſter; Bartholomew de Cotton's Annals of the Church of Norwich; Thomas de Cheſterfeld's Hiſtory of the Biſhops of Coventry and Lichfield; the Annals of Worceſter-church, by a Monk there; and the Hiſtory of that of Bath and Wells, by a Canon of Wells; the Hiſtory of Ely-church, by Richard Prior, three Monks, and Robert Stewarde; Account of Durham-church, by an anonymous Monk, Geffrey de Coldingham, Robert de Grayſtanes, and William de Chambre. The *ſecond* Part, or *Volume*, is a miſcellaneous Collection of the Lives of ſeveral Biſhops, chiefly by William of Malmeſbury, Oſbern, or rather John of Tinmouth, Eadmer, Robert de Wycomb, Thomas Chaundler, Girald Cambrenſis; with the Life of Robert Groſthead, &c. He propoſed to have added a *third* Part, or *Volume*, which was to contain the Hiſtory of the Archbiſhops and Biſhops of thoſe Cathedrals which were poſſeſſed by Secular or Regular Canons. But the deprivation of his good patron put a ſtop to that deſign (12). A part of it, containing an account only of the Biſhops and Deans of London and St Aſaph, was publiſhed after his deceaſe, with this title, *Hiſtoria de Epiſcopis & Decanis Londinenſibus: necnon de Epiſcopis & Decanis Aſſavenſibus; a primâ Sedis utriuſque fundatione ad ann.* 1540. *acceſſit Appendix duplex Inſtrumentorum quorundam inſignium ad utramque Hiſtoriam ſpectantium.* Lond. 1695. 8vo. The writer of our learned Author's Life, calls this ‘ a work of *incredible pains*, ‘ as muſt needs be acknowledged by any one who ‘ conſiders the *uncommonneſs* of the ſubject, never be‘ fore ſo treated of by any one, the *ſcarcity* and *ob*‘ *ſcurity* of the materials from whence it was to be ‘ collected, and theſe too not to be had but in ſeveral ‘ places, and at vaſt diſtances; yet all theſe difficul‘ ties were overcome by his own *unwearied diligence* ‘ *and patience*, and the kind and generous aſſiſtance of ‘ *Friends*. Among whom were Dr Lloyd, then Biſhop ‘ of St Aſaph (13), Dr John Battely, Archdeacon of he publiſhed A Defence of Pluralities [*I*]: And, the year following, other Books [*K*]; particularly, A Specimen of ſome Errors and Defects in the Hiſtory of the Reformation of the Church of England, written by Gilbert Burnet, D. D. [*L*]. The laſt thing he committed

(13) Tu etenim primus me ad Opus iſtud aggrediendum incitaſti, vacillantem ſæpe animum & ſub diuturni laboris pondere fatiſcentem confirmaſti, conſilio atque authoritate tua ſuſceptum Opus promoviſti. Epiſt. Ded. Angl. Sacr. p. ii.

'Canterbury, Dr William Hopkins, Prebendary of Worceſter, and Dr Matthew Hutton, Rector of Ayno in Northamptonſhire.'—— The author of his Life further adds,—'This was a work of ſuch excellent deſign, that for it alone, though he had given no other inſtance of his *Induſtry*, and *Zeal for the cauſe of Religion and Learning*, (as he had many) the *Name* of Mr *Wharton* ought always to be dear to the learned world; for the benefit and advantage whereof, ſo many *antient Monuments* of our Nation, relating to Church-affairs, have been brought to light and retrieved from that Obſcurity and Darkneſs, wherein they had lain hid for many ages.'——Biſhop Nicolſon obſerves (14), That in *Anglia Sacra* the Readers 'are ſure to meet with a good view of ſuch old Writers as have treated of the ancient Hiſtory of this or that Dioceſs; or elſe they have (at leaſt) a compoſure of Mr Wharton's, very valuable for the pains that Author took in adjuſting the true chronological ſucceſſion of our Biſhops.' He had not ſpoken ſo favourably of that work, in the Preface to the firſt edition of the *Firſt Part of his Engliſh Hiſtorical Library*; which paſſages however he thought fit to leave out in the ſubſequent edition. What he ſuggeſts in that Preface, as if Mr Wharton had not diligently 'improved the opportunities he had of fitting out all theſe Writers for the preſs, before the misfortunes of his patron had ſpoiled both his deſign and proſpect,' is very falſe and injurious. For, no man could poſſibly improve more diligently the opportunities he had, than Mr Wharton did, conſidering his works, and the ſhortneſs of his life. Moreover, he found fault with our Author's ornamental Diſcourſes, as if they had been ſent abroad too early: particularly '(what he valued himſelf upon as his maſter-piece) the Diſſertation about the two Elfrics (15); which, ſays Mr Nicolſon, is founded on a groſs miſtake in A. Whelock's tranſlating an expreſſion in the Saxon Chronicle (16), which carries no ſuch ſenſe as he puts upon it.' Being made ſenſible of this error, he endeavours, in his *Addenda*, (17) to gain his point by a freſh Argument, aſſuring us, 'that the *Codex optimus Cottonianus* ends the Chronicle at the year 975.'— But a bitterer Enemy to Mr Wharton, was the late Biſhop Burnet, unreaſonably but highly incenſed at our Author's *Specimen of ſome Errors and Defects in the Hiſtory of the Reformation.* After having ſeverely reflected upon him, the Biſhop goes on thus. 'I have a work lying on my table, which ſhews how little regard is due to his Collections. It was ſent me by a worthy perſon in one of the Univerſities, and is a Collating of Ten Pages of his *Anglia Sacra*, with the manuſcript that he vouches: It ſwells indeed to a Book. *Wharton* omits the moſt material paſſage of an inſtrument that blemiſhed one of his Heroes. In ſome places there are errors in every line; and there are three capital errors in one line; and about fifty in that ſmall compaſs (18).' Elſewhere, the Biſhop ſays, (19) 'As for *Anthony Harmer*, ſome have doubted if he could be capable of making Three Capital Errors in one line: And ſince Mr Strype has ſuggeſted to me that, in which I was under ſome reſerve before, as having it from another hand, I am now free to ſet it down. For *Capitulum Eccleſiæ Cathedralis*, he has printed *Epiſtolam Conventus Eccleſiæ Catholicæ*. If the abbreviations may ſeem to excuſe the reading *Epiſtolam* for *Capitulum*, and *Catholicæ* for *Cathedralis*, nothing can excuſe the word *Conventus*, which he thought wanting to make a compleat title; having read the others as he did: ſo I hope I have reaſon to have no regard to any thing that comes from him upon his bare authority.'...The choleric Prelate ſhould have remembered, that Mr Wharton had an *Amanuenſis* (20), and therefore ſhould not have blamed him ſolely; though indeed he was in ſome reſpects blame worthy, for not collating the copies with the originals. But Mr Wharton wrote, and printed, in too great a hurry; which hath rendered his works incorrect.

[*I*] *In* 1692, *he publiſhed A Defence of Pluralities.*] It was occaſioned by a Bill prepared to be offered to Parliament in 1691, *For the reſtraining of Pluralities of Benefices with Cure of Souls* (21). Mr Wharton, in his *Defence*, proves theſe three Propoſitions. 1. 'Plurality of Benefices with Cure of Souls is not *jure divino* unlawful. 2. It is not contrary to the firſt deſign of parochial endowments. 3. It is not inconvenient to the Church.' And in the courſe of his book, he ſhews, that ſome of thoſe who moſt favoured the cauſe of our Diſſenters, [the Biſhops Hoper and Williams in particular] have been the greateſt Pluraliſts (22). To which might be added freſher inſtances of the like nature.... About two years after the publication of Mr Wharton's Defence, there came out an Anſwer to it, intitled, 'The Caſe of Pluralities and Non-reſidence rightly ſtated: in a Letter to the Author of a book, called *A Defence of Pluralities, &c.*' Lond. 1694. 8vo. And, above forty years after, the late Dr R. Newton of Oxford publiſhed a laboured and formal Anſwer to it, contradictory to his own practice, which he called *Pluralities indefenſible, &c.* But, in more places than one, he makes ſuch conceſſions, as make Pluralities appear neceſſary, eſpecially in the preſent circumſtances. 'Conſidering,' ſays he, (23) 'the Devotion of *ancient* Times; with what *Punctuality* the *Tithes* were paid; with what *Liberality* the *Oblations* were made; and with what *Simplicity* the Clergy lived; every endowed Church in the kingdom, with the Tithes and Offerings annexed, could not but be a ſufficient Income for the uſes to which it was to be apply'd....It would have been horrible, indeed, if there ſhould have been *Plurality* of Benefices held by one Prieſt, in thoſe days, in a ſingle inſtance: For, with reſpect to *Maintenance* there could be no occaſion. But the caſe being quite otherwiſe now-a-days, Pluralities are not only tolerable, but even neceſſary.'—Elſewhere he makes this pertinent remark (24). 'Great numbers are invited to dedicate their whole *Time* and *Pains*, and *Fortune*, to qualify themſelves for the clerical profeſſion, by a proſpect of a *Reaſonable Subſiſtence* for the diligent diſcharge of parochial duties. Having bent all their Thoughts and Studies this way, they are become leſs capable of getting a Livelihood by any other Imployment; neither having once enter'd into this, can they well take to any other without a diminution of their character.'—— Now, if they cannot in general get that *Reaſonable Subſiſtence* without Pluralities, muſt Pluralities be called abſolutely Indefenſible?

But the beſt way to bring that point to a ſhort iſſue, and the only means indeed to render Pluralities *unneceſſary*, is, either to make every Benefice a competent Maintenance, by reſtoring Impropriations, &c. or elſe to deſtroy the Wives and Families of Clergymen, and reduce them to a ſtate of Monkery, and withal confine them to the bare Neceſſaries of Life.

Let us hear the ſentiments of the late learned Dr Prideaux upon this ſubject (25)...'As long as there are ſo many ſmall Vicarages, and other impropriated Churches, either wholly unendowed, or elſe inſufficiently provided for, the State of this Church, as it is at preſent, cannot bear an abſolute ſuppreſſion of all Pluralities; and therefore till all impropriated Tithes ſhould be again reſtored, or every Church-Living ſome other way made a Competency, it is neceſſary to proceed in a middle way as to this matter.'——Some Pluralities indeed are unreaſonable; as the having Two Benefices of two or three hundred pounds yearly value each, with a Prebend of Durham, Weſtminſter, Windſor, &c. or the holding a Sine-cure of upwards of 200l. *per annum*, with one, or perhaps two, other good Benefices. In ſuch caſes the abuſe is great, and calls for a remedy. But where two Livings, at a reaſonable diſtance, make but a competent Maintenance for a Family, and due Care is taken of both, no valid or ſufficient reaſon can be given againſt ſuch Plurality.

[*K*] *And, the year following, other Books.*] Namely, Venerable *Bede's Latin Commentaries* on Geneſis, and on the 3d Chapter, or Song, of Habakkuk; together with a Dialogue of Egbert Archbiſhop of York, and Aldhelm, the firſt Biſhop of Shirebourn, his eloquent book of the *Praiſe of Virginity. committed to the preſs was, The Hiſtory of the Troubles and Tryal of Archbiſhop Laud [*M*]. But it muſt not be forgot, that he publiſhed alſo a new edition of the life of Cardinal Pole; with the Conteſt between the Embaſſadors of England and France at the Council of Conſtance, about precedency [*N*]: And that he made Remarks and Animadverſions upon Mr Strype's Memorials of Archbiſhop Cranmer, which are printed at the end of that Life. Beſides which, he left ſeveral pieces in manuſcript, and notes and emendations upon many printed books [*O*]. And Two Volumes of his Sermons were printed

England.] This he publiſhed under the diſguiſed name of *Anthony Harmer.* Biſhop Burnet, who had an extraordinary fondneſs for the iſſue of his own brain; who conſidered the Hiſtory of the Reformation as his capital performance; and fondly imagined, that through his ſides our Reformation was attacked, and muſt ſtand or fall with him; flew into a violent rage, and became quite impatient, at this Attempt. He complained of it immediately to the world, in a Letter directed to Dr William Lloyd, Biſhop of Coventry and Lichfield, printed at London in 1693. 4to (26); and afterwards, in 1700, in his Reflections on a book, entitled, *The Rights, Powers, and Privileges of an Engliſh Convocation, &c.* (27) But more fully, in the Introduction to the Third Volume of his Hiſtory of the Reformation (28), where he thus ſpeaks bitterly of our Author, and the *Specimen.*— Mr Wharton 'had examined the dark Ages before the Reformation, with much diligence, and ſo knew many things relating to thoſe times beyond any man of the age; he pretended that he had many more errors in reſerve, and that this Specimen was only a haſty Collection of a few, out of many other diſcoveries he could make: This conſiſted of ſome trifling and minute differences in ſome dates of tranſactions of no importance, upon which nothing depended; ſo I cannot tell whether I took theſe too eaſily from printed books; or if I committed any errors in my notes taken in the ſeveral offices. He likewiſe follows me through the ſeveral recapitulations I had made of the ſtate of things before the Reformation, and finds errors and omiſſions in moſt of theſe; he adds ſome things out of papers I had never ſeen. The whole was writ with ſo much malice, and ſuch contempt, that I muſt give ſome account of the man, and of his motives. He had expreſſed great zeal againſt Popery, in the end of King James's reign, being then Chaplain to Abp Sancroft, who, as he ſaid, had promiſed him the Firſt of thoſe Prebends of Canterbury that ſhould fall in his gift; ſo when he ſaw that the Archbiſhop was reſolved not to take the oaths, but to forſake his poſt, he made an earneſt application to me, to ſecure that for him at Archbiſhop Tillotſon's hands: I preſſed him in it as much as was decent for me to do, but he ſaid he would not encourage theſe aſpiring men, by promiſing any thing before it ſhould fall; as indeed none of them fell during his time. Wharton, upon this anſwer, thought I had neglected him, looking on it as a civil denial, and ſaid he would be revenged; and ſo he publiſhed that *Specimen.* Upon which, I, in a Letter that I printed, addreſſed to the preſent Biſhop of Worceſter, charged him again and again to bring forth all that he pretended to have reſerved at that time; for till that was done, I would not enter upon the examination of that *Specimen.* It was received with contempt; and Tillotſon juſtified my preſſing him to take Wharton under his particular protection ſo fully, that he ſent and aſked me pardon: He ſaid he was ſet on to it, and that, if I would procure any thing for him, he would diſcover every thing to me: I deſpiſed that offer, but ſaid, that I would at any price buy of him thoſe Diſcoveries that he pretended to have in reſerve; but Mr Chiſwell (at whoſe houſe he then lay, being ſick) ſaid he could draw nothing of that from him, and he believed he had nothing.' ——Dr Swift, referring to this account given by the Biſhop of Mr Wharton, ſays (29), 'Poor Mr Wharton in his grave is charged with the ſame accuſation [of Ingratitude], but with circumſtances the moſt aggravating that Malice and ſomething elſe could invent; and which I will no more believe than five hundred paſſages in a certain Book of Travels..... What a ſpirit of candour, charity and good-nature, generoſity and truth, ſhines through this ſtory, told of a moſt excellent and pious Divine 20 years after his death, without one ſingle voucher! .... 'He has in plain words given Mr Wharton the character of a *moſt malicious, revengeful, treacherous, lying, mercenary villain.* To which I ſhall only ſay, that the direct reverſe of this amiable deſcription is what appears from the works of that moſt learned Divine, and from the accounts given me by thoſe who knew him much better than the Biſhop ſeems to have done. I meddle not with the moral part of this treatment. God almighty forgive his Lordſhip this manner of revenging himſelf; and then there will be but little conſequence from an accuſation which the Dead cannot feel, and which none of the Living will believe (30).'

[*M*] *The laſt thing he committed to the preſs, was, The Hiſtory of the Troubles and Tryal of Archbiſhop Laud.*] The title he gave it, was, 'The Hiſtory of the Troubles and Tryal of the moſt Reverend Father in God, and bleſſed Martyr, *William Laud,* Lord Archbiſhop of *Canterbury.* Wrote by himſelf, during his Impriſonment in the Tower. To which is prefixed the Diary of his own life faithfully and entirely publiſhed from the original Copy: And ſubjoined a Supplement to the preceding Hiſtory: The Archbiſhop's laſt Will; His large Anſwer to the Lord Say's Speech concerning Liturgies; His Annual Accounts of his Province delivered to the King, &c.' Lond. 1695. fol. The Preface is dated Feb. 2, 1693-4. He publiſhed that work from the Originals, delivered into his hands by Archbiſhop Sancroft a few days before his deceaſe, and by his ſpecial command.— Mr Wharton had alſo collected *Memorials* and *other Papers* of Archbiſhop Laud, which by that Prelate's direction ſhould have accompanied this Hiſtory. But finding they could not be publiſhed in the ſame Volume with the Tryal, without ſwelling it to too great a bulk, he reſerved them for a Second Part: which not living to put out, it was publiſhed by his father, Mr Edmund Wharton, in 1700. fol. This ſecond volume contains, Letters and other Tranſactions relating to the Univerſity of Oxford, from Archbiſhop Laud's being elected Chancellor, April 12, 1630, to his reſignation of that office, June 28, 1641: His Anſwer to the Lord Say's Speech againſt the Biſhops, 1641: And his Speech in the Star-chamber, June 14, 1637, at the cenſure of J. Baſtwick, H. Burton, and W. Prinn.

[*N*] *A new edition of the Life of Cardinal Pole, with the Conteſt between the Embaſſadors of England and France at the Council of Conſtance, &c.*] They are in Latin, and bear this title, *Vita* Reginaldi Poli, S. R. E. *Cardinalis, & Cantuarienſis Archiepiſcopi; Italice conſcripta a* Ludovico Bacatello, *Archiepiſcopo Raguſino, ipſius familiari. Latine reddita, ab* Andrea Dudithio *Epiſcopo Tininienſi.* Juxta *exemplar Venetiis excuſum,* An. M.D.LXIII.—*Nobiliſſima Diſceptatio ſuper Dignitate & Magnitudine Regnorum Britannici & Gallici, habita ab utriuſque Oratoribus & Legatis in Concilio* Conſtantienſi. *Juxta exemplar* Lovaniis *excuſum,* An. MDXVII. This laſt was found at Conſtance, by Sir Robert Wingfeld, Embaſſador from K. Henry VIII. to the Emperor Maximilian I. when he was looking over the Acts of the Council of Conſtance.

[*O*] *Beſides which, he left ſeveral pieces in manuſcript, and notes and emendations upon many printed books.*] I. He had, for inſtance, prepared for the preſs the following ancient *Engliſh Hiſtorians,* which he carefully tranſcribed from the originals, and faithfully collated. viz. 1. *Benedictus Abbas Petroburgenſis de Geſtis Henrici Secundi Regis Angliæ, &c.* Publiſhed in 1735, by T. Hearne, 2 vol. 8vo. 2. *Chronicon Nicolai Tribetti* (vulgo de *Trebeth,* vel *Trivat*) *Dominicani, ab anno* 1136 *ad ann.* 1307. Publiſhed ſince, in 1719, by Mr Antony Hall. 8vo. 3. *Chronicon Petri Ickham, Compilatio de Geſtis Britonum & Anglorum.* 4. *Stephani Birchington Monachi Cantuarienſis Hiſtoria de Regibus Angliæ poſt Conqueſtum.* 5. *Liber Nonus de Miraculis Anglorum.* In ſome of them are large Collections out of ancient and modern Records, relating to Church-affairs. 6. He drew up a curious Account of the *Manuſcripts* in *Lambeth-library*; wherein, beſides giving a moſt exact Catalogue of them, he has, under every

printed after his deceaſe. He was a man of excellent natural endowments, a quick apprehenſion, ſolid judgment, faithful memory, and moſt indefatigable induſtry. With regard to his moral accompliſhments, he was modeſt, ſober, pious, and charitable. As to his perſon, he was of a middle ſtature, of a brown complexion, and of a grave and comely countenance. His conſtitution was vigorous and healthful : In confidence of the ſtrength of which, he was too little regardful of himſelf, and too intent upon his ſtudies. Inſomuch that, for the ſake of them, he often denied himſelf the neceſſary refreſhments of nature. And ſometimes in the coldeſt weather would ſit ſo long at them, and without a fire, as to hurt himſelf extremely. His too eager proſecution of them, together with a weakneſs contracted in his ſtomach by the too violent operation of a medicine he had taken, ſo far broke his conſtitution, that no art nor ſkill of the moſt experienced phyſicians could repair it. The ſummer before he died he went to the Bath, and found ſome benefit from the waters. But, at his return from thence to Canterbury, falling again to his ſtudies immoderately, and beyond what his ſtrength could bear, he quite undid all that they had done. So that, after a long and lingering decay of nature, being reduced to the utmoſt extremity of weakneſs, he expired March the 5th, 1694-5, in the 31ſt year of his age. The death of ſo extraordinary a perſon, in the flower of his age, and of whom there were great expectations, was very much lamented by the learned both at home and abroad. The clergy in particular, as a teſtimony of their value for him, attended in great numbers at his funeral; together with many of the Biſhops, particularly Archbiſhop Teniſon, and Dr W. Lloyd, Biſhop of Litchfield and Coventry, who had both viſited him in his laſt ſickneſs. The funeral office was performed by Dr Sprat, Biſhop of Rocheſter. All ſorts of perſons being willing to ſhew their reſpect for him in the beſt manner they were able, the Dean and Prebendaries of Weſtminſter not only cauſed the King's Scholars to attend him to his grave, and the choir to perform proper anthems, but alſo remitted their cuſtomary dues for interment in their church. He was buried on the ſouth ſide of Weſtminſter-abbey, towards the weſt end, near which in the wall is erected a ſmall but decent monument to his memory, with a ſhort inſcription (h) [*P*]. Among other characters given of him, A. Wood ſays (i), that he was a man of admirable gifts, great modeſty and affability, and gave ſuch early indication of his parts in the univerſity of Cambridge, and afterwards in London, that the learned looked on him as a perſon born for the advancement of learning. He was a zealous lover of the Church of England, its doctrine and diſcipline, and a learned vindicator of it againſt Popery.

every Book, tranſcribed all thoſe *Treatiſes* therein contained, which are not yet publiſhed : And what are, he has compared with that exactneſs, as to take notice of the words that are otherwiſe ſpelled in the original than in the print. This Catalogue, with other MSS of our Author, were purchaſed by the late Archbiſhop Teniſon. II. He contributed conſiderably towards a new and more correct edition of ſeveral *Printed Books.* Namely, *De Antiquitate Britannicæ Eccleſiæ & Privilegiis Eccleſiæ Cantuarienſis, cum Archiepiſcopis ejuſdem* LXX. enlarged with *Notes*, *Collections*, and *Additions*, partly made by Archbiſhop Parker himſelf, and partly by others, and ſeveral by Mr Wharton ; together with the Life of the ſaid Archbiſhop, as alſo that of Auſtin of Canterbury, written by George Acworth.——*Franciſci Godwini de Præſulibus Angliæ Commentarius*. His notes are mentioned in the Preface to the late edition of that book.——*Florentius Wigornienſis*, and *Matthæus Weſtmonaſterienſis*, both enlarged with many Notes, Corrections, and Additions. III. He had likewiſe made Notes on ſeveral of his own *printed Books* ; which undoubtedly were deſigned for Additions to thoſe Books, whenever they ſhould receive a new Impreſſion (31). Sixteen Volumes of his Manuſcripts remain in the Archbiſhop's Library of MSS at Lambeth. Amongſt them, is a Liſt of the Mitred Abbots in this kingdom, which he deſigned to inſert in the Third Part of *Anglia Sacra*, if he had lived to publiſh that Third Part (32). IV. He had collected materials for writing the Life of his patron, Archbiſhop Sancroft (33).

WHISTON [William], a Divine of uncommon learning and good parts, who made a great noiſe in the beginning of the eighteenth century, was born December 9th, 1667, at Norton near Twycroſſe in Leiceſterſhire ; and for ſome particular reaſons being trained under his father [*A*], Mr Joſiah Whiſton, then Rector of that church, till the

We are obliged to our author for moſt of the particulars of this article, which are to be found in the memoirs of his own life written by himſelf.

[*A*] *Firſt educated for ſome reaſons by his father.*] Theſe reaſons partly were, a kind of valetudinary conſtitution, which ſubjected him to the *Flatus hypochondriaci*, and partly the uſe he was of in the office of Amanuenſis to his father. Our Author ſpeaks of the old gentleman as an excellent pariſh prieſt, though of no diſtinguiſhed learning, and ſo much beloved by his pariſhioners, that being apprehenſive of loſing him after the death of Mr Gabriel Roſſe, to whom he was ſon in law and curate, they, together with the neighbouring gentry, ſigned a petition in 1657 to the Lord Protector [Cromwell], praying him, when Mr Roſſe ſhould die (who was then about 87 years old), not to ſuffer Mr Whiſton to be taken from them. He had been admitted of Queen's college, Oxford, but did not ſtay long there, being ordained by Peter Watkinſon, Moderator, and ſeven others of the claſſical preſbytery, at Wirkſworth in the province of Derby, June the age of ſeventeen, he was then ſent to ſchool at Tamworth in Warwickſhire, where having continued near two years, he was removed to Cambridge, and admitted a Sizar [*B*] of Clare-hall about the middle of the year 1686. At the univerſity he applied himſelf chiefly to mathematics, and the Carteſian philoſophy then in vogue; purſuing his ſtudies with that intenſeneſs which is natural to tempers ſtrongly tinctured (as his was) with melancholy [*C*]. But being early deſigned for the Church, he continually exerciſed his peculiar talents in compoſing pious and devout meditations [*D*]. In the beginning of Lent-term, 1689-90, he proceeded A. B. and being elected, June the 16th the following year, Fellow of his college, he took pupils. In 1693 he commenced A. M. and entered into holy orders; not long after which, his ill health not permitting him to diſcharge the buſineſs of a tutor, he reſigned his pupils to Mr Richard Laughton (*a*), whom he ſucceeded in the office of Chaplain to Dr John More, then Biſhop of Norwich in 1694. The ſame year he became firſt known to Sir Iſaac Newton [*E*], upon whoſe principles of philoſophy he drew up a *New Theory of the Earth*, and publiſhed it in 1696 [*F*]. In 1698 he was preſented by his patron Biſhop More to the living of Loweſtoft

June 21, 1653. He married Mrs Katharine Roſs in 1657 (1), and became Rector of Norton upon the death of his father in-law the following year. He joined ſome other clergymen in Leiceſterſhire in ſubſcribing an addreſs to the parliament in 1659; but being intimidated into that ſubſcription, he began the ſame year to doubt the lawfulneſs of the war. After the Reſtoration he kept in his living by the intereſt of a neighbouring gentleman, and was inſtituted into it Nov. 19, 1661, by Biſhop Sanderſon, and wrote a tract in 1665-6, to prove the unlawfulneſs of the late war againſt the King. He was alſo inſtrumental in procuring the donation of a free ſchool at Appleby, wherein Norton was included, by Sir John Moor, Lord Mayor of London in 1682. Many years before his death (which happened in January 1685-6, in the 63d year of his age) he loſt his eye ſight, yet continued afterwards to perform all parochial duties, repeating the prayers, pſalms, and leſſons, and preaching every Sunday twice, and adminiſtering both baptiſm and the Lord's ſupper by heart (2). He had ten children, of whom ſix ſons and one daughter lived paſt their minority, but none ſurvived in 1746 beſides our Author and his youngeſt brother Daniel, then Curate of Somerſham in Cambridgeſhire (3), where he continued ever after, being incapable of further preferment, by refuſing to ſign the thirty-nine Articles and read the Athanaſian Creed (4). In which ſpirit he wrote *The Primitive Catechiſm*, which, with improvements, was publiſhed by our Author, and inſerted in the catalogue of his own writings. Our Author had likewiſe an uncle, Mr Joſeph Whiſton, a diſſenting miniſter at Lewes in Suſſex, who wrote ſeveral pieces in defence of Infant-baptiſm. He had been Chaplain to Colonel Harriſon, one of the Regicides. Our Author wrote ſeveral letters for his father to him to convince him of the unlawfulneſs of the rebellion, but in vain. However, theſe differences in opinion did not hinder him from leaving what he had to his brother's children (5).

[*B*] *He was admitted a Sizar.*] His mother, now become a widow, was left with ſmall means comparatively for ſeven children, and was under ſome difficulty to ſupport the expence of an univerſity education; but our Author was very frugal, and though he was a penſioner the laſt half year while he was under-graduate, yet his whole expences for three years and a half, till his firſt degree incluſive, did not amount to ſo much as 100l. (6)

[*C*] *His temper was of a melancholy caſt.*] He tells us, that though the hypochondriacal vapours might ariſe from his original ſtamina, yet the debility increaſed through want of exerciſe while he was his father's amanuenſis; and that being once reduced to a great degree of vaporous timidity, he was reſtored by walking againſt his will ſome miles in a froſty morning. He has retailed ſeveral inſtances of this in his infancy, which, as uſual, produced ſome extraordinary forebodings: One, of a melancholy dream which he had of his grandmother's funeral, from which he was awaked by the noiſe of the people in fetching her coffin, ſhe being dead to his great ſurprize, there having been no ſigns before of her approaching death. Another of a foreboding impreſſion of the death of a youth [Maſter Gery] in the neighbourhood, which happened juſt before our Author's being put to the ſame ſchool with him at Tamworth; upon that occaſion young Whiſton made Gery a viſit, in the view of opening an acquaintance between them, when at parting Whiſton was ſtruck with a ſtrong thought that he ſhould never ſee him again, which accordingly came to paſs, Gery being carried off by the ſmall pox before his propoſed return to Tamworth. How this predominant part of his conſtitution grew with his years into a very ſingular height of enthuſiaſtic inflexibility and hardineſs, will ſufficiently appear in the courſe of this memoir. At preſent he has given in this place a ſpecimen of it, by informing us at the concluſion of theſe narratives, that he had made ſtrict inquiry about ſeveral other relations of the ſame nature. I mean, ſays he, relating to the inviſible world. That he had collected ſome himſelf, and frequently been entirely ſatisfied of their truth and reality (7).

[*D*] *He compoſed pious meditations.*] He has given us ten of theſe; the firſt of which is dated Dec. 19, 1686, when he had not been at the college above a quarter of a year, not coming to reſide there till the preceding September; but it muſt be remembered that he was now in the 20th year of his age, had been trained up from his youth under deep impreſſions of piety, and in the diligent ſtudy of the ſcriptures, had been his father's amanuenſis, and been long devoted to the miniſtry by his father. Theſe conſiderations greatly abate, if not entirely take off, the ſeeming ridicule in the words of his firſt meditation, *Upon the ſcandalous lives of miniſters*, which begins thus. *I have* ALWAYS *looked on ſuch men who have taken upon them this ſacred function, &c.* The concluſion, however, deſerves to be recorded to his honour. 'O 'bleſſed God,' ſays he, 'if thou pleaſeſt to lengthen 'out my life, and to call me to ſerve thee in the mi'niſtry, to which my father has devoted me, I hum'bly beſeech thee to make me ſenſible of the weight 'of the charge I undertake, and careful and conſci'entious in the diſcharge of the ſame; and eſpecially 'that I may by my good example conſtantly edify 'and inſtruct my flock, and do my utmoſt diligence '[illegible]h to ſave myſelf and them that hear me, through 'Jeſu[illegible] Chriſt our Saviour. Amen (8).'

[*E*] *He became acquainted with Sir Iſaac Newton.*] From his firſt entrance in the univerſity till this time he had ſtudied the Carteſian philoſophy, which was then all the vogue there; he had indeed heard Sir Iſaac Newton read ſome of his lectures in the public ſchools, but did not underſtand them at all. By what means he was prompted to look into the Principia of that great man, has been already related.

[*F*] *His new theory of the earth.*] Our Author tells us, that this piece was ſhewed in manuſcript to Dr Bentley and Sir Chriſtopher Wren, but chiefly to Sir Iſaac Newton, who well approved of it. This laſt muſt be taken with ſome grains of allowance. It was too much our Author's practice in ſpeaking of the approbation given by his friends to himſelf of his books, to run into hyperbolical expreſſions. We have already ſhewn how he came by the hint which gave riſe to this hypotheſis, as alſo the anſwer to it by Dr John Kiel (9). However, on its firſt appearance in public being generally thought to be new and intirely of his own fabric, it met with a very good reception upon that account. An inſtance of which is mentioned by our Author in his Memoirs, where he has tranſcribed part of a letter to Mr Molyneux by Mr Locke, dated Feb. 22, 1696, which runs thus. 'You deſire to know what 'the opinion of the ingenious is concerning Mr Whi'ſton's book. I have not heard any of my acquaint-

---

(*a*) This gentleman became a very eminent tutor, afterwards a proctor of the univerſity, and drew up a ſet of queſtions for the public diſputations of the undergraduates in the ſchools, which were printed and conſtantly followed. See ſomething more of him in Dr Conyers Middleton's article.

(1) The ceremony was performed by a juſtice of peace, according to the practice of thoſe times. Miſs Roſs proved a good wife, took great care of her huſband under all his infirmities, as well as of a numerous family of children, being a very ſincere religious woman.

(2) But he left the office of matrimony to be performed by others.

(3) He had been firſt curate at Horſeheath, the ſeat of Mr Bromley, in the ſame county, the late Lord Mumford's father.

(4) For refuſal to read which he was once in danger of loſing his curacy, but it was prevented by Dr Clarke's interpoſition with a noble peer in that neighbourhood. He compoſed no leſs than 3000 ſermons.

(5) Whiſton's Memoirs of his own life, from p. 3. to p. 17. incluſive paſſim.

(6) Ibid. p. 23, 24.

(8) p. 46, 47.

(9) In Dr John Kiel's article.

Loweſtoft cum Keſſingland, a maritime town upon the coaſt of Suffolk. The care of ſouls was rightly eſteemed by Mr Whiſton to be a concern of the higheſt importance; he therefore ſet himſelf ſincerely and in good earneſt to that great work, diſcharging the ſeveral duties of a pariſh prieſt with diſtinguiſhed piety and unwearied diligence [*G*]. Upon this principle he thought himſelf obliged to reſign his chaplainſhip (*b*), and likewiſe to keep a curate, notwithſtanding the revenues of the parſonage were ſmall, and to which he alſo procured a conſiderable augmentation partly at his own charge [*H*]. Thus ſettled in a houſe, he took a wife, pitching upon Mrs Antrobus, daughter of his ſchoolmaſter at Tamworth. By this ſtep his fellowſhip at Clare-hall became vacant; but that loſs was made up to him in a little time by his friend Sir Iſaac Newton, who in 1701 appointed him his deputy in the mathematical profeſſorſhip at Cambridge, of which he gave him the whole profits, and procured him for his ſucceſſor in the lecture itſelf in 1703. Upon this promotion he reſigned his living in Suffolk, and ſettled at Cambridge, where his patron Dr More, now become Biſhop of Ely, had given him a catechetical lecture at St Clement's church. In the interim he publiſhed his *Short View of the Chronology of the Old Teſtament*,

(*b*) He was ſucceeded in it by the famous Mr (afterwards Dr) Samuel Clarke, and hence commenced a particular acquaintance with him, whom he firſt met accidentally at a coffee-houſe in Norwich in 1697, and preſently after introduced him to the Biſhop by a particular invitation from his Lordſhip. Memoirs, p. 2. & ſeqq. ſecond edit. 1753.

' ance ſpeak of it, but with great commendations, as ' I think it deſerves; and truly I think he is more ' to be admired, as he has laid down an hypotheſis ' whereby he has explained ſo many wonderful and ' before inexplicable things in the great changes of ' this globe, than that ſome of them ſhould not eaſily ' go down with ſome men; when the whole was intirely new to all. He is one of thoſe ſort of writers ' that I always fancy ſhould be moſt eſteemed and ' encouraged; I am always for the builders, who ' bring ſome addition to our knowledge, or at leaſt ' ſome new thing to our thoughts.' But after Dr Kiel's anſwer, it became a general and juſt remark, that our Philoſopher had very ingeniouſly contrived to drown the world, but without giving himſelf any trouble how to carry the water off again. His work, however, has gone through ſix editions, but no conſiderable additions have been made to it, as he informs us, ſince the third; notwithſtanding which we find ſeveral corrections and alterations made by himſelf to the 5th edition printed in 1737 (10); to which was alſo added in the Appendix, an Epitome of it by himſelf, 1717, at the requeſt of Mr La Roche, who tranſlated it into French, and inſerted it into his *Bibliotheque Angloiſe*.

[G] *He was a pious and diligent pariſh prieſt.*] He tells us, there were about two thouſand ſouls under his care; that he ſet up public prayers every morning and evening in a chapel in the town; and to encourage a more numerous and conſtant attendance, he uſed after a while, beſides a leſſon out of the New Teſtament, that abridgement of the public prayers in *The Common Prayer-book the beſt companion* (11). He conſtantly preached twice a-day on Sundays (12); and all the ſummer ſeaſon at leaſt had a catechetic lecture at the chapel within the town in the evening, deſigned more for the adult than for the children themſelves, to which the diſſenters alſo came. This method of catechiſing was begun by him at Biſhop More's chapel at Norwich, for his children and ſome others, to which the Biſhop himſelf came ſometimes, and would have had him printed them; but that could not be done, as they were ſpoken off-hand from ſhort notes only, as were alſo a great part of his ſermons at Loweſtoft (13). His curate likewiſe preached once every Sunday at Keſſington, and once at Corton, a very poor neighbouring village of hardly any revenues, and formerly abandoned to diverſions on that day. Likewiſe he gave them himſelf at Keſſington a ſermon once a month, and a catechetic lecture in the afternoon. He alſo tried to inſtruct the private families there at home on week days; and theſe not being well attended on account of buſineſs, he did it on Sunday evenings, when they were more at leiſure (14).—Of his further zeal, he has given an inſtance or two, which in juſtice to him muſt not be omitted. The pariſh officers once applying to him for his hand to a licence for a new alehouſe, he ſaid, *If they would bring him a paper to ſign for the pulling an alehouſe down, he would certainly ſign it, but would never ſign one for ſetting an alehouſe up.* Again, an affair once happened at Loweſtoft, when his friend Mr Clarke was with him on a viſit, which, he ſays, they never forgot. They went together on board one of the ſmall trading ſhips belonging to that town, and there obſerved two ſeamen jointly drawing up a veſſel out of the *hold*; when another that ſtood by aſked one of them who was looking down it, why he did not turn his face away? he thereupon turned away his face, but continued to aſſiſt in lifting as before; the meaning of which they underſtood to be, that he would be obliged to ſwear that he *ſaw* nothing taken out of the *hold*, not that he took nothing out of it. *This*, ſays Mr Whiſton, *is a ſeaman's ſalvo for ſuch errant perjury, and this is the conſequence of multiplying oaths on every trifling occaſion* (15). In the ſame zealous ſpirit, but carried rather to a little exceſs, he refuſed to read an Excommunication tranſmitted to him from the Chancellor, againſt a woman in his pariſh for calling another woman *whore*, becauſe the charge was believed by the ſober people to be true; and when the Chancellor reminded him that the reaſon was inſufficient according to that well known eſtabliſhed rule of the eccleſiaſtical law, *Veritas convitii non excuſat convitiantem*, he called it a maxim of the modern antichriſtian law (16). Thus we ſee the firſt trial diſcovered this fanatical diſpoſition; and the like puritanical rigour ſhewed itſelf in the denial he gave to an old acquaintance, who being candidate for a fellowſhip at Clare-hall, forſook his ſobriety, and joined with the drinkers, thinking the majority of votes lay on that ſide; but finding his miſtake, he begged our Author's vote, ſolemnly proteſting that he would ever afterwards become a ſober man: 'My anſwer,' ſays Mr Whiſton, 'was ſhort, but ſuch as cut off all his hopes; *Sir*, ſaid ' I, *you have confeſſed that you ſacrificed your integrity* ' *to your preferment, and thereby made it impoſſible for* ' *me to ſerve you* (17).' It is true, by way of his own vindication, he obſerves, that this candidate became at laſt one of the moſt miſerable clergymen that ever he heard of, and declares himſelf ready to weep for him, becauſe of their former friendſhip; but this temper did not ſuffer him to reflect how far poſſibly this ill conduct might be owing to the diſappointment in loſing his election, nor of the views there might be of reclaiming him by kindneſs, as he himſelf, in another place, acknowledges happened to a ſon of Biſhop Stillingfleet, whom, when Chaplain to Biſhop More, he declined to preſent for holy orders, on account of his having heard a bad character of that candidate's morals; whereupon he was preſented by Archdeacon Jefferies, and proved afterwards a worthy man (18).

[*H*] *He procured an augmentation to the living.*] Mr John Baron, Miniſter of Ditchingham, afterwards Dean of Norwich *, who was poſſeſſed of about 20 l. a year of the tithes of Keſſingland, offered them at eight years purchaſe, in order to be ſettled on the Church. Our Incumbent therefore ſtirred in the affair, and procured the money, of which the Biſhop of Norwich gave 5 l. Dr Hump. Prideaux 10 l. Lord Weymouth 10 l. &c. and having made it up within 50, Mr Whiſton advanced that himſelf; ſo that the title was veſted in him, and he kept poſſeſſion after he reſigned the living in 1703; nor did he part from it till 1710, when he was expelled the univerſity. Theſe tithes, upon the reimburſement of the 50 l. he gave up, when Biſhop Trimnel came to Norwich, as belonging in equity to the church: however, Mr Tanner, the Incumbent in 1747, had ſent him, as he gratefully acknowledges, 5 l. for many years, every Chriſtmas. The ordinary revenues of the living brought in clear 120 l. per annum †, which aroſe chiefly from the North ſea, herring, and mackarel fiſhery, the parſon's dues being half a dole out of every fiſhing boat, which were uſually about thirty [dole] in each; ſo that inſtead of tithes, or the tenth part, he received only about one ſixtieth of the product of the ſea (19).

(10) In his Memoirs of his own life, p. 39. to p. 42, incluſive.

(11) This, he ſays, was approved by Biſhop Lloyd.

(12) The church ſtood three furlongs from the town.

(13) This, he well obſerves, both gained him more time for his other more learned ſtudies, without neglecting his cure, and being naturally ſpoken in a more eaſy way and more familiar ſtyle, were generally more edifying and acceptable than elaborate compoſed diſcourſes.

(18) p. 37, 38.

* This Dean, who was bred among the Diſſenters, died, it ſeems, an Unitarian, according to an Epitaph made for his monument, printed in Memoirs, vol. II. p. 214. and vol. I. p. 289. where Mr Whiſton ſays, that himſelf had ſome ſhare in bringing him over to the Church, and that tho' he accepted the deanery of Norwich, yet he refuſed that biſhopric, of which he had an offer.

† He gave 30 l. a year to his curate, who made 30 l. a year more by teaching a petty ſchool.

(19) Memoirs, p. 108, 109. 289, 290.

and the Harmony of the Four Evangeliſts, in 4to. in 1702. and his *Tacquet's Euclid* came out alſo before the expiration of that year (*c*). In 1704 he was very inſtrumental in erecting the charity ſchools for three hundred poor children at Cambridge [*I*]; and on January 25th he preached the firſt ſermon on that occaſion at Trinity church there. In 1706 he printed his *Eſſay on the Revelation of St John* [*K*]. He was now become ſo eminent for his diſcourſes from the pulpit, that the enſuing year he was appointed to preach the ſermons at Boyle's lecture, wherein he choſe the *Accompliſhment of Scripture Prophecies* for his ſubject, under which title they were printed. But he preſently after firſt diſcloſed his ſentiments concerning the Trinity and the Incarnation of Chriſt, in contradiction to the doctrine of the Church of England [*L*]. Perſiſting unmoveably in this opinion, he

(*c*) He ſays, it was the accidental purchaſe of this Euclid that occaſioned his firſt application to the mathematics, p. 115. The ſecond edition was printed at Cambridge in 1710. from which it was put into Engliſh at London under his own review.

[*I*] *He was inſtrumental in erecting the charity ſchools at Cambridge.*] This is declared by Mr Worts in his will, whereby he gave to thoſe ſchools 30l. *per annum* for ever. 'And I confeſs,' ſays Mr Whiſton, whoſe ſincerity in theſe caſes was never queſtioned, 'that my 'monthly day of catechiſing about ninety of them, 'when I was their ſteward, ſeemed to me the beſt 'ſpent day of the whole month (20).'

(20) Ibid. p. 176.

[*K*] *His Eſſay on the Revelation of St John.*] If we may credit our Author in this point, he had imbibed a ſuſpicion of the eſtabliſhed doctrine concerning Chriſt's divinity at this time: For when this Eſſay was peruſed in manuſcript this year by Mr Pierce†, the famous diſſenting miniſter, he obſerved it to be affirmed abſolutely that our Saviour did not know ſome divine myſteries, and particularly the time of the day of judgment, till after his death and reſurrection, in a plain way, without the addition of the uſual words *in his human nature*, he would have no nay, ſays our Author, but I muſt add thoſe words, which I then did by his over-perſuaſion againſt my own judgment (21).

† He became acquainted with Mr Pierce by being his neighbour at Cambridge.

(21) p. 124.

[*L*] *He diſcloſed his ſentiments about the Trinity, &c.*] Having, as obſerved in the preceding remark, begun to entertain a doubt of the proper eternity and omniſcience of Chriſt in 1706, he tells us himſelf how he proceeded in his enquiries afterwards. That being at leiſure after the publiſhing of his Boyle's lectures, he ſet himſelf to draw up, about February 1707-8, at the requeſt of a friend, ſuch a method for the ſtudy of divinity, as he had often in converſation propoſed for the only way of teaching Chriſtians, and promoting the primitive faith and practice. That in the proſecution of this deſign he was particularly attentive to the doctrine and faith of the firſt Chriſtians concerning the Trinity, and ſo to diſtinguiſh the additions made to it by later inferences and explications. In this firſt paper he owned that the original doctrine upon this point was very different from the common opinion, and nearer that of the Arians than the Athanaſians and preſent orthodox; but had not then examined the matter ſo exactly as to know whether the doctrine of that part of the Church which was called Arian in the fourth century, was intirely the ſame as to this point with that taught and believed in the firſt times of the goſpel. Having given his friend this advice, he began to ſpeak of it to ſome other friends, and freely to declare his thoughts about the doctrine of the Trinity; when, upon a hint of the danger of this conduct to himſelf and family, being conſcious that his preſent thoughts were taken up rather from his former gradual and occaſional obſervations in the holy ſcriptures and the moſt ancient writers, than from a direct and particular examination of this diſtinct ſubject in both, he reſolved to re-examine the whole matter from the New Teſtament and all the moſt genuine ancient monuments of our religion now extant, determining not to make uſe of any vain deductions or philoſophical reaſonings, but exactly and ſingly be guided by the original teſtimonies, and to determine his faith and practice intirely by them only, and to keep clear from the modern writers, and the darling notions of any church. He ſet about it with all poſſible ſincerity, and hearty prayers to God not to be deceived, nor become the cauſe of deceiving others. In this manner he read the New Teſtament twice, and all the catholic monuments till near the concluſion of the ſecond century, making collections according to a paper of heads for both ſides of the ſeveral queſtions: he likewiſe examined the teſtimonies cited by Biſhop Bull, from the originals. But about the time of his entring upon this laſt particular examination, he light upon Brockleſby's *Goſpel Theiſm*, where he met with this aſſertion, then very new and ſurprizing to him, *That Chriſt had no human or rational ſoul diſtinct from the Logos, but that at the Incarnation the Logos ſupplied the place of ſuch a ſoul.* 'This notion,' continues he, 'appeared to me exceeding conſiderable, and of the 'utmoſt conſequence to the right underſtanding thoſe 'truly Chrſtian myſteries of the incarnation and ſuf'ferings of the Son of God; and immediately per'ceived, that if it proved true, it would give the 'greateſt light poſſible not to theſe points only, but 'to the entire ſubject I was then upon.' He reſolved therefore to be very curious in his obſervations as to this matter in the ancient teſtimonies; and marking the paſſages as he went along, he generally found them favourable to that notion, and began not a little to be ſecure of its truth, till he found Juſtin Martyr aſſerting that the whole perſon of Chriſt includes a ψυχη, a ſoul, as well as the λογος, particulare, and a body *. This puzzled him a little, as having yet no notion of any more than two parts, a ſoul and a body, in human nature, according to our preſent philoſophy: but examining the ancient opinion, he found that man was particularly a *compoſition animal*, and contained more parts than brutes, as having beſides the body and its ψυχη, or ſenſitive ſoul, a πνευμα, or rational ſoul; and that this was affirmed by Juſtin himſelf ‡; and that by conſequence the λογος in Chriſt ſupplied the place of πνευμα, or rational ſoul, in man. No body can be ſurprized after this, that he found Ignatius in his larger Epiſtles of this opinion, and Athanaſius likewiſe. When he had peruſed his papers, he went to London to conſult with his friends, who adviſing him to tranſcribe the teſtimonies at length, he returned to Cambridge for that purpoſe; and having compleated it, "Now," continues he, "it was, and not till now, that I had all my evidence "at once before me, that I was able to affirm and "aſſuredly pronounce, that the Arian doctrine was "in theſe points moſt certainly the original doctrine "of Chriſt himſelf, of his holy Apoſtles, and "of the moſt primitive Chriſtians. That that ſort of "eternity of the Son of God, of which ſome of the "Fathers began to ſpeak towards the latter part of "ſecond century, after philoſophy was come into the "church, and of which the moſt doubt might ariſe "(the reſt of the particulars being moſt palpable) "was plainly not as we have been made to believe, "a real exiſtence as of a ſon properly coeternal with "his Father by a true eternal generation, but rather "metaphyſic exiſtence *in potentia*, or in the like higher "or ſublimer manner, in the Father, as his wiſdom "or word, before his real creation or generation (for "both theſe words are frequent in the earlieſt writers) "which real creation or generation was there ever "ſuppoſed to be a little before the creation of the "world; and that accordingly the *Council of Nice* it"ſelf eſtabliſhed no other eternity of our Saviour, as "all the original teſtimonies do ſhew (22)." Not long after this he met with Novatian's treatiſe of the Trinity, which alſo confirmed him in his opinion; but this confirmation was nothing in compariſon of what he received ſoon after from the *Apoſtolical Conſtitutions*, which were lent to him by Mr Allen, of Sidney college, Cambridge. The pleaſure he found by peruſing them, put him upon examining their authenticity and antiquity; the reſult of which was, his *Eſſay* upon them, printed in the third part of his *Primitive Chriſtianity revived*. During this enquiry he wrote to the two Archbiſhops (23), deſiring them to reviſe his papers; and he received ſeveral letters from Biſhop Lloyd of Worceſter, adviſing him, with the greateſt tenderneſs and friendly concern for him, at leaſt not to print his notions, and who, upon his perſiſting in the deſign to print them, uſed theſe remarkable words: *As for obſtinacy and heretical pravity, I am ſorry to tell you I ſee too much of both in your ſecond letter now before me:*

* De Reſurrectione in Grabe's Spicilegium, tom. II. § 13. p. 191, 192.

‡ De Incarnatione Verbi.

(22) This is inſerted among the paſſages of blaſphemy, irreligion, and hereſy, referred to by Dr Sacheverel at his trial.

(23) In a letter, dated July 30, 1708.

he deemed himſelf bound in conſcience openly and reſolutely to maintain it, againſt all prudential conſiderations whatſoever; and in that ſpirit he publiſhed ſeveral pieces in its defence (*d*). He governed himſelf alſo by this opinion in the exerciſe of his function both in his ſermons and in reading the public prayers in the Church. This conduct drew upon him the loſs of his catechetic lecture [*M*] in 1709, which was followed by that of his profeſſorſhip in 1710. Notwithſtanding theſe ſufferings, having a child born in June the laſt mentioned year, he baptized it into his peculiar faith, in a form drawn up for the purpoſe by himſelf, agreeable to the Apoſtolical conſtitutions [*N*]. Being expelled the Univerſity [*O*], he removed to London, where he publiſhed an account of the proceedings of that learned body againſt him; and having rendered himſelf incapable of enjoying any Church preferments, he perſevered in writing and publiſhing books to propagate his tenets with unuſual boldneſs, and ſuch an aſſuming air, as put it out of the

(*d*) In 1708 he drew up an Eſſay upon the Apoſtolical Conſtitutions, and offered it to the Vice-chancellor to be printed at Cambridge, but was refuſed; upon which he publiſhed *Novatian de Trinitate* at the end of a volume of *Sermons and Eſſays*, in 1709.

me (24): and at the ſame time his Lordſhip takes a great deal of pains to convince him of the ſpurioufneſs of the *Apoſtolical Conſtitutions* (25). In Auguſt 1708, having drawn up an imperfect Eſſay, as he calls it, of thoſe Conſtitutions, he offered it to the Vice-chancellor for his licence to be printed at Cambridge; which being refuſed, he went to London, in order to print it there, but was delayed by Dr Grabe, who, upon ſeeing his manuſcript, promiſed to write to Vienna for a ſmall manuſcript mentioned in his *Spicilegium*, which was likely to give light who was the collector or writer of thoſe Conſtitutions. In December he received a letter from Dr (afterwards Biſhop) BRADFORD, then Rector of Bow in London and Prebendary of Weſtminſter, That he had abuſed both himſelf and Dr Lucas, in ſaying they were of his opinion: in his anſwer to which he charges them with retreating from that which they had declared to him. There paſſed ſeveral letters after between them; in the laſt of which Dr Bradford concludes thus: 'But I have done writing in this argument at 'preſent, remembring an uſual ſaying of Dr Whichcot, as ſoon as he perceived any grow heated in diſ'courſe, *Let us leave off: I perceive, I am like to do* '*you no good; and you, by making me as warm as your*'*ſelf, may do me hurt.*' As ſoon as he had finiſhed his books upon Primitive Chriſtianity, he offered them firſt to the Univerſity, by the hands of the Vice-chancellor, and then to the Archbiſhop of Canterbury, to be publicly examined; but no notice being taken of either of thoſe applications, he concluded himſelf at liberty to print them, and did ſo in 1711; but before that, in September 1710, he went to Oxford to ſearch the Arabic Records in the Bodleian Library, where he found two Arabic manuſcripts of the doctrine of the Apoſtles *, which compleated his collection (26).

[*M*] *He loſt his catechetical lecture.*] About May 1709, being delated to the Biſhop of Ely [Dr Patrick] by the miniſter of the pariſh, that in his explanations of the Church catechiſm he advanced notions contrary to thoſe of the church, and alſo that once when he read prayers he omitted the third and fourth petition of the Liturgy, he was ſummoned to appear before the Biſhop, which he did, and his accuſer not being there, the matter dropped; the Biſhop, plainly in kindneſs to him, broke up the court before the *Promotor curiæ* came, who appeared preſently after: But the ſame complaint being ſtill continued, his Lordſhip ſent him a meſſage in September following, deſiring him to forbear reading the lecture, and promiſing him to continue the ſalary; but Mr Whiſton's conſcience not allowing him to comply with that very kind propoſal, he reſigned both in a letter to his Lordſhip, dated October 27th, 1709, wherein, after avowing his opinions, he ſays, *It is impoſſible for me to renounce or conceal them, without being condemned by my own conſcience of hypocriſy and prevarication in the moſt ſacred concerns* (27).

[*N*] *He baptized a child into his own faith.*] The form is printed in his Hiſtorical Preface, p. 107. & ſeqq. The principal differences in it from the eſtabliſhed form, are, *The Surety himſelf declares, looking weſtward, I, in the name of this child,* renounce the Devil, and his works, and his pomps, and his vanities, and his angels, and his inventions, and all things that are under him. *Then turning eaſtward, he goes on thus: I do* alſo in the name of this child dedicate myſelf to Chriſt, and do believe and am to be baptized into the one unbegotten Being, the only true God Almighty, the Father of Chriſt, the Creator and Maker of all things, from whom are all things. And in the Lord Jeſus Chriſt his only begotten Son, the Firſt-born of every creature, who was begotten by the good-will of the Father before the world began, and converſed wholly according to the laws of his God and Father. *After the benediction of the miniſter, he dips the infant thrice under water at the diſtinct names of Father, Son, and Holy Ghoſt,* in the Church-form. *After the words of the Goſpel by St Mark in the Exhortation,* Hear now what the Apoſtolical Conſtitutions and Canons ſay further concerning baptiſm, and particularly concerning the baptizing of infants, and concerning dipping three times in baptiſm: *After which follow the words, The ſigning with the ſign of the croſs is omitted.* Hear alſo what the Conſtitutions ſay of the ſufficiency of water alone, if there be neither oil nor ointment, water is ſufficient both for the anointing with the oil and ſealing with the ointment, and the profeſſion of his faith who dies together with it (28).

[*O*] *Expelled the Univerſity.*] Long before this proceeding againſt him in the Vice-chancellor's court, there was a deſign of doing the ſame thing by a Grace; but this (which reſembles a Bill of Attainder) was laid aſide, and on Sunday, October 22d, 1710, he was ſummoned and conducted into the Vice-chancellor's lodge, Dr Roderick, Provoſt of King's college; where there being other heads of houſes making a majority of the whole, agreeable to the ſtatute of the univerſity in ſuch caſes, he was ſhewed his book of *Sermons and Eſſays upon ſeveral ſubjects*, publiſhed the year before, (29) with the Doxology at the end of his ſermon before the governors of the Charity-ſchools (30), and aſked if he would own it? he refuſed to anſwer, and referred himſelf to a paper then in his hand. Thereupon they proceeded to prove the publication of his tenets againſt the eſtabliſhed doctrine of the Church of England, in purſuance to the directions of the ſtatute, Ch. 45. *De Contumacibus*; and on the 25th the following paper was delivered to him by the Regiſter of the univerſity. "Poſitions publiſhed and ſpread about in the univerſity by Mr W. Whiſton *contra religionem & ſtatuta academiæ.* 1. That the Father alone is the One God of the Chriſtian religion, in oppoſition to the Three divine Perſons, Father, Son, and Holy Ghoſt, being the One God of the Chriſtian religion. This poſition is contrary to the firſt, ſecond, and fifth of the thirty-nine Articles, and to the Nicene and Athanaſian Creeds. 2. That the creed commonly called the creed of St Athanaſius, is a groſs and antichriſtian innovation and corruption of the primitive purity and ſimplicity of the Chriſtian faith among us. This poſition is contrary to the rubric before the ſaid creed, and the eighth article of religion. 3. That the canon of the ſcripture, the rule and guide of a Chriſtian's faith, is that contained in the laſt of the eccleſiaſtical canons, ordinarily ſtiled *Apoſtolical*, which all along appears to have been the ſtandard of the primitive Church in this matter: I mean as including all the books we now own for canonical, and alſo the two Epiſtles of St Clement, and the *Conſtitutions of the Apoſtles* by St Clement, to which the *Paſtor of Hermas* is to be added, as well as we have already added the *Apocalypſe of St John.* 4. The doctrine of the Apoſtles appears to be a ſacred book of the New Teſtament, long loſt to the Chriſtian world. Theſe two poſitions are contrary to the ſixth of the thirty-nine Articles. Mr Whiſton undertakes to prove clearly that the *Apoſtolical Conſtitutions* are the moſt ſacred part of the canonical ſcriptures of the New Teſtament. Mr Whiſton aſſerts that the Doxology current in all theſe latter ages, Glory be to the Father, and to the Son, and to the Holy Ghoſt; is not the true Chriſtian Doxology. This poſition is againſt the Doxology received and eſtabliſhed in the public Liturgy." The ſeveral

(25) In a letter, dated Sept. 5, 1710.

* This proved to be only a tranſlation of another book before extant in print in its original language.

(26) Hiſtorical Preface to Primitive Chriſtianity revived, vol. I.

(27) Ibid. p. 95.

(28) Primitive Infant-baptiſm revived, edition 1712. 8vo.

(29) In theſe books ſome of his opinions were enumerated; as, when the ſcriptures ſpeak of one God, they mean one ſupreme God the Father only. The moderns call the three divine perſons but one God, and ſo introduced at leaſt a new and unſcriptural and inaccurate, if not a falſe, way of ſpeaking into the Church. Errat. p. 123. l. 23,24. To whom with the Father and the Holy Ghoſt, *read* in the Holy Ghoſt, *and dele* three perſons and one God. Theſe he allowed to be his own words.

(30) At the end of this ſermon there is a collection of Pſalms in metre, to which is ſubjoined the Doxology thus: *To God the Father, thro' the Son, and in the Holy Ghoſt, Be glory now and ever paid by us and all his hoſt.*

the power of his beſt friends to protect him (e) [P]. However, he neglected no means that his parts and diligence could furniſh, to ſupport his family: in which view his ſkill and knowledge in the mathematics proved now of ſingular ſervice to him [Q]; and among

ſeveral proofs of theſe charges are taken from his poſtſcript to Ignatius's epiſtles, publiſhed this year, and from his ſermons and eſſays publiſhed in 1709, and the depoſitions of five ſeveral witneſſes, and his propoſals for printing *Primitive Chriſtianity*, publiſhed a little before. The books and papers were proved to be diſperſed by his directions in the Univerſity by Mr Crownfield the printer, except his ſermons, which being printed at London, were ſold publickly by the bookſeller. To this charge Mr Whiſton made the following exceptions: 1. That I am charged with breaking the 45th ſtatute, which I have been uncapable of breaking, becauſe it only concerns ſuch publick univerſity exerciſes, as I have never performed. 2. That the place where moſt of the words are pretended to be ſpoken, St Clement's Church, is utterly out of the juriſdiction of the univerſity, and is no ways within this ſtatute. 3. That the want of the ſpecification of the time, or the too looſe ſpecification of it, renders moſt of the depoſitions of no value. 4. That words charged at ſo great a diſtance of time cannot be ſworn to ſo particularly, as is neceſſary to affect me. 5. That words ſpoken in private converſation, or at a coffee-houſe, or in a private college, can no ways be within this ſtatute. 6. That no books printed and publiſhed at London can be within this ſtatute. 7. That I ought to have been convened publickly in the conſiſtory, and evidence fairly there produced againſt me in an open court, and not privately in a chamber been aſked many enſnaring queſtions, with the excluſion of even a ſingle friend, who was willing to aſſiſt and direct me. 8. That any prior determination of the ſenſe of this ſtatute, before I have had counſel allowed me, and legal advice taken about its true extent and meaning, is of no force at all againſt me; and I deſire and demand that I may have time given me to argue the validity of theſe pleas. October 25, 1710 — Here he demanded a public diſputation, for which he pleaded a precedent from Fuller's hiſtory of the Univerſity of Cambridge, p. 142. But the following ſentence was paſſed Oct. 30. *Whereas it hath been proved before us, that* W. Whiſton, *Maſter of Arts, mathematic Profeſſor of this univerſity, hath aſſerted and ſpread about in Cambridge, ſince the* 19*th day of April* 1709, *diverſe tenets againſt the religion received and eſtabliſhed by public authority in this realm, contrary to the* 45*th ſtatute of this univerſity; and whereas the ſaid* W. Whiſton *being required and exhorted by Mr Vice-chancellor to confeſs and retract his error and temerity in ſo doing, did refuſe to make any ſuch confeſſion and retractation: It is therefore agreed on by us the Vice-chancellor and heads of colleges, whoſe names are here underwritten, That the ſaid* W. Whiſton *hath incurred the penalty of the aforeſaid ſtatute, and that* [illegible] *be baniſhed from this univerſity, according to the tenor of the ſame.* Signed by Mr Vice-Chancellor and eleven Heads, and underneath are theſe words: *Venerabilis vir D. Roderick, Dom. Procancellarius, aſſidentibus & conſentientibus prædictis collegiorum Præfectis, ſententiam ferendo, decrevit, declaravit, & pronunciavit, prout ſequitur.* "In the Name of God, Amen. I Charles Roderick, Vice-Chancellor of this Univerſity, do decree, declare, and pronounce, that Mr W. Whiſton, Mathematical Profeſſor of this Univerſity, having aſſerted and ſpread abroad diverſe tenets contrary to religion, &c. hath incurred the penalty of the ſtatute, and that he is baniſhed from this univerſity." The ſtatute here referred to, after laying down the rules and orders for the ſermons before the univerſity, goes on thus: *Prohibemus ne quiſquam in concione aliqua, in loco communi tractando, in lectionibus publicis, ſeu aliter publice infra Univerſitatem noſtram, quicquam doceat, tractet, vel defendat contra religionem in regno noſtro publica authoritate receptam & ſtabilitam.—— Qui contra fecerit errorem vel temeritatem revocabit, & publice fatebitur. Quod ſi recuſaverit, a collegio ſuo excludetur & Univerſitate* (31). His Profeſſorſhip was likewiſe decreed void October 25, 1711, by Dr Lany, Maſter of Pembroke Hall, then Deputy Vice-Chancellor*, and eight Heads of Colleges; and Mr Nic. Saunderſon of Chriſt's College, who had been blind from his infancy, but well ſkilled in the mathematics, was choſen into the place; from the profits of which Mr Whiſton was ejected the ſame year 1711 in purſuance of a decree in chancery: the coſts, however, of that law-ſuit were remitted by the univerſity. Mr Whiſton afterwards applied by a petition to that body for a third part of the ſalary of his profeſſorſhip (as he continued ſtill to call it) which he alledged was permitted by the ſtatute of his foundation. The words of which, according to a copy printed by himſelf †, are: Quod ſi ſenio, morbo diuturno, aut incurabili impotentia, ſeu debilitate corporis vel animi fractus ſuæ profeſſioni (modo & forma prædictis) perficiendæ non ſuffecerit, abrogetur ei profeſſio per Procancellarium & dictos Præfectos (vel majorem eorum partem) hoc tantum adhibito moderamine, ut illi *(ſic à profeſſionis munere non ſua culpa dimiſſo)* ſi tempore profeſſionis ſuæ laudabiliter ſe geſſerit, neque alias ipſi de proprio ad valorem centum librarum annuatim proviſum fuerit, tertia pars ſtipendii remaneat uſque ad mortem ſuam; reliquis partibus ſucceſſor ſit tantiſper contentus, integrum, poſt ejus mortem, percepturus. This clauſe, 'tis true, directs a third part of the Profeſſor's ſalary to be reſerved for the uſe of the Profeſſor, in caſe of his diſmiſſion from the office (without any fault of his own) on account of being rendered unable to diſcharge it by old age, or other incurable infirmity of body or mind. But that certainly was far enough from being the caſe of Mr Whiſton.——Upon the death of Mr Sanderſon in 1739, he made an application to be reſtored to the place, pitching for the purpoſe upon Dr Aſhton, Maſter of Jeſus College, the only ſurviving head of a college that had ſigned his baniſhment ‡. But the letter he ſent on the occaſion had no effect, and Mr John Colſon was choſen to ſucceed Profeſſor Saunderſon.

[P] *His boldneſs diſabled his friends from protecting him.*] He tells us himſelf, that ſome of his beſt friends began to be greatly affrighted for him, and that two of them in particular, Dr Laughton and Mr Prieſt, came together in a way of kindneſs to diſſuade him from going on, repreſenting to him the dangers to himſelf and family thereby. 'My reply,' ſays he, 'was quick: Dr Laughton and Mr Prieſt, you are 'my very good friends, you love me well, and I love 'you well; but as to what I am now about, I know 'you are both quite ſtrangers to thoſe matters, and ſo 'your arguments cannot influence me: but for myſelf, I have ſtudied theſe points to the bottom, and 'am thoroughly ſatisfied, the Chriſtian Church has 'been long and groſsly cheated in them; and by 'God's bleſſing, if it be in my power, it ſhall be 'cheated no longer. And now I have told you this, 'you may as well perſuade the ſun (which then ſhone 'bright into the room where we were) to come down 'from the firmament, as turn me from this my reſolution. Which firmneſs of mind,' concludes he, 'ſoon put an end *(as well it might)* to their ſollicitations.' Nothing can be more characteriſtic of the peculiar turn of his mind than this, unleſs it be that other evidence thereof, which is given by himſelf too immediately after. 'The like reſolute anſwer,' continues he, 'almoſt, I made to Dr Bentley, when he 'once came to me at London upon the convocation's 'falling upon me afterward, and aimed prodigiouſly 'to terrify me with their irreſiſtible authority.' This anſwer too produced the effect deſired by him, as he ſignifies in proceeding thus: 'After which I was 'hardly aſſaulted any more in this way, and continuing to act boldly, according to my duty and conſcience, enjoyed a great calm within, how roughly 'ſoever the waves and billows abroad ſeemed ready 'to overwhelm me (32).' In this triumphant ſpirit he relates many years afterwards an account of a meſſage that was delivered to him by Dr Cannon from Lord Godolphin before his expulſion from Cambridge, in order to put a ſtop to the publication of his account of the primitive faith concerning the Trinity and Incarnation. 'I well remember,' ſays he, 'the anſwer 'I then made, That if we muſt never ſet about a reformation in church-affairs, till a Lord Treaſurer 'ſends us word, *'tis a proper time*, I believed it would 'be long enough before that time would come; and 'that I ſhould have no regard to the Lord Treaſurer's 'opinion in that point at all (33).'

[Q] *His ſkill in the mathematics was of uſe to him.*] Beſides among other things in that ſcience he publiſhed *Prælectiones Phyſicæ-Mathematicæ*; *ſive Philoſophia clariſſimi Newtoni Mathematica illuſtrata*, in 1701, wherein he explained the Newtonian philoſophy in a popular way, which now began to grow into vogue (*f*). But before the expiration of the year, publiſhing his *Hiſtorical Preface*, where he ſet forth the ſeveral ſteps and reaſons of his departing from the commonly-received notions of the Trinity, the convocation ſoon after fell upon him in March 1711, and cenſured his opinions as heretical [*R*]; and that ſentence not being confirmed by her Majeſty Queen Anne

(*f*) Sir Iſaac himſelf drew up his Principia firſt in this way, but changed his mind afterwards, concluding it neceſſary that a new philoſophy ſhould not be offered without the ſtricteſt demonſtration.

Beſides writing books, a catalogue of which is mentioned hereafter, his chief ſupport was obtained by reading aſtronomical and other lectures. On this occaſion he tells us, that Mr Addiſon and Sir Richard Steele brought him, after his baniſhment from Cambridge, to have many aſtronomical lectures at Button's coffee-houſe near Covent Garden, for the procuring him and his family ſome comfortable ſupport. He alſo taught mathematicks to young gentlemen. To which were added preſents from a great number of perſons who reſpected his learning, piety, and open undiſguiſed ſimplicity and integrity, Some of theſe kindneſſes are mentioned in his memoirs; viz. a gift by Lady Caverly of 50l. ſoon after his baniſhment (34); a legacy by Dean Baron, already mentioned, of 20l. and another of the like ſum in Iriſh money by one Mr Leigh of Ireland, a third of 10l. by one Mr Brockman; which, ſays he, with a ſmall farm of my own near Newmarket, the Queen's [Caroline's] bounty of 40l. clear, Sir Joſeph Jekyll's annuity for life of 20l. a year clear, with eclipſes, comets, lectures of ſeveral ſorts at London and elſewhere, and ſome benefactions by perſons now [in 1746] alive, and the greateſt of all long ago by Mr John Bromley, of Horſeheath in Cambridgeſhire, ‘ has made me up ſuch a competen- ‘ cy as has greatly contented me, and made me go ‘ on all along comfortably in my ſtudies (35).'—— Among other benevolences he found means of procuring one from that great general, Prince Eugene of Savoy, the manner of which being a ſtriking inſtance of our author's diligence in laying hold of every opportunity and occaſion to gain a ſubſiſtence, we ſhall relate in his own words, thus: ‘ In the year $17\frac{11}{12}$, ‘ that great General, Prince Eugene of Savoy, was in ‘ England, and becauſe,' ſays he, ‘ I did then, as I ‘ do now, interpret the end of the hour, and day, and ‘ month, and year, for the Ottoman devaſtations, ‘ Apoc. ix. 15. to have been put by his glorious vic- ‘ tory over the Turks, Sept. 1. 1697. O. S. or the ‘ ſucceeding peace of Carlowitz in 1698; I printed a ‘ ſhort dedication of my firſt imperfect eſſay on the ‘ *Revelation of St John*, and fixed it to the cover of ‘ a copy of that eſſay, and preſented it to the Prince; ‘ upon which he ſent me a preſent of 15 guineas.'

(34) Ibid. p. 160. The legacy was left to his wife, the lady ſuppoſing that he would be quickly impriſoned, and ruined for hereſy.

(35) p. 290.

† The Prince, who was particularly famed for his ſagacity and dexterity in forming military ſtratagems againſt an enemy, muſt naturally be well pleaſed to ſee a civil ſtratagem thus artfully contrived againſt his purſe by a friend; a device which was the more artful in the latter part of the addreſs, as the artiſt could not but know, that the deſign of this Prince's errand hither was to prevent, if poſſible, the meaſures then entered into by our court to put an end to the war with France.

The dedication was this:

Illuſtriſſimo Principi Eugenio Sabaudienſi Vaticiniorum Apocalypticorum Unum, Turcarum vaſtationibus finiendis deſtinatum, dudum adimplenti; Alterum etiam de Gallorum imperio ſubvertendo magna ex part[illegible] *uti ſpes eſt, mox adimpleturo: hunc libellum, ſum*[illegible] *quâ decet reverentiâ, dat, dicat, conſecrat,*

8. Id. Martii, 1711-12. GULIELMUS WHISTON (36).

(36) p. 175, 176.

[*R*] *The ſynod paſſed a cenſure upon them.*] Our author being informed of the reſolutions taken in this aſſembly, addreſſed a letter to the prolocutor of the lower houſe, praying a perſonal examination before them. Of this no notice was taken; but on Friday morning a certain dean having the hiſtorical preface in his hand, and reading out of it the cenſure which had been paſſed upon him at Cambridge, moved for an addreſs to the upper houſe, to know their lordſhips opinion, what notice was fit for the convocation to take of that book, which was dedicated to it, which being agreed to, the addreſs was preſented March 16. When a motion was made, that Mr Dodwell's letter concerning the natural mortality of the human ſoul ſhould be referred to the ſame committee, which had been before appointed to conſider of Mr Whiſton's caſe, and on March 17 the committee reſolved, that it was proper to take notice of the preface. The ſame day our author wrote a letter to that houſe, praying, that Dr Smalridge, and ſuch others as they ſhould pleaſe to nominate, might be directed to examine his papers; but this was not complied with, and at the end of the month, or the beginning of June was paſſed the following ſentence: ‘ Whereas great offence hath been given ‘ to the church of God by ſeveral writings publiſhed ‘ by W. W. and particularly by a book lately dedi- ‘ cated by him to the convocation of this province, ‘ wherein that raſh and inſolent writer declares, with ‘ the utmoſt aſſurance, that the Arian doctrine con- ‘ cerning the Trinity and Incarnation is the doctrine ‘ of our bleſſed Saviour, his apoſtles, and the firſt ‘ chriſtians; and very uncharitably inſinuates, that ‘ all who have conſidered theſe matters, want nothing ‘ but the honeſty or the courage to own themſelves of ‘ the ſame opinion:

‘ We have thought ourſelves obliged, in mainten- ‘ ance of our moſt holy religion, and for the vindi- ‘ cation of our own ſincerity, for checking, if poſſible, ‘ the preſumption of this author, and for preſerving ‘ others from being ſeduced by him, to compare the ‘ dangerous aſſertions he has advanced with the Holy ‘ Scriptures, the two firſt general councils, and litur- ‘ gy and articles of the church of England, in order ‘ to give our judgment upon them.'

Then follow the ſeveral paſſages appealed to, after which the ſentence proceeds thus:

‘ We do declare, that the above-mentioned paſſages ‘ cited out of the above-ſaid books of W. W. do con- ‘ tain aſſertions falſe and heretical, injurious to our ‘ Saviour and the Holy Spirit, repugnant to the Ho- ‘ ly Scripture, and contrariant to the doctrines of the ‘ two firſt general councils, and to the liturgy and ar- ‘ ticles of our church. And we do earneſtly beſeech ‘ all chriſtian people, by the mercies of Chriſt, to take ‘ heed to thoſe falſe doctrines, as they tender the ho- ‘ nour and glory of our Saviour, and the Holy Spirit, ‘ the preſervation of the purity of the goſpel, and the ‘ peace of the church. And whereas the ſaid W. W. ‘ the better to ſupport his heretical opinions, ſpeak- ‘ ing of a book commonly called *The Apoſtolical Con-* ‘ *ſtitutions*, hath theſe words, *I have, I think, certainly* ‘ *found, that thoſe* APOSTOLICAL CONSTITUTIONS, ‘ *which the Athanaſian Church hath ſo long laid aſide* ‘ *as ſpurious and heretical, are no other than the original* ‘ *laws and doctrines of the goſpel, the new covenant, or* ‘ *moſt ſacred ſtandard of chriſtianity, equal in their autho-* ‘ *rity to the four goſpels themſelves, and ſuperior in au-* ‘ *thority to the epiſtles of ſingle apoſtles; ſome parts of* ‘ *them being our Saviour's own original laws, delivered* ‘ *to the apoſtles, and the other parts, the public acts of* ‘ *the apoſtles themſelves, met in councils at Jeruſalem and* ‘ *Cæſarea before their death. And this was the conſtant* ‘ *opinion and teſtimony of the earlieſt ages of the goſpel.* ‘ We cannot but declare this aſſertion advanced con- ‘ cerning a book which was never yet acknowledged ‘ as part of the canon of ſcripture by any general ‘ council, nor received as ſuch in any chriſtian church, ‘ to be highly abſurd and impious; tending to create ‘ in the minds of Chriſtians great uncertainties, as to ‘ their rule of faith; and to ſubvert that faith which ‘ was once delivered to the ſaints, and is preſerved ‘ in the books of the New Teſtament received in the ‘ church.' This cenſure being laid before the Queen [Anne] happened to be miſlaid, and no further notice taken of it; whereupon our author publiſhed his *Primitive Chriſtianity*, &c. in November 1711. In February following, the lower houſe applied to the upper houſe to confirm the cenſure in the moſt ſolemn manner, and likewiſe to proceed to cenſure our author in perſon, but neither of theſe was agreed to (37).

(37) Hiſtorical Preface in the Appendix, No. 2.

The convocation not being agreed how far their power extended in this caſe, addreſſed the Queen to lay it before the judges, which was done. But neither did they agree in it. Four of them, viz. Ward, Dormer, Blenco, and Lovell, giving their opinion, that the convocation had no juriſdiction originally to cite before them any perſon for hereſy, or any other ſpiritual offence, which may be cited, cenſured, and puniſhed in the reſpective eccleſiaſtical courts, whom they conceived to have the proper juriſdiction in ſuch caſes *. But the other eight, together with the attorney and ſolicitor-general, agreeing, that ſuch juriſdiction, as the law then ſtood, might be exerciſed in convo-

* This opinion is grounded upon the ſtatutes of the 23d, 24th, and 25th of Henry VIII.

Anne (*g*), he was afterwards proſecuted in the ſpiritual court in 1713 [*S*]. But no ſentence being paſſed againſt him, he kept his ſtation and memberſhip in the eſtabliſhed church, with which he ſtill held communion, but was not admitted to the Euchariſt [*T*]. In 1715 he began to hold a ſolemn aſſembly for religious worſhip at his houſe in Croſs-ſtreet, Hatton Garden, according to a liturgy which he had compoſed two years before, and at the ſame time he erected a weekly ſociety for promoting his doctrine of primitive Chriſtianity [*U*]. He had alſo within that time publiſhed a new method for diſcovering the longitude

(*g*) Her Majeſty's anſwer could not be found, and was thought to be ſecreted by ſome about her. Gen. Hiſt. of England.

convocation, her Majeſty ſent the ſeveral opinions to the Archbiſhop, with a letter, in which ſhe wrote thus:

‘ We are pleaſed to find, that according to the opinion of eight of our twelve judges, and of our attorney and ſolicitor-general, as the law now ſtands, a juriſdiction in matters of hereſy, and condemnation of hereticks, is proper to be exerciſed in convocation. And we cannot doubt, but the convocation may now be ſatisfied; they may employ the power which belongs to them, in repreſſing the impious attempt lately made to ſubvert the foundation of the Chriſtian faith; which was one of the chief ends we propoſed to ourſelves in aſſembling them, as appears from the whole of our letter of December 12th, and from the firſt head of buſineſs, which in our two ſubſequent letters of January 29th, and February 14th, we recommended to their conſideration. We truſt that theſe our royal intentions ſo often ſignified, will not be without effect: and ſo requiring you forthwith to communicate this our letter, together with the opinions of our judges and attorney and ſollicitor-general, herewithal tranſmitted to you, to both houſes of convocation, we bid you heartily farewell.

‘ Given at our court at St James's, the 8th day of May 1711, in the tenth year of our reign §.’

§ An account of the convocation's proceedings with relation to Mr Whiſton, &c. by W. Whiſton, M. A. Lond. 1711. 8vo.

[*S*] *He was proſecuted in the ſpiritual court.*] Dr Pelling, rector of St Anne's, Soho, London, delated him of hereſy before the commiſſary of the dean and chapter's court of St Paul's, within whoſe peculiar juriſdiction his habitation lay. The commiſſary Dr Harward, upon conſideration of the nature of the cauſe and the legal puniſhment, which is at the leaſt degradation from the miniſterial function, declared, that becauſe he was a layman, and had not his commiſſion from any biſhop, it was not in his power to degrade a clergyman, and by conſequence not to judge of the crime of hereſy, whereto that degradation belonged. He therefore ſent the petition to the dean of the arches, Dr Betteſworth, as the proper ſuperior judge, to whom he ſuppoſed it muſt now belong: but the Dean, upon hearing the cauſe, determined that this matter not coming to him by appeal, as cauſes ought to do in his court, and the cauſe itſelf having been already taken into the cognizance of the convocation, and beſides belonging properly to the Biſhop of London's juriſdiction, he could not receive it in the firſt inſtance, and ſo diſmiſſed it. After this Dr Pelling appealed, and procured the Lord Chancellor to appoint a court of delegates, who met July 1, 1713, and after hearing came to a final determination, that the cauſe did lie before Dr Betteſworth, and that he ought to have proceeded therein, and agreed to return the original cauſe, and aſſuming incidentals before them by way of appeal, cited Mr Whiſton to appear before them, on Monday, October 26. the firſt court-day of the next term, in the hall at Doctors Commons. On the day appointed he came, but not till after the court was riſen, and had declared him guilty of contempt.—However, the lay-judges refuſing to proceed any further without a court of adjuncts, to determine what hereſy was, this was delayed till 1715, when all hereſy was pardoned by an act of grace. Mr Whiſton tells us, that while they ſat in court, when the Biſhop of Wincheſter [Trelawney] preſſed the judges to haſten the determination what was legal hereſy only, while the other Biſhops and himſelf well knew already what was hereſy by the New Teſtament, and the three firſt centuries, baron Price replied for himſelf, *My Lord, I will not take hereſy upon my ſhoulders, nor upon my conſcience*; that judge Tracy often whiſpered Sir Peter King, who was Mr Whiſton's counſel, to move for a prohibition, that they might get rid of the cauſe; that the Duke of Newcaſtle gave him 10 guineas to fee Lechmere, which he refuſing, our author kept them to himſelf, as he had leave to do; and that the Lord Chief Juſtice Dod, one of the delegates [of adjuncts] grew ſo uneaſy at the ſollicitations made to him by the Biſhop of Wincheſter to appoint a day for further proceedings, that at laſt he returned this ſhort anſwer, that *he would not be a judge about hereſy*; ſo that Mr Whiſton was never degraded nor excommunicated. He ſays moreover, that neither Dr Paul nor Penrice, two of his eccleſiaſtical counſel, took any fee of him as advocates, and that he was aſſured by the former, that it was Bp Hooper, who, (tho' he approved of excommunicating him *) did not approve of the impriſonment which is a neceſſary conſequence of excommunication. That the Biſhop therefore, as he heard, propoſed to adjourn the court *ſine die*, and perhaps, ſays he, with ſome inclination that it might meet no more; as in reality it did not meet any more at all. Our author obſerves upon the whole, that as to himſelf he was ſo little apprehenſive or concerned about the iſſue of their proceedings, that at this time he gave about his *Propoſals for finding out the longitude at ſea by ſignals*, at the door of the court; and on the firſt day of their meeting with the ſame unconcern he publiſhed and preſented to ſeveral of them, inſtead of a petition for mercy, as at firſt they ſuppoſed it to be, a ſingle ſheet, wet from the preſs, intitled, *The cauſe of the Deluge demonſtrated* (38).—‘ Nor do I remember,’ ſays he, ‘ that during all the legal proceedings againſt me, which laſted, in all, four or five years, at Cambridge and London, I loſt my ſleep more than two or three hours on that account (39).’

* This Biſhop had once ſent orders to Bath, while Mr Whiſton was there, to deny him the communion, to which, he ſays, he patiently ſubmitted.

[*T*] *He was not admitted to the Euchariſt.*] At his firſt coming to ſettle in London, he took a houſe in Union Court, Holbourn, which being in St Andrew's pariſh, he frequented that church till the congregation began to take notice of his doctrines: ſoon after which he was admoniſhed by the Rector to forbear coming to the communion for a while. He was afterwards admitted to come there; but when the convocation fell upon him, being again excluded, he applied again to the rector by a letter dated April 9, 1712. deſiring to be admitted to the ſacrament, who returned a verbal anſwer by Mr Shute, to this effect: that upon the receipt of his letter he had conſulted with his dioceſan, and the reſt of his brethren, who all agreed to tell him, when he ſhould offer himſelf at the communion, he muſt refuſe him on account of the offence he had given the church. Upon this Mr Whiſton drew up a paper intitled, *Articles of communion for the chriſtian aſſemblies or churches, to be conſidered, if perſecution ſhould make it neceſſary to attempt a diſtinct ſettlement.* Theſe articles were, That all heretics, or thoſe that ſhould add to or alter the original chriſtian faith, language, worſhip, or diſcipline, in order to a compliance with any particular ſects or parties, be utterly excluded theſe chriſtian aſſemblies or churches: And applied to the Biſhop of London, who remitting him to the Archbiſhop, as not in his dioceſe, he wrote alſo to the Archbiſhop, who reprimanded him for broaching his hereſy. After this, he was troubleſome to the curates of St Andrew's, whenever they preached againſt any of his notions, and to Dr Sacheverell the rector, who at length turned him forcibly out of the church; upon which he moved in 1721 from his houſe then in Croſs-ſtreet, Hatton Garden, to Great Ruſſel-ſtreet, Bloomſbury (40).

[*U*] *He held a weekly meeting for promoting primitive chriſtianity.*] He had publiſhed propoſals for erecting ſuch a ſociety, together with a Primitive Library.—This ſociety met at his houſe in Croſs-ſtreet, Hatton Garden, being compoſed of about ten or twelve perſons, Chriſtians of all perſuaſions in Chriſtianity were admitted to it (41). It was carried on for two years with only one interruption, during which time the three chairmen were Dr John Gale, the champion of the Anabaptiſts, from July 3d, 1715, when they firſt met, till February following. The ſecond was Arthur Onſlow,

(38) It was afterwards added to the latter editions of his *New Theory*, and printed alſo in the firſt edition of his *Aſtronomical Principles of Religion*. Memoirs. p. 193—197.

(39) Idem, p. 132.

(40) Hiſtorical Preface in the Appendix and Poſtſcript.

(41) Particularly one Martyn, a conſiderable quaker, author of *A Vindication of Womens preaching publicly*; but Sir Peter King, Dr Hare, and Dr, afterwards Biſhop, Hoadly, and Dr Clarke, though particularly invited by our author, never came among them. Yet the firſt and laſt of theſe were conſulted by him on particular occaſions, or particular difficulties occurring in their examinations. Life of Dr Clarke, p. 67. & ſeqq.

longitude at ſea [*W*], in conjunction with Mr Ditton *(b)*, and begun to read a courſe of experimental philoſophy, with the aſſiſtance of Mr Hawkſby. In 1716 he ſet forth *An addreſs* (after the example of the ancient apologies) *to all the princes of Europe, for the free toleration of his religion*, which was followed next year with *A new ſcheme of eccleſiaſtical and civil government* [*X*], and by his *Primitive Catechiſm* the year after. In 1719 he publiſhed a letter

(*b*) He joined with this gentleman in reading lectures on experimental philoſophy ſoon after his firſt ſettling in London, and wrote an account of him, to be tranſlated into the German tongue, and prefixed to a German verſion of his excellent treatiſe of the reſurrection.—Memoirs, p. 16.

ſlow, Eſq; till December 28, 1716. The third was Mr Tho. Emlyn, a profeſſed Arian, till June 28, 1717, which was the laſt day of their meeting (42).' Mr Whiſton all the while performed the office of ſecretary, writing down and preſerving the minutes of their proceedings with as much exactneſs as thoſe of any court in the kingdom, in a full perſuaſion of its being of greater conſequence than any of them. Our author frequently laboured to revive this ſociety, but without ſucceſs. Nor did he live to ſee *that* by him much wiſhed for time, when the thoughts of men ſhould be turned from their preſent impieties, and parties, and follies, ſo far as to make it fit (as he declares) to publiſh theſe minutes; which however were ſometimes carried to Aynho to Mr Cartwright and his lady [our author's great admirer and encourager] and their chaplain Mr Waſſe, another of his adherents, who were all very ready to hear what progreſs was made; and where the diſcoveries therein contained had ſometimes a great effect as to the determination of the genuine records of old chriſtianity. The rules and orders of this ſociety were publiſhed by our author in his life of Dr Clarke *, which whoever gives himſelf the trouble of peruſing will ſee that a ſociety now [in 1756] ſubſiſting (43) ſeems to have grown out of the aſhes of this.

(42) Their meetings were broke off on account of ſome particular difficulties occurring in their examinations.

* p. 67 to p. 74.

(43) Which meets at the Robin Hood behind St Clement's church in the Strand, and another alſo is held at the King's Arms in Newgate Street.

[*W*] *A new method of diſcovering the longitude at ſea.*] We cannot be ſurprized that our author's genius in hunting after novelties ſhould lead him to enquire after the longitude at ſea, neither will it be any wonder to ſee him eaſily ſwallowing and digeſting ſeveral wild, impracticable, and viſionary ſchemes in that purſuit. He ſuppoſed it in this caſe practicable to fix ſtationary ſhips or buoys at leaſt at the diſtance of 600 geographical miles, or ten degrees in all parts of the ocean, the depths of which in perhaps much the greateſt part, could never yet be fathomed. In theſe ſhips a mortar or great gun was to be exactly fired every midnight, which being heard by the navigating ſhips, the mariners are ſuppoſed to know their diſtance by the degree of the ſound, or for their further aſſurance bombs were to be thrown up as high as poſſible, the utmoſt altitude of which being ſeen by the fire, and obſerved by the mariners, their diſtanee is found by the difference of the altitude from the known one of the ſtationary ſhip; or ſtill further, by firing a gun at the moment the bomb arrives at its greateſt altitude, the ſame diſtance will be found by obſerving the difference of the time between hearing the firſt and that of ſeeing the laſt; the ſame may be done if the ſound and light are made at any given interval. But this method being communicated to Sir Iſaac Newton, Dr Clarke, Mr Halley, and Mr Cotes, a committee of the houſe of commons (for it was laid before that houſe) was appointed to hear the whole affair, the conſequence of which was an act of parliament, *appointing a proper reward for ſuch as ſhould diſcover a better method than had been then uſed, for finding the longitude at ſea.* However, Sir Iſaac Newton having hinted to our author the poſſible uſe this method might be of for finding the longitude at land, and thereby making exact ſurveys and maps of countries; he had ſome thoughts of making ſuch a ſurvey of England, and to that end propoſed to improve Mr Derham's table of the velocities of ſounds by a further trial to 30, 40, or 50 miles diſtance: for which purpoſe the rectilinear canal called New Bedford river in the iſle of Ely, and the old Roman road called Watling-ſtreet, as it paſſes very nearly in a ſtraight line through the plain country of Staffordſhire, were pitched upon for making theſe trials. Propoſals were publiſhed by him for a new ſurvey of England and Wales, according to this method, and for a new ſet of correct maps according to ſuch a ſurvey, by a ſubſcription of two guineas the ſet. This method not meeting with encouragement, our author nothing diſmayed, his temper being ſuch as roſe more ſanguine and ſteeled from miſcarriages and diſappointments, propoſed, in 1721, another method of diſcovering the longitude at ſea, by the *Dipping Needle*, which he ſuppoſed to vary in the degrees of inclination downward according to the different degrees of longitude. To enable him to carry on this he had a large ſubſcription, which we ſhall tranſcribe, as by it we ſee what great friends he met with.

(44) This was the largeſt ſum he ever received from his friends, except 500 l. for the ſurvey of our coaſts, which yet did not pay the diſburſements for which it was allotted. Memoirs, p. 254.—Hiſtorical pref. to The longitude diſcovered by Jupiter's planets, p. 60.

Accordingly he ſet upon contriving new inſtruments, and made ſome new obſervations of the angle of dip, but the attraction of the needle downward being weak, and the concuſſion of the ſhip ſo very troubleſome, as to give him ſmall hopes of ſucceeding, and he was ſoon made ſenſible of the vanity of this project by Mr George Graham's diſcovery of an horary certain inequality both in the vibration and the dip of magnetic needles, to ½ or ⅔ of a degree at leaſt.———Thus obliged to drop this deſign, he publiſhed a third in 1738, for diſcovering of it by the eclipſes of Jupiter's ſatellites, and the aſtronomical conjunctions of other planets, with a table of ſuch eclipſes as might be uſeful in this diſcovery for the year 1739, and 3 years after to 1742. But this project, which bid the faireſt for ſucceſs, could not be brought into practice by reaſon of the difficulty of obſerving thoſe eclipſes at ſea.

[*X*] *He moved for a toleration,* &c.] The whole title runs thus: *An humble and ſerious addreſs to the Princes and States of Europe, for the admiſſion, or at leaſt open toleration of the chriſtian religion in their dominions.* No notice being taken of this pamphlet in print, as being the work *non ſani hominis*, he obſerves, that it went without a reply, becauſe it was unanſwerable. Our author has taken great care at every turn to ſcatter about open and glaring evidences of this inſanity, but on no occaſion has he given ſo ſtriking an inſtance of his vanity and confidence, as in the cordial which he provided to comfort himſelf under the contempt that was ſhewn to this addreſs. After having, as uſual, affirmed it to be undeniable, that the *Apoſtolical Conſtitutions* contain an authentic account of the worſhip, diſcipline, and inſtitutions of the goſpel of Chriſt, and of the whole chriſtian œconomy both for faith and practice, as they were left by the apoſtles, and their companions in the latter end of the firſt, and former part of the ſecond century, he proceeds thus: 'It may not be amiſs to take notice here of the conſolation I uſed to receive by Milton's character of the ſeraph Abdiel, who was the only one of the innumerable wicked crew of inviſible beings, that continued obedient a letter to the Earl of Nottingham [Finch] concerning the *Eternity of the Son of God, and his Holy Spirit.* To this his Lordſhip wrote an anſwer, in defence of the received orthodox doctrine, for which he received public addreſſes of thanks from the London clergy, the two univerſities, and almoſt all parts of the kingdom *. So that Mr Whiſton being propoſed in 1720 for a member of the Royal Society, was rejected [*Y*]; nor did his application the following year to ſucceed Mr Flamſtead in the place of Royal Aſtronomer at Greenwich, meet with any better ſucceſs [*Z*]. His former propoſed method for finding

obedient to God and his Meſſiah, when all the reſt fell; it ſo near fitting my caſe, who have almoſt alone attempted to reſtore *primitive chriſtianity*, when the reſt of my fellow-labourers ſeemed to give it up, and to content themſelves with the hopes of getting rid of the *Athanaſian hereſy* only, that I could not but frequently ſolace myſelf with it, which, with due allowance for human frailty in the application, ſhall be here all ſet down verbatim.

So ſpake the Seraph Abdiel; faithful found
Among the faithleſs; faithful only he
Among innumerable falſe; unmov'd,
Unſhaken, unſeduc'd, unterrify'd.
His loyalty he kept, his love, his zeal,
Nor number nor example with him wrought
To ſwerve from truth, or change his conſtant mind:
Though ſingle, the friendly pow'rs do him receive
With joy and acclamations loud, that one,
That of ſo many myriads fall'n, yet one
Return'd not loſt. On to the ſacred hill
They led him, high applauded; and preſent
Before the ſeat ſupreme; from whence a voice
From midſt a golden cloud, thus mild, was heard:
Servant of God, well done; well haſt thou fought
The better fight; who ſingle haſt maintain'd
Againſt revolted multitudes the cauſe
Of truth: in word mightier than they in arms.
And for the teſtimony of truth haſt born
Univerſal reproach, far worſe to bear
Than violence. For this was all thy care,
To ſtand approv'd in ſight of God, tho' worlds
Judg'd thee perverſe.——

Which laſt unſpeakable reward of all my honeſt, tho' imperfect endeavours I have long uſed for the reſtoration of this moſt deſirable thing, truly primitive chriſtianity, may our Saviour allot me at the great day. Amen. Amen (45).'

[*Y*]. *He was rejected from entering into the Royal Society.*] The caſe, to uſe his own words, was thus: 'Sir Hans Sloane the ſecretary, Dr Edmund Halley, and myſelf were once together at Child's Coffee-houſe in St Paul's Church-yard, when Dr Halley aſked me why I was not a member of the Royal Society? I anſwered, Becauſe they durſt not chooſe a heretick. Upon which Dr Halley ſaid, that if Sir Hans Sloane would propoſe me, he would ſecond it, which was done accordingly. When Sir Iſ. Newton heard this, he was greatly concerned; and by what I then learned, cloſeted ſome of the members, in order to get clear of me; and told them, that if I was choſen a member, he would not be Preſident. Whereupon, by a pretence of deficiency in the form of proceeding, the propoſal was dropt, I not inſiſting upon it. Nay, as ſoon as I was informed of Sir Iſaac's uneaſineſs, I told his boſom-friend, Dr Clarke, that had I known his mind, I would have done nothing that might bring down that great man's *grey heirs with ſorrow to the grave.* Nor has that ſociety ever refuſed to let me come, and lay any of my papers or inſtruments before them, whenever I deſired it, without my being an actual member, which, conſidering my ſmall ability to pay the uſual ſums for admiſſion and annual dues, was almoſt as agreeable to me as being a conſtant member.' So far is a ſenſible plain narration of the fact, but Mr Whiſton's vanity could not let it go without the following comment: 'Now,' continues he, 'if the reader deſires to know the reaſon of Sir Iſaac's Newton's unwillingneſs to have me a member, he muſt take notice, that as his making me firſt his deputy, and giving me the full profits of the place, brought me to be a candidate, as his recommendation of me to the heads of colleges in Cambridge made me his ſucceſſor, ſo did I enjoy a large portion of his favour for twenty years together. But he then perceiving that I could not do as his other darling friends did, that is, learn of him without contradicting him, he could not in his old age bear ſuch contradiction, and ſo he was afraid of me the laſt thirteen years of his life. He was of the moſt fearful, cautious, and ſuſpicious temper that I ever knew; and had he been alive when I wrote againſt his chronology, and ſo thoroughly confuted it, that no body has ever ventured to vindicate it that I know of ſince my confutation was publiſhed, I ſhould not have thought proper to publiſh it during his life-time, becauſe I knew his temper ſo well, that I ſhould have expected it would have killed him. As Dr Bentley, Biſhop Stillingfleet's chaplain, told me, that he believed Mr Locke's thorough confutation of the Biſhop's metaphyſics about the Trinity, haſtened his end alſo (46).'— This needs no comment. But for further ſatisfaction we ſhall exhibit ſome ſpecimens given by our author himſelf of his behaviour to Sir Iſaac Newton; the rather, becauſe this will furniſh us with a juſt ſpecimen of his ſhameleſs manner of treating almoſt all his friends. He intimates, that his firſt acquaintance with that great man begun in 1694, upon the writing of his *New Theory*, which he tells us was approved by Sir Iſaac (the unfairneſs of which miſrepreſentation has been already noted). Soon after this he was received with ſo much familiarity, that Sir Iſaac gave him the like account of his diſcovering his theory of gravity, which many years after was given to Dr Pemberton, who firſt publiſhed it. That upon the ſubject of our author's Eſſay upon the Revelations, he ſpent once with him alone in 1706 about four hours on the *Apocalypſe*; that Sir Iſaac communicated to him ſeveral of his expoſitions upon that book; that he could hardly aſſent to more than one of his expoſitions, to wit, the diſtinction of the four monarchies in prophetic language geographically as well as chronologically, which, by his permiſſion, our author inſerted in his own eſſay. That Sir Iſaac originally imparted to him the groundleſneſs of the notion about the double ſenſe of prophecies. That when our author communicated a paper of his own on *Infant-baptiſm* (47) to Sir Iſaac for his opinion in 1712, his anſwer was, that he had diſcovered the ſa[illegible]e before.—— Nay, that he found Sir Iſaac was ſo[illegible]earty, not only for the *Baptiſts*, but for the *Euſe*[illegible]*ans* or *Arians* alſo, that he ſometimes ſuſpected theſe were the two witneſſes in the Revelation of St John. That Sir Iſaac wrote a diſſertation to diſprove the common reading of 1 Tim. iii. 16. About the year 1705, and not much later, he ſuggeſts his belief, that Sir Iſaac had long before known the Athanaſian doctrine concerning the Trinity not to be the primitive doctrine of the church. That afterwards admoniſhing Dr Clarke not to ſubſcribe the 39 articles, he adviſes him to conſult Sir Iſaac Newton (48).

Theſe inſtances are more than enough to ſhew the danger of uſing our author with that freedom and openneſs which friendſhip requires, and hence we ſee the true reaſon why he could not obtain, in 1725, Sir Iſaac's opinion and corrections of his chronological table publiſhed ſoon after, and that Mr Whiſton ſhould ſpeak in ſuch a manner as he did many years after of Sir Iſaac's conjectures concerning the cauſe of gravity (49).

[*Z*] *He could not ſucceed Mr Flamſtead.*] On this occaſion he waited on Lord Chancellor Parker, who expreſſing a concern that he came too late [two or three days after Flamſtead's death] having ſpoken already to the King for Dr Halley, did by way of recompence preſent him with a roll of fifty guineas. Our author declares, that he was put upon this affair by his friends againſt his own inclination, as being rather too old to ing the longitude at ſea being judged impracticable, he invented another more eaſy, by the help of the *Dipping Needle*, and in 1721 a large ſubſcription was made for the ſupport of his family, to enable him to carry on that deſign; but this invention, like the former, proved abortive (*i*). In 1726 he procured a model of the tabernacle of Moſes, and another of the temple of Jeruſalem [*AA*]. Upon which he read lectures at London, Bath, Briſtol, Tunbridge, and elſewhere. This he looked on as the chief buſineſs of his life, and he continued till the end thereof, though not without talking, acting, and publiſhing great numbers of books and pamphlets at the ſame time, to ſupport and propagate his religious tenets (*k*). In the year 1741 and the following year, having received great encouragement for the purpoſe (*l*), he employed a proper perſon to take an exact ſurvey of the coaſt of England [*BB*], in order to fix the true longitude thereof, which was much wanted, and upon completing the ſurvey, a chart being drawn under his inſpection, was publiſhed in 1745. In 1747 he left the communion of the church of England, and joined the Baptiſts [*CC*]. He even entertained ſome notions about circumciſion, which would infer the obſervance of that rite not to be irreconcileable to the Chriſtian

take aſtronomical obſervations, and having neither mechanical accuracy nor ſharpneſs of ſight requiſite for it (50).

[*AA*] *A model of the temple of Jeruſalem.*] This model was made according to his own directions, by Mr Grendall, and coſt him 110 guineas (51). It ſerved to explain not only Solomon's, Zerobabel's, and Herod's temple, but that of Ezechiel's alſo, which was his main deſign: That being, in his opinion, the temple to be built upon Mount Zion at the reſtoration of the Jews, which was alſo then approaching. Theſe lectures he looked on as preparations to that reſtoration. This he took to be his peculiar buſineſs, having, as he thought, plainly diſcovered in 1748, that it would not be many years before the Meſſiah would come for that reſtoration, and with it the firſt reſtoration of Ezechiel's Temple, to be built on Mount Zion, as the 3 former had been built on Mount Moriah (52).

[*BB*] *An agent to ſurvey the coaſts*, &c.]. The perſon employed was Mr John Renſhaw, who as our author's agent went round the coaſt, and ſurveyed it trigonometrically, from the North Foreland in Kent to the Land's-End in Cornwall and the Scilly Iſlands (59). But he could not be conveyed to Cape Clear on the South Weſt of Ireland, which could only be determined (ſays our author) by the eclipſes of Jupiter's planets. This however was done at his expence by Mr Renſhaw in 1744. The chart itſelf, which is large, includes alſo the French coaſt, which Dr Halley had publiſhed before, as done by the French aſtronomers, from the like eclipſes of Jupiter's planets, in a chart of the Engliſh coaſt, which was very uncorrect, being done too haſtily with improper inſtruments. (60) This chart by Mr Renſhaw was the moſt exact that had then been publiſhed.

This ſurvey was undertaken by the encouragement of an act paſſed in the 14th of George II. entitled, *An act for ſurveying the chief ports and head-lands of Great Britain, &c. in order to the more exact determination of the longitude and latitude thereof:* And as ſome doubts had ariſen whether by the words of the 12th of Queen Anne, providing a reward for diſcovering the longitude at ſea, any public money could be applied for ſuch ſurvey, it was enacted by the ſaid 14th of George II. That the commiſſioners ſhould have power to apply ſuch part of a ſum not exceeding 2000l. as they ſhould think neceſſary, for the making ſuch ſurvey.— Beſides the 500l. given to Mr Whiſton, the ſum of 1250l. another part of the ſaid 2000l. was paid to Mr John Harriſon, to encourage him to proceed in making further improvements towards diſcovering the longitude at ſea by a clock of his own invention *.

[*CC*] *He turned Baptiſt.*] As long before as 1712 he had diſcovered the errors, as he called them, of the baptiſm of uncatechized infants; on occaſion of the queſtion that was put to him by one Mr Shelſewell, (when he was preparing to baptize him and his ſiſter (63), who had never before been baptized) whether he ſhould not think it better if baptiſm were deferred till after the inſtruction than before it: To which his anſwer was, that he muſt honeſtly confeſs he ſhould himſelf have thought ſo, but that he was no legiſlator, and that he ſubmitted to what he then took to be a law of Chriſt. Conſtit. vi. 15. Do you alſo baptize your infants, and bring them up in the nurture and admonition of God. For ſays he, *Suffer the little children to come unto me, and forbid them not.* "When Mr Shelſewell was gone, I reflected, ſays he, upon what had been ſaid, and was diſſatisfied that I had been forced to allow, that in my opinion this law of Chriſt was not ſo right as it ſhould be; whereupon I immediately ſet myſelf to examine what the New Teſtament and the moſt early fathers meant by the words which they uſed when they ſpeak of the baptiſm of infants or little children, I mean *νηπια* and *παιδια*, and which they eſteemed not incapable of that holy ordinance." He ſoon diſcovered that they were only thoſe that were capable of catechetic inſtruction, but not fit for underſtanding harder matters; and that none but ſuch infants or little children were in the firſt and ſecond century made partakers of baptiſm (64). After this he baptized his god-children and a few others, after they were come to years of diſcretion, and were carefully inſtructed in the principles of chriſtianity. In 1714 he declares, that this diſcovery had made him a Baptiſt 36 years before, though he ſtill frequented the church of England ſervice, only ſhewing his diſtaſte to the Athanaſian creed, and other parts which he did not like, as not agreeing with his plan. But on Sunday the 24th of Auguſt, being at Tunbridge, it ſeems he determined to go out of the church whenever it was read. But not being fully ſatisfied of the lawfulneſs of ſuch a communion with the church, though he then practiſed it; and however being thoroughly convinced it could be no longer lawful than till he could light of enow to ſet up a truly primitive congregation of chriſtians, at leaſt of ſuch a church in a houſe; he continued thus till Trinity Sunday 1747: when upon the Athanaſian creed being read at Lyndon church, where he then was preſent, going out he went to the Baptiſt meeting at Morcot, 2 miles off, "as, ſays he, I intend to do hereafter, while I am here at Lyndon, till ſome better opportunity preſents of ſetting up a more primitive congregation myſelf." He declares his intention alſo to obſerve Wedneſdays and Fridays faſt, not at church but at home, and to uſe his own liturgy of the church of England reduced nearer to the primitive ſtandard, till Providence called him to a larger congregation: but this earneſt wiſh never happened to him (65).

In order to a right underſtanding of our author's religious principles, this remark ſhall conclude with a liſt of the particulars, in which he did not join with the church of England's liturgy. 1. In the *Te Deum* he choſe to ſay, *Thou art the only-begotten*, inſtead of *everlaſting Son* of the Father. 2. In the common creed he ſaid, Chriſt deſcended into *Hades*, inſtead of into *Hell*. 3. In the litany he directed the prayers to the Father, and entirely omitted the third and fourth petitions to the Holy Ghoſt and to the Trinity. 4. In the prayer for the parliament he omitted the epithets to the King, *moſt religious and gracious*. 5. In the collect for the 6th Sunday after the Epiphany, and elſewhere, he omitted the words *Holy Ghoſt*, and *One God*. 6. He entirely omitted the collect for Trinity Sunday. 7. In the Nicene creed he omitted the words *Light of Light, very God of very God, begotten, not made, being of one ſubſtance with the Father.* Of the Holy Ghoſt he ſaid, *proceedeth from the Father by the Son*, who *after* the Father and the Son is worſhipped and glorified. 8. In the communion-ſervice he ſaid, St Paul exhorts the Corinthians, and he entirely omitted the proper preface for Trinity Sunday, and wiſhed that water were mixed with wine in this office. 9. He never joined in the baptiſm of uncatechized infants, nor

Chriſtian ſcheme [*DD*]. In 1749, he publiſhed two volumes 8vo. and added a third in 1750, of *Memoirs, written by himſelf, of his own life* [*EE*], to which a period was put on the 22d of Auguſt 1752, after a week's illneſs at London. He was interred at Lyndon in Rutland (*m*), near the remains of his wife, a woman of excellent qualities, who died about 18 months before him. Over his grave there is a handſome tomb, with a large inſcription (*n*). His very uncommon character was drawn by an able hand (*o*) in his life time, and being tranſcribed by himſelf into his own memoirs (*p*), may juſtly claim a place here as follows: ‘ There are two clergymen’ [Dr Clarke and Mr Whiſton] ſays this author, ‘ who have ſtudied themſelves into hereſy, or, at leaſt, into a ſuſpicion of it; ‘ both of them of fair unblemiſhed characters. One [Mr Whiſton] has all his life been ‘ cultivating piety and virtue, and good learning, rigidly conſtant himſelf in the public ‘ and private duties of religion, and always promoting in others virtue, and ſuch learning ‘ as he thought would conduce moſt to the honour of God, by manifeſting the great‘neſs and wiſdom of his works. He has given the world ſufficient proofs that he has ‘ not miſpent his time, by very uſeful works of *philoſophy* and *mathematics*; he has ap‘plied one to the explication of the other, and endeavoured by both to diſplay the glory ‘ of the great Creator: and to his ſtudy of nature he early joined the ſtudy of the ‘ Scriptures, and his attempts, whatever the ſucceſs be, were at leaſt *well-meant*; and ‘ conſidering the difficulty of the ſubjects he was engaged in, it muſt be allowed, that ‘ in the main they were *well-aimed*: and if he has not ſucceeded, no more have others ‘ who have meddled with the ſame ſubjects, nor is he more to be blamed than they: to ‘ be blamed did I ſay? I ſhould have ſaid, not leſs to be commended; for ſure ’tis a ‘ commendable deſign to explain ſcripture-difficulties, and to remove the objections of ‘ profane men, by ſhewing there is nothing in the ſacred writings but what is true and ‘ rational. But what does a life thus ſpent avail? To what purpoſe ſo many watchful ‘ nights and weary days? ſo much piety and devotion? ſo much mortification and ſelf‘denial? ſuch a zeal to do good and to be uſeful in the world? ſo many noble ſpecimens ‘ of a great genius and a fine imagination? ’Tis the poor man's misfortune (for poor ‘ he is and like to be, not having the leaſt preferment) to have a warm head, and to be ‘ very zealous in what he thinks the cauſe of God. He thinks prudence the worldly ‘ wiſdom condemned by Chriſt and his apoſtles, and that ’tis groſs prevarication and hypo‘criſy to conceal the diſcoveries he conceives he has made. This heat of temper betrays ‘ him into indiſcreet expreſſions and haſty aſſertions. Deſigning to hurt nobody, he ‘ fancies nobody deſigns to hurt him, and is ſimple enough to expect the ſame favour‘able allowances will be made to him, that he ſees made to others who write againſt ‘ him. As to his learning, ’tis his misfortune that he is not ſkilled enough in the ‘ learned languages to be a critic in them, and yet he ſeems not to be ſenſible of his defi‘ciency in that reſpect; whence having ſo much heat and ſo little criticiſm, his learning

(*m*) It lies about five miles from Stamford in Lincolnſhire.

---

nor in any baptiſm by ſprinkling, nor in the anſwers of the church catechiſm which belong to God-fathers and God-mothers, &c. 10. In the burial-office he would not ſay, As our hope is this our brother doth, when by the goſpel there was little hopes of ſalvation. 11. He heartily wiſhed all ſtate holy-days were aboliſhed (66).

[*DD*] *He had ſome notions about circumciſion, &c.*]. This conceit we find in his Memoirs (67), where he has emptied his whole ſtock of all ſuch idle fancies as at any time ſprung up in a brain the moſt fruitful of them that perhaps is to be found in hiſtory. This occurs under a N. B. in p. 288. ‘ Since the old me‘thod of divine providence,’ ſays he, ‘ uſed all along ‘ to preſerve the hiſtory of the moſt important facts ‘ of ancient ages by ſtanding memorials of the ſame ‘ to after ages, as I have formerly proved, I propoſe ‘ it for a proper query to the inquiſitive, whether as ‘ the circumſtances of the firſt and original ſin of ‘ Adam and Eve were preſerved in the *pudor circa res* ‘ *venereas*; and as to Eve, by the difficulties of con‘ception, geſtation, and child-birth in mothers ever ‘ ſince; whether the ſame circumſtances of that firſt ‘ ſin might not alſo be preſerved as to Adam by the ‘ circumciſion of the males? We find this circumci‘ſion in Sanchoniatho before the flood (68): And we ‘ find it made the diſtinguiſhing mark of Abraham and ‘ his poſterity after it to this day. I affirm nothing ‘ here, but think no other ſolution of this divine com‘mand ſo probable and ſo agreeable to the ancient ‘ method of divine providence as this is.

‘ June 21. 1749. W. W.’

[*EE*] *He added a third book to his memoirs.*] It conſiſts chiefly of his lectures read in March 17$\frac{49}{50}$.—— Theſe lectures are the laſt, and indeed contain the whole maſs of his Quixotiſm in explaining the prophecies of both Old and New Teſtament *, and were evidently occaſioned by the two late earthquakes which happened at that time. He now takes it for granted, as having been fully proved before by himſelf, that the reſtoration of the Jews will come to paſs in the year 1766, that the ſigns foregoing already fulfilled are the meteors, earthquakes, and eclipſes begun in the year 1715, that very year, as he will have it, when the period of the outer court of the Jewiſh temple trodden down by the Gentiles firſt ended.—— Among the completions of the prophecies he reckons Mary Tofts, the notorious impoſtor of Godalmin in Surrey, who in the beginning of King George Iſt's reign pretended to have conceived rabbits in her womb. This he firmly believes as an undoubted fact, and a completion of that prophecy in II. Eſdras, *That menſtruous women ſhall bring forth monſtrous births.*—— Again, ſpeaking of the prophecies concerning the millenium, from Revelation xii. he declares, that there ſhall be ſoon an earthquake, which ſhall overturn a tenth part of London, and kill 7000 men of note, and the other nine parts of the inhabitants ſhall be converted to righteouſneſs, which is immediately to forego the Millenium. He concludes that the longitude at ſea will be found out before this grand Æra, in which he takes notice of the probability of ſucceſs by Mr Harriſon's clock. After all, however wild and extravagant his ſolutions may be, yet his inferences from them are highly commendable, and will undoubtedly in the mind of every good man atone, if any thing can atone, for the wildneſs of his principles. Among the inferences, having ſeverely reproved the miſconduct of our clergy, he diverts us with the ſtory of a conference between Dr Aldridge, Dean of Chriſt-Church, Oxford, and Mr Brotherton, an eminent ſtage-player. When the former declaring his ſurprize how comedians ſhould ſo deeply affect an audience, while preachers cannot do it, whoſe ſubjects are yet ſo much more ſerious and affecting than the others fictions, Mr Brotherton, upon leave obtained to ſpeak his mind with freedom, made anſwer, *Mr Dean, we are in earneſt, and you are not* (69).

‘ is

‘ is treated as if he did not know the firſt elements of Greek, though even in that he is much ſuperior to moſt of thoſe who make ſo free with him; and you every day hear his performances run down as whimſies and chimæras, by men who never read them, and if they did, could not underſtand them. Nor does his warmth of temper come off better; 'tis all *obſtinacy*, *pride*, and *heretical pravity*, a want of *modeſty*, and due deference to juſt authority. They that ſpeak moſt favourably, look on him as *crazed*, and little better than a *madman* [*FF*].’ This is the poor man's character, and low as he is, they cannot be content to leave him quiet in his poverty; whereas had he not been early poſſeſſed with a paſſionate love for the ſcriptures and philoſophy; had he not thought it his duty above all things to promote the glory of God, and been perſuaded that could be no way ſo well done as by the ſtudy of his *word* and *works*, 'tis more than probable he had at this time been *orthodox*; and then, inſtead of his preſent treatment,

[*FF*] *He was deemed little better than a madman.*] 'Tis eaſily ſeen, that however juſt the principal outlines of this character may be, yet the picture is finiſhed up with ſuch a choice of colourings as, without much regard to the true life-touches, chiefly ſerve the painter's art in it, to recommend himſelf. Some defects indeed were unavoidable. It was firſt preſented to the public in 1712, when our author had lived not much above half his days; though he had then both ſaid, wrote, and done enough to manifeſt the peculiar turn and caſt of his mind and temper, which were thereby become a popular theme of diſcourſe, and procured him the favours of many, eſpecially ſuch as on any account were diſaffected to the clergy. Among theſe ſtood foremoſt the author of *The Grounds and Reaſons of the Chriſtian Religion* (70), where the character of Mr Whiſton, though living, then and many years after, was made uſe of by way of tool and thorn, wherewith to ſerve the writer's purpoſe in galling the ſides of the parſons. To that end it is, that he is ſhewn in the light of ‘ deſpiſing the catechiſms, confeſſions or articles of faith, and traditions of all modern churches, the commentaries on ſcripture, and the ſyſtematical books of all modern theologues. He is an upright and very religious man, and a moſt zealous chriſtian, leading a moral life, as is common to moſt who are ſtiled hereticks, renouncing glory, riches, and eaſe, which he might have had with the applauſe of all, and envy of none; and willingly and courageouſly undergoing obloquy, poverty, and perſecution (all three whereof have been his lot, and the two former will be always) for the ſake of a good conſcience: deeming prudence to be the worldly wiſdom condemned by Chriſt and his apoſtles; and concealment of religious ſentiments to be a great crime; and unmoved by the example of ſeveral learned divines, who, as is well known, have *great prudence*; and through fear of the ignorant, the bigots, and the crafty (who govern the two former) do moſt of all men conceal their religious ſentiments from the world, which if they in confidence diſcover to him, he without ſcruple publiſhes it in print, ſacrificing his underſtanding to the obedience of faith, and believing myſteries.—— He is the very reverſe of many moſt eminens divines: He thinks himſelf obliged in conſcience to be dutiful, ſubmiſſive, and loyal to his Majeſty, to whom he has ſworn allegiance: and it is not a church-point with him, to act one way, and pray and ſwear another, or not to be in earneſt in theſe two moſt ſerious and ſolemn actions. He ſpeaks what he thinks, and is not guilty of the contradiction of making the Chriſtian religion a matter of great importance, and yet concealing his thoughts about the particulars of that religion, any more than he is of profeſſing a religion he does not believe. He pays no regard to faſhionable doctrines; nor to faſhionable divines, who in obedience to one another, and in harmony, vary, change, and regulate the faith of the vulgar. He will not be bound by articles which he has ſubſcribed, but renounce them, when he judges them erroneous: nor will he ſubſcribe articles which he does not believe true, or ſubſcribe them in a ſenſe contrary to thoſe deſigned by the impoſers. He renounces all preferments, and will not ſo much as receive money from infidel hands. He thinks himſelf obliged to imitate the apoſtles in their low eſtate, and he believes it no leſs inconſiſtent with chriſtianity, to aim at and contend for, and poſſeſs that worldly greatneſs and wealth, which their pretended ſucceſſors of the Romiſh church enjoy and contend for, as due to them by the goſpel, than to contradict the apoſtles in other reſpects.—— He lives for the moſt part in London, the place of the greateſt reſort of men of underſtanding, birth, fortune, and learning, in the univerſe. There he viſits perſons of both ſexes, and of the higheſt rank, who are delighted with his plainneſs, integrity (*a*), ſenſe, and learning, and to whom he diſcourſes with the greateſt freedom about many important points, and eſpecially about *Athanaſianiſm*, which ſeems his moſt peculiar concern. He frequents the moſt public coffee-houſes, where moſt are prone to ſhew him reſpect, and none dare ſhew him any diſreſpect; the clergy either flying before him, or making a feeble oppoſition to him.—— By all which he has made a multitude of converts to the belief that the Father, Son, and Holy Ghoſt are three different intelligent agents, and not three intelligent agents making but one intelligent agent: that the Father was before, and is greater than, the Son: that the Son is not the ſame being with the Father; and that the Father is the One God (as ſay both the Scripture and Nicene creed); or that there are no other Gods but him; all doctrines contrary to the preſent orthodoxy. And he has ſoftened the zeal of many more, who uſed to call fire from heaven, or the ſword of the magiſtrate to defend their ſentiments. He has at this time ſo much credit, that he now ſays and prints what he pleaſes, without incurring any hazard of perſecution from real or pretended zealots, who are forced to yield to the ſuperior ſplendor and power of his honeſty, ſenſe, and learning, and fear of drawing upon themſelves ſomething of more fatal conſequence than the preſent connections that he makes. *And I am perſuaded,*’ continues this writer, ‘ *that if any country could but furniſh twenty ſuch men as he, they would, without pay, and with mere liberty to ſpeak their ſentiments, put to flight twenty thouſand liſted to ſupport error.*—— But the greateſt good that he promotes ſeems to me what he does not deſign; and that is by putting men upon enquiries to make them ſee farther than himſelf, and to reject his narrow opinions. He is a very ſerious and grave perſon, but yet cheerful, and no enemy to mirth; and he is even capable of laughing heartily at egregious nonſenſe, ſtupidity, and folly in the moſt ſolemn perſons, when they ſpeak about the moſt ſolemn things.’

(70) Anthony Collins, Eſq;

(*a*) This was the moſt ſtriking part of his character; and it is well obſerved, in the preface to his Memoirs, that the ſtrict integrity and ſincerity of the author were probably the ſtrongeſt motives for their favourable reception by the public. 'Tis confeſſed thoſe amiable qualities do indeed glow in every page of them. But there are two remarkable inſtances, not mentioned in his Memoirs, which have been communicated to us by undoubted authority, and juſtly claim a place in this article.—— He was once in company with Meſſrs Pope, Addiſon, Walpole, Secretary Craggs, and others; when the queſtion was ſtarted, Whether a ſecretary of ſtate could be an honeſt man, conſiſtent with the intereſt of his country? After ſome debate, all appealed to Mr Whiſton, who appeared unwilling to give his opinion upon a point of ſtate-policy; but being preſſed thereto, ſaid, *He believed it would be beſt for a ſecretary of ſtate to ſpeak openly what he knew, and declare his intentions freely.* Mr Craggs replied, It might do for a fortnight, but not longer. To which ſays Mr Whiſton, *Mr Secretary, did You ever try it for a fortnight?* The ſecretary made no anſwer, and Mr Walpole ſaid he could not anſwer. Another time, in a conference with the late Queen Caroline, who had a good reſpect for him, and had frequently experienced with pleaſure the truth and ſincerity of his heart, Her Majeſty obſerved, that ſhe well knew in general the people's freedom in paſſing their cenſures upon the court, and aſking him what particular fault they found in her conduct? Mr Whiſton replied, that the fault moſt complained of was that of her talking at chapel. She promiſed amendment, but proceeding to aſk what other faults were objected to her. He replied, *When Your Majeſty has amended this, I'll tell you of the next.*

his faults would have been overlooked: the learning he excels in would have been extolled; and no defect would have been found in other parts of it: he would have been cried up as an ornament of the age, and no preferment would have been denied or envied him. Mr Whiſton had ſeveral children, of whom [GG] three ſons, William, George, and John lived to man's eſtate; he had alſo one daughter, who was married to Samuel Barker, Eſq; at Lyndon in Rutland, where he paſſed a great ſhare of his time, eſpecially in the latter part of his life, and for whoſe kindneſs he has paid a juſt tribute of gratitude in his Memoirs [*HH*]. A large catalogue of his works is printed at the end of his Memoirs of Dr Clarke, 3d edit. 1748. which however wants the following pieces to make it complete. 1. Chronological Tables. 2. Primitive New Teſtament. 3. Three Tracts, &c. 4. Addreſs to the Baptiſts. 5. Tranſlation into Engliſh of the Life of Erneſtus, Prince of Saxe-Gotha. 6. Memoirs of his own Life. 7. Exact account of the time when Miraculous Powers ceaſed in the Church: and Biſhop

[GG] *He had ſeveral children.*] Of the three ſons, the eldeſt, William, had a place in the Exchequer-office, but died in his father's life time. For the ſecond, George, the father made an application to the Speaker of the Houſe of Commons by a letter, which is a conſpicuous proof, that among the reſt of his good qualities the care of his family was none of the leaſt.

Lyndon, Feb. 1, 1748 9.

'Mr Speaker,

'You have been well acquainted with my affairs, and the circumſtances of my family; I will add, that you have all along been ſo very kind to me, and ſo greatly concerned for the misfortunes and troubles that have befallen me and them, that I think I need make no apology for this my addreſs to you on our account. You are not, I believe, unacquainted either with the abilities or application of my ſon George, or of my eldeſt ſon William (one, while he was alive, well known to the committee of the houſe of commons on account of his ſagacity and diligence in their affairs, and on account of his labour in preſerving ſome books remaining from the fire at Cotton Library), neither was you unapprized of the late Queen's kind promiſe to my ſon William, when ſhe was Regent, of a place of King's waiter, ſuch as Dr Clarke's ſon now enjoys, worth much about 100l. a year, and how it failed. You alſo know what vaſt pains he and his brother George took in learning the Armenian tongue, and how much too intenſe application George made to perfect the tranſlation and notes of the principal hiſtorian of that nation, Moſes Chorenenſis; to ſuch a degree indeed in a weak and valetudinary conſtitution of body, as has for ſeveral years rendered him uncapable of hard ſtudy, and of moſt employments otherwiſe befitting his learning and capacity. You will alſo ſoon know upon the publication of the *Memoirs of my own life*, what a ſtrange diſappointment I and my family long ago met with in the affair of Dr Turner, Prebendary of Ely, and the generous regard I had to him, which occaſioned my own loſs of full 1200l. and the increaſe of his benefaction to clergymens widows and orphans of 5000l. You will alſo there know of my voluntary augmentation of a living I once had of 20l. a year, which in my late diſtreſſes I might legally have kept all my life. So that you cannot but be ſenſible the public is under ſome obligation, if not to me in my old age, now I am going out of the world, yet to my family, or rather to my ſon George in particular, who alone of my children is unprovided for.

'Upon this occaſion, therefore, Mr Speaker, you will give me leave to make my addreſs to yourſelf, and ſuch of my other friends as may have it in their power to aſſiſt me, and procure ſome employment and place for my ſon George, that may be eaſy and advantageous to him, and that without burdening him with what his nerves will not at preſent bear. Now ſuch a place of 100l. a year has been lately vacated by the death of a very worthy man and a very good ſcholar, Mr Say, to whom the Queen herſelf gave the place of keeper of her own library; and which, I verily believe, were ſhe now alive, ſhe would not have denied me for my ſon George, I have indeed been informed that this place has been ſuppreſſed ſince Mr Say's death, without any direct intention of filling it up again; yet do I humbly hope, the foregoing circumſtances conſidered, that 'tis not too late to apply for its being reſtored, and given to my ſon: which is what I earneſtly beg of you, and all my other friends to whom the copies of this letter are ſent, to endeavour at this time. I am,

'SIR,
'Your Old Friend and
'Humble Servant,
'WILL. WHISTON (70).'

Copies of this letter were ſent to the Archbiſhop of Canterbury, to the Lord Chancellor, to the Duke of Newcaſtle, and to Mr Poyntz; but nothing was done in it. This ſon George was educated at Clare Hall in Cambridge, but from an ill ſtate of health, declined the practice of phyſic, which he had ſtudied aſſiduouſly, and for ſome years among his acquaintance practiſed with ſucceſs, without any fee, and his ſkill was generally acknowledged †. Upon his father's deceaſe he came into the poſſeſſion of the better part of the paternal eſtate near Newmarket, which together with an annuity for his life, purchaſed at the rate of 8 per cent. with 500l. left to him by the will of his elder brother William, yields a comfortable ſubſiſtence. He is ſtill living, and reſides at St Albans in Hertfordſhire, where he is well reſpected by the gentry in and about the place. Mr John Whiſton, the youngeſt ſon, was bred a bookſeller, and is well known for his ſkill in that buſineſs, by which he has acquired a plentiful fortune.

[HH] *He has paid a juſt tribute of gratitude to his ſon-in-law.*] This gentleman, who married our author's daughter about the year 1722, behaved in the kindeſt manner to him poſſible, made his houſe his father-in-law's home ever afterwards, and it is gratefully acknowledged in his Memoirs (71), by which it appears that his ſon-in-law was a gentleman of a not inconſiderable ſhare of learning; 'For,' ſays our author, 'when I was forced to examine the character of old chriſtian books with the very kind and very valuable aſſiſtance of my ſon-in-law, S. Barker, &c. whoſe Hebrew Grammar, which he has been ſo many years about, if once perfected and publiſhed, would ſhew how much original authors, even in underſtanding that language, would outgo all the modern Hebrew grammars whatſoever. But now I have mentioned my ſon-in-law, and his aſſiſtance to me in this particular caſe, I muſt do him the juſtice to own farther his very great aſſiſtance to me on many other occaſions alſo; not only by furniſhing me with many of the beſt ancient books proper to my deſigns, which I was no way able to purchaſe myſelf, but by adding frequently his own great ſagacity and exactneſs in examination to my own diſcoveries, in which aſſiſtance none but my old boſom-friend, Mr Richard Allen, Fellow of Sidney College, Cambridge, of whom I have made frequent mention in my writings, but now in paradiſe, can at all be compared to him: Nor is it eaſily poſſible for one man to be more obliged to another, than I and my family have long been to Mr Barker: May God Almighty reward him for the ſame, both in this and the next world!'

The Hebrew Grammar has not been printed. But in 1761, came out in 4to. *Poeſis vetus Hebraica reſtituta.* Accedunt quædam de carminibus Anacreonticis, De Accentibus Græcis. De Scriptura vetere Ionica. De Literis conſonantibus & vocalibus, & de Pronuntiatione Linguæ Hebraicæ. Auctore Samuele Barker Armigero, nuper de Lyndon in comitatu Rotelandiæ.

Sherlock's Sermon on the Rebellion. He alſo left ſome manuſcripts; as, 1. A verſion of David's Pſalms in metre. 2. A Paraphraſe upon Job.

WHITBY [Daniel] a learned Engliſh Divine, who publiſhed ſeveral books from the year 1664 to 1725, was born in 1638 [*A*], at Ruſhden, or Ruſden, in Northamptonſhire. In the year 1653, he was admitted into Trinity College in Oxford; and June 13, 1655, elected ſcholar of that houſe (*a*). He took his Bachelor of Arts degree April 20, 1657, and that of Maſter, April 10, 1660 (*b*). In 1664 he was elected Fellow of his college; and the ſame year he manifeſted his learning by a good book he publiſhed againſt Popery [*B*]: in which controverſy he highly ſignalized himſelf during the remaining part of his life [*C*]. Seth Ward, Biſhop of Saliſbury, taking him for his chaplain, collated him, in October 1668, to the prebend of Yateſbury in the cathedral church there: and, in the latter end of November following, to the Prebend of Huſborn-Tarrant and Burbach. On the 4th of September 1672, he was admitted Chantor of the ſame church; and the 13th of that month took both the degrees of Bachelor and Doctor in Divinity: being then, or ſoon after, Rector of St Edmund's church in

(*a*) A. Wood, Ath. ed. 1721. vol. II. col. 1068.

(*b*) Idem, Faſti, col. 114, 127.

[*A*] *Was born in* 1638.] The time of his birth is collected from theſe words of Ant. Wood, when he ſays, that 'June 13, 1655, he was aged 17 years:' from whence it follows that he was born in the year 1638; which agrees with the Short Account of his Life prefixed to his *Laſt Thoughts*, wherein he is ſaid to have been aged 88 years [or rather in the 88th year of his age] when he died, March 24, 1725-6. He was indeed reported to be 90 at the time of his deceaſe; but that ſeemed to be only a random gueſs.

[*B*] *By a book he publiſhed againſt Popery.*] The title of this book was, *Romiſh Doctrines not from the beginning: Or a Reply to what S. C.* [Serenus Creſſy] *a Roman Catholic, hath returned to Dr Pierce's Sermon, preached before his Majeſty at Whitehall,* 1 *Feb.* 1662. [and intituled The Primitive Rule of Reformation, &c.] Lond. 1664. 4to. Our Author's Anſwer is chiefly a collection out of the writings of many eminent champions of the Proteſtant cauſe, who had before abundantly ſatisfied all the Reaſons and Citations alledged by Mr Creſſy.

[*C*] *In which Controverſy he highly ſignalized himſelf during the remaining part of his life.*] We ſhall, in this Note, give at one view all the other pieces publiſhed by our Author againſt Popery; which, in order of time, were as follows. 1. Δὸς πȣ̃ στῶ, or *An Anſwer to* Sure-Footing, *ſo far as Mr Whitby is concerned in it. Wherein the Rule and Guide of Faith, the Intereſt of Reaſon, and the Authority of the Church in matters of Faith, are fully handled and vindicated from the exceptions of Mr Sargeant, and petty flirts of* Fiat Lux. Together with *An Anſwer to five Queſtions propounded by a Roman Catholic, printed with An Anſwer to Sure-Footing.* Oxon. 1666. 8vo.—— The *Sure-Footing in Chriſtianity: or, Rational Diſcourſe on the Rule of Faith, &c.* printed at London, 1664, 1665. 8vo. and here anſwered, was written by John Sargeant, alias Smith, who after he had perfected his ſtudies in the Engliſh college at Liſbon, was ſent a Miſſionary into England (1). As for *Fiat Lux*, it was written by . . . . II. The next book publiſhed by our Author againſt Popery, was, *A Diſcourſe concerning the Idolatry of the Church of Rome, wherein that Charge is juſtified, and the pretended Refutation of Dr Stillingfleet's Diſcourſe is anſwered.* Lond. 1674. 8vo. This Diſcourſe was writ in defence of Dr Stillingfleet's book intitled, A Diſcourſe of the Idolatry practiſed in the Church of Rome, &c. againſt Dr Tho. Godden's (alias Browne's) anſwer thereto, called Catholicks no Idolaters, &c. publiſhed at London 1671, 1672. 8vo. Dr Stillingfleet himſelf anſwered afterwards Godden's book, in A Defence of the Diſcourſe, &c. as above, *againſt a book called* Catholicks no Idolaters, &c. *in two parts.* Lond. 1676. 8vo. reſpiting the other part in anſwer to the remainder of Dr Tho. Godden's book to a farther opportunity; which, he ſays, he might the better do, becauſe it had already received a ſufficient anſwer from a learned and worthy perſon, meaning Dr Whitby, to whom he pays that compliment. III. The next publication of our Author was, *The Abſurdity and Idolatry of Hoſt-worſhip proved, by ſhewing, how it anſwers what is ſaid in Scripture and the Writings of the Fathers, to ſhew the Folly and Idolatry committed in the Worſhip of the Heathen Deities. Alſo a full Anſwer to all thoſe Pleas by which Papiſts would wipe off the Charge of Idolatry.* Lond. 1679. 8vo. To which is added, An Appendix againſt Tranſubſtantiation, with ſome Reflections on a book called *The Guide in Controverſies*, by R. H. (Abr. Woodhead) ... in a Sermon on John vii. 47, 48, 49. London 1679. This ſermon was intended to have been preached before the Clergy. And theſe three laſt pieces evinced the truth of thoſe doctrines contained in the two great Teſts, one made in the 25th, and the other in the 30th of K. Charles II. which laſt requires the renouncing of the ſeveral Roman-Catholic tenets refuted in theſe two books; and moreover juſtified the reaſonableneſs and equity of impoſing thoſe Teſts. IV. *A Diſcourſe concerning the Laws Eccleſiaſtical and Civil made againſt Hereticks by Popes, Emperors, and Kings, Provincial and General Councils, approved by the Church of Rome. Shewing, 1ſt, What Proteſtant Subjects may expect to ſuffer under a Popiſh Prince acting according to thoſe Laws. 2dly, That no Oath or Promiſe of ſuch a Prince can give them any juſt Security, that he will not execute theſe Laws upon them. With a Preface againſt perſecuting and deſtroying Hereticks.* 4to. Lond. 1682. Reprinted at London in 1723. 8vo. with an Introduction by Biſhop Kennett. V. *A Treatiſe in confutation of the Latin Service practiſed, and by order of the Trent Council continued, in the Church of Rome.* 4to. Lond. 1687. VI. *The Fallibility of the Roman Church demonſtrated from the manifeſt Error of the ſecond Nicene and Trent Councils, which aſſert, that the Veneration and honorary Worſhip of Images, is a Tradition primitive and Apoſtolical.* Lond. 1687. 4to. in 11 ſheets, without the Author's name. VII. *A Demonſtration, that the Church of Rome, and her Councils, have erred; by ſhewing that the Councils of Conſtance, Baſil, and Trent, have in all their Decrees touching Communion in one kind, contradicted the received Doctrine of the Church of Chriſt. With an Appendix in Anſwer to the 21ſt Chapter of the Author of* Papiſt miſrepreſented and repreſented. Lond. 1688. 4to. VIII. *Treatiſe of Traditions. Part I. Where it is proved that we have Evidence ſufficient from Tradition, 1. That the Scriptures are the Word of God. 2. That the Church of England owns the true Canon of the Books of the Old Teſtament. 3. That the Copies of the Scripture have not been corrupted. 4. That the Romaniſts have no ſuch Evidence for their Traditions. 5. That the Teſtimony of the preſent Church of Rome can be no ſure Evidence of Apoſtolical Tradition. 6. What Traditions may ſecurely be relied upon, and what not.* Lond. 1688. IX. *Treatiſe of Tradition. Part II. Shewing the Novelty of the pretended Traditions of the Church of Rome. As being firſt, Not mentioned by the Ancients in their Diſcourſes of Traditions Apoſtolical, truly ſo called, or ſo eſteemed by them. Nor ſecondly, In their avowed Rule, or Symbol of Faith. Nor thirdly, In the Inſtructions given to the Clergy concerning all thoſe things they were to teach the People. Nor fourthly, In the Examination of a Biſhop at his Ordination. Nor fifthly, In the antient Treatiſes deſigned to inſtruct Chriſtians in all the Articles of their Faith. Sixthly, From the Confeſſions of Romiſh Doctors. With an Anſwer to the Arguments of Mr Mumford for Tradition: And a Demonſtration that the Heathens made the ſame Plea from Tradition as the Romaniſts do; and that the Anſwer of the Fathers to it, do fully juſtify the Proteſtants.* Lond. 1689. 4to. X. *Irriſio Dei Pannarii Romanenſium. The Deriſion of the Breaden God worſhipped in the Romiſh Church, gathered out of the Holy Scriptures, the Apocryphal Books, and Writings of the Holy Fathers. To which is added, A Sermon preached at the Cathedral Church of Sarum the firſt Sunday in Advent,* 1715. Lond. 1716. 8vo.

(1) See an account of him in Wood Athenæ Oxon. vol. II. col. 1068, 1069.

the ſaid city (*c*). A very retired and ſtudious life, as our author's was, affords but few incidents worthy of notice. We are obliged therefore to confine ourſelves to what rendered him moſt famous, eminent, and uſeful in the world; namely, a particular account of his numerous writings, which, as they contain the hiſtory of his opinions, properly fall under the plan of this work. Beſides thoſe againſt Popery already mentioned, in 1683, he publiſhed '*The Proteſtant Reconciler*,' &c. [*D*] a work very unacceptable then, as 'pleading for condeſcenſion to Diſſenting Brethren;' at a time when the court was violently bent againſt them. Therefore his patron Biſhop Ward obliged him to make a retractation [*E*]. And, in the ſecond part, publiſhed the ſame year, he 'earneſtly perſuaded the diſſenting laity to join in full communion with the Church of England; anſwering all the objections of the Nonconformiſts againſt the lawfulneſs of their ſubmiſſion unto the rites and Conſtitutions of that Church.' So great an enemy as our Author was to Popiſh ſuperſtition and tyranny, he could not but rejoice at the acceſſion of K. William to the throne. In order to ſatisfy thoſe who ſcrupled to take the Oath of Allegiance to him, he wrote two treatiſes [*F*], mentioned more particularly below. He publiſhed next, in 1691, *A Diſcourſe confirming the Truth and Certainty of the Chriſtian Faith from the extraordinary Gifts and Operations of the Holy Ghoſt, vouchſafed to the Apoſtles and primitive Profeſſors of that Faith* [G]. But his capital and moſt conſiderable work, and the reſult, as he tells us (*d*), of fifteen years ſtudy, was, *A Paraphraſe and Commentary on the New Teſtament*, in two Volumes: The firſt containing the four Goſpels, and the Acts of the holy Apoſtles; the ſecond, all the Epiſtles, with a Diſcourſe

(*c*) Wood, Ath. as above, and Faſti, col. 189, and J. Le Neve's Faſti, p. 267.

(*d*) Preface.

[*D*] *The Proteſtant Reconciler, &c.*] The remainder of the title will beſt ſhew the true deſign of this book; which is thus... *Humbly pleading for Condeſcenſion to Diſſenting Brethren, in Things indifferent and unneceſſary, for the ſake of Peace: And ſhewing, How unreaſonable it is to make ſuch Things the Neceſſary Conditions of Communion. By a Well-wiſher to the Church's Peace, and a Lamenter of her ſad Diviſions.* Lond. 1683. 8vo.

This performance drew a violent ſtorm upon our Author from various parts, as appears by theſe ſeveral Anſwers publiſhed to it. The firſt was by Laur. Womack, D. D. * in his '*Suffragium Proteſtantium*: Wherein our Governors are juſtified in their impoſitions and proceedings againſt Diſſenters; Meiſner alſo, and the Verdict reſcued from the Cavils and ſeditious Sophiſtry of *The Proteſtant Reconciler*.' Our Author animadverts upon ſome parts of this Anſwer, in the ſecond edition of the firſt part of his Proteſtant Reconciler.—The 2d Anſwer was by David Jenner, B. D. ſome time of Caius college in Cambridge, afterwards Rector of Great Warley in Eſſex, Prebendary of Sarum, and Chaplain to the King, in his '*Bifrons*: or, a new Diſcovery of Treaſon under the fair Face and Maſk of Religion, and of Liberty of Conſcience,' &c. Lond. 1683-84. 4to. In which book in general, and in the title thereof, he ſaith, that the Author of the Proteſtant Reconciler deſigns nothing but to promote Anarchy and Confuſion in Church and State; that the Author is guilty of Treaſon, an encourager of the new Plot (the Preſbyterian or Proteſtant Plot, which broke out in June 1683) a giver out unto the People that the King and Governors were and are the Betrayers of their Liberties, and therefore deſerves death, &c. 3. The next Anſwer was intitled, 'An awakening Word to the Grand-jury-men of the Nation. To which is added, A brief Compariſon between *Daniel Whitby* and *Titus Oates*; the firſt protected in his virulence to ſacred Majeſty by one or two of his Fautors; the ſecond puniſhed for his abuſes of the King's only Brother, by the loyal Chief-Juſtice Jefferies. The firſt ſaved harmleſs in many Preferments (three of which are in one Church of Sarum) the ſecond fined in mercy no more than 10,000 pounds.' Lond. 1683. 4to. In this pamphlet, which is a very virulent thing, as A. Wood obſerves (2), the Author ſaith, that after Dr Whitby had publiſhed *The Proteſtant Reconciler*, the people did nickname him *Whigby*, that alſo he was ſuſpended, and at length made a pretended Recantation, which coſt him nothing but the pleaſure of outwitting his governors, by a part acted in a comical way, &c. 4. About the ſame time was publiſhed a pamphlet, intitled, 'Three Letters of Thanks to *The Proteſtant Reconciler*, 1. From the Anabaptiſts at Munſter. 2. From the Congregations in New England. 3. From the Quakers in Penſylvania.'—But this was not all; for it is one of the books cenſured in the Oxford Decree, made 21 July 1683, for theſe falſe, ſeditious, and impious Doctrines,—"It is not lawful for Superiors to impoſe any thing in the worſhip of God that is not antecedently neceſſary.——"The duty of *not offending a weak brother*, is inconſiſtent with all human authority of making laws concerning indifferent things (3)." And in purſuance of this cenſure, the book was burnt in the quadrangle of the Univerſity-ſchools (4).

* He was Archdeacon of Suffolk, and conſecrated Biſhop of St David's November 11, 1683.

(2) Col. 1071.

[*E*] *His patron Biſhop Ward obliged him to make a Retractation.*] That Retractation was in the following words. 'Oct. 9, 1683. I Daniel Whitby, Doctor of Divinity, Chantor of the Church of Sarum, and Rector of the Pariſh Church of St Edmund's in the City and Dioceſe of Sarum, having been the Author of a Book called *The Proteſtant Reconciler*, which through want of Prudence, and Deference to Authority, I have cauſed to be printed and publiſhed, am truly and heartily ſorry for the ſame, and for any evil influence it hath had upon the Diſſenters from the Church of England eſtabliſhed by Law, or others: And whereas it containeth ſeveral Paſſages which I am convinced in my Conſcience are obnoxious to the Canons, and do reflect upon the Governors of the ſaid Church, I do hereby openly revoke and renounce all irreverent and unmeet Expreſſions contained therein, by which I have juſtly incurred the cenſure or diſpleaſure of my Superiors: And furthermore, whereas theſe two Propoſitions have been deduced and concluded from the ſaid book, viz. 1. That it is not lawful for Superiors to impoſe any thing in the worſhip of God, that is not antecedently neceſſary: 2. The duty of not offending a weak brother is inconſiſtent with all human authority of making laws concerning indifferent things; I do hereby openly renounce both the ſaid Propoſitions, being falſe, erroneous, and ſchiſmatical, and do revoke and diſclaim all Tenets, Poſitions, and Aſſertions contained in the ſaid Book from whence theſe Poſitions can be inferred: And whereinſoever I have offended therein, I do heartily beg pardon of God, and the Church, for the ſame.

[*F*] *He wrote two Treatiſes.*] The firſt was, 'Conſiderations humbly offered for taking the Oath of Allegiance to King William and Queen Mary.' Lond. 1689. 4to. The ſecond was intitled, 'An Hiſtorical Account of ſome Things relating to the Nature of the Engliſh Government, and the Conceptions which our Fore-fathers had of it. With ſome Inferences thence made for the ſatisfaction of thoſe who ſcruple the Oath of Allegiance to King William and Queen Mary.' Lond. 1690. 4to. In this piece he maintains the original compact or eſtabliſhment of laws, by which the Kings of England were to govern, and the people to be governed; and obſerves, that we find throughout the hiſtory of our Kings, their election, or elſe their compact with the people, to have generally been conceived a thing proper to ſtrengthen their title to the crown, or at the leaſt to ſatisfy their people.

[*G*] *A Diſcourſe concerning the Truth and Certainty of the Chriſtian Faith, &c.*] This is only a ſhort Treatiſe of 29 pages, beſides a Preface of 4 pages. 4to. and ſeems to have been a ſermon, though it is not publiſhed as ſuch. It is full of learned quotations, as all his works are, which ſhew his very extenſive reading.

(3) Oxford Decree, Propoſ. 21, 22.

(4) Wood, Ath. vol. II. col. 1070, 1071.

of the Millennium [*H*]. To this great work, the following pieces of our author may be reckoned as ſo many parts or appendages. *The Neceſſity and Uſefulneſs of the Chriſtian Revelation* [*I*]. *An Anſwer to a Pamphlet, entitled*, Some Paſſages in Dr Whitby's Paraphraſe and Annotations on the New Teſtament, contrary to Scripture, &c. [*K*]. *A Diſcourſe concerning the true Import of the words Election and Reprobation; the extent of Chriſt's Redemption; the Grace of God; the Liberty of the Will; the perſeverance or defectibility of the Saints* [*L*]. *Four Diſcourſes on Election and Reprobation* [*M*]. *A Treatiſe on Original Sin; or, the Imputation of Adam's Sin to all his Poſterity* [*N*]. Upon the publication

[*H*] *A Paraphraſe and Commentary on the New Teſtament, &c.*] This great work was firſt printed in 1703, in folio; and reprinted ſeveral times ſince, having met with a good reception from the world. There is added, A Chronology of the New Teſtament, taken from Biſhop Lloyd's; and a Map of the Places mentioned in the Goſpels, Acts, or the Epiſtles. To the ... edition in 1710, there was ſubjoined an Appendix, containing *Examen Variantium Lectionum Johannis Millii, S. T. P. in Novum Teſtamentum:* or, an Examination of Dr John Mill's various Readings on the New Teſtament.... In this Examination our Author falls into a groundleſs panick, leſt the great quantity of various readings collected together by Dr Mills ſhould overthrow the authority of the holy ſcriptures.—The Author of A Diſcourſe of Free-thinking (5), did not fail to lay hold of ſo ſpecious an objection. ‘ Dr Mills,’ ſays he, ‘ has publiſhed a book containing all the various Readings of the New Teſtament he has been ‘ able to meet with; and they amount, according to ‘ a late Author, to above 30,000. How the Text of ‘ Scripture is affected by this work of Dr Mills, you ‘ may ſee by the late learned Critique of Dr Whitby, ‘ who in general thus declares his judgment of it. Says ‘ he, “ The vaſt quantity of various Readings collected by the Doctor, muſt of courſe make the mind “ doubtful or ſuſpicious, that nothing certain can be “ expected from books, where there are various Readings in every verſe, and almoſt in every part of every “ verſe.”—But the great Dr Bentley makes this very pertinent Remark, among others, on this ſubject (6). ‘ What is it that your Whitbyus ſo inveighs and exclaims at? The Doctor's labours, ſays he, make ‘ the whole Text precarious; and expoſe both the ‘ Reformation to the Papiſts, and Religion itſelf to ‘ the Atheiſts. God forbid! we'll ſtill hope better ‘ things. For ſurely thoſe various Readings exiſted ‘ before in ſeveral exemplars; Dr Mill did not make ‘ and coin them, he only exhibited them to our view. ‘ If Religion therefore was true before, though ſuch ‘ various Readings were in being, it will be as true ‘ and conſequently as ſafe ſtill, though every body ‘ ſees them. Depend on't; no truth, no matter of ‘ fact fairly laid open, can ever ſubvert true Religion.’

(5) Lond. 1713, p. 88.

(6) Remarks upon a Diſcourſe of Free-thinking by Phileleutherus Lipſienſis, part i. p. 64.

[*I*] *The Neceſſity and Uſefulneſs of the Chriſtian Revelation.*] The whole title is, ‘ A Diſcourſe of the ‘ Neceſſity and Uſefulneſs of the Chriſtian Revelation; ‘ by reaſon of the Corruptions of the Principles of ‘ Natural Religion among Jews and Heathens.’ Lond. 1705. 8vo. He had mentioned, in his Preface to the Goſpels (7), this Treatiſe, which might indeed have very properly made a part of that Preface, as a ſuitable Introduction to the New Teſtament; but, probably on account of its length, was omitted. In an Advertiſement to the Reader, he obſerves, That he did with ſome reluctancy diſcourſe in this Treatiſe of thoſe impure Practices which obtained among the Heathens, and which on that account might be offenſive to chaſte ears; but then (adds he) conſidering that all the Fathers who have written Apologies for Chriſtianity, or Confutations of the Religion of the Heathens, from Juſtin Martyr to Theodoret, have been as full in thoſe Diſcoveries, I thought their piety and prudence might be a juſt apology for doing the ſame thing, to the ſame good end; eſpecially, when the ſubject muſt have been imperfect, had this been omitted.

(7) p. xv.

[*K*] *An anſwer to a Pamphlet, &c.*] The whole Treatiſe was, ‘ *Reflections on ſome Aſſertions and Opinions of Mr Dodwell, contained in a Book, entitled,* An Epiſtolary Diſcourſe, proving from the ‘ Scripture and Firſt Fathers, that the Soul is a Principle naturally mortal. *Shewing the Falſehood and the pernicious Conſequences of them. To which is added,* “ *An Anſwer to a Pamphlet entitled,* Some Paſſages on “ Dr Whitby's Paraphraſe and Annotations on the “ New Teſtament, contrary to Scripture and the received Doctrine of the Church of England.” ~~Lond.~~ 1707. 8vo.

[*L*] *A Diſcourſe, &c.*] In this Diſcourſe he treats, 1. Of the true import of the words *Election* and *Reprobation*; and the things ſignified by them in the holy Scripture. 2. The extent of Chriſt's Redemption. 3. The Grace of God; where it is enquired, whether it be vouchſafed ſufficiently to thoſe who improve it not, and irreſiſtibly to thoſe who do improve it; and whether men be wholly paſſive in the work of their Regeneration? 4. The Liberty of the Will in a ſtate of Trial and Probation. 5. The Perſeverance or Defectibility of the Saints; with ſome Reflections on the State of Heathens, the Providence and Preſcience of God. Lond. 1710. 8vo.—They who had known his education might remember, as he obſerves (8), that he was bred up ſeven years in the univerſity under men of the Calviniſtical perſuaſion, and ſo could hear no other doctrine, or receive no other inſtructions from the men of thoſe times, and therefore had once firmly entertained all their doctrines. What induced him to alter his opinion, was a conference he had with a Phyſician, who ſaid, “ There was ſome cauſe to doubt the truth of Scripture; for, ſaith he, it ſeems plainly to hold forth the doctrine of abſolute election and reprobation, in the 9th chapter to the Romans, which is attended with more evident abſurdities than can be charged on them who queſtion the truth of ſcripture: and alſo ſeemeth as repugnant to the common notion which mankind have received of divine juſtice, goodneſs, and ſincerity, as even the ſaying that God conſidering man, *in maſſa perdita*, as loſt in Adam, may delude him with falſe miracles, ſeemeth repugnant to his truth. And reading in Mr Dodwell (9), that bold ſtroke, that St Paul being bred a Phariſee, ſpake there, and is to be interpreted, *ex mente Phariſæorum*, according to the doctrine of the Phariſees concerning Fate, which they had borrowed from the Stoicks; I ſet myſelf to make the beſt and the exacteſt ſearch I could into the ſenſe of the Apoſtle in that chapter, and the beſt help I had to attain the ſenſe of that chapter which I have given in my Paraphraſe, I received from a manuſcript of Dr Patrick, the late worthy Biſhop of Ely, on that ſubject. Thence I went on to examine all that was urged in favour of theſe doctrines from the holy ſcripture, and this produced one conſiderable part of theſe diſcourſes.”—He exhauſts this ſubject, as he doth moſt others that he takes in hand.

(8) In the Preface.

(9) Proleg. ad J. Stearn de obſtin. ſect. 41. p. 147.

[*M*] *Four Diſcourſes, &c.*] The whole title of this volume, is, ‘ *Four Diſcourſes, ſhewing*, I. *That the Apoſtle's words, Rom. 9. have no relation to any perſonal Election or Reprobation.* II. *That the Election mentioned in St Paul's Epiſtles to the Gentiles, is only that of the Gentiles to be God's Church and People.* ‘ III. *That theſe two Aſſertions of Dr John Edwards,* ‘ viz. 1. “ That God's Foreknowledge of all Futurities depends on his Decree, and that he foreknows “ them becauſe he hath decreed them. 2. That God “ did from all eternity decree the Commiſſion of all “ the Sins in the world; *are falſe, blaſphemous, and render God the Author of Sin.*” IV. *Being a Vindication of my Annotations from the Doctor's Cavils. To which is added in an Appendix, A ſhort Anſwer to the Doctor's Diſcourſe concerning the fixt Term of human Life.*’ Lond. 1710. 8vo.

[*N*] *The Imputation of Adam's Sin to all his poſterity, &c.*] The Doctor thinking this ſubject above vulgar capacities, and fit only for the learned, he therefore writ it in Latin, and publiſhed it with this title, *Tractatus de Imputatione divinâ Peccati Adami Poſteris ejus univerſis in reatum.* Lond. 1711. 8vo. In it he denies the imputation of Adam's ſin to his poſterity to have any fair ground in ſcripture; and thence proceeding to antiquity, he declares, that upon an impartial ſearch he found ‘ all the paſſages Voſſius ‘ had collected to be impertinent (10), or at leaſt inſufficient to prove the point; yea,’ proceeds he, ‘ I ‘ found

(10) Voſſius was very poſitive, that *Eccleſia Catholica ſic ſemper judicavit*; which he endeavours to prove by teſtimonies from Ignatius to St Auſtin. Hiſt. Pelag.

cation of Dr S. Clarke's Scripture Doctrine of the Trinity, our author, who had been of a different, and as it is called the orthodox, opinion (e), zealouſly embraced Dr Clarke's ſentiments upon that point; and publiſhed a Latin treatiſe, to prove, *That the Controverſies raiſed about the Trinity could not be certainly determined from Fathers, Councils, or Catholic Tradition* [O]. Likewiſe, *A Diſcourſe, ſhewing, That the Expoſition which the Ante-Nicene Fathers have given of the Texts alledged againſt the Reverend Dr Clarke, by a learned Layman,* [Mr Nelſon] *are more agreeable to the Interpretations of Dr Clarke, than to the Interpretations of that learned Layman* (f). And, *A Diſſuaſive from Enquiring into the Doctrine of the Trinity: Or the Difficulties and Diſcouragements which attend the Study of that Doctrine* [P]. *Modeſt Diſquiſitions upon Biſhop Bull's Defence of the Nicene Faith* †. Dr Waterland having attacked this *, our author publiſhed two Replies to him. His laſt piece upon this ſubject was his *Laſt Thoughts*, of which we ſhall give a further account preſently. When the Bangorian controverſy aroſe, our author liſted himſelf under Biſhop Hoadly's banners; and wrote on his ſide, *An Anſwer to Dr Snape's Second Letter to the Biſhop of Bangor* (g): And, *A Defence of the Propoſitions contained in the Lord Biſhop of Bangor's Sermon, from p. 11. to p. 17. And alſo, of what is ſaid in his Preſervative concerning real Sincerity, and our Title to the Favour of God* (h). Here may be placed another tract, very little known to have been Dr Whitby's, but which hath been attributed to him by ſeveral of the beſt and moſt knowing judges: and that is, *A ſhort View of Dr Beveridge's Writings, which may ſerve as a preliminary Diſcourſe to an Examination of his Articles* (i) [Q]. Beſides all which, he publiſhed, Six ſingle Sermons at different times [R]: and, 'Thirty-three Sermons upon the Attributes of God (k):' A volume of Sermons on ſeveral occaſions (l): And Twelve Sermons preached at the Cathedral Church of Sarum (m). Not to mention his Latin *Compendium of Ethics, or Moral Philoſophy, for the uſe of young Students at the Univerſity* (n). The laſt compoſition of our author, publiſhed after his deceaſe, was, *The laſt Thoughts of Dr Whitby* [S], *containing*
his

'found evidence ſufficient of the truth of that which 'Peter du Moulin plainly owns, that from the time 'of the Apoſtles to St Auſtin's time, all the eccleſiaſtical writers ſeem to write incautiouſly of this matter, and to incline to what he calls Pelagianiſm.'— And of this having made a Collection, he finiſhed this Treatiſe about the year 1690, though he did not think it adviſeable to publiſh it till 1711 (11).

(11) Preface to his Diſcourſe, mentioned in note [L].

[O] *A Latin Treatiſe, &c.*] The title is, *Diſſertatio de S. Scripturarum Interpretatione ſecundum Patrum Commentarios. In qua probatur, 1mo, Scripturam eſſe Regulam Fidei unicam, ex qua de omnibus Articulis Fidei creditu neceſſariis ad Salutem, judicium ferendum eſt. 2do, Patres ſive primævos, ſive ſubſequentes non eſſe idoneos S. Scripturæ Interpretes. 3tio, Non poſſe Controverſias de S. Trinitate motas ex Patribus, Conciliis, aut Traditione vere Catholica, certo definiri.* 8vo. 1714.

[P] *A Diſſuaſive from enquiring into the Doctrine of the Trinity, &c.*] This is a viſible imitation of another tract publiſhed by Biſhop Hare, under this title, 'The 'Difficulties and Diſcouragements which attend the 'Study of the Scriptures in the way of private Judgment; repreſented in a Letter to a young Clergyman.'——And the reaſons ſuggeſted by Dr Whitby againſt enquiring into the doctrine of the Trinity, are, The great difficulty of the work; of which the different methods taken by the moſt able managers of this controverſy afford a ſtrong preſumption. For why elſe, ſays he, do we find ſo many and ſo different ſchemes propoſed for explication of this myſtery?— The difficulty will be much enhanced, if we conſider, that there are ſeveral books upon this ſubject lying upon our hands, yet unanſwered, or at leaſt never anſwered to ſatisfaction.——But the greateſt difficulty ariſes from the Athanaſian Creed, concerning which he uſes this obſervation of Biſhop Taylor:.. 'If it 'were conſidered, how many people underſtand it 'not; how contrary to natural reaſon it ſeems; how 'little the *Scripture* ſaith of thoſe curioſities of explication; and how tradition was not clear on his ſide 'for the article itſelf, much leſs for thoſe forms and 'minutes... it had not been amiſs, if the final judgment had been left to Jeſus Chriſt (12).'——Laſtly, he ſhews the danger of enquiring too far into that doctrine: 'Conſider,' ſays he; 'ſeriouſly the great 'and conſtant trouble you may bring upon yourſelf, 'ſhould this your narrow ſearch pervert you, as it is 'ſaid it hath done Mr Whiſton and Dr Clarke, men 'of unqueſtionable ſincerity in their endeavours to 'find out the truth.—Upon all theſe accounts,' adds he, 'my advice is in the general, not to go far in the 'explication of that which, ſaith a learned Prelate, "is certainly very far beyond all our apprehenſions, " and ought therefore to be let alone."—Which any one may plainly ſee to be ironical. He concludes this treatiſe, by earneſtly recommending charity and mutual forbearance on both ſides.

(12) Liberty of Propheſ. p. 54.

[Q] *A ſhort View of Dr Beveridge's Writings, &c.*] This was occaſioned by the publication of a poſthumous Expoſition of the xxxix Articles of the Church of England, left in manuſcript by Biſhop Beveridge; and uſhered into the world by one Mr Gregory (13), whoſe covetouſneſs, or injudicious zeal, was a great hurt to the good honeſt Biſhop's reputation, as our Author well obſerves (14). 'I would not,' ſays he, 'if I 'could help it, ſpeak a word in diſadvantage to the 'Biſhop; who was certainly a learned, and an excellently pious and good man; but he that hath publiſhed theſe writings of his, which he never deſigned 'for that purpoſe, hath done the greateſt diſhonour 'to him, as well as brought the juſteſt diſgrace upon 'himſelf, for letting ſuch things paſs with ſuch commendation. He ſhould have commended the Biſhop 'for his great reading, zeal, vigilance and piety; and 'have *anſwered his obligations that way:* but for his 'principles, judgment, and reaſoning, by commending them, he hurt the Biſhop's true character, at the 'ſame time that he gives us his own.'

(13) See above the article [BEVERIDGE].

(14) Page 36.

[R] *Six ſingle Sermons at different times.*] They were, 1. Λογος της Πιςεως: An Endeavour to evince the Certainty of Chriſtian Faith in general, and of the Reſurrection of Chriſt in particular. Oxf. 1671. 8vo. 2. Sermon on Matth. vi. 9. 3. Sermon preached at the Cathedral Church of Sarum, 1680. on 2 Tim. iii. 5. Lond. 1685. 4to. 4. Sermon before the Militia of the County of Wilts, at their marching againſt the Duke of Monmouth, on Titus iii. 1. Lond. 1685. 4to. 5. Sermon preached at the Election of the Mayor of Saliſbury, on Romans xiii. 1. Lond. 1685. 4to. 6. Η λογικη Λατρεια. Or a Sermon proving that Reaſon is to be our Guide in the choice of our Religion; and that nothing ought to be admitted as an Article of Faith, which is repugnant to the common Principles of Reaſon, or is unintelligible to human Underſtanding. With an Appendix in Vindication of it. Lond. 1714. 8vo.

[S] *The laſt Thoughts of Dr Whitby, &c.*] This, as well as many others of our Author's tracts, begins with a Greek title, viz. 'Υςεραι Φροντιδες. Or, the laſt 'Thoughts of Dr Whitby, &c.' He informs us in the Preface, that 'when he wrote his Commentaries 'on the New Teſtament, he went on (too haſtily he 'owns) in the common beaten road of other reputed '*Orthodox* Divines: conceiving, firſt, that the Father, 'Son, and Holy Ghoſt, in one complex notion, were 'one and the ſame God, by virtue of the ſame *indi-*

his Correction of ſeveral Paſſages in his Commentary of the New Teſtament. To which are added Five Diſcourſes. Publiſhed by his expreſs order (o). — This learned man, after a ſtudious, diligent, and well-ſpent life, was taken out of the world, upon a very ſhort warning (the caſe of moſt old perſons) on the 24th day of March 1725-6, aged 88 years. He was very well, and at church, the day before his deceaſe; but, as he was returning home, being ſeized with a fainting, he died the night following (p). An. Wood gave him the following character, about the year 1691, long before our author's deceaſe. ‘He is a perſon very well read in the Fathers, and in polemical divinity, eſpecially as to the main part thereof, which is directed againſt the Papiſts. He hath been all along ſo wholly devoted to his ſeverer ſtudies, that he hath ſcarce ever allowed himſelf leiſure to mind any of thoſe mean and trifling worldly concerns which adminiſter matter of gain, pleaſure, reach, and cunning. Alſo, he hath not been in the leaſt tainted with thoſe too much now-a-days practiſed arts of fraud, couſenage, and deceit (q).’ To which a perſon who was well acquainted with him to the laſt adds theſe circumſtances. ‘He was in ſtature ſhort, and very thin; he had a tenacious memory even to the laſt, and always cloſely applied himſelf to his ſtudies. Towards the end of his life, his eye-ſight failing, he made uſe of an *amanuenſis*. He was ever ſtrangely ignorant of worldly affairs, to a degree that is ſcarce to be conceived [T]. He was eaſy, affable, pious, devout, and charitable (r).

(o) Lond. 1728, 8vo.

(p) Short Account of Dr Whitby, prefixed to his laſt Thoughts.

(q) Athen. col. 1068.

(r) Short Account, &c. as above.

‘*vidual* Eſſence communicated from the Father. “This confuſed notion,” adds he, “I am now fully convinced by the Arguments I have offered here, and in the ſecond Part of my Reply to Dr Waterland, to be a thing *impoſſible*, and full of groſs Abſurdities. And then, as a natural conſequence from this doctrine, I (ſecondly) concluded, that thoſe Divine Perſons differed only … *in the manner of their exiſtence*. And yet what that can ſignify in the Son, according to this doctrine, it will not, I think, be very eaſy intelligibly to declare. That the difference can be only *Modal*, even Dr South hath fully demonſtrated.”—Then, after ſome obſervations about the true meaning of the word *Perſon*, he concludes thus; ‘In a word, all other notions of the word *Perſon*, beſides the plain and obvious one, ſignifying a real and intelligent agent, have been already ſo excellently baffled and learnedly confuted [by Dr Clarke, Mr Jackſon, and others] that I own I am not able to reſiſt the ſhining evidence of truth: nor am I aſhamed to confeſs my former *Miſtakes* and *Errors* in theſe matters after ſuch ſtrong and irreſiſtible conviction, ſeeing, *Humanum eſt errare*, all men are liable to error. And as upon this principle, I cannot but think it the moſt groſs hypocriſy, after ſuch conviction, to perſiſt in a miſtake; ſo without queſtion, it is the greateſt abuſe of humility and free thinking, to attribute ſuch open and ingenuous acknowledgments to a wavering judgment or levity of mind.… Nothing but the love of truth can be ſuppoſed to extort this retractation [or change of opinion] from me, who having already lived ſo long beyond the common period of life, can have nothing elſe to do but to prepare for my great change; and in order thereunto to make my peace with God, and my own conſcience, before I die. To this purpoſe I ſolemnly appeal to the ſearcher of hearts, and call God to witneſs, whether I have *haſtily* or *raſhly* departed from the common opinion; or rather, whether I have not *deliberately* and *calmly* weighed the arguments on both ſides drawn from ſcripture and antiquity? As I have no views for this world, ſo it cannot be imagined, that the motives drawn from intereſt, ambition, or ſecular glory, can have any place with me. Or if I had, neither can it be imagined that I would chooſe to diſſent from the received opinion, the maintainers whereof are they who graſp honours and preferments, and think they have the beſt title to theſe advantages. So that upon the whole, if I have erred in changing my opinion, I deſire it may be obſerved, that my error hath neither prejudice nor ſecular views to ſupport it; and that my miſtake (if ſuch it will be reputed) hath been all along attended with conſtant prayers to the throne of grace, and what hath alway appeared to me to be the ſtrongeſt reaſon, and moſt undeniable evidence.… I conclude with thoſe words of St Auſtin: *Errare poſſum, Hæreticus eſſe nolo*; i. e. I may err, but I will not be a Heretick.’ However, he will not eſcape that imputation with many people: whether juſtly, or not, we leave to the reader's judgment.

§ 41. p. 147.

[T] *Ignorant of worldly affairs*, &c.] We have a ſtriking inſtance of this in the addreſs of the following letter (15).

‘To the Right Honourable Lady Vere.

‘Time and experience have already forced us to underſtand your departure, and find us now as ſad as ſolitary. I diſpute with myſelf, whether of the two I ſhould do firſt, thank God that we had you ſo long, or complain that you are gone ſo ſoon.

‘That bounty and exceſs you was ever guilty of to me, is encreaſed by the coming of ſix pound of excellent tobacco, all which lie upon my conſcience to be beyond my merit and reach of a juſt gratitude, had not he that made the ſoul accepted the utmoſt for proportion for himſelf.

‘Madam, I ſhall not trouble you with lines and paper payment, but ſerve you with my prayers, and ſeek thereby the welfare of your Honour and your numerous poſterity; humbly craving pardon of any carriage or word from me, not ſuitable to ſuch a preſent. I heartily thank your Honour for your kindneſs to myſelf and to my pariſh. Your legacy I received for the poor, 40l. God ſend you 100 fold in heaven.

‘Your moſt devoted
No date. ‘Servant,
‘DAN. WHITBY.’ C

Juſtices of the King's-Bench (*a*), by Elizabeth his wife, daughter of Edward Bulſtrode, of Hugeley, or Hedgley-Bulſtrode, in the county of Buckingham, Eſq; He was born, 6 Auguſt 1605, in Fleet-ſtreet, London, in the houſe of Sir George Croke, his mother's uncle, afterwards one of the Juſtices of the Common-Pleas; and educated in Grammar-learning in Merchant-Taylors ſchool. When he had properly improved himſelf there, he was admitted, in Michaelmaſs-term 1620, a Gentleman-commoner of St John's college in Oxford; at which time he was principally recommended to the care and overſight of his father's contemporary and intimate friend, Dr Laud, then Preſident of that houſe, who ſhewed him many kindneſſes. In return for which, many years after, when Dr Laud, then Archbiſhop of Canterbury, was to be brought to his tryal, Mr Whitelocke refuſed to be in the number of the Committee appointed by Parliament to draw up a charge againſt him [*C*]. Having laid a good foundation of general learning, he quitted the univerſity without taking a degree, and went to the Middle-Temple, where, by the help of his father, he became a great proficient in the Common law; not neglecting at the ſame time every other branch of polite and uſeful literature (*b*). In the midſt of his more ſerious ſtudies, he ſhewed a gallant turn of mind, by being one of the chief managers of the Royal Maſque, which was exhibited by the Inns of Court in February 1633, before K. Charles I. and his Queen, and their Court, at Whitehall [*D*]. To him in particular was committed the whole care and charge of the muſic for this great maſque, which was ſo well performed, that it excelled any muſic that had before that time been

(*a*) He was created a Serjeant in Trin. term, 1620, and made a Judge, 18 Oct. 1624. Dugdale's Chronica Series.

(*b*) A. Wood's Athen. edit. 1721. vol. II, col. 545.

ſize at Oxford, when ſome foreigners, perſons of quality, came into the court, on purpoſe to ſee the manner of our proceedings in matters of juſtice, he briefly repeated the heads of his charge to the grand jury in good and elegant Latin, and thereby informed the ſtrangers and the ſcholars there preſent, of the ability of the Judges, and the courſe of our proceedings in matters of law and juſtice. He very well underſtood the Greek and the Hebrew, was verſed in the Jewiſh hiſtories, and exactly knowing in the hiſtory of his own country, and in the pedigrees of moſt perſons of honour and quality in England, and was much converſant alſo in the ſtudy of antiquity and heraldry. He was not excelled by any in the knowledge of his own profeſſion of the Common Law of England, wherein his acquaintance with the civil law was a help to him. Several of his ſpeeches are printed in 'The Sovereign's Prerogative and the Subject's Privileges diſcuſſed, &c. in the 3d and 4th of King Charles I.' Lond. 1657, fol. And he alſo left in manuſcript, 'Lectures or Readings in the Middle Temple Hall, Aug. 2, 1619. on Stat. 21 Hen.VIII. c. 13.' and, 'Of the Antiquity, Uſe, and Ceremony of lawful Combats in England.' He died June 22, 1632, and in his death the King loſt as good a ſubject, his country as good a patriot, the people as juſt a judge as ever lived; all honeſt men lamented the loſs of him, and no man in his age left behind him a more honoured memory. His reaſon was clear and ſtrong, and his learning deep and general. King Charles I. gave him the character of being a ſtout, wiſe, and learned man, and one who knew what belonged to uphold magiſtrates and magiſtracy in their dignity (4).

(4) See our Author's Memorials, p. 11. 17, 18.

[*C*] *Mr Whitelocke refuſed to be in the number of the Committee appointed to draw up a charge againſt him.*] 'Of this Committee,' ſays Mr Whitelocke (5), 'I was one, and particularly ſummoned to attend that buſineſs, which I declined, and gave my reaſons to Mr Miles Corbett, the chairman of that committee, why it was not fit for me to appear in it, againſt one to whom I had been beholden for my education. This would not ſatisfy Mr Corbett, but ſtill he preſſed me and ſent for me to come and attend the committee, but I abſolutely refuſed it. This ſo diſpleaſed Mr Corbett, that he acquainted the Houſe with my neglect, and moved them earneſtly, that I might be required by their order to attend the ſervice of that committee, and to be one of thoſe that ſhould manage the evidence againſt the Archbiſhop. This was moved when I was in the houſe, and upon this alarm I held it fit for me to make my apology, and endeavour to be diſcharged from that employment, by urging that the Archbiſhop did me the favour to take a ſpecial care of my breeding at St John's College in Oxford, and that it would be diſingenuous and ungrateful for me to be perſonally inſtrumental to take away his life, who was ſo inſtrumental for the bettering of mine. Upon which the Houſe diſcharged me from this employment.'

(5) Memorials, p. 75.

[*D*] *Before King Charles I. and his Queen, and their court, at Whitehall.*] This was one of the moſt magnificent entertainments that can be imagined. Our author, who was one of the chief managers, and of the committee to contrive and prepare the whole affair, has given a large and circumſtantial account of it in his Memorials (6). . . . 'The firſt that marched were twenty footmen in ſcarlet liveries with ſilver lace, each one having his ſword by his ſide, a baton in one hand, and a torch lighted in the other hand; theſe were the Marſhal's men who cleared the ſtreets, made way, and were all about the Marſhal, waiting his commands. After them, and ſometimes in the midſt of them came the Marſhal, Mr Darrel, afterwards knighted by the King. . . . He was mounted upon one of the King's beſt horſes, and richeſt ſaddles, and his own habit was exceeding rich and glorious; horſemanſhip very gallant. . . . . After him followed one hundred Gentlemen of the Inns of Court, five and twenty choſen out of each houſe. . . . Every one of theſe hundred gentlemen were in very rich clothes, ſcarce any thing but gold and ſilver lace to be ſeen of them; and each gentleman had a page and two lacquies waiting on him in his livery by his horſe ſide: The lacquies carried torches, and the page his maſter's cloak. The richneſs of their apparel and furniture glittering by the light of a multitude of torches attending on them, with the motion and ſtirring of their mettled horſes, and the many and various gay liveries of their ſervants; but eſpecially the perſonal beauty and gallantry of the handſome young gentlemen, made the moſt glorious and ſplendid ſhew that ever was beheld in England. . . . . The torches and flaming huge flamboys borne by the ſides of each chariot, made it ſeem lightſome as at noon-day, but more glittering, and gave a full and clear light to all the ſtreets and windows as they paſſed by. . . . . The Queen did the honour to ſome of the Maſquers to dance with them herſelf, and to judge them as good dancers as ever ſhe ſaw; and the great ladies were very free and civil in dancing with all the Maſquers, as they were taken out by them. . . . . The perſons employed in this maſque were paid juſtly and liberally; ſome of the muſick had one hundred pounds a piece; ſo that the whole charge of the muſick came to about a thouſand pounds: The clothes of the horſemen, and the liveries of their pages and lacquies, which were at their own particular charge, were reckoned one with another at a hundred pounds a ſuit at the leaſt, and one hundred of thoſe ſuits to amount to ten thouſand pounds. The charges of all the reſt of the maſque, and matters belonging to it, were reckoned at as much more, and ſo the charge of the whole maſque, which was borne by the ſocieties, and by the particular members of it, was accounted to be above one and twenty thouſand pounds.'—— This famous maſque was owing to a hint given by the court to the chief of theſe ſocieties (viz. of the Temple, &c.) that ſuch a thing would be well taken from them; and ſome held it the more ſeaſonable, becauſe this action would manifeſt the difference of their opinion from Mr *Prynne*'s new learning, and ſerve to confute his *Hiſtrio-Maſtix* againſt Interludes.

(6) p. 19, &c.

heard in England (*c*). Being a Counſellor at law, he delivered with great applauſe, though unprepared, a charge at the quarter-ſeſſions at Oxford, in 1635. And was often conſulted by John Hampden, Eſq; when he came to be proſecuted for refuſing the payment of ſhip-money (*d*). At the beginning of the commotions in Scotland, he wanted not ſolicitations on the behalf of the Covenanters; but he perſuaded his friends not to foment thoſe growing public differences, nor to be any means of incouraging a foreign nation againſt their natural Prince; from whence he feared great and evil conſequences (*e*). He was choſen one of the Burgeſſes for Marlow, in the long Parliament, which met November 3, 1640. Towards the beginning of the ſeſſion, a debate ariſing about the writs of *Habeas Corpus*, upon which Mr Selden, and other members, who had been committed for their freedom of ſpeech in the parliament of 1628, demanded to be bailed, and had been refuſed: this was ſo far aggravated by ſome, that they moved, Mr Selden, and the reſt, might have reparation out of the eſtates of thoſe judges, who then ſat in the King's-Bench. And they being named to be Hyde, Jones, and Whitelocke, our young member ſtood up in defence of his father, and vindicated him (*f*). When the Earl of Strafford came to be impeached by the Commons of high-treaſon, Mr Whitelocke was choſen Chairman of the Committee appointed to draw up articles, and manage the evidence againſt him. All the papers relating thereto were delivered into his cuſtody; but a very material one was conveyed away by the Lord Digby to the Earl [*E*], which brought a ſuſpicion of treachery upon Mr Whitelocke, though he was ſufficiently cleared afterwards, when that paper was found in the King's cabinet at the battle of Naſeby (*g*). In 1641, during the debates about the Militia, he made an excellent ſpeech, wherein he declared it as his opinion, That the power of the Militia was neither in the King alone, nor in the Parliament, but jointly in both (*h*) [*F*]. All accommodations about that important matter being found impracticable, which Mr Whitelocke appears to have earneſtly wiſhed for; and he being apprehenſive of the enſuing miſeries and troubles, ſpoke againſt raiſing an army for the pretended defence of the parliament; and ſenſibly deſcribed the calamities of a civil war [*G*]. However being of a very flexible diſpoſition,

(*h*) Memorials, p. 55.

[*E*] *But a very material one was conveyed away by the Lord Digby to the Earl.*] See above the article VANE [HENRY] Note [*F*] p. 3991. of Part I. of Vol. VI.

[*F*] *In* 1641, *during the debates about the militia, he made an excellent ſpeech, &c.*] The debate then was, 'Whether the power of the militia was ſolely in the King, and ought to be left to him; and the Parliament not to meddle with the ſame: Or, Whether it was ſolely in the Parliament, and if the King refuſed to order the ſame according to the advice of the Parliament, that then they by the law might do it without him?' Part of the ſpeech he made on that occaſion, was as follows: ..... 'It highly concerns us all, and our poſterity after us, where the power of this militia ſhall be placed. This great power, which indeed commands all men, and all things, cannot be too warily lodged, nor too ſeriouſly conſidered.... The power of the ſword *in manibus facinoroſorum*, in the hands of ſoldiers, is that whereof you now debate, and it is beſt out of their hands, I hope it will never come there. Some worthy gentlemen have declared their opinions, that this power of the militia is *by right and law in the King only*, others affirm it to be *in the Parliament only*; I crave pardon to differ from both theſe opinions. I humbly apprehend that this power of the militia is neither in the King only, nor only in the Parliament; and if the law hath placed it any where, it is both in the King and Parliament, when they join together.... That the power of the militia is not in the King only, appears in this, that the power of money is not in the King; but it will be granted here, that the power of money is ſolely in this houſe; and without the power of money to pay the ſoldiers, the power of the militia will be of little force. But if the power of the militia ſhould be in the King, yet the power of money being in the parliament, they muſt both agree, or elſe keep the ſword in the ſcabbard, which is the beſt place for it. It is true, that the King by his tenures may require the ſervice in war of thoſe that hold of him; but if they ſtay above 40 days with him, unleſs he give them pay, they will ſtay no longer. And it is alſo as true, that our law looks upon the King, as the Jewiſh law did upon theirs, that by his kingly office *he is to go in and out before the people*, and to lead them in battle againſt their enemies; but by the laws of the Jews, their King could not undertake a war abroad without the conſent of the great Sanhedrim. And by our law, as is declared by the ſtatute 1 Ed. 3. and by divers ſubſequent ſtatutes, the King can compel no man to go out of his country, but upon the ſudden coming of ſtrange enemies into the realm: and how many of our parliament-rolls do record that the King adviſed with his parliament about his foreign wars; and could not undertake them without the advice and ſupplies of the parliament.... But not to waſte more of your time, I ſhall conclude, that in my humble opinion, the power of the militia is neither in the King alone, nor in the parliament: but if any where in the eye of our law, it is in the King and Parliament both conſenting together. And I think it beſt it ſhould be there ſtill. I cannot join in that advice to you, to ſettle the militia of yourſelves without the King, but rather with thoſe worthy gentlemen who have moved, that we yet again ſhould petition his Majeſty, that the militia may be ſettled in ſuch hands as both He and You ſhall agree upon whom you may truſt (7).'

(7) Memorials, p. 55.

[*G*] *And ſenſibly deſcribed the calamities of a civil war.*] His ſpeech was as follows. 'Mr Speaker, the queſtion which was laſt propounded about raiſing of forces, naming a general and officers of an army, hath been very rare before this time in this aſſembly, and it ſeems to me to ſet us at the pit's brink, ready to plunge ourſelves into an ocean of troubles and miſeries, and if it could be, into more than a civil war brings with it. Give me leave, Sir, to conſider this unhappy ſubject in the beginning, progreſs, and iſſue of it. Cæſar tells us (and he knew as much of civil war as any man before him) that it cannot be begun *ſine malis artibus*. Surely, Sir, our enemies of the Popiſh church have left *no evil arts* unaſſayed, to bring us to our preſent poſture, and will yet leave none unattempted to make our breaches wider, well knowing that nothing will more advance their empire, than our diviſions. Our miſery, whom they account *Hereticks*, is their joy, and our diſtractions will be their glory, and all evil arts and ways to bring calamities upon us they will eſteem meritorious. But, Sir, I look upon another beginning of our civil war; God bleſſed us with a long and flouriſhing peace, and we turned his grace into wantonneſs, and peace would not ſatisfy us without luxury, nor our plenty without debauchery: inſtead of ſobriety and thankfulneſs for our mercies, we provoked the Giver of them by our ſins and wickedneſs, to puniſh us (as we may fear) by a civil war, to make us executioners of divine vengeance upon ourſelves. It is ſtrange to note, how we have inſenſibly ſlid into this beginning of a civil war, by one unexpected accident after another, as waves of the ſea, which have brought us thus far: And we ſcarce know

'how,

diſpoſition, as will appear by the ſequel; and perhaps unwilling to ſee what he thought the moſt valuable rights of the nation tamely loſt; he ſuffered himſelf to be drawn away by the torrent. Accordingly he accepted of the office of Deputy-Lieutenant of the counties of Bucks and Oxford, in 1642 (*i*). And having a gallant company of horſe of his neighbours under his command, he diſperſed the Commiſſioners of array at Watlington; marched to Oxford, of which he was named a fit perſon to be Governor, and propoſed the ſecuring of that important place; but his advice was not followed. He alſo appeared among thoſe forces that oppoſed the King at Brentford (*k*). This open declaration coſt him dear; for his ſeat at Fawley-court was rifled and plundered by a party of Royaliſts [*H*]: which, as he ſays, he remembred only to raiſe a conſtant hatred of any thing that may in the leaſt tend to foment ſuch unhappineſs and miſery (*l*). In January 1642-3, he was one of the Commiſſioners at the treaty of peace at Oxford: wherein a good deal of the buſineſs lay upon him, and he had a great ſhare of favour and reſpect from his fellow-commiſſioners. Upon all overtures of peace, he induſtriouſly laboured to promote them, which might be ſome ground of his being ſo often employed by the Parliament in their treaties (*m*). In March, the Lords having propoſed, that a new committee ſhould be named to conſider of propoſitions of peace, and the Commons inſiſting to have that matter referred to the committee of both kingdoms; Mr Whitelocke obſerved, that in the debate ſome were averſe to any propoſitions at all for peace, which induced him to make an excellent peaceful ſpeech (*n*) [*I*]. He was one of the Aſſembly

‘ how, but from paper combates, by declarations, remonſtrances, proteſtations, votes, meſſages, anſwers and replies; we are now come to the queſtion of raiſing forces, and naming a general, and officers of an army. But what, Sir, may be the progreſs thereof, the poet tells you,

‘ Juſque datum ſceleri canimus, populumque po-
‘ tentem,
‘ In ſua victrici converſum viſcera dextra.

[Eſtabliſh'd violence, and lawleſs might,
Avow'd and hallow'd by the name of Right;
A race renown'd, the world's victorious lords,
Turn'd on themſelves with their own hoſtile
ſwords.]

‘ We muſt ſurrender up our laws, liberties, properties, and lives into the hands of inſolent mercenaries, whoſe rage and violence will command us, and all we have, and reaſon, honour, and juſtice will leave our land; the ignoble will rule the noble, and baſeneſs will be preferred before virtue, profaneneſs before piety. Of a potent people we ſhall make ourſelves weak, and be the inſtruments of our own ruin, *perditio tua ex te* will be ſaid to us; we ſhall burn our own houſes, lay waſte our own fields, pillage our own goods, open our own veins, and eat out our own bowels. You will hear other ſounds beſides thoſe of drums and trumpets, the clattering of armour, the roaring of guns, the groans of wounded and dying men, the ſhrieks of deflowered women, the cries of widows and orphans, and all on your account, which makes it the more to be lamented. Pardon, Sir, the warmth of my expreſſion on this argument, it is to prevent a flame, which I ſee kindled in the midſt of us, that may conſume us to aſhes. The ſum of the progreſs of the civil war, is the rage of fire and ſword, and (which is worſe) of brutiſh men. What the iſſue of it will be, no man alive can tell, probably few of us now here may live to ſee the end of it. It hath been ſaid, *He that draws his ſword againſt his Prince, muſt throw away the ſcabbard.* Thoſe differences are ſcarce to be reconciled: thoſe commotions are like the [redacted] once ſtirred, are not ſoon appeaſed. I wiſh the obſervation of the Duke de Rohan in his Intereſt of Chriſtendom, may prove a caution, not a prophecy. He ſaith of England, *That it is a great creature, which cannot be deſtroyed, but by its own hand.* And there is not a more likely hand than that of civil war to do it. The iſſue of all war is like a caſt at dice, none can tell upon what ſquare the *alea belli* [chance of war] will light. The beſt iſſue that can be expected of a civil war, *ubi victor flet, & victus perit,* [where the conqueror weeps, and the conquered periſhes] which of theſe will be our portion is uncertain, and the choice would be avoided. Yet, Sir, when I have ſaid this, I am not for a tame reſignation of our religion, lives, and liberties, into the hands of our adverſaries, who ſeek to devour us. Nor do I think it inconſiſtent with your great wiſdom, to prepare for a juſt and neceſſary defence of them. It was truly obſerved by a noble gentleman, “That if our enemies find us provided to reſiſt their attempts upon us, it will be the likelieſt way to bring them to an accord with us.” And upon this ground I am for the queſtion. But I humbly move you to conſider, whether it be not yet too ſoon to come to it. We have tried by propoſals of peace to his Majeſty, and they have been rejected: Let us try yet again, and appoint a committee who may review our former propoſitions. And where they find the matter of them (as our affairs now are) fit to be altered, that they preſent the alterations to the Houſe, and their opinions; and that as far as may ſtand with the ſecurity of us and our cauſe, we may yield our endeavours to prevent the miſeries which look black upon us, and to ſettle a good accommodation; ſo that there may be no ſtrife between us and thoſe of the other party; for we are brethren (8).’

[*H*] *For his ſeat at Fawley-court was rifled and plundered by a party of Royaliſts.*] Sir John Biron, and his brothers, who commanded a body of about 1000 of the King's horſe, gave order, that they ſhould commit no inſolence at Mr Whitelocke's houſe, nor plunder his goods. But ſoldiers (as he obſerves) are not eaſily governed againſt their plunder, or perſuaded to reſtrain it. For there was no inſolence or outrage uſually committed by common ſoldiers on a reputed enemy, which was omitted by theſe brutiſh fellows at his houſe. They ſpent and conſumed 100 loads of corn and hay, littered their horſes with ſheaves of good wheat, and gave them all ſorts of corn in the ſtraw. Divers writings of conſequence, and books which were left in his ſtudy, ſome of them they tore in pieces, others they burnt to light their tobacco, and ſome they carried away with them, to his extreme great loſs and prejudice, in wanting the writings of his eſtate, and loſing very many excellent manuſcripts of his father's and others, and ſome of his own labours. They alſo broke down his park-pales, killed moſt of his deer, carried off, or ſpoiled, his furniture, &c. But he had afterwards 2000l. ordered him, for his arrears and charges: and had ample amends made him, by being conſtituted one of the Commiſſioners of the Treaſury, and of the Great Seal (9).

[*I*] *Which induced him to make an excellent peaceful ſpeech.*] He hath in it theſe ſtriking paſſages. ‘ . . . It would be no wonder to ſee an unanimous concurrence of the whole houſe in furthering propoſitions for a good peace. The calamities of our diſtractions have brought us to it, and who is there amongſt us, that hath not in ſome meaſure felt the ſtrokes of them? I am ſure, Sir, I have ſmarted by them. . . . The land is weary of our diſcords, being thereby polluted with *our* blood. . . . In all ſucceſſes, whether of the one or the other party, the poor Engliſh are ſtill ſufferers. Whoſe goods (I pray Sir) are plundered? whoſe houſes are burnt? whoſe limbs are cut, or ſhot off? whoſe perſons are thrown into loathſome dungeons? whoſe blood ſtains the walls of our towns, and defiles our land? Is it not all ‘ Engliſh?

(8) *Memorials,* p. 60, 61.

(9) See his Memorials, p. 65. 232. &c.

Aſſembly of Divines (o): and in their debates for ſettling the government of the church, he delivered his opinion againſt the divine right of Preſbytery (p); which notion he afterwards oppoſed in the houſe of Commons, and prevented them from being ſurprized upon this great queſtion, for which he received thanks (q). In 1644, he was conſtituted Lieutenant-governor of Windſor-caſtle (r). Both houſes of parliament having at length agreed upon the propoſitions for peace, Mr Whitelocke was appointed one of the committee to carry them to the King at Oxford. His Majeſty ſeemed to expreſs a particular regard for him; ſtiling him, and Mr Holles, meſſengers of, and wiſhers to, peace. And when they were about coming away, the King deſired them to ſet down in writing, what they apprehended might be fit for him to return in anſwer to their meſſage, and was in their judgments likely to facilitate the good work of peace. Accordingly, going into a private room, and varying his hand, he wrote down what he and Mr Holles judged to be fit for the ſubſtance of his Majeſty's anſwer to the propoſals of peace they had brought; and left it upon the table of his withdrawing-room (s). But this affair had like to prove their ruin. For it coming to the knowledge of the Lord Saville, who was then with the King at Oxford, and revolted afterwards to the parliament, that inconſtant Lord ſent to the Commons an accuſation of high treaſon againſt Mr. Holles and Mr. Whitelocke, on account of that paper, the ſecond of July 1645. They were perſecuted with all eagerneſs, and defended themſelves with ſo much conſtancy, mutual fidelity, and convincing evidence, that, after a long and ſtrict examination, they were clearly acquitted by a vote of the Houſe, on the 21ſt of July, of any miſdemeanour in this buſineſs, and left at liberty to proſecute, if they pleaſed, for damages, the Lord Saville, then a priſoner in the Tower (t). To return to ſome particulars that happened in the mean time: The Scottiſh Commiſſioners finding that Oliver Cromwell, by ſome words he had dropped, was no friend to their nation, nor the government of their Church; and the Lord General Eſſex growing jealous that he was endeavouring to ſupplant him; a private conſultation was had, whether he could not be proceeded againſt as an incendiary. Mr Whitelocke, who was preſent, declared it as his opinion that he could not [K] (u). It is ſaid, he gave Oliver timely notice of the deſign, and thenceforth became very gracious with that moſt active perſon (w). But he ſays himſelf, that at this debate, ſome who were preſent were falſe brethren, and informed Cromwell of all that paſt among them (x). He was not for the ſelf-denying ordinance, and made a ſpeech againſt it (y). In the beginning of the year 1645, he was appointed one of the Commiſſioners at the Treaty of Uxbridge, and attended there. And on the 6th of Auguſt following, when the Houſe of Commons was in debate about ſending propoſitions of peace to his Majeſty, he furthered them as much as he could (z). He had been, the laſt year, nominated Attorney of the Duchy of Lancaſter, and ſo he was, on the 15th of April 1645, one of the Commiſſioners of the Admiralty: and December 16, Steward of the revenues of Weſtminſter College (aa). When the Preſbyterians were ſtriving to have the power of excommunication and ſuſpenſion from the ſacrament veſted in themſelves, he oppoſed it in the Houſe of Commons [L], for which they much cenſured, and termed him an Eraſtian (bb). Upon ſeveral occaſions he ſhewed himſelf a lover of learning. As for inſtance, in order to preſerve the Lord Keeper Lyttleton's books and manuſcripts from being ſold and diſperſed by the Sequeſtrators, as they would have been, he procured an order from the Houſe of Commons, that ſuch as could be diſcovered ſhould be beſtowed upon him: and by that means he ſaved them to have the preſent uſe of them, reſolving, when-

'Engliſh? and is it not then time for us who are 'all Engliſhmen, to be weary of theſe diſcords, and 'to uſe our utmoſt endeavours to put an end to 'them? .... Whilſt we differ upon the Committee, 'we loſe the buſineſs, and do not purſue peace. I am 'perſuaded, Sir, you can hardly name any Com'mittee, either within or without theſe walls, but 'would be ready to take pains to effect this good 'work, unleſs it were thoſe who have ſaid, "That if "this war be well managed, it may laſt 20 years." 'But thoſe were not Engliſhmen: and although we 'have Iriſh, French, Dutch, and Walloons, as well 'as other Papiſts, engaged for the ſettlement of the 'Proteſtant Religion, and Laws of England; yet I 'am perſuaded, that his Majeſty and you mutually 'endeavouring (as it is both your intereſts) none can 'hinder it.'—— He concludes, '.... Let us con'ſent to any thing that is juſt, reaſonable, and honour'able, rather than in the leaſt to neglect to ſeek peace, 'and to enſue it (10).'

(10) Memorials, p. 84.

[K] *Mr Whitelocke, who was preſent, declared it as his opinion that he could not.*] The ſubſtance of what was ſaid at that conſultation is preſerved by our Author in his Memorials (11). And he then declared, that he had not heard any particulars, nor did he know any in his private obſervations, which would amount to a clear proof of ſuch matters as would ſatisfy the Houſe of Commons in the caſe of Lieutenant General Cromwell (and according to our law, and the courſe of proceedings in our parliament) that he was an *Incendiary*, and to be puniſhed accordingly. At the ſame time he gave this character of him. 'I take 'Lieutenant General Cromwell to be a gentleman of 'quick and ſubtle parts, and one who hath (eſpe'cially of late) gained no ſmall intereſt in the Houſe 'of Commons, nor is he wanting of friends in the 'Houſe of Peers, nor of abilities in himſelf to ma'nage his own part or defence to the beſt advantage. 'If this be ſo, it will be the more requiſite to be well 'prepared againſt him before he be brought upon the 'ſtage, leſt the iſſue of the buſineſs be not anſwerable 'to your expectations.'

(11) P. 116, and 117.

[L] *When the Preſbyterians were ſtriving to have the po*[illegible]*xcommunication, &c. he oppoſed it.*] In his ſpeech upon that occaſion, he has theſe words.... 'Thoſe who are *ſcandalous* ſinners ought to be admo'niſhed to forſake their evil ways; and to amend their 'lives; and where can they receive this admonition, 'and hope for more conviction of their conſciences, 'than by hearing good ſermons, and being admitted 'to be partakers of the holy ordinances? but to *ex'communicate* them, deprives them wholly of the beſt 'means for their cure. The beſt *excommunication* is 'for *paſtors, elders*, and *people*, to *excommunicate* ſin 'out of their own hearts and converſations: to *ſuſ'pend* themſelves from all works of iniquity, this is 'a power, which put in execution, will prevent all 'diſputes about *excommunication* and *ſuſpenſion* from 'the ſacrament (12).'

(12) Memorials, p. 170.

ever

ever there was a happy accommodation, to reſtore them to the owner, or to ſome of his family. Neither was he leſs uſeful in preſerving the Herald's office, being one of the committee, and very active in promoting the ordinance, for ſettling and regulating that office; though great oppoſition was made by the lower levelling claſs of the then ruling powers, who were but of yeſterday. He cauſed alſo the manuſcripts and books at Whitehall (becauſe of the ſoldiers being there) to be removed to St James's-houſe, that thoſe rare monuments of learning and antiquity might be preſerved. And at the ſiege of Oxford, where he attended General Fairfax, and was one of his council of war, being a friend to the univerſity wherein he had been educated, and undeniably a man of conſiderable learning; he uſed all his intereſt to have honourable terms granted to the beſieged garriſon, and that the colleges and libraries ſhould not be hurt or plundered *(cc)*. Ever ſince the latter part of the year 1645, he appears to have departed from the ſpirit of true patriotiſm, and to have reſorted with the worſt incendiaries, Sir Henry Vane, and "other Grandees of that party;" to uſe his own words *(dd)*. He was thenceforth highly courted by Cromwell and his adherents, who began to make uſe of his advice in many points. As he had attended at the ſiege of Oxford, ſo did he alſo at that of Wallingford; where he acted the part of ſecretary *(ee)*: and kept a ſtrong garriſon in his ſeat of Phyllis-court, for the uſe of the then prevailing powers *(ff)*. In Dec. 1646, we find him earneſtly promoting the ordinances, for taking away all coercive power of committees; and all arbitrary power from both or either of the houſes of parliament, or any of their committees, in any matter between party and party: judging that to be for the honour of parliament, and the eaſe and right of the people *(gg)*. And being well ſkilled in foreign affairs, he was uſually in every committee relating to them *(hh)*. At the ſame time he applied himſelf cloſely to his practice of the law, and attended the aſſizes, much to his profit, as may be ſeen in his Memorials *(ii)*. When his old friends, Sir Philip Stapleton, Denzil Holles, Eſq; Recorder Glyn, and others, came to promote eagerly the diſbanding of the greateſt part of the army [*M*], he, whoſe flexible diſpoſition, and perhaps ambition and covetouſneſs, drew him always to the ſtrongeſt ſide, declared againſt that meaſure; believing, as he ſaid, and very likely knew, that the army would not ſubmit to it, and ill conſequences might follow. This highly ingratiated him with 'Cromwell 'and that party, who entertained him with all reſpect and affection, and highly courted 'him *(kk)*.' The patriot party in the Houſe of Commons wanting to get rid of Mr Whitelocke, moved, that he might be ſent Lord Juſtice into Ireland, to exerciſe the civil government; but he was not free to undertake that charge. And Cromwell and his adherents were againſt his going away, deſiring his company more than formerly, and began to uſe his advice in many things. In September 1647, the city of London were very deſirous of having him for their Recorder; which he declined upon ſome frivolous pretences [*N*]: but his chief reaſon was, becauſe he waited to be one of the Commiſſioners of the Great Seal; which he was accordingly appointed in March 1647-8, for one whole year, being agreed upon before-hand by a private junto of Cromwell's party *(ll)* [*O*]. For the ſame reaſon, he declined being Speaker of the Houſe of Commons *(mm)*. He was ſworn into his office of Commiſſioner of the Great Seal, April 12,

[*M*] *When his old friends ..... came to promote the diſbanding of the army ...... he declared againſt that meaſure.*] The promoters of it had chiefly in view 'the *advantage* which they had in proſecuting this 'buſineſs, as that which would generally pleaſe the 'people, by ridding them of the ſoldiers, and eaſing 'them of the taxes.'—But obſerve, what canting reflections our author makes upon his own conduct, and the reſt of thoſe diſhoneſt perſons who were againſt diſbanding the army. ... 'This was not upon deſign 'or policy in them to come off to a new party, who 'might be thought more growing into *power* than the 'other, but it was their *clear judgment*. But what 'they gained with one party, they loſt with the other, 'neither continuing firm to them, who were not thorow paced in all things which they laboured to 'bring to paſs: but we ſhall find in all ſorts of buſineſs, that honeſty is the beſt policy, and a clear 'and ſincere dealing, according to [illegible]gment 'and conſcience, is ſeldom without a bleſſing accompanying it (13).'—He takes notice, in one place, that 'Divers cenſures paſſed upon the parliament, for 'their cow votes and reſolution to comply with a 'mutinous army, who had their pay and power from 'them (14).' But was not he equally liable to cenſure, for his cowardly and abject, or ſelf-intereſted behaviour?—Self intereſted, I call it; for it turned to his advantage upon many occaſions. Namely, it ſcreened him from being one of the eleven accuſed members of the Houſe of Commons (15): of being again called to an account upon the former accuſation of the Lord Saville, &c. (16)

[*N*] *Upon ſome frivolous pretences.*] The reaſons he gives, are theſe. 'The place being extremely full of 'trouble and clamour, and moſtly upon buſineſs of 'life and death, wherein I was not fully ſatisfied in 'ſome points of our law in criminal caſes, and caſes 'of blood, I took off my friends from naming me, 'eſpecially at this time, the city being ſo diſtracted 'and tumultuous (17).'

[*O*] *Becauſe he waited to be one of the Commiſſioners of the Great Seal, &c.*] He was appointed March 2, 1647. He tells us on that occaſion ... 'I can truly 'ſay I never heard of this buſineſs beforehand, nor 'was in the leaſt privy to it, or acquainted with it; 'but God was pleaſed ſo to order it, not my ambition 'that ſought or contrived it, for I may be believed on 'much experience that ſuch employments are not deſireable by a quiet and prudent ſpirit, they ſeldom 'afford quiet, never ſafety (18).' ... After he had taken the oath for that office ... 'I lifted up,' ſays he, 'my 'heart to God in prayer, that he would be pleaſed to 'direct me in the performance of my duty in this 'great employment, to his honour and the good of 'my country and of myſelf, and to preſerve me from 'all corruption and injuſtice in the execution of the 'place, and from all temptations and dangers unto 'which it is incident (19).' ... Some of the chief reaſons for his being put into that great employment, as we learn from himſelf, were, ... Becauſe 'the General [Fairfax] had an affection for him; and he had 'a good intereſt in the Houſe [of Commons], and 'Cromwell and his party were willing to engage him 'as far as they could with them (20).'

At the ſwearing of William Wilde, Chief Baron of the Exchequer, he made a very learned ſpeech about the antiquity, honour, and dignity of that court, and the Judges duty. Likewiſe, at the call of new Serjeants, he made another learned ſpeech upon the nature of their office (21).

with a ſalary of 1000 pounds a year; and took much contentment in the privacy and credit of it. On the 17th he reſigned his place of Attorney of the Duchy of Lancaſter (*nn*). He gives us a remarkable inſtance of his own and fellow-commiſſioners moſt laudable and exemplary diſpatch in the Chancery-buſineſs; That in the morning of one day they determined thirteen cauſes, and forty demurrers in the afternoon; and ſometimes ſat from five o'clock in the morning till five in the evening (*oo*). According to his own account, he was no gainer by accepting of the place of Commiſſioner of the Great Seal; for the profit of it was not above 1500 l. a year, whereas his practice in the law brought him before near 2000 l. per annum. He thought himſelf but unfixed and unſettled in that high poſt; looking upon the ſelf-denying ordinance, debated in parliament, 6 Auguſt 1648, as a deſign to remove him. And ſuch a deſign appears in October following, when he was ordered by the Houſe to be one of the Serjeants at law then called, and Attorney-general of the Duchy; though in words the Houſe did expreſs much favour and reſpect to him, and their compliments were too high for him to remember (*pp*). The army's force upon the Houſe of Commons drew ſome ſerious reflections from him [*P*]. And he had no great mind to ſit in that Houſe, as it was then conſtituted (*qq*). He was one of the Committee of Thirty-eight, named to conſider of drawing up a charge againſt King Charles I. but he never attended; being reſolved to avoid meddling in that bad affair; and therefore he went into the country, on purpoſe to be out of the way, and not be liable to be over-perſuaded or compelled (*rr*) [*Q*]. But, before that, he had aſſiſted at the mock-meeting of ſome of the members of the Houſe of Commons, to conſult about ſettling the kingdom by the Parliament, and not to leave all to the ſword (*ss*) [*R*]: which was done only to amuſe a great part of the nation. For the ſoldiery, under the influence of that ambitious tyrant Cromwell, were now come to a full reſolution to overthrow the government. He returned to London January 9, 1648-9, after the King's trial was begun, though he ſeemed not to be particularly concerned in it: and refuſed afterwards to approve the proceedings of the high Court of Juſtice. But he had meetings, and free diſcourſes, with Cromwell, about the then affairs and actions of the army, and the ſettlement of the kingdom; and expreſſed his readineſs to obſerve and obey the commands of the Houſe of Commons (*tt*). Notwithſtanding his ſeeming and pretended heſitation, about engaging in the changes that followed the King's tragical death, he ſoon ſwallowed them all: for, February 1, he declared in the Houſe of Commons his diſapprobation of the vote of December 5, 1648, 'That his Majeſty's conceſſions to 'the propoſitions of the parliament, were ſufficient grounds for ſettling the peace of 'the kingdom.' And drew the Act to take away the Houſe of Lords, though he had declared his opinion againſt it (*uu*). He alſo brought in a Declaration, to ſatisfy the people touching the proceedings of parliament (*ww*). Moreover, he ſubmitted to be one of the new Lords Commiſſioners of the Great Seal; for theſe reaſons: 'Becauſe he was already 'very deeply engaged with this party; That the buſineſs to be undertaken by him was 'the execution of law and juſtice, without which men could not live one by another; a 'thing of abſolute neceſſity to be done (*xx*).' Which was in effect the ſame as ſaying in plain words, that he thought no one in the nation qualified for that place but himſelf:

[*P*] *The army's force upon the Houſe of Commons drew ſome ſerious reflections from him.*] 'Some thought it,' ſays he, 'a piece of high aſſumption in the army, ſo 'often and ſo earneſtly to preſs the diſſolving of that 'authority, under which themſelves had ſo highly 'acted.'——And again, 'We may take notice of the 'incertainty of worldly affairs; when the parliament 'and their army had ſubdued their common enemy, 'then they quarrelled among themſelves, the army 'againſt the parliament; when they were pretty well 'pieced together again, then the apprentices and 'others made an inſurrection againſt the parliament 'and army. Thus we were in continual perplexities 'and dangers, and ſo it will be with all who ſhall 'engage in the like troubles (22).'

[*Q*] *He went into the country, on purpoſe to be out of the way, &c.*] The committee for the trial of the King, ſent for him, and Sir Tho. Widdrington, December 26, to come to them; having ſome matters of importance, wherein they deſired their advice and aſſiſtance, and that they muſt not fail them. 'I knew,' ſays our author, 'what the buſineſs was, and I told 'Sir Thomas Widdrington, that I was reſolved not 'to meddle in that buſineſs about the trial of the 'King, it being contrary to my judgment, as I had 'declared myſelf in the Houſe. Sir Thomas ſaid, 'he was of the ſame judgment, and would have no 'hand in that buſineſs.'—Therefore they withdrew together to Mr Whitelocke's houſe in the country (23). —'My name,' ſays our author, 'was not brought 'in among them [the reſt of the King's Judges], I 'having declared my judgment in the Houſe againſt 'this proceeding, and having abſented myſelf at the 'time of naming of them, and wholly from attending this committee, ſo that they knew my mind, 'and therefore did forbear to name me, though I 'was then in ſo great an employment under them. 'But I reſolved to hazard, or lay down all, how beneficial ſoever, or advantageous to me, rather than 'to do any thing contrary to my judgment and conſcience (24).'

The reſt of his ſentiments on that tragical occaſion, take in his own words... Upon the mob's calling out in Weſtminſter-hall for *juſtice and execution:* 'Here 'we may take notice of the abject baſeneſs of ſome 'vulgar ſpirits, who ſeeing their King in that condition, endeavoured in their ſmall capacity, further 'to promote his miſery, that they might a little curry 'favour with the preſent powers, and pick thanks of 'their then ſuperiors. Some of the very ſame perſons 'were afterwards as clamorous for juſtice againſt thoſe 'that were the King's judges. A Prince is not exempt from the venom of theſe mad dogs.'... 'I was 'much troubled at the paſſing of ſentence of death 'againſt the King, and heartily prayed that it might 'not be executed.——January 30, I went not to the 'Houſe, but ſtayed all day at home in my ſtudy and 'at my prayers, that this day's work might not ſo 'diſpleaſe God, as to bring prejudice to this poor 'afflicted nation (25).'

[*R*] *To conſult about ſettling the kingdom by parliament, &c.*] This meeting was at the Speaker's houſe, the 23d of December; ſome were wholly againſt any King at all, others were againſt having the preſent King, or his eldeſt, or ſecond ſon, to be King; others were for the third ſon, the Duke of Glouceſter, who was among them, and might be educated as they ſhould appoint, to be made King. He and Sir Thomas Widdrington ſpake their minds freely (26).

otherwiſe,

otherwiſe, there was no neceſſity for his taking it, more than any other man. The 14th of February 1648-9, he was nominated one of the Council of State: and June 13, choſen High-Steward, and Recorder of Oxford. Upon which he ſurrendered his office of Attorney of the Duchy on the 6th of July *(yy)*. At the inſtance of the learned Mr Selden, he undertook the care of the Royal Library and Medals at St James's; in order to prevent a deſign formed by ſome, to have them ſold and tranſported beyond ſea; which he thought would be a diſhonour and damage to this nation, and to all ſcholars here, and fearing that in other hands they might be more ſubject to imbezzling: this trouble therefore he undertook, to preſerve them for public uſe. John Dury, a German, a good ſcholar, and who had been a great traveller, was his Deputy-librarian *(zz)*. September 26, he was appointed one of the Governors for the School and Almshouſes at Weſtminſter: And in November following, oppoſed a motion made in the Houſe of Commons, That no Lawyers ſhould be of the Parliament *(aaa)*. The year following, in the debates upon the Act for putting all the books of the law, and the proceſs and proceedings in courts of juſtice into the Engliſh tongue, ſome having ſpoken in derogation and diſhonour of the laws of England, Mr Whitelocke ſtood up in defence of his gainful profeſſion, and endeavoured to prove, That our laws were not introduced by William the Conqueror *(bbb)*: which is true in part; but the worſt part of them, the tenures, were, and ſome of our common law ſtill is, a badge of that villainous conqueſt. September 9, 1651, he was appointed, with three other members of parliament, to go out of town to meet Ol. Cromwell on his way to London, and congratulate him upon his victory at Worceſter *(ccc)*. All oppoſition being fallen before the ambitious Cromwell, who was now arrived at the height of his wiſhes, he had a meeting, December 10, at the Speaker's houſe, with ſome members of parliament and officers of the army, to talk about the ſettlement of the nation; but with no other view in reality than to ſound their opinions and inclinations. Mr Whitelocke, who was preſent, delivered his ſentiments to this purpoſe: 'The laws of England are ſo interwoven with the power and 'practice of monarchy, that to ſettle a government without ſomething of monarchy in 'it, would make ſo great an alteration in the proceedings of our law, which they had 'ſcarce time to rectify, nor could they well foreſee the inconveniences that would ariſe 'thereby. Therefore he added, that there might be a day given for the King's eldeſt 'ſon, or for the Duke of York his brother, to come into the parliament; and, upon 'ſuch terms as ſhould be thought fit and agreeable both to our civil and ſpiritual liberties, 'a ſettlement might be made with them *(ddd)* [S].' In Nov. 1652, he repeated the ſame advice in a private conference with Cromwell, wherein he diſſuaded him from aſſuming the title of King, and perſuaded him to enter into a private treaty with Charles II *(eee)* [T]. This propoſal was very unpleaſing from the firſt to Cromwell, who thenceforward grew cool towards Mr Whitelocke, and had but little intercourſe and correſpondence with him. In order to get him out of the way, and deprive him of his office of Commiſſioner of the Great Seal, he was named one, and the chief, of the Commiſſioners for the adminiſtration of the civil government in Ireland. Arguments were not wanting to urge him to accept of it; as the great command, the honour, and the conſiderable profit of that employment. But as he perceived the offer proceeded rather from ill than good will, and that Cromwell was forward in it underhand, as not liking his advice abovementioned, and his noncompliance with his ſovereign pleaſure in ſome things, particularly in Chancery cauſes; he at firſt diſcreetly excuſed himſelf from that ſervice, which would have been no advancement either to his honour or profit, in a country too which he did not like. And when he was rather over-preſſed, he got himſelf off from being named, by a kind of reſolute denial *(fff)*. But not long after, Cromwell found occaſion by an honourable employment to ſend him out of the way, as ſome of his neareſt relations, particularly his daughter Cleypole, confeſſed, that he might be no obſtacle or impediment to his ambitious deſigns *(ggg)*. This we ſhall more particularly explain, after having taken notice of ſome other things wherein Mr Whitelocke was in the mean time concerned. When the two commonwealths of England and Holland began to quarrel, and the right of the fiſhery, and dominion of the Britiſh ſeas, came under debate, the maintaining of thoſe privileges was committed to him; [redacted] than any one was ſkilled in ſuch points, and in the hiſtory and antiquities of this nation *(hhh)*. He was very uneaſy and diſpleaſed at the

[S] *A ſettlement might be made with them.*] At this meeting, our author obſerves, the lawyers were generally for a mixt monarchical government, and many were for the Duke of Glouceſter to be made King; but Cromwell ſtill put off that debate, and came off to ſome other point; and in concluſion after a long debate, the company parted without coming to any reſult at all, only Cromwell diſcovered by this meeting the inclinations of the perſons that ſpake, for which he fiſhed, and made uſe of what he then diſcovered (27).

[T] *And perſuaded him to enter into a private treaty with Charles II.*] His advice was to this effect. 'This 'Prince being now, by your valour and the ſucceſs 'which God hath given to the parliament and to the 'army under your command, reduced to a very low 'condition; both he and all about him cannot but be 'very inclinable to hearken to any terms, whereby 'their loſt hopes may be revived of his being reſtored 'to the crown, and they to their fortunes and native 'country. By a private treaty with him you may 'ſecure yourſelf and your friends, and their fortunes, 'you may make yourſelf and your poſterity as great and 'permanent to all human probability, as ever any ſubject 'was; and provide for your friends. You may put 'ſuch limits to monarchical power, as will ſecure our 'ſpiritual and civil liberties; and you may ſecure the 'cauſe in which we are all engaged, and this may be 'effectually done, by having the power of the *militia* 'continued in yourſelf, and whom you ſhall agree 'upon after you. I propound therefore for your Excellency 'to ſend to the King of Scots, and to have a 'private treaty with him for this purpoſe,' &c. (28)

(28) Memorials, p. 550, 551.

army's beginning to ſet up for themſelves without the parliament; and always and earneſtly declared his judgment againſt this, as the moſt *dangerous* and moſt *ungrateful* thing that could be practiſed. The 20th of April 1653, he urged the ſame arguments, at a great meeting of parliament-men and officers in Cromwell's lodgings, and ſaid, That diſſolving the parliament would neither be warrantable in conſcience or wiſdom. Again, when it was propoſed, that a number, about forty, of parliament-men and officers of the army, ſhould be nominated and impowered by the parliament for the managing the affairs of the commonwealth 'till a new parliament ſhould meet, and ſo the preſent one to be forthwith diſſolved; he oppoſed this propoſal, and the more, fearing leſt he might be one of theſe forty; who he thought would be in a deſperate condition after the diſſolution of the parliament (*iii*). But notwithſtanding his own and his party's endeavours, the parliament was diſſolved in a rude and arbitrary manner by Oliver Cromwell [*V*]. And yet Mr Whitelocke tamely ſubmitted to all the ſubſequent changes of the government. He durſt not proceed in the buſineſs of the Great Seal, till after Cromwell and his council of officers had ſet forth a declaration of the grounds and reaſons for their diſſolving the late parliament; and that all civil officers ſhould proceed as formerly in the execution of their offices (*kkk*). Cromwell was ſo much offended with him, that he did not admit him into his Little, or firſt Parliament, which aſſembled in July 1653, and his great commiſſion was ſuperſeded, by the vote for taking away the Court of Chancery (*lll*). To remove him yet further, the honourable employment juſt hinted at before was contrived for him, as a kind of creditable exile: that was an embaſſy to the famous Chriſtina Queen of Sweden, which he was nominated to by Cromwell, Sept. 4, 1653, and voted in parliament ten days after. He received his commiſſion and inſtruction from the hand of the Speaker, the 29th of October; and having very expeditiouſly prepared himſelf, he ſet out from London Nov. 2d, embarked at Graveſend the 5th, ſailed the 6th, and, after a difficult paſſage, arrived at Gottenburgh the 15th (*mmm*). A few weeks after his departure, the Parliament having reſigned up their powers to the General Cromwell, he aſſumed the ſupreme legiſlative authority, under the title of Lord Protector of the Commonwealth of England, Scotland, and Ireland; and publiſhed his inſtrument of government, contrived, as is ſuppoſed, principally by Mr Whitelocke [*W*]. This great alteration at home made no alteration in his conduct; but he proceeded vigorouſly in the affairs of his embaſſy, notwithſtanding he met with great obſtructions from that pedant Queen Chriſtina; who, in his audiences, inſtead of hearkening to his buſineſs, entertained him with her crude notions of philoſophy, and with her balls and diverſions (*nnn*). In other reſpects ſhe ſhewed him and his ſons great civilities; and created him Knight of the order of Amarantha, of which ſhe herſelf was Sovereign, and wore as the badge of it a rich jewel tied to a crimſon ribband under her left breaſt (*ooo*). And on account of this Knighthood it was, that we ſometimes find him called Sir Bulſtrode Whitelocke. Having overcome all difficulties, he concluded a firm alliance between England and Sweden, about the beginning of May 1654 (*ppp*), before Queen Chriſtina's imprudent reſignation of her crown. And immediately ſetting out upon his return home, he came to Hamburgh June 10th, embarked at Gluckſtadt the 17th, and after a dangerous paſſage, having ſtruck upon a ſand near Yarmouth, he arrived in England the 28th. On the 6th of July he gave the Protector and his council a circumſtantial account of his embaſſy (*qqq*). As he valued his intereſt and ſafety too much to quarrel with Cromwell, tho' he did not approve all his meaſures; therefore he ſubmitted to all his changes, and was not only continued the firſt Commiſſioner of the great Seal, but alſo appointed, Auguſt 4, one of the Commiſſioners of the Exchequer, with a ſalary of 1000 *l.* a year. He was alſo Recorder of Briſtol (*rrr*). At the meeting of the Protector's ſecond parliament, Auguſt 4, in which he was choſen for the counties of

(*rrr*) Ib. p. 584. 597. 599.

[*V*] *The parliament was diſſolved in a rude and arbitrary manner by Ol Cromwell.*] He marched with a party of ſoldiers to the Houſe, and led a file of muſqueteers in with him; the reſt he placed at the door of the houſe, and in the lobby before it. In this manner entering the houſe, he in a furious manner bid the Speaker leave his chair, and told the houſe, 'That they had ſat long enough, unleſs they had done more good; that ſome of them were whoremaſters,' looking towards Henry Martin and Sir Peter Wentworth: 'that others of them were drunkards, and ſome corrupt and unjuſt men, and ſcandalous to the profeſſion of the goſpel, and that it was not fit they ſhould ſit as a parliament any longer, and deſired them to go away.'... Among all the parliament-men of whom many wore ſwords, and would ſometimes brag high, not one man offered to draw his ſword againſt Cromwell, or to make the leaſt reſiſtance againſt him; but all of them tamely departed the houſe. He bid one of his ſoldiers 'Take away that fool's bauble,' the mace; and ſtaid himſelf to ſee all the members out of the houſe, himſelf the laſt of them, and then cauſed the doors of the houſe to be ſhut up. 'Thus was this Great Parliament, which had done ſo great things, wholly at this time routed by thoſe whom they had ſet up, and that took their commiſſions and authority from them; nor could they in the leaſt juſtify any action they had done, or one drop of blood they had ſpilt, but by this authority. Yet now the ſervants roſe againſt their maſters, and moſt ingratefully and diſingenuouſly, as well as raſhly and imprudently, they diſſolved that power by which themſelves were created officers and ſoldiers; a[redacted] took what they deſigned, all power into their own hands (29).'

[*W*] *And publiſhed his Inſtrument of Government, contrived, as is ſuppoſed, principally by Mr Whitelocke.*] It was printed at the time in folio; and is inſerted in our author's Memorials (30). Many parts of it are well worthy the ſerious conſideration of more ſettled and better times. For inſtance, the number of burghs was abridged, and many of them were to ſend but one burgeſs; but the counties were to ſend ſeveral repreſentatives: as, 'For the county of Bedford, ſix; viz. For the town of Bedford, one. For the county of Bedford, five.——For the county of Berks, ſeven; viz. For the borough of Abingdon, one. For the borough of Reading, one. For the county of Berks, five.——For the county of Eſſex, ſixteen; viz. For the borough of Maldon, one. For the borough of Colcheſter, two. For the county of Eſſex, thirteen,' &c.

(30) p. 571.

Bucks, Oxford, and Bedford, he carried the purſe with the Great Seal before him; and on the 6th gave a particular narrative of his negotiations at the court of Sweden: for which he not only received the thanks of the Houſe, but had alſo 2000 l. ordered him for arrears of the expences of his embaſſy, and as a teſtimony of their favour and reward of his ſervices (*sss*), the payment of which, however, was not made good till Feb. 1656-7, with the addition of 500 l. He was ſo diligent in his attendance upon parliament, and gained ſo great an intereſt in it, that Oliver became highly diſpleaſed with him, among the reſt. And he grew jealous of him, with many of his former tools, ſuſpecting that their deſign at bottom was, to bring in the King; becauſe they declared for a truly free parliament, which was indeed the way for the King's reſtauration. And this, ſays he, began now to be held fit and requiſite by many ſober and faithful patriots, who were diſtaſted at Cromwell's private ambition and inſolent domineering (*ttt*). After the diſſolution of his Little Parliament, he and his council having framed an ordinance for the better regulating and limiting the juriſdiction of the high court of chancery, Mr Whitelocke and Sir Thomas Widdrington made ſhrewd obſervations upon its inconveniences, and declared that the obſervation of it was contrary to their own judgments and conſciences. Therefore, no worldly conſiderations could prevail upon him to execute an ordinance, which he looked upon as illegal (*uuu*). Accordingly, on the 6th of June, 1655, he reſigned the ſeal; for which he underwent various cenſures, but ſays, he never had cauſe to repent of that action. However, he obſerves, that his fortunes and intereſt then decreaſed; and now his former pretended dear friends and frequent viſitors withdrew themſelves, and began neither to own nor to know him: Such is the courſe of dirty worldlings! But the Protector, ſenſible of his harſh proceedings againſt him, for keeping to that liberty of conſcience, which he himſelf held to be every one's right, and that none ought to ſuffer for, by way of recompence made him one of the Commiſſioners of the Treaſury, with a ſalary of 1000 l. per annum (*www*), as we have hinted above. He alſo often adviſed with him in his greateſt affairs, and he was faithful in his advice, though ſometimes leſs pleaſing to Cromwell than the counſel of ſome others, who for their private ends would flatter him, and ſeldom differ from him in judgment, whereof he grew at laſt ſenſible. Particularly, the Protector ſeldom omitted to conſult him about his foreign affairs, wherein he thought him not unſerviceable, and did much follow his counſel. Often did Mr Whitelocke preſs him to have frequent parliaments, though contrary to the ſentiments and perſuaſions of others: But ſo far was he from taking it ill, that he conſtituted him, on the 2d of November, one of his council of trade; and nominated him, in the beginning of the year 1656, one of his Embaſſadors-extraordinary to Sweden (*xxx*). Though Mr Whitelocke declined that employment [*X*], yet he accepted of the office of being one of the Commiſſioners to treat with the Swediſh Embaſſador then in England. And, after long negotiations, of which we have a detail in his Memorials (*yyy*), a treaty was ſigned July 17th, between the Engliſh and Swedes. In the third parliament of Oliver Cromwell, which met September 17th, Mr Whitelocke was elected one of the Knights for the county of Bucks; and ſupplied the place of Speaker during Sir Thomas Widdrington's illneſs (*zzz*). He did not chooſe to preſent to the parliament The Humble Petition and Advice, &c. there being ſome things in it diſagreeable to him; but he was Chairman of the Committee appointed to confer with Cromwell about it, and he adviſed him among others, to take the title of King. But Cromwell durſt not aſſume it; being awed by the ſollicitations of the commonwealth party, and the fears of a mutiny and defection from the greateſt part of the army, whoſe threats ran very high (*aaaa*). At his ſolemn inauguration in Weſtminſter-Hall, June 26th, 1657, Mr Whitelocke rode by his ſon Richard, in one of the boots of the ſtate-coach, with a drawn ſword in his hand (*bbbb*). He ſeemed ſtill to be much in favour with the Protector, who adviſed with him about the beſieging of Dunkirk, and other important affairs. And he perſuaded the Protector to further the relief of the poor perſecuted Proteſtants in Piedmont. December 11th he received his writ of ſummons as one of the Lords of the other houſe. When Cromwell was about diſſolving that parliament, he diſſuaded him from it, telling him the danger of frequent diſſolution of parliaments, and what ſtraits it would bring him into for money. But his advice was not received: Nor was his application ſucceſsful, when he aſked for the Provoſtſhip of Eton College, a thing of good value, quiet and honourable, and fit for a ſcholar: Upon which occaſion he obſerves, that his ſervice was paſt, and therefore no neceſſity of a recompence. So thinking himſelf neglected, and not being ſatisfied with the public tranſactions, he lived much retired (*cccc*). April 23, 1658, he was one of the Committee for hearing appeals from Guernſey and Jerſey. And, three days after, nominated one of the Commiſſioners for the trial of Dr Hewet, and other conſpirators; but he never acted in that high court of juſtice, it being againſt his judgment, as he had before declared. He alſo waved the place of Governor of Dunkirk, of which overtures were made to him ſoon after. The laſt inſtance of the Protector's favour to him, was his ſigning, Auguſt 21ſt,

[*X*] *Though Mr Whitelocke declined that employment.*] His reaſons for ſo doing, take in his own words. 'I 'thought I had enough of danger and trouble in my 'former embaſſy, without the leaſt reward or acknowledgment of my ſervice therein; but inſtead thereof, 'and notwithſtanding the ſucceſs which God gave 'me, yet at my return home, I found neglects and 'ſlightings, and was removed from my place of 'Commiſſioner of the Seal, and was 500 l. out of 'purſe upon my accounts (31).'

(31) Memorials, p. 633.

a warrant

a warrant for a patent to make him a Viſcount, but Mr Whitelocke did not think it convenient to accept of that honour *(dddd)*. The 22d of January 1658-9, Richard, the new Protector, having a particular reſpect for him, made him one of the Keepers of the Great Seal, without any ſeeking of his own: and he was one of his Lords of the other houſe. The Protector conſulting him, with others, April 21ſt, whether it were not fit to diſſolve his Parliament; he [Mr Whitelocke] doubted the ſucceſs of it, and wiſhed they were permitted to ſit a little longer, eſpecially when they had begun to conſider of raiſing money, whereby they would engage the army. But the general council of officers having taken a reſolution to diſplace Richard, at that critical time Mr Whitelocke was wary what to adviſe in this matter, but declared his judgment honeſtly, and for the Protector's good, when his advice was required *(eeee)*. After the officers had aſſumed the government without a ſingle perſon, kingſhip, or houſe of peers, his office of Commiſſioner of the Great Seal ceaſed; but he was named one of the Council of State, May 13th. In thoſe diſtracted times, he was accuſed of holding a correſpondence with Sir Edward Hyde, and other friends and miniſters of Charles II. but he poſitively denied it, and deſired no favour if they could prove any ſuch thing againſt him; ſo the matter dropped. On the 5th of June he was named Commiſſioner, with Algernon Sydney and Sir Robert Honeywood, to go and mediate a peace between the Kings of Sweden and Denmark; but diſliking Sydney's haughtineſs and over-ruling temper, he got himſelf excuſed from that troubleſome buſineſs. Being Preſident of the Council of State, he was very active in taking meaſures to ſuppreſs the inſurrections of Sir George Booth, and others, about that time *(ffff)*. And joined in the votes for renouncing the pretended title of Charles Stuart, and the whole line of King James, and of every other perſon as a ſingle perſon pretending to the government of theſe nations. About this time he was promoting an union between the kingdoms of England and Scotland, for which he brought a bill into parliament the 30th of July. General Monk hearing, that the conduct of that union was left to Mr Whitelocke, he ſent him letters of high compliment, wherein he wiſhed he might ſee him in Scotland *(gggg)*. Happy would it have been for him if he had accepted of that invitation; as moſt probably a man of his good ſenſe would have joined the General in the King's reſtoration. But his ill fate kept him at home; where, October 22d, he was nominated one of the Committee of Ten, to conſider of fit ways to carry on the affairs of the government; and the 26th of the ſame month one of the twenty three members of the Committee of Safety, for the preſervation of the peace, and management of the preſent government, as alſo for the preparing of a form of government for theſe nations upon the foundation of a commonwealth: likewiſe, November 16, one of the Committee of Nineteen, to determine the qualifications of members of parliament. Moreover, the Great Seal was put again into his hands. And in theſe ſeveral capacities he acted, though with much doubtfulneſs and perplexity, and far from being ſatisfied with the juſtice and legality of his actions *(hhhh)* [*Y*]. General Monk, and many of his officers, having now declared for the remains of the Long Parliament, againſt the officers of the army in England, the Committee of Safety iſſued out commiſſions for raiſing new forces, and Mr Whitelocke accepted of one for a regiment of horſe: To counterbalance Monk's endeavours and proceedings, he and ſome of the principal officers repreſented, November 8, to the Lord Mayor and Common Council of London, that the bottom of his deſign was to bring in the King by a new civil war; the danger of which to the city and nation he repreſented; and adviſed them to provide for their own ſafety, and to unite for preſervation of the peace, and the ſafety of the whole nation. And when Lambert, deluded by Monk's pretenſions of peace, ſtopped the march of his forces northward, our author foreſeeing that Monk only ſought delays till he could bring up his army to London, wrote to Lambert, to advance ſpeedily with all his forces, and endeavour to attack Monk, and bring the matter to an iſſue, before he was better provided *(iiii)*: but his advice was not followed. The various tumults and inſurrections almoſt in every part of the nation now filled him with the utmoſt perplexity and diſtraction. He wiſhed himſelf well out of theſe daily hazards, but knew not how to diſentangle himſelf. At one time he much furthered the meeting of a new parliament; a proclamation for which came out the 15th of December. But being hurried with the repeated and certain advices, that Monk's deſign was to bring in the King without any terms for the Parliament-party, whereby all their lives and fortunes would be at the mercy of the King and his adherents, who were ſufficiently enraged, he went, December 22, to Fleetwood, and propoſed to him this alternative, Either to order all his forces to be drawn together, and himſelf and his friends to appear at the head of them, and ſee what ſtand they could make, or elſe immediately to ſend ſome truſty perſon to the King,

[*Y*] *And far from being ſatisfied with the juſtice and legality of his actions.*] See his doubts and ſcruples upon this occaſion, in his Memorials (32). What ſurmounted them, and prevailed upon him to act, was, That there was no viſible authority or power for government at that time, but that of the army; that if ſome legal authority were not agreed upon and ſettled, the army would probably take it into their hands, and govern by the ſword, or ſet up ſome form prejudicial to the rights and liberties of the people, and for the particular advantage and intereſt of the ſoldiery more than would be convenient. That knowing the purpoſe of Vane and others to be, to leſſen the power of the laws, and ſo to change them, and the magiſtracy, miniſtry, and government of the nation, as might be of dangerous conſequence to the peace and rights of this country, therefore, to prevent that, and to keep things in a better order and form, he might be inſtrumental in this employment (33).

(32) p. 685—688.

(33) Memorials, p. 686.

with offers of his own and his friends ſervices for reſtoring the King to his right, and that upon ſuch terms as the King ſhould agree upon; and he offered to go himſelf. But Fleetwood refuſing to do it without Lambert's conſent, who was at too great a diſtance, this propoſal dropped. The next day, Colonel Ingoldſby, and others, intimated to him, That his condition required he ſhould go to the King with the Great Seal: which overture he did not however comply with. The Rump Parliament being aſſembled December 26, he found that he was to expect no quarter from them; Scot, Nevil, and others, having threatened to take away his life; and Scot in particular having ſaid, that he ſhould be hanged with the Great Seal about his neck, for having acted in the Committee of Safety; therefore he thought it ſafeſt not to appear in the Houſe. However, the Speaker having by letter required his attendance, and uſed alſo perſuaſions, he came to the Houſe for about two days. But obſerving that many of his old acquaintance looked very cool upon him, and being informed of a deſign of ſome in the Houſe to queſtion him, and have him ſent to the Tower, he thought fit to provide for his own ſafety by retiring privately to a friend's houſe in the country. Before that he left order with his wife to carry the Great Seal to the Speaker; which ſhe did, locked up in a deſk, and gave him the key. She alſo burnt many of his papers relating to public affairs (*kkkk*). Such was the concluſion of the Lord Commiſſioner Whitelocke's various actings on the buſy ſcene of this world. As he had for many years, through the ſeveral revolutions that happened, joined always with K. Charles's profeſt enemies, the beſt he could expect was to be left unmoleſted, out of the world's obſervation. Accordingly he ſpent the remaining fifteen years of his life in a peaceable retirement [Z], moſtly at Chilton-park in the county of Wilts. It is ſaid, that he waited upon the King after his reſtauration, to beg his pardon for all that he had tranſacted againſt him; and that his Majeſty bid him, Go live quietly in the country, and take care of his wife and one and thirty children (*llll*). But it is hardly credible that he had ſo many children, though he had two wives. The firſt was Frances, daughter of William Lord Willoughby, of Parham, by his lady, Frances, daughter of John Earl of Rutland: ſhe died May 16, 1649 (*mmmm*). His ſecond wife was Rebecca, daughter of Thomas Bennet, Alderman of London. He was undoubtedly a man of conſiderable learning; endowed with many valuable qualities; of a tolerating ſpirit; (*nnnn*) an enemy to perſecution and cruelty; bewailed in private, and abhorred the national troubles, and the inſolencies of the army (*oooo*). But he was of too eaſy a nature, and yielding a diſpoſition, for the boiſterous times he lived in. He had not the neceſſary reſolution, vigorouſly and effectually to oppoſe what his own words and profeſſions declare he did not like: and conſequently is not he ſelf-condemned? Laſtly, we cannot forbear obſerving that he always ſided with the ſtrongeſt, and where moſt was to be gained; and therefore he is aptly ſtyled by ſome modern writers, That Temporizing Stateſman (*pppp*). The favourable character given of him by Lord Clarendon is ſet down below [*AA*].

WHITGIFT [JOHN] Archbiſhop of Canterbury, was ſon of Henry Whitgift, Merchant of Great Grimſby in Lincolnſhire, by Anne Dynewell, a young gentlewoman of good birth and reputation in that town, where he was born in the year 1530 (*a*). He was deſcended of the ancient family of the Whitgifts of Whitgift in the Weſt Riding of Yorkſhire, ſome of whom had been conſiderable benefactors to the Church [*A*]. But his grandfather John Whitgift, Gent. having a numerous family, and placing his ſons out in different ways of life, one of them [Robert] was bred to the church, and became Abbot of the Monaſtery of Wellow (*b*) near Grimſby. In this ſituation, as he applied himſelf to inſtruct young gentlemen in the firſt rudiments of learning, he took his Nephew (the ſubject of our preſent article) under his care. Here our author early imbibed an ill opinion of the Romiſh Church from this uncle, who often declared in his hearing, "That they and their religion could not long continue; becauſe he had read the whole Scripture over and over, and could never find therein that it was founded by God, which conſequently," ſaid he,

(*a*) Sir George Paul's Life of Abp Whitgift, p. 2. Mr Francis Thynne tells us he was born in 1533. But this muſt be a miſtake, ſince our author himſelf declares in the year 1590, that he was 60 years old.

(*b*) A monaſtery of Black Canons of the order of St Auſtin.

[*A*] *Some of whom had been benefactors to the church.*] January the 2d, 1308, John Fitz-Adams de Whitgift gave and granted to John de Gilling, Abbot of the monaſtery of St Maries in York, and to the reſt of the convent for ever, *quinque toſta & quatuor bovatas terræ cum omnibus ſuis pertinentiis, in villa de Stamburne*, or Stainburn (1).

(1) Strype's Life of Archbp Whitgift, &c. in the Appendix, No. I. Edition 1718, folio.

" cannot ſtand, ſince theſe are our Saviour's words, *Every Plant that my heavenly Father hath not planted ſhall be rooted up**." In the mean time obſerving the towardly genius of his nephew, he adviſed his father to ſend him to St Anthony's ſchool (c) at London. For this purpoſe he was lodged in St Paul's Church Yard at his aunt's, who had married one of the vergers of that church (d). While he was here [B], his aunt often importuned him to go to maſs, and procured alſo ſome of the canons of St Paul's to perſuade him to it; but having already ſome reliſh of the doctrine of the reformation, he conſtantly withſtood all their endeavours. By this his conduct ſhe grew at length ſo much exaſperated, as to turn him out of doors, imputing all her loſſes and domeſtic misfortunes to her harbouring of ſuch an heretic (as ſhe called him) under her roof; and at parting told him, that " ſhe thought at firſt ſhe had received a ſaint into her " houſe, but now ſhe perceived he was a devil." Thus rudely treated by his aunt, he repaired home to his father in Lincolnſhire, where his uncle the Abbot finding upon examination that he had made a good progreſs in grammar learning, adviſed the ſending of him to the univerſity. Accordingly he was ſent to Cambridge in the year 1548, or 1549, and placed firſt in Queen's college; but not liking the diſpoſition of ſome there, he was removed ſoon after to Pembroke-Hall, and put under the tuition of the celebrated John Bradford, the martyr, who was then lately choſen Fellow (e) of that ſociety. He had not been long here before he was recommended by his tutor and Mr Grindall, then Fellow (afterwards Archbiſhop of Canterbury) to the Maſter, Nicholas Ridley (f); by which means he was made ſcholar of that houſe, and choſen Bible-clerk. Theſe advantages were the more acceptable to him, as his circumſtances were then but indifferent, by reaſon of his father's great loſſes at ſea (g). Mr Bradford leaving Cambridge in the year 1550, our author fell under the care of Mr Gregory Garth, who continued his tutor while he ſtaid at Pembroke-Hall, from whence he went out B. A. in 1553-4 (h). But in 1555 being unanimouſly elected Fellow of Peter-houſe [C], he was admitted there in that quality by Thirlby, Biſhop of Ely, the 31ſt of May the ſame year (i). He commenced Maſter of Arts in 1557 (k). About this time he had a ſevere fit of ſickneſs; and ſoon after his recovery happened the remarkable viſitation of this univerſity by the authority of Cardinal Pole, in order to purge out the hereticks. To avoid the ſtorm [D], our author's firſt reſolution was to go to Straſburgh, Frankfort, or ſomewhere in Helvetia; but Dr Perne, the Maſter of his college, though at that time a profeſſed Papiſt, yet having a great eſteem for him, undertook to ſkreen him from the Commiſſioners [E], which prevailed on him not to leave the univerſity. The Maſter's promiſe was faithfully performed; and notwithſtanding the ſeverity of that viſitation, he eſcaped without any inquiry, by the connivance of his friend, who being then Vicechancellor, and ſhewing himſelf active in the preſent tranſactions, was the leſs ſuſpected to favour any but thorough devotees of Rome (l). In 1560 our author entered into holy orders, and ſoon after preached his firſt ſermon at St Mary's before the univerſity, upon Rom. i. 16. *I am not aſhamed of the goſpel of Chriſt*, &c. with general and great approbation (m). The ſame year he was appointed Chaplain to Dr Richard Cox, Biſhop of Ely, who gave him the rectory of Teverſham in Cambridgeſhire (n). In 1563 he proceeded Bachelor of Divinity; and Matthew Hutton, then Fellow of Trinity college, being appointed Regius Profeſſor of Divinity, the ſame year, our author ſucceeded him in the Margaret profeſſorſhip. Soon after this he joined with his brother Profeſſor and ſeveral Heads of Colleges, in a petition to Sir William Cecil, their Chancellor, for an order to regulate the election of public officers*, the want of which created great diſturbance in the univerſity at that time (o). Two years after this he diſtinguiſhed himſelf ſo eminently in the pulpit, that Sir Nicolas Bacon, then Lord Keeper, ſent for him to court to preach before the Queen, who heard him with great ſatisfaction (p), and gave

* Viz. the Vicechancellor, proctors, and taxers.

(o) Ibid. p. 8.

(p) Upon this occaſion her Majeſty deſcended to make a pun upon his name, ſaying, He had a white gift indeed. Paul, ubi ſupra, p. 8.

[B] *While he was here.*] As he bedded with another ſchool-boy, once coming hot and thirſty from ſchool, he drank ſome of his bedfellow's urine, thinking it to be beer, and yet he received no harm nor infection, notwithſtanding (as S. George Paul (2) relates) the boy had then the plague, and afterwards died of it.

[C] *Elected Fellow of Peter-houſe.*] He had not been here above two years, when he was ſeized with a ſevere fit of ſickneſs; upon which occaſion Dr Perne, Maſter of the College, having a great regard for him on account of his good parts, took care to have him carried to a houſe near the college, whither the Doctor came often to viſit him, and ſpoke to the woman of the houſe to let him want nothing, nor to ſpare any expence in providing every thing that was proper for him towards the recovery of his health; telling her, that if he lived, he would be able to defray the charge himſelf; and if in caſe of his death, aſſuring her, that he [the Doctor] would ſatisfy her and pay for every thing (3). The ſequel will ſhew our author's gratitude for this and the reſt of that gentleman's kindneſſes to him.

[D] *To avoid the ſtorm.*] Theſe Viſitors, in order to re-eſtabliſh Popery in the univerſity, made a ſtrict enquiry into the books of every ſtudent, and ſeizing ſuch as they judged heretical, burnt them in the market-place, together with the dead bodies of Bucer and Fagius, which were dug up for that purpoſe. Three days were ſpent in the ſearch, during which ſeveral ſuſpected members of the colleges were ſuſpended and reſtrained from taking pupils; ſome were deprived of all the privileges of voting, and orders were given for ſtopping the preferment of others (4), and particularly to oblige all ſuch as were qualified, to take the *firſt tonſure* [the firſt entrance into Popiſh orders]; and Mr Whitgift was one of theſe, being that year Maſter of Arts (5).

[E] *Having a great eſteem for him, undertook to ſkreen him from the Commiſſioners.*] The Doctor hearing of his purpoſe to go beyond ſea, talked with him, and finding him reſolute in his religion, for which (as that gentleman often afterwards acknowledged) he gave many good and ſound reaſons, the Doctor thereupon directed him to be ſilent, and not troubleſome in uttering his opinion, whereby others might take occaſion to call him in queſtion, and for his part he would wink at him, and ſo order the matter, that he might continue in his religion, without travelling out of the univerſity (6).

orders preſently to have him ſworn her Chaplain (*q*). The ſame year, 1565, being informed that ſome ſtatutes were preparing above to enjoin an uniformity of habits, particularly to order the wearing of ſurplices in the univerſity, he promoted the writing of a joint letter privately to Cecil, earneſtly deſiring him to ſtop (if poſſible) the ſending down any ſuch orders, which it was perceived would be very unacceptable to the univerſity: but this addreſs was taken ſo ill at court, that our author was obliged afterwards to make an apology for his conduct therein. However, he grew into ſo great eſteem at Cambridge, as well under the character of a preacher as the reſtorer of order and diſcipline there, that the next year, June the 10th, the univerſity granted him a licence under their common ſeal, to preach throughout the realm (*r*); and on the 5th of July following, the ſalary of his profeſſorſhip was raiſed, out of reſpect to him, by that body, from twenty marks to twenty pounds (*s*) [*F*]. He had the year before been a conſiderable benefactor to his college [*G*]; where the next year, 1567, he held the Preſident's place, but was called thence, April the 21ſt, to Pembroke-Hall, being choſen Maſter there; and not long after he was likewiſe appointed Regius Profeſſor of Divinity. In both theſe preferments he ſucceeded a ſecond time his old friend Dr Hutton (now made Dean of York), and to the firſt had the ſame recommendation which had been given to his predeceſſor, viz. that of Dr Edmund Grindal [*H*], then Biſhop of London. But his continuance here was very ſhort; for in leſs than three months, upon the death of Dr Beauchamp, her Majeſty promoted him to the Maſterſhip of Trinity college. This place was procured for him chiefly by the intereſt of Sir W. Cecil, who, notwithſtanding ſome objections had been made to his age [*I*], got him ſworn into it the 4th of July. The ſame year the univerſity admitted him Inceptor for the degree of Doctor in Divinity; and being appointed likewiſe to keep the Commencement Act (*t*), he choſe for his theſis upon that occaſion, *Papa eſt ille Antichriſtus* (*u*); the Pope is the Antichriſt. May the 21ſt, this year, he was alſo deputed by a grace of the univerſity to go to Leiceſter, upon a com-

(*q*) Strype, p. 9.

(*r*) Theſe preachers have the privilege of holding rich livings with their fellowſhips, as were otherwiſe not conſiſtent with the college-ſtatutes.

(*u*) Paul, p. 6.

[*F*] *His ſalary of the Margaret profeſſorſhip was raiſed.*] He choſe the Revelations and the Epiſtle to the Hebrews for the ſubject of theſe Lectures, both which books he expounded throughout. Theſe Lectures were prepared by him for the preſs, and Sir George Paul (7) intimates, that there was ſome likelihood of their being publiſhed in his time; but, whatever was the reaſon, they have never yet appeared in print. Mr Strype (8) tells us, that he ſaw this manuſcript, of Dr Whitgift's own hand-writing, in the poſſeſſion of Dr William Payne, Miniſter of White-Chapel, London, which after his death was intended to be purchaſed by Dr John More, Biſhop of Ely. This manuſcript contained likewiſe his Theſis, when he kept his Act for Doctor of Divinity, viz. that the Pope is the Antichriſt, *Papa eſt ille Antichriſtus.*

[*G*] *A benefactor to Peter-houſe.*] In the Commemoration-book of Peter-houſe there is the following paragraph. *Reverendus Pater Dom. Joh. Whitgift Arch. Cant. & Socius hujus Collegii, dum adhuc erat Rector de Teverſham infra Cantabrigiam, una cum Margaretta Relicta Bartholomæi Fulnetby de eadem villa, dederunt nobis quatuor marcharum penſionem annuam exeuntem de manerio de Carles in Elexia, ad ſuſtentationem unius Bibliotiſtæ.* The Grant bears date Oct. 4. 1565. Eliz. 7. This Margaret Fulnetby was probably a relation of our author. Mr Strype, p. 3, takes notice of his being related to a family of that name. In the parlour at Peter-houſe there is a picture of Whitgift, with this diſtich under it:

Quod Paci Whitgifte faves ſtudiiſque priorum,
Dat tibi pacis amans CANDIDA DONA * *Deus.*

[*H*] *He had the recommendation of Dr Edmund Grindal.*] The Fellows had their eye upon him, and deſigned to chooſe him for Dr Hutton's ſucceſſor, without any ſuch recommendation; however, they were more confirmed in their purpoſe by this letter of Biſhop Grindal, who had been formerly their Maſter. In a letter to him, dated ſoon after the election, they write, that Whitgift became the more acceptable to them from the love and good-will of Grindal; expreſſing great ſatisfaction at the ſame time, that the Ridleys were not ſo rooted from among them, but that Grindal, one fibre of that root, ſtill remained; whence Hutton ſprung, under whom they recovered conſiderable ſtrength, and more ſo, when after him Whitgift aroſe, *whom alſo they wiſhed for above all others* (9).

[*I*] *Notwithſtanding ſome objections had been made to his youth.*] This appears by the following letter wrote by our author to Cecil upon this occaſion, in which is ſeen his Apology, mentioned in the text. ‘As oft as I do remember your ſingular goodneſs towards me, Right Honorable, and earneſt deſire to do me good, I cannot but laud and praiſe my merciful God, and give moſt humble and hearty thanks unto your Honour. For what or who am I; that you ſhould be ſo careful for me? Notwithſtanding, Right Honorable, I do not ſo much rejoice at your Honor his good will, as I in myſelf lament, that the ſame ſhould in any reſpect by miſreports be diminiſhed. It is not unknown unto me what is reported unto your Honor, while you intend in your meer and ſingular goodneſs to place me in Trinity college; the which how true they be God ſhall judge at that day, when all ſecrets ſhall be revealed. In the mean time, what harm they do me, and what grief they have fixed in my hart, God knows, and you know.

‘For God ſake, Right Honorable, let it be judged what I am by my doings, and not by the report of thoſe, who do not to me as they would themſelves be done unto. As touching my not conformitie (which is one thing layd againſt me) I dare be judged by my Lord of Canterbury his Grace, your Honor, or my Lord of London, or Maſter Dean of York †, who knoweth more of my mind in theſe matters than any man does beſides. I never encouraged any to withſtand the Queen's laws in that behalf, but I both have and do, by all means I may, ſeek to perſuade men to conform themſelves; for it grieves me, that any man ſhould ceaſe from preaching for the uſe of thoſe things, being of themſelves indifferent (10).

‘As for my age and diſcretion, muſt commit that to your Honor his judgment. God forbid I ſhould ambitiouſly ſeek *that*, that I am not meet for. If it ſhal pleſe God by your Honor his means to cal me unto that function, I truſt he will alſo give me the ſpirit of wiſdom and diſcretion to ſatisfie the ſame,

‘That preferment that I have, whatſoever it is, I have it by your Honor his means, and therefore I owe myſelf wholly unto you, but it is not ſo much as it is reported. The maſterſhip of Pembroke Hall is but 4 l. the year, and 18 d. in the week for Commons; my benefice is one of the leaſt in all the dioceſe. My lecture is the whole ſtay of my life. My depts are more than I ſhal ever, being in the ſtate I am, be able to diſcharge, and extreme neceſſity, not any prodigality, hath brought me into them. I beſeech your Honor pardon me for being ſo bold to trouble you. God hath moved you to love me, God hath hitherto by you provided for me; what it ſhal pleſe God to put in your mind to do for me, I beſeech you let no reports from doeing the ſame diſſuade you. I truſt, hitherto I have not ſo behaved myſelf, that your Honor doth repent you of any thing done for me; and I truſt the day ſhal never

‘come

† Matthew Parker, Cecil, Grindal, and Hutton.

(10) In the private letter to Cecil, mentioned in the text, to prevent orders for wearing ſurplices, it was alledged, that ſuch an order would give danger of forcing ſeveral worthy perſons from the univerſity, and become an hindrance to the preaching of the goſpel, which began much to flouriſh there.

a complaint made by that town againſt their preacher [*K*]. December the 5th, 1568, the learned Dr Cox, Biſhop of Ely, gave him the third ſtall, then vacant, in that cathedral, which he held till he was raiſed to the Epiſcopate, but reſigned his place of Regius Profeſſor in November the year following (*w*). The ſame year, June the 29th, he drew up an elegant Latin letter to Cecil [*L*], which was ſigned likewiſe by the ſenior Fellows of his college, complaining of the number of ſcholars impoſed upon them from Weſtminſter School, and intreating him to interpoſe with the Queen to deliver them from that burthen. Soon after which, as Maſter of that ſociety, he obliged the readers to read their

(*w*) Strype, p. 12 and 15.

‘ come, wherein your Honor ſhal have cauſe to ſay, I would I had not done this for him.

‘ I beſeech God preſerve your Honor, and proſper you, and ſo move you for me as ſhal be moſt for his honor, and to the profit of his church. From Cambridge, 17 June 1567 (11).’

Mr Strype ſuppoſes, that the benefice mentioned in this letter was ſome ſmall thing which he had before Teverſham; but it appears by the Commemoration-book of Peter-houſe, mentioned in Remark [*G*], that he was in poſſeſſion of that rectory before he wrote this letter: whence I am apt to think that living had been leaſed out by his predeceſſors upon a ſmall reſerved rent, as was the practice of thoſe times; and for the reſt, it is not improbable that he gave his paternal eſtate to his brother William, when the Bible-clerk place was forced out of the rents of his eſtate at Curles. By a Viſitation-book of the county of Surrey, William was in poſſeſſion of an eſtate of the name of Curles, or Curleis, in the 7th of Elizabeth ‡; and the Archbiſhop himſelf declares in 1599, that his brothers were in poſſeſſion of all the eſtate he had before his advancement ‖.

[*K*] *He went to Leiceſter, upon a complaint made againſt their preacher.*] One Mr William Hughes of this univerſity, who had obtained to be Lady Margaret's preacher, became a preacher at Leiceſter, where his doctrine giving great offence, the inhabitants made a complaint to the univerſity, deſiring to be releaſed of him; whereupon a grace was granted to our author, May 31, 1567, that he ſhould be ſent to Leiceſter, about the ſcandal given by their preacher; *ut ibi ſcandalo occurrat per prædicatorem veſtrum dato*, are the words in the Univerſity-regiſter (12). One of this preacher's doctrines was a ſenſe of his own concerning the Article of Chriſt's deſcent into hell, which in the Synod of London 1562 had been left without the explication that went with it under King Edward VI.

[*L*] *He drew up an elegant Latin letter to Cecil.*] It was occaſioned by an election of three ſcholars at Weſtminſter ſchool, when there being only two places vacant at Trinity college, the ſociety, at the inſtigation of their maſter, refuſed to take any more. The ſcholar that was refuſed, laboured to obtain a pre-election, which had been uſual, but was now withſtood by the college, as againſt their ſtatutes. The ſcholar, not content with this plea, applied to Cecil, the chancellor of the univerſity, who ſent an order for his admiſſion, to which this letter is an anſwer, which we have thought proper to inſert, as it gives us a taſte of our author's Latin ſtyle (13). ‘ Accepimus tuas literas, Honoratiſſime Vir, quibus petis, ut de intromittendo in collegium noſtrum tertio quodam Weſtmonaſterienſi ſcholaſtico ad duos illos in ſuperiori electione acceptos rationem habeamus. Eſt gravis ſane tua ſemper apud nos & authoritas & voluntas, nec quicquam animis noſtris jucundius accidere ſolet, quam cum facultas utriq; ſatisficiendi commoda & opportuna conceditur. Ea autem quandoquidem hoc tempore variis & neceſſariis de cauſis nobis non ſuppetit, tuamq; æquiſſimam ad omnia mentem, & in bonas literas conſtantem amorem ſæpe ſumus experti, præterquam quod reſpondere tuis literis officii noſtri eſſe ducimus, novas etiam petitiones & eas ſupplices, totius nomine collegii in quo verſamur, afferre non dubitamus.

‘ Ac primum quod ad tertium locum attinet, in quem unum deſignari & admitti cupis, formâ profecto literarum Patentium, quæ ea de re Weſtmonaſterienſibus conceſſæ erant; aut omnino verba ipſa nullam ejuſmodi neceſſitatem nobis in electione ſcholarium imponunt; utcunq; enim illi commoda quæq; inde ſibi arripiunt, nobis certe duabus cautionibus, nec dubiis nec obſcuris, ibidem proviſum eſt, *Si tot Idonei reperiantur*. Aut *ſi tot loca vacare contigerit*, ſuperiore vero electione plane neminem in tertium locum co-optare potuimus; quia, alio eundem occupante, non patebat cuiq; aditus. Accedit etiam, quod licet tot loca vacua fuiſſent, & ea vel ſexcenti ad præfinitum tempus petiiſſent electionis, nos tamen, ut hac liberalitate in eos uteremur, nullum ſuperioris cujuſquam Præfecti exemplum, ab eo ſtatuto primum ſancito invitavit; ne Doctoris quodam *Billi*; qui ut illa electio inſtitueretur primus ſuaſiſſe, & ſumma contentione agiſſe dicitur. Cujus contra quoq; non deeſt exemplum, uno ſolo quandoq;, quem in noſtrum cætum inde aſciſceret, contenti.

‘ Atq; hæc noſtra eſt, quo minus tertium aliquem admitteremus, juſta defenſio. Cui opportunum videtur querelam graviſſimi etiam incommodi, quod ex tota illa electione jamdiu accepimus, neceſſariam adjungere. Ac nonniſi magno quidem cum dolore commemorare poſſumus, quàm ipſa optimarum artium ſtudiis apud nos inimica fuerit, & quam multorum progreſſioni ſpem omnem pæne præciderit. Sunt enim in collegio noſtro & fuerunt complures, optima indole, ſumma diligentia, laudata doctrina, adoleſcentes, quorum alii per tres annos hic commorantes, alii quoad gradum Baccalaureatus initiarentur, vel relinquere Academiam, premente eos inopia, coacti fuerint, vel ulterius in eadem degentes langueſcunt animis, & ſtudia remittunt deſperatione præmiorum. Quam nos certe bonarum literarum peſtem vere eſſe putamus; & eo magis lætalem, quod iidem illi adoleſcentes alios e ſchola grammatica recens egreſſos, nondum primis Academiæ diſciplinæ hauſtis incunabilis, nullo judicio, nulla ne mediocri quidem ſcientia præditos, ſibi præponi vident. Atqui optandum ſane eſſet, ut quemadmodum in ſtadio multis currentibus, certis tamen quibuſdam qui reliquos pedum velocitate ſuperant, victoriæ inſignia, ſeu præmia tribuuntur; ita eorum, qui in hoc literario curſu procul cæteros a tergo reliquerint, juſta foret & debita remuneratio. Sed ejus facultas vel cupientibus nobis hac externorum & plane indignorum introductione eripitur. Quod & perinde etiam uſu venit in eo, cujus ſtatutorum noſtrorum præſcripto valde ſolliciti eſſe debemus, ut ex alumnis noſtris collegii eos potiſſimum cæteris paribus deligamus, quos ex illis locis ubi nobis prædia & poſſeſſiones ſunt, profectos eſſe conſtiterit. Eorum enim nonnullis, qui & eximiæ ſpei, & non contemnendæ doctrinæ ſunt, & ſumma egeſtate laborant, nullum ſtipendium, quo ſubleventur, a collegio ſuppeditatum eſt, quandoquidem in alios parum idoneos erogare coactum, fontem ipſum liberalitatis, quem ad iſtos promanare æquum erat, exhauſtum.

‘ Ex quo duntaxat evenit, ut cum ejuſdem eſſet collegii dignitatis, doctiſſimorum, quoad licet, & probatiſſimorum multitudine abundare, eorum bonam partem inviti dimittamus, & ornamenta illa quibus illuſtretur, eidem non poſſimus pro arbitratu adjungere: quod noſtro quidem acerbiſſimo cum dolore recordamur, qui experientia edocti, plus etiam ſenſimus, quàm alii queunt in hac tota re cauſâq; ſuſpicari. Nos vero & ad iſtum dolorem alia moleſtia alieni temporis perturbat, quod quo tempore abeſſe academia nobis & precipue Præfecto valde incommodum eſt, in ipſis Comitiis intereſſe electioni apud Weſtmonaſterium ſemper aliqui tenemur.

‘ Quare eo rès redit ad extremum, ut hoc tanto detrimento jamdiu affecti, & majorem in poſterum verentes bonarum literarum imminutionem, ſupplices illud ab Honore tuo & obnixe petamus, ut pro ſolito in nos patrocinio tuo, & ſingulari benevolentia, qua collegium totum complexus es, cauſam noſtram apud ſereniſſimam Regiam Majeſtatem agas, ab eaq; precibus, ſi fieri poteſt, & gratia impetres, ut hoc prorſus externo onere, quo premimur, nos dignetur de reliquo liberare. Quod ſi feceris, & perpetuo quodam inſtituto tuo ad extremum uſq; de ſtudioſis bene meritus eſſe videberis, & nos ſeorſim multis nominibus tibi antea devinctos, aſtringes etiam, ſi modo fieri

‘ queat,

their lectures in the time of the long vacation, according to the ſtrict letter of the College ſtatutes (*x*). He was this year alſo appointed by her Majeſty one of the Commiſſioners for viſiting King's College [*M*]. In 1570, having firſt applied to Cecyl for the purpoſe, he compiled a new body of ſtatutes for the univerſity, which were of great ſervice to that learned community [*N*]. This work he finiſhed in Auguſt, and the ſame month he was the principal agent in procuring an order from the Vice-chancellor and heads to prohibit Cartwright, who was now Margaret profeſſor (*y*), from reading any more lectures without ſome ſatisfaction given to them of his principles and opinions [*O*]. Our Author informed the Chancellor of this ſtep, and at the ſame time acquainted him with Cartwright's principles, and the conſequences of them, upon which he received the Chancellor's approbation of what had been done. Whereupon Cartwright being convened, and refuſing to renounce his principles, was deprived of his Profeſſorſhip; and as he gave out that his aſſertions were rather ſuppreſſed by authority, than refuted by reaſon, our Author took an effectual method to obviate that calumny. In the mean time, at the Chancellor's requeſt, he likewiſe wrote

(*x*) But the readers, upon an appeal, obtained a royal diſpenſation. Idem, p. 13.

[*M*] *One of the Commiſſioners for viſiting King's college.*] This is a remarkable inſtance of the high credit our author was now in at court. The Fellows of King's college had before complained of their Provoſt (14) to the Viſitor Biſhop of Lincoln, who, upon hearing the cauſe, had made ſeveral injunctions to keep the Provoſt in his duty; but no regard being ſhewn to the Viſitor, the Fellows applied to the Queen, who appointed Dr Whitgift, together with the Biſhop of Ely, Dr May, and Ithel, the Biſhop of Ely's Chancellor, to ſettle this matter, who followed the Provoſt ſo cloſe, that he was obliged to fly from the college; upon which the Fellows choſe into his place Roger Goad, B. D. by the permiſſion of the commiſſioners, who having confirmed him Provoſt, proceeded with him to make a reformation there, and particularly removed all the Popiſh relicks, that had been carefully preſerved by Baker. The ſociety afterwards addreſſed a letter of thanks to the Queen, for giving them liberty to elect one of their own number; declaring that her Majeſty teſtified her good-will towards King's college to all the world in ſuch a manner, that they could not have hoped for a greater bleſſing from God; that when they felt themſelves oppreſſed, ſhe ſent them ſuch as took the burthen off them; when they were afflicted, ſhe ſent them ſuch as cheriſhed and refreſhed them; when they were ſick both in their head and members, ſhe ſent them ſuch as applied wholeſome medicines to both (15).

(14) Dr Baker, who, in diſlike of the reformation, had not only neglected to preach himſelf, but took no care to keep up the ſtudy of divinity, ſo that there was not above five fellows upon that line in the college, ch. 1. ct. 3.

(15) Idem, p. 16, 18.

[*N*] *A body of ſtatutes, which were of great ſervice to that learned community.*] Our author had lately acquainted Cecil, how needful it was theſe ſtatutes ſhould be reviewed and amended; as alſo that a ſupplement ſhould be added to them. Cecil having approved the matter, referred the conſideration thereof at his inſtance to the Vice-chancellor, and ſome of the graveſt of the Heads; who having finiſhed the work, Dr Whitgift ſent it to the Chancellor to peruſe, and propoſed to him to put it to the Archbiſhop [Parker] and ſome others well acquainted with the univerſity, to review what was drawn up by them, and ſo to report to him their judgment, in order to get them ratified by the crown *. In a deſcription of the foundation and privileges of the univerſity of Cambridge, ſuppoſed to be written by Dr Perne and Dr Caius, in 1572, mentioning Cecil Chancellor of the univerſity, it is expreſſed, that in his time both the number of ſound and good exerciſes were greatly encreaſed by his godly wiſdom and great authority, and that he had not only procured a very good and neceſſary reformation of the ſtatutes of the univerſity, made and examined with great advice, for the maintainance of learning and good order in all degrees within the ſaid univerſity, the which were made and eſtabliſhed by the Queen's authority under the great ſeal of England, and generally received by the whole univerſity; but alſo he had for this conſideration procured the enlarging and confirmation of the privileges of the ſaid univerſity by authority of parliament. But it ſeems the Puritans were not a little diſpleaſed with this ſtep, ſince the Heads were now furniſhed with greater power to keep them in order. Mr Edward Deering, ſome time Fellow of Chriſt's college, in a letter to Cecil, after having given characters diſparaging enough of the reſt of the heads ‖ concerned in theſe new ſtatutes, comes to Dr Whitgift, *who was a man*, he ſaid, *that he loved; and yet he was but a man that God had ſuffered to fall into great infirmities: ſo froward a man againſt Mr* CARTWRIGHT *and others, ſuch as betrayed a conſcience that was full of ſickneſs, that his faction ruled him, and not his learning, when he framed his cogitations to get more ſtatutes* (16).

* See the iſſue and concluſion of this affair in Strype's life of Archbiſhop Parker.

‖ Viz. Perne, Harvey, Hawford, Ithel, May, and Chadderton.

(16) Idem, chap. 3.

[*O*] *Prohibited Cartwright from reading any more lectures*, &c.] Dr Whitgift acquainted the Chancellor with this, in a letter, the ſame month, in which, becauſe the Chancellor ſeemed to him not ſo perfectly to underſtand Cartwight's principles, and the conſequences of them, he ſet them down in ſeveral particulars, that by the reading thereof (as he ſaid) it might appear how dangerous and deſtructive they were, both unto religion and the ſettled conſtitution of this Church. Cartwright had not yet publiſhed his notions in print, but our author, as Maſter of the College, having often convened him, and held ſeveral private conferences with him about them, could not be unacquainted therewith. Sir George Paul obſerves, that Cartwright's diſcontentment had its firſt riſe at a diſputation in the univerſity before Q. Elizabeth, when Mr Preſton, then of King's Coll. (but afterwards Maſter of Trinity-hall) for his comely geſture and pleaſing pronunciation, was both liked and rewarded by her Majeſty, while he was paſſed untaken notice of †. That preſently after this neglect, he began to kick againſt the diſcipline and her government in the Church; and going in this humour to Geneva, he grew confirmed and confident in theſe principles, which upon his return he preached up in the univerſity, and drew a great number of followers to him; inſomuch that upon a Sunday Dr Whitgift being from home, Cartwright, with ſome of his adherents, preached three times in the college chapel on that day, and inveighing with extraordinary vehemence particularly againſt the ſurplice, they moved their audience ſo much, that at evening prayer all the congregation was placed in the chapel without ſurplices, three only excepted *. Wherever after Mr Cartwright and his accomplices had broached their doctrine, Dr Whitgift would always the Sunday following in the ſame church anſwer and confute their opinions; yet all this time the Doctor uſed no forcible means againſt them, only private conferences and admonitions (17), but, on the other hand, frequently offered to diſpute with him, and that even upon his own terms; and the ſame is alſo atteſted by an Inſtrument, which at our author's inſtance, upon the miſreport of Cartwright, was ſigned by the chief heads, dated March the 18th 1570, as follows. 'Whereas 'it is reported that Maſter Cartwright offering diſpu'tations and conference touching the aſſertions ut'tered by him, and ſubſcribed with his hand, and 'that he could not obtain his requeſt therein; this is 'to teſtify, that in the preſence of us here underwritten,

† Cartwright was unhewn and aukward both in his perſon and manners.

* Doctor Legge, Mr Weſt, and the Chaplain.

(17) Paul's life, &c. p. 10, 11, 12, 13, 14.

wrote a confutation of ſome of the chief of thoſe principles, and ſent them to Archbiſhop Parker, in a letter dated December 29th, with an intention to publiſh them, but was prevented (z). In 1671 he ſerved the office of Vice-chancellor. The ſame year an order was made by the Archbiſhops and Biſhops, that all thoſe who had obtained faculties to preach, ſhould ſurrender them before the 3d of Auguſt; and that upon their ſubſcription to the Thirty-nine Articles, and other conſtitutions and ordinances agreed upon, new licences ſhould be granted. This being ſignified to the univerſity, and an order ſent, requiring them to call in all the faculties granted before, our author in purſuance thereof ſurrendered his former licence, obtained in 1566, and had another granted him Sept. 17, 1571, wherein he was likewiſe conſtituted one of the Univerſity-Preachers (aa). June the 19th, in conſequence of the Queen's nomination, he was elected Dean of Lincoln, into which dignity he was inſtalled Auguſt the 2d following (bb). October the 31ſt, he obtained a diſpenſation from the Archbiſhop, impowering him, together with this Deanery, his Prebend of Ely, and Rectory of Teverſham (beſides the Maſterſhip of Trinity College) to hold any other benefice (cc) whatſoever [*P*]. Towards the end of the ſame year he preached the Latin ſermon (dd) at the meeting of the Convocation, being then Proctor for the Clergy and Chapter of Ely. May the 14th, the next year, he was preſented to the lower Houſe for their Prolocutor and choſen. In Auguſt the ſame year, he reſigned the rectory of Teverſham (ee). He was now, by particular appointment from the Archbiſhop of Canterbury, writing his anſwer to the *Admonition* (ff) [*Q*], which requiring more eaſe of mind and leiſure hours than the execution of his office as Maſter of Trinity College (where he met with much trouble and oppoſition) ſeemed to allow of, he even deſired to leave the Univerſity. However, the Heads applied to the Chancellor in a letter dated September the 28th, to prevent it. He had a little before, in the ſame month this year, expelled Cartwright from his Fellowſhip, for not taking orders in due time, according to the ſtatute of the college [*R*]. November the 2d, by the appointment of the Biſhop of London, he preached at Paul's croſs; and before the expiration of the

‘ ten, and in our hearing, the ſaid Maſter Cartwright
‘ was offered conference of divers, and namely of M.
‘ Dr Whitgift, who offered, that if the ſaid Maſter
‘ Cartwright would ſet down his aſſertions in writing,
‘ and his reaſons to them, he would anſwer the ſame
‘ in writing alſo; the which Maſter Cartwright re-
‘ fuſed to do. Farther, the ſaid Dr Whitgift, at ſuch
‘ time as Maſter Cartwright was deprived of his lec-
‘ ture, did in our preſence aſk the ſaid Maſter Cart-
‘ wright, whether he had both publicly and pri-
‘ vately divers times offered the ſame conference
‘ unto him, or not? To which Maſter Cartwright an-
‘ ſwered, that he had been ſo offered, and that he
‘ refuſed the ſame. Moreover, the ſaid Maſter Cart-
‘ wright did never offer any diſputation, but upon
‘ theſe conditions, viz. That he might know who
‘ ſhould be his adverſaries, and who ſhould be his
‘ judges, meaning ſuch judges as he himſelf could beſt
‘ like of. Neither was this kind of diſputation denied
‘ unto him, but only he was required to obtain licence
‘ of the Queen's Majeſty, or the Counſel, becauſe his
‘ aſſertions be repugnant to the ſtate of the common-
‘ wealth, which may not be called into queſtion by
‘ public diſputation, without licence of the Prince or
‘ her Highneſs's Counſel. *John Whitgift*, Vicechan.

Et ego Mathæus Stokis, Sarum Dioceſ. in Artibus Magiſter, publicus authoritate legitima Notarius quia Interfui deprivationi dicti Cartwright, factæ undecimo die Decembris, anno 1570. *& tunc & ibidem audivi Doctorem Whitgift interrogantem eum* [*Cartwright*] *de præmiſſis allegatis, & M. Cartwright eadem confitentem. Ideo in fidem & teſtimonium præmiſſorum nomen meum requiſitus ſuperſcripſi Anno Domini* 1570 (18).

[*P*] *He obtained a diſpenſation of the Archbiſhop to hold any other benefice whatever.*] Our author, as ſoon as it lay in his power, expreſſed his gratitude to the Archbiſhop [Parker] by ſeevral kindneſſes conferred upon his ſon, to whom he firſt granted the parſonage of Reculver and rectory of Hoath in 1587, and the following year appointed him ſteward of his houſhold, and gave him the leaſe of the manor of Broughton, without taking any fine at all (19).

[*Q*] *He was now writing his anſwer to the Admonition.*] One Thomas Norton, a learned clergyman, had taken ſome pains to diſſuade our author from this undertaking. Not that Norton approved of Cartwright's book; but he doubted it ſeems whether an anſwer might not do more harm than good, by widening the difference, rather than edifying the church; and concluding that Whitgift had in this deſign preferment in his eye, he ſignified to him that in *that* view it was even a dangerous attempt, and that he might even be diſappointed thereby of what hopes he now had, in point of policy he adviſed him to deſiſt. (20) But he afterwards changed his mind, being convinced of his miſjudgment by Whitgift, whoſe reaſons for anſwering the Admonition were, 1. Becauſe that book defaceth the whole ſtate of religion, the whole order of ſervice, the whole miniſtry, the whole kind of government uſed and allowed in the Church of England, which I think, ſays he, no ſound Proteſtant or favourer of the ſtate can willingly ſuffer. 2. Becauſe the Anabaptiſts in Germany are herein followed. 3. Becauſe the books are in every man's hand, and by many thought unanſwerable. 4. It is every man's part to ſuppreſs errors. 5. Becauſe I myſelf am particularly ſlandered, that I refuſed conference, which indeed I have ſundry times offered (21). Norton was afterwards fully convinced, as he wrote to Archbiſhop Parker, You know that I have offered you divers times this kind of conference, though not in this public manner.

[*R*] *He expelled Cartwright for not taking orders according to the college-ſtatutes.*] He upon this occaſion addreſſed a letter to the Archbiſhop, in the following terms. ‘ My duty moſt humbly unto your Grace re-
‘ membred—I am conſtrained ſooner to trouble you,
‘ than I had purpoſed. So it is, that I have pro-
‘ nounced Mr Cartwright to be no Fellow here;
‘ Becauſe, contrary both to the expreſs words of his
‘ oath, and plain ſtatutes of this college, he hath
‘ continued here above his time, not being full mini-
‘ ſter*, which truly I did not know until now of
‘ late; for if I had known it before, I might have
‘ eaſed myſelf of much trouble, and the college of
‘ great contention. Hitherto, I thank God, it hath
‘ been a quiet college as any was in Cambridge; now
‘ it is clean contrary, marvellous troubleſom and
‘ contentious: which I can aſcribe to no cauſe, ſo
‘ much as to Maſter Cartwright's preſence here. I
‘ doubt he will make ſome friends in the court to
‘ maintain him, yea though it be againſt the ſtatutes;
‘ and I have ſome underſtanding that he goeth about
‘ the ſame.

‘ I beſeech your Grace, let me have your aſſiſtance,
‘ either by your letters to my Lord Burleigh or my
‘ Lord of Leiceſter, or both, or by any other means
‘ you think beſt. Their whole purpoſe is to make
‘ me weary, becauſe they take me to be an enemy to
‘ their factiouſneſs and lewd liberty. If they may
‘ triumph over me once, peradventure the ſtate here
‘ will be intolerable; but I doubt not of your Grace's
‘ full aſſiſtance. Maſter Cartwright is flatly perjured;
‘ and

* He was only in Deacon's orders.

the year came out his anſwer to the *Admonition* [S]. To this a reply being publiſhed by Mr. Cartwright the next year 1573, our Author wrote his defence the ſame year ‡. March

‡ In the title-page it is ſet down 1574. But that was according to the printer's account of the year.

'and I am thoroughly perſuaded, that it is God's judgment that he ſhould for not being miniſter be ſo puniſhed, which hath ſo greatly defaced the miniſtry (22),' [God ſo often diſpoſing, that the ſin is viſible in the puniſhment.]

(22) Chap. 5.

[S] *He publiſhed his Anſwer to the Admonition.*] As Archbiſhop Parker was the chief perſon that ſet Whitgift about this work, ſo he gave him conſiderable aſſiſtance therein*; and the ſeveral parts of the copy as it was finiſhed were ſent to him to reviſe; and Cooper, Biſhop of Lincoln, another of the moſt learned biſhops of that time‖, together with other biſhops and learned men, were conſulted with. For, in September 1572, the Doctor having made an end of his confutation, as ſoon as he had written out fair the firſt part of it, he ſent it to the Biſhop of Ely [Dr Cox], Dr Perne [Dean of Ely], and ſome other learned men, for them to peruſe; and then afterwards, for the laſt peruſal of it, it was by him ſent to the Archbiſhop of Canterbury, accompanied with a letter, dated from Trinity college, September the 21ſt; and ſhortly after having deſcribed the ſecond part, which the Biſhop of Lincoln had read over, he ſent that alſo to the Archbiſhop, with a letter, bearing date October the 21ſt, from Ely, deſiring his Grace to peruſe it, and to correct it as ſhould ſeem good to him; he likewiſe deſired to be directed by the Archbiſhop to whom he ſhould dedicate it, whether to the Queen or Parliament, as Cartwright had done, or any other; and laſtly he prayed his Grace, that the printer might be charged not to give a copy of it, or a ſheet thereof, till all were printed. In this letter he acquainted the Archbiſhop, that he had an Epiſtle of Mr Gualter (the learned divine of Zurich) written of late to the Biſhop of Ely (a copy whereof he ſent him incloſed), which would be, he ſaid, a very fit anſwer for the Epiſtle of the ſame eminent foreigner ſet at the end of the admonition by the compilers thereof, as favouring their cauſe. He did not know the Biſhop of Ely's pleaſure, whether he would have it printed; but he told his Lordſhip the Archbiſhop, that he would reſort unto his Lordſhip of Ely for the ſame (23). It appears that he had that Biſhop's leave, this letter being publiſhed in Latin and Engliſh at the end of his book, with this preface: And foraſmuch as the authors of the Admonition, for their better credit, had ſet down in print the Epiſtles of Mr Beza and Mr Gualter, ſo he thought good to ſet down an Epiſtle of Mr Gualter, revoking the ſame upon better information; as alſo another of Mr Bullinger, chief miniſter of Zurich, concerning the ſame ſubject (24). So that (as Mr Strype obſerves) in this book, taking in his defence printed a year or two after, may be ſeen all the arguments and policy uſed in thoſe times for laying Epiſcopacy and the Liturgy aſide, and all the exceptions to them drawn up to the beſt advantage; and herein alſo are ſubjoined a full and particular anſwer and refutation of the one, and vindication of the other; together with the *favourable* ſenſe of the learned men abroad, as Peter Martyr, Bucer, Zuinglius, Bullinger, Calvin, Gualter, expreſſed in their letters, or other writings of theirs, and their approbation of this Church's frame and diſcipline, and the government of it by Biſhops. Mr Strype was of opinion, that this book may be juſtly eſteemed and applied to as one of the public books of the Church of England concerning her profeſſion and principles, and as being of the like authority in reſpect to its worſhip and government, in oppoſition to the diſciplinarians, as Biſhop Jewel's Apology and Defence in reſpect of the reformation (25) and doctrine of it, in oppoſition to the Papiſts (26). It was firſt printed in quarto, and reprinted the year following, with this title: *An Anſwer to a certain libel, intitled,* An Admonition to the Parliament, *by John Whitgift, D. of Divinity, newlie augmented by the Authour, as by Conference ſhall appear.* Imprinted at London by Henrie Bynneman, for Humfrey Toy. Anno 1573.—It is dedicated to his Loving Nurſe, the Chriſtian Church of England. It contains the following heads. 1. Whether Chriſt forbid rule and ſuperiority in his miniſters. 2. Of the authority of the church in things indifferent; that ſome things may be tolerated in the church concerning order, ceremonies, diſcipline, and the kind of government, not expreſſed in the word of God. Under this head he obſerves, that the aſſertion which is the chief and principal grounde of the *Admonition*, is, that thoſe things only are to be placed in the church, which the Lord himſelf in his worde commandeth; as though they ſhould ſay, nothing is to be tolerated in the church of Chriſt touching either doctrine, order, ceremonies, diſcipline, or government, except it be expreſſed in the word of God. And therefore the moſt of their arguments in this book be taken *ab authoritate ſcripturæ negative*, which by the rules of logique prove nothing at all. It is moſt true, that nothing ought to be tollerated in the churche as neceſſarie unto ſalvation, or as any article of faith, except it be expreſly conteyned in the word of God, or may manifeſtlie thereof be gathered; and therefore we utterlie condemne and reject tranſubſtantiation, the ſacrifice of the maſſe, the authority of the Biſhop of Rome, worſhipping of images, &c. And in this caſe an argument taken *ab authoritate ſcripturæ negative* is moſt ſtrong. As for example, it is not to be found in ſcripture, that the Biſhop of Rome ought to be the head of the church; and therefore it is not neceſſarie unto ſalvation to beleeve that he oughte to be the head of the church. Again, it is alſo true, that nothing in ceremonies, order, diſcipline, or government in the church is to be ſuffered, beeinge againſt the word of God; and therefore we reject all ceremonies wherein there is any opinion to ſalvation, worſhipping of God, or merit; as creeping to the croſſe, holy bread, holy water, holy candle, &c. But that no ceremonie, order, diſcipline, or kind of governmente may be in the church, except the ſame be expreſſed in the word of God, is a greate abſurditie, and breedethe many inconveniences. The ſcripture hath not preſcribed any place or tyme, wherein or when the Lord's ſupper ſhould be celebrated, neyther yet in what manner. The ſcripture hath not appointed what tyme or where the congregation ſhall meet for common prayer, and for the hearing of the word of God, neyther yet any diſcipline for the correcting of ſuch as ſhall contemne the ſame*. 3. Of the election of miniſters, and of the trial of miniſters both in learning and controverſy. 4. Of miniſters having no paſtoral charge, and of ceremonies uſed in ordaining miniſters; of apoſtles, evangeliſts, prophets. 5. Of the reſidence of paſtors. In this tract there is a chapter of pluralities. 6. Of miniſters that cannot preach, and of giving licences to preach. 7. Of the apparel of miniſters; and the cauſes why ſome refuſed the apparel examined. 8. Of archbiſhops, archdeacons, &c. 9. Of the Communion-book; the general faults examined, wherewith the public ſervice was charged by T. C. In this tract is likewiſe an examination of the particular objected faults, either in matter or form, wherewith the book of Common-prayer was charged. 10. Of holydays and of holyday-eves, that they may be appointed by the church, and the uſe of them. 11. What kind of preaching is moſt effectual. 12. Of preaching before the adminiſtration of the ſacrament. 13. Of reading the ſcripture; and a compariſon between reading and preaching. 14. Of miniſtring and preaching by deacons. 15. Of matters touching the communion; of the orders and ceremonies uſed in the celebration of the communion; of ſhutting men from the communion, and of compelling to communicate. 16. Of matters touching baptiſm; of interrogatories miniſtred to infants; of godfathers, and their promiſes; and of the ſigns of croſſing in baptiſm, and of the parties that are to be baptized. 17. Of the ſignory, or government of ſeniors; whether there were ſuch as the *Admonition* called ſeniors in every congregation; whether the government by ſeniors ought to be perpetual. 18. Of certain matters concerning diſcipline in the church; of excommunication, and in whom the execution thereof does conſiſt; of biſhops courts, and their officers. 19. Of deacons and widows. 20. Of the authority of the civil magiſtrate in eccleſiaſtical matters. 21. Of ſubſcribing to the Communion-book; certain general faults wherewith the book is charged by the Admoniſhers; of reading of homilies and the Apocrypha in the church; of the name Prieſt given to the miniſters of the goſpel; matters concerning the ſolemnization of marriage; of confirmation of children; of burials, and matters thereunto appertaining; and other particular matters for which they refuſe to ſubſcribe to the book. 22. Of cathedral churches. 23. Of civil offices in eccleſiaſtical perſons; a trial of the

* His Grace was very contumeliouſly treated in the *Admonition*, and called Petty Pope, &c.

‖ See his article.

(23) Appendix, No. 71. in Strype's life of Archbiſhop Parker.

(24) By the method the whole Admonition is inſerted by paragraphs, and then follows our author's anſwer.

(25) Biſhop Jewel communicated to our author a paper in defence of the power and juriſdiction of Archbiſhops; a tranſcript of which is inſerted in Strype's Appendix, No. 10. It is entitled, *Novitiorum Aſſertio Archiepiſcoporum & Archidiaconorum nomina ſimul cum muneribus & officiis ſuis ſunt abolenda.*

(26) Strype's life of Whitgift, ch. 7.

*]

[*T*]. March the 26th, 1574, he preached before the Queen at Greenwich, upon the controverſies of the Puritans, and the ſermon was printed with this title, *Teſtamini veritatem in charitate* (gg). This year he bore the office of Vice-chancellor a ſecond time, having, before his election, carried a petition from the former Vice-chancellor, Dr Perne,

the places alledged by the *Admonition* againſt ſuch civil offices as are exerciſed by eccleſiaſtical perſons in the realm. In the Admonition it was aſſerted, that the eccleſiaſtical eſtabliſhment, as it then ſtood, had neither a right miniſtry of God, nor a right government of the church, and that this preſcript form of ſervice in the church maintained an unlawful miniſtry, and the book for ordaining deacons and miniſters was here ſtiled the Pontifical; affirming that we were ſcarce come to the outward face of a church; that although ſome truths were taught by ſome preachers, yet no preacher might, without great danger of the law, utter all truth comprized in the book, it was ſo circumſcribed and wrapt up within the compaſs of ſome ſtatutes, ſuch penalties, ſuch injunctions, ſuch advertiſements, and ſuch articles; ſuch ſober caveats, and ſuch manifold pamphlets, that in a manner it did but peep out from behind the ſcreen. That there were intolerable abuſes in the communion-book. That the ſacraments were wicked, mangled, and profaned. That the word of God was negligently, fantaſtically, profanely, and heathenly preached, and the ſacraments wickedly miniſtred. In what ſtrain the whole *Admonition* ran, may be ſeen by the Preface, which begins thus: ‘Two treatiſes ye have here inſuing (beloved in Chriſt) which ye muſt reade without partialitie or blind affection; for otherwiſe, you ſhall neither ſee their meaning, nor refrain yourſelves from raſh condemning them without juſt cauſe. For there are certaine men of great countenance, which will not lightly like of them, becauſe they principally concerne their perſons and unjuſt dealings, whoſe credite is great, and their friends are many. We mean the lordly lords archbiſhops, biſhops, ſuffraganes, deans, doctors, archdeacons, and chancellours, and the reſt of that proude generation, whoſe kingdom muſt down, holde they never ſo harde, becauſe their tyrannous lordſhippe cannot ſtand with Chriſt's kingdom. And it is the ſpecial miſchief of our Engliſhe church, and the chief cauſe of backwardneſs, and of all breach and diſſention. For they whoſe authoritie is forbidden by Chriſt, will have their ſtroke upon their fellow-ſervants; yea tho' ungratiouſly, cruelly, and pope-like, they took upon them to beate them, and that for their own childiſh articles, being for the moſt part againſt the manifeſt truthe of God. Firſt, by experience, their rigour hathe too playnely appeared ever ſince their wicked raigne, and ſpecially for the ſpace of theſe five or ſix yeres laſt paſt together. And that of the enormities which with ſuch rigoure they mayteyned, theſe treatiſes did in part make mention, juſtly craving redreſſe thereof.’ In another place of the book, in the ſecond *Admonition*, ſpeaking of the Biſhops, is this paſſage. ‘Take them for better who ſhall, they are no other but a remnant of antichriſt's brood, and God amend or forgive them; for elſe they bid battel to Chriſt and his church; and it muſt bid defiance to them till they yield. And I proteſt before the eternal God, I take them ſo, and thereafter will uſe myſelf in my vocation; and many more too, no doubt, which be careful of God, his glory, and the churche's liberty, will uſe themſelves againſt them as the profeſſed enemies of Chriſt.’— In anſwer to this, our author in his preface writes thus: ‘Theſe two treatiſes contayned in this admonition, as they be voyde of ſound learning, ſo are they full of blinde affection, and ſtuffed with uncharitable and unchriſtian termes and phraſes. Wherefore it is to be feared, that they proceede not of love, but of hatred; not of zeal, but of malice; not of humilitie, but of arrogancie; not of mindes deſirous to reforme, but of ſtomaches ſeeking to deforme, and confounde that which is in due forme and order by lawfull authoritie eſtabliſhed. For what charitable, zealous, and humble ſpirite would ſo ſpitefully and ſlaunderouſlie ſpeake of their brethren, whoſe doctrine is pure, whoſe zeal is fervent, whoſe ſuffering for the goſpell hath beene in time of triall comparable with any man's that now liveth; who have alſoe paynefully taught the worde of God in this realme, and do at this day; and by whoſe miniſtrie the goſpell hath taken roote, and is come to that encreaſe, that nowe (God be thanked) appeareth. Surely theſe opprobrious terms, *proud generation, tyrannous lordſhippes, ungratious, cruell, pope-like, wicked raigne, proud enemies*, &c. applied to brethren, proceede not from the humble and milde ſpirite of God, but from the proude and arrogante ſpirite of Sathan. Therefore by this unſeemelie preface, it may appeare from what ſpirite the reſt of this *Admonition* ſpringeth.’ He concludes therefore with exhorting the civil magiſtrate to take care of theſe ſectaries, from the example of the Anabaptiſts of late in Germany, and from the Donatiſts of old. He tells them, it was time to awake out of ſleep, and to draw the ſword of diſcipline; to provide that laws made for uniformity, as well of doctrine as ceremonies, might be obſerved, boldly to defend the religion and kind of government in this kingdom eſtabliſhed; or elſe, if they could, to reform and better the ſame. For it could not be, but that this freedom given to men to obey and diſobey what they liſted, and where they liſted, to preach what opinions and doctrines they liſted, muſt in the end burſt out in ſome ſtrange and dangerous effect. As the *Admonition* was printed in two parts, a particular reaſon was given for the writing of the ſecond part, viz. That it was a petition to the parliament (that ſat 1572) upon the ſubſcription to the articles required by the eccleſiaſtical commiſſioners, authorized by the parliament; and for non-ſubſcription to loſe their places and livings; and ſome, beſides the loſs of their livings, were complained to be unbrotherly and uncharitably treated. On this reaſon the petition run, that it might therefore pleaſe that honourable and high court of parliament, in conſideration of the premiſſes, to take a view of ſuch cauſes as then withheld, and ſtill did, the aforeſaid miniſters from ſubſcribing and conſenting unto the foreſaid articles, by way of purgation, to diſcharge themſelves of all diſobedience towards the church and their ſovereign, and by way of moſt humble intreaty for the removing away and utterly aboliſhing of all ſuch corruptions and abuſes as withheld them. In regard to this charge of their unbrotherly and uncharitable treatment, our anſwerer told them, that they were as gently treated as might be; no kind of brotherly perſuaſion omitted towards them; moſt of them as yet kept their livings, though one or two were diſplaced. They were offered, as he adds, all kind of friendlineſs, if they could be contented to conform themſelves, yea if they would but be quiet and hold their peace; but that they, on the contrary ſide, moſt unchriſtianly and moſt unbrotherly, both publicly and privately, railed on thoſe that ſhewed this humanity towards them, ſlandered them by all means they could, and moſt unnaturally reported of them, ſeeking by all means their diſcredit. Soon after the *Admonition* came forth, it was backed with three other pamphlets, ſent to Dr Whitgift, as it were for a challenge. The firſt was a *preface* to the other two. The ſecond was *An Exhortation to the Biſhops to deal brotherly with their brethren*. The third was called *An Exhortation to the Biſhops and their Clergy to anſwere a little Booke that came forth the laſt Parliament, and to the other Brethren to judge of it by God's Word, until they ſhould ſee it anſwered; and not to be carried away with any reſpect of men*. To all which our author gave, as he ſaid, a brotherly anſwer, toward the end of his anſwer to the *Admonition*.

[*T*] *He wrote his D*[redacted] *the ſame year.*] He [redacted]ſented it to the Lord Treaſurer, [redacted] as follows. ‘It becometh me not, neither is it needeful, to deſire your Lordſhip to be zealous in this cauſe. For you know better what you have to do therein than I am able to inform you. Onelie this I am well aſſured of, that if they ſhould be ſuffered to procede as they have begun, nothing elles in the end can be looked for than confuſion both of the church and of the ſtate. But convenient diſcipline, joyned with doctrine, being duelie exequuted, wil ſone remedie al; for ſectes and ſchiſmes can by no meanes abyde theſe two, neyther wyll they long continew, where they are not by ſome one in authoritie cheriſhed and meynteyned. This, experience, and the ſtory of all ages, teach to be trew. February the 5th, 1573. From Trinity College in Cambridge.’

(gg) The text was John vi. 26.

and Heads of Colleges, to the Chancellor, to grant the Univerſity a power of diſpenſing with the rigor of the ſtatutes in giving degrees to foreigners and others of extraordinary merit without performing the ſcholaſtic exerciſes. He had likewiſe a letter of credence, dated Feb. 19th *(bb)*, wherein the Heads prayed the Chancellor to give him as much credit, in regard to the manner of doing this, as he ſhould think ought to be given to their own letters. In 1575 a *Rejoinder* § being publiſhed by Cartwright to our Author's *Defence*, he conſulted his friends upon it, who adviſing him to let it paſs as not worthy his notice, he yielded to that opinion *(U)*. At the ſame time he appeared with that warmth that was natural to his temper, againſt a deſign, then on foot, of aboliſhing pluralities, and taking away the impropriations, and tythes, from Biſhops, and Spiritual (not including Temporal) perſons, for the better proviſion of the poorer clergy [*W*]. March the 24th, the laſt day of the year 1576, he was nominated to the Biſhoprick of Worceſter, to which being confirmed, April 16, he was conſecrated April the 21ſt, 1577; and as this Biſhoprick brought him into the council for the Marches of Wales, he was preſently after* appointed Vice-Preſident of thoſe marches in the abſence of Sir Henry Sydney, Lord Preſident, made Lord Lieutenant of Ireland. He did not reſign his Maſterſhip of Trinity College till June; and in the interim procured a letter from the Chancellor, in order to prevent the practice (then in uſe) of taking money for the reſignation of Fellowſhips [*X*]. He likewiſe

[*U*] *He yielded to their opinion.*] Amongſt others who diſſuaded him, the learned Dr Whitaker (though himſelf much inclined to favour puritaniſm) was one; who, in a letter to Dr Whitgift upon this occaſion, has theſe words: *Quem Cartwrightus nuper emiſit libellum ejus magnam partem perlegi: ne vivam, ſi quid unquam viderim diſſolutius ac pene puerilius. Verborum ſatis ille quidem lautam novamque ſupellectilem habet, rerum omnino nullam, quantum ego judicare poſſum. Deinde non modo perverſe de Principis in rebus ſacris & eccleſiaſticis authoritate ſentit, ſed in Papiſtarum etiam cæſtra transfugit, a quibus tamen videri vult odio capitali diſſidere. Verum nec in hac causâ ferendus, ſed aliis etiam in partibus tela a Papiſtis mutuatur. Denique ut de Ambroſio dixit Hyeronymus verbis ludit, ſententiis dormitat, & plane indignus eſt, qui a quoquam docto refutetur.* Thus tranſlated by Dr Bancroft (27): I have read a great part of that book which Mr Cartwright hath lately publiſhed. I pray God I live not, if ever I ſaw any thing more looſely written, and almoſt more childiſhly. It is true, for words he hath a great ſtore, and thoſe both fine and new; but for matter, as far as I can judge, he is altogether barren. Moreover, he doth not only think perverſely of the authority of Princes in matters eccleſiaſtical, but alſo flyeth unto the Papiſts holds, from whom he would be thought to diſſent with a mortal hatred. But in this point he is not to be endured, and in other points alſo he borroweth his arguments from the Papiſts. To conclude, as Jerom ſaid of Ambroſe, he playeth with words, and is lame in his ſentiments, and is altogether unworthy to be confuted by any man of learning.

[*W*] *For the better proviſion of the poor clergy.*] A paper to this effect was communicated to him by the Biſhop of Ely, who deſired his advice and aſſiſtance about printing it, with a proper anſwer. To this our author replied, That he had not the leiſure to be wiſhed to peruſe the ſcript that his Lordſhip had ſent him; that the matter was worthy to be dealt in, and very neceſſary to be conſidered, and he wiſhed to God the like care and circumſpection were in many others that was in his Lordſhip; that the time and ſtate of the church required it; and as touching impropriations, he thought they were warily to be dealt withal: for conſidering now that every man ſought to pull from the church, how alſo the temporality did envy any property in the clergy, and what enemies they moſt of them were to the cathedrals, biſhopricks, and colleges, and other places of learning, and that moſt part of theſe conſiſted of impropriations, he feared leſt under pretence of reforming the one, the diſſolution and utter undoing of all the other would be ſought for, which, he added, would be the ruin of the church, at leaſt the fall of religion, and the decay of learning. He obſerved, that only the clergy ſhould be obliged thereby; for the temporal men would ſtill keep their intereſt in their leaſes that they had in ſuch impropriations, as he himſelf perceived by ſome conference he had with ſome great ones in the matter. Again, where it is ſaid *if the men of the church gained benefice to benefice, &c.* he acknowledged, that was to be reproved in ſuch as had no care in doing their duties; not in ſuch as laboured and were diligent; and that it was better, and more for the profit of the church, that ſome had many, than other ſome one. Moreover, that it was to be conſidered how long and injurious leaſes there were of the moſt part of eccleſiaſtical livings, dignities, prebends, and benefices; ſo that the living which was worth to the farmer 200 marks, was not worth to the incumbent 20 l. as he himſelf was able to prove in divers and ſundry ſuch kind of livings: ſeeing alſo that men had not now a-days that conſcience in paying their duties, that they had in times paſt; beſides many other commodities that were wont to be incident to ſuch livings, which were now utterly taken away; ſo that except it were lawful for men to join more livings together, you would have a beggarly clergy, which would be the decay of learning, religion, and in time of the church alſo: for that there would be no meet livings for learned men, beſides a few biſhopricks. Wherefore he thought ſuch things where they were amiſs, were rather to be reformed in the perſons that were not worthy of them, than by any common rule. In a word, that the temporality ſought to make the clergy beggars, that they might depend upon them; and this would be one means to bring it to paſs (28). Whitgift promiſed the Biſhop, that for his part, he would be ready to do any thing that might do good, and beſtow ſome pains in examining and anſwering the treatiſe, as he could get leiſure. It is remarkable, that theſe impropriations (ſome at leaſt) had not long before been ſettled upon the biſhopricks by Queen Elizabeth, in lieu of the good manors and Lordſhips then belonging to them, which the Queen took to herſelf, by virtue of an act of parliament to that purpoſe (29).

[*X*] *To prevent the practice of taking money for the reſignation of fellowſhips.*] The parliament had lately, viz. in the 18th of Elizabeth, taken notice of this abuſe, and a bill was brought in to prevent it, which paſſed both houſes; but, by the repreſentation of the Lord Treaſurer, the Queen had been prevailed upon not to give the royal aſſent. Dr Whitgift upon this occaſion wrote to that Lord, March the 28th this year, a letter, in which he firſt took notice of the reaſons for not paſſing the act, on account of the public declaration therein unavoidably to be made of the ſcandal of the univerſity, and alſo a great ſlander to the goſpel; beſides, what was only a fault of ſome colleges, would thereby ſeem to be common to all. However, that unleſs it would pleaſe his Lordſhip to procure ſome ſtrict order to be taken againſt ſuch corruption, the ſtaying of that act would rather animate thoſe that were evil diſpoſed to go on in their corrupt dealings. For it could not be denied that ſuch corruption had been uſed in ſome colleges in Cambridge, and that it was directly contrary to their oaths, and the ſtatutes; and that then it began to be an ordinary practice for fellows of colleges, when they were not diſpoſed to continue, to reſign up their fellowſhips for ſums of money, which as it was ſlanderous, he ſaid, to the univerſity, ſo it was againſt all good dealing, and in time would be the cauſe of much evil; wherefore he urged this Lord, as Chancellor of the univerſity, either by his letters to the univerſity, or otherwiſe as he ſhould think fit, to give ſtrait charge againſt all ſuch kind of dealings; and then, he truſted, the thing

likewiſe gave a ſolution of a caſe of conſcience, which was put to him upon a remarkable occaſion [*Y*]; and was very ſolicitous, before he left the college, that the ſtatutes of the Founder ſhould be religiouſly obſerved, in his ſucceſſors living unmarried [*Z*]. Whilſt he held the government of this college, he took pupils, and had ſeveral noblemen (*ii*) under his care. He was a very ſtrict obſerver of the ſtatutes himſelf, and held others to their public diſputations and exerciſes and prayers, (which he never miſſed) puniſhing any neglects or abſence from theſe ſeverely. For the ſame reaſon he uſually dined and ſupped in the common-hall. At parting he preached a farewel ſermon before the Univerſity at St Mary's, and another in Trinity College Chapel (*kk*), and was attended by a numerous train of the Heads and others his friends in the univerſity on his way from Cambridge towards Worceſter. Here finding the biſhoprick much impoveriſhed by long leaſes, he made a diligent ſearch into that matter, and paid 300l. out of his own purſe for the ſurrendry of a leaſe of Hollow and Grimley, two of the beſt manors belonging to that biſhoprick [*AA*]; and when the commiſſioners of concealed crown lands attempted to wreſt Hartlebury * from it, he had not only a warm conteſt with the Earl of Leiceſter, but likewiſe made a very bold ſpeech to the Queen upon that occaſion [*BB*]. At the ſame time he was very active in ſearching out and putting the laws in

(*ii*) As particularly the Earls of Worceſter and Cumberland, the Lord Zouch, and Sir Francis Bacon, afterwards Lord Verulam. Paul's Life, &c. p. 23.

(*kk*) The laſt-cited author tells us, p. 26. that he preſſed upon his collegians their continuance in peace and unity ſo movingly, that there were ſcarce any dry eyes in the congregation. His text was 2 Cor. xiii. 11.

* The Biſhop's palace.

would be reformed (30). But it ſeems his Lordſhip's orders had not the deſired effect; for an act of parliament paſſed to this purpoſe in 1589, the 31ſt of Eliz.

[*Y*] *He ſolved a caſe of conſcience put to him on a remarkable occaſion.*] It ſeems there were a ſort of pure brethren, chiefly about Malden in Eſſex, who, concluding themſelves abſolutely freed from all obligation to the whole law of Moſes, begun to argue, that the obſervation of the carnal precepts in the moral branch of that law was no neceſſary part of their duty; but rather a breach of the ſpiritual law of Chriſt. One Robert Bird, a miniſter, ſent to Dr Whitgift for his opinion a caſe upon it, including theſe two points. 1. Whether the whole law of Moſes was given particularly to the Jews, or no? 2. Whether, if it were given both to the Jews and Gentiles, it be abrogated by Chriſt his coming in whole or in part? To which our profeſſor returned the following ſolution. 1. We have nothing to do with the ceremonial and judicial laws, whereof one was given for a certain time, the other for a certain nation; but touching the moral law, which is the perfection of the law of nature, and afterwards was written in tables of ſtone, being the rule of God's juſtice, that remaineth for ever. 2dly, We are indeed free, but not from the obedience of the law, but from the curſe of the law. He further bid Mr Bird, if he met with any of thoſe pure and ſpiritual brethren, to aſk them this queſtion: Whether we ought to love God with all our hearts, and our neighbour as ourſelves? and then to go forward with them, if this be our duty, why is it not lawful for us to know how we ſhould perform the ſame (31). Hence we learn that in theſe days ſprung up the ſect of Solifidians, or Antinomians, which afterwards grew ſo rank and prevalent in the times of the uſurpation.

[*Z*] *In his ſucceſſors living unmarried.*] The Doctor had been always a very religious obſerver of the founder's will in the ſtatutes, while he was maſter; and nothing ſhews more how much he had this point at his heart, than the letter he wrote to his friend the Chancellor on this occaſion. He knew Dr Redman had very good intereſt at court, and that he had his eye upon the maſterſhip; he knew alſo that the doctor had a deſign to marry; and therefore notwithſtanding he had a great value and friendſhip for the doctor, yet he thought himſelf obliged, in conſcience to the founder, to write to Lord Burleigh, in order to let him know that the ſtatutes of that college required the maſter to live ſingle (32).

[*AA*] *He paid 300l. for the ſurrendry of a leaſe belonging to that biſhoprick.*] Sir George Paul gives the following accout of this matter (33). 'Dr Whitgift 'found,' ſays he, 'the biſhoprick, at his firſt coming, 'much impaired, by his predeceſſor's having granted 'away in long leaſes divers manors, parks, and manſion-houſes *: but that which much troubled him, 'and wherein he moſt of all ſtirred, was the letting 'to Maſter Abington, Cofferer to the late Queen '[Mary] the rent-corn of his two beſt manors, Hollow and Grimla, which are the chief upholding of 'the biſhop's hoſpitality, and without which, eſpecially in dear years, he is not able to keep houſe. 'This leaſe being let to Maſter Abington, a great 'man then to contend with, his wife being ſome time 'alſo the Queen's bedfellow, the Biſhop notwithſtanding did call it in queſtion; having now, beſides his 'honourable friends, the Lord Keeper and the Lord 'Treaſurer, gained, by his attendance at court, many 'more about her Majeſty, who much favoured him, 'and profeſſed great love unto him; eſpecially the 'Earl of Leiceſter, Sir Chriſtopher Hatton, Vicechamberlain, and Sir Francis Walſingham, Principal 'Secretary: all in ſpecial grace with her Highneſs. 'Maſter Abington, by his wife's means, procured her 'Majeſty's gracious letters, written earneſtly in his 'behalf. The Biſhop returning anſwer unto her Majeſty, and informing her by his friends, how prejucial it was to the biſhoprick, ſhe was thereupon 'much diſpleaſed wtih Maſter Abington, and took 'part with the Biſhop; inſomuch as Abington would 'willingly have yielded the rent corn for the Biſhop's 'own time, ſo that his leaſe might have ſtill ſtood on 'foot againſt his ſucceſſor, which the Biſhop utterly 'refuſed; and in the end was rather contented, by way 'of compoſition (*notwithſtanding that the leaſe was 'void, becauſe the rent-corn was never before let*) to 'give Abington 300l. out of his own purſe, to have 'the leaſe ſurrendred, and to redeem the ſaid corn; '*which*,' ſays Sir George, '*yet remaineth; and I hope 'ever will remain, unto his ſucceſſors in that ſee.*'

[*BB*] *He made a bold ſpeech to the Queen upon that occaſion.*] He beſought her Majeſty to hear him with patience †, and to believe that her's and the church's ſafety were dearer to him than *his life*, but his conſcience dearer than both. *He* prayed her, that ſhe would give him leave to do his duty, and to tell her that princes were deputed *nurſing* fathers to the church, and owed it protection; and therefore God forbid that ſhe ſhould be ſo much as paſſive in its ruin, when ſhe might prevent it, or that he ſhould behold it without horror and deteſtation, or ſhould forbear to tell her *of* the ſin and danger. That though this was an age when the primitive piety and care of the church lands were much decayed, he beſeeched her to conſider that there were ſuch ſins as profaneneſs and ſacrilege; for, if there were not, they could not have names in the holy writ, and particularly in the New Teſtament. He mentioned that judiciary act of our Saviour (though he did not meddle in ſecular judgments) in making a whip, and driving profaners out of the temple; and that it was a ſaying of St Paul to the Chriſtians of his time that were offended with idolatry, *Thou that abhorreſt idols, doſt thou commit ſacrilege?* That the conſideration thereof would incline her Majeſty to prevent the curſe thereof, which how heavily her royal father ~~felt, he did not care to men~~tion. That Conſtantine the firſt Chriſtian Emperor, and Helena his mother, that King Edgar, and Edward the Confeſſor, and many more of her Majeſty's predeceſſors, and many others, had given to God and his church much lands and many immunities, and gave them as an abſolute right and ſacrifice to God, and that they had impoſed a curſe upon the alienators; adding theſe words, *God forbid your Majeſty ſhould be liable to that curſe.* He ſaid further, that ſhe was entruſted with their preſervation; and to make her the better underſtand the danger of the curſe, he beſeeched her not to forget that the church's lands and power had been endeavoured to be preſerved as far as human reaſon and the laws of this nation had been able to preſerve them, by an immediate and moſt ſacred obligation upon the conſciences of the princes of this realm. That thoſe who conſulted *Magna Charta*, ſhould

(32) The famous Dr Barrow was afterwards in the ſame way of thinking.— See his article.

(33) In our Archbp's life, p. 27, 28.

* This was no more than was common to all eccleſiaſtical corporations.

† A writ was come out of chancery into Worceſterſhire, to enquire of ſuch lands as the Duke of Northumberland had 30 Henry VIII. It was put in execution, and though the chief ſhooting (it is his own term) was at him, yet the jury found nothing that might hurt him.

in execution againſt the Popiſh Recuſants [*CC*], having received her Highneſs's expreſs commands for that purpoſe, from whom, by the intereſt of Lord Burleigh, he obtained a grant in the latter end of the year 1578, to beſtow the Prebends of his church on ſuch perſons as he thought fit [*DD*], which diſpoſal before this time had not been in the nomination of the Biſhop, but of the crown, nor did ſhe now give away the right of ſuch diſpoſal to him, and his ſucceſſors, but only as a particular favour to himſelf, during his continuance in that See. In his character of Vice-preſident of Wales the ſame ſpirit and reſolution ſhewed itſelf, as had been ſeen in him at Trinity College. For though we are told (*ll*), that he ſat a whole year in that court before he took upon him to bear any ſway there, yet it is certain he was during that time oppoſed by his brother judges, and for that reaſon he applied to the privy council for a ſpecial commiſſion, which was granted to him, and two of the Welſh Biſhops §, excluſive of others, to be his aſſociates. After this he acted with ſuch a vigilance and intrepidity as gave offence to the Preſident †, [*EE*] upon whoſe return from Ireland, and taking the charge upon himſelf, our author was diſmiſſed from the Vicepreſidentſhip February 8th, 1579: but being ſtill of the council, he acted with the ſame reſolution, as far as lay in his power, and many years afterwards oppoſed the Preſident in a ſuit made by him for a new commiſſion in religious matters [*FF*]. In 1580 he obtained the nomination of the juſtices of the peace for

§ Bangor and St Aſaph.

† Sir Henry Sydney.

ſhould find that all her predeceſſors were at their coronations, and ſo was ſhe alſo, ſworn before the nobility and biſhops then preſent, and in the preſence of God, and in his ſtead of him that anointed her, to maintain the church's lands, and the rights belonging to it, and this teſtified openly at the holy altar, by laying her hand upon the bible there lying before her. And that many modern ſtatutes denounced a curſe againſt thoſe that brake *Magna Charta*; and what account could be given for that breach at the great day, either by her Majeſty or himſelf, were it wilfully or but negligently violated, he knew not. He begged ſhe would not ſuffer certain light exceptions againſt ſome few clergy to prevail with her to puniſh poſterity. He went on telling her, that religion was the foundation and cement of human ſociety; and that when they that ſerved at God's altar ſhould be expoſed to poverty, then religion itſelf would be expoſed to ſcorn, and become contemptible, as ſhe might obſerve in too many poor vicarages of this nation; and in ſhort, that as ſhe was intruſted by the Almighty with a great power by the late act or acts, either to preſerve or waſte the church-lands, *Diſpoſe of them for Jeſus' ſake*, ſaid he to her, *as the donor intended; let neither friends nor flatterers prevail with you to do otherwiſe, and put a ſtop to the approaching ruin of the church, as you expect comfort at the laſt day; for kings muſt be judged*. He concluded, imploring her pardon for his great plainneſs, and begged ſtill to be continued in her favour (34).

(34) Strype, b. II. ch. I.

[CC] *He was active in putting the laws in execution againſt Popiſh recuſants.*] Purſuant to an order of the privy council, he was ſo haſty to ſend certificates of the names of all theſe recuſants, that his certificates were found by the privy council very faulty, ſeveral of them being without the Chriſtian and proper names, others having no mention of the places of their abode, whilſt ſome were even wrongfully accuſed, being certified not to come to church, who afterwards made due proof of the contrary, that albeit they did not at all times attend divine ſervice in the church, being detained by their lawful buſineſs, yet did they commonly and for the moſt part, and were well known and well affected that way. Wherefore the privy council thought proper to ſend him particular directions how to make theſe certificates (35).

(35) Id. ibid.

[DD] *He obtained a grant to diſpoſe of the prebends in his church.*] The letter he wrote to Lord Burleigh * on this occaſion, gives us a remarkable inſtance of his thirſt after power. He addreſſes his Lordſhip in theſe terms: 'That he ſhould be glad now to begin his 'ſuit to her Majeſty for the gift of the prebends of 'his church of Worceſter; and that ſince his coming 'to that biſhoprick, he had not one living to beſtow '[which was almoſt two years], neither was he in 'hope ere long to have any, unleſs it would pleaſe 'her Majeſty to be gracious unto him in this ſuit. 'That it could not be expreſſed how much good wiſe 'and learned preachers might do in thoſe countries, 'where, although there were many very backward, 'yet the moſt part were moſt deſirous and willing to 'hear; ſo that if he had, he ſaid, leave to beſtow 'the prebends upon ſuch perſons as he found fitting, 'he perſuaded himſelf that he could do very much 'good, by placing ſuch there as he was purpoſed by 'the grace of God to do: *wherefore for God's ſake*,' (as he earneſtly concludes) '*for the church's ſake, and 'for the commonwealth's ſake, I beſeech your Lordſhip 'to help forward my ſuit* (36).'

* It is dated Feb. 5, 1578.

(36) Ibid.

[EE] *Behaved with ſuch vigilance and intrepidity, as gave offence to the Preſident.*] At his entrance upon this office, his friend the Lord Treaſurer had given him a particular caution to ſend an account duly to the Preſident of every thing that was done in that court. Nevertheleſs, it was not long before Sir Henry complained of his remiſſneſs in that reſpect, of which when he was advertiſed by his friend, he ſent the following account, repreſenting that Sir Henry ſent ſundry letters to him at other mens ſuits, ſome whereof he was forced to deny, becauſe they were grounded upon wrong informations; yet that he did commonly anſwer ſuch letters, eſpecially if they required an anſwer: but, as he adds thereupon, it was very like that ſome who found themſelves grieved, did their endeavour to breed ſome miſlike, for that there were divers within that commiſſion, who thought by letters and friends to prevail in their evil cauſes, and that they ſuppoſed that none dared to withſtand them; but he truſted his Lordſhip [the Preſident] would not eaſily give credit to ſuch, and that when he [the Vice-preſident] lawfully might, he was ready to yield: *But if juſtice and conſcience otherwiſe required, he could not conſent; for ſure he was that they would bring a man peace at the laſt, and never be confounded, whereas friendſhip ſometimes failed, and was very mutable.*— He concludes thus: Therefore, my ſingular good Lord, I do think myſelf ſo bound unto you for your moſt friendly or rather fatherly advertiſements, that I cannot deviſe how to expreſs my thankfulneſs; but God, who knoweth all, knows my heart towards you (37).

(37) Id. p. 85.

Sir George Paul aſſures us (38), that while he continued in this poſt, he would never hear any cauſe or informations, or receive petitions privately, but openly, and from the petitioners themſelves; and when one of the gentlemen of his bedchamber made a requeſt to have the delivery of ſuitors petitions, and endorſe their anſwers, he was ſo much offended, as ſuppoſing the young gentleman had been tampered with, that he preſently diſcharged him his bedchamber, and could never afterwards very well brook him.

(38) In the life of Archbiſhop Whitgift, p. 33.

[FF] *He acted with the ſame reſolution, and oppoſed the Preſident in his ſuit for a new commiſſion in religious matters.*] Mr Strype tells us, he was a check upon the Preſident and ſome of the council his adherents, who were extremely addicted to rake and ſcrape from the people in the marches, and eſpecially from the clergy, by nice examinations and ſearches into their lives and all their private actions *; and particularly Scory, Biſhop of Hereford, made a complaint that his fame and life were both in danger by them, there being no appeal to Weſtminſter from the marches. In 1580 an act being paſſed for laying a penalty of 20 l. a month for ſuch as were abſent from divine ſervice †, Sir Henry Sydney endeavoured to get the laſt commiſſion for matters of religion within the marches renewed, as alſo to procure ſome ſpecial commiſſion of oyer and terminer for the ſame. Our author

* It was the practice of theſe courts to examine upon the oath *ex officio*.

† It is intitled. An act for reſtraining her Majeſty's ſubjects within their due obedience. 2d of Eliz.

(mm) Strype, ubi ſupra.

for the counties of Worceſter and Warwick (mm). In January 1582, he was appointed by the Archbiſhop of Canterbury chief commiſſioner for viſiting the church of Lichfield upon a particular occaſion, during which the government of that dioceſe was put under his care[GG]. The ſame year he compiled a new body of ſtatutes for the church of Hereford, and recovered ſome of the revenues belonging to it out of the hands of the concealers[HH]. The Queen had it in her eye to raiſe him to the higheſt dignity in the church before her intentions took place, and ſhewed an inclination, as was ſaid, to put him into Archbp Grindal's room before that prelate's death. So much is certain, that Grindal, in the condition he then was, had been deſirous to reign, and as deſirous of Whitgift for his ſucceſſor *; but Whitgift could not be perſuaded upon to comply with it; and in the Queen's preſence begged her pardon for not accepting thereof upon any condition whatſoever, during the life of the other. But upon Grindal's death, which happened the 6th of July 1583, the Queen nominated Whitgift to ſuceeed him, Auguſt the 14th following; and accordingly he was elected the 23d of the ſame month, and confirmed the 23d of September (nn). On the 17th of November, the Queen's acceſſion happening on a Sunday, he preached at Paul's Croſs upon this text, *Put them in mind to be ſubject to principalities*, &c. Tit. 3. At his firſt entrance upon this charge he found the Archbiſhoprick over-rated, and procured an order for the abatement of 100 l. to him and his ſucceſſors, on the payment

(nn) Idem, who p. 113. expoſes a ſlanderous ſtory firſt printed by Fitz-Herbert, and reprinted by N. N. in 1658, *permiſſu ſuperiorum*, in a book entitled, *The Politician's Catechiſm*, that the Queen at the Archbiſhop's conſecration laid her hand on his head.

* In teſtimony of his great eſteem for Whitgift, he bequeathed him in his will a ring with a ſapphire. Strype, ch. 1. book 3.

author being perſuaded the intent of it was only to get the 20 l. forfeiture from the recuſants, wrote a letter to Lord Burleigh to prevent it; intimating that there might likewiſe be a deſign to procure ſome further authority in the Lord Preſident over the clergy, which aſſuredly, ſays the Biſhop, was not for the bettering of any thing, but for the cauſes above ſpecified, to the greater charging of them within that commiſſion than any part of the realm beſides. It muſt be obſerved, that by this act the recuſants were to be tried at the ſeſſions for the reſpective counties, and our Biſhop had received a letter from the council with orders to him to prefer thoſe for that end to the *Cuſtos Rotulorum* of Worceſterſhire, and upon the conviction, the fines accrued to the crown, of which he takes notice in this letter to Burleigh, repreſenting to his Lordſhip, that, in his opinion, neither of the ſaid commiſſions (applied for by the Preſident) were convenient, nor like to tend to any reformation, but rather to the further burthening of her Majeſty's ſubjects within that principality for private gain, and alſo to the abridgment of her Majeſty's commodity; that the meaning was to convert the 20 l. a month forfeited by the recuſants for the benefit of the houſe [council] there, which, he ſaid, was needleſs, for that they received more already than was well employed. He concludes, that he was bold to ſignify unto his Lordſhip what he thought, meaſuring that to come by that which was paſt; and therefore humbly beſeeching him to have conſideration thereof (39).

(39) Ch. 2. book 2. p. 95, 96.

[GG] *The government of that dioceſe was put under his care.*] The Bp of this dioceſe, Dr Overton, had commenced a law-ſuit with the Dean and Chapter, for refuſing to pay what he called a *Subſidium charitativum* of 12d. in the pound, due, as he affirmed, to every Biſhop at his firſt entrance, by ancient preſcription and uſage of that dioceſe. He had likewiſe another law-quarrel with the Chancellor, one Dr Beacon, who had brought an action againſt him for taking upon him to put one Babington in a joint commiſſion with him into that office, and for aſſigning to Babington a moiety of the profits. The affair had been before the privy council, by whom it was referred to the Archbiſhop of Canterbury [Grindal], who appointed the Biſhop of Worceſter, with the aſſiſtance of Dr Aubrey, his Vicar-General, Dr Coſin, L L. D. and one Gryffyth, preacher of God's word, to viſit the church; and particularly commiſſioned the firſt to take care likewiſe of the dioceſe, in the room of Biſhop Overton, who was then ſuſpended *ex officio*. Grindal's letter is to this effect: That he left to him [Whitgift] to find occaſion for the appeaſing theſe contentions, ſo offenſive, in the opinion of the Lords of the Council and his, ſo ſcandalous to all the perſons who were concerned, and ſo prejudical and hurtful to the quiet of the dioceſe; and therefore he truſted his Lordſhip would take pains to end it, and in the mean time to have a care of the government of the dioceſe in effect during this commiſſion. This letter of Grindal's is dated in January 1582; the commiſſion bears date in February; and, 13 of June, he received a letter from the Vicar-General (by the Archbiſhop's order) to put off the viſitation to the end of that month; but Dr Whitgift finding Biſhop Overton greatly involved in debt by means of theſe broils, he got this altered *, and the Biſhop reſtored to his juriſdiction and temporalities, on the 27th. There was next year eſtabliſhed, and endowed with 40 l. per annum, a divinity lecture, to be read Wedneſdays and Fridays; the Lecturer to be appointed by the Dean and Chapter; and for the encreaſe and advancement of his living, he had an annual ſtipend of 10 or 12 l. per ann. of the Queen's allowance to that church, for 4 ſermons to be preached in Lent, in the chapel called St Mary's. This was ordered by the privy council, January 7th, 1582, during Whitgift's viſitation; and therefore it is more than probable, as Mr Strype ſays, that it was ſettled by his means (40).

* Overton had deſired the lord treaſurer that his debts might be paid out of an extent of his lands by 3 or 400 l. a year, till all ſhould be diſcharged. p. 105. ch. 3.

(40) p. 106.

[HH] *He compiled a new body of ſtatutes for the church of Hereford, and recovered ſome of its revenues out of the hands of the concealers.*] Scory, Biſhop of Hereford, had more than once complained of the ill ſtate of that church, and prayed that it might be reformed, and had applied to Secretary Walſingham for that purpoſe, which had occaſioned an order from the privy council to the biſhop of Worceſter, jointly with the biſhop of Hereford, and ſome others of the council for the marches of Wales, to look into this matter, and to frame the ſtatutes of that church ſo as they might comport with the reformation. This being done, and ſent to the privy council for their approbation, our prelate acquainted his friend Lord Burleigh with it. The letter is dated February the 11th, 1582, wherein he takes notice, that ‘ in their ‘ reformation of theſe ſtatutes, they had due conſider- ‘ation as well to the preſent ſtate of the church, as ‘ alſo to the ancient ſtate and order in the ſame, reform- ‘ing the abuſes in them both, and adding that which ‘ was therein wanting. That the Dean and Chapter ‘ had peruſed them, and ſeemed to like them very ‘ well; yet he feared, he ſaid, ſome ſecret working ‘ to the contrary, becauſe they were ſomewhat ſtrait, ‘ and in his opinion moſt neceſſary.’ One of theſe new ſtatutes was for the ſettling a divinity lecture and a free ſchool, which occaſioned a petition of that church, that upon giving up to her Majeſty ſome poſſeſſions, the rectory of Lugwarden, then in the hands of the concealers, might be again granted to them for their divinity lecturer, upon his payment of ſome penſion for the ſupport of the free ſchool. This petition was incloſed in his letter to Lord Burleigh by our author, who prayed that lord to think well of the miſerable condition of that church and divers others, greatly impoveriſhed by unreaſonable leaſes and other means, ſo that they were not able to perform what was exacted from them, and that if they were further ſifted, they would come in the end to nothing; that theſe were the chief and principal rewards fit for learned divines, and he was perſuaded God had the rather bleſſed and proſpered his Lordſhip in his doings, and would add to his bleſſings wherewith he had bleſſed him long continuance in them, if he would take upon him to bring this iſſue to a good ſucceſs. That St Ambroſe called the goods and lands of the church *the patrimony of Chriſt*, and the wrongs and injuries done thereto, *wrongs and injuries done to Chriſt, &c.* Accordingly the petition was granted, and the church put into poſſeſſion of the good rectory of Lugwarden, with its chapelries, the next year (41).

(41) Chap. 4.

of firſt-fruits. He ſhortly after recovered from the Queen, as part of the poſſeſſions of the Archbiſhoprick, Long-Beach Wood in Kent, which had been many years detained from his predeceſſor by Sir James Croft, Comptroller of her Majeſty's houſhold. But that which moſt concerned him was to ſee the eſtabliſhed uniformity of the church in ſo great diſorder as it was from the noncomplying Puritans, who taking advantage of his predeceſſor's eaſineſs in that reſpect, were poſſeſſed of a great many eccleſiaſtical benefices and preferments, in which they were ſupported by ſome of the principal men at court. He therefore ſet himſelf with extraordinary zeal and vigour to reform theſe infringements of the conſtitution [*II*], for which he had the Queen's expreſs orders (*oo*). With this view, on the 5th of December this year, he moved for an eccleſiaſtical commiſſion, which was ſoon after iſſued to him with the Biſhop of London, and divers others. To the ſame purpoſe in 1584, he drew up a form of examination, containing 24 articles,

(oo) Paul's life, &c. p. 39.

[*II*] *He ſet himſelf with extraordinary zeal and vigour to reform theſe infringements of the eccleſiaſtical conſtitution.*] His alertneſs in this matter will be ſeen by attending to the dates of the ſeveral ſteps he took therein, as well as from the nature of thoſe ſteps. He was not confirmed in the archbiſhopric till the 23d of September, and yet before the month was expired, he drew up twelve articles of inquiry with the conſent of the reſt of the biſhops of his province, to whom they were ſent by him in a circular letter, dated October the 19th, being twelve injunctions concerning ſo many particulars for uniformity; by the ſixth of which every miniſter was required to ſubſcribe, 1. to the Queen's ſupremacy, 2. to the Book of Common Prayer, and 3. to the XXXIX Articles of Religion. To the ſame purpoſe ten other articles being ſent to him by the privy council, he ſent them to the biſhops incloſed in a circular letter, dated December the 12th. (42) The 5th of the ſame month, he moved for a new eccleſiaſtical commiſſion, which ſhortly after was granted. In the interim, ſome oppoſition being made, and objections urged by ſeveral at court againſt it, he drew up a paper, which he ſent to Lord Burleigh, containing the following reaſons for it. ' 1. Eccleſiaſtical cenſures are too ſhort to meet with notorious offences and iniquities, which were puniſhed only by a white ſheet; but by the commiſſion they are puniſhed by fines, which is very commodious to the Queen, or by impriſonment, &c. 2. If any ſuch notorious offenders fly out of the dioceſe of his ordinary into another, and ſo from dioceſe to dioceſe, he cannot be gotten to be puniſhed, but by the ſaid commiſſion. 3. If any man put away his wife *ſine alemoniis*, and flee into another dioceſe, and ſo on, he cannot be compelled, but by the commiſſion, nor ſhe relieved. 4. If any wife, either contracted or married, flee from her huſband into another dioceſe, and ſo on, ſhe cannot be come by, but by the commiſſion. 5. There is no law to compel any man or woman to ſtay *lite pendente* from contracting and marrying, but the admonition of the judge, which they contemn; but the commiſſion binds not to contract. 6. The commiſſion ſees that ſearch be made for unlawful books, and examineth the writers, printers, and ſellers, upon their oath, which the ordinary cannot do. 7. Diſordered perſons, commonly called Puritans, contemn the cenſures eccleſiaſtical; ſo that the realm will ſwarm with them, if they be not met withal by the commiſſion. 8 If a benefice be litigious, the church doors will be ſhut up, ſervice ſhall be unſaid, and great quarrels ſhall grow about the fruits, if the commiſſion don't by ſequeſtration help it, for the biſhop's ſequeſtration they will contemn, becauſe they can but excommunicate; and by that time the writ *de Excommunicato Capiendo* can be ſued out, the ſervice of God will be intermitted peradventure a year or two. 9. No notorious fault in any miniſter can be notoriouſly puniſhed, but by the commiſſion. 10. The whole eccleſiaſtical law is a carcaſe without a ſoul, if it be not in theſe wants ſupplied by the commiſſion. 11. The lack of the commiſſion one half year would breed great inconveniences, and more than would in long time after be wholly redreſſed.—— Mr Strype obſerves (43), that the danger from the activity of the Popiſh prieſts haſtened this commiſſion; preceding the ſuit for which, he preached at St Paul's Croſs, before the Queen, November 17th, 1583 (44), when he very warmly expoſed the dangerous tendency to her Majeſty's government of the Puritans doctrine, and particularly of Hacket's principle for murdering princes who ordered any thing againſt the law of Chriſt. But I would to God, ſays he, they did not deceive many whoſe duty it is rather to ſuppreſs this vain faction, than to nouriſh it, [meaning ſome, as Fr. Knolles, &c. even in the court and privy council]. Not long after he made his metropolitical viſitation, beginning with the dioceſe of Bangor. Some of his officers having ſummoned the Kentiſh clergy to ſubſcribe the three forementioned articles, were, upon their refuſal, pronounced contumacious; upon which they appealing to the Archbiſhop, were heard by him for two or three days ſucceſſively; and perſiſting in their contumacy, he ſuſpended them. In pronouncing ſentence, it was declared, that in denying the two firſt articles, they ſeparated themſelves from the church, and condemned the right ſervice of God, in prayer and adminiſtration of the ſacraments, in the church of England, and the miniſters of the ſame, and diſobeyed her Majeſty's authority. Upon their appealing to the Lords of the Council, he acquainted that board, February 8th, that ſeeing it had pleaſed her Majeſty her own ſelf in expreſs words to commit theſe cauſes eccleſiaſtical to him, as to one who was to make anſwer to God and to her Majeſty in that behalf, his office and place alſo requiring the ſame, therefore they were not incident to the council-board. He then proceeds to give them an account of his conference he had with the miniſters, and repeats the three articles to them; concluding with this challenge: *And here I do proteſt and teſtify unto your Lordſhips, that the three articles whereunto they are moved to ſubſcribe are ſuch as I am ready by learning to defend in manner and form as they are ſet, againſt all miſlikers thereof in England or elſewhere.* February 4th, 1483 (45). However, he had better ſucceſs with ſome miniſters in Suſſex, who had been ſuſpended by his Commiſſary, for refuſing to ſubſcribe, but were afterwards convinced by the Archbiſhop, and complied. Their objections being the ſame as have been conſtantly offered ſince by the Preſbyterian Diſſenters, who ſprung out of the Puritans, deſerve a place here, together with our Archbiſhop's anſwer, as follows. 1. In the Rubric ſet before the Catechiſm it being ſaid, *That no man ſhall think that any detriment will come unto children by deferring their confirmation. He ſhall know for truth, that it is certain by God's word, that children being baptized, have all things neceſſary to their ſalvation, and be undoubtedly ſaved.* They doubt, whether by theſe words the book confirmed the opinion that ſacraments conferred grace *ex opere operato?* The Archbiſhop anſwered, No: the reaſon was, to ſhew that confirmation was not neceſſary to ſalvation, againſt the Papiſts. 2. In the rubric for the form of baptiſm, it is ſaid, *Then the prieſt ſhall make a croſs upon the child's forehead.* They doubt, whether this were made an addition to the ſacrament, as if the baptiſm were imperfect without it? Anſwer. No: croſſing was only a ſignificant ceremony, and profitable circumſtance, as is expreſſed in the book. 3. doubt. In the book of ordering deacons and prieſts, concerning the words *receiveth the Holy Ghoſt*, whether thereby it is meant that the biſhop had authority to give the Holy Ghoſt? Anſwer. The biſhop does not thereby take upon him to give the Holy Ghoſt, but only *inſtrumentaliter*, not as the author, but the miniſter: the words are Chriſt's, uſed in admitting the apoſtles to the miniſtry, and therefore uſed by us on the like occaſion, to ſignify that God by our miniſtry and impoſition of hands, as by the inſtruments, doth give the holy Spirit to all ſuch as are rightfully called to the miniſtry. The laſt doubt was, of baptizing by women: To which it was anſwered, that the book did not name women, when it ſpake of prieſt's baptiſm; and that their ſubſcription was not required to any thing that was not expreſſed in the book (46).

which he ſent to the Biſhops of his province, enjoining them to ſummon all ſuch clergy as in their reſpective dioceſes were ſuſpected of nonconformity, and to require them to anſwer thoſe articles ſeverally upon oath *ex officio mero*, likewiſe to ſubſcribe to the Queen's ſupremacy, the Book of Common Prayer, and the 39 articles of religion. At the ſame time he held conferences with ſeveral of the Puritans, and by that means brought ſome to a compliance; and when others appealed from the eccleſiaſtical commiſſion to the council, he reſolutely aſſerted his juriſdiction, and vindicated his proceedings at the peril of his life, and even in ſome caſes againſt the opinion of Lord Burleigh [*KK*], who was

[*KK*] *Even at the peril of his life, and againſt the opinion of Lord Burleigh.*] The 24 articles mentioned above in the text, were drawn up in May 1583, and confirmed in November this year. Some miniſters of Ely being ſuſpended, for refuſing to anſwer theſe interrogatories, applied to the council, who wrote a letter to the Archbiſhop in their favour, May 26; to which he ſent an anſwer preſently, and in the concluſion he told the council, *that rather than grant them liberty to preach, he would chuſe to die, or live in priſon all the days of his life, rather than be an occaſion thereof, or ever conſent unto it.* My Lord Burleigh likewiſe thinking them hardly uſed in the eccleſiaſtical commiſſion, adviſed them not to anſwer to the articles, except their conſciences might ſuffer them; of which he informed the Archbiſhop, intimating his diſlike of the 24 articles, and their proceedings in conſequence of them, in ſeveral letters. To theſe the Archbiſhop anſwered ſeverally, and immediately after the receipt of them, in ſubſtance as follows. In a letter, dated June 14, from Croyden, he declares himſelf content to be ſacrificed in ſo good a cauſe. That the laws were with him, whatever Sir Francis Knollys (who, he ſaid, had little ſkill) ſaid to the contrary *. Burleigh, in a ſecond letter, dated July 1, expreſſing himſelf in ſtronger terms againſt theſe proceedings, concludes, that the articles were branched out into ſo many circumſtances, that he thought the Inquiſitors of Spain uſed not ſo many queſtions to trap others; and that this critical ſifting of miniſters was not to reform, but to enſnare: but however, upon his requeſt, he would leave them to his authority, nor *thruſt his ſickle into another man's harveſt.* To this the Archbiſhop ſends an anſwer, dated July 3, to the following purport: That as touching the 24 articles, which his Lordſhip ſeemed ſo much to diſlike, as written in a Romiſh ſtile, and ſmelling of the Romiſh Inquiſition, he marvelled at his Lordſhip's ſpeeches, ſeeing it was the ordinary courſe in other courts, as in the Star chamber, the Courts of the Marches, and other places; and that the objection of encouraging the Papiſts by theſe courſes, had neither probability nor likelihood [ſo he expreſſes himſelf]. That as to his Lordſhip's ſpeech for the two miniſters, viz. that they were peaceable, obſerved the book, denied the things wherewith they were charged, and deſired to be tried, the Archbiſhop demanded, now they were to be tried, why did they refuſe it *qui male egit odit lucem?* That the articles he miniſtred unto them were framed by the moſt learned in the laws, and who, he dared to ſay, hated both the Romiſh doctrine and Romiſh Inquiſition; and that he miniſtred them to the intent only that he might truly underſtand whether they were ſuch manner of men, or no, as they pretended to be, eſpecially ſeeing by public fame they were noted of the contrary, and one of them preſented by the ſworn men of his pariſh for his diſorders, as he was informed by his official there. That time would not ſerve him to write much, that he referred the reſt to the report of the bearer; truſting his Lordſhip would conſider of things as they were, and not as they ſeemed to be, or as ſome would have them: that he thought it high time to put thoſe to ſilence, who were and had been the inſtruments of ſuch great diſcontentment, as was pretended; that conſcience was no more excuſe for them than it was for the Papiſts or Anabaptiſts, in whoſe ſteps they walked. He knew, he ſaid, that he was eſpecially ſought, and many threatning words came to his ears to terrify him from proceeding: that the Biſhop of Cheſter had wrote to him of late, and that in his letter a little paper was incloſed, the copy whereof he ſent to his Lordſhip. '*You know* (ſaid 'the Archbiſhop) *whom he knoweth*; but it moves 'me not; he can do no more than God will permit 'him. It is ſtrange, continues he, to underſtand 'what devices have been uſed to move me to be at 'ſome mens becks, the particularities of all which he 'would one day declare to his Lordſhip; but *Dominus illuminatio mea, & ſalus mea quem timebo.* I am, 'ſays he, therefore at a point, and ſay with David, '*In manibus tuis, Domine, ſortes meæ*; they can't do 'more againſt me than he will ſuffer them; and, if 'there be no other remedy, I am content to be ſacrificed in ſo good a cauſe; which I will never betray nor give over, God, her Majeſty, all the laws, 'my own conſcience and duty, being with me.' He concludes, beſeeching his Lordſhip not to be diſcomfited, but continue: the cauſe is good, and the complaints being general, are vain and without cauſe, as will appear when they deſcend to particularities. To encourage his Lordſhip, the Archbiſhop likewiſe, June 24, ſends him a ſchedule of the number of Puritan preachers in his province, with their degrees, confronting them with the conformiſts, whereby it appeared that there were 786 conformiſts, and only 49 recuſants.—Lord Burleigh, in another letter, ſtill inſiſting that he would not call his proceedings rigorous and captious, but that they were ſcarcely charitable; by way of defence againſt this, in a letter, dated July the 15th, the Archbiſhop ſends a paper, ſuperſcribed thus: *Reaſons why it is convenient that thoſe which are culpable in the Articles miniſtred judicially by the Archbiſhop of Canterbury and others, her Majeſty's Commiſſioners for cauſes eccleſiaſtical, ſhall be examined of the ſame Articles upon their oaths.* 1. That by the eccleſiaſtical laws remaining in force, ſuch articles may be miniſtred; this is ſo clear by all, that it was never hitherto called into doubt. 2. That this manner of proceeding hath been tried againſt ſuch as were vehemently ſuſpected, preſented, and detected by their neighbours, or whoſe faults were notorious, as by open preaching, ſince there hath been any law eccleſiaſtical in this realm. 3. For the diſcovery of any Popery, it hath been uſed in King Edward's time, in the deprivation of ſundry biſhops at that time, as it may appear by the proceſſes, although withal for the proof of thoſe things that they denied witneſſes were alſo uſed. 4. In her Majeſty's moſt happy reign, even from the beginning, this manner of proceeding hath been uſed againſt the one extreme and the other as general, againſt all the Papiſts, and againſt all thoſe that would not follow the book of Common Prayer eſtabliſhed by authority; namely, againſt Mr Sampſon, and others; and the Lords of the Privy Council committed certain to the Fleet, for counſelling Sir John Southword and other Papiſts not to anſwer upon articles concerning their own facts and opinions, miniſtred unto them by her Highneſs's Commiſſioners for cauſes eccleſiaſtical, except a fame thereof were firſt proved. 5. It is meet alſo to be done *ex officio mero*, becauſe upon the confeſſion of ſuch offences no pecuniary penalty is ſet down, whereby the informer (as in other temporal courts) may be conſidered for his charge and pains, ſo that ſuch faults would elſe be wholly unreformed. 6. This courſe is not againſt charity, for it is warranted by law as neceſſary for reforming of offenders and diſturbers of the unity of the church, and for avoiding delays and frivolous exceptions againſt ſuch as otherwiſe ſhould inform, denounce, accuſe, or detect them; and becauſe none are in this manner to be proceeded againſt, but whom their own ſpeeches or acts, the public fame, and ſome of credit, as their ordinary, and ſuch like, ſhall denounce, and ſignify to be ſuch as are to be reformed in this behalf. 7. That the form of ſuch proceedings by articles *ex officio mero* is uſual; it may appear by all records in eccleſiaſtical courts from the beginning; in all eccleſiaſtical commiſſions, namely, by the particular commiſſion and proceedings againſt the Biſhops of London and Winton in King Edward's time, and from the beginning of her Majeſty's reign, in the eccleſiaſtical commiſſion, till this hour; and therefore warranted by ſtatute. 8. If it be ſaid that it be againſt law, reaſon, and charity, for a man to accuſe

* He had wrote a paper in defence of thoſe puritan recuſants, and ſent it to the Archbiſhop.

was his chief friend there. He waited this year alſo, about theſe matters, upon the Queen, who had been ſolicited in favour of ſome of the Innovators againſt the Liturgy, and ſoon after ſent her highneſs his anſwer to all their moſt plauſible objections that were commonly urged by them, and gives her ſeveral reaſons why the diſcipline was rather to be ſuppreſſed, than by writing confuted [*LL*]. In the mean time he prevailed to have ſome of the ſees filled, that had been vacant ever ſince the ejection of the Popiſh biſhops; and obtained a promiſe from Burleigh to complete the whole bench *(pp)*. Nor did his zeal for the eſtabliſhed eccleſiaſtical polity diſplay itſelf with leſs warmth in oppoſing the election this year of Mr Walter Travers to the Maſterſhip of the Temple, and in adviſing a reſtraint to be laid upon the preſs at Cambridge [*MM*]. Several petitions

accuſe himſelf *quia nemo tenetur ſeipſum prodere aut propriam turpitudinem revelare*; I anſwer, that by all charity and reaſon, *Proditus per denunciationem alterius ſive per famam, tenetur ſeipſum oſtendere, ad evitandum ſcandalum, & ſeipſum purgandum. Prælatus poteſt inquirere ſine prævia fama, ergo a fortiori Delegati per principem poſſunt; ad hæc in iſtis articulis turpitudo non inquiritur aut flagitium, ſed exceſſus & errata clericorum circa publicam functionem miniſterii, de quibus Ordinario rationem reddere coguntur.* 9. Touching the ſubſtance of the articles, firſt, is deduced there being deacons or miniſters in the church, with the lawfulneſs of that manner of ordering; (2.) The eſtabliſhing the book of Common Prayer by ſtatute, and the charge given to biſhops and ordinaries for ſeeing the execution of the ſaid ſtatute; (3.) The goodneſs of the book, by the ſame words whereby the ſtatute of Elizabeth calls and termeth it; (4.) ſeveral branches of breaches of the book being *de propriis factis*; (5.) is deduced detections againſt them, and ſuch monitions as have been given them to teſtify their conformity hereafter, and whether they wilfully ſtill continue ſuch breaches of law in their miniſtration; (6.) their aſſembling of conventicles for the maintenance of their factious dealings. 10. For the ſecond, fourth, and ſixth poyntes, no man will think it unmeet they ſhould be examined, yf they would have them touched for any breach of the book. 11. The article for examination whether they be deacons or miniſters ordered according to the law of the land, is moſt neceſſary; firſt, for the grounds of the proceeding, leſt the breach of the book be objected to them who are not bound to obſerve it; (2.) to meet with ſuch ſchiſmaticks, whereof there is ſufficient experience, which either thruſt themſelves into the miniſtry without any lawful calling at all, or elſe take orders at Antwerpe, or elſewhere beyond the ſeas. 12. The article for their opinion of the lawfulneſs of their admiſſion into the miniſtry, is to meet with ſuch hypocrites, as to be enabled for a living, will be content to be ordered at a biſhop's hands, and yet, for ſatisfaction of their factious humour, will afterwards have a calling of certain brethren miniſters, with laying on of hands, in a private houſe, or in a conventicle, to the manifeſt ſlaunder of the church of England, and the nouriſhing of a flatte ſchiſm; (2.) for the detecting of ſuch as not by private, but by public ſpeeches, and written pamphlettes ſpread abroad, do deprave the whole order eccleſiaſtical of this church, and the lawfulneſs of calling therein; advouching no calling lawful, but where their fancied monſtrouſe ſignorie, or the aſſent of the people, do admit into the miniſtrie. 13. The ſequel that would follow of theſe articles being convinced or proved, is not ſo much as deprivation from eccleſiaſtical livings, if there be not obſtinate perſiſting in, or iterating, the ſame offence; a matter far different from the bloody Inquiſition in time of Popery, or of the ſix articles, where death was the ſequel againſt the criminal. 14. It is to be conſidered, what encouragement and probable appearance it would breed to the dangerous papiſtical ſacraments, if place be given by the chief magiſtrates eccleſiaſtical to perſons that tende of ſingularitie, to the diſturbance of the good peace of the church, and to the diſcredit of that, for diſallowing whereof the obinate Papiſt is worthily puniſhed. 15. The number of theſe ſingular perſons, in compariſon of the quiet and conformable, are few, and their qualities are alſo, for excellence of gifts in learning, diſcretion, and conſiderate zeal, far inferior to thoſe other that yield their conformity; and for demonſtration and proof both of the numbers and alſo of the difference of good parts and learning in the province of Canterbury, there are but —— hundred that refuſe, and —— thouſandes that had yielded their conformities. — Lord Burleigh being not ſtill perſuaded of the juſtneſs and blameleſſneſs of his proceedings, he wrote again, September the 14th, repreſenting that it was not variety in judgment concerning ſome circumſtances, that could, he truſted, diminiſh that good affection in his Lordſhip or in himſelf, which had been by ſo long time and experience confirmed; that hereof he was aſſured himſelf, and it was his belief, that however he was blamed, yet upon trial he ſhould not be found blame-worthy. To this that Lord writes, That he muſt clear himſelf, for he meant nothing in any conceit to his Grace; for that notwithſtanding of late he had differed in his poor opinion from his Grace, in that by his order certain ſimple men had been rather ſought by inquiſition to be found offenders, than upon their facts condemned, yet he did not, for all this, differ from his Grace in amity and love. Upon which the Archbiſhop takes heart, and writes in the following terms. 'I am as 'yet fully perſuaded, that my manner of proceeding againſt ſuch kind of men is both lawful, uſual, 'and charitable: neither can I deviſe how otherwiſe 'to deal, to work any good effect. It is the only thing 'wherein your Lordſhip and I differ; and I doubt 'not but that upon conference we ſoon herein 'ſhall agree: not ſeverity, but lenity, has bred this 'ſchiſm in the church, but the accuſation of ſeverity 'is the laſt thing I fear; if I be able to anſwer to the 'contrary fault, I ſhall think myſelf well paid. It 'was the ſame ſeverity with which I kept Trinity 'College and my late dioceſe of Wigorn in good order.' It was thought neceſſary to relate our Metropolitan's behaviour ſo particularly in this important point of the oath *ex officio* (47), for the ſame reaſon that Mr Strype gives for inſerting his letter to Lord Burleigh, of July 15, at length ‡, becauſe the true ſpirit of his Grace is ſo conſpicuous therein.

[*LL*] *He waited upon the Queen, and gave her reaſons why the diſcipline was rather to be ſuppreſſed, than by writing confuted.*] Upon the 8th of May, the Archbiſhop had a conference at Lambeth with ſome gentlemen of Kent, who applied to him in behalf of the ſuſpended miniſters in that county, as is related in Note [*II*]. The Archbiſhop aſſured them, that they [the miniſters] had come in a tumultuous manner, and rather with a deſign to quarrel, than to be convinced; and that they were ſo young and unlearned, that he would not have put them into orders, had they not had them before (48). Sir George Paul tells us, (49) that there was this year a conference at Lambeth with theſe non-compliers, at the inſtance of ſome of the privy council, who had provided the ableſt men among them for this purpoſe; that theſe privy counſellors were preſent at this debate, and after four hours ſpent therein, they profeſſed themſelves ſatisfied and convinced as well of the ſtrength of the Archbiſhop's reaſons, as of the weakneſs of the Diſciplinarians, and that ſo, they ſaid, they would inform her Majeſty. September the 20th, the privy council applied in favour of ſome of the deprived preachers, and againſt the Biſhop's Commiſſaries: To which the Archbiſhop returned an anſwer, the 27th, vindicating himſelf and his proceedings; and now, after he had drawn out to her Majeſty ſeveral of their arguments, with his anſwers to them, he concludes, *Your Majeſty of yourſelf will eaſily diſcern many of them* [the objections] *to be very childiſh, ſome irreligious, and ſome perilous, tending to the great offence of her ſubjects, and invaſion of this moſt happy ſtate of government; and therefore rather the diſcipline to be repreſſed, than by writing confuted* (50).

[*MM*] *Adviſing a reſtraint to be laid upon the preſs.*] Mr Travers, before mentioned, had before this publiſhed a book in Latin, intitled *Diſciplina Eccleſiaſtica ex Dei verbo deſcripta*, which, being now tranſlated into Engliſh, was printed at Cambridge. But the

(pp) Strype, b. iii, ch. 9.

(47) Upon the whole, theſe letters evidently ſhew Burleigh's diſlike of this oath, as well as the complaints of it by others at this time; and it appears in the courſe of our Archbiſhop's life afterwards, that there was a general diſſatisfaction and murmuring about it; particularly a paper was wrote in 1590 by one James Morrice, Attorney of the Wards, againſt it, to which Dr R. Coſin, Dean of the Arches, drew up an anſwer in 1590. The oath continued till King Charles the IId's time, when it was aboliſhed by act of parliament.

petitions being offered to this parliament in favour of the Puritans, for receiving their new platform and book of public prayer, as alſo againſt pluralities and the court of faculties, the Archbiſhop anſwered them, and preſented his anſwer to the Queen in perſon. He ſent notes alſo upon them to Lord Burleigh [*NN*], Dec. 26. However, being made ſenſible of the juſtneſs of a complaint againſt the exceſſive fees taken in ſpiritual courts, he ſet about drawing up a new ſtate of thoſe fees, according to ancient cuſtom †, and at the ſame time prevailed with the Queen not to give her aſſent to ſome bills that had paſſed both houſes, which affected the preſent good eſtate of the clergy; namely, one giving liberty to marry at all times, another for the trial of miniſters ſufficiency by twelve laymen, and ſuch like. This laſt was a precedent for a like act paſt and rigidly executed againſt the Royaliſts during the rebellion and uſurpation of Cromwell. In the ſame parliament he procured an act for the better foundation and relief of the poor of the hoſpital of Eaſtbridge in Canterbury [*OO*]; and before the year was expired he found means to put a ſtop to a commiſſion that was then upon the anvil for a *melius inquirendum* [*PP*]. In 1585, by ſpecial order from the Queen, he drew up rules for regulating the preſs [*QQ*]; which were confirmed and ſet forth by the authority of the Star-Chamber, June 23d. In all his tranſactions for uniformity he had conſtantly both the permiſſion and countenance of the Queen, as well as the general concurrence of Burleigh, Leyceſter, and Walſingham. Yet in his proceedings with the Nonconformiſts his grace had received ſometimes, even from theſe his friends, very hard words *. Upon which account about this time he joined himſelf in a more cloſe friendſhip with Sir Chriſtopher Hatton, then Vice-chamberlain to the Queen, to whom he now (July 16) opened his mind, and complained of the others uſage of him. The Earl of Leyceſter particularly, not content with having made Cartwright Maſter of his hoſpital newly built at Warwick (*qq*), attempted by a moſt artful addreſs to procure a licence for him to preach without the ſubſcription ‡, but the Archbiſhop peremptorily refuſed to comply. Preſently after this the ſame earl applied to him to declare his judgment about the Queen's aiding the Low Countries, to which he gave a very wary anſwer [*RR*]. This was

† This table was not compleated till 1597. Strype, p. 195.

‡ The Archbiſhop had been very courteous to his old antagoniſt, who ſeemed now to be diſpoſed to make no diſturbance againſt the church. The Earl thereupon in this letter thanked him for his kindneſs to Cartwright, adding that it would do him much good, viz. in bringing him into a better opinion of the church. But the plot at bottom was to obtain the licence. Strype, p. 227.

* See the note [*KK*]. They all three were inclined to favour the Puritans or Diſciplinarians.

(*qq*) The Earl gave Cartwright 50 l. per ann. as Maſter, beſides 50 l. more as an annuity.

Vice-chancellor getting intelligence of it, had the whole impreſſion, or moſt part of it, ſeized; and acquainting the Chancellor of it, he applied to the Archbiſhop upon the affair, who returned an anſwer to this tenor: That ever ſince they had a printing preſs at Cambridge, he feared that this and greater inconveniences would follow. For though the Vice-chancellor was a very careful man, and in all reſpects greatly to be commended, yet he might be ſucceeded by ſome of another turn and temper, not ſo well affected to the church, and that if he thought fit to continue that privilege to the univerſity, ſufficient bonds with heretics ſhould be taken of the printer not to print any books, unleſs they were firſt allowed by lawful authority, for, ſays he, if reſtraint be made here, and liberty granted there, what good can be done? He aſſured his Lordſhip, as to Travers's election at the Temple, that unleſs he would teſtify his conformity by ſubſcribing, as all others did which now entered into eccleſiaſtical livings, and did alſo make proof unto him that he is a miniſter ordered according to the laws of this church, as he verily believed he could not, becauſe he forſook his place in the college [Trinity College in Cambridge] upon that occaſion, he could by no means yield to conſent to the placing him there or elſewhere in any function of this church. But Travers refuſed now to take orders in the church of England, though he was perſuaded to it by Lord Burleigh (whoſe chaplain he had been) the better to qualify him for the Temple. The Archbiſhop now recommended one Dr Bond to that place, but Mr Hooker was choſen (51). This Dr Bond here mentioned was probably Nicolas Bond, who now was Queen's chaplain, and prebendary of Weſtminſter. He was bred at Magdalen College, Oxon, of which he was choſen Preſident in 1590 †.

[*NN*] *He ſent notes upon the bill againſt pluralities to Lord Burleigh.*] Theſe were, 1. This bill takes away the prerogative of the crown. 2. It abridges the Queen's revenue. 3. It is the next way to an unlearned miniſtry. 4. It requireth an impoſſibility; for of 8800 benefices with cure, there are not 600 ſufficient for learned men; neither, if they were all ſufficient, could there be found the third part of learned men to ſupply that number. 5. It takes away apt governours againſt reaſon * from the univerſities. 6. It ſpoils cathedral churches of houſe keeping. 7. It increaſes the number of the factious and waywarde ſort, in favour of whom this bill ſeems to be deviſed. At this time two papers came out, one intitled, *Means how to ſettle a godly and charitable quietneſs in the church*, &c. addreſſed to the Archbiſhop; the other, *A note of certain other acts very meet to be conſidered of in the convocation, and to come from them.* This paper pretended to ſhew divers defects in the eccleſiaſtical law, to which the Archbiſhop anſwered in general. The author, ſays he, of theſe articles would ſeem to make doubt where none is, and to adviſe laws for things already ſufficiently provided for (52). He wrote alſo anſwers to both theſe papers, which may be ſeen in the Appendix to Strype, No. 16 and 17 to Book *III.*

[*OO*] *For the hoſpital of Eaſtbridge in Canterbury.*] In this act there were ordinances for the government and order of that hoſpital, which were framed by the Archbiſhop. He had before recovered it, and the revenues thereof, out of the hands of one Farnham, one of the gentlemen penſioners, who had obtained it under the pretence of concealed lands, and had ſold it to another (53).

[*PP*] *He ſtopt a commiſſion for a* melius inquirendum.] By this commiſſion a ſtrict enquiry was to be made into the value of all biſhopricks, deaneries, archdeaconries, canonries, prebends, rectories, vicarages, and their ſalaries, &c. under the pretence of advancing the Queen's firſt fruits and tenths. The Archbiſhop wrote a letter to Lord Burleigh upon this occaſion, containing ſeveral articles againſt this commiſſion. One of theſe is in his own hand writing as follows; ‘*It ſhould alſo be conſidered, whether it be not*
‘*the meaning of the preferrers of this ſuit, or of ſome*
‘*others moving them thereunto, to bring ſuch of the clergy*
‘*as pleaſeth them into bondage or awe, for fear of enhancing their livings, ſo that they which could not pre-*
‘*vail in parliament, may this way be revenged* (54).’

[*QQ*] *He drew up rules for regulating the preſs.*] Theſe were, 1. No printing preſſes to be allowed beſides thoſe in London, except one in each univerſity; the number of thoſe in London to be regulated by the Archbiſhop and Biſhops, who ſhould preſent ſuch as the ſtationers ſhould chooſe to be governors of preſſes before the eccleſiaſtical commiſſioners. 3. No perſon to print any books except firſt allowed, according to the Queen's injunctions, and to be ſeen and peruſed by the Archbiſhop and Biſhop of London. 4. No books to be printed againſt any ſtatute or law of this realm. Theſe articles were drawn up by ſpecial order of the Queen, who had been informed of ſeveral treaſonable books by the Arrchbiſhop (55).

[*RR*] *He gave a very wary anſwer.*] In the 6 firſt articles of his anſwer he takes notice of the danger of his meddling in this matter; and in the 7th obſerves, that the conſtant report was, that her Majeſty is pleaſed to give them aid; and to that end ſoldiers are levied, as the common opinion is: and therefore my was in the end of July; and before the end of Auguſt he prevented the iſſuing of a commiſſion for farming out the firſt fruits and tenths, with a view of enhancing thoſe payments, to the detriment of the clergy *. This year he ſilenced Mr Travers from preaching at the Temple; notwithſtanding, about the ſame time being called upon for his judgment in the diſpute betwixt him and Hooker, he gave his opinion leſs in favour of the Papiſts than Hooker had done [*SS*]. On Candlemas-day he was ſworn into the Privy Council (*rr*), and the next month framed the ſtatutes of cathedral churches, ſo as to make them comport with the reformation. And the year was not expired when he ſent a prohibition to Cartwright, forbidding him to publiſh his anſwer to the Rhemiſh Bible *. In 1586, his name appears among thoſe counſellors who condemned Secretary Daviſon for procuring the execution of Mary Queen of Scots, without the conſent of his ſovereign [*TT*]; and upon the diſcovery of Babington's deſign to marry the ſaid Queen, the Archbiſhop put forth ſome prayers under the title of *A form of prayer for theſe dangerous times*. This year likewiſe he granted a licence to an Italian merchant-bookſeller to import ſeveral Popiſh books [*UU*]. The Lord Chancellor's place becoming vacant by the death of Sir Thomas Bromley, April 12, 1587, the Queen made the Archbiſhop an offer of that poſt, which he declined; but recommended Sir Chriſtopher Hatton, who on the 29th of April was made Lord Chancellor in his grace's palace at Croydon (*ss*). The following year 1581 he joined with Lord Burleigh in reſtoring to his fellowſhip at St John's College at Cambridge, Mr Everard Digby, who had been expelled by Dr Whitaker the Maſter, and ſome of the Fellows, upon ſuſpicion of Popery †; and about the ſame time gave an anſwer to a captious ſyllogiſm, in which he was concluded, by practice of Popiſh tyranny, to endanger her Majeſty's ſafety [*WW*]. Upon the alarm of

my moving thereof would be needleſs. 8. I wiſh with all my heart great compaſſion to be had to them, and think that their cauſe being religion, they ought to be relieved by all lawful ways and means poſſible. But if any further thing be required, I muſt be reſolved of the lawfulneſs thereof, and know what it is, before I uſe any perſuaſion thereunto. It muſt be obſerved, that the Queen had taken them into her protection before this letter of Lord Leyceſter's, which was dated the 19th of July 1585 (56).

(56) Ibid. p. 229. where Strype well obſerves, that this matter ſeems to be nothing but a trial of the Abp.

[*SS*] *He ſilenced Travers, and gave his opinion leſs in favour of the Papiſts than Hooker had done.*] Travers was Fellow of Trinity College, while Dr Whitgift had that maſterſhip, and by his means, but proved refractory and troubleſome afterwards; and on Whitgift's requiring him to take orders according to the church of England, he left the college to avoid expulſion: he went firſt to Geneva, and afterwards to Antwerp, where he was ordained by Cartwright, Villers, and others, after the Geneva form. Whilſt he was abroad, he wrote his book *De diſciplina eccleſiaſtica*, mentioned in note [*LL*], which was the model and ground of all the platforms of the Puritan diſcipline that were more than once in this reign offered to parliament. In 1644, when the common-prayer book was aboliſhed, it was tranſlated into Engliſh, and reprinted under the title of *A Directory of Government anciently contended for, and as far as the time would ſuffer practiſed by the firſt Nonconformiſts in the days of Queen Elizabeth, found in the ſtudy of that moſt accompliſhed divine Thomas Cartwright after his deceaſe, and reſerved to be publiſhed for ſuch a time as this. Publiſhed by authoritie.*— Travers appealed from the Archbiſhop's ſentence, in a petition to the privy-council, but without ſucceſs, by a ſupplication *, in which he had charged Mr Hooker very ſeverely for his charitable opinion of Papiſts dying in their ſuperſtition. Mr Hooker, in anſwer to this, obſerved, that what he had ſaid was only, *I doubt not but that God was merciful to ſave thouſands of our fathers living heretofore in Popiſh ſuperſtition, in as much as they ſinned ignorantly.* Upon this the Archbiſhop made the following (weak) refutation. Ignorance did not excuſe the fault of Papiſts, to make it no fault: but the leſs their fault was in reſpect of ignorance, the more hope we have that God was merciful to them. General repentance may ſerve to their ſalvation, though they confeſs not their error of merit. *Archbiſhop*. General repentance will not ſave any but the faithful man; nor him for any ſin, but for ſuch ſins only as he doth not mark nor know to be ſins. 4. The church of Rome is within the new covenant. *Archbiſhop*. The church of Rome is not as the aſſemblies of Turks, Jews, and Painims. 5 The Galatians joining the law with Chriſt, might have been ſaved before they received the epiſtle. *A.* Of the Galatians, before they were told of their error [of making the obſervation of circumciſion neceſſary to believers] which letteth us to think as of our fathers before the church of Rome was admoniſhed of her defection from the truth (57). Mr Hooker had likewiſe aſſerted, *Papiſts hold the foundation of faith, ſo that they may be ſaved, notwithſtanding their opinion of merit*. Anſwer of the Archbiſhop. Papiſts overthrow the foundation of faith both by their doctrine of *merit*, and otherwiſe many ways. So that if they have as their errors deſerve, I do not ſee how they ſhould be ſaved.

* Travers [illegible] mong[illegible] [illegible]a- ſons [illegible] the [illegible] Whitt[illegible] who, [illegible] ordai[illegible] Preſbyters only abroad, [illegible] executed the miniſtry here; to which Whitgift replied, that the caſe of Whittingham was different, and that he would however have been deprived, had he lived [illegible] diſpenſation; and th[illegible] by the law of [illegible], ſuch [illegible] to be [illegible] as miniſters in this church, ſhould be ordained by a biſhop, and ſubſcribe the articles before him.

(57) Idem, ch. 14.

[*TT*] *Without the conſent of his Sovereign.*] He approved Daviſon's fact of getting the warrant ſigned, and commended it, but the manner and way of executing it he thoroughly condemned, that is, as it was urged againſt him by the Queen's counſel, for that ſhe never intended (as Popham, queen's attorney, declared and aggravated) that the Queen of Scots, though condemned, ſhould have been put to death, for cauſes beſt known to herſelf, and not to be ſearched into by others: not that ſhe could by any means be perſuaded to conſent thereto, either by the ſituation of the realme, or by the repeated inſtances and reaſons of the council, notwithſtanding ſhe had, for preventing of dangers, commanded a warrant for the Queen's execution to be drawn up, and committing it to Daviſon's truſt and ſecrecy; that he nevertheleſs, being ſworn ſecretary, forgetting his allegiance and duty, contrary to what the Queen had commanded him, acquainted the council therewith, and put the warrant in execution without her knowing any thing at all of it. This was what moved the Archbiſhop to give his judgment as he did (58).

[*UU*] *He granted a licence to import Popiſh books.*] Here is the licence;

(58) Ibid. chap. 18. p. 267.

'Whereas ſundry books are from time to time ſet 'forth in the parts beyond ſeas by ſuch as are addicted 'to the errors of popery, yet in many reſpects expe'dient to be had by ſome of the learned in this realm, 'contayninge alſoe oftentimes matter in them againſt 'the ſtate of this land, and ſlaunderous unto it, and 'therefore not fit books to paſs through every man's 'hand freely; in conſideration whereof I have tole'rated Aſcanio de Renialme, merchant bookſeller, to 'bring into this realme, from the parts beyond ſeas, 'ſome few copies of every ſuch ſort of books, upon 'this condition onlie, that any of them be not had or 'diſperſed abroad, but firſt brought to me, or ſome 'other of her Majeſty's privy-council, ſo that they 'may be delivered, or directed to be delivered furth 'unto ſuch perſons onlie, as by us or ſome of us ſhall 'be thought moſt meet men, upon good conſiderations 'and purpoſes, to have the reading and peruſal of 'them.

'Given at Lambeth, the   day of October,
'1586. Anno Regni Reginæ Eliz. 28º (59).'

(59) Ibid. p. 269.

[*WW*] *A captious ſyllogiſm*] This ſyllogiſm had been handed about ever ſince the year 1584, and was aſ-of the Spaniſh Invaſion this year, he procured an order of the council to prevent the clergy from being ceſſed by the Lord Lieutenants for furniſhing arms, and wrote circular letters to the Biſhops, to take care that their clergy ſhould be ready with a voluntary appointment of arms, &c (*tt*). This year came out a virulent pamphlet entitled, *Martyn Marprelate*, in which the Archbiſhop was ſeverely handled in very coarſe language [*XX*]. The univerſity of Oxford loſing their chancellor, the Earl of Leyceſter (*uu*) this year, ſeveral of the heads and others ſignified to the Archbiſhop their intention to chooſe him into that poſt. This offer, being a Cambridge man, he declined for himſelf, but made uſe of it to recommend his friend Sir Chriſtopher Hatton, who was elected: by which means the Archbiſhop came into a great ſhare of the government of that univerſity (*ww*). In 1590, Cartwright being cited before the eccleſiaſtical commiſſion for ſeveral miſdemeanours, and refuſing to take the oath *ex officio*, was ſent to the Fleet priſon, and the Archbiſhop drew up a paper containing ſeveral articles, more explicitly againſt the Diſciplinarians than the former, to be ſubſcribed by all licenſed preachers [*YY*]. The

cribed to Sir Francis Knolles§, but was not taken notice of till this year by the Archbiſhop, who now wrote *The reſolution of a pretended ſyllogiſm, captiouſly and inſufficiently concluding the Archbiſhop of Canterbury by practice of Popiſh tyranny to endanger her Majeſty's ſafety.* I ſee, ſays he, three parts of a reaſon indirectly concluding the ſame, but from the ſyllogiſm there is none either in mood or figure. The firſt ground or propoſition conteyneth matter of two or three ſyllogiſms to be framed to that purpoſe which they pretend, which I will reſolve into logical form, that the inſufficiency and captiouſneſs of the reaſon may the more eaſily appear, in manner following. *Maj.* Whoſoever practiſeth popiſh tyranny is a ſubject dangerous to her Majeſty's ſafety. *Min.* The Archbiſhop practiſeth Popiſh tyranny. Therefore he is a ſubject dangerous to her Majeſty's ſafety. *Proof of the Minor.* What clergyman ſoever taketh upon him any ſupreme authoritie, above the common authoritie equally given by the word of God to all lawful miniſters, doth practiſe Popiſh tyranny. But the Biſhop of Canterbury doth, &c. *Ergo.* —*Anſwer.* The Biſhop of Canterbury taketh upon him no ſupreme authoritie, for he knoweth right well that the Queen's Majeſty, by the laws of this realme, and right of her crown, is ſupreme governor of both ſtates, as well eccleſiaſtical as temporal. Therefore appeals be made from the inferior Biſhops to the Archbiſhop of Canterbury, as to a higher authoritie, and from the Archbiſhop to the Prince by her delegates in the court of chancery, as to the ſupreme authoritie. The reſt of that major is likewiſe untrue, as that what clergyman ſoever taketh upon him any ſupreme authoritie equally given by the word of God to all lawful miniſters, doth practiſe Popiſh tyranny. *The reſt of this paper is loſt* (60).

§ Who had likewiſe made another ſuch ſyllogiſm againſt Dr Bancroft, the archbiſhop's chaplain, which was anſwered by that doctor, and is inſerted by Strype, ubi infra.

(60) Ch. 21. p. 295. ann. 1588.

[*XX*] *Martyn Marprelate, in which the Archbiſhop was handled in very coarſe language.*] The author, John ap Henry, among other things maintained, that *no one Biſhop had ever ſuch an aſpiring and ambitious mind as he, no not* STEPHEN GARDINER *of Wincheſter. None ſo tyrannous as he, no not* BONNER. Upon which the Archbiſhop ſaid, the ſchiſmatics were impudent liars, and that the world knew what he had ever been, and what he was, and that he diſdained to anſwer ſuch ſenſeleſs calumniations. In another paſſage of that book where *Marprelate* was bid to take care leſt the Spaniard ſtole him away, he replied, he wiſhed the beſt Martiniſt in England durſt ſay it to his face. This was the year of the Spaniſh invaſion. About the ſame time theſe libels, *The Epitome—The Demonſtration of Diſcipline—The Supplication—Diotrephes—The Minerals—Have you any Work for a Cooper?—Martin Junior, alias Theſes Martinianæ—Martin Senior—More Work for the Cooper.* Theſe and ſeveral others were printed at a kind of wandering preſs, firſt ſet up at Moulſey near Kingſton upon Thames, thence conveyed to Fawlſley in Northamptonſhire, thence to Norton, afterwards to Coventry, thence to Whetſtone in Warwickſhire, from which place the letters were ſent to another preſs in or near Mancheſter in Lancaſhire, where in printing *More work for a Cooper* it was diſcovered by Henry Earl of Derby *. Upon this occaſion the Archbiſhop writes to Lord Burleigh as follows: 'For my own part, in reſpect of myſelf (the 'greateſt mote in their eyes) I make little account of 'their malice, neither do I ever break ſleep for the 'care thereof. Yet in reſpect of my calling and pro'feſſion, and of the ſcandal that may by ſuch lewd 'libels be miniſtered to men apt to believe any 'thing; I could wiſh them to be dealt with according 'to their deſert, and quality of their offence, wiſhing 'alſo that it might be done rather by their Lordſhips 'of the council, than by themſelves' [the eccleſiaſtical commiſſion] 'that the world might know that they 'were men not caſt off of all ſides, as abjects of the 'world, but that juſtice ſhould as well take place in 'their caſes as in all other mens; the rather, becauſe 'they ſuffered theſe injuries by *Martiniſts* for doing 'their duty in ſuppreſſing ſects and wicked opinions, 'and in maintaining the ſtate and government by law 'eſtabliſhed, which was wounded through their ſides.' This letter is dated Auguſt 4, 1589, from Canterbury. (61)

* Paul's life, p. 51, 52.

(61) Ch. 22, 23. Mr Strype juſtly obſerves, that theſe ſlanderous writings againſt the archbiſhop, by putting him upon his juſtification, brought many ſingular paſſages of his conduct, learning, wiſdom, and virtue, to light, which might otherwiſe never have come to our knowledge.

[*YY*] *Cartwright was ſent to the Fleet priſon, and the Archbiſhop drew up ſome more articles to be ſubſcribed by all licenſed Preachers.*] Though the Archbiſhop had denied Cartwright a licence without ſubſcription, yet he preached in and about Warwick; and particularly at Banbury; and in 1589 he had theſe (which were his uſual) words in his prayer before ſerman, *Becauſe they* [the Biſhops] *which ought to be pillars in the church, do band themſelves againſt Chriſt and his truth, therefore, O Lord, give us grace and power all as one man to ſet ourſelves againſt them* §. Lord Burleigh wrote a letter to the Archbiſhop, dated Auguſt 4, 1590, adviſing him not to be preſent at Cartwright's trial before the eccleſiaſtical commiſſion, and he was not there, as Fuller informs us (62), when this his old antagoniſt was committed to the Fleet, for printing without licence his anſwer to the *Rhemiſh Teſtament*, and for appointing ſeveral ſeditious meetings of the ſynods at Cambridge and elſewhere; in which it was decreed, that the diſcipline ſhould within a time limited be put in practice: for this theſe diſciplinarians decreed in their private conventicles, that the Queen's authority ought to be reſtrained in cauſes eccleſiaſtical (63). The Archbiſhop therefore drew up a paper, and ſent it to Lord Burleigh, who it appears by ſeveral interlineations in his own hand, and by himſelf underſcored, yielded his allowance to the ſeveral articles contained in it, which follow.

Feb, 4, 1590.

ARTICLES for a general Enlargement of the Laws Eccleſiaſtical.

We whoſe names are ſubſcribed, each man for himſelf, do unfeignedly acknowledge,

1. Her Majeſty's ſupremacy in cauſes eccleſiaſtical.

2. That there ought not to be any ſynods, conventicles, or aſſemblies, to make laws, conſtitutions, or ordinances, but by the Queen's aſſent, and by virtue of her authority, and that ſuch ſynods otherwiſe held are ſeditious and unlawful for any innovation or alteration to be made within this realm.

3. That the eccleſiaſtical government now received and eſtabliſhed by her Majeſty's authority, *and by the laws of the realme*, is lawful and allowable by the word of God, *and not repugnant*; and that the Preſbyterian government is not only unlawful, but very dangerous for the ſtate of the realme.

We do likewiſe acknowledge, that it is ſeditious and ungodly to teach or mainteyne, that there be or ought to be any potentates, officers, magiſtrates, or any ſuch as aſſume or take upon them to be *or to make* a preſbytery or conſiſtory to excommunicate, remove, or deprive her Majeſty for any cauſe whatſoever, or to command her ſubjects to withdraw their obedience from her.

We acknowledge the church now eſtabliſhed by the

laws

next year 1591, Cartwright was brought before the Star-Chamber, and upon giving bail for his quiet behaviour, was diſcharged at the motion of the Archbiſhop‡, who this year was appointed, by common conſent, to be arbitrator between two men of eminent learning in a remarkable point of ſcripture chronology [ZZ]. The ſame year in the vacancy of the ſee of Sarum by the tranſlation of Dr Piers to the Archbiſhoprick of York, our Archbiſhop preſented and inſtituted Mr Hooker into the living of Boſcomb in Wiltſhire, and to the prebend of Nether-haven in the church of Sarum (xx). In 1592 he viſited All Souls College (yy), and the following year Dr Bancroft publiſhing his *Survey of Diſcipline*, wherein he cenſured Beza's conduct in intermeddling with the Engliſh affairs in reſpect of church-government, upon which that miniſter complained of this uſage in a letter to the Archbiſhop [*AAA*], who returned a long anſwer, wherein he not only ſhewed the juſtice of Dr Bancroft's complaint, but further alſo vindicated Saravia and Sutcliffe, two learned men of the Engliſh church, who had written in behalf of the order of Epiſcopacy againſt Beza's doctrine of the equality of miniſters of the goſpel, and a ruling Preſbytery. In 1594, freſh complaints being made in parliament of the corruption of the eccleſiaſtical courts, the Archbiſhop made a general ſurvey of thoſe courts and their officers; and the ſame year he put a ſtop to the paſſing of ſome new grants of concealed lands belonging to the cathedrals [*BBB*]. This year he likewiſe procured of the Queen for Mr Hooker the good rectory of Biſhops-bourne near Canterbury (zz). The ſame year he ſummoned the famous Hugh Broughton to give an account of ſome of his doctrines concerning the article of *Chriſt's deſcent into hell**. In 1595, when the tumults of the Diſciplinarians appeared to be in a good meaſure appeaſed (aaa), there ſprung up the *Prædeſtinarian controverſy*, which occaſioned the drawing up of the *Lambeth Articles*, wherein the Archbiſhop had the direction, and ſent a copy of them to Cambridge, with a letter and private directions to teach the doctrine contained in them in that Univerſity; and praying that nothing ſhould be publicly taught there againſt them, notwithſtanding he was ſenſible at the ſame time, that this ſtep was not agreeable to the Queen [*CCC*]. This year

‡ Idem, p. 70. He had been in priſon a year and a half.

(xx) Walton's life of Hooker, p. 209, 210, and Hooker's article in this work, vol. iv. p. 2667.

(yy) At this viſitation he made (*inter alia*) an ordinance to oblige the Fellows to dine in the Hall. See Strype, No. xvi. and xv. Appendix to B. iv.

(zz) This living was in his own dioceſe and patronage, but this turn was the Queen's, upon the promotion of the Rector, Dr Redman, to the biſhopric of Norwich.

(aaa) Cartwright was now at Geneva, whence he ſent to a friend a letter, with a form of prayer, in which he compared prayer to a bunch of keys, whereby to go to all the treaſures and ſtorehouſes of the Lord; his butteries, his pantries, his cellars, his wardrobe, &c. Strype, ch. xiv.

* But Broughton at laſt gained his Grace over to his opinion. See Broughton's article in the Supplement.

laws of England to be a true member of the true church of Chriſt, and that the ſacraments as they be ordained by the law to be miniſtered, are godly and rightly adminiſtered, and the whole order of publick ceremonies therein by law eſtabliſhed to be ſuch as no man ought therefore to make any ſchiſm, diviſion, or contention in the church, or to withdraw himſelf from the ſame. *(The words and letters in Italics are the Lord Treaſurer's inſertion)* (64).

[ZZ] *Arbitrator between two men in a point of ſcripture chronology.*] Theſe were Hugh Broughton of Chriſt's College in Cambridge, the greateſt ſcholar in Hebrew and Jewiſh learning in thoſe times, and Dr Reynolds of Corpus Chriſti in Oxford, Divinity Profeſſor there. The point in diſpute was, *Whether the chronology of the times from Adam to Chriſt could be aſcertained by the Holy Scriptures?* The firſt held the affirmative, which was denied by the latter. But for a further account of this diſpute ſee the article of Hugh Broughton in the Supplement.

[*AAA*] *That miniſter complained of his uſage to the Archbiſhop.*] In his *Survey of Diſcipline* Dr Bancroft had uſed theſe words concerning Beza, who had wrote a letter in 1566, in behalf of the Puritans in England to Archbiſhop Grindall: that he wiſhed a man would read the Epiſtles of Leo, ſome time Biſhop of Rome, and confer them with one of Beza's, to conſider whether took more upon him, Leo where he might command, or Beza where there was no reaſon he ſhould at all have interpoſed. And when theſe reformers had wrote to Beza the next year, and Beza had diſpatched another letter hither in their defence, Dr Bancroft made this remark upon both: that it was a fond part in them to write unto him, and a very inſolent part for him to take ſo much upon him. Beza being offended at this treatment, took notice of it ſoon after in a letter to the Archbiſhop, wherein he vindicates his former behaviour, eſpecially to Dr Saravia† and Dr Sutcliff. However, in words at leaſt he profeſſes to be concluded by the Archbiſhop's determination in theſe terms: *Hoc nunc abs te peto, ut potius quam quod ad nos quidem attinet, aliqua hinc ſimultas apertior inter ejuſdem fidei ſpiritu conjunctiſſimos exoriatur, huic ſaltem in ſcribendo intemperiei occurratur, quod ſi quid antea ſcriptum a me fuiſſe nonnulli exiſtiment, quo quiſquam iſthic merito fuerit offenſus (quod certe nunquam prudens ſcienſque fieri nec facile repertum iri ſpero) operam omnem dabo admonitus, ut jure de me nemo conqueratur. Etſi enim ex illis ſcriptis quædam mihi objecta animadverto de quibus facile jam mihi fuit rationem reddere æquis omnibus judicibus præbendam: tamen, ut ſpiritui diſcordiæ occurratur, & ſemel hac moleſtia defungar, vehementer abs te etiam atque etiam poto, Reverende mi Domine, ut quid hac tota de re tibi videatur ex teipſo intelligam, pacatius poſtea quod mihi hujus vitæ curriculi ſupereſt favente Deo confecturus.* The Archbiſhop in his anſwer told Beza, that he meddled beyond his meaſure. He had of late upon occaſion wrote two or three letters to the Archbiſhop, giving him his titles, and owning this church and the government thereof; and now the Archbiſhop in a very long letter declared plainly his mind to him, and gently blamed him for ſiding himſelf ſo much with ſuch as created no little diſquiet and diſturbance in this church and kingdom. (65)

[*BBB*] *Put a ſtop to the paſſing of ſome grants of concealed lands.*] Several perſons, as Jeffe, Typpe, Wymark, and Ballard, had got new books of concealed lands omitted in ſome former books, which took in the churches of Canterbury, Wincheſter, Glouceſter, and the reſt of Henry VIIIth's foundation, beſides diverſe other biſhopricks. The Archbiſhop, as ſoon as he got intelligence of it, wrote to Sir John Puckeridge, then Keeper of the Great Seal, praying him, if any ſuch grants were already paſſed from her Majeſty, but not paſſed the Seal, that he would not ſet the ſame, until her Majeſty were advertiſed thereof; and that if he might intreat him to ſignify to her Majeſty the contents of theſe letters, he would take it for a ſpecial fruit of his good will towards him, and towards the church alſo. He likewiſe let the Keeper underſtand, that he had written to Sir John Forteſcue, the Chancellor of the Duchy of Lancaſter, to the ſame effect, but he doubted his being at court, and (ſays the Archbiſhop) *mora trahit periculum.* The Archbiſhop in this letter refers to a ſtatute in the reign of Henry VIII. and another act lately made, to explain which it is obſerved that the act of anno 1593 was to explain a ſtatute of the 34th of Henry VIII. whereby the grants of the honours, manors, lands, &c. of abbots, priors, &c. were confirmed, and that this erection and endowment of any Dean, Chapter, or College, ſhall be good and effectual in law (66).

[*CCC*] *It was not agreeable to the Queen.*] This diſpute (called ſince the Quinquarticular controverſy) was firſt occaſioned at this time by the preaching of one Barret, Fellow of Caius College in Cambridge, againſt predeſtination, reprobation, &c. upon which being called upon by the Vicechancellor to retract, he complied; but afterwards applied to the Archbiſhop, who interpoſing his authority, was rejected by the Heads. Several letters paſſed between them on this occaſion, the Archbiſhop claiming a juriſdiction both as their viſitor in the vacancy of the Biſhoprick of Ely, in whoſe dioceſe they are, and alſo as chief of the eccleſiaſtical commiſſion, from which there was no exemption,

(64) Strype, ch. 2. b. 4.

† He had wrote a book of the 3 degrees of the miniſtry, which being ſeverely cenſured in rude language by Beza, was repaid to him by Dr Saravia.

(65) Book 4. ch. 10.

(66) This letter is dated Auguſt 28, 1594.

year he obtained letters patent from her Majeſty, and began the foundation of his hoſpital at Croydon (*bbb*). The ſame year he protected the hoſpital of Harbledown in Kent againſt an invaſion of their rights and property: and the Queen having made a grant to him of all the revenues belonging to the hoſpital of Eaſtbridge in Canterbury, he found out and recovered the next year ſome lands wrongfully withheld from it [*DDD*]. In 1597 the foregate of his hoſpital at Croydon was finiſhed, and in 1599 the whole building being completed, it was conſecrated by Dr Bancroft, now Biſhop of London. The founding of this hoſpital (the largeſt then in the kingdom ‡) having given riſe to an invidious report of the Archbiſhop's immenſe wealth and large revenues, he drew up a particular account of all his purchaſes ſince he had been Biſhop, with the ſums given for the ſame, and the yearly value of the lands, and to what and whoſe uſes, together with the yearly value of the archbiſhopric [*EEE*]. The Mayor of Canterbury having

(*bbb*) It was for maintenance of 30 poor people, beſides a free ſchool, with a maſter and uſher. He laid 200 l. per ann. to it, beſides the charge of the building, ſuppoſed to have coſt 2000 l. See Dr Teniſon's article.

‡ Willet's Synopſis Papiſmi, p. 1223.

tion, at the ſame time ſhewing how unkindly they had dealt with him, who bore them ſuch a paternal affection as they had ſufficient experience of. One of the heads, Dr Soame †, preached a ſermon at St Mary's upon Acts iv. 5, 6, 7, which he turned againſt the Archbiſhop (who bore one of the names of the Jewiſh council there mentioned) and the reſt of the eccleſiaſtical commiſſion. At laſt the heads applying to Lord Burleigh, he acquaints the Archbiſhop with it, who in his anſwer declares, that he did not infringe their privileges, and dealt with them only by perſuaſion. At length Dr Whitaker, in a *Clerum* defended Predeſtination, and ſoon after he and Dr Tyndal went to Lambeth, to confer with his grace and other learned men for the eſtabliſhing of theſe points, to be carried in that univerſity, which was done and finiſhed at Lambeth, November the 28th, in nine propoſitions, well known by the name of the *Lambeth Articles* (67). Upon the return of Tyndal and Whitaker to Cambridge, the Archbiſhop ſent a letter dated November 24th, to Cambridge, in which he ſignified, that his earneſt and hearty deſire was to have the peace of the church generally obſerved in all places, eſpecially in that univerſity, whereof he was a member; and that for the better obſervation and nouriſhing of the ſaid peace, he had with ſome care and diligence drawn up and ſet down certain propoſitions, which they were perſuaded to be true, a copy whereof he now ſent unto them in his letter incloſed; praying them to take care that nothing ſhould be publickly taught to the contrary, and that alſo in teaching them, diſcretion and moderation ſhould be uſed; that ſuch as ſhould be in ſome points differing in judgment, might not of purpoſe be ſtung, or juſtly grieved; and eſpecially that no bitterneſs, contention, reproof, or reproach ſhould be uſed by any towards any, and that the articles ſhould be ſo taken and uſed as their private judgment, thinking them to be true and correſpondent to the doctrine approved in the church of England, and eſtabliſhed by the laws of the land, and not as laws and decrees. Beſides this, he gave ſome private inſtructions, dated December the 8th, more ſecretly to be delivered to the Vice-chancellor by word of mouth from Dr Nevyl; the ſubſtance of which was, to let him underſtand that theſe propoſitions, as he had learned, were not well pleaſing to ſome at court, and that was even the Queen herſelf. That he had ſome intimations, that the Vice chancellor would perhaps receive ſome order, and that too perhaps from the Lord Burleigh their chancellor, to forbear urging them in the univerſity, but rather diſmiſs them; and therefore that in the mean time, before any ſuch order came, he ſhould uſe his diſcretion, and not to publiſh them any further than that he concurred with them. However ſecretly this conſultation at Lambeth was ſet on foot, and the articles as privately as could be there framed, ſuch a matter could not be hid. For in a ſhort time after, December 5th, her Majeſty commanded Sir Robert Cecyl, one of her ſecretaries, to ſignify her mind to the Archbiſhop in this tenor, that her Majeſty had heard, as of Mr Whitaker's death, ſo of ſome buſineſs he came about, and that ſhe had commanded him [the ſecretary] to ſend unto his grace, to acquaint him, that ſhe miſliked much, that any allowance had been given by his grace and the reſt of any ſuch points to be diſputed, being a matter tender and dangerous to weak ignorant minds, and thereupon that ſhe required his grace to ſuſpend them (68).

† He was joined by the Drs Goad, Tyndal, Whitaker, Barwel, Jegon, Preſton, and the Maſters Chadderton and Clayton, heads of houſes.

(67) Fuller's Church-hiſtory, p. 230.

(68) The extraordinary pains taken in this affair by the Archbiſhop furniſhes matter for chapters 14, 15, and 16 of Hooker in this life by Strype, who concludes with a recapitulation of the whole, drawn by his grace, wherein he declares, that ſome few things being added, he agreed with Barret's oppoſers, and they with him.

[*DDD*] *He recovered ſome lands belonging to Eaſtbridge.*] Theſe lands had been in the poſſeſſion of one G. Hayes, a letter from whom is in Mr Strype, giving an account of them. The Archbiſhop reviewed the former ordinances, and ſettled the government of the hoſpital as it is at this day, and procured an act of parliament to confirm the ſame, whereby 20 poor aged people are relieved, beſides two exhibitions for two ſcholars in Cambridge (69).

[*EEE*] *With the yearly value of the Archbiſhoprick.*] It had been given out, that the reſerved rent (beſides the fines) of the Archbiſhoprick amounted to 6000 l. per annum. The Archbiſhop's account is as follows:

(69) Strype's Appendix, No. xxxi. A. B. C. to chap. 21. Book iv.

‘ Lands purchaſed by me J. W. Archbiſhop of Canterbury, ſince my firſt being Biſhop to this preſent November 99, which is 23 years at the leaſt.

	l.	s.	d.
‘ One farm called Chamberlaynes in Clavering in the county of Eſſex, for my brother William Whitgift, which coſt me ——— ———	470	0	0
‘ Towards purchaſing a piece of land in Kent for my brother George Whitgift, I gave to him ——	400	0	0
‘ One houſe in Shorne in Kent with two acres of ground, which coſt me 100 l. and the reverſion of a leaſe ——	100	0	0
‘ Two tenements in Shorne, and ſome 3 acres belonging, which coſt me	121	2	0
‘ Rent is	8	10	0
‘ One cottage and fifty acres of marſh land in Kent for my nephew John Whitgift, which coſt ——	432	0	0
‘ Rent is	24	0	0

‘ The following are for my hoſpital.

	l.	s.	d.
‘ The Chequer in Croydon coſt ——	200	0	0
‘ A Tenement joining to it coſt ——	30	0	0
‘ Another tenement called Stay Croſs, with one acre and a half, coſt ——	80	0	0

‘ Upon theſe I have built my hoſpital, ſchool and ſchooolmaſter's houſe, and therefore are not rented.

	l.	s.	d.
‘ One piece of land called Clotmead in Croydon coſt ———	14	0	0
‘ Rent	1	0	0
‘ The Swan in Croydon, *cum pertinentiis*	80	0	0
‘ Rent of theſe, with certain parcels belonging to the Chequer is ——	13	6	8
‘ One piece of wood-land, and ſome paſture, containing, in the whole, 77 acres, in Croydon, coſt ——	357	0	0
‘ Rent is	20	0	0
‘ One other piece of wood-land, and paſture in Croydon coſt ———	410	0	0
‘ Rent	23	0	0
‘ Three other ſeveral farms in Croydon coſt —— ———	1400	0	0
‘ Rent	48	0	0

‘ The Archbiſhopric is no better to me than it was to my late predeceſſors, who died not very wealthy, for any thing I can learn, and I hope I beſtow it as well as they did. But whoever ſays that this archbiſhoprick is yearly worth 6000 l. or worth any way in ordinaries and extraordinaries 3000 l. muſt anſwer to God at the laſt for vain ſpeeches, that I term them no worſe; and yet out of that which any way I receive, there goes in annuities, penſions, ſubſidies, and other duties to her Majeſty, 800 l. at the leaſt, and then what remains is ſoon known. Any other ways I receive not one penny. The land which I had before mine advancement, and which I have purchaſed ſince, my brethren have, thoſe exempted which I have beſtowed upon mine hoſpital. *Diſper-*

‘ *dat*

having this year ſummoned the choir of that church to muſter with the militia, he oppoſed it with great warmth [*FFF*]. In 1600 he uſed his utmoſt endeavours to give a check to the then growing practice of ſending prohibitions from the temporal to the ſpiritual courts, but without ſucceſs [*GGG*]. His authority was ſtrenuouſly withſtood alſo this

‘ *dat Dominus labia doloſa & linguam magniloquam.* Pſ. ‘ xi. *Cuſtodi me, Domine, a laqueo quem ſtatuerant mihi,* ‘ *& e ſcandalis operantium iniquitatem,* Pſal. cxl. *Do-* ‘ *mine libera animam meam a labiis iniquis & a lingua* ‘ *doloſa,* Pſ. cxix.’— What the revenues of the Archbiſhoprick were, was publickly declared in the next parliament, 43 Eliz. by Mr Bois, a member of the houſe of commons, and the Archbiſhop's ſteward, upon occaſion of a bill brought in for church leaſes to be made without fines. Bois ſhewed how prejudicial this taking away the fines would be to the Biſhops. That the maintenance of their ſtate was ſupported by continual fines, without which they could not maintain hoſpitality, or keep up that retinue which belonged to their places. And he bid them conſider the revenue of the greateſt biſhoprick in England, which was but 2200l. whereof were paid, for annual ſubſidies, (70) Chap. 25. anno 1599. 500l (70).

[*FFF*] *He oppoſed it with great warmth.*] Upon this occaſion he wrote a letter to Mr Bois his ſteward to the following tenor. That he could not but marvell, that Mr Mayor or any other ſhould do that in Canterbury, which he thought was not done in any part of the land beſides, that is, to muſter ſuch as were employed in the daily ſervice of God, ſuch as the ſinging men of the church of Canterbury were. That he had ſome little underſtanding thereof, before that ſuch a thing was intended by Mr Rogers; and that indeed he moved the Lord Cobham therein, who had aſſured him that there would be no ſuch thing attempted, and that thereupon he relied without proceeding any further. But if that notwithſtanding further attempts ſhould be made to that ſole church, he meant to uſe all the credit he had to withſtand it; adding, that if the miniſtry of that church, ſome of them, when there was doubt of invaſion, did offer themſelves to that ſervice, as all other men muſt do, ſhould that be drawn to example, that when no ſuch occaſion was, they muſt be moleſted? And then applying himſelf with ſome blame to Bois, ‘ I marvail,’ ſaid he, ‘ that you being ‘ the ſteward of the church, ſhould ſuffer ſuch a thing ‘ to be offered. I think the Lord's letters had no ſuch ‘ meaning; and I ſuppoſe your indiſcretion in the ‘ point will not be commended.’ Subjoining, that he wrote to him as to one with whom he might be bold: but bid him aſſure himſelf, that if he proceeded in this manner, he would complain to the beſt, and ſo he committed him to the tuition of Almighty God.

Your aſſured friend,

From Croydon, the
2d June, 1599. Jo. Cantuar (71).

(71) MSS. Whitg. penes Rev. T. Brett, Strype, p. 536. ch. 25.

Some time after he wrote another ſhort letter to this ſteward concerning ſome miſdemeanour of the Mayor of Canterbury in relation to his (the Archbiſhop's) privileges and liberties to this effect. That he might paradventure marvayl that being thus provoked by the contentious Mayor, he had not hitherto wrote to him [his ſteward] nor to others in this cauſe. To him, he ſaid, he wrote not, becauſe he took it to be needleſs, being ſteward of his liberties, and by virtue of his office bound to ſee the ſame obſerved, beſides that he had not heard from him of any particulars, nor yet any advice what were beſt for him to do. To others he wrote not, eſpecially to the mayor, becauſe he took himſelf ſo indignantly uſed by him, as he diſdained ſo far to grace him, purpoſing fully to uſe the benefit of the law in ſuch ſort, as paradventure that corporation would have cauſe to repent their choice and conſent to his froward dealings with him, who never gave any ſuch cauſe to him or any other member of that ſtate. That it ſeemed they were wealthy, whereof he ſaid he was glad, becauſe he hoped they would make full ſatisfaction of all ſuch ſums of money as had been committed unto them for the uſe of the poor, which hitherto they had not employed accordingly. *Vale in Chriſto.*

Your loving friend,

(72) Chap. 29. From Lambeth, 5th
April 1602. Jo. Cantuar (72).

[*GGG*] *To put a check to prohibitions, but without ſucceſs.*] There were about this time ſeveral queries prepared by the Biſhops, and preſented to the Lords of the council, bearing this title: *Certain points which the reverend fathers the Biſhops executing eccleſiaſtical juriſdiction partly by her Majeſty's immediate commiſſion, under the great ſeal of England, and partly by their own ordinary authority derived from the crown, do deſire the lords, and other the reverend judges of the realm to conſider of, touching the granting of prohibitions.* There are twelve of theſe queries. They were grounded upon a writing drawn up by ſome learned hand, entitled, *Certain collections and inferences concerning matter of prohibitions and conſultations, not unfit to be thought upon for the better preſervation of her Majeſty's juriſdiction eccleſiaſtical:* Several of them are drawn from the malpractice of the temporal courts at that time, either in ſending prohibitions from ſeveral courts, as King's-Bench and Common Pleas in the ſame cauſe; or in holding the cauſe of prohibitions a long time, as two or three years, in ſuſpenſe, without coming to any final determination; but the tenth is built upon the right which the court of chancery had to ſuch prohibitions or conſultations, as follows: It ſeemeth, by the ſcope and property of the moſt ancient ſtatutes in that behalf provided, that prohibitions and conſultations, as other ordinary rites, ought not to be granted but unto the courts of chancery by the Lord Chancellor of England; and however of later years the courſe hath been drawn another way, yet no doubt the power of the Chancellor is not any way thereby reſtrained, but that he lawfully may, and it were to be wiſhed he would reſume and put in execution his ancient right and authority. So would not her Majeſty's eccleſiaſtical juriſdiction be driven as it now is, to admit the cenſure and judgment of thoſe who indeed be principal parties as touching the queſtion of prohibitions. 11. What cauſe or grievance cannot be redreſſed by any writ of the chancery, there the ſtatute expreſsly forbids the King's prohibition to take place. But it is manifeſt and notorious, that moſt of the prohibitions now a days be rather all granted in ſtay of ſuch complaints as wherein neither by any writ out of chancery, nor by any other courſe of proceedings at the common law, the ſubject can receive ſound juſtice or final cenſure. 12. For as much as both the juriſdictions, eccleſiaſtical and temporal, be now united in the crown in this realme, which heretofore *de facto* were ſevered and divided from ſeveral heads and authorities, and for that the ground and true original cauſe of prohibitions was no other than the foreſaid ſeverance and partition of juriſdiction, may it not very probably be drawn into caſe, whether, as the caſe now ſtands, any prohibitions at all may in ſound conſtruction of law be warranted. At leaſt, why the form and manner of prohibitions, as heretofore uſed, may now without offence and derogation to the Queen's prerogative eccleſiaſtical be ordained and practiſed, as though the two juriſdictions remained now diſtinct and ſevered as before; and ſo that her Majeſty's juriſdiction eccleſiaſtical may not with as little prejudice to the crown encroach upon the temporal, as the temporal may upon the eccleſiaſtical. 13. But in caſe the prohibitions by force of ſo many years uſe and cuſtom may not now conveniently be diſcontinued either in matter or manner, yet in true ſenſe and meaning of law what reaſon can there be deviſed, why the prohibition ſhould be extended to the reſtraint of her Majeſty's high commiſſion or court of delegates, both of them being authorized under the great ſeal of England, and eſtabliſhed by act of parliament, and neither of them ſo much as thought upon for divers hundreds of years after the prohibition was granted in England, neither by any colour of argument or ſimilitude can be drawn to the caſe of ordinary juriſdiction as then it was or now it is uſed.

And for that her Majeſty's delegates have no general commiſſion ad univerſitatem cauſarum, but for every ſeveral cauſe of appeal certain ſpecial and particular commiſſions, it may ſeem ſomewhat ſtrange and extraordinary, that any ſubject ſhould preſume to countermand her Majeſty's expreſs commiſſion, and to this year at Cambridge *(ccc)*. Mr Hooker dying in Nov. before he had publiſhed his three laſt books of his *Eccleſiaſtical Polity*, the Archbiſhop made the moſt diligent ſearch after the copy, and not being able to find any thing but ſome rough draughts of them, theſe, as 'tis ſaid, he put into the hands of a particular intimate friend of the author, who at the Archbiſhop's requeſt finiſhed the deſign *(ddd)*. Upon the revolt this year of the Earl of Eſſex, the Archbiſhop immediately got threeſcore men of his own houſhold, well armed and appointed, who entering before any others the gates of Eſſex Houſe into the court, made good the place till the Earl ſurrendered himſelf [*HHH*]. In 1601 the Queen entruſted him with the charge of procuring the clergy of Ireland to be prepared with a number of light-horſe upon the Spaniſh invaſion there *(eee)*. This year a bill being brought into the Houſe of Commons for diſabling the Archbiſhops and Biſhops from taking fines in letting leaſes, was rejected *(fff)* by the Archbiſhop's vigilance. Another bill alſo, againſt commiſſaries and archdeacons courts, which were much complained of, he likewiſe defeated; but did not neglect at the ſame time to take all ſuch meaſures as were in his power to redreſs the abuſes which gave occaſion to theſe attempts againſt the eccleſiaſtical juriſdiction [*III*].

This

to forbid the judge's delegate to proceed any further in any one cauſe, which her Majeſty hath ſpecially and particularly commanded others to hear and determine ‡. By theſe motions and arguments the Archbiſhop and Biſhops endeavoured to remedy the contempts and injuries put upon their courts, nay and as it ſeems, upon the Queen herſelf, by evading her ſpecial commiſſion. This cauſed many other diſcourſes and arguments from year to year; and theſe prohibitions increaſed more and more (73).— The reader may perhaps recollect, that Dr Gibſon, the late Biſhop of London, grounds himſelf upon the ſame reaſoning as is here laid down, in his preface to the Codex Juris Eccleſiaſtici, which after it had paſſed uncenſured many years, at length fell under the animadverſion of the Recorder of Briſtol, now Judge Foſter, and was defended by Dr John Andrews, L. L. D. (74)

[*HHH*] *Till the Earl ſurrendered himſelf.*] Sir George Paul tells us (75), the Archbiſhop being that Sunday morning at court, haſtened home without any attendant, and commanded as many men as he then had in the houſe to be preſently armed, and ſent them over to the court, but not to go within the gates until Secretary Cecil, or ſome other by his inſtruction, ſhould appoint them a leader. After the Earl had ſurrendered, he was brought by the Lord Admiral to Lambeth-houſe, where he remained an hour or two, and was from thence conveyed to the Tower. The Archbiſhop, ſays the ſame author, had likewiſe in readineſs that afternoon forty horſemen well appointed, and expected directions from the court how to diſpoſe of them. The next morning he ſent a gentleman to know how the Queen did, and how ſhe reſted all night. To whom ſhe made anſwer, that ſhe reſted and ſlept the better for his care the day before; *but I beſhrew his heart*, ſays ſhe, *he would not believe this of Eſſex, though I had often told him it would one day thus come to paſs.* It ſeems the Archbiſhop had great confidence in the Earl's loyalty, and had been a continual interceſſor for him with the Queen, who had ſometimes rebuked him ſharply for it, and ſent him home much grieved and perplexed (76).

[*III*] *He defeated a bill againſt commiſſaries and archdeacons courts, but did not neglect to reform the abuſes in them.*] The convocation beginning to ſit at St Paul's October 18th, 1601, the Archbiſhop gave the Biſhops the following cautions, December 21, in purſuance to the ſeveral complaints that were made againſt the eccleſiaſtical courts. 1. Not to proceed in courts upon the promoting of apparitors without churchwardens preſentments, or other juſt way of inquiſition. 2. That eccleſiaſtical judges hold not frequenter courts than one in five weeks. 3. That chancellors and officials call not men to ſeveral courts for the ſame cauſe. 4. To have yearly, but once a quarter, bills of preſentments. 5. That the curates of non-reſidents be able perſons, and have good allowance for their pains. 6. That none but chancellors grant licences for marriage. He had endeavoured to redreſs theſe grievances by the conſtitutions paſſed in the convocation, anno 1597, and chiefly with reſpect to the frequency of courts; but theſe being not duly obſerved, in May this year he ſent circular letters to the biſhops of his province to this tenor: That there had been divers complaints made, and *that* to perſonages of great place, who had acquainted him therewith, that by reaſon of the often keeping of courts by commiſſaries and officials, and by the multitude of ſeveral apparitors ſerving under them, the ſubject was almoſt vexed weekly with attendance in their ſeveral courts, to their infinite charge and daily vexation; and further, that by a diſorder not long ſince crept into theſe courts, without warrant, of making quarterly bills of preſentment, whereas their viſitations were held but once, or at the moſt twice, in every year; ſo that what with churchwardens continual attendance in theſe courts, which in many places came to more than was by a whole pariſh for one ceſsment raiſed to her Majeſty, the poor churchwardens by their continual attendance were in their eſtates greatly hindered. Theſe and divers like complaints were daily brought unto him, with a general exclamation againſt commiſſaries and officials courts for ſuch like grievances of the ſubject, he had well hoped that the conſtitutions made the laſt convocation, and their Lordſhips promiſe to ſee them duly executed (knowing how their eccleſiaſtical juriſdiction was then ſpurned at) would have prevented theſe abovenamed and all other like complaints: but he feared the greedineſs of many inferior regiſters and apparitors, under their Lordſhips commiſſaries and archdeacons, was ſo rooted in them, as it would breed a greater blemiſh than hitherto had come upon their whole juriſdiction, unleſs their Lordſhips did with a more diligent care prevent that miſchief. Theſe were therefore to pray and require their Lordſhips, preſently upon the receipt of theſe letters, to call before them their chancellors, commiſſaries, and all their archdeacons and officials, to bring in to their Lordſhips the records of their courts kept for matter of office uſed about the 3d and 4th of her Majeſty's reign, and out of them to take a true extract ſigned with the judges and ſecretaries own hands, certifying theſe three particulars. 1. How often the churchwardens did bring in their bills of preſentments at that time, whether quarterly or no. 2. How often their commiſſaries and officials did keep their courts in every quarter, and how long time difference there was between their commiſſaries courts and thoſe of the archdeacons officials; and laſtly, what number of apparitors every commiſſary and archdeacon's official had at that time? And in the next place, he required the biſhops to inquire how theſe ſeveral particulars were ſtated at this time; for he was informed that every pariſh was quarterly charged with as great a charge for certifying recuſants, as they were for bills of preſentments: to inquire alſo what was paid either to apparitors or regiſters for making the exhibits of theſe ſeveral bills; for he did not hear that the judges had any fee due for the exhibits. To enquire what difference there was between the multiplicity of theſe courts and thoſe of former times, as alſo of the number of apparitors belonging to all theſe offices over thoſe which were of twenty years before the laſt parliament, and then he required them to reduce all to the former ſtandard. Concluding, that for that he himſelf deſired to be ſatisfied in his care, and purpoſed help in reforming theſe abuſes, he did hereby pray and require, that by the laſt day of July next, they would tranſmit unto him all the abovenamed particulars, with their orders taken for reforming them, and bringing them to their former courſe. From Lambeth, 22d of May, 1601.

This preventing care did in ſome meaſure mitigate the complaints in the laſt parliament, which might otherwiſe have endangered their whole authority; but,

(76) Idem ibid.

This year he ſuſpended a clergyman *(ggg)* for three years, for executing a clandeſtine marriage between Edward Earl of Hartford and Frances Pranel. Thomas Cartwright dying this year, the Archbiſhop had the ſatisfaction of finding the opinion, he had not long before given of his good inclinations towards the eſtabliſhed conſtitution of the Church, confirmed [*KKK*]. The next year he conſtantly attended the Queen in her laſt illneſs, and compoſed a prayer upon that occaſion [*LLL*]; he was principal mourner at her funeral, received the offering, and had the banners preſented to him *(hhh)*. King James being proclaimed March the 24th, 1602, the Archbiſhop ſent Dr Nevil, Dean of Canterbury, into Scotland to his Majeſty, in the name of the Biſhops and Clergy of England, to tender their allegiance, and to underſtand his Majeſty's pleaſure in regard to the government of the Church, and though the Dean brought a gracious meſſage to him from the King, aſſuring him that he would maintain the ſettlement as his predeceſſor had left it, yet the Archbiſhop paſſed this ſummer of the year 1603 *in ſome pain about its preſervation* [*MMM*]. The Puritans had immediately upon the death of Queen Elizabeth conceived freſh hopes of ſome countenance, if not eſtabliſhment of their new diſcipline, and began to talk loudly of challenging forth with all exemption from the cenſure of, and ſubjection to, the eccleſiaſtical authority *(iii)*. A book had been printed the year before by that party, entitled, *The Plea of the Innocents* *(kkk)*, and this year in April there came out *The humble Petition of the thouſand miniſters for redreſſing offences in the church*, at the end of which they required a conference; and in October a proclamation was iſſued touching a meeting for the hearing and determining things *pretended* to be amiſs in the church. The Archbiſhop's diligence in this affair is ſeen in a letter which he wrote to the Earl of Shrewſbury ſoon after [*NNN*], by which it appears alſo, that he was then (viz. in December) ſo much indiſpoſed with the jaundice (a diſorder incident to his conſtitution) as not to be able to wait upon the King and court abroad that ſummer. Before the conference

(ggg) His nam was Tho. Monford, S. T. P. but, by reaſon he did it through ignorance of the eccleſiaſtical laws, the archbiſhop ſoon after abſolved him. Strype, p. 551.

(kkk) The author was Joſ. Nicholls.

but, notwithſtanding, divers accuſations were made againſt theſe courts in that parliament. Whereupon in January, ſoon after the parliament was riſen, the Archbiſhop backed his former letter and ſpeech to the convocation, made in December, with this circular addreſs to them.

' *Salutem in Chriſto*,

' Your Lordſhip hath by experience now found how the not reforming of the inconveniences crept into eccleſiaſtical inferior courts, ſpecified in my letters ſent to you in April laſt, hath bred that effect which was then foreſeen, even the multitude of complaints made againſt them in the laſt parliament, which, had they not been prevented with great circumſpection, and hope propoſed of careful reformation hereafter of theſe abuſes and grievances of the ſubject in the inferior courts, there might perhaps have enſued the taking away of the whole or moſt of the courts, which cauſed me at our laſt aſſembly in convocation to admoniſh my brethren then preſent in the terms I did then, which had they been well obſerved, theſe enormities had been all redreſſed.' He then repeats the former abuſes in eight articles, and concludes to this effect. ' Theſe being the grievances moſt noted, and both in parliament and otherwiſe complained of to be heavy for the ſubject to undergo, as I did require at your Lordſhips hands a reformation of them at the end of the convocation, ſo I do hereby pray and require, that you will ſet down ſuch obſervations to your eccleſiaſtical officers, whereby all theſe abovenamed inconveniences may be avoided, as the grievances ſpringing of the not obſerving of the former conſtitutions; and if any officer under you ſhall impugn and not duly perform the redreſſing of all theſe diſorders in manner as I ſhall preſcribe them, he ſhall certainly know that I had rather with ſeverity reform him, than bear theſe ordinary complaints, which in the end may turn to the ſcandal of our juriſdiction eccleſiaſtical. And ſo not doubting but you will have due care of the premiſes, I commend your Lordſhip to God. From Lambeth, 7th January.

' Your Lordſhips loving brother in Chriſt (77).

(77) Strype, ch. 27. anno 1601.

[*KKK*] *Towards the eſtabliſhed conſtitution of the church.*] After Cartwright was admitted to bail at the Archbiſhop's motion, he always acknowledged the obligation, as appears by ſeveral letters of his to the Archbiſhop. In one, dated March 24th, 1601, he acknowledges *his bond of moſt humble duty ſo much the ſtricter, becauſe his Grace's favour proceeded from a frank diſpoſition, without any deſert of his own*; and the Archbiſhop, ſays Sir George Paul §, hath been heard to ſay, that if Maſter Cartwright had not ſo far engaged himſelf as he did in the beginning, he thought verily in his latter time he would have been drawn to conformity; for when he was freed from his troubles, he often repaired to the Archbiſhop, who uſed him kindly, and was contented to tolerate his preaching in Warwick divers years, upon his promiſe not to impugn the eccleſiaſtical eſtabliſhment, but perſuade and procure as much as in him lay the eſtimation thereof, which he performed; but when her Majeſty came to know of the Archbiſhop's connivency, ſhe was diſpleaſed with it (78). Sir Henry Yelverton (79) aſſures us, that his laſt words on his deathbed were, that he ſorely lamented the unneceſſary troubles he had cauſed in the church by the ſchiſm he had been the great fomenter of; and wiſhed he was to begin his life again, that he might teſtify to the world the diſlike he had of his former ways; and in this opinion he died.

§ p. 71, 72. where he relates, that Cartwright was ſaid to die rich, as was ſaid, by the benevolence and bounty of his followers.

(78) Strype, ch. 28.

(79) In his epiſtle to the reader before Biſhop Moreton's *Epiſcopacy Juſtified.*

[*LLL*] *He compoſed a prayer upon that occaſion.*] Theſe were the words of it; *O moſt heavenly Father, and God of all mercy, we moſt humbly beſeech thee to behold thy ſervant the Queen with the eyes of pity and compaſſion. Give unto her the comfort of thy holy Spirit; work in her a conſtant and lively faith, grant unto her true repentance, and reſtore unto her, if it be thy will, her former health and ſtrength both of body and ſoul; let not the enemy nor his wicked inſtruments have any power over her to do her harm. O Lord, puniſh her not for our offences, neither us in her. Deal not with us, O Lord, as we have deſerved; but for thy mercy's ſake, and for thy Chriſt's ſake, forgive us all our ſins, and prolong her days, that we may ſtill enjoy her, to the glory of thy holy name, and good of all ſuch as truly fear thee, through Jeſus Chriſt our Lord. Amen* (80).

(80) Strype, ch. 29. from Regiſt. Whitg. Vol. III. p. 148.

[*MMM*] *He paſſed this ſummer in ſome pain about its preſervation.*] It will be no ſevere cenſure, if we ſuppoſe that a concern for himſelf was one great ingredient in this anxiety. He had been long in the higheſt favour with Queen Elizabeth. Sir George Paul obſerves, that he did all in all for the managing of the clergy affairs, and diſpoſing of biſhopricks and other eccleſiaſtical promotions; the Queen having declared that ſhe had laid the burthen of theſe cares upon his ſhoulders, in theſe words, That if any thing were amiſs, be it upon his ſoul and conſcience to anſwer it; for ſhe had rid her hands, and looked that he ſhould yield an account on her behalf unto almighty God (81).

(81) Sir George Paul, p. 78.

[*NNN*] *A letter which he wrote to the Earl of Shrewſbury ſoon after.*] ' My very honorable and eſpecial good Lord, I have wrote to the town of Grimſby, according to your deſire, and do very heartily thank you for ſo well affecting them, being a corporation which nature tendeth me to favour, and to wiſh well unto. I would to God your Lordſhip were ſeated there, if there were any ſeat fit for you. I did not diſcommend your purpoſe for the

' fiſh

rence he ſent ſome queries to his old friend Dr Hutton, then Archbiſhop of York, of matters that ſhould be concerted at this conference for his judgment. The conference was held at Hampton-court, and laſted three days, June 14, 16, and 18. An account of it was afterwards written by Dr Barlow, then Dean of Cheſter, at the particular requeſt of the Archbiſhop: one principal deſign of which was thereby to wipe off an aſperſion that was thrown upon him, and ſome other Biſhops, at the cloſe of it [OOO]. The time of the parliament's meeting now drawing near, the Archbiſhop, that he might be the better prepared, appointed a meeting at the Biſhop of London's houſe at Fulham, to confer with ſome of the Biſhops and judges of his court concerning the affairs of the church, which were then to be treated on. As he was thus going in his barge on a very cold day, and having his barge-cloth tied up (as his cuſtom was) to the top of the bales, the wind blew ſo ſharp, that the young gentlemen in waiting deſired to have the cloth down, which he would by no means permit, becauſe the water was rough, and he would therefore ſee his way. At night he complained of having taken a great cold in his head. However, the next Sunday, being the firſt Sunday in Lent, he went to Whitehall, where the King held a long diſcourſe with him and the Biſhop of London, about the affairs of the Church. Going thence, after faſting till near one o'clock, to the Council Chamber to dinner, he was taken with a fit, which ended in the dead palſy on the right ſide, and his ſpeech taken away, whence he was carried to the Lord Treaſurer's chamber, and thence (after a while) conveyed home to Lambeth. On Tueſday he was viſited by the King, who told him, *he would pray to God for his life, and that if he could obtain it, he ſhould think it one of the greateſt temporal bleſſings that could be given him in this kingdom.* The Archbiſhop would have ſaid ſomething to the King, but his ſpeech failed him, ſo that he uttered only imperfect words. But ſo much of his ſpeech was heard, repeating it once or twice earneſtly (with his eyes and hands lifted up) *pro eccleſia Dei (lll)*: And as he would have ſpoken his mind to the King being preſent, ſo he made two or three attempts to write his mind to him, but could not, the pen falling out of his hand by reaſon of the prevailing of his diſeaſe, which put an end to his life the day following, being the 29th day of February 1603-4 *(mmm)*. Camden, notwithſtanding he aſſigns the palſy for the immediate apparent cauſe of his death, yet expreſly declares, that "he died with grief, as he found "the King began to contend about the liturgy, and judged ſome things therein fit to "be altered. *Dum de liturgia recepta Rex contendere cœpit, & nonnulla in ea mutanda cenſuit,* "*Johannes Whitgiftus Archiepiſc. ex mœrore obiit (nnn).*" This ſeems alſo to be the general opinion, by the account which another author *(ooo)* gives us, that upon his death-bed he ſhould uſe theſe words: "*Et nunc, Domine, exaltata eſt anima mea, quod in eo tempore ſuccubui* "*quando mallem epiſcopatus mei Deo reddere rationem, quam inter homines exercere*: And "now, O Lord, my ſoul is rejoiced that I die in a time wherein I had rather give up "to God an account of my biſhopric, than any longer to exerciſe it among men." He was interred the 27th of March in the pariſh-church of Croydon, where a monument is erected with an inſcription to his memory. His funeral was graced with the preſence of the Earl of Worceſter, and the Lord Zouch, who attended the hearſe carrying his banners; and Dr Babington *(ppp)*, Biſhop of Worceſter, preached his funeral-ſermon with great applauſe on 2 Chron. xxiv. 15, 16. In his perſon he was of a middle ſtature, a grave countenance, and brown complexion, black hair and eyes *(qqq)*. He wore his beard neither long nor thick. He was ſmall boned and of good agility, being ſtraight and well ſhaped in all his limbs to the light habit of his body, which begun ſomewhat to ſpread and fill out towards his latter years *(rrr)*. His learning ſeems to have been confined to the Latin language, as *Hugh Broughton* often objected to him; neither doth he ſeem to have been much ſkilled in deep points of theology. He was a popular and a diligent preacher, and took delight in exerciſing his talent that way *(sss)*, yet his ambi-

(lll) The King afterwards declared, as Sir George Paul relates, that by theſe words he conceived the archbiſhop continued the ſuit, which at ſundry times before, and at his laſt attendance on his highneſs, he had earneſtly recommended to his ſpecial care in behalf of the church.

'fiſh ponds; for it is a true proverb, *Things far fetched* '*and dear bought are good for ladies.*

'I have not been at court ſithence it removed from 'Hampton, the times and ways have been ſo dangerous, 'and my years ſo unapt to travel; but I have 'heard from thence and ſent thither according to my 'former manner; and although our humorous and 'contentious brethren have made many petitions and 'motions correſpondent to their natures, yet your 'Lordſhip may perceive by the proclamation publiſhed, 'and to my comfort I am aſſured by his Majeſty's 'letters writ to me, that they have not much 'prevailed. Your Lordſhip I am ſure doth imagine 'that I have not all this while been idle, nor greatly 'quiet in mind; *for who can promiſe himſelf reſt* '*among ſo many vipers?* I thank God I go on as I 'wont to do, although at preſent I am attended with 'my old diſeaſe the jaundice. I am ſorry to hear you 'mention any *ſuperſedeas* towards the parliament. You 'know my opinion of the goute, and thoſe that are 'infected therewith; I hope your Lordſhip will not 'confirm me therein, nay I perſuade myſelf of the 'contrary in you; but my reſolution is *quod Deus* '*vult, hoc faciet.* And ſo with my moſt heartieſt com'mendations to your Lordſhip and my very good 'Lady, I commit both to the unction of almighty 'God. From Croydon, December the 12th, 1603.

'Your Lordſhip's moſt aſſured,

'John Cantuare (82).'

[OOO] *An aſperſion thrown upon him and ſome other Biſhops at the cloſe of it.*] The meeting was ſcarce over, when it was reported, and copies thereof were diſperſed, that the Archbiſhop and Biſhops of London and Wincheſter fell down on their knees to the King, and deſired that all things might remain as they were, leſt the Papiſts might think they had been in an error hitherto, and might ſay they would perſuade them to come to a church having errors in it; and leſt the Puritans ſhould alledge they had been long perſecuted unjuſtly; and further, that at the end of this conference, the Archbiſhop had been intreated to be a means that the ceremonies might not be preſſed, and that he ſhould anſwer, that they had been urged as neceſſary, and would be ſo ſtill; and at laſt the Archbiſhop and Biſhop of London (as almoſt deſpairing of their cauſe) beſought his Majeſty to take their cauſe into his own hand, and to make ſome good end of it, as might ſtand with their credit.

(82) Appendix, No. 43, to chap. 31. from a MS. communicated to Mr Strype by White Kennet, then Dean of Peterborough.

tion

tion led him chiefly to ſway and government, in the adminiſtration of which he was both indefatigable and intrepid. After he left Trinity College, while he was Biſhop of Worceſter and Archbiſhop of Canterbury, he took for many years into his houſe a number of young gentlemen, ſeveral of quality, to inſtruct them, as their Tutor, reading to them thrice a day in mathematics and other arts, as well as in the languages, giving them good allowance and preferments as occaſion offered; beſides theſe, he kept ſeveral poor ſcholars in his houſe till he could provide for them, and prefer them (as he did ſeveral to good eſtates) he alſo maintained divers others at the univerſity. His charitable hoſpitality extended to foreigners. He relieved and entertained in his houſe for many years together ſeveral diſtreſſed miniſters (recommended by Beza and others) out of Germany and France, who were driven from their own homes, ſome by baniſhment, others by reaſon of wars and extremity, ſhewing no leſs bounty to them at their departure. Sir George Paul aſſures us, that he remitted large ſums out of his own purſe to *Beza*. He kept likewiſe for the exerciſe of military diſcipline a good armory, and a fair ſtable of great horſes, inſomuch as he was able to arm at all points both horſe and foot, and ſeveral times had an hundred foot and fifty horſe, of his own ſervants, muſtered and trained, entertaining captains for that purpoſe. He had alſo ſkilful riders, who taught them to manage their horſes, and inſtructed them in warlike exerciſes, all whom he rewarded in liberal manner. By this means ſeveral of his gentlemen afterwards proved good ſoldiers, many whereof became captains and commanders, and ſome for their valour and ſervice were knighted in the field: in this view his houſe was a perfect academy; and in ſome reſpects ſuperior and more profitable, viz. for martial affairs, and the experience that divines and other ſcholars had, being near and often at the court and chief ſeats of juſtice, from whence they continually had the paſſages and intelligences, both for matters of ſtate and government in cauſes eccleſiaſtical and civil. By this means many of his domeſtic chaplains, both before and after his death, attained to the chiefeſt honours and dignities, namely, Dr Bancroft, Archbiſhop of Canterbury; Dr Ravis, Biſhop of London; Dr Barlow, Biſhop of Lincoln; Dr Gouldeſbury, Biſhop of Glouceſter; Dr Parry, Biſhop of Worceſter; Dr Redman, Biſhop of Norwich; and Dr Buckeridge, Biſhop of Rocheſter. His houſekeeping was anſwerable to this; he often feaſted the clergy, nobility, and gentry of his dioceſe and neighbourhood, and at Chriſtmas eſpecially his gates were always open, and his hall ſet twice or thrice over with ſtrangers*: Upon ſome chief feſtival days he was ſerved with great ſolemnity, ſometimes upon the knee. Every year he entertained the Queen at one of his houſes, and ſome years twice or thrice. Every third year while he was Archbiſhop, he uſually went into Kent, when he was attended by a train of his own ſervants, conſiſting of two hundred perſons; theſe being joined by the gentlemen of the country, he ſometimes rode into Canterbury, and other towns, with eight hundred or a thouſand horſe. At his firſt journey into Kent, which was in July 1589, he rode to Dover, attended with not leſs than one hundred of his own ſervants in livery, whereof there were forty gentlemen in chains of gold. The train of gentlemen and clergy in the country and their followers was above five hundred horſe. This grand appearance proved of ſervice to the church at that time; at his entrance into the town, there happily landed an intelligencer from Rome, who wondered to ſee an Archbiſhop or clergyman in England ſo reverenced and attended; and being preſent alſo the Sunday following at ſervice at the cathedral in Canterbury, where ſeeing his Grace attended with his gentlemen and ſervants, as alſo the Dean, Prebendaries, and Preachers in their ſurplices and ſcarlet hoods, and hearing the ſolemn muſic with the voices and organs, cornets and ſackbuts, he was ſtruck with amazement and admiration, and declared, that *they were led in great blindneſs at Rome by our own nation, who made the people there believe, that there was not in England either Archbiſhop or Biſhop, or cathedral, or any church or eccleſiaſtical government, but that all was pulled down to the ground, and that the people heard their miniſters in woods and fields, among trees and brute beaſts: but for his own part he proteſted, that unleſs it were in the Pope's chapel, he never ſaw a more ſolemn ſight, or heard a more heavenly ſound.* In the execution of his charge in the eccleſiaſtical commiſſion, every Thurſday in Term being a ſolemn court-day, the Archbiſhop had a ſermon in his chapel, and entertained the commiſſary and their attendants at great expence. That day was ſeen a ſenate of the greateſt counſellors of ſtate, with the aſſiſtance of the chief prelates, juſtices, judges, and ſufficient lawyers of both profeſſions that thoſe times afforded‡. He gave audience to ſuitors twice a day at ſet hours, entertaining them hoſpitably. His courage and reſolution in this court appears from what has been already related; but there is one remarkable inſtance, which ought not to be omitted. It happened before he was made privy-counſellor, when a gentleman of good account perceiving which way the court leaned in his cauſe (not according to his deſire) told the Archbiſhop, that upon another occaſion there grew ſome ſpeech of that cauſe before the Lords of the council, and their lordſhips were of another opinion than his Grace and the reſt of the commiſſioners ſeemed to be: *What telleſt thou me*, ſaid the Archbiſhop, *of the Lords of the council? I tell thee, they are in theſe caſes to be adviſed by us, and not we by them*§. Upon ſuch like occaſions he would oftentimes ſay to his private friends towards the latter part of his time, when in familiar diſcourſe they obſerved his courage and ſtoutneſs, *that two things did help much to make a man confident in good cauſes, namely*, Orbitas & Senectus†, *and*, ſaid he, *they ſteed me both.* He was naturally of a choleric diſpoſition, which however was ſo tem-

* As Druſius, Renicherus, Frigevill, and Mr Buſe, a French miniſter, who read weekly a Latin lecture in his chapel.

‡ This kept up the reputation of the court, thro' the neglect of which its credit ſunk afterwards, till at length by ſeveral great abuſes that crept into it, this court became ſo odious, as to be utterly aboliſhed.

§ Sir George Paul, p. 10.

† Being old and childleſs.

pered with his ambition and prudence, that his choler rather ſerved for a whetſtone of his courage in juſt cauſes, than any weapon whetted againſt the perſon, goods, or good name of any other. When Pickering was cenſured in the Star-chamber for libelling him after his death, it was obſerved by the Earl of Saliſbury [Cecil] who knew him well, that there was nothing more to be feared in his government, eſpecially towards his latter time, than his mildneſs and clemency. This part of his character is ſufficiently confirmed by the learned Mr Hooker, who with that majeſtic ſimplicity which diſtinguiſhes his pen, expreſſes it thus: " He" (the Archbiſhop) ſays he, " always governed with that " moderation, which uſeth by *patience* to ſuppreſs boldneſs, and *to make them conquer that* " *ſuffer* (*ttt*)." As the reducing both the Popiſh recuſants and Preſbyterian Puritans to conformity with the eſtabliſhed church was what lay neareſt to his heart, he plied both theſe kinds of delinquents as well with his power and authority, as with his lenity and perſuaſion; and was ſo aſſiduous in preaching, that even after he was Biſhop of Worceſter, unleſs extraordinary buſineſs of the Marches of Wales hindered him, he never failed to preach every Sunday, either in the city or in ſome neighbouring pariſh-church. The like he did alſo when he was Archbiſhop, and lay at Croydon, the Queen being in her progreſs. Neither did any Sunday eſcape him in Kent, and he often preached the morning-lecture both in Worceſter and Canterbury, early enough to be preſent afterwards at ſermon in the cathedral (*uuw*). Upon the whole, Mr Strype remarks (*www*), that he lived and died in great reputation, and particularly happy in being highly eſteemed for his wiſdom, learning, and piety, by both his ſovereigns, Queen Elizabeth and King James, who both conſulted with him in all matters of the church, and in making laws and orders for the well government thereof: And likewiſe in taking always his advice for proper men to be placed in the chief preferment of it; and who ſeeing the great danger of the overthrow of the religion as it was reformed at firſt, that is, of the doctrine of it by papiſts, and its diſcipline and conſtitution by the new reformers [*PPP*], devoted himſelf, his pains, his ſtudies, his learning, and his intereſt to the preſerving of it, wherein he

(*ttt*) Mr Hooker in theſe laſt words has tranſlated the archbiſhop's motto, *Vincit qui patitur*; which contains a very good memento for one of a choleric diſpoſition.

(*uuu*) Paul's life. &c. p. 83. 85. 87. 97, 98, 99. 101, 102, 103, 104, 105.

(*www*) Ubi ſupra, p. 579.

[*PPP*] *The new Reformers.*] Beſides Cartwright and Travers already mentioned, the chief ringleaders of theſe were Beal, Penry, Udal, Baro, and ſome others; a particular account of whom, and the pains our Archbiſhop took to ſuppreſs them, may be ſeen in the Life of his Grace by Mr Strype, to whom we owe ſome particulars of one principal ringleader, namely Robert Browne, who went at a further diſtance than any of the Puritans at firſt did, even to the breaking off wholly from the church eſtabliſhed, as holding it utterly unlawful to be a member thereof, or to communicate with it, as being antichriſtian and idolatrous. He wrote books to prove this charge, and drew away a great party, and ſet up a ſect, which from his name was called Browniſts. But in 1589 he returned to the communion of the church. He was the third ſon of Anthony Browne, of Tolthorp, in the county of Rutland, Eſq; and High Sheriff of that county in 37 Hen. VIII. 5 Mary, and 13 Eliz. and by his wife Dorothy, daughter of Sir Philip Boteler, of Woodhall in Hertfordſhire, had this ſon Robert, who became afterwards Rector of Achurch in Northamptonſhire, by the intereſt of the Lord Burleigh, who, when this his couſin had left his fancies, and became obedient to the church, wrote a letter to the Biſhop of Peterborough (in whoſe dioceſe he was) to ſhew him favour; and that as he had been deprived of ſome benefice which he had before, ſo now, if he found him duly conformable, to provide ſome eccleſiaſtical employment for him; urging that he was the more willing to do him good, and was not a little glad of his reclaiming of him, becauſe of kindred to him. His Lordſhip's letter is dated from his houſe near the Savoy, June 20, 1589. But it ſeems Mr Browne could not ſo leave his opinions, but he ſtill remained conceited and very fanciful; of which ſome *Tables* in Latin which he wrote, and hugely applauded himſelf for, are pregnant proofs. The intent of theſe Tables was to rectify the knowledge of arts and ſciences by the word, as appears from a letter which he wrote to the Lord Treaſurer in the following terms.

'With ſpecial reverence and dutiful ſubmiſſion I exhibit this treatiſe to your Honour: the Latin Tables, and definition thereof, I have beforetime written to your Lordſhip, which I underſtand have been ſhewed to ſome learned and reverend fathers the Biſhops, but are either neglected, or through greater buſineſs forgotten. Neverthèleſs I aſſure myſelf, and dare offer the challenge, that here in this treatiſe I have juſtly altered the arts, and the rules and terms of arts, by evidence of the *Word*, and have corrected many errors of all our profeſſors: yea, many falſified points of learning, both in the method and truth of the arts, and alſo of religion.

Alſo I am for to juſtify this treatiſe and the exact method and truth thereof, againſt the multitude of philoſophers, doctors, and writers heretofore. Farther, I offer to prove, that the word of God doth expreſsly ſet down al neceſſary and general rules of the arts, and al learning, as may appear by this book; but ſhould more appear, if examples were added, and the contrary errors more largely diſcovered.

Oh that our univerſities were herein better adviſed and reformed! I dare ſay no more. But I judge that *that* propecy was of God, touching Oxford and Stameforde, and that to the ſhame of Oxford, which then withſtood and prevailed againſt Stameforde, and ſuppreſſing it and the truth therewith. Oh! Right Honourable and Prudent, I ſpeak no toy, but even in this poor treatiſe of me a Stameforde man do ſe it partly verified: yea I dare by God's help, and your Lordſhip's favour, undertake this place or cauſe; That in one year ſcholars may wel learn together thoſe arts, which ſcarcely in ten years they untowardly learn in the univerſities; and that by divine wiſdom and prudence they ſhal confute their *Logic*; by right ſpeech and language diſprove their *Grammar*; by right uſe of proverbs and proverbial ſpeeches, or by words, diſprove their *Rhetoric*: Alſo their *Arithmetic*, by the right rules of numbring; their *Geometry*, by better meaſuring; their *Muſic*, by better meaſuring; their *Metaphyſics*, by the law of creation, covenant, and ſanctification; their *Ethics*, *Oeconomics*, *Politics*, by true religion and righteouſneſs.

Yet I condemn none of the arts, but only the falſeneſs of them. And if it were not that I am become odious to many for the Truth's ſake, I would not doubt by God's grace to bring many thouſands [to be] of my mind and judgment, and in very ſhort time perfect them in their former ſtudies, as is above ſpecified: I mean, if I were authorized to read public lectures, and make profeſſion accordingly. For as Plato, Ariſtotle, Socrates, and Pythagoras made many thouſand ſcholars, and that without any public maintenance, and in a very few years; ſo much rather the arts and points of religion more truly handled, and utterly differing from them al, I would hope, by your Lordſhip's good countenance, onely to perform much rather the like, and that in al quietneſs alſo; not meddling to condemne or controwl any learned man, or any kind of profeſſion. Thus being longer herein than I would, I ceaſe: praying for your Honour's health and eternal bliſs.

Your Honour's poor Orator,

Robert Browne (83).'

(83) Strype's Appendix to book iii. No.4

had ſucceſs to the end of his days, though through much oppoſition. Our metropolitan printed no books beſides thoſe above-mentioned againſt Cartwright's *Admonition.* His genius was turned not to a ſedentary, but an active life, which was handſomely intimated to the French ambaſſador *Boys Siſi*, to whom upon his enquiring what works the Archbiſhop had publiſhed, for that he would willingly read *his* books, who was reputed *The peerleſs Prelate for piety and learning in our days*, and whom in conference he found ſo grave, godly, and judicious, it was anſwered, that he only publiſhed certain books in the Engliſh tongue in defence of the eccleſiaſtical government; and being incidentally told, that he had founded an hoſpital and a ſchool, the ambaſſador immediately broke into this expreſſion: *Profecto hoſpitale ad ſublevandam paupertatem, & ſchola ad inſtruendam juventutem ſunt optimi libri quos Archiepiſcopus* [*aliquis*] *conſcribere potuit.* ‘ Truly an hoſpital to ſuſtain the poor, and a ſchool to train up youth, are the worthieſt books that an Archbiſhop could ſet forth (*xxx*).’

(*xxx*) Sir G. Paul, p. 111.

WICLIFF, de WYCLIF, or WICLEF [JOHN], a very learned Engliſh Divine in the fourteenth century, the firſt who had the courage and honeſty to oppoſe many of the errors and abſurd impoſitions of the church of Rome, was born about the year 1324, in Richmondſhire within the county of York [*A*], near the river Tees, and in the pariſh of Wycliff, from whence he took his ſurname (*a*). Being bred to learning, he was ſent to the univerſity of Oxford, and admitted Commoner of Queen's college; but ſoon after removed to Merton-college, of which he was probationer (*b*), but never fellow, as ſome have aſſerted [*B*]. This college was, and had been, the moſt famous ſeminary of great and learned men in the whole univerſity [*C*]. And John Wicliff quickly grew inferior to none of them, but came to be taken notice of, and diſtinguiſhed for his excellent parts, and wonderful diligence, which was ſuch, that he is ſaid to have gotten by heart all the moſt intricate parts of Ariſtotle; and, when he applied himſelf to the ſtudy of divinity, to have made himſelf maſter of all the niceties of the ſchoolmen. By theſe means he came to be accounted an excellent philoſopher, and incomparable in ſchool-exerciſes (*c*): a man of a profound wit, very acute, and powerful in diſputations, and to paſs with the common ſort of divines for little leſs than a God (*d*). To theſe acquiſitions of ſchool-learning, he added the ſtudy of the civil and canon law, and of our own municipal laws, in all which his writings ſhew him to have been very well verſed. But his favourite ſtudy and chief delight, were the holy ſcriptures. Of theſe he was a very diligent reader; on ſeveral parts of them he wrote notes, expoſitions, and homilies; and tranſlated them into Engliſh: for which reaſon he ſeems to have obtained the title of *Doctor Evangelicus*, the Evangelical or Goſpel Doctor. Next to the ſcriptures, he ſtudied moſt the chief Fathers of the Latin church (*e*), whom he often cites and refers to in his writings. He was likewiſe a great admirer of the writings of Robert Groſthead, made Biſhop of Lincoln in 1235, and of Richard Fitz-Ralph, Profeſſor of Divinity at Oxford, and Archbiſhop of Armagh in Ireland about the year 1347. Theſe he often quotes, and makes great uſe of them in his diſputes with the Friers, and againſt the papal encroachments in England. Such was Mr Wicliffe's character in the univerſity (*f*): and he appears, as early as the year 1356, to have declared publickly againſt ſome popiſh corruptions, in his treatiſe ‘ Of the laſt age of the Church [*D*].’ But what ſeems to have made him firſt taken notice

(*f*) Lewis, p. 3.

[*A*] *In Richmondſhire within the county of York.*] Dr Thomas James informs us (1), that ‘ unto this day ‘ ſome of the name and family of Wicliff doe remaine ‘ in the North.’—It was in the reign of King James I. that Dr James wrote this; and we are told, that there is now a branch of the Wicliff's family in the neighbourhood of Richmond, who were formerly Lords of Wicliff, and had a conſiderable eſtate there; and that among them there goes a report, though they have no authentick evidence to ſupport it, that John Wicliff was of their family (2).

[*B*] *But never Fellow, as ſome have aſſerted.*] Moſt of our writers have called him Fellow of that college: However, that he never was actually Fellow, is quite plain from this memorandum, in Br. Twine's MS. extracted from an old regiſter of Merton College by the learned Tho. Allen, ‘ J. Wiclif, doctor in theologia, qui nimium in proprio ingenio confidebat, non ‘ fuit Socius iſtius domus, nec annum probationis habuit plenarium in eadem (3).’

[*C*] *The moſt famous ſeminary of great and learned men in the univerſity.*] Among whom are reckoned—Roger Bacon, the ornament of his age, an extraordinary mathematician.—Thomas Bradwardine, A. D. 1349. the Profound Doctor, afterwards Archbiſhop of Canterbury.—Walter Burley, A. D. 1330. the Plain Doctor, preceptor to K. Edward III.—John Eſtwood, famous for his ſkill in aſtronomy, about 1360.—John of Gateſden, an eminent Phyſician, about 1320.——Simon Iſlip, Archbiſhop of Canterbury in 1349.——Simon Mepham and John Peckham, Archbiſhops of Canterbury.——William Occham, the Nominaliſt, or Singular Doctor.—William Rede, a noted mathematician, Biſhop of Chicheſter in 1369, &c (4). ‘ By ‘ example of theſe, as well as by the ſtrict diſcipline ‘ of that houſe,’ as Dr Tho. James obſerves (5), ‘ he ‘ became nothing inferiour to any of the former, either in quicknes of apprehenſion, ſharpnes of wit, ‘ ſhortnes of delivery, greatnes of induſtrie, ſtoutnes ‘ of courage, and variety of all kinde of good learning; and above them all in a full knowledge of the ‘ truth of the goſpel, and conſtant defenſe of the ſame ‘ unto the ende.’— The chief ſources from whence he drew his learning, beſides the Bible, were, Occham, Tho. Bradwardine, Marſilius of Padua, Guido de S. Amore, Ric. Armachanus, Abelard, Robert Groſthead Biſhop of Lincoln, &c.

[*D*] *Of the laſt age of the Church.*] In this very ſhort tract he ſhews from the Abbot Joachim's book Of the ſeed of profetis, and of the ſeyings of the Popes, &c. St Bernard, the verſes of the Sibyls, &c. that, as he expreſſes it, ‘ Seculer Power of the Hooly Gooſt ‘ eliſpired, and that bothe venjaunce of ſwerde, myſcheifs unknowne bifore, bi whiche men thes daies ‘ ſchulde be punyſchid ſchulen falle for ſynne of ‘ preſtis, men ſchal fall on them, and caſt them out of ‘ their fatte beneficis, and thei ſchal ſeie he came into ‘ his benefice by his kynrede, thes bi covenant maad ‘ bifore, he for his ſervyſe, and thes for moneye cam ‘ into Goddis Chirche. Thane ſchal eche ſuch preſt ‘ crye,

(5) Life, as above.

notice of, was his joining with the univerſity in 1360, againſt the oppoſition and encroachments made by the begging Friers, the Methodiſt Preachers of thoſe times, who had, ever ſince their ſettlement in Oxford in 1230, been very troubleſome, and made it their buſineſs to diſturb the Chancellor and ſcholars, by breaking in upon their ſtatutes and privileges (*g*), and ſetting up an exempt juriſdiction [*E*]. He oppoſed thoſe Friers alſo, in their ill practice of enticing the youth from the colleges into their convents; inſomuch that people were afraid of ſending their children to the univerſity, leſt they ſhould be thus kidnapped. By which means the number of ſtudents was ſo far decreaſed, that whereas they had been thirty thouſand, they were not, in 1357, above ſix thouſand. Thoſe mendicant Monks having alſo invented this groundleſs and ſilly notion, on purpoſe to juſtify their begging trade, That the poverty of Chriſt was ſuch, that neither he nor any of his Apoſtles had any thing of their own, but poſſeſſed all things in common, and that Chriſt begged for a livelihood; Mr Wicliff, among others, ſolidly confuted them, with great applauſe (*h*) [*F*]. All which performances rendered him ſo conſiderable, that, on the 9th of April 1361, he was appointed Maſter of the hall, or college, of Balliol (*i*): and, the 14th of May following, preſented by the ſame college to the church of Filingham in the county of Lincoln; which he afterwards exchanged for that of Lotegarſhall (*k*). On the 14th of December 1365, he was conſtituted Warden of Canterbury college in Oxford, by Archbiſhop Simon de Iſlip, founder of that college; (*l*). [*G*] who, in the letters of inſtitution, ſtyles him a perſon in whoſe fidelity, circumſpection, and induſtry, he very much confided; and on whom he had fixed his eyes for that place, upon account of the honeſty of his life, of his laudable converſation, and his knowledge of letters, or learning (*m*). But an equal number of regular and ſecular prieſts having been placed in this college by the founder; after his deceaſe, the regulars who wanted at that time to engroſs all religious donations, got their Warden Mr Wicliff, and the three ſecular Fellows, ejected in April 1367. Theſe, refuſing to abide by ſo arbitrary a ſentence, appealed to the Pope. But at that prejudiced court, where the Monks, the Pope's ſtanding army, were entirely countenanced, John Wicliff could get neither favour nor juſtice; and therefore the ſentence againſt him was confirmed in 1370 (*n*). This unhandſome uſage, we may ſuppoſe, increaſed our Author's averſion for the court of Rome, augmented the ill opinion he had conceived of it, and infuſed ſome bitterneſs into his writings: but it was not owing to his being refuſed the biſhoprick of Wincheſter, (*o*) or Worceſter, as ſome fabulous writers have aſſerted; for, long before this, he had drawn his pen againſt the Pope's exactions, even as early as the year 1356 (*p*). However, it is certain that his character and reputation in the univerſity were no way leſſened by his

'crye, Alas, alas, that no good Spiryt dwellid with 'me at my comynge into Goddis Chirche.'—— He goes on to cenſure the exactions and uſurpations of the Pope, under the names of Dymes, firſt-fruits, penſions, &c (6).

[E] *And ſetting up an exempt juriſdiction.*] By one of the ſtatutes of the univerſity it was ordered, 'That 'no one ſhould proceed Doctor in Divinity, unleſs he 'had been before a Regent in Arts, either in that or 'ſome other univerſity.' Of this the Dominicans, or Friers Preachers, who had no regular univerſity-education, complained, as bearing hard upon them, and being much to their prejudice. They laboured therefore very earneſtly to have this ſtatute repealed, and to be exempted themſelves from the performance of univerſity exerciſes. For which purpoſe they appealed to the Pope, petitioned the King, and inſulted the Chancellor, Proctors, and Regents of the univerſity; treating them with all imaginable contempt, and doing all they could to ſtir up the ſcholars to be ſeditious and troubleſome (7).

[F] *Solidly confuted them with great applauſe.*] He writ, upon that occaſion, the following tracts. 1. *Of Clerks poſſeſſioners*; wherein he has theſe words: 'Freres drawen children fro Chriſt's religion into 'their private order by hypocriſie, leſings and ſteling. 'For they tellen that their order is more holy than 'any other, and that they ſhullen have higher degree 'in the bliſs of heaven than other men that ben not 'therein, and ſeyn that men of their order ſhullen 'never come to hell, but ſhullen dome other men 'with Chriſt at doomſday. And ſo they ſtelen children fro fader and moder, ſometime ſuch as ben 'unable to the order, and ſometime ſuch as ſhullen 'ſuſteyn their fader and mother by the commandment 'of God; and thus they ben blaſphemers takin upon 'full counced in douty [doubtful] things that ben not 'expreſsly commanded ne forbidden in holy writ; 'ſith ſuch counſel is appropred to the Holy Ghoſt; 'and thus they ben therefore curſed of God, as the 'Phariſees were of Chriſt, Matt. xxiii. 14. . . . . And 'ſith he that ſteleth an ox or a cow is damnable by 'God's law, and man's law alſo, muckil more he that 'ſteleth a man's child, that is better than all earthly 'goods, and draweth him to the leſs perfitt order. 'And though this ſingular order were more perfect 'than Chriſt's, yet he wot never where it be to damnation of the child, for he wot not to what ſtate 'God hath ordained him; and ſo blindly they don 'ageinſt Chriſt's ordinance.'

Againſt the other pretence of the religious, that Chriſt himſelf was a *beggar*, Wicliff wrote tracts intituled. 2. *Of the Poverty of Chriſt.* 3. *Againſt able Beggary.* 4. *Of Idleneſs in Beggary*: wherein he ſhews (8), That Chriſt was entertained by Mary Magdalen, and other holy men and women, '*without axing* or 'conſtreyning. Chriſt bad his apoſtles and diſciples 'that they ſhould not bere a ſachell ne ſcrip' [as the begging friers did to carry to their convents what they got by begging] 'but look what man is able to hear 'the goſpel, and eat and drink therein, and paſs not 'thence, and not paſs fro houſe to houſe. St. Paul 'labored or travailed with his hands for him, and for 'men that weren with him; and coveted neither gold, 'ne ſilver, &c.— And he biddeth that men that wilen 'live in idleneſs and curioſity, and not traveile [labour] ſhullen not eat.'—From whence he concludes, that 'ſith open begging is thus ſharply damned in 'holy writ, it is a foule error to meynteyne it; but 'that it is more error to ſeie that Chriſt was ſuch a 'beggar, ſith then he muſt have been contrary to his 'own law.'— He further ſhews (9), that 'it is a leaving the commandment of Chriſt, of giving of alms to poor, feeble, crooked, blind, and bed-rid men, to give alms to ſuch hypocrites as the Begging Friers, that feigned themſelves holy and needy, when they were ſtrong in body, and had overmuch riches, both in vaſt houſes, precious cloths, great feaſts, and many jewels and treaſure.'

[G] *He was conſtituted Warden of Canterbury College in Oxford.*] Whilſt he was there, he is ſaid to have had under his tuition, or at leaſt as a ſtudent in that houſe, the moſt eminent Poet, *Geffrey Chaucer*; who might learn from his maſter to make free with the friers and monks (10). Chaucer had alſo part of his education in Merton College (11).

arbitrary

arbitrary ejectment; for having taken his Doctor in Divinity's degree in 1372, he read public lectures, as Profeſſor, with very great applauſe; and had ſuch an authority in the ſchools, that whatever he ſaid was received as an oracle. In thoſe lectures he at firſt reflected gently on the impoſitions of the mendicant Friers; and finding that a detection of their abuſes was acceptable to his hearers, he proceeded to handle them with the utmoſt ſeverity (*q*) [*H*]. About this time, the Pope threatening to cite King Edward III. to anſwer for his default, in not performing the homage which King John his predeceſſor had imprudently agreed to perform to the ſee of Rome, and refuſing to pay the tribute which that King had ſubmitted to, the Parliament unanimouſly reſolved to oppoſe that unjuſt claim (*r*). But a monk having the audaciouſneſs to defend and juſtify the Pope's unreaſonable demand, Dr Wicliff, ſtiling himſelf the King's own Clerk or Chaplain, replied (*s*), and publiſhed a determination, in which he ſhewed, That the reſignation of the crown, and promiſe of a tribute made heretofore by King John, ought not to prejudice the kingdom of England; and did not at all oblige the preſent King [*I*]. This ſeems to have made him better known at court, and ingratiated him with John of Gaunt Duke of Lancaſter, third ſon of King Edward III. to whom our Author addreſſed ſome of his works, and who became his particular protector (*t*). Great complaints having alſo been made againſt the Pope's uſurpations, eſpecially his proviſions and collations, whereby he diſpoſed of the beſt preferments and dignities in this kingdom to aliens, ſome of them mere boys, ignorant not only of the Engliſh language, but even of the Latin; who never ſaw their churches, and had the revenues remitted to them at Rome, or elſewhere, to the great diſcouragement and impoveriſhing of the natives; a ſurvey of thoſe preferments, with their reſpective value, was taken by the order of King and Parliament. And to remedy ſo great and increaſing an evil, embaſſadors were ſent to the Pope, to obtain a redreſs of theſe and other abuſes; at the head of which embaſſy were John Biſhop of Bangor, John de Wiclif, S. T. P. &c. (*u*) Theſe embaſſadors were met at Bruges, about the beginning of Auguſt 1374, by the Pope's nuncios; commiſſioned, to treat concerning the liberties of the church of England, and the prelates and other eccleſiaſtical perſons of this realm. After the treaty between them had continued with interruptions near two years, it was at laſt agreed, That for the future the Pope ſhould deſiſt from making uſe of reſervations of benefices, and that the King ſhould no more confer preferments by his writ (*w*). But, as all conceſſions from the court of Rome are ſoon broke through unleſs they are manifeſtly to its advantage, the parliament found reaſon to complain the very next year, That the Pope did make reſervation of dignities elective contrary to the aforeſaid treaty; and a bill was brought in againſt the papal uſurpations (*x*) [*K*]. We have placed here together all theſe facts, relating to our Author's embaſſy. But we muſt look

[*H*] *He proceeded to handle them with the utmoſt ſeverity.*] In a tract intituled *Objections of Freres*, he charged them with holding 'Fifty hereſies and errors, and many moe, if men wole ſeke them well out.' The chief of which were, "Their ſaying, that their religion founded by ſinful men, was more perfect than that made by Jeſus Chriſt himſelf.—That if a man was once profeſſed to their religion, though never ſo unfit, he may never leave it and be ſaved.—Their maintaining, that begging is lawful, though it is condemned by God both in the Old Teſtament and the New.—That they called it a greater ſin, to break their own traditions than the commandments of God.—That out of pride and covetouſneſs, they drew from the ſecular clergy their offices and ſacraments, making a diſſenſion between them and their pariſhioners; and hindered them from preaching the goſpel, though Chriſt had joined Prieſthood and the teaching of the goſpel together; and ſo they parted what God had joined together.—That they ſhewed not to the people, eſpecially the rich, their great ſins, but flattered and nouriſhed them in ſin.—That they deceived the people in faith, and robbed them of temporal goods, making them truſt more to a piece of parchment [or indulgence] with vain prayers of hypocrites that perhaps are damned devils, than in the help of God, and in their own good living.--That they perverted the right faith of the ſacrament of the altar, and brought in a new hereſy. For whereas Chriſt ſaid, that the bread that he brake and bleſſed was his body, they ſay, that it is an accident without ſubject, or nothing.—That they praiſed more their rotten habit than the worſhipful body of our Lord Jeſu Chriſt; for they taught lords and ladies, that if they died in St Francis's [or a Franciſcan's] habit, they ſhould never come to hell by virtue thereof.—That they were irregular procurators of the fiend, to make and maintain wars of chriſtian men, and enemies of peace and charity.—That they maintained that holy writ is falſe.—That they were thieves, both night-thieves and day-thieves, entering into the church not by the door, that is Chriſt. For without auctority of God they make new religions of errors of ſinful men."—— And many more to the ſame purpoſe, which may be ſeen in his own words and ſpelling, in his life by Mr Lewis (12).

[*I*] *And did not at all oblige the preſent King.*] He declares in that paper, That the King may juſtly rule the kingdom, refuſing the tribute of 700 marks a year demanded by the Pope: And that the errors impoſed upon the kingdom are falſe, and without any evidence of reaſon or law. He ſays he had been told, That there were three reaſons why his opponent put him upon the preſent taſk. 1. That his perſon may be defamed at the court of Rome, and by aggravated cenſures he may be deprived of his eccleſiaſtical benefices. 2. That his adverſary may by this means obtain the favour of that court to himſelf and his order. 3. That the Lord Pope ruling the kingdom of England with leſs controul, and at his own pleaſure, civil dominions, or temporal lordſhips, may be heaped on the Abbies (13).

[*K*] *A bill was brought in againſt the Papal uſurpations.*] Theſe uſurpations were repreſented as the cauſe of all the plagues, injuries, famine, and poverty of the realm; ſo as thereby was not left the third perſon or other commodity within the realm, as lately was. And it was further remonſtrated, "That the tax paid to the Pope of Rome for eccleſiaſtical dignities, did amount to five-fold as much as the tax of all the profits as appertained to the King by the year, of this whole realm; and for ſome one biſhoprick, or other dignity, the Pope, by way of tranſlation and death, had three, four, or five ſeveral taxes: That the brokers of that ſinful city, for money, promoted many caitiffs, being altogether unlearned and unworthy, to a thouſand marks living yearly; whereas the learned and worthy could hardly obtain twenty marks; whereby learning decayed: That aliens, enemies to this land, who never ſaw, nor cared to ſee, their pariſhioners, had thoſe livings; whereby they deſpiſed God's ſervice, and conveyed away the treaſure of the realm; and were worſe than Jews or Saracens (14)."

back, and take notice of ſome things that happened to him in the mean time. On the 7th of April 1374, he was preſented by King Edward III. to the rectory of Lutterworth in Leiceſterſhire [*L*], a living of very good value (*y*). And, November 6, 1375, was confirmed in the prebend of Auſte in the collegiate church of Weſtbury, in the county of Glouceſter, and then in the dioceſe of Worceſter (*z*). We are further told, that he was ſent embaſſador, with ſome of the barons of this kingdom, to the Duke of Milan; but in what preciſe time, is not mentioned (*aa*). Dr Wicliff's embaſſies having made him more ſenſible than he was before of the pride, covetouſneſs, ambition, and tyranny of the court of Rome; he did all he could to expoſe the Pope, both in his public lectures, and in private. He not only ſtyled him Antichriſt, but beſtowed upon him ſeveral other hard names [*M*]: and ſhewed himſelf a ſtrenuous defender of the King's authority, and of the power of the temporal lords, in oppoſition to the papal uſurpations; freely reproving, at the ſame time, the manifold corruptions that prevailed among all ſorts and orders of men (*bb*). But this honeſt freedom ſoon expoſed him to repeated troubles and perſecutions. For the bigots of that age having extracted XIX articles out of his public lectures and ſermons [*N*], and ſent them to Pope Gregory XI. he, on the 21ſt of May 1377, diſpatched three letters, or bulls, to Simon Sudbury, Archbiſhop of Canterbury, and to William Courtney, Biſhop of London: in the firſt of which, he ordered thoſe two prelates to cauſe John Wicliff to be apprehended by his authority, and to be impriſoned, and put in irons. In the ſecond, he injoined them, in caſe they could not find and impriſon him, to affix a citation in Oxford, and other public places, where it was moſt likely to come to his knowledge; ſummoning him to appear before the Pope, wherever he ſhould be, within three months from the date of the citation. In the third, he commanded them to inform King Edward III. the Princes his ſons, the Princeſs Dowager of Aquitain and Wales, the Nobles, and King's Counſellors, of the nature of Wicliff's errors; and ſtraitly to require them effectually to contribute their favor and aſſiſtance for the extirpation of ſuch great errors (*cc*). The Pope wrote, at the ſame time, to King Edward III. to require and pray him that he would afford the patronage of his favor and aſſiſtance to the aforeſaid Biſhops in the proſecution of Wicliff. And, by a particular meſſenger, he ſent a bull to the univerſity of Oxford of the ſame date; in which, after reproving them for their ſloth and lazineſs in permitting the tares to grow among the pure wheat, he ſtrictly charged and commanded them, to take, or cauſe to be taken, John Wicliff, and deliver him in ſafe cuſtody to the Archbiſhop of Canterbury, and Biſhop of London, or one of them, under pain of being deprived of all graces, indulgences, and privileges granted them by the ſee of Rome. But the univerſity had ſo

(*y*) Pat. 48 Ed. III. p. 1.

[*L*] *The rectory of Lutterworth in Leiceſterſhire.*] That church was beautified not long ago with a coſtly pavement of chequered ſtone, new pews, and every thing elſe new both in church and chancel, except the *Pulpit* made of thick oak planks ſix-ſquare, with a ſeam of carved work in the joints; which was preſerved and continued in memory of Wicliff, whoſe pulpit it was, if conſtant tradition may be credited (15).

[*M*] *But beſtowed upon him ſeveral other hard names.*] He called him the proud worldly Prieſt of Rome, the moſt curſed of clippers and purſe kervers; alluding to his manifold exactions, under pretence of ſacraments and ſpiritual things, whereby he drew out of this land poor mens livelihood, to the amount of many thouſand marks a year; which he ſays is the curſed hereſy of Simony. And adds, 'Certes though our rewme 'had an huge hill of gold, and never other man took 'thereof but only this proud worldly Prieſt's collector, 'by proceſs of time this hill muſt be ſpended (16).'

[*N*] *Having extracted XIX Articles out of his public Lectures and Sermons.*] They were as follows. 1. All mankind, ſince Chriſt, hath not power ſimply to ordain, that Peter and all his deſcendants ſhould have political and perpetual dominion over the world. 2. God cannot give to a man for himſelf and his heirs civil dominion for ever. 3. Charters of human invention, concerning a civil inheritance to be made perpetual, are impoſſible. 4. Every one that is finally juſtified hath not only a right to, but in fact enjoys, all the things of God. 5. Man can only miniſterially give to his natural child, or to a child of invitation [qu. initiation] in the ſchool of Chriſt, both temporal and eternal dominion. (Theſe five articles ſeem intended againſt the temporal dominion of the Popes.) 6. If God is, temporal lords may lawfully and meritoriouſly take away the goods of fortune from a delinquent [or erroneous] church. 7. Whether the church be in ſuch a ſtate or not, is not my buſineſs to examine, but it is the buſineſs of temporal lords; and if they find it in ſuch a ſtate, they are to act boldly, and on pain of eternal damnation take away its temporalities. 8. We know it to be impoſſible, that the Vicar of Chriſt ſhould purely by his bulls, or by them with the will and conſent of himſelf and his college of Cardinals, qualify or diſqualify any one. 9. It is not poſſible for a man to be excommunicated, unleſs he be firſt and principally excommunicated by himſelf. 10. No body is excommunicated, ſuſpended, or tormented with other cenſures, to his own damage or prejudice, unleſs it be in the cauſe of God. 11. Curſing, or excommunication, does not bind ſimply, but only ſo far as it is denounced againſt an adverſary of the law of Chriſt. 12. There is no example of a power given by Chriſt or his diſciples, to excommunicate ſubjects, principally for denying them temporal things; but the contrary. 13. The diſciples of Chriſt have no power forcibly to exact temporal things by cenſures. 14. It is not poſſible from the abſolute power of God, that if the Pope or any other pretends that he any way looſes or binds, that he does therefore actually looſe or bind. 15. We ought to believe that then only he doth looſe or bind, when he conforms himſelf to the law of Chriſt. 16. This ought to be univerſally believed, that every prieſt rightly ordained hath power ſufficiently to adminiſter any of the ſacraments, and by conſequence of abſolving every contrite perſon from any ſin. 17. It is lawful for kings to take away the temporalities from eccleſiaſticks who habitually abuſe them. 18. Whether temporal lords, or holy popes, or ſaints, or the head of the church, which is Chriſt, have endowed the church with the goods of fortune or of grace, and have excommunicated thoſe who take away its temporalities, it is notwithſtanding lawful, on account of the condition implied in the endowment, to deprive it of the temporalities for a proportionable offence. 19. An eccleſiaſtick, yea even the Pope of Rome, may lawfully be corrected by ſubjects, and even by the laity, and may alſo be accuſed or impeached by them. (17)—— He is alſo ſaid by T. Walden (18) to have held theſe opinions about baptiſm: 'That baptiſm 'doth not confer, but only ſignifies grace, which was 'given before. And that thoſe are fools and preſumptuous, which affirm ſuch infants not to be ſaved, as die without baptiſm;' alſo, that 'he denied, 'that all ſins are aboliſhed in baptiſm.'

great

great a value for Wicliff, that they demurred a long time, whether they ſhould receive the bull with honor, or entirely reject it with diſgrace. And when they had received it, they obeyed the contents with very little reſpect *(dd)*. Before theſe bulls reached England, which ſeems not to have been till November 1377, King Edward III. was dead *(ee)*. However the Archbiſhop and Biſhop proceeded to execute the Pope's commands; and not being able to get Dr Wicliff delivered up to them by the univerſity, which plainly favored and protected him, they iſſued out their mandate to Adam de Toneworth, Chancellor of the univerſity of Oxford, then in Lincoln dioceſe, within which dioceſe Lutterworth was; injoining him to inform himſelf privately of Wicliff's opinions: and to cite, or cauſe him to be cited peremptorily, to appear perſonally in the church of St Paul before the ſaid Archbiſhop and Biſhop, the thirtieth court-day after the date of this citation, which was December 18 *(ff)* [*O*]. The univerſity not being able to ſecure Wicliff againſt ſuch violent attacks, he thought it neceſſary to provide for his own ſafety, by putting himſelf under the protection of John Duke of Lancaſter, uncle to King Richard II *(gg)*, to whom he had been long known, and who had conceived a very good opinion of him for his learning and integrity; and beſides was no very great admirer of the Monks. On the day fixed for his appearance, Wicliff repaired to St Paul's, having the honor of being accompanied by the foreſaid Duke, and the Lord Henry Piercy, Earl Marſhall. As there was a vaſt concourſe of people, the Earl Marſhall uſed his authority to diſperſe them, and make way to the place where the court ſat. This occaſioning a violent noiſe and hurry, and Biſhop Courtney not being pleaſed to ſee Dr Wicliff ſo honorably attended, ſome ſharp words paſſed between him and the two Lords [*P*]: which cauſed the aſſembly to grow very tumultuous and diſorderly, ſo that the court was forced to break up without any thing done *(hh)*. Some time after, Archbiſhop Sudbury and Biſhop Courtney, in further execution of the Pope's bull, ſat in the archiepiſcopal chapel at Lambeth. Wicliff appeared there, and delivered an Explanation of the Concluſions, or Articles of his, that had been objected againſt as erroneous and heretical *(ii)*. But great numbers of the Londoners, who held him in the utmoſt veneration, afraid of his being ill uſed, got into Lambeth-chapel, and ſpoke in his behalf. Moreover, the Queen-mother *(kk)* ſent Sir Lewis Clifford to the two delegates, forbidding them to proceed to any definitive ſentence: which meſſage they complied with out of fear, having acted in the whole affair, according to T. Walſingham *(ll)*, with remarkable timidity and indolence. Thus Wicliff eſcaped better than could have been expected; and Pope Gregory XI. dying March 1378, his commiſſion to the Archbiſhop and Biſhop expired with him. But the great fatigue, hurry, vexation, and trouble Wicliff underwent in the proſecution, occaſioned his having a dangerous fit of ſickneſs, that brought him almoſt to the point of death. During which, the mendicant friers, whom he had ſo ſeverely handled, ſent four doctors to exhort him, as a true penitent, to *revoke* whatever he had ſaid to their diſparagement. So far from it, he ordered himſelf to be raiſed on his pillows, and ſaid

[O] *Which was December* 18.] Between the day of his citation and appearance, the firſt parliament of K. Richard II. met at Weſtminſter; in which it was debated, 'Whether the kingdom of England, on imminent neceſſity of its own defence, may lawfully detain the treaſure of the kingdom, that it be not carried out of the land, although the Lord Pope requires its being carried out on the pain of cenſures, and by vertue of the obedience due to him?' The reſolution of this doubt was referred by the King and parliament to Dr Wicliff, who anſwered that it was lawful, and undertook to prove it ſo by the principles of the law of Chriſt (19).

[P] *Some ſharp words paſſed between him and the two Lords.*] They are ſaid to have been to this effect.—— Biſhop of London, addreſſing himſelf to the Lord Percy, . . . 'If I had known before, what maiſteries you would have kept in the church, I would have ſtopped you out from coming here.' . . . The Duke of Lancaſter thereupon replied, 'That he would keep ſuch maſtery there, though he ſaid nay.'——John Wicliff ſtanding before the court, Lord Percy bid him ſit down, ſaying, 'That he had many things to anſwer to, and therefore had need of ſome ſofter ſeat.' But the Biſhop of London ſaid, 'He ſhould not ſit there: neither was it according to law or reaſon that he who was cited there to appear to anſwer before his ordinary, ſhould ſit down during the time of his anſwer, but ſhould ſtand.'— Upon which a very great quarrel aroſe between the two Lords and the Biſhop; and the Duke being out-talked by the Biſhop, fell into a rage, and threatened,— 'That he would bring down the pride, not only of him, but alſo of all the Prelacy of England.' Adding, 'Thou beareſt thyſelf ſo brag upon thy parents (20), which ſhall not be able to help thee: they ſhall have enough to do to help themſelves.'—— To whom the Biſhop again anſwered, That, 'to be ſo bold as to tell the truth, his confidence was not in his parents, nor in any man elſe, but only in God, in whom he truſted.' Whereupon the Duke whiſpering in the ear of the perſon next to him, ſaid, that, 'he would rather pluck out the Biſhop by the hair of his head out of the church, than he would take this at his hand.'—— This was not ſo ſecretly ſpoken, but the Londoners overheard him: whereupon being ſet in a rage, they cried out, 'That they would not ſuffer their Biſhop to be ſo contemptuouſly abuſed: But would rather loſe their lives, than that he ſhould be drawn out by the hair.'—— Thus that council being interrupted with ſcolding and brawling for that day, was diſſolved before nine o'clock. After which the Duke and the Lord Percy went to the parliament, where the ſame day, before dinner, a bill was put up, in the name of the King, by the Lord Thomas of Woodſtock, and Lord Henry Percy, that the city of London ſhould no more be governed by a Mayor, but by a Captain, as in times before; and that the Marſhal of England ſhould have the power of making arreſts within the ſaid city, as in other cities; with other petitions, tending to the like derogation of the liberties of London (21).—— This imprudent attempt to alter the government of that great city, occaſioned the tumult or inſurrection, related by our hiſtorians, when the Duke of Lancaſter's houſe was broke open, and much damaged: but it was not in reality occaſioned by his conteſt with the Biſhop. Though there appeared in this conteſt the extremity of paſſion in the Duke, ſince it is certain, that the Biſhop's laſt words were not ſo inſolent, as that they ought to have put the Duke in ſo great a rage. But it may be the Biſhop uſed harſher expreſſions, which the Monk of St Alban's, who related theſe facts, took care to ſoften, that the Duke might appear to be in the wrong, as Mr Rapin hath obſerved (22).

with

with a loud voice, ‘ I ſhall not die, but live and declare the evil deeds of the friers (*mm*).’ And, inſtead of being daunted and convinced, he went on expoſing the errors of Popery. Moreover, he preſented to the parliament, in 1379, a ſevere paper againſt the tyranny and uſurpations of the court of Rome: and wrote ſmartly againſt the Papal Supremacy and Infallibility (*nn*) [*Q*]. What vexed his enemies moſt, was the great work he had undertaken, to tranſlate the Bible into Engliſh [*R*]. Some have affirmed, that he began it about four or five years before his deceaſe (*oo*). But it is more probable, that it was his chief employment for the laſt ten years at leaſt of his life. And he had the aſſiſtance of ſome of his followers. To make way for this tranſlation, he publiſhed his book, ‘ Of the Truth of the Scripture;’ wherein he affirms, That the ſcripture is the law of Chriſt, and the faith of the church; that all truth is contained in the holy ſcripture, and every diſputation which hath not its origin from thence is profane, &c (*pp*). But what made the bigots in that time loſe all patience, was his attacking with great vigor, in his lectures, in ſummer 1381, the very gainful and favorite (*qq*), though the moſt abſurd and impudent, doctrine of tranſubſtantiation: profeſſing, to bring back the church of Chriſt from the error they had been many years in, and from idolatry to the true worſhip of God. He therefore publiſhed ſixteen concluſions, the firſt of which was, That the conſecrated hoſt which we ſee upon the altar, is neither Chriſt, nor any part of him, but only an efficacious ſign of him: and upon thoſe points he offered to diſpute with any one (*rr*). Being

(*rr*) Wood, Hiſt. & Antiq. Univ. Ox. l. i. p. 188. T. Walſingham, p. 246. 266.

[*Q*] *He preſented to the Parliament a ſevere paper againſt the tyranny and uſurpations of the court of Rome: And wrote ſmartly againſt the Papal Supremacy and Infallibility.*] That paper againſt the uſurpations of the court of Rome, is inſerted at length in Mr Lewis's Life of our author (23). It is much the ſame as the contents of note [A], only there are explanations added to each article; and the title of it is, *A ſort of Anſwer to the Pope's Bull.*

As for his ſmart reflections on the papal ſupremacy and infallibility, they were comprized in a Latin anſwer he wrote to a certain Doctor, whom he calls a medley divine, that had laid it down for a rule, That ‘ if any one be Pope, he is then incapable of ſinning, at leaſt mortally; and therefore if he wills or ordains any thing, it is therefore juſt.’—— The monſtrous conſequences of which falſe and groundleſs doctrine, Mr Wicliff ſhews to be ſuch as theſe (24), that ‘ The Pope may take away any book from the canon of ſcripture, and add any new one, and alter the whole Bible, and ſo make all the Scripture hereſy, and eſtabliſh as catholick a ſcripture that is oppoſite to the faith.—If the Pope's pretenſions, that when he looſes or binds upon any occaſion, he does really looſe or bind, were once eſtabliſhed, how would the world ſtand? For then, if the Pope pretends that he binds with the pain of eternal damnation every perſon that oppoſes him in his acquiſition of temporal things, whether moveable or immoveable, or in whatever he does, he is actually bound; by conſequence, it would be the eaſieſt thing imaginable for him to obtain all the kingdoms of the world, and deſtroy or ſubvert the whole ordinance of Chriſt.’—He concludes therefore, ‘ that chriſtians ought not to ſuffer ſo noted a heretick and blaſphemer to live upon the earth, and eſpecially not to maintain ſuch an one as their captain, ſince he will lead his company with their conſent over a precipice;’ *He declares*, ‘ that ſecular Lords ought to reſiſt him, not only on account of the hereſy he impoſes on them with reſpect to the exerciſe of a power which they have, to withdraw their alms from a delinquent church; nor only becauſe he condemns it as heretical to aſſert, that *he only* can miniſterially *diſtribute the goods of the church*; but becauſe he impoſes an Egyptian bondage on them, and takes from them the liberty of the law of Chriſt.’ And he exhorts ‘ the ſoldiers of Chriſt, as well laity as clergy, to ſtand for the law of God even unto blood, and not to ſuffer themſelves to be overpowered with the fear of pain, or the love of company, and worldly profit.’

[*R*] *To tranſlate the Bible into Engliſh.*] The Latin Vulgate was at this time looked upon as the only authentic copy of the Bible; but as it was either locked up in libraries, or in very few hands before the invention of printing, what was of univerſal concernment, namely, for all Chriſtians freely to have the peruſal of the rule of their faith and practice, could be the happineſs but of very few perſons. This all well-wiſhers to true Chriſtianity ſaw with the utmoſt uneaſineſs, and our zealous and moſt induſtrious author Dr Wicliff ſet himſelf earneſtly about ſupplying ſo great a defect, by tranſlating the holy ſcriptures into Engliſh. He was undoubtedly ſeveral years about it, as we have obſerved in the body of this article. However he went through this great work, rendering from Latin into the vulgar tongue the twenty five canonical books of the Bible. Theſe he reckoned in the following order. ‘ 1. Geneſis. 2. Exodus. 3. Levitici. 4. Numeri. 5. Deuteronomi. 6. Joſue. 7. Judicum, that encloſeth the ſtory of Ruth. 8, 9, 10, 11, 12, 13, ben the 4 Bokes of Kyng and tweie Bokes of Paralipomenon. 14. Is Eſdre, that comprehendeth Neemy. 15. Is Heſter. 16. Job. 17. Pſalter. 18, 19, 20. ben the 3 Bokes of Solomon. 21, 22, 23, 24, ben the four great Prophets. 25. Is a Boke of 12 ſmall Prophets, Oſee, Joel, Amos, Abdie, Jonas, Michee, Nahum, Abacuc, Sophonie, Aggei, Zacharie, and Malachie.’ He adds, ‘ that whatever boke is in the Olde Teſtament without theſe 25 aforeſaide, ſhal be ſet among *Apocrypha*, that is withouten autoritie of belive. Therefore as holie church redith *Judith* and *Tobit*, and the Bokes of *Machabeis*, but receiveth not tho' amonge holi Scriptures; ſo the chirche readith theſe 2 Bokes *Eccleſiaſtici* and *Sapience* to edifying of the people, not to confirme the autoritie of techyng of holy chirch. And that therefore he tranſlated not the 3 ne 4 Boke of Eſdree that ben Apocrypha.’

The Books of the New Teſtament he reckons in this order. ‘ The 4 Goſpellers, Matthew, Mark, Luke, and John. 12 Epiſtles of Poule, 7 Small Epiſtles, the Dedes of Apoſtles, and the Apocalyps, which ben fulli of autoriti of byleve.’—— So that we find, he reckoned and allowed of the canonical books of ſcripture, in the ſame manner as they are by the reformed churches.

As to the method he took in making his tranſlation, he tells us (25), ‘ That he, with ſeveral others who aſſiſted him, got together all the old Latin Bibles they could procure; theſe they diligently collated, and corrected what errors had crept therein, in order to make one Latin Bible ſome deal true; ſince many bibles in Latin were falſe, eſpecially thoſe that were newe. Then they collected the Doctors and common gloſſes, eſpecially Nicolas de Lyra [or Harper], and with them ſtudied the text anew, in order to make themſelves maſters of the ſenſe and meaning of it. Next they conſulted old grammarians and ancient divines, as to the hard words and ſentences, how they might beſt be underſtood and tranſlated. And they reſolved, that the tranſlation ſhould not be a verbal one, but as clearly as they could to expreſs the ſenſe and meaning of the text.’— However, as Mr Lewis obſerves (26), Dr Wicliffe tranſlated word for word, without always obſerving the idioms or proprieties of the ſeveral languages; by which means this tranſlation in ſome places is not very intelligible to thoſe who do not underſtand Latin. The reaſon why he made his verſion from the Vulgate, was not that he thought it the original, or of the ſame authority with the Hebrew and Greek text, but becauſe he did not underſtand thoſe languages well enough to tranſlate from them.

Of this tranſlation ſeveral manuſcript copies are extant in the libraries of our univerſities, the Britiſh Muſæum,

Being forbidden, he publiſhed his opinions about the Eucharist [*S*]. This frank and honeſt declaration of his ſentiments, ſhewed an uncommon integrity and penetration in our Author, conſidering the darkneſs of the age he lived in; and great numbers in Oxford chearfully embraced them (*ss*), much to the honor of that learned body. But it brought Mr Wicliff into ſeveral troubles. For William de Berton, Chancellor of the univerſity, condemned his concluſions; ſtrictly admoniſhing all perſons, not to teach or defend them; or to hearken to any who ſhould teach or defend them: aſſerting in oppoſition thereto, That by the ſacramental words duly pronounced by the prieſt, the bread

Muſæum, and other public and private collections. The New Teſtament was publiſhed in 1731, fol. by Mr John Lewis, Miniſter of Mergate; with a hiſtory of the Engliſh tranſlations of the Bible; which hiſtory was reprinted in 1739, 8vo. with large additions. We ſhall give a ſpecimen of the tranſlation in theſe three verſes of Romans viii. 28, 29, 30. 'And we witen, that to men that louen God alle thing is worchen togidre into good to hem that aftir purpoſe ben clepid ſeyntis. For thilk that he knew bifore he bifore ordeynyde bi grace to be maad lyk to the ymage of his Sone, that he be the firſte bigeten among manye britheren. And thilke that he bifore ordeynyde *to bliſſe* hem he clepide, and whiche he clepide hem he juſtifiede, and whiche he juſtifiede, and hem he glorifiede.'

This glorious deſign, of making the Word of God [the rule of our faith and practice] known and familiar to all Chriſtians, expoſed Dr Wicliff to the cenſures and revilings of the bigots of his age (27), who loved to keep people in darkneſs and ignorance, that their frauds and impoſitions might not be diſcovered, nor the vanity of their ill-grounded pretences laid open, But it will redound to his immortal honour.

[*S*] *Publiſhed his opinions about the Euchariſt.*] They are thus repreſented by his adverſaries. 'In ſacramento altaris ſubſtantiam panis materialis & vini, quæ prius fuerunt ante conſecrationem, poſt conſecrationem realiter remanere: In illo ſacramento non eſſe corpus Chriſti & ſanguinem eſſentialiter, nec ſubſtantialiter, nec etiam corporaliter, ſed figurativè, ſeu tropicè, ſic quod Chriſtus non eſt ibi veraciter in ſua propria perſona corporali (28).— Quod euchariſtia in altari poſt ſacramentum non eſt verum corpus Chriſti, ſed ejus figura (29).' Or, according to T. Walden, tranſlated into Engliſh, 'That the ſubſtance of bread and wine ſtill remain in the ſacrament: That God could not, though he would, make his body to be at the ſame time in ſeveral places: That in the ſacrament of the altar the hoſt is not to be worſhipped, and ſuch as adore it are idolaters.' (30).

But let us hear Dr Wicliff's own words. 'The euchariſt is the body of Chriſt in the form of bread. The right faith of Chriſten men is this, that this worſhipful ſacrament is bread and Chriſt's body, as Jeſu Chriſt is very God and very man; and this faith is grounded in Chriſt's own word in the goſpel of St Matthew, Mark, Luke, and by St Paul, and plainly in holy writ, and thereto accordeth reſon and witt at the full.'.... After which he cites the words of the inſtitution from the goſpels, and from St Paul: to which he ſubjoins ſeveral paſſages out of the fathers; and then concludes in theſe words... 'Then ſith theſe auctorities of Chriſt and his Apoſtles ben algates ſoth *, and alſo auctorities of theſe ſaints and clerks, ſith they accorden with holy writ and reaſon, ſeye we that this ſacrament is very bread, and alſo very Chriſt's body: And teche we this true belief to Chriſten men openly, and lett Lords meyntenen this truth as they are bounden upon pain of damnation, ſith it is openly taught in holy writ, and by reaſon and witt. And damnen we this curſed hereſie of Antichriſt and his hypocrites, and worldly Prieſts, ſeying that this ſacrament is neither bread ne Chriſt's body, but accidents withouten ſujet, and there under is Chriſt's body. For this is not taught in holy writ, but is fully agenſt St Auſtin, and holy ſeints, and reaſon and witt (31).'

He ſpeaks yet more fully upon that point, in his treatiſe entitled 'Wickliffe's Wicket (32),' as appears by theſe ſpecimens........ 'Thou that art an earthly man, by what reaſon maieſt thou ſay that thou makeſt thy maker? Whether may the made thing ſay to the maker, Why haſt thou made me thus? or may it turn againe, and make him that made it? (God forbid) now anſwereſt thou and ſaieſt, that every day thou makeſt of bread the body of the Lord, the fleſh and bloud of Jeſu Chriſt, God and man. Forſoth thou anſwereſt greatly againſt reaſon by thoſe words that Chriſt ſpeke at his ſupper on Serethurſdaie (33) at night, that "Chriſt tooke bread, and bleſſed it, and brake it, and gave it to his diſciples and apoſtles, and ſaid, Take ye, and eate ye, this is my body which ſhall be given for you. Alſo he taking the cuppe gave thankes, and gave to them, ſaying, Drinke ye all hereof: this is my bloude of the Newe Teſtament, which ſhal be ſhed out for many into the remiſſion of ſinnes." As ſaith Luke, "When Jeſus had taken bread, he gave thankes, and brake it to them, and ſaid, Take ye, eate ye, this is my body that ſhall be given for you; doe this in remembrance of me." Nowe underſtand ye the words of our Saviour Chriſt, as he ſpake them one after another. For he tooke bread, and bleſſed; and yet what bleſſed he? The ſcripture ſayeth not, that Chriſt tooke bread and bleſſed it, or that he bleſſed the bread which he had taken. Therfore it ſeemeth more that he bleſſed his diſciples and apoſtles, whome hee had ordained witneſſes of his paſſion, and in them he lifte his bleſſed word, which is is the bread of life, as it is written, "not only in the bread liveth man, but in every word that proceedeth out of the mouth of God." Alſo Chriſt ſaith, "I am the bread of life that came down from heaven:" and Chriſt ſaieth alſo in John, "the wordes that I have ſpoken to you be ſpirit of life." Therefore it ſemeth more that he bleſſed his diſciples, in whom the bread of life was left moore then in materiall bread; for the materiall bread hath an ende, as it is written Math. xv. 17, 18. and it hath an end of rotting, but the bleſſing of Chriſt kept his diſciples and apoſtles both bodily and goſtly, as it is written, "that none of them periſhed, but the ſonne of perdition." And the ſcripture ſaith, that Jeſus tooke bread, and brake it, and gave it to his diſciples, and ſaid, "Take yee, eate yee; this is my body that ſhal be given for you." But he ſaid not, this bread is my bodie, or that the bread ſhould be gived for the life of the world.'... A little lower, after citing 1 Corinth. xv. 22, 23. 41—44, he argues thus... 'Then if Chriſt ſhal change thus our deadly bodies by death, and God the Father ſpared not his own Sonne, as it is written, but that death ſhould reigne in him as in us, and that he ſhould be tranſlated into a ſpirituall body, the firſt again riſing of dead men; then how ſaie the hypocrites that take on them to make our Lord's body? Loo whether make they the *glorified* body; either make they againe the *ſpiritual* body, which is riſen from death to life; either make they the *fleſhly* bodie as it was before he ſuffered death. And if they ſay alſo that they make the *ſpiritual* body of Chriſt, it may not be ſo, for that thing that Chriſt ſaid and did, he did as he was at ſupper before he ſuffered his paſſion; and it is written that the ſpirituall body of Chriſt roſe againe from death to life; alſo he aſcended unto heaven, and that he will abide there till he come to judge the quicke and the dead. And if they ſaie that they make Chriſt's body *as it was before he had ſuffered his paſſion*, then muſt they needes grant that Chriſt is to die yet (for by all holy Scriptures he was promiſed to die, and that he ſhould give Lordſhip of everlaſting life).'... And lower, 'But now I ſhall aſke ye a worde; aunſwer ye me. Whether is the body of the Lord made at once or at twice? Is both the fleſh and the blood in the hooſte of the breade? Or elſe is the fleſh made at one time, and the blood made at another time? that is to ſay, the wine in the chalice? If thou wilt ſay, it is full and whole the manhood of Chriſt in the hooſte of bread, both fleſh and bloude, ſkin, heare *, and bones, then makeſt us to worſhip a falſe God in the chalice, which is conjured when we worſhip the bread (37).'

and wine upon the altar are tranſubſtantiated, or ſubſtantially converted, into the very body and blood of Chriſt. Which decree being publiſhed in the ſchools, whilſt Mr Wicliff was in the chair, and determining the contrary, though it ſtartled him a little, yet he declared that neither the Chancellor nor any of his aſſiſtants were able to confute his opinion (*tt*). Afterwards he appealed from this condemnation to the King; and accordingly exhibited his complaint to the King and Parliament, about May 1382 (*uu*). But his protector, the Duke of Lancaſter, forſook him upon this occaſion. He had countenanced him as long as he purſued what ſuited his views and inclinations, in oppoſing the papal uſurpations on the kingdom, and encroachments upon the royal prerogative and authority. When he meddled with matters that were of a religious nature, and accounted points of mere doctrine and ſpeculation, the unſteady Duke withdrew from him his protection. So that, to ſave himſelf from imminent danger, he was forced to make a confeſſion at Oxford, before Archbiſhop Courtney, ſix Biſhops, and many others, wherein he ſeemed to admit of the real preſence [*T*]; but in ſuch a manner, as was far from giving a general ſatisfaction to his adverſaries, as many of them publicly declared in their writings (*ww*). On the 17th of May, and before this confeſſion, Archbiſhop Courtney had called a meeting of Biſhops, and other conſiderable men, at the Black-Friers in London; wherein ſeveral concluſions or tenets of Wicliff were condemned, ſome as heretical [*V*], and others as erroneous (*xx*). He was cited to make his appearance here, but receiving advice that a plot was laid to ſeize him on the road, he kept out of the way (*yy*). In purſuance of this meeting, the Archbiſhop procured a letter from the King, dated July 13, and directed to the Chancellor and Proctors, wherein they were appointed Inquiſitors-general; and directed, to expel from the univerſity and town of Oxford, any perſons who ſhould receive into their houſes or lodgings John Wicliff, and his followers, or have any communication with them (zz). By this means our learned Author being entirely diſlodged, he was forced to leave the univerſity, and retire to his living of Lutterworth. Here he continued his ſtudies, and endeavours to promote the reformation of the errors and corruptions which had been brought into religion; and went on with his tranſlation of the holy ſcriptures. In 1383, he was ſeized with a fit of the palſy, from which however he ſo well recovered, as to be able to attend the duties of his function. He ſeems to have received this advantage from the illneſs, that by it he was ſecured from any further proſecution. Undoubtedly he would not have been ſuffered to go quietly to his grave, had he not laboured under a diſtemper which his enemies hoped would ſoon put an end to his life. For Pope Urban VI. had cited him to appear before him, but his inability to travel was a juſt and ſufficient excuſe [*W*]; and the many years ſchiſm that ſubſiſted between the Popes, did alſo contribute to his

(zz) Lewis, p. 93. 379.

[*T*] *A confeſſion ..... wherein he ſeemed to admit of the real preſence.*] This confeſſion is in Latin, and was publiſhed at length by Mr Lewis (35). Among other things, he ſays in it, that the body of Chriſt is in the conſecrated hoſt in a three-fold manner, viz. virtual, ſpiritual, and ſacramental: but it is in heaven ſubſtantially, corporally, and dimenſionally.—— Upon the whole, he ſpeaks in this piece very confuſedly, and plainly without ideas: and, indeed, a perſon that talks of abſurdities and nonſenſe, eannot but ſpeak abſurdly.

Another confeſſion of Dr Wicliff, in Engliſh, is inſerted in Knyghton (36), being as follows:

‘ We beleve as Criſt and his apoſtolus han taught ‘ us, that the ſacrament of the auter white and ronde ‘ and lyk tyl oure brede or oſt unſacrede is verray ‘ Goddus body in fourme of brede, and if it be broken ‘ in thre parties as the Kirke uſes, or elles in a thouſand, everylk one of theſe parties is the ſame Godus ‘ body, and right ſo as the perſone of Criſt is verray ‘ God and verray man, verray Godhede and verray ‘ manhede, ryth ſo as holy kyrke many hundrith wynterk as trowyde, the ſame ſacrament is verray Godus ‘ body aud verray brede: as it is forme of Goddus ‘ body and forme of brede, as techeth Criſt and his apoſtolus. And therefore Seynt Poule nemyth it never but when he callus it brede, and he be our beleve tok his wit of God in this: and the argument ‘ of heretykus againe this ſentens, lyth to a criſtene ‘ man for to aſſolve. And right as it is hereſie for to ‘ trowe that this ſacrament is Goddus body and no ‘ brede, for it is bothe togedur. But the moſt hereſie ‘ that God ſufferide come tyl his kyrke, is to trowe ‘ that this ſacrament is an accident with a ſubſtance, ‘ and may on no wyſe be Goddus body. And howe ‘ grete diverſite is betwene us that trowes that this ſacrament that in his kynde is verray brede and ſacramentally Goddus body, and betwe heretykes that ‘ trowes and telles, that this ſacrament may on none ‘ wyſe be Goddus body....’ A ſhorter confeſſion of his is inſerted alſo in Knyghton (37).

[*V*] *Some as heretical*] One of them is, *Quod Deus debet obedire diabolo*; that God ought to obey the devil. This ſeems to be a downright calumny, or a falſe and forced inference drawn from ſome part of his writings; for no ſuch crude aſſertion appears in any of them. On the contrary, it is manifeſt from his works, that he entertained very different ſentiments. Thus he obſerves (38), that ‘ the good angels do reſiſt the evil ‘ ſpirits ſo far as they ſee their doing ſo is acceptable to ‘ the Lord; and that the devil is juſtly and fairly puniſhed by God.’ In another tract (39), he ſays, ‘ God ‘ ſetteth the fend a term what he ſhal do and no more, ‘ but he ſuffreth his power to laſt to profit of good ‘ men, and juſt puniſhing of miſdoers.’— In a defence which he wrote after the condemnation of his opinions in this aſſembly, he takes notice of this imputation, and obſerves (40), ‘ Such things do they invent of catholick men, that they may blacken their reputation, ‘ as if they held this hereſy, That God is the devil; ‘ or any other open hereſy; being conſequently prepared by falſe witneſſes to impoſe ſuch hereſies on ‘ true men, as if they were the falſe inventers of them.’ But though never ſo falſe, they were again condemned in the council of Conſtance: upon which occaſion Oſiander makes this pertinent remark (41); ‘ Non ‘ dubium eſt quin aliquos Wickleffi articulos hi patres ‘ per calumniam depravaverint, qualis eſt ſextus articulus, *Deus debet obedire diabolo.*’ Of which he ſays, ‘ Hæc eſt haud dubiè craſſiſſima calumnia, de qua ‘ Wickleff nunquam vel per febrim ſomniavit aut cogitavit.’—During this meeting, or ſynod, an earthquake happened, which frightened ſome of the members, but however they continued their ſitting.

[*W*] *A ſufficient excuſe*] In that letter of excuſe to the Pope he has theſe words. ‘ If I might traveile in ‘ my own perſoun, I wolde with God's will go to the ‘ Pope. Bot [Chriſt] has nedid me to the contrary, ‘ and taught me more obeiſhe to God than to Mon. ‘ And I ſuppoſe of our Pope, that he will not be ‘ Antichriſt, and reverſe Chriſt in this wirking to the ‘ contrary of Chriſt's wille. For if he ſummons ageyns ‘ reſoun by him or any of his, and purſue this unſkilful ſummoning, he is an open Antichriſt (42).’

quiet. He had a return of his palſy, December 28, 1384, which attacked him as he was hearing maſs in his church of Lutterworth, at the time of the elevation of the ſacrament. It ſeized him eſpecially in the tongue, ſo that he remained ſpeechleſs till his death, which happened the third day after, December 31 (*aaa*). His body was depoſited in his church of Lutterworth, where it remained undiſturbed many years. But, in 1415, the Council of Conſtance, having condemned 45 propoſitions of his, and declared that he died an obſtinate heretic, ordered his bones to be dug up, and thrown on a dunghill (*bbb*). This ſentence was not executed till 1428, when orders were ſent by the Pope to Rich. Flemming, then Biſhop of Lincoln, to remove his bones: whoſe officers accordingly took them out of the grave, where they had lain four-and-forty years, burnt them, and caſt the aſhes into a brook adjoining, called Swift (*ccc*). A mean inſtance of revenge; which did him no harm, only ſerved to ſhew in the ſtrongeſt colours the inveterate though impotent malice of his enemies. His writings were extremely numerous [*X*], though undoubtedly ſeveral pieces have been falſely aſcribed to him. The ſeveral points wherein he differed from the then eſtabliſhed Popery, were theſe: his being very earneſt for having the holy ſcriptures in the vulgar tongue, and making them the ſole rule of a Chriſtian's faith and practice, without neceſſity of recurring to tradition, or any human authority: his oppoſing the Pope's ſupremacy and infallibility: his rejecting and condemning tranſubſtantiation, indulgences, confeſſion, and abſolution, extreme unction; the celibacy of the clergy; forced vows of chaſtity; prayers to, and worſhip of, Saints, ſhrines, &c. and pilgrimages. For a more particular illuſtration of which, ſee Dr Tho. James's "Apologie for John Wickliffe, ſhewing his Conformitie with the now Church "of England:" collected chiefly out of his manuſcript works in the Bodleian library (*ddd*). The ſum of his character cannot be better drawn, than it hath been by the late learned Mr H. Wharton, being as follows (*eee*). "He was a man, than whom the Chriſtian world in theſe laſt ages has not produced a greater; and who ſeems to have been placed as much above praiſe as he is above envy. He had well ſtudied all the parts of theological learning, was well ſkilled in the canon, civil, and our own municipal laws, and was endowed with an uncommon gravity of manners; above all things, he burnt with an immenſe zeal for God, and love for his neighbour. Hence aroſe his earneſt and vehement deſire of reſtoring the primitive purity of the church, in that ignorant and degenerate age wherein he lived. Which deſire he was notwithſtanding ſo far from ſuffering to go beyond its bounds, that he made it a matter of conſcience to preſerve all the rights of eccleſiaſtical diſcipline untouched, and often blames the religious, as they were called, for breaking in upon them [by getting themſelves exempted from the epiſcopal juriſdiction]. His eminent piety, and unblemiſhed life, even the worſt and moſt ſpiteful of

[*X*] *His writings were extremely numerous.*] Many of them he firſt publiſhed in Latin, and afterwards in Engliſh. Biſhop John Bale hath given a catalogue of them in his centuries (43). Mr Lewis gives a fuller liſt of them, making them amount to near three hundred (44). But the fulleſt and moſt accurate account of them, is that of Biſhop Tanner, in his Bibliotheca Britannico-Hibernica (45). We cannot pretend to ſet down the particulars of them here, becauſe they would not only ſwell this article too much, but alſo would appear to moſt readers very tedious and uncouth. Some of them are in the Britiſh Muſæum; ſome in the Bodleian, and other libraries in Oxford; ſome in the public library at Cambridge, and other libraries there, moſt particularly in that of Bennet College; ſome in Trinity College, Dublin, and ſome in private hands. Mr T. Oſborne, in his catalogue for 1760, had an old folio MS. on vellum, in the hand-writing of Edward IIId. or Richard IId's reign, intituled, 'A ſchort 'glooſe on Matheu for leuid* men, for to underſtonde 'the text, and onely holi writ and holy doctouris;' which is aſcribed to our author, and reference made to Fox's book of martyrs, vol. I. p. 661.

Such works and pieces of Dr Wicliff, as have at any time been printed and publiſhed, are as follow. 1. 'Trialogus (46). IO. WICLEFI viri undequaque piiſ. Dialogorum libri quatuor, quorum primus 'divinitatem, & ideas tractat. Secundus univerſarum 'creationem complectitur. Tertius de virtutibus, vitiiſque ipſis contrariis copioſiſſimè loquitur. Quartus Romanæ eccleſiæ ſacramenta, ejus peſtiferam 'dotationem, Antichriſti regnum, fratrum fraudulentam originem atque eorum hypocriſim, variaque noſtro ævo ſcitu digniſſima graphicè perſtringit.'—— Printed neatly ſomewhere in Germany, 1525, without name of place or of printer, 4to. containing 175 leaves. It is very ſcarce, having been moſtly deſtroyed by the Romaniſts. A new edition of it was printed at Francfort in 1753, 4to. 2. 'Wickliffe's Wicket. 'Or, a learned and godly treatiſe of the Sacrament.' At Norimberg 1546, 8vo. Oxford 1612, 4to. 3. 'The Path-way to perfect Knowledge, or Wickliffe's 'Prologue to the Bible;' publiſhed by Robert Crowles. 1550. 12mo. 4. 'The dore of the holy Scripture.' 5. 'De Chriſtianorum villicatione,' in Engliſh, publiſhed in 1582, under the name of R. Wimbledon. 6. 'A Complaint of John Wickliffe, exhibited to the 'King and Parliament.' 7. 'A Treatiſe of John 'Wickliffe againſt the orders of Friars.' Theſe two were publiſhed together at Oxford in 1608, 4to. by Dr James, from two manuſcript copies, one in Bennet College in Cambridge, the other in the Bodleian Library. 8. 'Why poor Prieſts have no Benefice.' Publiſhed by Mr Lewis in his life of our author (47): who hath alſo publiſhed (there), his Determination, Confeſſions, and large extracts from his works remaining in manuſcript. 9. And, his New Teſtament, as mentioned above, was likewiſe publiſhed by him.

In theſe ſeveral works, his ſentiments are not always exactly conſiſtent and uniform, which was owing to his gradual diſcovery of truth, that did not dart nor even dawn upon him at once; but, to diſcover it, he was forced to grope in the dark. And indeed it is a wonder he could diſcover ſo much through that veil of ignorance and ſuperſtition, wherewith the world was then overſpread. And, as to his miſtakes, let the following words of Dr Fuller be his apology (48). 'He 'was a man, and ſo ſubject to error, living in a dark 'age, more obnoxious to ſtumble; vexed with oppoſition, which makes men reel into violence; and 'therefore it is unreaſonable, that the conſtitution and 'temper of his poſitive opinions ſhould be gueſſed by 'his polemical heat, when he was chafed in diſputation. But beſides all theſe, envy hath falſely fathered many foul aſperſions upon him.'— A. Wood ſays (49), that being with Dr Fell in his lodgings at Chriſt Church in June 1672, where they were then looking over and correcting the ſtory of Joh. Wycleve in Hiſt. et Antiq. Univ. Oxon. before it was to be wrought off from the preſs, Dr Fell told him, that Jo. Wycleve was a grand diſſembler, a man of little conſcience, and what he did as to religion, was more out of vain-glory, and to obtain unto him a name, than out of honeſty, &c. or to that effect.

all his adverſaries never dared to call in queſtion: and his exquiſite learning, and uncommon abilities, very many of them have ſufficiently owned. And indeed in thoſe writings of his which are yet remaining, Dr Wicliffe ſhews an extraordinary knowledge of the ſcriptures for the time he lived in; diſcovers a very good judgment, argues cloſely and ſharply, and breathes a ſpirit of excellent piety. Nothing is to be found in him that is either childiſh or trifling, a fault very common in the writers of that age; but every thing he ſays is grave, judicious, and exact. In fine, he was a man who wanted nothing to render his learning conſummate, but living in happier times." As for the hard names given him by T. Walden, T. Walſingham *(fff)*, N. Harpsfield, &c. they are the revilings of bigots, and prejudiced enemies. The devoted ſlaves to the court of Rome that could burn his bones, will not ſpare his memory.

WILKINS [John], Biſhop of Cheſter, was grandſon to Mr John Dod, the famous Decalogiſt *(a)*, of Fawſley, near Daventry, in Northamptonſhire; where his mother, being with her parents, was delivered of this ſon in the year 1614. He ſeems to have ſtaid with his grandfather till he was arrived to a proper age to be put to the grammar ſchool; when his father, Mr Walter Wilkins, citizen and goldſmith of Oxford, placed him under the care of that eminent ſchoolmaſter Mr Edward Sylveſter [*A*], who then kept a private ſchool in the pariſh of All-Saints in that city. Our Author made ſo quick a progreſs in grammar learning, that at thirteen years of age he was thought ſufficiently qualified for academical ſtudies, and became member of the univerſity in Eaſter term 1627, being admitted firſt a ſtudent of New Inn; but, after a ſhort ſtay there, he was removed to Magdalen Hall, and placed under the tuition of Mr John Tombes *(b)*, the celebrated Anabaptiſt diſputant [*B*]. His tutor leaving the univerſity in 1630, while our Author was yet Undergraduate, he did not proceed to his firſt degree at the regular time, not going out Bachelor of Arts till Michaelmas term, October the 20th, 1631 *(c)*; from which time he commenced Maſter duly, on the 11th of July, in Act term, 1634. He was now 21 years of age; and entering into Holy Orders, William Lord Viſcount Say and Seal appointed him his Chaplain; in which quality he afterwards ſerved George Lord Berkeley: he likewiſe lived in the ſame relation with Charles Count Palatine of the Rhine, during the reſidence of that Prince in England. It was our Author's ſkill in the mathematicks that chiefly recommended him to this laſt poſt; his Electoral Highneſs being a great lover and favourer of thoſe ſciences *(d)*, in which view he muſt needs have been very agreeable to his Chaplain, who was entirely of the ſame turn and temper. This indeed was the moſt diſtinguiſhing part of his character, and he did not neglect the opportunity given him by his preſent ſituation of indulging it in the ſervice of his acquaintance in theſe ſtudies [*C*]. While Mr Wilkins continued in the ſtation of a Chaplain, he wrote ſeveral

(fff) Walſingham gives him theſe ſeveral bad names. (c) Ibid. p. 557. His tutor came to Oxford in 1731, and was admitted to the reading of the ſentences.

(d) The Lives of Matthew Wren, Biſhop of Ely, Chriſtopher Wren, Dean of Windſor, and Sir Chriſtopher Wren, p. 180. Lond. 1750. fol.

[*A*] *That eminent ſchoolmaſter, Mr Edward Sylveſter.*] Mr Wood tells us (1), that this Sylveſter (an excellent Grecian) was bred at Baliol College, and took the degree of Bachelor in Divinity, 1642; and that he lived to ſee ſeveral of his ſcholars to be heads of houſes in the univerſity; among whom, beſides our author, were Dr John Owen, Dean of Chriſt Church, Henry Wilkinſon, Principal of Magdalen Hall, &c. who, with other ſcholars of his that were Doctors and Bachelors of Divinity, Law, and Phyſic, and Maſters of Arts had an annual feaſt together, to which their Maſter was always invited; and that being ſet at the upper end of the table, he would feed their minds with learned diſcourſes and criticiſms in grammar. This it was thought not amiſs to mention here, not only as it is a proper part of Dr Wilkins's hiſtory, but chiefly becauſe it is a remarkable proof of his natural diſpoſition to any kind of ſocieties for the promoting of learning, which appears in the ſequel of theſe memoirs to be an illuſtrious part of his character.

[*B*] *Mr John Tombes, the celebrated Anabaptiſt diſputant.*] He was pupil to the famous William Pemble at Magdalen-Hall, whom he ſucceeded as catechetical lecturer in 1623 there, and became a noted tutor in 1624. Being choſen lecturer of St Martin's, commonly called Carfax, in Oxford, he was much followed by the puritanical party. In 1630, he left the univerſity, became firſt a preacher at Worceſter, and then Vicar of Leominſter in Herefordſhire. At the breaking out of the rebellion in 1641, he ſided with the Preſbyterians. In the following year, when Nathaniel Fiennes (2) managed Briſtol for the parliament, Tombes having been thrown out of his vicarage by the royal party, was appointed Miniſter of All Saints there. Upon the ſurrendry of that city to the King in 1642, he went to London, and was made Maſter of the Temple; but being ſupplanted of that poſt in 1647, he went to Bewdley in Worceſterſhire (the place of his birth) at the time that Mr Richard Baxter preached at Kidderminſter (3). And it is verily thought (ſays Mr Wood) that he was put upon the project of going there purpoſely to tame Baxter and his party, who then carried all the country before them. They preached againſt one another's doctrines. Tombes was the *Coryphæus* of the Anabaptiſts, and Baxter of the Preſbyterians. Both had a very great company of auditors, who came far about to admire them. Once (if not oftner) they diſputed face to face, when their followers were like two armies: at laſt they fell together by the ears, and the civil magiſtrate had much ado to quiet them. But all ſcholars there and then preſent, who knew the way of diſputing and managing arguments, did conclude that Tombes got the better of Baxter by far. In 1653, Tombes was, by ordinance, appointed one of the *Triers* for the approbation of public miniſters. At the reſtoration he ſided with the royal party, but yet would never accept of either benefice or dignity which was offered to him (4). Set aſide his anabaptiſtical poſitions, he was conformable enough to the church of England, would frequently go to common prayers and receive the ſacrament at Saliſbury, and often viſited Dr Seth Ward, Biſhop of that place, who greatly reſpected him for his learning; as did alſo the Biſhops Sanderſon and Barlow. In 1664, he was preſent at the Oxford Act, and there, in the Veſpers, he did modeſtly challenge to maintain againſt any perſon certain anabaptiſtical tenets; but none there did then think it convenient to grapple with him, and the rather for this reaſon, that he had made thoſe matters his ſtudy for more than thirty years, and that none ever before went beyond him. He ſeemed to many to be a very pious and zealous Chriſtian, and would never be violent, eſpecially in his latter days, againſt any party that was oppoſite to his opinion, but be charitable and complaiſant (5). He wrote books particularly againſt Pædobaptiſm, and has the firſt place in that diſpute given him by Dr Wilkins, in his *Eccleſiaſtes*, p. 103. ſixth edition.

ſeveral ingenious pieces in mechanical philoſophy. The firſt of theſe was publiſhed in 1638, under the title of *A Diſcovery of a new World; or a Diſcourſe tending to prove, that it is probable there may be another habitable World in the Moon: with a Diſcourſe concerning the Poſſibility of a Paſſage thither* [D]. Two years after this, came out his *Diſcourſe concerning a new Planet; tending to prove that it is probable our Earth is one of the Panets* [E]; which

It was by his means that Mr (afterwards Sir Chriſtopher) Wren was introduced to the favour and acquaintance of that Prince. The ſame author who gives us this information, has likewiſe inſerted the following rough draught of a letter to his Royal Highneſs's Under-ſecretary, to be ſent with a preſent to him of ſome mechanical contrivances, wherein Sir Chriſtopher expreſſes his ſenſe of this favour from Dr Wilkins in a very genteel manner.

‘ Moſt Illuſtrious Prince,

‘ When of old a votive table was hung up to ſome deity or hero, a few ſmall characters modeſtly obſcuring themſelves in ſome ſhady corner of the peece (as yet the modern cuſtom is) were never prohibited from revealing the pious artiſt, and rendring him ſomewhat a ſharer in the devotion: indeed I was almoſt prompted to ſuch a preſumption out of my zeal to a Prince ſo much *Mercurialium Cuſtos Virorum.* But the learned votary, who conſecrates theſe tables to your Highneſs, being one who ſuffers me to be a moſt devoted client of his, civilly obſtructs my affection to your Highneſs, by adding his commands to me to tender this oblation (6).’

[D] *Diſcovery of a new world, and the poſſibility of a paſſage thither.*] In the firſt diſcourſe, which contains fourteen propoſitions, our author proves very clearly the poſſibility of a world in the moon, as not contradicting any principle of reaſon or faith, and being likewiſe the direct opinion of many ancient and ſome then modern mathematicians. But the reaſons he makes uſe of to evince the probability of that notion, diſcover nothing ſo much as the little progreſs that had been made at that time in the aſtronomy of this planet. Since, in his ſeventh propoſition, he maintains, that thoſe ſpots and brighter parts, which by our ſight may be diſtinguiſhed in the moon, do ſhew the difference between the ſea and land therein; and, propoſition the eighth, (which indeed would be a a conſequence of the former) that the ſpots repreſent the ſea, and the brighter parts the land. In the tenth propoſition he likewiſe aſſerts, that there is an atmoſphere, or an orb of groſs vaporous air immediately incompaſſing the body of the moon; and in the 12th, that it is probable there may be ſuch meteors belonging to that world in the moon as there are with us: all which poſitions have, it is well known, been ſince diſcovered to be doubtful, if not erroneous. It was apparently by theſe ill grounded opinions that he was led into the belief of what he advances in the thirteenth propoſition, That it is probable there may be inhabitants in this other world. What he advances in the laſt propoſition, which is the ſubject of the ſecond diſcourſe, concerning the poſſibility there is for ſome of our poſterity to find out a conveyance to that world, and if there be inhabitants there, to have commerce with them, took its riſe from his having fallen into the notion that the art of flying might and would, ſooner or later, be actually compaſſed and brought to perfection. To this purpoſe he obſerves, that if it be inquired what means there may be conjectured for our aſcending beyond the earth's magnetical vigour (7)? I anſwer, ſays he, 1. It is not perhaps impoſſible, that a man may be able to fly by the application of wings to his own body, as angels are pictured, and as Mercury and Dædalus are feigned, and has been attempted by divers, particularly by a Turk in Conſtantinople, as Buſbequius relates. 2. If there be ſuch a great *Ruck* in Madagaſcar, as Marcus Polus, the Venetian (8), mentions, the feathers in whoſe wings are twelve foot long, which can ſcoop up a horſe and his rider, or an elephant, as our kites do a mouſe, why then it is but teaching one of theſe to carry a man, and he may ride up thither, as Ganymede does upon an eagle. 3. Or if neither of theſe ways will ſerve, yet I do ſeriouſly and upon good grounds affirm it poſſible to make a flying chariot, in which a man may ſit, and give ſuch a motion to it, as ſhall convey him through the air. And this perhaps might be made large enough to carry divers men at the ſame time, together with food for their viaticum, and commodities for traffick. It is not the bigneſs of any thing in this kind that can hinder its motion, if the motive faculty be anſwerable thereunto. We ſee a great ſhip ſwimme as well as a ſmall cork, and an eagle flyes in the air as well as a little gnat. This engine may be contrived from the ſame principles by which Archytus made a wooden dove, and Regiomontanus a wooden eagle. I conceive it were no difficult matter, if a man were at leiſure, to ſhew the means of compoſing it. The perfecting of ſuch an invention would be of ſuch excellent uſe, that it were enough not only to make a man, but the age alſo where he lives; for beſides the ſtrange diſcoveries that it might occaſion in this other world, it would be alſo of inconceivable advantage for travelling, above any other convenience that is now in uſe. So that notwithſtanding all theſe ſeeming impoſſibilities, it is likely enough that there may be a means invented of journeying to the moon. And how happy ſhall they be that are firſt ſucceſsful in this attempt!

Fœliceſq; animæ, quas nubila ſupra
Et turpes fumos, plenumq; vaporibus orbem
Inſeruit cœlo, ſancti ſcintilla Promethei (9).

From this ſketch of the piece the reader will be more inclined to believe our author, when he tells him in the preface, that he is not to look to find any exact accurate trreatiſe, ſince this diſcourſe was but the fruit of ſome lighter ſtudies, and thoſe too huddled up in a ſhort time, being firſt thought of and finiſhed in the ſpace of a few weeks—He concludes his treatiſe in the following words: Having thus finiſhed this diſcourſe, I chanced upon a late fancy to this purpoſe, under the feigned name of *Domingo Gonzales*, written by a late reverend and learned Biſhop (10), in which, beſides ſundry particulars which this chapter did unwittingly agree with, there is delivered a very pleaſant and well contrived fancy concerning a voyage to this other world. The piece here referred to, is intitled, *The Man in the Moon; or a Diſcourſe of a Voyage thither, by Domingo Gonzales.* It was written by Dr Francis Godwin, Biſhop of Hereford, while he was a ſtudent at Chriſt-church, but not publiſhed till this year, 1638. The editor (11) juſtly obſerves of it, that it is an eſſay of fancy where invention is ſhewed with judgment; and it was not the author's intention to diſcourſe thee into a belief of each particular circumſtance. It is fit thou allow him a liberty of conceit, where thou takeſt to thyſelf a liberty of judgment. In ſubſtance thou haſt here a new diſcovery of a new world, which perchance may find little better entertainment than that of Columbus at firſt in the eſteem of all men; yet his then but poor eſpial of America betrayed unto knowledge ſo much as hath ſince encreaſed into a vaſt plantation, and the then unknown to be now of as large extent as all the other known world. That there ſhould be antipodes was once thought as great a paradox as now that the moon ſhould be habitable. But the knowledge of this may ſeem more proper for this our diſcovering age, in which our Galilæus's can, by advantage of their ſpectacles, gaze the ſun into ſpots, and deſcry mountains in the moon. But this, and more in the enſuing diſcourſe, I leave to the candid cenſure and the faithful relation of the *little* eye-witneſs, our *great* diſcoverer. Thus we ſee theſe two brats, though ſprung from the brains of their reſpective fathers independently of each other, yet both equally derived their extraction from the diſcoveries then lately made in the moon by Galilæo with the teleſcope. But the latter being dreſſed up in the air of a novel, or philoſophical romance (where the teleſcope is perſonalized under the name of Don Diego, in the character of a ſervant to Don Gonzales) in that light affords a good ſhare of entertainment, without ſhocking our good ſenſe; a ſort of ridicule which by treating his ſubject in a more ſerious manner as a philoſopher, the former has unwittingly fallen into. For can there be a more idle project than to aim (as Mr Wilkins does) at flying above the height of of the atmoſphere, where there is no air ſufficient for any wings to beat againſt?

[E] *It is probable our earth is one of the planets.*] In 1632, Galilæo publiſhed at Florence his *Dialogi*

which was followed the next year, 1641, by a third piece, intitled *Mercury*; *or the Secret and Swift Meſſenger: ſhewing how a Man may with Privacy and Speed communicate his thoughts to a Friend at any Diſtance* [*F*]. When the civil war broke out, our Author

della due maſſima Syſteme del' Mondo, Tolemaico & Copernicano; that is, *Dialogues concerning the two grand Syſtems of the World, the Ptolemaic and Copernican.* In the ſecond and third of theſe dialogues he had aſſerted the diurnal and annual motion of the earth. For theſe aſſertions he was cited before the holy office, and by an order from thence was committed to the priſon of that office at Rome. He had been cited there before in 1615, and charged with hereſy for maintaining the Copernican ſyſtem, for which he was impriſoned, and obliged to renounce theſe opinions, as contrary to ſcripture and erroneous in point of faith (12), and promiſe not to defend them either by word or writing, or inſinuate them into the minds of any perſon. Upon the publication of this doctrine again, there paſſed againſt him and his book another ſentence, by which he was forced in the moſt ſolemn manner to renounce his errors, committed to the priſon of the Inquiſition during pleaſure, and commanded, as a ſaving penance, for three years to come to repeat one of the ſeven penitential Pſalms. However, as they reſerved to themſelves the power of moderating, changing, or taking away altogether or in part, the abovementioned puniſhment and penance, he was diſcharged from his confinement in 1634; but the impreſſion of his *Dialogues of the Syſtem of the World* was burnt at Rome (13). Our author's treatiſe upon this ſubject now under conſideration, was apparently wrote in defence of Galilæo (14), againſt the proceedings of the Inquiſition; in which he undertakes to evince, 1. That the ſeeming novelty and irregularity of this opinion can be no ſufficient reaſon to prove it erroneous. 2. That the places of ſcripture which ſeem to intimate the diurnal motion of the ſun or heavens, are fairly capable of another interpretation. 3. That the Holy Ghoſt in many places of ſcripture does plainly conform his expreſſions to the error of our conceits, and does not ſpeak of ſundry things as they are in themſelves, but as they appear unto us. 4. That diverſe learned men have fallen into great abſurdities, whilſt they have looked for the grounds of philoſophy from the Holy Scriptures. 5. That the words of ſcripture, in their proper and ſtrict conſtruction, do not any where affirm the immobility of the earth. 6. That there is not any argument from the words of ſcripture, principles of nature, or obſervations in aſtronomy, which can ſufficiently evidence the earth to be in the center of the univerſe. 7. It is probable that the ſun is the center of the world. 8. That there is not any ſufficient reaſon to prove the earth incapable of thoſe motions, which Copernicus aſcribes unto it. 9. That it is more probable the earth does move than the heavens. 10. Laſtly, that this hypotheſis is exactly agreeable to common appearances. In the four laſt propoſitions of this treatiſe, our author has kept cloſe to the deductions which neceſſarily follow from the then late aſtronomical diſcoveries of Kepler, without falling into any of his philoſophical chimæras, or expoſing any crude conceits of his own (about the cauſes of the earth's motion) into which the forwardneſs of his apprehenſion was but too apt to betray him at other times on philoſophical ſubjects. In this he has given us an eminent proof of his judgment: his religion was here concerned; and the leaſt indulgence of his natural genius in this point would have ſerved the Romaniſts for a handle to diſcredit all the unanſwerable reaſonings in the reſt of the performance. It was the firſt juſt treatiſe of this kind, and more effectually expoſed the folly and abſurdity as well as cruelty of the proceedings in the Inquiſition, by taking no direct notice of them. Des Cartes indeed finiſhed his treatiſe of the World in 1634, which he reviſed, in order to ſend it to Father Merſenne to be printed at Paris, with the King's privilege, juſt at the time when he heard of the proceedings of the holy office againſt Galilæo. But this alarmed him; he had built the greateſt part of his ſyſtem of the world on Galilæo's hypotheſis of the earth's motion; ſo that not being able to retrench it, without rendering all the reſt defective, he thought it more adviſeable to ſuppreſs the treatiſe, than to publiſh it imperfect, or expoſe himſelf to the cenſure of the Inquiſitors at Rome. However, he reſolved to review this work, and to new-model his explication of the earth's motion, in order to ſhew how it may be denied in oppoſition to Galilæo, though in reality it be carried about, and the hypotheſis of Copernicus remain in full force. This, however, (as the ſame author (15) informs us) he did not attempt ſo much out of regard to the Inquiſition, as to explain thoſe paſſages of ſcripture, which are commonly alledged againſt this opinion. But it was not publiſhed before the year 1644 (16), four years after this tract by Mr Wilkins.

[*F*] *Communicate his thoughts to a friend at a diſtance.*] After reading with ſo much pleaſure Biſhop Godwin's *Man in the Moon*, our author was naturally led to peruſe his *Nuntius Inanimatus*, which it was equally in the courſe of nature to produce *Mercury*; and Mr Wilkins aſſures us (17) this was actually the fruit. The bare talking by the former of certain ways to diſcourſe with a friend, though he were in a cloſe dungeon, in a beſieged city, or a hundred miles off, firſt raiſed the wonder, and then the reputation of the aſſerter gained the belief, of the latter. This put him upon collecting all ſuch notes to this purpoſe, as he had met with in the courſe of his other ſtudies; from whence, when he had received full ſatisfaction, he did, for his own further delight, compoſe them into this method. In reality the *Mercury*, which contains nine ſheets and a half, is little more than an explication at large of the *Nuntius Inanimatus* (18), which is diſpatched in two. It was even promiſed, as muſt needs have been obſerved by Mr Wilkins (19), by the author, in his *Man in the Moon*, where, pag. 19. & ſeqq; he tells us, that "Domingo Gonzales and his negro Diego, being obliged to live in different parts of the iſland of St Helena, on account of procuring proviſions, whenever the maſter had any occaſion to confer with his ſlave, whoſe habitation was upon a promontory or cape on the northweſt part of the iſland, about a league off, though within ſight of Domingo's chapel, they could at all times by ſignals declare their minds to each other in an inſtant. But as his art containeth more myſteries than are to be ſet down in few words, hereafter, ſays he, I will perhaps afford a diſcourſe for it of purpoſe, aſſuring myſelf that it may prove exceedingly profitable unto mankind; for that which a meſſenger cannot perform in many days, this way may diſpatch in a piece of an hour." In the ſame place, p. 21. the Biſhop deſcribes more particularly the method of theſe ſignals. "If in the night-ſeaſon, ſays Domingo, I would ſignify any thing to him, I uſed to ſet up a light in the tower, or place where our bell hung. It is a pretty large room, having a fair window well glazed, and the walls within being plaiſtered, were exceeding white; by reaſon whereof tho' the light were but ſmall, it gave a great ſhew, as alſo it would have done much further off, if need had been. This light after I had let ſtand for ſome half hour, I uſed to cover; and then if I ſaw any ſignal of light again from my companion at the cape, I knew that he waited for my notice; which perceiving, by hiding and ſhewing my light, according to a rule and agreement between us, I certified him at pleaſure what I liſt. The like courſe I took in the day to advertiſe him of my pleaſure, ſometimes by ſmoke, ſometimes by a more refined and more effectual way." By the help of this declaration, Mr Wilkins explains the particular method of making theſe ſignals by examples, which is the ſubject of his twentieth chapter. In like manner, it being hinted in the *Nuntius Inanimatus*, towards the end, that many things [in this way] were done by the help of arithmetic, geometry, and muſic, ſeveral examples are given of performing it by points and lines, and geometrical or even other figures, in the eleventh and twelfth and ſucceeding chapters. From hence he has likewiſe taken his thought of forming an univerſal character. The poſſibility of perfecting ſuch an invention he grounds upon theſe two general obſervations. 1. That ſuch a manner of writing is already uſed in ſome parts of the world (20); and that for ſome particulars it is already attained amongſt us. As, 1. Many nations agree in the characters of the common numbers, deſcribing them either the Roman way, by letters, as I. II. V. X. C. D. M. or elſe the Barbarian way by figures, as 1. 2. 3. 10. &c. So likewiſe,

(12) The two propoſitions cenſured, were, 1. Solem eſſe in centro mundi eſt propoſitio abſurda & falſa in philoſophia & formaliter hæretica, quia eſt expreſſe contraria ſacræ ſcripturæ. 2. Terram non eſſe centrum mundi, nec immobilem, ſed moveri motus etiam diurno eſt item propoſitio abſurda & falſa in philoſophia, & theologice conſiderata ad minus erronea in fide.

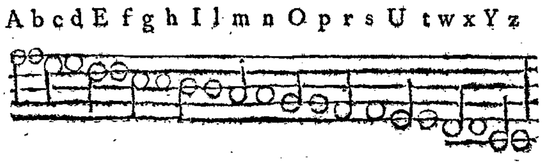
(18) It was publiſhed in 1629.

(19) In Mercury, p. 168. the 2d edition, 1694, this paſſage of the Man in the Moon is cited.

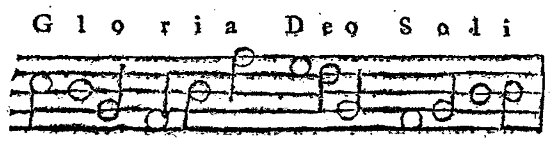
(20) For this he quotes Trigaltius's Hiſtoria. Pinæus, l. i. c. 5. Bacon Augm. ſcient. l. vi. c. 13. & Voſſius, Gram. l. i. c. 41. & Herm. Hugo de Orig. ſcribend. c. 4.

nor having been bred from his infancy in puritanical principles [*G*], adhered to the Parliament; and, in conſequence of his chaplainſhip, complied with the ordinance of that party for taking the Solemn League and Covenant (*e*). But theſe times not being favourable to the univerſities, where academical ſtudies were much interrupted (*f*), he was aſſiduous in promoting that philoſophical meeting in London (*g*), which gave birth afterwards to the Royal Society [*H*]. However, this did not hinder him from purſuing the proper

wiſe for that which we call philoſophical number (21); as for example, the apothecaries marks for weight, the aſtronomers for the planets and their aſpects, the chymiſts for minerals and ſalts (22); and laſtly (23), muſical notes, which in moſt countries are the ſame. Theſe he prefers to others, ſince they will not only ſerve for an univerſal character, but an univerſal language alſo. " For if the muſical inſtrument, ſays he, that is uſed for this purpoſe be able to expreſs the ordinary notes, not only according to their different tones, but their tunes alſo, then may each letter of the alphabet be rendered by a ſingle ſound. Whence it will follow, that a man may frame a language, conſiſting only of tunes and ſuch inarticulate ſounds as no letters can expreſs; which kind of ſpeech is fancied to be uſual amongſt the lunary inhabitants, who (as Domingo Gonzales (24) hath diſcovered) have contrived the letters of the alphabet upon the notes, in ſome ſuch order as this.



Where the five vowels are repreſented by the minims on each of the five lines, being moſt of them placed according to their right order and conſequence; only the letters K and Q are left out, becauſe they may be otherwiſe expreſſed. According to this alphabet of notes, theſe words *Gloria Deo ſoli* muſt be thus contrived.



By this you may eaſily diſcern how two muſicians may diſcourſe with one another by playing upon their inſtruments of muſic, as well as by talking with their inſtruments of ſpeech; and, which is a ſingular curioſity, how the words of a ſong may be contrived in the tune of it." He ſuppoſes that theſe letters and notes might be diſpoſed to anſwer one another with better advantage than here they are expreſſed; and this perhaps would be eaſy enough for thoſe that are thoroughly verſed in the grounds of muſic, to whoſe further enquiry he here only propoſes this invention. *But now*, ſays he, *if theſe inarticulate ſounds be contrived for the expreſſion not of words and letters, but of things and notions (as was before explained concerning the univerſal character) then might there be ſuch a general language as ſhould be equally ſpeakable by all people and nations; and ſo we might be reſtored from the ſecond general curſe which is yet manifeſted, not only in the confuſion of writing, but alſo of ſpeech. The utterance of theſe muſical tunes may ſerve for the univerſal language, and the writing of them for the univerſal character. As all nations do agree in the ſame conceit of things, ſo likewiſe in the ſame conceit of harmonies.* " This curioſity, " for ought I know," (ſo he concludes) " has not yet " been mentioned by any author, but it may be (if " well conſidered) of ſuch excellent uſe, as to de- " ſerve a more full and particular enlargement in a " treatiſe by itſelf." In this treatiſe we find our author ſtill fond of his conceit of flying. In chapter 4th, after he has related ſeveral ways of conveying meſſages by birds, &c. through the air, he concludes thus: " But amongſt all other poſſible conveyances through " the air, imagination itſelf cannot conceive any one " more uſeful than the invention of a flying chariot, " which I have mentioned elſewhere, ſince by this means " a man may have as free a paſſage as a bird, which " is not hindered either by the higheſt walls or the " deepeſt rivers and trenches, or the moſt watchful " centinels.' But of this perhaps I may have occaſion " to treat more largely in ſome other diſcourſe." In this as well as his other inventions he was ſucceeded by Mr Robert Hooke (25), who we are told (26), while he was yet a ſchool-boy under Dr Buſby, invented no leſs than thirty ſeveral ways of flying.

[*G*] *Having been bred up in puritanical principles, &c.*] We have already (27), with this view, given an account of his tutor at Magdalen-hall, Mr Tombes; but we are told expreſsly (28), that he was inclined this way by his education under his grandfather, Mr *Dod*, who though a truly pious and learned man, yet in ſome things was a diſſenter. The ſame author proceeds to give us the following character of his grandfather, as the juſt exemplar of his grandſon with regard to this part of his character. ' Mr Dod,' ſays he, ' had no delight in contradiction, nor could find in ' his heart to diſturb the peace of the church for thoſe ' matters. He was ſo far from it, that, as I have fre- ' quently heard from this his grandchild and others, ' when ſome thought their diſſents ground enough for ' a war, he declared himſelf againſt it, and confirmed ' others in their allegiance: he profeſſed to the laſt ' a juſt hatred of that horrid rebellion. Now, his re- ' lation to this man, and converſation with thoſe of ' his principles, might incline him to hope the like ' of others of that way. And when he found them ' further off from the unity of the church, he might ' poſſibly *overdo*, through the vehemence of his deſire ' to bring them off of their prejudices, and to reduce ' them to the unity of the church, in which his grand- ' father lived and died.' Though it is certain that he took the covenant, yet this author aſſures us, he was ſo far from approving the ways of the [covenanting] diſſenters, that in the worſt of times, when one here preſent (viz. at his funeral) bewailed to him the calamities of the church, and declared his obedience even then to the laws of it, he encouraged him in it, he deſired his friendſhip, and protected both him and many others, by an intereſt that he had gained, and made uſe of chiefly for ſuch purpoſes.

[*H*] *Thoſe philoſophical meetings which gave birth to the Royal Society.*] Biſhop Sprat (29) inſinuates, that our author was the principal promoter of theſe meetings; and the ſame thing ſeems to be inſinuated by Dr Wallis (30), who, in naming ſeveral of the members, ſets Dr John Wilkins at their head; after whom he mentions Dr Jonathan Goddard, Dr George Ent, Dr Gliſſon, Dr Merrit, Doctor of Phyſic; Mr Samuel Foſter, then Profeſſor of Aſtronomy at Greſham college; and Mr Theodore Haak (31), a German of the Palatinate, who (if his memory did not deceive him) gave the firſt occaſion, and firſt ſuggeſted thoſe meetings, and many others. They met ſometimes at Dr Goddard's lodgings in Wood-ſtreet, or ſome convenient place near, on occaſion of his keeping an operator in his houſe for grinding glaſſes for teleſcopes and microſcopes, and ſometimes at a convenient place in Cheapſide, ſometimes at Greſham college, or ſome place near adjoining. Their buſineſs precluding matters of theology and ſtate affairs, was to diſcourſe and conſider of philoſophical enquiries, and ſuch as related thereunto; as phyſic, anatomy, geometry, aſtronomy, navigation, ſtatics, magnetics, chymics, mechanics, and natural experiments; with the ſtate of theſe ſtudies as then cultivated at home and abroad. In particular, they diſcourſed of the circulation of the blood, the valves, the venæ lacteæ, the lymphatic veſſels; the Copernican hypotheſis, the nature of comets and new ſtars, the ſatellites of Jupiter, the oval ſhape, as it then appeared, of Saturn, the ſpots in the ſun, and its turning on its own axis; the inequalities and ſelenography of the moon; the ſeveral phaſes of Venus and Mercury; the improvement of teleſcopes, and grinding of glaſſes for that purpoſe; the weight of the air; the poſſibility or impoſſibility of vacuities, and nature's abhorrence thereof; the Torricellian experiment in quickſilver; the deſcent of heavy bodies, and the degrees of acceleration therein, and divers other things of like nature, ſome of which were then but new

new diſcoveries, and others not ſo generally known as now they are; with other things appertaining to what has been called the *new philoſophy*, which from the times of Galileo at Florence, and Sir Francis Bacon Lord Verulam in England, hath been cultivated in Italy, France, Germany, and other parts abroad, as well as with us in England (32).

(32) Dr Wallis letter, ubi ſupra.

[*I*] *The gift of preaching, as far as it falls under the rules of art.*] In the preface, he tells us, this diſcourſe was firſt drawn up for his own private uſe, as a ſummary of ſuch preparatory rules and directions as he was willing to be guided by in his entrance upon his miniſterial employment. In the body of the book, this art is comprized under three general heads, method, matter, and expreſſion. In the firſt, he gives (33) this excellent precept to his young preachers: “Beware,” ſays he, “of that vain affectation of finding ſomething new and ſtrange in every text, though never ſo plain; it will not ſo much ſhew our parts which ſuch men aim at, as our pride and wantonneſs of wit. Theſe new projectors in divinity are the fitteſt matter out of which to ſhape firſt a ſceptic, after that an heretic, and then an atheiſt.” I need not take notice, how much an eminent writer as well as preacher of our time has been led away by this vanity; and he himſelf is very ſenſible that he has not eſcaped the cenſure of ſcepticiſm by a very candid judge. Under the ſecond head of matter, our author ſpeaking of ſermons and diſcourſes upon particular texts, obſerves, that amongſt all ſuch kind of works, our Engliſh ſermons and treatiſes are moſt elaborate and uſeful. It was the judgment of a very learned man (34), ſays he, That *if the choice and beſt obſervations which have been made diſperſedly in our Engliſh ſermons (leaving out the largeneſs of exhortations and applications thereupon) had been ſet down in a continuance, it would be the beſt work in divinity that has been written ſince the apoſtles times.* And certainly, continues our author, there is either ſome ſpecial eminency in their writings, or elſe there is ſome peculiar genius in men of the ſame country, which makes their notions ſeem unto one another more proper and acceptable. (35) It is well known to what a good purpoſe the late Mr Stackhouſe employed this hint in compiling his Body of Divinity. Under the third head, of expreſſion, the following counſel is ſo extremely uſeful, and yet ſo univerſally neglected, or rather thrown aſide amongſt the Engliſh preachers, as will ſufficiently juſtify our inſerting it in this place. It is in theſe words: ‘As for the manner of compoſing ſermons, it will not be convenient for one that is a conſtant preacher to pen all his diſcourſes, or to tie himſelf unto phraſes; when we have the matter and notion well digeſted, the expreſſions of it will eaſily follow; whereas to be confined unto particular words, beſides the great oppreſſion of the memory, much prejudices the operations of the underſtanding and affections; the judgment will be much weakened, and the affections dulled, when the memory is overmuch burthened and vexed. A man cannot ordinarily be ſo much affected himſelf, and conſequently he cannot ſo eaſily affect others with things that he ſpeaks by rote, as when he takes ſome liberty to proſecute a matter according to his more *immediate* apprehenſions of it, by which many particulars may be ſuggeſted, that were not before thought of, when he doth expatiate upon any ſubject, according to the workings of his own affections, and the various alterations that may appear in the auditory. And then beſides this liberty will breed a παῤῥησία, ſuch a fitting confidence as ſhould be in that orator who is to have a power over the affections of others, which ſuch an one is ſcarce capable, who ſhall ſo ſervilely tie himſelf to particular words and expreſſions, from which he dares not vary for fear of being out. *But a man cannot expect a good habit of preaching thus without much ſtudy and experience.* Young beginners ſhould uſe themſelves to a more exact and elaborate way; when a good ſtyle and expreſſion is firſt learned by penning, it will afterwards be more eaſily retained in diſcourſing (36).’

(35) p. 82.

(36) p. 202, 203. ſixth edition. The ſeventh edition of this treatiſe, with many additions to it, by Dr John Moore, Biſhop of Norwich, and Dr John Williams, was printed in 1694, in 8vo; and there was alſo a 9th edition, corrected and much enlarged, publiſhed in 1718, 8vo.

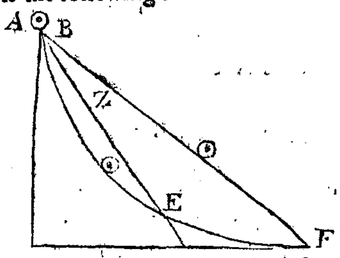
[*K*] *Mathematical magic, not before treated of in this language.*] Our author acquaints us in the preface with a cuſtom of his that gave birth to this offspring. He had been uſed in the courſe of his other ſtudies to propoſe divers mathematical or philoſophical enquiries for the recreation of his leiſure hours; and, as he could gather ſatisfaction, to compoſe them into ſome form and method. Some of theſe he takes notice had been formerly publiſhed, and now ventured forth in diſcourſe. He then proceeds to ſhew the uſe and advantage of this deſign, wherein, beſides the great delight and pleaſure (which every national reader muſt needs find in ſuch notions as carry with them their own evidence and demonſtration) there is alſo much real benefit to be learned, particularly for ſuch gentlemen as employ their eſtates in thoſe chargeable adventures of draining mines, coal-pits, &c. who may from hence learn the chief grounds and nature of engines, and thereby more eaſily avoid the deluſions of any cheating impoſtor; and alſo for ſuch common artificers as are well ſkilled in the practice of thoſe arts, who may be much advantaged by the right underſtanding of their grounds and theories. Ramus hath obſerved, that the reaſon why Germany hath been ſo eminent for mechanical inventions is, becauſe there has been public lectures of this kind inſtituted amongſt them; and thoſe not only in the learned languages, but alſo in the vulgar tongue, for the capacity of every ingenious unlettered artificer. He next proceeds to tell us why he calls this diſcourſe *Mathematical Magic*, which is, as well becauſe the art of ſuch mechanical inventions, as are therein chiefly inſiſted on, has been formerly ſo ſtiled, as alſo in alluſion to vulgar opinion, which commonly attributes all ſuch ſtrange operations to the power of magic. For which reaſon, ſays he, the ancients did make this art Θαυματοποιητικὴ, or *mirandorum effectrix*. The firſt book is called *Archimedes*, becauſe he was the chiefeſt in diſcovering of mechanical powers. The ſecond is ſtiled by the name of *Dædalus*, who is related to be one of the firſt and moſt famous among the ancients for his ſkill in making *automata*, or ſelf-moving engines: both theſe being two of the firſt authors that did reduce mathematical principles into mechanical experiments. Other diſcourſes of this kind are for the moſt part large and voluminous, of great price, and hardly gotten; and beſides, ſays he, there are not any of them that I know of in our vulgar tongue, for which theſe mechanical arts of all other are the moſt proper. Theſe inconveniences are here in ſome meaſure remedied, together with the addition (if I miſtake not) of divers things very conſiderable, and not inſiſted upon by others. In the body of the book, amongſt other inventions, he gives us the conſtruction of a windmill, with a vertical axis, wherein the fans, bent into a ſpiral curve, being inſerted, move horizontally *. By the advantage of this conſtruction the engine is equally turned by the wind blowing from any point of the compaſs, without changing its ſituation (as is neceſſary in the common windmills, whoſe axis lies nearly horizontal). One of theſe inſtruments with ſome ſmall alteration (the fans particularly are not curved, but *even* plains) was ſet up by Archibald the laſt Duke of Argyll at his houſe upon Hounſlow Heath. The deſign of it was to turn an engine for ſupplying the houſe with water from a canal which ſurrounds the gardens. But the fans being too ſmall, the power was not ſufficient to be of any advantage. For

* A model of it was made by the late Mr John Clarke (the inventor of the ſpirit poiſer) which I ſaw, and it ſuceeded very well. P. N.

he was created Doctor of Divinity; and about the ſame time took the Engagement (i), that is, “ To be faithful to the commonwealth of England as it was then eſtabliſhed, “ without a King or Houſe of Lords.” The ſame year, in alluſion to the very extraordinary events that had happened in the nation, as well as to his own conduct under them, he publiſhed a ſmall tract, in 12mo, intitled, *A Diſcourſe concerning the Beauty of Providence in all the rugged Paſſages of it.* Upon our Author's removal from London, as he could no longer attend the philoſophical meetings there already mentioned, he propoſed the ſettling of another of the like nature at Oxford (k). Accordingly a ſociety of ſeveral learned perſons of that univerſity agreed to meet firſt at Dr Petty's lodgings this year, 1649. But after his removal to Ireland in 1652, Dr Wilkins inviting them to Wadham college, theſe meetings were had there afterwards as long as he continued in the wardenſhip [L]. In the mean time, being indefatigable in his ſtudies, and ſtill mindful of his duty as a clergyman, he publiſhed at London, in 1653, in 8vo, *A Diſcourſe concerning the Gift of Prayer; ſhewing what it is, wherein it conſiſts, and how far it is attainable by induſtry, with divers uſeful and proper Directions for that purpoſe, both in reſpect of Matter, Method, and Expreſſion* [M]. The following year he wrote an Epiſtle to Dr Seth Ward (l), Savilian Profeſſor of Aſtronomy at Oxford, which was prefixed by that author

For as one perſon was obliged to attend it, he could by the hand work the pump eaſily, ſo as to raiſe more water in the ſame time.

In this treatiſe likewiſe our author (who was as much perſuaded of the poſſibility of a perpetual motion as he was of the art of flying) has given ſeveral ingenious contrivances for that purpoſe. The moſt promiſing of which is the following:



A loadſtone at A is ſuppoſed to have a ſufficient force to bring up a heavy body along the plane F A from F to B, when the body is ſuppoſed to deſcend by its gravitation along the curve BEF till it returns to its firſt place F; and thus to riſe along the plane FA, and deſcend along the curve BEF continually (37).— The paralogiſm of which reaſoning is no leſs ingeniouſly demonſtrated by Mr McLaurin as follows. Suppoſe BZE to be the ſurface, upon which if a body is placed, the attraction of the load-ſtone and the gravitation of the body would balance each other. This ſurface will meet BEF at ſome point E, betwixt A and F, and the body muſt ſtop in deſcending along AEF at the point E (38).

[L] *At Wadham College, where theſe meetings were held, as long as he continued in the wardenſhip.*] Dr Wallis and Dr Goddard being removed ſoon after our author to Oxford, gave the firſt occaſion to theſe meetings there. To them were added Dr Seth Ward, Dr Ralph Bathurſt, afterwards Preſident of Trinity College in Oxford, Dr (afterwards Sir) William Petty, Dr Willis the phyſician, and others. Their meeting at Dr Petty's lodgings was becauſe being in an apothecary's houſe, they had the convenience of inſpecting drugs and the like, as there was occaſion. By this means they brought the ſtudy of natural and experimental philoſophy to Oxford. After the removal of Dr Wilkins to Cambridge, the reſt met at the lodgings of the honourable Mr Robert Boyle, then reſident for divers years in Oxford (40).

[M] *A diſcourſe on the gift of prayer,* &c.] In the preface he tells us, that this diſcourſe was at firſt intended only for private uſe and direction. That it was for the ſubſtance of it drawn up ſeveral years before, when he did not know ſo much as any one author, who had formerly attempted this ſubject. ‘ Since that, I have,’ ſays he, ‘ met with and peruſed the profitable labours ‘ of ſome others in this kind. M. Elnath Parre (41), ‘ Mr Clark (42), and Scultetus (43). I have likewiſe ‘ conſulted ſuch other treatiſes (44), as ſeemed moſt ‘ nearly to border upon it. Not neglecting the diſ‘ courſes of thoſe who are ſtiled *Magiſtri rerum ſpiritualium,* concerning the rules they preſcribe for men‘ tal prayer.’ He concludes with obſerving that the kind reception his *Eccleſiaſtes* had met with encouraged him to have ſome hope that this might likewiſe be acceptable. In the firſt chapter, where he defines this gift to be *a readineſs and faculty proceeding from the Spirit of God, whereby a man is enabled upon all occaſions in a fitting manner to expreſs and enlarge the deſires of his heart in this duty,* he takes notice, that in the primitive times indeed, when the church was in its infancy, then the text was put into their mouths, they were extraordinarily inſpired with theſe gifts by immediate infuſions, without the uſual means of ſtudy and labour; but that *manna* was only for the wilderneſs, when other common ways could not be made uſe of; whereas when the church is grown up to the ſtate of manhood, and is poſſeſſed of the land, God does now expect that we ſhould plow and ſow, and eat the fruit of the earth in the ſweat of our brows; that we ſhould ſerve his providence, and depend upon him only in the uſe of means; and as children do not learn to ſpeak diſtinctly but after many trials, ſo neither can a Chriſtian be able (as he ſhould) to cry *Abba Father,* till he has beſtowed ſome time and experience in the learning of it. In the ſecond chapter, where he treats of the two extremes of confining ourſelves wholly to ſet forms, or depending wholly upon ſudden ſuggeſtions, he examines all the arguments that have been offered in defence and in diſparagement of either way, and concludes, that a man ſhould ſo prepare himſelf as if he expected no aſſiſtance; and that he ſhould ſo depend upon divine aſſiſtance, as if he had made no preparation. In chapter 5, where he ſets down rules to furniſh the judgment in reſpect of matter, method, and expreſſion, he gives the following remarkable brief paraphraſe upon the Lord's prayer. ‘ For the ‘ chief heads of petition,’ ſays he, ‘ we are directed in ‘ the Lord's prayer, that being given as a ſummary ‘ or brief model, wherein are contained the moſt prin‘ cipal and neceſſary materials of all our deſires. That ‘ which is accounted the firſt petition, *Hallowed be* ‘ *thy name,* doth more eſpecially concern the chief ‘ end of all our deſires, namely the glory of God, and ‘ is there ſet down to teach us what we are princi‘ pally to intend and aim at in all thoſe prayers that ‘ we make either for ourſelves or others. The three ‘ next clauſes do concern the obtaining of good. The ‘ firſt of them for the ſanctifying of our hearts and ‘ natures, into which we wiſh that his *kingdom may* ‘ *come.* The ſecond for the obedience of our lives, ‘ *Thy will be done in earth as it is in heaven.* The ‘ third for the neceſſities of this preſent life, *Give us* ‘ *this day our daily bread.* The three laſt petitions ‘ do concern the removal of evil. The firſt of them ‘ being againſt the evil of ſin. *Forgive us our treſpaſ*‘ *ſes.* The ſecond againſt the evil of temptation, ‘ *Lead us not into temptation.* The laſt againſt the ‘ evil of puniſhment, *Deliver us from evil.* All of ‘ them being in the plural number, Give us, and for‘ give us, &c, which ſhews our duty to petition for ‘ others, as well as ourſelves; and then the whole ‘ prayer is ſealed up with this argument, *For thine is* ‘ *the kingdom, the power, and the glory, for ever and* ‘ *ever. Amen.* Wherein we acknowledge that it is he ‘ alone who is able to grant our requeſts, thereby ‘ teaching us to back our petitions with ſuch argu‘ ments as may ſerve to ſtrengthen our belief concern‘ ing the ſucceſs of them.’ He then gives an analyſis of this, wherein is ſhewn how it comprehends all the ſpecies of precation; and having drawn out another analyſis for thankſgiving, he proceeds to ſupply the materials for each in the ſucceeding chapters, which are taken (moſt properly in his judgment) from ſeveral paſſages throughout the ſcripture. The 7th edition of this book was printed in 1694.

to his *Vindiciæ Academiarum* [*N*]. About two years after this, our Warden intermarried with Robina, widow of Peter French, ſome time Canon of Chriſt-church. This lady was ſiſter to Oliver Cromwell, who was then Protector of England; and notwithſtanding this marriage was contrary to the ſtatutes of Wadham-college, which prohibit the Warden from marrying, yet Dr Wilkins did not ſcruple to retain the wardenſhip, by virtue of a diſpenſation granted by the Protector. After the death of Oliver, our Author continued in the like favour with his ſon and ſucceſſor Richard Cromwell; and was appointed by him, upon the death of Dr Arrowſmith, in the beginning of the year 1659, Maſter of Trinity-college in Cambridge, where he made it particularly his buſineſs to promote, as he had done at Oxford, experimental philoſophy (*m*); we are told alſo, that he ſtudied to propagate univerſal benevolence, diſcouraging narrow party principles, and a fierceneſs for opinions. But he was ejected thence at the Reſtoration, and continued upon that change out of favour for ſome ſmall time at Whitehall, and longer at Lambeth, on account of his marriage †. The Archbiſhop, Dr Sheldon, who had the diſpoſal at that time of all eccleſiaſtical preferments, entertained a ſtrong prejudice againſt him; ſo that he was now not only without any place, but alſo without probability of obtaining one. In effect, his fortune was as low as it could be [*O*]. However, he did not remain long in this condition; for this ſame year, 1660, the honourable Society of Gray's Inn choſe him to be their Preacher (*n*). By this appointment our Author being now again fixed in London, had an opportunity (which he could not neglect) of ſhewing the continuance of his zeal to promote the abovementioned philoſophical meeting. Hitherto this had been no more than a ſimple voluntary aſſembly; but having agreed now to form themſelves into a ſociety [*P*], they came, December the 25th this year, to a reſolution that Dr Wilkins, to whom as many of the Profeſſors of Greſham-college ſhould be joined as were of the ſociety, or any three of them, ſhould be a committee, to receive experiments (*o*). In 1662, the church of St Laurence Jewry becoming void, by the promotion of Dr Seth Ward to the biſhoprick of Exeter, our Author was preſented by the crown to that rectory; and upon the eſtabliſhment of the Royal Society the following year, 1663, he was appointed one of their Council ‡, and was a great benefactor to it [*Q*]. He began now to grow into great favour at court; the happy effects of which were firſt ſeen in his promotion to the deanery of Rippon (*p*), and afterwards by his advancement to the ſee of Cheſter [*R*], upon the death of Dr George Hill, in 1668 (*q*). He was conſecrated to this biſhoprick November the 15th at Ely-Houſe, by the three Biſhops, Dr Coſin of Durham, Dr Laney of Ely, and his particular friend, Dr Seth Ward of Saliſbury; on which occaſion an excellent ſermon was preached by Dr Tillotſon. Our Author, the ſame year, publiſhed his *Eſſay towards a Real Character and a Philoſophical Language* [*S*]. In March 1669, he likewiſe publiſhed a ſermon preached before the King, on

(*q*) The ſame author, Wood, ſays this was procured for him by the intereſt of George Duke of Buckingham, ibid. which Bp Burnett obſerves was no ſmall prejudice againſt him. *Hiſtory of* his own Times, Vol. I. p. 258, fol.

[*N*] *An epiſtle prefixed to the Vindiciæ Academiarum, againſt Webſter's examen of academies.*] This was wrote in defence of learning, and academical education in particular, which was always greatly promoted by our author, notwithſtanding his puritanical inclinations. This ſurely, ſays Dr Tillotſon, cannot be denied him, it is ſo well known to many worthy perſons yet living, and hath been ſo often acknowledged even by his enemies, that in the late times of confuſion almoſt all that was preſerved and kept up of ingenuity and good learning, of good order and government in the univerſity of Oxford, was chiefly owing to his prudent conduct and encouragement (45). Biſhop Burnet alſo obſerves, that though Wilkins married Cromwell's ſiſter, yet he made no other uſe of that alliance but to procure good offices, and to cover the Univerſity of Oxford from the ſourneſs of Owen and Goodwin *.

[*O*] *In reality his fortune was as low as it could be.*] His half-brother by the mother's ſide, Dr Walter Pope, ſays (46), 'I remember Biſhop Ward told me at that 'time, I am much concerned for your brother, and 'write to him oftener than I otherwiſe ſhould, to keep 'up his ſpirits, and aſſure him of my utmoſt aſſiſtance 'for the bettering of his condition, leſt he ſhould ima'gine that I in my proſperity ſhould be unmindful of 'him in adverſity.'

[*P*] *Agreed to form themſelves into a ſociety.*] It was done November the 28th that year, in Mr Rooke's apartment at Greſham College, where Dr Wilkins; among others, being preſent, they choſe Lord Brouncker for Preſident, and Mr Crowne for their Regiſter, by balloting. But they afterwards appointed two Secretaries, who were to reply to all addreſſes both at home and from abroad, and to publiſh whatever ſhould be agreed upon by the ſociety. Theſe, ſays Dr Sprat, are at preſent Dr Wilkins and Mr Oldenburgh (47), from whom I have not uſurped this firſt employment of that kind, for it is only my hand that goes, the ſubſtance and direction came from one of them.

[*Q*] *And was a great benefactor to it.*] So we are told in general by Mr Wood (48). Dr Sprat, ſpeaking of their repoſitory, ſays; This he [Mr Hooke, who was appointed firſt curator] has begun to reduce under its ſeveral heads, according to the exact method of all the ſpecies of nature, which has been compoſed by Dr Wilkins. This repoſitory is a general collection of all the effects of art, and the common or monſtrous works of nature. It was firſt begun by caſual preſents, either of ſtrangers, or their own members: amongſt theſe laſt Dr Wilkins, beſides other curioſities, enriched it with a *Way Wiſer* for a coach, and the *Catoptric point*, both invented by Mr (afterwards Sir Chriſtopher) Wren (49).

[*R*] *Nominated him to the ſee of Cheſter.*] This was done, as Dr Pope tells us (50), not only without, but againſt the conſent of the Abp of Canterbury. After which Biſhop Ward introduced him into the Archbiſhop's preſence and favour, who entertained him very obligingly, declaring that the prejudice he had againſt him was very unjuſt, and that if he had known him ſooner, he would have been ſooner preferred. Before Biſhop Wilkins was ſettled in his biſhoprick, a certain perſon addreſſed himſelf to the Archbiſhop, deſiring his Grace's recommendation to him for a place in his gift; 'No,' replied the Archbiſhop, 'that I can by 'no means do: It would be a very unreaſonable 'thing in me to deſire a favour from one whoſe pro'motion I oppoſed.' And they ever afterwards kept a fair correſpondence. If we may believe Mr Wood, Dr Wilkins owed this promotion to the intereſt of George Duke of Buckingham (51).

[*S*] *His eſſay towards a real character.*] Mr Wood obſerves (52), that our author took the hint of this treatiſe from a book intitled, *Ars ſignorum vulgo character univerſalis, & lingua philoſophica*, publiſhed in 1661, by one George Dulgarno a Scotſman, born at Old Aberdeen, and educated in the Univerſity of New Aberdeen, who taught a private grammar-ſchool at Oxford, and died there Auguſt 28, 1687. But that he communicated this book, before it went to the preſs, to Dr Wilkins, who thence conceiving a great notion of the matter, carried it on and brought it up

to

on Proverbs iii. 16. and another in February 1670, upon Eccleſ. xii. 13. as alſo a third on Eccleſ. xii. 14. 14 March 1671 *(r)*. While Dr Wilkins was in the government of the church, he promoted (as before) the deſign that was on foot *(s)* towards bringing about a comprehenſion with the Diſſenters, of whom he always entertained favourable hopes. This, as might be expected, procured him ſome enemies *(t)* amongſt ſuch as were zealous in oppoſing that unſucceſsful project. Notwithſtanding, he conſtantly ſtood up in defence of the eſtabliſhed order and liturgy with ſo much ſteady zeal, as exceeded the expectations of all who did not very well know him. He filled his epiſcopal office with a goodneſs anſwerable to the reſt of his life, but with a prudence above it, conſidering the two extremes of Popery and Fanaticiſm, which were no where then ſo much as in his dioceſe. Though he was, as before, very tender to thoſe that differed from him, yet as he was conformable himſelf, ſo he brought others to conformity, ſome eminent men in his own dioceſe *(u)*. He was in perfect health in all other reſpects, when a known infirmity (a ſuppreſſion of urine) from an unknown cauſe [*T*], (that, we are told, it had been eaſier to cure than it was to diſcover) ſtole upon him, and ſoon became incurable. He continued for ſeveral days in a proſpect of death, which he ſaw as it approached, and felt it come on by degrees. Some few days before he died, he found within himſelf, as he often ſaid, a ſentence of death. During his illneſs, he never appeared diſmayed or ſurprized either with the pains of his diſtemper, or the apprehenſions of death, nor ever uttered a word unbecoming a wiſe man and a true Chriſtian. On the contrary, there was great cauſe to admire his faith towards God, his zeal for his church, his conſtancy of mind, his contempt of the world, and his chearful hopes of eternity. At length he gave way to

to that which, ſays he, ‘ you now ſee extant (53) ;’ which is a moderate folio. However that be, it is evident from the 13th and 18th chapters of his Mercury, that our author had employed ſome thoughts upon this ſubject long before, though it does not appear that he had then formed any determinate ſcheme for it. The firſt occaſion of it had its riſe from Dr Seth Ward, Bp of Saliſbury, who reſiding then at Wadham College, for the ſake of our author's learned converſation, mentioned this as one of the *deſiderata* in literature. — However, it was a conſiderable time after this that Dr Wilkins attempted it, and he was firſt put upon it by the deſire he had to aſſiſt another perſon in forming a *real character* from the natural notions of things. In order to promote that perſon's deſign, he drew up the tables of ſubſtances, reduced under their ſeveral heads, much the ſame as they are publiſhed in his *Eſſay*: but the perſon thinking this method of too great a compaſs, and that he could provide for all the chief articles in a much ſhorter and eaſier way, he did not make uſe of the Doctor's tables. However, the Doctor being convinced, that this was the only way to effect ſuch a work, and unwilling to loſe ſo much pains, went on with the other table of accidents, and then attempted the reduction of all other Engliſh words into a dictionary, wherein they are either referred to their places in the philoſophical tables, or explained by ſuch words as are in theſe tables. And for the further completing of this work, he formed alſo a natural grammar. In the prefatory epiſtle he mentions ſeveral perſons who aſſiſted him in the work, particularly Willoughby, Ray, and Dr Will. Lloyd, and others; but it is remarkable that he does not mention Dulgarno, and the more, becauſe Dr Wilkins's own name is printed in the margin of King Charles IId's letter prefixed to Dulgarno's book as one of thoſe who informed his Majeſty of Dulgarno's deſign, and approved it as a thing that might be of ſingular uſe to facilitate an intercourſe between people of different languages (53), and conſequently a proper means for advancing all the parts of natural and civil knowledge; which prevailed with his Majeſty to grant his ſaid letters of recommendation to ſo many of his ſubjects, eſpecially of the clergy, as were ſenſible of the defectuouſneſs of art in this particular.

We have ſeen from Mr Wood, and the ſame is declared in our author's epiſtle, that he had formed his tables for the aſſiſtance of another perſon, who did not make uſe of thoſe tables; and by Dulgarno's book it appears, that he was in his judgment againſt thoſe tables, as being too tedious, and ſuch as philoſophers were not agreed in, and therefore others of different languages and nations could not have the ſame ideas about them. Which cenſure might perhaps give the Biſhop ſome diſguſt, and be the reaſon why he did not mention Dulgarno among the reſt of his aſſiſtants (54). He did not think he had finiſhed it with all the advantages of which it is capable; yet he thought it ſufficient for what it pretended to, viz. the diſtinct expreſſion of all things and notions that fall under diſcourſe (55). Accordingly he preſented the MS. to the Royal Society, who appointed a committee, May 18, 1668, to conſider and make their obſervations upon it. Upon whoſe report it was printed by order of the ſaid Society. In 1673, Mr Leibnitz being then in England, told both Mr Boyle and Mr Oldenburgh, that he did not think either Dr Wilkins or Dulgarno had come to the point. They might indeed enable nations who did not underſtand each other to correſpond eaſily together; but they had not obtained the true real character, which would be the beſt inſtrument of the human mind, and extremely aſſiſt both the reaſon and memory, and the invention of things. Theſe characters ought to reſemble as much as poſſible thoſe of algebra, which are very ſimple and expreſſive, and are never ſuperfluous or equivocal, but whoſe varieties are grounded on reaſon. Mr Leibnitz ſpeaks ſomewhere of an alphabet which he was contriving of human thoughts. Probably this alphabet had ſome relation to his univerſal language (56).

[*T*] *A ſuppreſſion of urine from an unknown cauſe.*] Mr Wood tells us (57), that he died of the ſtone: but in this he had been miſinformed, though it had been ſo reported. In truth his caſe was miſtaken, as appears from the following remark upon it by Dr Baynard (58). ‘ I was always of opinion,’ ſays he, ‘ that ‘ the pains in a rheumatiſm where not cauſed by any ‘ ſaline or acid particles in the blood, &c. but rather ‘ from its clammineſs and denſity, diſtending the veſſels ‘ thro' which it paſſes, which diſtenſion produces thoſe ‘ ſharp and pungent pains, which rheumatic patients ‘ ſo generally complain of. For although the proper ‘ coats of the veins and arteries ſeem to be inſenſible in themſelves, yet thoſe thin membranes which ‘ beſet them are of a moſt exquiſite ſenſe, and full of ‘ lymphæducts, which being dilated and ſtretched, cauſe ‘ an inflammatory ſymptomatic fever with continual ‘ ſweating, the blood being glutinous and ſizy, as in ‘ quinſies, pleuriſies, and all other inflammatory diſtempers, the fever is increaſed by the great quantity ‘ of alkalious corroſive ſalts, lodging in the blood, ‘ cauſing thirſt, &c. and not diluted and waſhed off by ‘ urine, which is always thick, turbid, and high-coloured, and almoſt, if not wholly, devoid of any ſaline impregnation. To prove this, he ſent 6 quarts ‘ of a ſtrong man's urine in the height of a rheumatiſm, to that ingenious artiſt George Moult, who ‘ chymically analyſed it, and found not above the ‘ thirtieth part of theſe ſalts uſually found in ſuch ‘ quantities in the urine of a ſound perſon.’ A patient had laboured for ſeven or eight days under a total ſuppreſſion of urine; by trying with the catheter there was not the leaſt appearance of a ſtone, nor a drop of water in his bladder; hereupon Dr Baynard *ſuppoſing it might be the ſame caſe of which the learned* Dr Wilkins *died*, cauſed the patient to take a quantity of acids, in a convenient vehicle, by which ſecretion being preſently made, there was a great diſcharge of urine, and he was thereby reſtored to his health: and ſo it was found to be of the other patients that laboured under ſuppreſſion of urine.

(53) Our author obſerves, that the number of different languages, according to the moſt received opinion, amounts to 70 or 72.

(58) Phil. Tran. No. 215. p. 19.

ſate, November the 19th, 1672, in the houſe of Dr John Tillotſon, in Chancery-lane, and was interred under the north wall of the chancel of the church of St Laurence Jewry, on the 12th of December following (*w*); his funeral ſermon being preached by Dr William Lloyd, then Dean of Bangor (*x*), who aſſures us, that, beſides an underſtanding that extended to all parts of uſeful learning and knowledge, Dr Wilkins had a will always diſpoſed to great, public, and generous things: that he had a natural averſion to all idle ſpeculations (*y*), or ſmall and frivolous deſigns; but that in great matters he judged ſo well, as not uſually to be ſuprized with events. He purſued his intentions with ſuch equalneſs of mind, that he was never carried beyond the calmneſs of his natural temper, except through his zeal for the public good, or where his friend was concerned. In this laſt caſe particularly, he did not act ſlightly, but like one that made it his buſineſs, as in all other reſpects, ſo eſpecially where either his friend's good name or memory were attacked. That, however, he would not ſpare to give advice, and even reproof, where he ſaw occaſion for it. I never knew, ſays Dr Lloyd, any that would do it ſo freely, and that knew how to manage that freedom of ſpeech ſo inoffenſively. In this he excelled all men that ever I knew. That though his prudence was ſo great, as it ſeldom failed in any thing to which he applied himſelf, yet he ſo much wanted craft or diſſimulation, that he had rather too much openneſs of heart. He ſo abhorred a lie, that he was not at all for ſhew, and could not put on any thing that looked like it. He had a greatneſs of mind, which made him look down upon wealth. He knew the uſe of an eſtate, but did not court it. What he yearly received of the church, he beſtowed in its ſervice; and as for his temporal eſtate, being ſecured againſt want, he ſought no farther, he ſet up his reſt. Dr Lloyd had heard him ſay often, *he would be no richer*; and believed he was as good as his word. Notwithſtanding all this, it cannot be denied that his political conduct both in church and ſtate has been generally condemned. Even his greateſt advocates judged it indefenſible [*U*]. He was undoubtedly a moderate man, in the good ſenſe of the word [*W*]; yet he ſeems to have been one of thoſe of whom neither his friends nor foes have ſpoken with ſufficient moderation. Even Dr Tillotſon, the beſt guardian of his fame, is remarkably tranſported on this occaſion into an intemperance of wit not uſual to him. Upon ſome reflections (in the *Hiſtoria & Antiquitates Univ. Oxon.*) caſt upon our Author's character, which he thought were injurious to him, he expreſſes himſelf in the following words: "I cannot forbear, out of a generous indignation to ſee the aſhes of ſo worthy a man trampled upon, to take notice of a ſlight, and I think unjuſt, character given of our Author in Mr Wood's *Hiſtoria, &c.* whether by the author of that book or by ſome other hand, I am not curious to know *. It conſiſts of flat and ill-favoured commendations; as that he was *Philoſophiæ &*

(*w*) Wood's Athen. Oxon. ubi ſupra, col. 507.

(*x*) He was afterwards better known by the character of the learned Bp of Worceſter. This ſermon is printed at the end of Dr Wilkins's treatiſe of Natural Religion.

(*y*) This is to be underſtood of the religious and moral part of his ſtudies, and is ſo much the more remarkable, as he was far from being free from vain and idle ſpeculations in other ſubjects; witneſs his real character, and his forming a contrivance to execute a perpetualmotion, &c.

[*U*] *Even his greateſt advocates judged it indefenſible.*] Dr William Lloyd, who knew him well in theſe times, allows, that ſometimes in his compliance to the Diſſenters he overdid it (57); and Dr Tillotſon, where he ſhews the warmeſt regard to our author's good name, when he thought it moſt abuſed by ſome invidious reflections upon his carriage and the circumſtances of his condition in the times of the uſurpation, throws the defence of this part of his character off himſelf in the following manner: "In all which," ſays he, "becauſe I did not then know him, I leave him to be vindicated or cenſured by thoſe who were witneſſes of his behaviour and temper at that time (58)."

(57) See his funeral ſermon, ubi ſupra.

(58) Preface to Bp Wilkins's ſermons.

[*W*] *He was undoubtedly a moderate man in the good ſenſe of the word.*] His great admirers, Lloyd, Tillotſon, and Burnet, have their eyes principally upon this amiable diſpoſition, when they call him *a lover of mankind*; which yet is meant likewiſe to comprehend his conſtant endeavours to promote and encourage uſeful learning among all, without reſpect of perſons: To which purpoſe Dr Sprat alſo, ſpeaking of our author's *Univerſal Language*, has theſe words (59): 'A work wherein this excellent man hath undertaken a deſign, that very well fits the temper of his own mind; for it well became him to teach a communion of ſpeech amongſt all philoſophers, whoſe chief ſtudy it has always been to promote a general agreement amongſt all learned and virtuous and wiſe men.' But this part of his character is ſet beyond even the reach of either envy or malice, by the unwilling atteſtation of one of his greateſt maligners; I mean Mr Wood, who (60) ſpeaks thus at large of him: 'This Dr Wilkins was a perſon endowed with rare gifts; he was a noted theologiſt and preacher, a curious critic in ſeveral matters, an excellent mathematician and experimentiſt, and one as well ſeen in mechaniſms and the new philoſophy as any of his time. He alſo highly advanced the ſtudy and perfecting of aſtronomy, both at Oxford whilſt he was Warden of Wadham-college, and at London whilſt he was of the Royal Society; and I cannot ſay to the contrary that there was any thing deficient in him, but a conſtant mind and ſettled principles. Dr Gilbert Burnet * tells us,' ſays he, 'that this Dr Wilkins (who was for a comprehenſion and a limited indulgence for diſſenters in religion) was a man of as great a mind, as true a judgment, as eminent virtues, and of as good a ſoul as any he ever knew, &c. And one † or more of the Royal Society ſay, *that all that knew Biſhop Wilkins, muſt needs acknowledge him, for his univerſal inſight into all parts of learning, ſolid judgment, rare prudence and dexterity in the management of worldly affairs and tranſactions, univerſal charity, ingenuity, temper, and moderation of ſpirit, to have left behind him but few equals*, &c. Sir Peter Pet, in his Epiſtle to the Reader before *Dr Barlow's Genuin Remains*, ſaith thus of Biſhop Wilkins: "He was an ornament both of that univerſity and the Engliſh nation, and one who adorned the goſpel itſelf by his great intellectual and moral endowments." But this writer, in proceeding, is, to uſe his own expreſſion, nauſeouſly laviſh in exalting him above meaſure; a zeal which drew him into the moſt uncommon errors, as attempting to burniſh his character at the expence of another very worthy perſon; I mean Biſhop Fell, whoſe pen is charged on this occaſion, without any good grounds, with daſhing out the ſtrokes againſt Wilkins that are found in Wood's Hiſtory and Antiquities of Oxford, lib. ii. p. 376 *. 'which,' ſays Sir Peter, 'ſeemed to me the more *nauſeous*, becauſe I was preſent with that Biſhop, when he made it his particular requeſt to Cromwell's Major-general, not to baniſh that perſon from Oxford, and therein prevailed with him, notwithſtanding the applications that had been made to him for it by Dr Owen and by the Preſbyterian Heads of Houſes.' Biſhop Burnet having allowed that he was naturally ambitious, proceeds upon the impartiality of that conceſſion to gratify his known ſpleen againſt the clergy in general; aſſerting that our prelate was the *wiſeſt clergyman he ever knew*, and that he had a courage which could ſtand againſt a current, and againſt all *the reproaches with which ill-natured clergymen ſtudied to load him* (62).

(62) Burnet's hiſt. of his own times, Vol. I. p. 253.

" *Mathematicæ addictiſſimus*, a great *Well-willer* to Philoſophy and the Mathematicks; the " exact character of an Empiric and Almanack-maker, when theſe two excellencies happen " *to be in conjunction*. And then *to the ſtudy of Divinity he added Eloquentiam in concionando non contemnendam, an Eloquence in preaching not to be deſpiſed*; which, though it " be but a very cool and ſlender commendation both of his divinity and eloquence, yet " I muſt own ſomething of kindneſs in it, becauſe there is, in good earneſt, a ſort of " eloquence in preaching that is to be deſpiſed. To finiſh the kindneſs, and that nothing might be omitted that might caſt an odium upon him, as he is placed next before Mr Hobbes, ſo I cannot but obſerve in comparing their characters, that there is " apparently far leſs of envy and detraction in that of Mr Hobbes than in this of the " reverend Biſhop; for which I can imagine no other reaſon but this, that Mr Hobbes " was then alive to ſpeak for himſelf, *but the dead bite not*. Upon the whole, it hath " often been no ſmall matter of wonder to me, whence it ſhould come to paſs that ſo " great a man, and ſo great a *lover of mankind*, who had the inclination, the ſkill, and " the opportunity to oblige ſo very many, and was ſo highly valued and reverenced by " all that knew him, ſhould yet have the hard fate to fall under the heavy diſpleaſure " and cenſure of thoſe, who knew him not; and that he, who never did any thing to " make himſelf one perſonal enemy, ſhould have the ill fortune to have ſo many. I " think I may truly ſay, that there are, or have been, very few in this age and nation " ſo well known, and ſo greatly eſteemed and favoured, firſt by a judicious Prince, and " then by ſo many perſons of high rank and quality, and of ſingular worth and eminence " in all the learned profeſſions, as our Author was (z)." By his laſt will, he committed the care of his papers to Dr Tillotſon, leaving it wholly to his diſpoſal whether any, or what part of them ſhould be made public. And in 1675, a treatiſe, in 8vo, of our Author's, intitled, *Of the Principles and Duties of Natural Religion*, was publiſhed by that truſtee; who aſſures us, that though it was left unfiniſhed, yet he knew it was deſigned by Dr Wilkins for the preſs, and that if God had been pleaſed to have granted him but a little longer life, he would have publiſhed it himſelf; that the firſt twelve chapters were written out for the preſs in his life-time, and that the remainder was gathered and made up out of his papers, as well as the materials left for that purpoſe, and the ſkill of the compiler, would allow (aa) [*X*]. In 1682, a Volume of his Sermons, preached upon ſeveral occaſions, was likewiſe publiſhed, in 8vo, by the ſame editor.

(z) See Preface to a volume of ſermons preached by Dr Wilkins.

(aa) Preface to this book.

WILLIAMS [JOHN] a Welſh Divine of a very diſtinguiſhed character, being Lord Keeper of the Great Seal of England, and Archbiſhop of York. He was born March 25, 1582, at Aberconway in the county of Carnarvon in Wales, and was the ſon of Edward Williams, Eſq; whoſe father, William Williams, Eſq; of Coghwillanne derived his pedigree from the princes of North Wales in the time of King Stephen, and continued his coat of arms without any alteration from Ednevet Viſchan (a), Lord Steward of Wales in the 25th year of Henry III. Mr Williams, the ſubject of the preſent article, being youngeſt of five ſons (b), his education fell to the ſhare of his grandmother, who was daughter of Sir William Griffyth, Knt. late of Penryn; and this gentlewoman very gladly embraced the opportunity that offered of ſending her grandſon to Ruthyn in Denbighſhire, to a grammar-ſchool founded that year by Dr Gabriel Goodman [*A*], Dean of Weſtminſter, who had likewiſe appointed her kinſman, Mr Robert Griffyth, the firſt maſter. Mr Williams could not be leſs than thirteen years of age when he came to this ſchool; however he retrieved that diſadvantage by the quick progreſs he made through it. For though his ſpirit could not be confined to a conſtant regular attendance, and indeed no boy play'd truant ſo often as he [*B*], yet when returned to his book, he plied it ſo much to the purpoſe, and made ſuch ſwift advances, that no boy was able to keep pace with him. He was head ſcholar when Dr Richard Vaughan, then lately made Biſhop

N. B. Moſt of the particulars of this article are taken from Bp Hacket's life of the Abp.

(a) i. e. In modern Welſh, Vaughan.

(b) Beſides theſe brothers he had two ſiſters. Hacket.

[*A*] *A ſchool founded by Dr Gabriel Goodman.*] This worthy gentleman was made Dean of Weſtminſter in 1561, to which he was promoted from a prebend of the twelfth ſtall in that church (1). He was a great patron to Mr Camden (2), and defrayed the expence of his travels through ſeveral parts of England, for the compoſing and perfecting of his *Britannia* (3). He died in 1607 (4), having been ſucceeded in the deanery by Dr Lancelot Andrews, afterwards Biſhop of Wincheſter, in 1597. Some few years before, 1580, he founded a ſcholarſhip in St John's college, Cambridge, to which Mr Richard Neile, afterwards our Archbiſhop's immediate predeceſſor in the ſee of York, was admitted, in purſuance of the following letter.

'To the Maſter and Fellows of St John's college.

'*Salutem in Chriſto*,

'Whereas Richard Lockſmith, one of the two 'ſcholars of your late By-foundation, is otherwiſe 'placed; I am required by the foundreſs, Lady Mildred Boughley (5), to recommend unto you in the 'place of the ſaid Lockman the bearer hereof, Richard Neile, a poor and fatherleſs child of good hope 'to be learned, and to continue therein; requiring 'you that he may receive and enjoy all ſuch profits 'and commodities as ſhall be due unto him with your 'favours. God proſper you and your charge with his 'grace, and encreaſe of vertue and learning. From 'Weſtm. College, 16th of April, 1580.

'GABRIEL GOODMAN (6).'

[*B*] *No boy played truant ſo often as he.*] It was owing to this playful diſpoſition that he became *eunuchus pene ab utero* (7). When he was about ſeven years of age, he took a leap, being then in long coats, from the walls of Conway town to the ſea-ſhore, thinking that the wind, which was then very ſtrong, would fill his coats like a ſail, and bear him up, as it did his playfellows; but he found himſelf miſtaken, for lighting upon his belly on a big ragged ſtone, the fall cauſed, ſays Dr Hacket, a ſecret infirmity, better to be underſtood than deſcribed; and want of timely remedy, the ſkill of good ſurgery being little known in that climate, continued it to his dying day.

(6) Idem, who ſays, he was a ſcholar, a gentleman, and a chriſtian.

(7) Arthur Wilſon roundly ſays, he was *eunuchus ab utero*. Life of K. James, p. 196. edit. 1653. fol. but in this he was miſtaken, though it appears he came near the truth.

of Bangor [C], happened to make a viſit to this new foundation, and finding his young kinſman ripe for the univerſity, preſently ſent him to St John's College in Cambridge, where he was admitted in 1598, under the tuition of Mr Owen Gwyn, another of his relations (c); and he became a ſcholar of the houſe the 5th of November in the following year (d). It was obſerved, that he brought with him hither more Latin and Greek than good Engliſh; and the ſhame of his Welſh dialect proved a lucky check upon the ſociableneſs of his temper; for avoiding company on that account, he kept cloſe to his ſtudies, and being happy in a conſtitution that required no more than three hours ſleep in the twenty-four to keep him in perfect health, he read over the beſt authors in ſeveral ſciences, together with the moſt conſiderable hiſtorians and poets, Greek and Latin, while he was yet under-graduate; and his genius was likewiſe ſoon obſerved to be above the ordinary level; but he was moſt of all diſtinguiſhed by a ready and retentive memory (e). He proceeded Bachelor of Arts the latter end of the year 1602, and in leſs than a month, *viz.* on the 14th of April 1603, was elected into a foundation-fellowſhip for the dioceſe of Bangor (f), and nominated Senior of his election by the favour of K. James I. [D] In 1604, his patron Dr Richard Vaughan, being promoted to the ſee of London (g), gave his kinſman an invitation to his palace there in vacation-times. This kindneſs proved of great ſervice to our ſtudent, who thereby began to ſhake off the aukward addreſs of the collegian, and to acquire a more courtly manner. Here he likewiſe became known to John Lord Lumley, who received him as a relation, and never diſmiſſed him without a preſent of ten pieces, and afterwards gave him ſeveral valuable books, both printed and manuſcripts, out of his curious library [E]. By this means, when Mr Williams commenced Maſter of Arts in 1605, he indulged his natural humour, and treated his friends at the commencement in a ſplendid manner above the common practice. As ſoon as he had completed this degree, he entered ſeriouſly upon the ſtudy of divinity, and having employed two years in reading the bible with the beſt commentators, he undertook the ſchoolmen, the eccleſiaſtical hiſtorians, and the fathers. In the ſtudy of which his manner was, to allot one month to each, whereby he found variety almoſt as much refreſhing as ceſſation from labour: In ſuch a method he was likewiſe ſure to return to none of theſe courſes of learning as a ſtranger, making his ſpaces of abſence from none of them any longer than thoſe monthly revolutions: however, as he obſerved, *viam ſibi reperit uſus*: and he liked his own method ſo well, that he was conſtant to it for thirteen years, until he was called off by his ſecular employments, and when he was diſcharged of them, he fell again to run round with his former courſes. But though he made divinity his chief ſtudy, yet he did not neglect other acquiſitions and accompliſhments. He had been early inſtructed in mathematicks by the celebrated Mr Edward Briggs, then fellow of his college. He was particularly fond of metaphyſicks, and remarkably well verſed in that ſcience (h). Beſides theſe he acquired ſome ſkill in muſick, both vocal and inſtrumental, and a tolerable knowledge of the French language. Theſe

(h) He defended the uſe and advantage of this ſcience publickly in the ſchools, when he was proctor. Hacket.

[C] *Dr Richard Vaughan*, &c.] He was our author's countryman, born in the ſame county, and educated in St John's college (8). He was conſecrated Biſhop of Bangor this year, 1595, on January 25th (9). Mr Wood obſerves, that he was ſucceſſively Biſhop of Bangor, Cheſter, and London, during which time he was accounted an excellent preacher, and a pious liver. He ſeems to have been a great encourager of his ſchool at Ruthyn, the third maſter of which, Gabriel Powel, he took to be his chaplain, who being puritanically inclined, gives ſome room to ſuppoſe the Biſhop a little leaning to thoſe principles, and that he inſtilled the ſame into Mr Williams.

(8) Wood's Faſti, vol. I. p. 127.

[D] *Senior of his election*, &c.] This appears by a letter of our author written to that King two and twenty years after, wherein he reminds his Majeſty, that *his gracious letters conferred that bloſſom of his firſt preferment upon him* (10).

(10) Hacket, p. 10.

[E] *Lord John Lumley's curious library.*] This Lord had married his ſiſter Barbara to Mr Llhuid, the antiquarian, whom he made uſe of in collecting his library (11). Mr Llhuid was a very learned man, and coadjutor to Mr Camden, who ſtiles him a learned Briton (12), and for knowledge in antiquities reputed by our countryman to carry after a ſort with him all the credit and honour. He was born at Denbigh, about the year 1526, and bred at Oxford a Commoner of Brazen Noſe college, commenced A. M. in 1551. He ſtudied phyſic and practiſed at Denbigh, diverting his leiſure hours with muſic, being eſteemed a well bred gentleman. Mr Wood ſays, he was a perſon of great eloquence, and a ſound philoſopher, beſides a noted antiquarian; and that dying in 1570, he was interred at Whitechurch near Denbigh, ſoon after a monument of alabaſter was ſet in the wall over his grave, repreſenting his effigies in a praying poſture, with a deſk, and a book lying before him, and a ſword by his ſide, but nothing elſe military in his habit. Underneath is a plain free ſtone, inſcribed with eight barbarous Engliſh verſes; the two firſt of which ran thus:

The corps and earthly ſhape doth reſt
Here tomy'd in your ſight,
Of Humfrey Lloid, Maſter of Art,
A famous worthy wight.

He wrote, (1.) *An Almanack and Calendar, ſhewing the changes of the moon for ever, and the ſign ſhe is in for three years, with the natures of the ſigns and planets*, &c. (2.) *Commentarioli Britanniæ deſcriptionis fragmentum*, dedicated to his dear and intimate friend Abr. Ortelius, of Antwerp, in 1568. It was tranſlated into Engliſh by Tho. Twyne, who entitles it *The Breviary of Britain*. Lond. 1573. 8vo. (3.) *De Mona Druidum inſula antiquitati ſuæ reſtituta*, written likewiſe to Ortelius, dated 5 April 1568. (4.) *De Armamentario Romano*. Theſe two laſt are printed at the end of *Hiſtoriæ Britannicæ Defenſio*, written by Sir John Riſe. Lond. 1573. 4to. (5.) *Chronicon Walliæ a Rege Cadwalladero uſq; ad Ann. Dom.* 1295. *MS in Cotton Library under Caligula.* (6.) He alſo tranſlated into Engliſh from the Latin, 1. *The Judgment of Urines*. Lond. 1551. 8vo. 2. *The Hiſtory of Cambria, now called Wales*; afterwards corrected, augmented, finiſhed, and continued, by David Powel, Lond. 1584. 4to. 3. *The Treaſure of Health, containing many profitable Medicines*. Lond. 1585. 8vo. written by Petrus Hiſpanus; to which our author added the cauſes and ſigns of every diſeaſe, with the *Aphoriſms of Hippocrates* (13).—So much was thought proper to ſay of Mr Humfrey Lloyd, by whoſe ſkill and diligence is owing the noble collection of books in the Lumleian library, which being purchaſed by King James I. and repoſited in St James's palace for the uſe of his ſon Prince Henry, was the firſt foundation of what was afterwards called *the King's Library*, and makes now a principal part of the *Britiſh Muſæum* (14).

ſeveral attainments, accompanied with a more polite addreſs than is uſually ſeen in cloſe academical ſtudents, and joined to the advantage of being known to ſome people of high ſtation, to whom he had been occaſionally introduced by the Biſhop of London, brought him into conſiderable repute and eſteem in his ſociety; inſomuch that in 1607, being not above 25 years of age, he was pitched upon as the fitteſt perſon to carry a meſſage upon ſome college-affairs to the Earl of Saliſbury (*i*), then Chancellor of that Univerſity. In 1609, having loſt three of his principal friends [*F*], he entered into holy orders, and to improve himſelf in the gift of preaching took a ſmall living (*k*). In the mean time he had ſucceeded ſo well with his late meſſage to Lord Saliſbury, that he was frequently delegated by the college on the like occaſions to other great perſonages, as to the Lord Chancellor Egerton, and Archbiſhop Bancroft; and his prudent addreſs in diſcharge of theſe truſts proved not more ſerviceable to the college than to himſelf. In 1610 he preached on Luke xvi. 22. before the Univerſity at St Mary's church, with great applauſe, as he did eight months after at Royſton before the King, when Prince Henry being preſent, was ſo much pleaſed with his ſermon, that he promiſed to prefer him. Another time being deputed by the ſociety for their agent to the court, to petition the King for a mortmain, his Majeſty not only granted the ſuit, but was ſtruck with ſomething he obſerved very pleaſing in the ſuitor (*l*), and ſome time after gave him the rectory of Grafton Regis in Northamptonſhire, to which he was inſtituted May 3, 1611 (*m*). At Midſummer the ſame year, he was recommended to be Chaplain to the Lord Chancellor Egerton, who likewiſe at his requeſt excuſed his attendance at York-houſe for the firſt year, that he might not loſe the benefit of the Proctor's place in the univerſity, which office regularly devolved upon him at Michaelmas following, as ſenior of his election in the college (*n*); an advantage that, as is obſerved above, he owed to the King's letter ſent to the ſociety in his favour. Soon after Chriſtmas, the Duke of Wirtemburgh making a viſit to the univerſity, was entertained by the King's orders with an academical diſputation, wherein our Proctor preſiding as Moderator, artfully took care to make his deciſions in the words and upon the authority of the German authors in logic (*o*), which induced the Duke to take him in his coach to Newmarket, and there preſent him to the King, with a particular encomium of his courtly addreſs in thoſe diſputations. The Earl of Saliſbury, Chancellor of Cambridge, dying May 4th this year, the ſucceeding election furniſhed Mr Williams with an opportunity of ſerving the univerſity by the ſhare he then had in the King's favour; which he likewiſe greatly improved by unriddling one of his Majeſty's ænigmatical expreſſions [*G*]: and afterwards being, though junior Proctor, elected Father of the Act, which was honoured with the preſence of many noblemen and gentry, he gave ſo ſumptuous an entertainment, that the Prevaricator, in the humour of thoſe days, ſtyled him *Titus Largius Primus Dictator Romanorum*; and the Act was ſcarce well over, when he was inſtituted to the rectory of Grafton Underwood in Northamptonſhire, at the preſentation of Edward Earl of Worceſter (*p*). Soon after the Commencement he went to London, to perform his duty at York-houſe; but, in ſeven months time, was recalled by the particular requeſt of the univerſity to Lord Elleſmere, occaſioned by a letter received from his Majeſty, giving them notice to prepare for the reception of the Prince Palatine (*q*) in a fortnight's time. Notwithſtanding this ſhort warning, Mr Williams performed his exerciſe, and took his degree of B. D. before the arrival of that Prince [*H*], that he might appear more regularly as firſt opponent in the divinity

(*i*) Hacket, p. 17.

(*k*) Probably Fakenhall, beyond St Edmund's Bury in the confines of Norfolk, for which place he teſtified a kind remembrance after he became Lord Keeper, in applying to Sir Lionel Talmaſh for 100l. to purchaſe 6l. a year for the poor of that pariſh. Ibid. p. 19.

(*l*) K. James told him of it when he became his principal officer of ſtate. Ib. p. 18.

(*p*) Le Neve, as before.—Bp Hacket ſays it was in exchange for another given to that earl by Lord Elleſmere.

(*q*) Upon his marriage with the Princeſs Elizabeth, from which match deſcends the preſent royal family.

[*F*] *Having loſt three of his principal friends.*] Theſe were Biſhop Vaughan, Lord Lumley, and Dr Tho. Playfere. The firſt died in the beginning of the year 1607, the ſecond in 1609. His Lordſhip was buried in the church of Cheam in Surrey, where Mr Williams firſt made his Lordſhip's generoſity to him known to Dr Hacket, who was then miniſter of that place, and gives this Lord the character of a ſcholar, a gentleman, and a chriſtian. The third, Dr Tho Playfere, was Margaret Profeſſor of Divinity at Cambridge, and being Fellow of St John's college, had the chief hand in procuring Mr Williams's preferment there. He died in the latter end of the year 1608; and our author, in a grateful reſpect to his memory, made an elegant Latin ſpeech (15) over his corpſe in the college chapel, from whence it was carried to St Botolph's church in Cambridge, and interred there.

(15) Dr Hacket, who heard it, ſpeaks highly in its praiſe.

[*G*] *He unriddled one of his Majeſty's ænigmatical expreſſions.*] The major part of the univerſity put up the old Earl of Northampton, who being known to be very rich, it was hoped would be induced by this compliment to become a benefactor to that body; accordingly the election was carried for him. But ſome forward perſons there, thinking to make their court to his Majeſty, named the Duke of York (afterwards King Charles I.) which being done ſuddenly, and the Duke being then only twelve years of age (16), there happened to be very few votes for him. When this came to the King's ears, he was much diſpleaſed with the univerſity, eſpecially for ſetting up his ſon without having acquainted his Majeſty with it. Upon this occaſion, no one was thought ſo likely to meet with a good reception at court as our *Prætor*; and being diſpatched thither, was favourably received by his Majeſty, who appeared to be wholly reconciled, upon hearing from him a true repreſentation of the matter: and the Earl of Northampton having declined the offer of the chancellorſhip, in reſpect, as he ſaid, to Prince Charles, the univerſity, in this meſſage, applied to his Majeſty to nominate a fit perſon for their choice; in return to which he ſent orders for them to proceed to a new election, declaring *he would make the perſon elected to hold it*. Here being no explicit deſignation of any particular perſon, the univerſity were ſtill much perplexed how to proceed, till Mr Williams luckily conjectured that the words *he would make them hold it*, muſt needs be pointed to the Earl of Northampton, who had juſt before refuſed to hold it; this interpretation was approved; that Earl was accordingly re-elected; and his Majeſty, as ſoon as he had notice of it, was greatly ſatisfied, and acknowledged *that* was his meaning in the words.

(16) Prince Henry was then Prince of Wales.

[*H*] *He took the degree of B. D.*] As ſoon as he came to Cambridge, he ſtarted this difficulty of his having no degree in divinity; upon which Dr Richards bid him prepare his theſis, and ſhew up his queſtions, and to prevent any hindrance that might be put to it by the King's Profeſſor, Dr Davenant, on account of the ſhort notice, promiſed that, if the queſtions were brought to him but three days before the diſputation, he divinity diſputations performed for the entertainment of his Electoral Highneſs; in which he executed his part ſo well, as to gain thereby the friendſhip and patronage of Dr James Mountague, Biſhop of Bath and Wells, who happened to be preſent; and before the expiration of the year he was admitted into the archdeaconry of Caermarthen [*I*], February 11th. He had not been long with the Lord Elleſmere before he became his principal favourite [*K*], to whom he made himſelf in a manner neceſſary, by an indefatigable induſtry, conducted with the moſt artful addreſs in procuring the beſt and earlieſt intelligence for his ſervice from the court, both of the King and alſo of Prince Henry, whoſe death happening (*r*) within four months after Mr Williams entered upon this office, proved a loſs, which in that view was more ſenſibly felt by him; yet his ready wit ſuggeſted other ways to ſupply theſe uſeful expedients (*s*), the fruits of which were ſeen in the following preferments. December the 29th, 1613, he was inſtalled by proxy Precentor of the cathedral of Lincoln (*t*); and May the 4th, 1614, he was inſtituted to the rectory of Waldgrave in Northamptonſhire, at the preſentation of Dr Richard Neile, Biſhop of Lincoln (*u*). The ſame year, before the 3d of January, he reſigned the archdeaconry of Caermarthen, and was collated to a prebend and reſidentiaryſhip in the church of Lincoln, and to a prebend in thoſe of Peterborow, Hereford, and St David's (*w*); and, beſides all theſe, had a *ſine-cure* in Wales, equal in point of profit to any of his other preferments, being the gift of the Lord Chancellor (*x*) [*L*], by whoſe munificence in the ſpace of five years he likewiſe raiſed himſelf an ample fortune in caſh. Neither was he wanting to his friends while he lived in this ſtation; we are aſſured by Biſhop Hacket (*y*), that he procured from the Chancellor livings for ſeveral clergymen of merit in the univerſity of Cambridge, to whom he likewiſe opened his purſe freely, if wanted. To theſe, as alſo to all others in general that applied to him, he was always ready to give his aſſiſtance in any difficulties of law: Inſomuch that many Biſhops and Chapters of cathedral churches employed him to manage their law-ſuits, being very expert in bringing them to a final termination with the leaſt expence. His ſituation gave him an opportunity of informing himſelf in the buſineſs of his maſter's office, and he improved it by reading books upon that ſubject; in which ſtudy he had the aſſiſtance of Sir John Walker, afterwards Chief Baron of the Court of Exchequer. In the midſt of all theſe employments, he ſtill kept on his rounds in the ſtudy of the Fathers, and eccleſiaſtical hiſtory and antiquities; and in this laſt branch eſpecially he had now the advantage of diſcourſing often with three of the moſt learned men that England ever bred, Sir Henry Spelman, Sir Robert Cotton, and Mr Selden. Toward the latter end of the year 1615, the Lord Chancellor being, through age and infirmities, wholly confined to his houſe, Mr Williams was intruſted by him in carrying meſſages upon buſineſs to the King, who on theſe occaſions took notice, that the chaplain was principled by his maſter to be a ſtateſman and a pillar of the kingdom; and his Lordſhip, a very little before the day of his death, called Mr Williams to him, and told him, *If he wanted money, he would leave him ſuch a legacy in his will, as would furniſh him to live in the world like a gentleman.* Sir, ſaid the chaplain, *I kiſs your hands; you have filled my cap full. I am far from want, unleſs it be of your Lordſhip's directions how to live in the world if I ſurvive you.* *Well*, ſays his Lordſhip, *I know you are an expert workman: Take theſe tools to work with; they are the beſt I have.* So he gave him ſome books and papers written all with his own hand [*M*]. Nor did the chaplain fall ſhort of the preſage of his noble Lord and patron in the uſe of them. However, when

(*r*) He died Nov. 6, 1612. Gen. Hiſt. of England.

(*s*) This is a diſtinguiſhing part of his character. He conſtantly afterwards made uſe of the ſame quickening ſpur on the like occaſions, and valued himſelf upon this part of his wit.

---

he would appear in the room of Dr Davenant. This offer was accepted by Mr Williams, who at the time agreed on gave up the following queſtions. 1. *Peccata ſemel remiſſa nunquam redeant.* 2. *Qui ſacros ordines ſuſceperunt famulari poſſunt magnatibus, ut fructus eccleſiaſticos percipiant.*

[*I*] *He was admitted into the archdeaconry of Caermarthen.*] Dr Hacket tells us (17), that our author gained ſo much by his engaging wit and decent behaviour, at the time of his ſpeaking before Archbiſhop Bancroft upon the college affairs, that two years before he was Bachelor of Divinity, that prelate ſent for him, and of his own free-will gave him the advowſon of an archdeaconry in Wales, Cardigan, ſays he, to the beſt of my remembrance; but Dr Browne Willis, having made ſtrict ſearch into this matter, places him in the archdeaconry of Caermarthen, and ſays he was admitted to it February the 11th 1612, and reſigned it before January the 3d 1614 (18); which agrees with what Dr Hacket obſerves (19) of his being in the Convocation in 1613.

[*K*] *He became Lord Elleſmere's favourite.*] This Lord had been choſen Chancellor of Oxford in November 1610, and he had not been long with him when Dr King, Biſhop of London, uſed pleaſantly to call our Chaplain Chancellor of Oxford; his maſter generally making uſe of his aſſiſtance in the management of all affairs relating to that office (20).

[*L*] *All given him by the Lord Chancellor.*] Mr Le Neve having found (21) in the *Libr. Inſtitut. Petriburg.* that Mr Williams was preſented to Waldgrave by Mr Neile, which was then void by the reſignation of Will. Bate, continues thus: 'I have been the more 'particular in this article, becauſe Mr Philips, p. 43. 'ſays, that his patron (meaning the Lord Chancellor 'Egerton) gave him the parſonage of Waldgrave in 'Northamptonſhire, and by his intereſt got him the 'rectory of Grafton Underwood in the ſame county.' But this ſeeming difference is adjuſted by Dr Hacket, who obſerves, that the Lord Chancellor not chooſing to preſent the ſame perſon to two livings, did, out of the value he had for his chaplain, allow him in this caſe to procure a change with another perſon.

[*M*] *The Chancellor gave him MSS of his own writing.*] Biſhop Hacket, who ſaw the notes, informs us, that they were his Lordſhip's own collections for the well ordering of the high court of Parliament, the court of Chancery, the Star-chamber, and the Council board (22); ſo, ſays the Biſhop, he had a good ſtock to ſet up with, and I don't doubt but the marrow of Mr Williams's politics was drawn from the Lord Egerton's papers. The Biſhop likewiſe, by way of confirmation, mentions ſeveral rules, concerning the conduct of the judges in theſe courts, and eſpecially in Chancery, in theſe MSS, which were obſerved by our Keeper (23). This great and good patron dying March 15, 1616, his chaplain attended his corpſe to its interment among his anceſtors in Cheſhire, and mourned for him long after (24).

his

his ſucceſſor to the great ſeal, Sir Francis Bacon, who knew Mr Williams's merit [*N*], made him an offer to continue him in his former ſtation at York-houſe, he declined it, but accepted the office of a Juſtice of Peace of the *Quorum* in Northamptonſhire, which was given him by the new Keeper. He was preparing for his journey, when his friend Dr Montague, now Biſhop of Wincheſter (*z*), preſented him to his Majeſty, who appointed him his Chaplain in ordinary, with a command to attend upon him in his northern progreſs, to begin in April following; and the King told him pleaſantly, *that he might expect the labourer's penny as ſoon as they who had ſerved him longer.* But the Biſhop obtained of his Majeſty that Mr Williams might ſtay to take his Doctor's degree, and give entertainment to Marco Antonio de Dominis, Archbiſhop of Spalato, who was newly come to England, and deſigned to be at Cambridge commencement the next July, 1617, when Mr Williams accordingly commenced D. D. (*aa*) and immediately after went to reſide at his rectory of Waldgrave [*O*], which, by building, gardening, and planting before he came, he had made a very pleaſant ſituation. Here he lived in the greateſt hoſpitality, without neglecting to diſcharge faithfully the duties of a good pariſh prieſt. However, his chaplain's place requiring him to take the courſe of his attendance at court, he preached a ſermon (*bb*) before the King, at Theobalds, in 1610, which was printed by order of his Majeſty, who the ſame year, being upon his northern progreſs, collated him, September 10th (*cc*), to the deanery of Saliſbury, void by the death of Dr Gordon. This was the firſt ſtep to which no hand helped him but the King's (*dd*) [*P*]; for he had hitherto judged it imprudent to make his court to the Marquis of Buckingham [*Q*], both on account of the unlikelihood there was that ſo great a favourite ſhould hold his ſituation long without a fall, in which caſe he ſhould think himſelf obliged in honour to follow his fortune; and likewiſe by reaſon of the fickleneſs of that favourite's temper in particular. But he had not been long poſſeſſed of this deanery [*R*], when being

(*z*) He had been confirmed in that biſhoprick, Oct. 3. preceding.— Le Neve, vol. 1. p. 95.

(*aa*) The queſtions which he maintained for this degree were, 1. 'Supremus magiſtratus non eſt excommunicabilis.' 2. 'Subductio calicis eſt mutilatio ſacramenti & ſacerdotii.' The firſt againſt the Puritans, the ſecond againſt the Papiſts.

(*bb*) On Matth. xi. 8.

(*cc*) He was inſtalled in the middle of October following. Le Neve, vol. 2. p. 161.

(*dd*) Bp Montague died the 19th July that ſummer.

[*N*] *Sir Francis Bacon knew Mr Williams's merit.*] Bacon, then Attorney General, made frequent viſits to his predeceſſor in the laſt ſtage of his life; and though Lord Elleſmere might make him the compliment of wiſhing him to ſucceed to the ſeals, yet the Attorney, it can't be denied, ſhewed himſelf very forward (25) in that point, which could hardly eſcape the knowledge of Mr Williams, who, as has been obſerved, kept ſo good a watch upon every thing relating to his patron; and this extraordinary eagerneſs ſeeming to imply a wiſh at leaſt that his predeceſſor was out of it, might well give Mr Williams ſome diſguſt, and be one motive for refuſing the offer of being his chaplain.

[*O*] *He went to his rectory of Waldgrave.*] He had made this place fit and pleaſant for all ſeaſons of the year; and he provided a choice collection of books, to which he applied himſelf very cloſely, that nothing but the great temperance in his diet (26) could have preſerved his body from the decay that this intenſe ſtudy muſt neceſſarily have brought upon him. He read prayers conſtantly upon Wedneſdays and Fridays, expounding the Catechiſm in Lent, and upon the holidays, and preached duly twice every Sunday at Waldgrave, or at Grafton; performing his turn too at Kettering, a market town hard by, in a Lecture ſupplied by the beſt divines thereabout. It was a common ſaying of his, that the beſt way to get credit with the Nonconformiſts, was to outpreach them; and ſo well was his preaching liked, that his church uſed to be thronged with gentry of the neighbouring pariſhes as well as his own. However, the moſt remarkable thing of him while he reſided here, was his ſumptuous houſekeeping, which brought him great numbers of viſitants among the nobility and gentry, and both rich and poor clergy, who reſorted frequently to his houſe, not ſo much for the ſake of his table, as for the diverting entertainments of his good concerts of muſic; for he kept with him the beſt voices and inſtruments he could get, being extraordinary fond of this kind of entertainment, in which he was able to bear a part himſelf. And as by theſe means he obliged the gentry, ſo he purchaſed the prayers of the poor by his charity, being conſtant in viſiting the poorer pariſhioners; in their ſickneſs praying with them and bleſſing them, ſupplying them alſo with money, and very often paying their apothecaries bills. He was alſo much reſpected and beloved in his office of juſtice of the peace, by his reſolved courage in maintaining the rights of the clergy, and by reconciling private quarrels among his neighbours, even at the expence of ſometimes paying all, or good part at leaſt, of the damages demanded by the injured perſon (27).

[*P*] *To which no hand helped him but the King's.*] Mr Le Neve relates this matter thus: Though many ſtirred in it, yet the King put them all by, ſent for Dr Williams, and gave it him; to which he was collated and inſtalled, as above: and hereupon (continues he) ſays the Oxford Antiquary, vol. I. p. 803. he reſigned the ſacerdotal rectory of the Savoy, which was conferred on the Archbiſhop of Spalato. The firſt volume of Wood's Athen. Oxon. is here referred to, which volume, at leaſt in the ſecond edition, does not contain ſo many pages. And the ſame antiqary informs us, in vol. II. p. 76. that the Archbiſhop of Spalato was poſſeſſed of that place long before. It ſeems this Archbiſhop having heard Mr Williams perform his exerciſe for his doctor's degree at the Cambridge commencement, went thence to Oxford, where he heard Dr Daniel Fairclough, or Featly, keep a diſputation for his doctor's degree, when he puzzled Prideaux, the King's Profeſſor, ſo much, that a quarrel was raiſed between the diſputants, which the Archbiſhop of Canterbury (28) was in a manner forced to compoſe, for his chaplain's ſake. The Archbiſhop of Spalato being alſo preſent at the diſputation, was ſo much taken with Featly's arguments, that he forthwith gave him a brother's place in the Savoy-hoſpital near London, he being then Maſter thereof.

[*Q*] *He thought it imprudent to make his court to Buckingham.*] I can't help thinking that theſe prudential reaſons alledged to his friend Dr Hacket by our author, might owe their birth to a certain diſguſt which he took to the Marquis, from what he muſt have obſerved of that favourite's behaviour with reſpect to Lord Elleſmere. For though Sir Anthony Weldon's cenſures (29), that Buckingham, in order to vex the very ſoul of the Lord Chancellor Egerton, ſent Bacon to him for the ſeal, and that the dying Chancellor hated that Bacon ſhould be his ſucceſſor, are both abſolutely falſe in fact, yet theſe falſehoods were no doubt raiſed upon the credit of the Marquis's known diſlike of the Chancellor; and nothing can be more certain in hiſtory, than that the Attorney General was encouraged by the Marquis in treading ſomewhat indecently, as he did, upon Egerton's heels long enough before his death.

[*R*] *He had not been long poſſeſſed of that deanery.*] He very rarely went to Saliſbury, on account of ſome inconveniences which he met with there. The Reſidentiaries of that church, through the indolence of his predeceſſor, had got poſſeſſion of more power than he thought was their right; and finding he ſhould unavoidably, if he lived among them, be drawn into ſome conteſts, he choſe to give no occaſion for ſuch by keeping away; and no doubt he was confirmed in this purpoſe by the proſpect which was preſently offered to him of a ſpeedy removal by the favour of the Marquis of Buckingham. It was while he held this deanery, that he employed Mr John Lamb, a Proctor, in two cauſes that were brought into the ſpiritual court at that time; and being pleaſed with his management,

(25) See ſeveral letters in the 4th vol. of Lord Bacon's works, ed. 1730. folio.

(26) To which muſt be added a conſtitution able to go through the greateſt fatigue in that way.

(27) Philips, p. 255. & ſeqq.

(28) Namely Abbot, whoſe domeſtick chaplain Featly then was, as well as Rector of Lambeth.

(29) Court and Character of K. James, p. 115, edit. 1651.

being in waiting upon his Majeſty then at Royſton, in the abſence of the Marquis, the King abruptly, without any relation to the ſubject then in diſcourſe, aſked him, *when he was with Buckingham? Sir*, ſaid the Doctor, *I have had no buſineſs to reſort to his Lordſhip. But*, replied the King, *whereſoever he is, you muſt preſently go to him on my meſſage.* On the delivery of this meſſage the Doctor being graciouſly received by the Marquis, determined to comply with the King's pleaſure thus intimated to him; and ſoon engaged the Marquis's beſt regards by ſmoothing a rub, which the Marquis had met with, in ſolliciting his match with the Earl of Rutland's daughter [*S*]. After this can it be ſurprizing to find Doctor Williams making a very quick progreſs to the height of all that could be in his utmoſt ambition? Accordingly the deanery of Weſtminſter becoming void this year, he eaſily obtained it of his new patron [*T*]; and gladly quitting Saliſbury, was inſtalled into this, July 10th or 12th, 1620 *(ee)*. This place was very agreeable to his humour, and he greatly improved both the church, the college, and the ſchool [*U*]. While he was thus employed, Chancellor Bacon being deprived of the great ſeal, for corruption, in May 1621 *(ff)*, the Maquis of Buckingham, a few days after, deſired the Dean to draw up in writing a ſtate of the juſt profits of that place; which being readily

(ee) Le Neve, ubi ſupra.

(ff) The letter diſmiſſing him is dated on the 6th of that month.

ment therein, he took him into his favour. This was very lucky for Mr Lamb: for when ſeveral complaints of extortion were brought ſome time after againſt him, and being ſigned by all the juſtices of the county, were intended to be laid before the houſe of Commons, his friend Dr Williams not only prevented that deſign, but when the Proctor got poſſeſſion of a higher office in the ſpiritual court, this friend procured him a doctor of law's degree at Cambridge, and likewiſe the honour of knighthood from his Majeſty (30).

(30) Hacket, part i. p. 37. The reaſon of taking this notice of Lamb here will be ſeen hereafter.

[*S*] *Sollicited his match with the Earl of Rutland's daughter.*] That old Earl at this juncture, was much offended with the Marquis, who he thought puſhed the match with more boldneſs than the reſpect due to his daughter, conſidering the very great fortune he could give her, fairly demanded. Here the Dean of Saliſbury ſtept in, and by his engaging wit and decent behaviour preſently reconciled the Earl to the King's firſt favourite, which was the eaſier effected, as the Dean found the Lady's affections already ſecured; beſides Waldgrave was not beyond the bounds of the Earl's neighbourhood, and the Rector was well known and eſteemed by him. He likewiſe removed another obſtacle which ſtuck with his Majeſty in the way of this match on account of this heireſs's religion, and brought her Ladyſhip from the church of Rome into the faith and profeſſion of the church of England; and to confirm his convert, he afterwards inſcribed a letter to her, containing the elements of the true religion (31). However, after the Marquis's death, ſhe returned to the church of Rome §.

(31) There were 12 copies printed, but without his name, only, By an old prebend of Weſtminſter. Dr Hacket had one copy, and once deſigned to inſert it at the end of his life; but it ſeems afterwards changed his mind, for no ſuch thing appears there.

§ See the article of the duke her firſt conſort.

[*T*] *He eaſily obtained it of his patron.*] Dr Hacket has given a copy of the letter he wrote to the Marquis on this occaſion.

[*U*] *He improved the college, the church, and the ſchool.*] His ambition was to emulate two of his predeceſſors, who were very eminent men in their time, namely Dr Lancelot Andrews, for his great care and encouragement of learning in the ſchool, and Abbot Iſlip, for his vaſt expences upon the minſter. As ſoon as he was poſſeſſed of the deanery, there ſcarce paſſed a week, when he was in the college, that he did not go to the ſeveral claſſes, and inſtruct the lads, and take an account of them, that ſo he might countenance and encourage the moſt hopeful and thoſe of the beſt parts (*a*); which notice of his ripened the youth ſo faſt, that the number ſent out to both univerſities was almoſt double to thoſe that had been removed in former elections. In repairs of the abbey, he new-covered the whole body of it, in which he expended 4500 l. of his own money; beſides this, he procured the beſt muſic both for organ and voices that was then poſſible to get. After this, he made a good library out of a waſte room on the eaſt ſide of the cloyſters, and purchaſed the celebrated Mr Becket's books, of Highgate, at the ſum of 500 l. with which he furniſhed his new library, having built deſks to receive them. To theſe he added ſeveral choice manuſcripts and books of his own collecting. And thirdly, as to the college, he diſcharged a debt of 300 l. that had been incurred chiefly through the great increaſe in the price of victuals, which in leſs than ten years had been raiſed to a double proportion. Not long after, he founded four ſcholarſhips; the ſcholars to be diſtinguiſhed from the reſt by *violet* gowns, for whoſe maintenance he purchaſed lands. And he did not ſhare his riches among them here, but likewiſe when in theſe days a great part of the liberties of the city were threatened to be cut off by the encroachment of the Lord Steward of the King's Houſhold and the Knight Marſhal, he withſtood them ſtoutly, and would accept of no compoſition to let them ſhare in the privileges which they never had by right, but preſerved the charter of the place intire in its juriſdiction and ancient immunities (32).

(32) Philips, p. 230.

(g) Reckoned worth between 3 and 400 l. a year.

(*a*) This advantage brought ſeveral boys to the ſchool, and among others Mr Edward Rainbow, afterwards Biſhop of Carliſle, an exemplary prelate, whoſe worth deſerves particular notice. He was born April 20. 1608, at a village called Bliton, on the Lindſey coaſt in Linclonſhire, near Gainſborough, where his father (*a*) was then Rector; and having contracted a friendſhip with Dr Williams, ſent him from the free-ſchool at Gainſborough, April 1620, to Peterborough, to be one of the ſcholars of our Dean, who was then a prebendary of that church (*b*); and upon the Dean's promotion to Weſtminſter, Mr Rainbow was ſent to that ſchool, in June 1621; whence, in July 1623, he was removed to Corpus Chriſti college in Oxford (*c*); but in 1625 tranſplanted to Magdalen college in Cambridge, to a ſcholarſhip there founded by Sir Chriſtopher Wray, ſometime Lord Chief Juſtice of England *(d)*. Here having taken both his degrees in arts, he accepted the offer made to him by Sir John Wray to teach a free-ſchool at Kirton, near Bliton, in 1730; but in a little time left that employment, and went to London, where being in holy orders, he officiated three months at Lincoln's Inn; but miſſing the chaplain's place there, was made curate of the Savoy, in June 1633; but on an invitation to come to his college, he returned thither, and was pre-elected a Fellow in November this year, and in 1634 was made actual Fellow. In September the ſame year, he preached at Paul's Croſs; he likewiſe preached before the univerſity, always to a crowded audience; and once, on the failure of the preacher appointed, he went up at the requeſt of the Vicechancellor, and made an extempore diſcourſe to the admiration and ſatisfaction of the audience. In 1635, he began to take pupils *(f)*, and was among others tutor to two ſons of Lord Daincourt, and the two ſons of Theophilus Earl of Suffolk. This brought him into the acquaintance and friendſhip of that Earl, and alſo with the families of Northumberland, Warwick, and Orrery; and Dr Smith, Maſter of the college, dying in 1642, he was preſented by James then Earl of Suffolk, who had been his pupil, to that maſterſhip, in 1642. He commenced D. D. in 1646, but was deprived of his place at Magdalen, for refuſing the proteſtation, or *engagement*, in 1650; after which he was preſented by the Earl of Suffolk to the ſmall living of Little Cheſterton, near Audley Inn, in 1652; and the ſame year he married Elizabeth, daughter of Dr Smith, his predeceſſor in the college. He never ſubmitted to be confirmed by the parliamentary Triers; and in his church uſed a form of prayer compoſed out of thoſe in the liturgy, which the people not knowing, were well pleaſed with; and as he excelled in the pulpit, and catechiſed and inſtructed his flock at their houſes, even procuring their attendance by giving money to the indigent, he was greatly beloved in the pariſh. However, he was called away in 1659 to the rectory of Benefield in Northamptonſhire *(g)*, by the preſentation of the Earl of Warwick, who ſent it to him with an aſſurance that he might hold it without going to the Triers; which favour was procured by the Lord Broghill, and he poſſeſſed it quietly till the Reſtoration, when he was reſtored to his maſterſhip, and made chaplain to King Charles II. in 1660, and Dean of Peterborough the following year. In 1662 he was choſen Vice-chancellor of Cambridge, when he procured for his college a turn in the proctorſhip of the univerſity every ninth year (*b*). He was advanced to the biſhoprick of Carliſle in 1664 (*i*), vacant by the tranſlation to the ſee of York of Dr Stern, with whom he was unavoidably involved in a long law-ſuit for dilapidations, during which he had an offer of being tranſlated to the ſee of Lincoln, by Archbiſhop Sheldon, in 1660; but the deſign miſcarried through the oppoſition of Lady Frances Howard, with whom he had ſome acquaintance and a juſt reſpect before her proſtitution (*k*); but after that, he refuſed all the offered civilities from her; which ſhe reſenting, hindred his removal to Lincoln: ſo that he continued nigh twenty years at Carliſle, in the exemplary exerciſe of all the duties of his function, till his death, which was occaſioned by the gout in his ſtomach, March 26, 1684. He was interred in Dalſton church-yard, April 1. following *(l)*.

(*a*) He was a perſon of learning and virtue, and bred at Chriſt College, Cambridge.

(*b*) Mr Williams took ſcholars at that time.

(*c*) His elder brother was then a fellow there.

(d) That family were particular friends to his father, and Mr Edward Wray was our author's godfather.

(*e*) This ſermon, with two others, are all that were printed of his writings.

(f) He had acquired great reputation in the univerſity, particularly by a *Tripos*-ſpeech ſpoken extempore on another's being ſilenced for his ſcurrility.

(*b*) By the former rule this office came to the college only once in 44 years.

(i) He was conſecrated in July that year by Archbiſhop Sheldon, who afterwards made him an offer of the ſee of Lincoln, but was over-ruled in that deſign.

(*k*) See an account of this infamous lady, in the article of Sir Tho. Overbury.

(l) This account of Biſhop Rainbow is taken from the hiſtory of his life, edit. 1688. 8vo. to which we muſt refer the reader for more particulars of his exemplary behaviour.

com-

complied with, when the account was peruſed by his Majeſty [*W*], he preſently concluded the author of it to be the fitteſt perſon to execute that great truſt; and accordingly the Dean was ſworn, June 10 following, Lord Keeper of the great ſeal [*X*]; and before the end of that month, was nominated to the biſhoprick of Lincoln, to which he was conſecrated, November 11 (*gg*); and he afterwards prevailed, though not without ſome difficulty, to hold the deanery of Weſtminſter in commendam [*Y*], to which was alſo joined his rectory of Waldgrave, together with the reſidentiaryſhip of Lincoln, and the prebend of Aſgarvey in that church (*hh*). In accepting the Keeper's office, he requeſted and obtained of the King, that the ſeal ſhould not be taken from the Commiſſioners and put into his hands before

(*gg*) Le Neve, p. 161. The congé d'elire is in Rymer's Fœdera, vol. 17. p. 325. upon which he was elected the 3d of Aug.

(*hh*) Wharton's defence of pluralities, p. 13. ed. 1692. 8vo.

[*W*] *The account was peruſed by his Majeſty.*] Some perſons in high ſtation, encouraged by Lord Chancellor Bacon's ſcandalous corruption, were aiming at this time to lop off ſome branches of the juſt perquiſites of the great ſeal; whereupon the King ſet Buckingham to enquire what were the true ancient profits of it. He applied for this purpoſe to Sir Lionel Cranfield, then Maſter of the Wards, who adviſed with our Dean— *A ſudden man*, ſays he, *and ready*; *not apt to clap the ſhackles of delay upon a buſineſs.* He being ſpoke to, and begged to be quick, drew up in writing what he thought of this caſe, and returned the following anſwer immediately on the 10th of May. 'Although the more I examine myſelf, the more unable I am made, to my own judgment, to wade through any part of that great employ which you have vouchſafed to confer with me about; yet becauſe I was bred under this place, and that I am informed my true and noble friend, the Maſter of the Wards, is willing to accept of it (and if it be ſo, I hope your Lordſhip will incline that way) I beg leave to acquaint your Honour, by way of prevention, with ſecret underminings, which will overthrow that office, and make it beggarly and contemptible. The lawful revenue of that office ſtands thus, or not much above at any time, in fines certain 1300 l. or thereabouts, in fines caſual 1250 l. in greater rates 140 l. in impoſt of wines 100 l. In all 2790 l. and theſe are all the true means of that great office.

'Now, I am informed, the Lord Treaſurer begins to intitle the King to the caſual fines and the greater rates, which is a full moiety of the profits of the place, not ſo much to enrich the King, as to bring griſt to his own mill, and to wind from the Chancellor the donation of the Curſitor's places: The preventing the Lord Treaſurer in this caſe made Queen Elizabeth even reſolve ſuddenly upon the diſpoſing of the great ſeal. Likewiſe they are very buſy in the Houſe of Commons (and I ſaw a Bill which is put up to that effect) to ſettle the *Cuſtodes Rotulorum* and the Clerks of the Peace for term of life upon the perſons who now poſſeſs them, which as it is inconvenient, ſo it is very prejudicial and derogating from the next Lord Chancellor. Finally, the under officers have alſo made a petition unto the Lords, and not without encouragement, to have ſome collops of the Chancellor's office; and new devices will daily ſpring up, if the diſpoſing be delayed any longer. Now, I hope, when your Lordſhip ſhall ſee this information, to let the King ſee it, that you will excuſe me for the boldneſs that I am put upon by your great commands.'

We have given this letter, as it is a moſt conſpicuous inſtance of the value of Lord Elleſmere's tools, and likewiſe of the ſkill and abilities of the workman. Upon reading it, King James preſently obſerved, that Queen Elizabeth was inclined in her own judgment that Archbiſhop Whitgift ſhould take the place; who refuſed it on account of his great age, and multitude of eccleſiaſtical offices. But *Whitgift knew not half that this man doth in reference to that office* (33).

(33) Hacket, part 2. p. 83.

[*X*] *He was admitted July 10th following.*] That the ſkill of this workman may be ſtill more conſpicuouſly evident, it will not be amiſs to ſet before the reader his ſpeech that day in Council on this occaſion, wherein will be ſeen how admirably well he hit King James's humour. 'If I ſhould think myſelf,' ſays he, 'worthy or ſufficient for this great place wherein your Majeſty is pleaſed to make probation of me, I were the moſt unworthy and inſufficient wretch in all the world; but in good faith I do not, but am as conſcious of my own weakneſſes as aſtoniſhed at your Majeſty's favour and goodneſs. I do not therefore trouble my head to find the reaſon of this advancement, becauſe I take it for no ordinary effect, but an extraordinary miracle; *Deus & qui Deo proximus tanta munera diſpertit arbitrio & beneficiorum ſuorum indignatos per homines ſtare judicium mavult de ſubditis dediſſe miraculum.* I muſt only lift up my eyes to heaven, and beſeech that God, who ſome ten years ago brought me like Eliſha to be ſervant only unto this Elias, who, under God and your Majeſty, was the chariot and horſemen of our Iſrael, that he would be pleaſed to double the ſpirit of Elias upon his ſervant Eliſha, whom your Majeſty hath thus inveſted with his robe and mantle; and for my eſpecial direction I will take up with that counſel which Plato gave his friend Maximus, while he was exalted Prætor for Achaia, *Meminiſſe oportet officii tituliq;* I will never forget my office and title. I am deſigned to be a probationer in this place, and as a probationer, by God's grace, I will demean myſelf. I will take up together with this ſeal, that induſtry, integrity, and modeſty, *non ut me Conſulem, ſed ut conſulatus candidatam putem*; and ſo I will eſteem myſelf not a *Keeper*, but a *Suitor* only for the great ſeal: and if I feel the burden too heavy, which I much fear and ſuſpect, I will chuſe *potius deſinere quam deficere*, and ſlip it off willingly to ſome abler ſhoulders, rather than be cruſhed in pieces with the weight of the ſame. I humbly beſeech your Majeſty to remember I am no more than a mere probationer. If I prove aukward at firſt, I muſt have my time to learn; the beſt of them all have craved as much, and I will deſire no more: for if, after the full weighing of my ſtrength, I ſhall find myſelf unable for this ſervice, I will ſay unto your Majeſty as Jacob ſaid to Pharaoh, *Paſtor ovium eſt ſervus tuus*; whatever you are pleaſed, Sir, to make me, I am but a keeper of ſheep. In that calling your Majeſty found me, and to that calling I ſhall never be ſorry to betake myſelf again. In the mean time, I beſeech your Majeſty to protect this court of juſtice wherein you have placed me, that the ſtrength and power of that body be nothing impaired through the weakneſs of the head; *nemo adoleſcentiam meam contemnat.* Let not my fellows of another profeſſion cry out with him in the Pſalms, *There, there, ſo would we have it! neither let them ſay, we have devoured him.* And ſo I end with my prayers unto God, that your Majeſty may live long, and myſelf no longer than I may be ſerviceable to your Majeſty (34).'

(34) Cabala, p.

[*Y*] *To hold the deanery of Weſtminſter in commendam.*] The King was on his progreſs at Retford in Nottinghamſhire (35), to whom our Dean wrote a letter, repreſenting that the deanery might well be looked on as part of the Lord Keeper's place, ſince it would ſave his Majeſty the expence of a houſe for him; that he was there provided with ſome articles of houſekeeping, as bread, beer, corn, and fuel, which otherwiſe would coſt the King 1600 l. per ann. ſince he muſt otherwiſe crave for ſome addition out of the King's own means, as all his predeceſſors in that office had done; beſides the very name and countenance of the place would take away all expectation of extraordinary entertainment; that it was but a ſtep from where his buſineſs lay, and afforded him marvellous quietneſs to turn over his papers; and, ſays Dr Hacket, he might have added, (for it was in the bottom of his breaſt) that he was loath to ſtir from a ſeat, where he had the command of ſuch excellent muſic. He prevailed; and thereby unluckily brought on his own downfall. For Dr Laud, who now held a prebend in this church, had ſet his eye upon the deanery (36); and being diſappointed, found means in leſs than three years to get poſſeſſion of that place, in Buckingham's favour, which before was held by Williams, who ſeems to have been aware of this rival for the deanery. At the Marquis's ſuit, who had been repulſed, he ſollicited hard with his Majeſty to confer the biſhoprick of St David's upon Laud; to which at laſt the King with much ado yielded, but told the ſuitor, he would live to repent it (37).

(35) Hacket, part 2. p. 91.

(36) That prelate writes thus in his diary: "His Majeſty gave me the grant of the Biſhoprick of St David's; the general expectation was in court that I ſhould have been made Dean of Weſtminſter, and not Biſhop of St David's.

(37) Hacket, p. 48.

ten

ten months were over, that he might have time to ſtudy and weigh the truſt of his office; to which purpoſe he kept Sir Henry Finch, a moſt profound lawyer, in his lodgings from May to October, to adviſe with him upon all occaſions. By that means he had time to look out for honeſt and able ſervants to fill the chief places of truſt under him. He requeſted his Majeſty likewiſe that he ſhould be in the nature of a probationer for one year and a half; that in the court of chancery he might have a Maſter of the Rolls of great knowledge to ſit with him, and laſtly, the conſtant aſſiſtance of two judges. He did not appear in court till the end of Michaelmas term *(ii)* [*Z*], when he made a ſpeech, wherein he laid down ſeveral rules which he reſolved to obſerve in the diſcharge of that office [*AA*]. And after ſome time that paſſed in obtaining experience, the court of Chancery was never better ordered [*BB*], his decrees were generally approved, and his diſpatch was ſo extraordinary, that his enemies made it an objection to him [*CC*]. He had not been above two months in this poſt, when he redeemed an eſtate belonging to his family from William Earl of Pembroke, at the price of 10,000l. *(kk)* The ſame year, at the inſtance of Buckingham, his preſent patron, whoſe ſuit for the purpoſe had been rejected, he petitioned and prevailed with his Majeſty to promote Dr Laud, then one of his prebendaries at Weſtminſter, to the Biſhopric of St David's. This year he likewiſe procured Mr Selden's releaſe from priſon ‡ [*DD*], and afterwards gave him the Regiſtry

(ii) The ſeal was delivered to him Oct. 9. then the firſt day of term. D'Ewes Life of Lord Bacon, p. 58.

(kk) Dr Hacket obſerves, that this purchaſe ſo ſoon after he became Lord Keeper, could not be raiſed from the profits of that place.

‡ See Selden's article, Remark [*M*].

[*Z*] *He began to ſit in the court in Michaelmas-term.*] Probably not till the meeting of the parliament in November, in which he was obliged to appear, as Speaker of the Houſe of Lords. Beſides the ordinary buſineſs in Chancery, he had ſeveral cauſes, which were referred in the preceding ſeſſion of parliament to the ſucceeding Lord Keeper, to view the orders of his predeceſſor diſplaced. And his buſineſs at this time was ſo great, that he was obliged to ſit by candle-light in the court two hours before day, and to remain there till between eight or nine, and then to repair to his office in the Houſe of Lords, till twelve or one every day; after a ſhort repaſt at home, he returned to hear the cauſes in chancery, which he could not diſpatch in the morning; or if he attended at council in Whitehall, he came back towards evening, and ſat in chancery till eight at night and later; after this, when he came home, he peruſed the papers that were brought to him from the Secretary of State's office, and when that was done, though late at night, he prepared himſelf for the Houſe of Lords the next morning. All who lived in his family knew, that it was ordinary with him to begin his ſtudies at ſix at night, and to continue them till three in the morning, and be ready again by ſeven to attend his employment. It is almoſt incredible what fatigue he went through at this time; and, notwithſtanding the uncommon ſtrength of his conſtitution aforementioned, he was ſeized, after this term was over, with a fever and flux, which however was cured by the ſkill of the famous Dr Harvey (38).

(38) Idem, p. 7. 53, 54, 56.

[*AA*] *Some rules in the diſcharge of that office.*] Theſe were, 1. *Never to make any decree, that ſhould croſs the grounds of the common or ſtatute law.* 2. *Never to encourage any motion made at the bar, which did not apparently tend to further and haſten the hearing of the cauſe.* 3. *That without ſpecial motives he would not overthrow the decrees of his predeceſſors.* 4. *To be as cautious as poſſible in referring cauſes, becauſe it deferred the hearing of them.* 5. *That the court ſhould be no ſanctuary for indiſcreet and deſperate ſureties. Laſtly, That he would follow the rules of the court, as nearly as poſſibly he could* (39).

(39) p. 12, 13.

[*BB*] *The court of Chancery was never better ordered.*] At his firſt entrance upon Chancery, one at the Bar, thinking the Lord Keeper, as a novice, might be ignorant of the terms of the common law, troled out a motion, crammed, like a grenado, with obſolete terms; imagining that with thoſe miſty phraſes he ſhould baffle the new judge. But the Keeper, with a ſerious face, anſwered him with a cluſter of crabbed notions picked out of logic and metaphyſics; ſo that the Counſellor being foiled at his own weapons, and well laughed at in the court, went home with this leſſon, that *he who tempts a wiſe man in jeſt, ſhall make himſelf a fool in earneſt* (40). He made it his buſineſs to prevent all immethodical pleadings, to check excurſions, and hold the counſel cloſe to the point. Immediately upon the opening of a bill, he would direct the pleaders, and ſuffer them only to ſpeak the very weight of the cauſe; and he grew ſo ſkilful in two terms, that the counſel at the bar, who were men of worth and judgment, approved of him very much: yet ſtill he was apt to be ſometimes too much carried away by paſſion; but after he had ſpent three years in it, he was not at all inferior to the beſt judges for ſufficiency to manage his place: in this time experience having mellowed the natural heat of his temper, it was obſerved that he had obtained a very great command over his paſſion, which at firſt was objected to him, and he carried all things with a mild and gentle hand; would chide little, and bear much. The ſame author (41) took pleaſure in ſaying that the Lord Keeper Williams had the moſt towering ſublime wit that he ever heard, and that his decrees in all cauſes were juſt; that the Lord Coventry, his ſucceſſor, ſeldom altered any thing which he had ſettled before, except upon new preſumptions; and that he always ſpoke of him in court very honourably.

(40) p. 75, 76.

(41) Mr J. Evelyn, one of the 6 clerks in the keeper's time, and the ableſt man of the office, as ſays Bp Hacket.

[*CC*] *His diſpatch was objected to him.*] How excellent he was for diſpatching buſineſs, take this account which he gives of his firſt year, in a letter to the Marquis of Buckingham, dated July 10, 1622. 'In this place I have now ſerved his Majeſty one 'whole year diligently and honeſtly, but to my heart's 'grief, by reaſon of my rawneſs and inexperience, 'very unprofitably. Yet if his Majeſty will examine 'the Regiſter, there will be found more cauſes finally 'ended this year, than in all the ſeven years pre'ceding; how well ended, I confeſs ingenuouſly, I 'know not: his Majeſty, and your Lordſhip, who 'no doubt have received ſome complaints, though in 'your love you conceal them from me, are in that 'the moſt competent judges (42).' Sir Arth. Weldon tells us, that though Williams wanted much of his predeceſſor Bacon's abilities for the law, yet did he equal him for learning and pride, and went beyond him in the way of bribery; this man anſwering by petitions, in which his ſervants had one part, and himſelf another, and ſo was calculated to be worth to him and his ſervants 3000 l. per ann. by a new way never found out before (43). In anſwer to this, Biſhop Hacket obſerves, That it is true it was objected to him, that he diſpatched a great many cauſes by hearing petitions in his chamber; and this he did for the relief of the poor, from whom he could make no advantage either to himſelf or to his ſecretaries: but he is not the firſt who has been accuſed of his good works. Therefore the Lord Keeper, to ſecure himſelf from miſrepreſentations, directs two remonſtrances, the firſt to Buckingham, September 8th, the other to his Majeſty, October 9th, 1622. In that to the Marquis, he proteſts, that he was obliged to allow 20l. a year to a youth in his chamber, to take care of the poor mens petitions, the ſecretaries did ſo neglect them. In that to his Majeſty he declares, that in all orders upon petitions he had obſerved the caution which he had received from him. 'Then,' ſays he, 'I humbly 'crave your Majeſty's opinion, whether I may go on 'in this way; for what reaſon have I to overtoil my'ſelf in eaſing the purſe of the ſubjects, if it be ob'jected as a crime againſt me, and be not a ſervice 'acceptable to your Majeſty and the realm?' So the King approved of his proceedings. This ſlander as it troubled him very much, ſo was he very diligent to clear himſelf from it, as appears not only from theſe remonſtrances, but alſo from a letter of his at the ſame time to the Duke, printed in the Cabala, p. 292.

(42) Hacket, p. 201.

(43) Court and character of K. James, p. 129, 130. ed. 1651.

[*DD*] *He releaſed Mr Selden.*] Mr David Wilkins tells us (44), that this diſcharge was owing to the intereſt

44) In the life of Selden, prefixed to his works in 1726, ſix vol. fol.

Regiſtry of Weſtminſter College. He ſecured the rights of the Biſhops againſt the attempts of the Earl of Eſſex [*EE*]. He did not approve of the Prince [Charles] going to Spain for the Infanta; and during that negotiation ventured to give the Marquis a piece of advice which that favourite never forgave [*FF*]. From this time the Keeper was narrowly watched; notwithſtanding which, all the power of that abſolute minion was foiled in attempting to diſplace him, after his return from Spain [*GG*]. For the King was ſo well ſatisfied with his conduct in that affair, that during the Chriſtmas holidays in 1623-4 he entered him into the council-book to ſucceed upon the next vacancy to the Archbiſhoprick of York [*HH*]. Not long afterwards the Keeper by an artful ſtratagem luckily diſcovered the intrigues of the Spaniſh ambaſſador [*II*] againſt the Marquis. In 1624 he prevented

tereſt of Dr Andrews, Biſhop of Wincheſter. But Dr Hacket aſcribes it to our author (45), and produces a letter which Mr Selden wrote to him with that requeſt, wherein he denied that he had given his approbation of that power of judicature lately uſurped by the Houſe of Commons. With reſpect to the Regiſter's place, as our Dean knew Mr Selden would not accept it, he procured a perſon who gave 400l. for it to Mr Selden, who dedicating his *Eadmer* to this Benefactor, addreſſes him in the following words. ' Egregius Perfectiſſimuſq; literarum Cenſor & Fautor ' idulgentiſſimus & audis, & vere es, quippe qui doc- ' trinam tuo merito indies cupientiſſimus honeſtos & ' ſumptuoſam in ſtruendis Publico uſui bibliothecis ' operam impendis, præmium ita ſtudioſis & arma ' ſine exemplo ſollicitus parandi.' Biſhop Hacket ſays, he likewiſe made Selden and Mountague friends, (46) being a patron to both.

[*EE*] *Secured the rights of the Biſhops, againſt an attempt of the Earl of Eſſex.*] There happened to be a motion made in the Houſe of Lords, that their Lordſhips ſhould take no oath, ſave only by their honour; which producing a long debate, one of the Biſhops, who was much in years, begged to be excuſed if he could not ſtay ſo long, and went away; upon which the Earl of Eſſex declared, that they might all go out if they would; and preſently moved for the queſtion, that their Lordſhips were content to open wide their doors to let them all out, without ever entering again. The Lord Keeper replied, *That if he was commanded, he would put the queſtion; but it ſhould be to the King, and not to the Houſe of Peers: for their Lordſhips, as well ſpiritual as temporal, were called by the King's writ to ſit and abide there till the ſame power diſſolved them; and as for my Lords temporal, they had no power to licenſe themſelves, much leſs to authorize others to depart from the parliament*; by which the ſpirit was at that time conjured down. But this Lord procured an ample revenge in the next reign upon the whole bench. As to the motion of ſwearing only upon their honour, it was laid aſide, upon a diſtinction made by the Lord Keeper, who obſerved, that when one Peer appeared againſt another as a witneſs before the Lord Steward, he took his oath by laying his hand upon the goſpels; but that in giving judgment by laying their hands upon their breaſts, and pronouncing the words *upon my honour*, there was no oath, but a ſolemn declaration, that as ſure as they were honourable, they found the priſoner guilty, or not guilty (47).

[*FF*] *Advice which that favourite never forgave.*] In one letter he makes it his ſuit, that as all the Lords in England ſought his Lordſhip in this court, ſo his Lordſhip would ſeek and gain the great Lords of Spain with as much obſervance in that court. He told the King, that the Marquis would be too haughty for the Spaniſh court. And, in another letter, he begs Buckingham to behave reſpectfully to the Prince. Biſhop Laud generally bears the odium of being the informer againſt him; and Williams was told by the Marquis's mother, that St David's was the man that undermined him with her ſon (48).

[*GG*] *Buckingham was foiled*, &c.] He took one ſtep towards it, which turned greatly to the Keeper's honour. It was in the beginning of Michaelmas term, 1623, when he deſired the Lord Chief Juſtice Hobart to certify to the King, that Williams, by reaſon of his ignorance and inabilities, was not fit for the Keeper's place; and that then he would engage to throw him out, and the Chief Juſtice ſhould ſucceed him. *My Lord*, anſwered Hobart, *ſo much might have been ſaid at the firſt, but he ſhall do the Lord Keeper great wrong, that ſhall ſay ſo now.* At this time it appears by Archbiſhop Laud's diary, that Williams had ſome words at his own houſe with Laud, upon a jealouſy of his underworking with the Marquis, in whoſe affection Laud ſoon after pronounces him a dead man; and that likewiſe he ſoon after quarrelled with Laud in the withdrawing-room, and was obliged to make his ſubmiſſion for it to the Marquis (49).

[*HH*] *Advanced to the ſee of York.*] While the Prince was in Spain, the King told the Earl of Carliſle, that *if he had ſent Williams into Spain with his ſon, he had kept heart's eaſe and honour, both which he lacked at that time*: and the firſt time Williams came into the King's preſence after the Prince's return into England, which was a little before Chriſtmas, his Majeſty looking intently upon him, ſaid to the Prince, *There's the man that makes us keep a merry Chriſtmas*; and his Highneſs looking as if he underſtood not his father, *Why it is he*, ſaid the King, *that laboured more than all my ſervants beſides to bring you ſafe home to keep Chriſtmas with me, and I hope you are ſenſible of it.* He entered him, as is aboveſaid, for the archbiſhoprick; and notwithſtanding the Marquis had inſtilled a jealouſy of him into the Prince, yet it appears from a letter wrote by Williams to his Highneſs, that this entry was made by his requeſt. After the match had miſcarried, the King being cooler to the Spaniard, might probably recollect ſome of the Keeper's honeſt arts practiſed upon himſelf during the heat of that affair in favour of his ſubjects. Upon his Majeſty's declaration to reſtrain the preachers, the Keeper once procured the delivery of one, who was impriſoned for that offence, by a merry tale, thus: Such a man's wife, upon reading her huſband's impriſonment, fell preſently into labour; and the midwife is come to deliver her, but ſays, it will not be effected till ſhe can ſee her huſband again; for which the women that aſſiſt her revile you, that your Highneſs would ſtick out ſuch a declaration. *Now weal away*, ſays the King, *ſend a warrant preſently to releaſe him, leſt the woman periſh.* Another time, being ordered by his Majeſty to draw up directions to preachers againſt the King's eccleſiaſtical ſupremacy, he propoſed it to the King, that in thoſe directions none might be ſuffered to preach under thirty years of age, nor over ſixty, while men were in full poſſeſſion of their reaſon and judgment, otherwiſe it would be impoſſible to prevent ſuch offences. For inſtance, proceeds he, Kitchen, an offender, is a beardleſs boy, from whom exactneſs of judgment could not be expected, and Dr White (50), a decrepid old man, that is ſpent, having not a fee-ſimple, but a leaſe only of reaſon, and it is expired. Upon this pleaſant and good-natured repreſentation, his Majeſty was moved to releaſe them both.

[*II*] *He diſcovered the intrigues of the Spaniſh Ambaſſador againſt the Marquis.*] A paper of informations or complaints againſt the parliament and Buckingham, was put into the King's pocket unobſerved; and in the poſtſcript it was prayed, That Don Franciſco Carondolet, Secretary to the Marquis Inioſa, might be brought to the King, when he and the Prince were ſitting in the Houſe of Peers, to ſatisfy ſuch doubts as his Majeſty might raiſe. This ſleight was performed by the Earl of Kelly, who told their errand ſo ſpitefully, that the King was much troubled about it, and it ſtruck eſpecially at the Marquis; whom though he defended in ſome particulars againſt any of the Spaniſh, yet he complained that he had noted a turbulent ſpirit in him of late, and knew not how to mitigate it. In this humour he took coach with the Prince to Windſor, and when Buckingham, who attended, offered to ſtep in, the King found a ſlight excuſe to leave him behind, who begged in vain with tears to know the cauſe of his Majeſty's diſpleaſure. Williams, who ſpared no coſt in procuring intelligence (51), had notice by his ſcout of the information, went immediately to the Marquis, who was retired melancholy to Wallingford-houſe, where he acquainted him with what prevented him from executing his deſign of ſelling the crown and church-lands [*KK*]. In negotiating the match with France he gave the French Ambaſſador a ſhrewd piece of advice [*LL*], and afterwards drew up the marriage-articles. In 1625, March 22d, when the danger of the King's illneſs reached his ears, he haſtened to Theobald's, and there finding that report confirmed by the phyſicians, he acquainted his Majeſty with it, and conſtantly attended him till his death; after which he preached his funeral ſermon (*ll*), and printed it by the command of King Charles I. who likewiſe gave him orders to prepare another againſt his coronation. But that mark of his Majeſty's favour was intercepted by the new Duke of Buckingham, the effects of whoſe diſpleaſure ſoon began to fall heavy upon him. As no man kept a better watch upon the court, ſo he was preſently acquainted with the Duke's threats [*MM*], and immediately apprehended the conſequence.

(47) Hacket, p. 76.

(48) MS. of Abp Abbot.

(49) Hacket, p. 7. & ſeqq.

(50) He was the perſon that purchaſed Sion College, and gave it to the city clergy. He founded a charity-ſchool, and gave 30l. a year to put out three of thoſe children apprentices of St Dunſtan's in the weſt, where he was Rector.

(51) For that reaſon he uſed to ſay, that no man could be a ſtateſman without a great deal of money.

what he had diſcovered; and bid him go to Windſor, and never leave his Majeſty, to prevent any more miſchief, in perſuading his Majeſty to break thoroughly with the parliament, and upon their diſſolution to ſend the Marquis to the Tower. Buckingham takes the advice, and on Saturday tells the ſtory to the Prince at Windſor, who was early on Monday morning at the Houſe of Lords; and when the Keeper came thither, took him aſide into the Lobby, thanked him for the warning given to Buckingham, and begged him to ſearch further into the plot againſt that favourite. Williams anſwered, that he knew ſome in the Spaniſh ambaſſador's houſe had been preparing miſchief, and infuſed into his Majeſty about four days paſt. The Prince replied, I expected better from you; for if that be the picture-drawer's ſhop, no counſellor in this kingdom is better acquainted than yourſelf with the work and the workmen. I might have been, ſays the Keeper, and I am panged like a woman in travail, till I know what miſhapen figure they are drawing; but your Highneſs and the Marquis have made it a crime to ſend unto that houſe, it is a month ſince I have forbid the ſervants of that family to come to me. But, Sir, anſwered the Prince, I will make that paſſage open to you without offence, and interpoſe any way to bring us out of this wood; only before we part, keep not from me, how you came to know or imagine that the Spaniſh agents had charged Buckingham to my father with high miſdemeanours, or perhaps diſloyalty. I would hear you to that point, that I may compare it with ſome parcels of my intelligence. Sir, ſays the Keeper, I will go in directly with you. Another perhaps would bluſh, when I tell you what heifer I plow with; but knowing mine innocence, the worſt that can happen is to be laughed at. Your Highneſs hath often ſeen Don Franciſco Carondolet; he loves me becauſe he is a ſcholar, for he is Archdeacon of Cambray, and ſometimes we are pleaſant together, for he is a Walloon by birth, and not a Caſtilian. I have diſcovered him to be a wanton, and an humble ſervant to ſome of our Engliſh beauties, but above all to one of that gentle craft in Mark-lane; a wit ſhe is, and one that muſt be courted with news and occurrences at home and abroad, as well as with gifts. I have a friend that had bribed her in my name to ſend me a faithful account of ſuch tidings as her paramour Carondolet brings to her. All that I intruſted the Marquis with came out of her chamber; and ſhe hath well earned a piece of plate or two from me, and ſhall not go unrecompenced for theſe ſecrets about which your Highneſs does uſe me, if the drab can help me in it; truly, Sir, this is my dark lanthorn, and I am not aſhamed to enquire of a Dalilah to reſolve a riddle, for in my ſtudies of divinity I have gleaned up this maxim, *licet uti altero peccato*. Though the devil make her a ſinner, I may make a good uſe of her ſin.' Yea, ſays the Prince merrily, do you deal in ſuch ware? In good faith, replied the Keeper, I never ſaw her face. He then left the Prince, and got Carondolet's under-ſecretary, whoſe lodging he knew, ſeized, as a Romiſh prieſt. This brought Carondolet to him to beg his ſecretary's diſcharge; to which ſays the Keeper, Would you have me run ſuch a hazard to ſet a prieſt at liberty, a dead man by our ſtatutes, when the eye of the parliament is ſo vigilant upon the breach of juſtice eſpecially in this kind, to the grievance of our godly men, who deteſt them that come hither out of the ſeminaries above all malefactors, becauſe they come to pervert them who have lived in the boſom of our church? My Lord, ſaid Franciſco, let not the dread of this parliament trouble you; I can tell you, if you ha'n't heard it, that it is upon expiration. He afterwards fiſhed out of the ſecretary the heads of all the articles in the paper ſlipt, as above-mentioned, into the King's pocket. He did not ſtay for the copy of them which was brought to him four days after, but immediately drew the heads then diſcovered to him into ſuch a form, as it ſhould appear to be copied from the original, and gave all to the Prince, of whom he deſired ſecrecy, having put his life into the hands of his Highneſs, firſt for ſearching into the King's councils, and then diſcovering them; and, for further ſecurity, he ordered Carondolet out of the kingdom immediately, that he might not be produced to confront him, if the matter ſhould come to be queſtioned. Dr Hacket obſerves (52), that this ſtory accounts for the King's reconciliation to the parliament, as well as why his Majeſty never offered afterwards to retrieve the Spaniſh match, and furniſhes a reaſon why King Charles the following year readily entered into a war with Spain. But our chief motive for inſerting it here is, that it agrees with one part of our author's character repreſented by Lord Clarendon (53).

[*KK*] *He prevented the ſale of the crown lands.*] Againſt the firſt project of ſelling the crown lands, we have a letter in Dr Hacket, p. 98. of his, dated October 21. The ſecond project was prompted to the Marquis by Dr Preſton, Maſter of Emanuel college, Cambridge, and Chaplain to the Prince; the Keeper quickly got notice of it, and went to Wallingford-houſe, where the Marquis, being cloſeted up with Preſton, refuſed him an audience. Upon this he ſent next day to Preſton, and offered him the deanery of Weſtminſter, if he would leave his deſigns againſt the cathedral lands; but Preſton did not believe him, and they parted at enmity. However, Williams procured a conference afterwards with the Marquis, who yielded to his arguments in defence of the hierarchy (54).

[*LL*] *A ſhrewd piece of advice.*] Our author promoted this match, and had a great hand in bringing it to a concluſion. Among other things, on *their* Chriſtmas day he treated the French ambaſſador and all his train very ſumptuouſly in the Jeruſalem chamber, having before entertained them with three anthems in the Choir of the Abbey, in which he performed a part himſelf in the tenor; upon this occaſion he furniſhed them with the Engliſh liturgy in French (55). He ſettled the marriage articles upon more moderate terms (than had been at firſt inſiſted on) for the Papiſts; adviſing the Secretary Villoclare not to inſiſt upon an abſolute and general diſpenſation with the penal laws againſt the Papiſts from the King, which would diſpleaſe his Majeſty, and ſo bring it to be put to a conteſtation hereafter. The Secretary was greatly pleaſed with him, and told him, *Sir, uſe me honeſtly, I am a ſtranger, and while I am in England I will ſurrender myſelf up to your directions: nay, I will poſſeſs our virtuous and illuſtrious Madame, that you are a clear dealing man, of good faith, and moſt worthy of her truſt, when ſhe comes into a ſtrange land.* The conſequence of this to the Keeper was, that he ever afterwards ſtood well in her Majeſty's favour. By this, and the foregoing ſpecimen in Remark [*II*], it appears, that King James's kingcraft, ſo much gloried in by himſelf, was well copied by his principal officer. Yet his conduct has been very ſeverely chaſtiſed by a ſucceſſor of his in that office (56), who does not ſcruple to ſay, that he appeared to be a man of a very corrupt nature, whoſe paſſions could have tranſported him into the moſt unjuſtifiable actions: a cenſure, which ſurely was not meant by the writer to be conſtrued in the full extent of the words, wherein there is evidently more inſinuated than is explicitly aſſerted. But let it be remembered that there was a perpetual warfare between the Keeper and Dr Laud, for whom the noble hiſtorian had a particular regard.

[*MM*] *The new Duke's threats.*] In the interval between the firſt and ſecond parliament in the firſt year

(55) He had procured it to be tranſlated by Mr De Laune, miniſter of the French church at Norwich. The tranſlation was approved, and the author handſomely rewarded by him. It is uſed now in our French proteſtant churches.

(56) Clarendon, ubi ſupra.

ſequence (*mm*). When the King's coronation drew near, which was appointed for Candlemas-day 1625-6, he received orders from his Majeſty not to appear in his office as Dean of Weſtminſter at that ſolemnity, and his place was then ſupplied by Biſhop Laud, a perſon for whom he had the leaſt affection (*nn*). He was likewiſe denied to do his homage to the King with the reſt of the ſpiritual Lords on that occaſion. Before the opening of the ſecond parliament in this reign, which was four days after the coronation, the Lord Coventry was put into the Keeper's office, and the Biſhop had now no parliamentary ſummons ſent to him; and when upon a motion in parliament, where his friends were numerous, he did receive it, he received likewiſe a particular charge from the new Keeper not to appear in perſon, and had even ſome difficulty to obtain that his proxy might be left with the Biſhop of Wincheſter. He ſtruggled hard to ſecure his reputation before he parted with the ſavings of the Great Seal, and at laſt, on the ſurrendry, made a ſort of capitulation [*NN*] for that and his other preferments before he delivered it up, which was on the 25th of October 1626, at Foxley, a ſeat of the Lord Sandys, near Windſor [*OO*], after which he removed to Bugden. When the writ was ſent to him

(*mm*) He gave warning to all who had any dependence upon him to make their intereſt elſ-where, for his ſervice would ſo on ſtand them in no ſtead.—Philips, p. 157.

(*nn*) When he received orders to depute one of the prebendaries, underſtanding Laud was intended by the King, he ſent his Majeſty the names of all the twelve, deſiring him to nominate whom he pleaſed; ſubmitting, as he calls it, to this ſequeſtration.

year of this reign, the Duke of Buckingham was allowed to throw his marks of diſpleaſure upon thoſe members who had oppoſed him in the laſt parliament, of which one of the chief was the Keeper, whom he had openly reproved at Chriſtchuch in Oxford, for ſiding againſt him. The Biſhop ſtoutly anſwered, *that he was indeed engaged with William Earl of Pembroke, and other worthy patriots, to labour the redreſs of the people's grievances, and in ſo good a cauſe he was reſolved to ſtand upon his own legs. If that be your reſolution,* ſaid the Duke, *ſee you ſtand faſt*; and ſo they parted (57).

[*NN*] *A ſort of capitulation.*] On the 16th of October 1626, the Lord Conway brought him this meſſage (58), that his Majeſty underſtanding that his father had taken a reſolution that the Keeper of the Great Seal of England ſhould continue but from three years to three years (59); he approving very well thereof, and being reſolved to obſerve the order during his own reign, he expects you ſhould ſurrender up the ſeal by Allhallowtide next, alledging no other cauſe thereof; and that having ſo done, you would retire to your biſhoprick. The Keeper replied, that he hoped it was not his Majeſty's intention to confine him altogether to his dioceſe, nor to reſtrain him from the council board before the delivery of the ſeal; and begged he might be admitted to ſpeak to his Majeſty in behalf of his reputation as well as his maintenance, which was granted; and upon the 19th of that month he preſented himſelf to the King, when he firſt aſked his Majeſty's grace and favour in general; who granting it, gave him his hand twice to kiſs. *Secondly,* ſays the Keeper, *I humbly thank your Majeſty for your gracious promiſe to take away none of my church preferments* (60), *till you have given me better; and I beſeech your Majeſty to keep the ſame benevolent mind towards me.* The King replied, *It is my intention. Thirdly, I beſeech your Majeſty to remember your father's promiſe, that whenſoever he took away the ſeal from me, he would place me in as good a biſhoprick or archbiſhoprick as he could; a promiſe not only ſeconded, but drawn from your father firſt, by your Majeſty.* K. There is no ſuch place vacant; when any falls, then it will be time to make this requeſt to me. *Fourthly, I deſire that I may not be commanded away from the council table, but that my abſence may be left wholly to my own diſcretion.* K. I never intended it ſo, and never ſaid a word to the contrary; but then I expect you will not attend by a voluntary intruſion. *Fifthly, I beſeech your Majeſty to declare unto the Lords, that I have willingly and readily yielded to your Majeſty's pleaſure, and that I part in your favour and good opinion, and am ſtill your Majeſty's ſervant.* I will, replies his Majeſty; but I look that no petitions be made by any man at that time, but only for my favour in general. *Sixthly, I humbly beg that your Majeſty, when you think fit, would make my atonement with the Lord Duke, either upon or without examination of thoſe informations, which his Grace hath received againſt me.* K. It becomes not me, a King, to take up the quarrels between my ſubjects; and the Duke has never before me expreſſed any enmity againſt you. So he thanked his Majeſty for the laſt part of his anſwer, which revived him not a little. *Seventhly, Whereas, by your father's direction, I bought a penſion of* 2000 *marks per ann. for* 3000 *l. I deſire your Majeſty would be pleaſed either to buy it of me for the ſum again, and extinguiſh it, or aſſign it to be paid me out of the tenths and ſubſidies, as before I had appointment to receive it out of the Hanaper.* The King ſaid, Aſſignments are naught; but I will take order with my Treaſurer either to pay it or buy it, as ſhall be found moſt convenient. *Eighthly, I deſire your Majeſty would beſtow the next vacant prebend of Weſtminſter upon my library-keeper* (61), *as your father had promiſed me.* It is very reaſonable, replies the King. *Ninthly, I petition your Majeſty, that you would be pleaſed to ratify a grant made by your father, of four advowſons to St John's college in Cambridge, two whereof I bought with my money, and two his Majeſty gave me for the uſe of that ſociety.* Says the King, I will ratify the grants, and give way to amend any errors in the form or in the paſſing. *Tenthly, I beg leave to retire to a little lodge, lent me by my Lord Sandys, where my Lord Coventry may receive the ſeals, when your Majeſty commands it.* Granted. *Laſtly, I beſeech your Majeſty not to be offended at me, if upon my diſcharge reports are raiſed of my being diſcontented; which I proteſt I am not, giving off ſo comfortably in your Majeſty's favour.* I will do you that juſtice, ſays the King, and ſhall little value reports. So, with a pleaſing countenance, he gave him his hand to kiſs, and diſmiſſed him graciouſly. Accordingly the four advowſons were confirmed to St John's college; but after he left Saliſbury, which was the next day, he never received any thing of his penſion; nor could he ever bring it to a hearing. Before five days were expired, he had intelligence how vehemently the Duke talked againſt him, which made him give over all hopes of any court favour for the future (62).

[*OO*] *At Foxley, near Windſor, after which he removed to Bugden.*] Sir John Suckling, Comptroller of the Houſhold, brought the warrant, whereupon he inſtantly put the ſeal into a rich cabinet in Sir John's preſence, incloſing the key in a letter to his Majeſty, ſealed with the epiſcopal arms of Lincoln; in which he particularly requeſted it of the King, that he would pleaſe to order his ſucceſſor to ſhew countenance eſpecially to the clergy in their cauſes in that court, and put ſome of that body into the commiſſion of the peace. Being now freed from his ſecular employment, and coming to live at Bugden, he found the houſe quite out of repair and all order, but in the ſpace of one year he made a good dwelling out of a ruinous pile; (63) furniſhing the gallery with a curious collection of paintings he made at a great expence. He beautified the chapel with all the expence it was capable of. After this he planted woods and walks, fenced the park, and ſtored it with deer; and he bought in all the leaſes belonging to the demeſnes, which through miſmanagement were let out to the very gates. His delight lay chiefly in gardening; ſo that he was even profuſe in his expences that way in arbours, flowers of the choiceſt ſort, orchards, pools, fiſh-ponds, with a wall raiſed three foot from the ground, paled in, and ſhaded on each ſide with trees. He alſo bought Dr Day's library, and got the timber hewn ready for the building; but the unexpected troubles that came upon him, ſtopt the advancing of it ſo long, that the timber came into the hands of ſoldiers to make fortifications in the civil war, and the books became a prey to every flatterer that could read. During the time that he lived here, the ſervice was decently performed at his chapel with the organ and other muſic, and the beſt voices that could be procured, himſelf often bearing a part among them; and the altar was adorned with rich plate, and other coſtly utenſils. In the ſpace of three

(58) To his lodgings in Weſtminſter, whither he had followed the King, and wrote to him in his own defence. Hacket.

(59) That was agreeable to Dr Williams, who required it when he had the ſeal delivered to him.

(60) This likewiſe had been brought to him before by Lord Conway.

(61) His name was Gowland, a very worthy perſon, ſays Dr Hacket, of great learning, eſpecially in antiquities: but he never had the prebend.

(62) Philips, p. 173—183.

(63) It is a large houſe, built by Byden, Lord Chancellor, when the biſhoprick had 34 rich manors belonging to it, being then the greateſt biſhoprick in England, but nothing had been done in it ſince.

him for the meeting of the third parliament, he had the like intimation, as before, of his Majeſty's pleaſure that he ſhould forbear being preſent in it; but he now refuſed to ſubmit to his Majeſty's directions, reſolved to ſtand upon his privilege [*PP*], and ſat in the Houſe of Lords himſelf, and not by proxy, as before: and the petition of right being ſet on foot in this parliament, the Biſhop promoted it with great zeal, but at the ſame time propoſed a clauſe to be added in favour of the crown [*QQ*], and moved likewiſe for an act to explain the Bill of Rights, ſo as thereby his Majeſty's claim to the duties of tonnage and poundage might be fully confirmed. His behaviour at this time ſeems to have reconciled him to the Duke of Buckingham [*RR*], and the King was ſo well ſatisfied with him, that he conſulted him in a point of the utmoſt importance concerning his own conduct, and expreſly approved of his advice [*SS*]. But the incautious uſe he afterwards made of the King's freedom [*TT*] in communicating his thoughts to him, drew the royal diſpleaſure upon him again; and in 1629 his name was actually ſtruck out of the council-books. And though he obtained his Majeſty's pardon for that offence (*oo*), yet the next year upon the chriſtening of Prince Charles (*pp*), when all the reſt of the Lords both ſpiritual and temporal were invited, the Biſhop of Lincoln was excepted [*UU*]. This year he fell undet the examination of the commiſſioners appointed to

(oo) See Remark [*TT*]

(*pp*) He was chriſtened July 27, 1630.

three years he brought the palace into as much ſtrength and elegance as when it was firſt inhabited. In a word; he lived at Bugden the moſt epiſcopally of any of his predeceſſors. He took ſeveral noblemens ſons, as of the Marquis of Hertford, the Earls of Pembroke, Saliſbury, and Leiceſter, into his houſe, beſides ſeveral others of the gentry, and provided preceptors for them, who often accounted to him how their charges proceeded both in piety and in learning; and to ſuch as grew ripe for the univerſity he read himſelf a brief ſyſtem of logic. Beſides, he maintained ſeveral poor ſcholars at the univerſity; and in this and other charities he ſpent 1000 l. and ſometimes 1200 l. per annum (64).

(64) Hacket, p. 66.

[*PP*] *He reſolved to ſtand upon his privilege.*] In his anſwer to Lord Coventry's letter, which brought him the order not to appear in the houſe, he ſays, 'I muſt 'crave ſome time to reſolve by the beſt counſels 'God ſhall give me, whether I ſhall obey your 'Lordſhip's letter (though mentioning his Majeſty's 'pleaſure) before my own right, which by the law 'of God and man I may in all humility maintain.' (65)

(65) Philips, p. 194.

[*QQ*] *A clauſe in favour of the crown.*] This clauſe was, that as they deſired to preſerve their own liberties, ſo they had regard to leave intire that power wherewith his Majeſty was intruſted for the protection of his people. He even chid his friends among the Commons for not admitting it, but found them more ſullen than uſual (66).

(66) Id. p. 196.

[*RR*] *Reconciled to the Duke of Buckingham.*] He had a private conference with the Duke, wherein he tendered him his faithful ſervice, which was accepted by the Duke, who had another private conference with him afterwards, and, two months before his death, promiſed to reſtore the Biſhop into favour, and did deſign a time for the open profeſſion of it; however, at this time they parted in perfect charity, which was happy for them both, ſince they never met again, the Duke being ſoon after murdered by Felton. It is certain that the Biſhop had always been faithful in executing Buckingham's commands, and as to what lay in his power punctually to obey him; but it was allowed by the Duke's mother, that the Lord Keeper had ſufficient reaſon ſometimes not to comply with her ſon, and that ſhe never knew them diſagree, but that his counſels were wiſe and well grounded, ever tending to the Marquis's honour, ſafety, and proſperity. But then he often offended her ſon with reprehenſions that were too bold and vehement (67); and, as the Counteſs had intimated to him, were aggravated by Biſhop Laud: which coming from a perſon of ſo much zeal and worth, might eaſily have their deſired effect upon a mind ſuch as that of the Duke her ſon, which was ſoon ſatiated with the beſt ſervices of thoſe whom he had promoted. After the Duke's unfortunate end, Biſhop Williams wrote a letter of condolance to his ſiſter, the Counteſs of Denby; the anſwer to which ſhews how much ſhe believed him a ſincere friend. It begins thus: 'My Lord, it is true noble-'neſs that makes you remember ſo diſtracted a crea-'ture as I am, and to continue a friend in harder 'fortunes. You give me many reaſons of comfort, 'for which I kindly thank you (68).'

(67) Hacket, p. 108.

(68) Id. p. 84.

[*SS*] *And approved his advice.*] The King giving him his hand to kiſs, conjured him to tell him freely how he might beſt ingratiate himſelf with the people: To which he as freely replied, That the Puritans were many and ſtrong ſticklers, and if his Majeſty would give but private orders to his miniſters to connive a little at their party, and ſhew them ſome indulgence, it might perhaps mollify them a little, and make them more pliant; though he could not promiſe that they would be truſty long to any government. The King anſwered, that he had thought upon this before, and that he would do ſo (69).

(69) Philips, p. 197.

[*TT*] *The incautious uſe, &c.*] About two months after the laſt mentioned declaration of his Majeſty, the Biſhop, at his court at Leiceſter, acted according to that counſel then reſolved upon by his Majeſty; and withal told Sir John Lamb and Dr Sibthorp his reaſon, that it was not only according to his own, but the royal pleaſure. This coming to the King's ear, it was reſolved, that upon the depoſition of theſe two, a bill ſhould be drawn up againſt the Biſhop for revealing the King's ſecrets, being a ſworn counſellor. As to the two informers, we have already given an account how Lamb owed his dignity to the Biſhop. At this time he was Sir John Lamb of Rothwell in Northamptonſhire, and Chancellor of Peterborough. Sibthorp having married his daughter, was Rector of Water [Fenny] Stratford in Buckinghamſhire, and a Juſtice of Peace; both were violent perſecutors of the Puritans, and the latter particularly a great promoter of the King's project of raiſing money by loan, without his parliament, to which purpoſe he had printed a ſermon (70) the year before, for which he had been made King's Chaplain, and a Prebendary of Peterborough (71); ſo that the Biſhop, who always diſapproved any ſevere proceedings againſt the Puritans, no doubt was glad that he had it in his power to back his own opinion againſt their ſharpneſs with the royal authority. Dr Hacket obſerves, that they ate and drank at the Biſhop's table at this time, and depoſed not only what they heard there, but more than the truth. The information being tranſmitted to the council-table, was ordered to be ſealed up, and committed to the cuſtody of Mr Trumball, one of the Clerks of the Council. Neverthele ſs the Biſhop made ſhift to procure a copy of it, and likewiſe the King's pardon for that offence. It ſhould ſeem therefore that his being ſtruck out of the council-book was owing to ſubſequent informations brought againſt him; yet when he aſked the Earl of Holland the cauſe of it, that Earl told him, that he muſt expect worſe than this, becauſe he was ſuch a champion for the *Petition of Right*, and that there was no room at the table for thoſe that would aver it. But if we may credit the noble hiſtorian (72), he laid himſelf open to the deſigns of his enemies after his removal from the ſeal; for, ſays he, living ſplendidly in his dioceſe, he made himſelf very popular among thoſe who had no reverence for the court, of which he would frequently, and in the preſence of many, ſpeak with too much freedom, and tell many ſtories of things and perſons upon his own former experience, and did often preſume in theſe unwary diſcourſes to mention the perſon of the King with too little reverence.

(70) Intituled apoſtolical obedience. An aſſize ſermon at Northampton on Rom. xiii. 7. London 1627. See Selden's article, Remark [*M*].

[*UU*] *He was not invited to the Chriſtening.*] Dr Hacket aſſures us (73), that this ſlight vexed him more than any that was put upon him, and even reduced him to a degree of dejection, that in ſo good a day,

(73) P. 96.

to enquire into exacted fees (qq), which terminated greatly to the advantage of his reputation [*WW*]. About this time being told, that the King was offended with his magnificent way of living at Bugden, and with his holding the deanery of Weſtminſter, he refuſed to comply with his Majeſty's pleaſure in either of theſe propoſitions [*XX*]. He afterwards diſputed the Metropolitan's right to viſit his dioceſe [*YY*]. In 1636 a complaint was lodged againſt him by the high-ſheriff of Huntingdonſhire for refuſing to pay the ſhip-money [*ZZ*], and preſently after, upon ſome informations being brought againſt him in the Star Chamber for ſcandalous words ſpoken of the King and his miniſters, he was ſentenced to pay a fine of 10,000 l. and to ſuffer impriſonment during his Majeſty's pleaſure, and to be ſuſpended by the high commiſſion court from all his dignities, offices, and functions [*AAA*]. Accordingly he was ſent to the Tower of London, where

day, when the King's clemency ſhould have run at waſte to all men, that then he ſhould be ſuperſeded. ‘ But in one reſpect,’ ſays Biſhop Williams, ‘ it was ‘ well; for I could not have ſaid Amen to Biſhop ‘ Laud's prayer conceived for the royal infant (and ‘ was commanded to all pariſh churches) in that paſ‘ ſage, *Double his father's grace, O Lord, upon him,* ‘ *if it be poſſible*; to put in a *poſſible* whether the Al‘ mighty could double thoſe gifts to the child which ‘ he had given to the father, and to confine the good‘ neſs and almightineſs of the Lord: It ſhewed both ‘ bold flattery and loathſom divinity. Let Cartwright ‘ and all his party ſhew ſuch an exception againſt any ‘ line in our common prayer, and I will confeſs they ‘ have ſome excuſe for their nonſubſcription.’

[*WW*] *It turned greatly to his reputation.*] Ratcliffe, the Attorney at York, prepared a bill about the fees of the Clerk of the Hanaper, but it came to nothing; and with reſpect to thoſe in the epiſcopal regiſtry at Lincoln, the Biſhop wrote to the King about them a letter, in which he proteſted he had never touched one penny of thoſe fees, but given his to mend his ſervants wages, and deſired the matter might be referred to the Archbiſhop [Abbot]; which being granted, that Archbiſhop did authorize the receiving the uſual fees for the preſent *de bene eſſe*, and ordered a table of them to be hung up in all the courts of the dioceſe (78).

[*XX*] *He refuſed to comply to his Majeſty in either of theſe propoſitions.*] Being continually harraſſed with vexatious law ſuits and other troubles, he aſked the Lord Cottington, if he could tell him, what he ſhould do to procure his peace, and ſuch other ordinary favours as other Biſhops had from his Majeſty? To which that Lord replied, that the ſplendor in which he lived, and the great reſort of company that came to him, was offenſive; and that the King muſt needs take it ill, that one under the height of his diſpleaſure ſhould live at ſo magnificent a rate. In the next place, his Majeſty would be better ſatisfied, if he reſigned the deanery of Weſtminſter, becauſe he did not care he ſhould be ſo near a neighbour to Whitehall. As to the firſt, his natural temper would not ſuffer him to comply with it, and to moderate his expences in houſekeeping; and he ſaid he was not ſo ſhort-ſighted as to part with his deanery *. But ſince he was reſolved to hold it, he was made as uneaſy as poſſible in it. He was not admitted to preach before the King in Lent, Good Friday, being his uſual courſe for four years; and for three years together when he came to the chapters or election of ſcholars, he did not reſt above a day or two in college, but Secretary Coke, either by letter or *viva voce*, commanded him from the King to return to his biſhoprick; ſo that the Biſhop one time very reſolutely aſked him, *how he durſt command a man out of his freehold?* which wrought upon the old gentleman ſo far, that he never reſted till he had his pardon ſealed for it. After the Archbiſhop was ordered by the King to preſs him to reſidency upon his biſhoprick by the ſtatutes. But this proved ineffectual; for, in anſwer to his Grace's letter, he writes thus: ‘ I confine myſelf to thoſe parti‘ cular ſeaſons to which the local ſtatutes of the col‘ lege, and my expreſs oath, doth enjoin me; that is, ‘ the two chapters, and the great feſtivals, all which ‘ ſpace of time doth not, being taken in the diſtinct ‘ ſpaces, make a Biſhop a non-reſident by any law I ‘ know of, nor conſequently infringe his Majeſty's ‘ inſtructions, though a man had no diſpenſation; ‘ which inſtructions require only that a Biſhop ſhould ‘ reſide. But we preſume that it is no part of his Ma‘ jeſty's gracious intention, that they ſhould be con‘ fined, or as it were impriſoned in their biſhoprics (79).’

[*YY*] *The Archbiſhop's right to viſit his dioceſe.*] In a letter to the Archbiſhop on this occaſion he writes, that he found upon enquiry into the records of ſeveral regiſters, that his dioceſe had never been viſited in the time of Robert Groſthead, 1285, and never ſince but by virtue of ſome particular bull, or letter of aſſiſtance from the King's Majeſty, ſince the ſupremacy was ſeated in the crown. The reaſon was, becauſe all the former means of livelihood being taken away by the Duke of Somerſet in the 2d of Edward VI. and new corps formed conſiſting in great part of eccleſiaſtical juriſdictions, the fees ariſing from thence were now the chief ſupport of the Biſhop. Upon which account likewiſe the grievance of this metropolitical viſitation would be ſo much greater, as it was the year of his triennial viſitation. Laud returned for anſwer, that he would do him no injuſtice, but was reſolved to aſſert the rights of the archbiſhoprick; and the matter being on both ſides agreed to be referred to the Attorney General, he determined it in favour of the Archbiſhop. This viſitation was ſtill more vexatious to the Biſhop, becauſe his old friend Sir John Lamb, now Dean of the Arches, preſided in it. A metropolitical Vicar in this viſitation, occaſioned Williams to publiſh his *Letter to the Vicar of Grantham,* which had been wrote in 1627, with a deſire not to publiſh it.—— It was anſwered by Peter Heylin the ſame year, in a book intitled, *A coal from the altar*; to which the Biſhop replied in his *Holy Table name and thing, more anciently, properly, and literally uſed under the New Teſtament, than that of Altar. Written long ago by a miniſter in Lincolnſhire, in anſwer to Dr Coal, a judicious divine in Queen Marie's dayes. Printed for the uſe of the dioceſe of Lincoln,* 1637, 4to. Licenſed by John Lincoln, Dean of Weſtminſter. Heylin rejoined in his *Antidotum Lincolnienſe*; which the Biſhop intended to anſwer, but was prevented by the ſeizure of his books (80).

[ZZ] *For refuſing to pay the ſhip money.*] Sir Robert Oſborn, the High Sheriff, laying a very unequal levy upon the hundred in which Bugden lay, the Biſhop wrote a civil letter to him to rectify it, and he and his neighbours would be ready to ſee it collected: upon this the Sheriff catching at the opportunity, poſts up to court, and makes a heavy complaint againſt the Biſhop, that he not only refuſed the payment of ſhip-money himſelf, but likewiſe animated the hundred to do ſo too; and from this inſtance it may appear how much he was now pecked at. For though he afterwards cleared himſelf before the Lords of the council, and they were ſatisfied that he had behaved with duty and prudence, yet Sir Robert was not apprehended, nor had the Biſhop any ſatisfaction given him, nor was the levy regulated (81).

[*AAA*] *He was ſuſpended, and ſent to the Tower.*] This proſecution had been continued for ſeveral years upon various informations brought againſt him for words in derogation of his Majeſty, and his miniſters; but as no ſufficient proofs were made out while the Attorney [Noy] lived, the Biſhop had taken no notice of it, concluding it would ſpend itſelf in ſmoke only: but after Noy's death, when he found, by the corrupt management of one Kilvert *, it grew ſo hot as would ſoon burſt out into a trial, he ſubmitted himſelf in a petition to his Majeſty, in order to prevent a hearing; in which declaring his innocency from any crime committed againſt his Majeſty in thought, word, or deed, behaving as he found all other Biſhops of the realm had done, yet he begged to have no ſuit with his ſovereign Lord and Maſter and Patron. ‘ *Your* ‘ *Petitioner*,’ ſays he, ‘ *caſts himſelf with all humility* ‘ *at your Majeſty's feet, and implores your royal mercy,*

* It was obſerved that his pride and obſtinacy in not ſubmitting to the King in due time, had undone him. Garrard's letter to Ld Wentworth, dated July 14, 1637. in Strafford's letters, &c. p. 85. vol. II.

(79) Philips, p. 206, & ſeqq.

(80) Lord Clarendon, no friend to our author, obſerves, that Williams was an enemy to thoſe innovations, which were countenanced by Laud, and had wrote a book againſt uſing them, in which there was much good learning, though too little gravity for a biſhop. Hiſt. of the Rebellion, book i.

(81) Lives of Lord Chancellors, p. 104. vol. I. 8vo.

* Mr Aubiſton, ſchoolmaſter of Weſtminſter, on whom he had beſtowed a living near Hatfield, worth 400 l per ann. a little before, was put into the high commiſſion court for ſcandalous letters written to the Biſhop, which were found in his ſtudy at Bugden. Kilvert ſays, Aubiſton whipt himſelf into an eſtate, and he will whip him out of it. Garrard to Wentworth, ubi ſupra, p. 149, 150.

where ſome hard terms of accommodation being offered him, he abſolutely refuſed to ſubmit to them, and thereupon ſeizure was made of his goods at Bugden and Lincoln to the value of that fine [*BBB*]. When the parliament met in November 1640, he petitioned the King for his enlargement, and to have his writ of ſummons to parliament, but notwithſtanding he procured the mediation of the Queen, who had always preſerved a kindneſs for him, yet the Lord Keeper Finch and Archbiſhop Laud oppoſing, brought the King to refuſe it; ſo that about a fortnight after, viz. about the 16th of November, the Houſe of Lords ſent the Uſher of the Black Rod to demand him of the Lieutenant of the Tower; upon which he was brought to the parliament-houſe, and took his place among his brethren. Hereupon his Majeſty was pleaſed to be reconciled to him (*rr*), ſo far as to command that all orders kept in any court or regiſtry upon the former hearings and informations againſt him ſhould be taken off, razed, and cancelled, that nothing might ſtand upon record to his diſadvantage [*CCC*]. However, in the Houſe of Lords

(*rr*) It has been obſerved that his enemies too found they were ſo far from being able to procure him any further mortification, that they ſhould find it difficult enough to ſtand their own ground. Lives of the Lord Chancellors, vol. I. p. 105.

‘NON STARE IN JUDICIO CUM SERVO TUO, *but ſuffer him to aſcribe his deliverance to your Majeſty's clemency.*’ Then, with regard to the information of Lamb and Sibthorp, he proceeds thus: ‘And whereas your Majeſty having in the 4th year of your happy reign received the opinion of the four Lords to whom it was committed, concerning this very ſelf ſame charge, did, in your Majeſty's gallery of Whitehall, admit the defendant, brought in by the Lord Treaſurer, one of the ſaid committee, to kiſs your Majeſty's hand, and did uſe unto him the ſaid defendant, in the preſence and hearing of the ſaid right honourable Lord, theſe gracious words, that your Majeſty was pleaſed to forgive all that was paſt, and ſhould eſteem of this defendant according as how he ſhould demean himſelf for the time to come; he beſeeches no further proſecution may be uſed againſt him.’ He concludes in pleading for his Majeſty's favour for a perſon, ‘who had,’ ſays he, ‘the honour to cloſe your Majeſty's father's eyes, and of drawing up the commiſſion and contracts for your Majeſty's marriage.’ Biſhop Hacket aſſures us, that he likewiſe applied to Laud for his intereſt with his Majeſty to the ſame purpoſe; and the better to move him to it, put him in mind of his former friendſhip, in procuring him the biſhoprick of St Davids (82): ſo hard did he ſtruggle to prevent any further hearing of this cauſe. But we have the reaſon why all proved ineffectual from Lord Clarendon, who aſſures us, that it was not poſſible for him at this time to make his peace; for though, ſays he, upon ſome former addreſſes and importunities in his behalf by ſome perſons of power and place in the court, and in which the Queen herſelf had endeavoured to do him ſome good offices, the King was inclined to have ſaved him, being a Biſhop, from the infamy he muſt undergo from a public trial, yet the Biſhop's vanity had in thoſe conjunctures ſo far tranſported him, that he had done all he could to have inſinuated that the court was aſhamed of what they had done, and had prevailed with ſome of his powerful friends to perſuade him to that compoſition; upon which the King would never more hear any perſon in his behalf (83).

[*BBB*] *And ſeized to the value of the fine.*] The terms of accommodation were, 1. That he muſt leave his biſhoprick and commendams, and take a biſhoprick in Ireland or Wales, as his Majeſty ſhould think fit. 2. He muſt recant his book *. 3. Secure all his fines. 4. Never queſtion any that had been employed by his Majeſty againſt him. To this he anſwered, that he was content to lay his biſhoprick and deanery at his Majeſty's feet, but was not willing to go into Ireland. That he could not recant his book, which he was ready to juſtify. That he would pay his fine as faſt as he was able; and that he would not queſtion any body. This being not thought ſufficient, he offered to reſign all he had in the church, but ſtill to live in England (84); and as to his book, he was ſorry if any thing in it gave offence to his Majeſty. But ſince he muſt be ſtript of all he had in the church, he deſired to know how much ſhould be left him of all his lands and leaſes to live upon, that the fine-gatherers might not have all? and whether his penſion of 2000 marks a year, and the 24000 l. in arrears for the ſame, ſhould be taken in part for the King's payment? The anſwer he received was, that penſions were not paid to men out of favour; and as for what ſhould be allowed him out of his own eſtate to live on, he muſt not know that, till he had wholly ſubmitted himſelf. Upon this his Lordſhip writes to the Earl of Dorſet (who carried theſe meſſages to and fro) that it were a tempting of God to part with all he had willingly, and leave himſelf no aſſurance of a livelihood: That his debts, if he came out of the Tower, would caſt him into another priſon, no better proviſion being made for them than he ſaw appearance of. That he would never hazard himſelf into a condition to beg his bread. After this, hearing his Majeſty would not abate any thing of his fine, he deſired that it might be taken up by 1000 l. yearly as his eſtate would bear it, till the whole ſhould be paid. But that was not granted: Kilvert was ordered to go to Bugden and Lincoln, and there to ſeize upon all he could, and bring it into the Exchequer. Kilvert, glad of the office, made ſure of all that could be found, goods of all ſorts, plate, books, &c. to the value of 10,000 l. of which he never gave account but of 800 l. The timber he felled, killed the deer in the park, ſold an organ which coſt 120 l. for 10 l. pictures which coſt 400 l. for 4 l. made away with what books he pleaſed, and continued revelling for three ſummers (85) in Bugden-houſe. For four cellars of wine, cyder, ale, and beer, with wood, hay, corn, and the like, ſtored up for a year or two, he gives no account at all; and thus a large perſonal eſtate was ſquandered away (86), and not the leaſt part of the King's fine paid all this while; whereas if it had been managed to the beſt advantage, it would have been ſufficient to have diſcharged the whole. It were endleſs, ſays Dr Hacket (87), to repeat all the contrivances againſt his Lordſhip during his confinement, the bills which were drawn up, and ſuits commenced againſt him, as if it were on purpoſe to impoveriſh him, and to plunge him into debt, that ſo if he procured his enlargement from this priſon, he might not be long out of another. He petitioned the Lord Keeper, complaining, that he was ſummoned, being a priſoner, to appear at the ſame time before three or four courts of juſtice; that his means were taken from him, his ſervants ſome of them had betrayed him, others had left him; that he was forced to make but one meal a-day, and that but a poor one, for want of means to buy him bread ‡. However, he bore all theſe afflictions with the utmoſt patience; and if a ſtranger had ſeen his Lordſhip in the Tower, he would never have taken him for a priſoner, but rather for the Lord and Maſter of the place: for he lived with his uſual chearfulneſs and hoſpitality, and wanted only a larger allowance to give his gueſts a heartier welcome; for now he was confined to bare 500 l. a year (88), a great part of which was conſumed in the very fees of the Tower. He diverted himſelf, when alone, ſometimes with writing Latin poems, and at other times with the hiſtories of ſuch as were noted for their ſufferings in former ages. And for the three years and a half that he was confined, he was the ſame man as elſewhere, excepting that his frequent law-ſuits broke his ſtudies often; and it could not be ſeen, that he was the leaſt altered in his health, or pleaſantneſs of his temper (89).

[*CCC*] *The King was reconciled to him.*] When ſome after this were ſet on to try how he ſtood affected to his proſecutors, he anſwered, that *if they had no worſe foes than him, they need fear no harm, and that he ſaluted them with the charity of a Biſhop*; and when Kilvert came to him to crave pardon and indemnity for all the wrongs he had done, *I aſſure you pardon*, ſays the Biſhop, *for what you have done before; but this is a new fault, that you take me to be ſo baſe a ſpirit as to defile myſelf with treading upon ſo mean a creature.* LIVE STILL BY PETTYFOGGING AND IMPEACHING, AND THINK THAT I HAVE FORGOTTEN YOU (90).

* He had been examined in the Tower by two Biſhops and 3 Doctors of Law about it in the beginning of February 1637. Strafford, State papers, &c. in a letter to his Lordſhip from Mr Garrard, dated February 7, 1637. vol. ii. p. 149.

(84) Clarendon tells us that he refuſed to go into Ireland; for he had much ado to defend himſelf againſt the Archbiſhop [Laud] here, but if he went into Ireland, there was a man [the Earl of Strafford] that would cut off his head in leſs than a month. Hiſt. of the Rebellion, &c. p. 357.

(85) That is, till his Lordſhip's diſcharge in 1640.

(86) Clarendon ſays, he was committed without the compaſſion of any, except thoſe, who out of hatred to the government, were ſorry they had loſt ſo uſeful a companion. Ubi ſupra, p. 135.

(87) p. 128. part 2.

‡ The petition was ſhewn to the King, and relief was granted him in the firſt article; but in the ſecond, his Majeſty calling the Lord Treaſurer, was told by his Lordſhip, that he had uſed all means and diligence to have the Biſhop's lands extended, but yet could receive no profits of them; ſo that out of nothing nothing could be had. Garrard's letter to Wentworth, in Strafford's letters, &c. as before.

(88) Paid out of the profits of his new eſtate in Wales, purchaſed, as has been ſaid, of William Earl of Pembroke, for 10,000 l.

(89) Hacket, as before.

(90) Philips, p. 222.

he ſeconded the Lord Say's famous ſpeech againſt Archbiſhop Laud, but at the ſame time applied himſelf to the King, and made the greateſt profeſſions of duty to his Majeſty, and zeal to the church [DDD]. And ſhortly after, in a ſermon preached before the King, as Dean of Weſtminſter, mentioned the Preſbyterian diſcipline (ss) with great contempt, and in the proſecution of the Earl of Strafford, he defended the right of the Biſhops to vote in caſes of blood in a very pertinent learned ſpeech, but declared his opinion at the ſame time, that they ought not to be preſent at that trial, and offered, not only in his own name, but for the reſt of his brethren, to withdraw always when that buſineſs was entered upon [EEE]. However, when the bill of attainder had paſſed both houſes, he perſuaded his Majeſty againſt his private conſcience to give the royal aſſent to it [FFF]. In May 1641 he defended in a long ſpeech, very conſiderable for the learning and ſtrength of argument it contained, the right of the Biſhops to ſit in the houſe of peers, which had this effect, that the bill for depriving them of that right was then thrown out by the houſe. He was advanced to the ſee of York [GGG] December the 4th following (tt), and when upon the revival of the lately rejected bill the mob being gathered about the parliament-houſe to prevent the Biſhops from entering therein, inſolently tore his gown from his back, he returned to the Deanery, and convened thither all his brethren that were in town (uu), and propoſed to them as abſolutely neceſſary, that they ſhould unanimouſly and preſently prepare a proteſtation to ſend to the houſe againſt the force that was uſed upon them, and againſt all the acts which were or ſhould be done during the time that they ſhould be kept by force from doing their duties in the houſe, and immediately having pen and ink ready, he prepared a proteſtation, which being read to them, they all approved, and being engroſſed, they ſet their hands to it (ww) December the 27th, when the Archbiſhop went to Whitehall, and preſenting it to his Majeſty, to whom it was directed, humbly deſired, that he would ſend it to the Houſe of Peers, ſince they could not preſent it themſelves, and command that it ſhould be entered in the journal of the houſe: he obtained his ſuit, but the conſequence was the commitment of himſelf with the reſt of the petitioners by the parliament on an accuſation of high-treaſon to the Tower, where they all remained till the bill for putting them out of the houſe was paſſed, when on May 5th, 1642, they were releaſed, and June the 27th following, our Archbiſhop in perſon was inthronized in his own cathedral at York, where the King then was, but his Majeſty left it in July, and the Archbiſhop was forced away ſoon after. Being at Cawood one night very late, Dr Ferne, whom he had formerly made Archdeacon of Leiceſter, came in with a ſollicitous countenance, and begged him to leave the houſe and the country immediately, for that the younger Hotham was coming with

(ss) He obſerved that it was a government fit only for taylors and ſhoemakers, not for noblemen and gentlemen. Clarendon's Hiſt. of the Rebellion, &c. p. 307.

(tt) Le Neve, ubi ſupra, p. 193.

(uu) Lord Clarendon informs us, that it was within a very few days before Chriſtmas; and the petition upon the face of it appears to be preſented on the 27th of December.

(ww) Depending, ſays Lord Clarendon, on his great experience in the rules of the houſe, where he had ſat ſo many years, and in ſome parliaments as ſpeaker, whilſt he was keeper of the great ſeal. Ibid. vol. I. part ii. p. 350. 8vo edition.

[DDD] *He ſeconded Lord Say's ſpeech, and profeſſed zeal to the church.*] After Lord Say had done, the Biſhop got up, and ſaid, That he had long known that noble Lord, and had always believed him to be as well affected to the church as himſelf. However, he profeſſed to the King, that he had a perfect deteſtation of thoſe perſons, who appeared to have no affection or duty toward his Majeſty, and of all evil intentions againſt the religion eſtabliſhed; and that the civility he had expreſſed toward them, was only out of gratitude for the good which they had ſhewed to him, and eſpecially that he might the better promote his Majeſty's ſervice (91).

[EEE] *To withdraw when that buſineſs was entered upon.*] His ſpeech in defence of the right of the Biſhops is extant, and lies before me. His arguments are clear and undeniable, according to the legal eſtabliſhment of the conſtitution. But having aſſerted the right, and therein ſhewn that it was at their own option, whether they would attend, or no, at that Lord's examination in the Houſe, he thought it no inconſiſtence voluntarily to wave their privilege. The whole fact ſtands thus: Some of the Biſhops greatly diſliking the violence of the Earl of Strafford's proſecution, when his life was plainly ſtruck at, thought to caſt an odium upon it as cruel, by declaring in the moſt ſolemn manner, that they were forbid by the canons of the church to give their aſſiſtance in caſes of blood; upon this a motion was made, that the Biſhops might have no vote in the paſſing that act of attainder, becauſe they pretended it was to have their hands in blood, which was againſt an old canon. The Biſhop of Lincoln ſpoke againſt that motion, and defended their right; but having done ſo much, he declared that they ought not in prudence to be preſent on account of the canons, and offered, not only in his own name, but for the reſt of the Biſhops, to withdraw always when that buſineſs was entered upon; and ſo, ſays the noble hiſtorian (a little ſeverely) betrayed a fundamental right of the whole order, to the great prejudice of the King, and to the taking away the life of that perſon who could not otherwiſe have ſuffered (92). However juſt, though ſevere, this remark may be, yet it ſhews this Biſhop's great weight and authority among his brethren, whom he here prevailed with to ſurrender their public right up to their private conſcience.

[FFF] *To give his aſſent to it.*] Here, on the other hand, our caſuiſt prevailed with his Majeſty to give up his private to his public conſcience. Lord Clarendon lays the weight upon him, though three other Biſhops joined with him, as it is ſaid (93), upon this trying point, which at the ſame time that it ſerved to diſcover what kind of ſpirit they were of, proved an occaſion to Biſhop *Juxon* of giving an illuſtrious example of a moſt heroical integrity, by telling the King, that *he ought to do nothing with an unſatisfied conſcience, upon any conſideration in the world* (94).

[GGG] *He was advanced to the ſee of York.*] Lord Clarendon relates (95) the occaſion of this advancement thus: After the King thought it neceſſary to make him Archbiſhop of York, which, as the time then was, could not qualify him to do more harm, and might poſſibly diſpoſe and oblige him to do ſome good, he carried himſelf ſo inſolently in the Houſe and out of the Houſe to all perſons, that he became much more odious univerſally than ever the other Abp [Laud] had been, having many more enemies than he, and few or no friends, of which the other had abundance; and the great hatred of the man's perſon and behaviour, was the greateſt invitation to the Houſe of Commons to revive ſo irregularly that bill to remove the Biſhops, and was their chief encouragement to hope, that the Lords, who had rejected the former, would now paſs and conſent to this ſecond bill. This ſure is going great lengths againſt the Archbiſhop of York; and, with ſubmiſſion to better judgment, I can't help thinking it a little far fetched, and ſeems to be ſo much laboured, as to give ſome room for ſuſpecting a prejudice, eſpecially when we find him repreſented by the ſame pencil in poſſeſſion of the kindneſs of ſome, not only as a known enemy to the Archbiſhop of Canterbury, but as a ſupporter of thoſe opinions and thoſe perſons which were againſt the church. Indeed with regard to the perſons the thing is notorious, and his Lordſhip has given us a remarkable

(95) Ubi ſupra, p. 351.

with his forces to ſeize and kill him, having ſolemnly vowed it in revenge for ſome opprobrious words the Archbiſhop had given him for his baſe uſage of the King at Hull (*xx*), and that he would be there by five o'clock in the morning. Upon this warning, the Archbiſhop made his eſcape, and from that time never came into Yorkſhire; the wars then breaking out all over England. After this he retired into Wales, to his eſtate at Aber Conway, where he repaired and fortified Conway caſtle for the King, which ſo much pleaſed his Majeſty, that by a letter, dated from Oxford Auguſt 1, 1643, *He heartily deſires him to go on with that work*; *aſſuring him, that whatever money he ſhould lay out upon the fortifications of the ſaid caſtle, ſhould be repaid unto him, before the cuſtody thereof ſhould be put into any other hands than his own, or ſuch as he ſhould recommend.* By virtue of this warrant, the Archbiſhop, on the ſecond of January this year, deputed his nephew William Hooks to have the cuſtody of the caſtle, and gave the country people leave to lay up their plate, jewels, money, writings, and other valuable goods in it; each perſon having an inventory of his own ſhare. Some time after, being ſent for to attend the King at Oxford (*yy*), he gave his Majeſty the beſt advice that his knowledge and experience furniſhed him with; and among other things declared, that Cromwell, taken into the rebels army by his couſin Hampden, was the moſt dangerous enemy that his Majeſty had: for though he were at that time of mean rank and uſe among them, yet he would climb higher. And then proceeding to give Cromwell his true character, he concludes, *In ſhort, every beaſt hath ſome evil properties, but Cromwell hath the properties of all evil beaſts.* My humble motion is, either that you would win him to you by promiſes of fair treatment, or catch him by ſome ſtratagem, and cut him off [*HHH*]. After ſome ſtay at Oxford, the Archbiſhop returned to his own country, having received a freſh charge from his Majeſty to take care of all North Wales, but eſpecially of Conway caſtle. But being diſpoſſeſſed of it about a year afterwards by the King's party, he aſſiſted a colonel of the parliament to retake it, who poſſeſſed himſelf of it [*III*]. After this time he lived in a very private manner at Llandegay in that neighbourhood till the King's death, whom he did not ſurvive much above a year; which time he ſpent in ſorrow, and ſtudy, and devotions, riſing conſtantly every night out of his bed at midnight, and praying for a quarter of an hour on his bare knees, having nothing upon him but his ſhirt and waiſtcoat. At laſt he was ſeized with a quinſey, which put an end to his life (*zz*) on the 25th of March 1650, on his birth-day, being exactly ſixty-eight years of age. He was interred in Llandegay church, where, ſome years after, his nephew and heir Sir Griffyth Williams erected on the north wall a very handſome monument, with the effigies of the Archbiſhop kneeling in white marble, and under it an inſcription, compoſed by Dr Hacket his chaplain, who deſcribes him as an eminent pattern of munificent hoſpitality and charity (*aaa*), which in another place he explains to point to his generoſity, eſpecially to gentlemen of narrow fortunes, and poor ſcholars in both univerſities; his diſburſements this way every year amounting to a thouſand, and ſometimes to twelve hundred

(*xx*) Hotham came accordingly, and the houſe being ſurrendered to him upon a capitulation, he ſuffered the ſoldiers to plunder it, contrary to the articles, being much vexed at his diſappointment. Le Neve, ubi ſupra, p. 215.

(*yy*) At this time he reſigned his commendam of the deanery of Weſtminſter, which Mr Philips obſerves, p. 203, was in 1644, and probably his other commendams.

(*zz*) The words of his epitaph are, *Animam angina extinctus piiſſime Deo reddidit.*

(*aaa*) The words are, *munificentiæ, liberalitatis, hoſpitalis lautitiæ miſericordiæ erga pauperes inſigne exemplum.*

able inſtance of it; his ſeconding Lord Say's ſpeech againſt Laud: but the noble hiſtorian has produced no evidence of any opinions ſupported by our Archbiſhop againſt the church, unleſs the high commiſſion court*, and the ſeventeen canons made by the convocation in May 1640, after the diſſolution of the [ſhort] parliament, be eſteemed a part of the church, which Archbiſhop Laud deſired might die quietly without blemiſhing the church (96). But they were afterwards condemned by the ſucceeding [long] parliament, and the ſucceeding convocation, where Biſhop Williams held the chair in the committee appointed to review thoſe canons (97). Nor can there, I believe, be any inſtance given in ſupport of this charge, our author's ſteady adherence to the legal eſtabliſhed church being the moſt unexceptionable part of his character, and is conſtantly inſiſted upon and defended by Biſhop Hacket, who was never reckoned lukewarm in the church's cauſe. Mr Eachard tells us (98), that notwithſtanding the world's opinion of his principles, he continued ſo exact and ſtrict to the rules of the church of England, that in his laſt ſickneſs wanting a regular preſbyter to give him the ſacrament, abſolution, &c. he purpoſely ordained an honeſt and pious ſervant of his own to adminiſter to him in thoſe holy offices.

[*HHH*] *And cut him ſhort.*] ‘I knew him,’ ſays he, ‘at Bugden, but never knew his religion. He was a common ſpokeſman for ſectaries, and maintained their part with ſtubborneſs. He never diſcourſed as if he were pleaſed with your Majeſty and your great officers. Indeed he loves none that are more than his equals. Your Majeſty did him but juſtice in repulſing a petition that was put up by him againſt Sir Thomas Steward of the iſle of Ely, but he takes them all for his enemies, that would not let him injure his beſt friend; and, above all that live, I think, he is *injuriarum perſequentiſſimus*, as Portius Latra ſaid of Cataline. He talks openly, that it is fit ſome ſhould act more vigorouſly againſt your forces, and bring your perſon into the power of the parliament. He cannot give a good word of his general the Earl of Eſſex, becauſe he ſays the Earl is but half an enemy to your Majeſty, and has done you more favour than harm. His fortunes are broken, that it is impoſſible for him to ſubſiſt, much leſs to be what he aſpires to, but by your Majeſty's bounty, or by the ruin of us all, and a common confuſion, as one ſaid, *Lentulus ſalva republica ſalvus eſſe non potuit* (99).’

[*III*] *Who poſſeſſed himſelf of it.*] Lord Clarendon having expoſed our Archbiſhop's caſuiſtry, as the King's confeſſor, in the caſe of the Earl of Strafford, concludes it thus: This was the argument of that unhappy caſuiſt, who truly it may be did believe himſelf; for towards the end of the war, and when the King's power declined, he being then an Archbiſhop, did in perſon aſſiſt the rebels to take a caſtle of the King's, in which there was a garriſon, and which was taken by a long ſiege, becauſe he might thereby better enjoy the profits of his own eſtate, which lay thereabouts. No doubt the ſtory was thus related to that noble hiſtorian (100). But Dr Hacket gives the particulars of the fact, which, beſides what we have inſerted above in the text, is, that Sir John Owen, a colonel of the King's, coming that way after a defeat in 1645, obtained of Prince Rupert to be under him commander of the caſtle; and ſo ſurprizing it by force, entered it, notwithſtanding the King's promiſe, and the expence laid out not being refunded. Thereupon the Archbiſhop, after ſeveral remonſtrances made to the court without any ſucceſs, he being joined by the country people, whoſe properties were detained in the caſtle, and aſſiſted by one Colonel Mitton, who was really a violent man againſt the King, they forced open the gates, and entered the caſtle, which Colonel Mitton poſſeſſed himſelf of; but that was only agreed

to

* He was preſent but once there, not liking either the multiplicity of their cauſes, or the ſeverity of their cenſures.

hundred pounds [KKK]. His epitaph likewiſe informs us, that he laid out no leſs than twenty thouſand pounds in great benefactions. The particulars we ſhall put together below [LLL]. It is univerſally agreed, that his perſon was handſome and his preſence ſtately, his geſture magnificent and his looks generous, the whole exterior being animated with a great mind and a high ſpirit [MMM], which raiſed him to aim at great things, and effect them. His temper was hot and haſty in reſenting, and as ready in forgiving; the characteriſtic of his country. He entertained a favourable opinion of the Puritans, but was againſt ſhewing them any indulgence, which did not perfectly conſiſt with the legal eſtabliſhment of the church. To this he firmly adhered, and continued to the laſt to teſtify his diſlike of any alterations or innovations whatſoever therein, either to enlarge or contract the ſettled forms. He was poſſeſſed of a good ſhare of learning, had a ready wit and a ſtrong memory, but in his writings fell into the exploded pedantry which was the vice of his time. Beſides what hath been already mentioned, he publiſhed a ſermon under the title of *Perſeverantia Sanctorum, &c.* (*bbb*) He had reſolved upon publiſhing the works of his predeceſſor in Lincoln dioceſe, the famous Robert Groſthead, which were ſcattered in ſeveral libraries at home and abroad; and he digeſted what he could procure of them, and wrote arguments upon diverſe parts of them. He likewiſe undertook a Latin Commentary upon the Bible, and the notes, collected from all good authors by his own hand, were once in the cuſtody of Mr Gowland, keeper of Weſtminſter college library. His Lordſhip, knowing well that to perform ſuch a taſk completely was above the abilities of any one man, intended to leave it to be finiſhed by twelve or more of the beſt ſcholars in the nation, whom he had in his eye, and was willing to give them twenty thouſand pounds, rather than it ſhould be unfiniſhed (*ccc*).

(*bbb*) The whole title is, *Perſeverantia Sanctorum.* A ſermon of perſevering in patience, repentance, and humiliation in time of afflictions, preached before the Lords of the parliament, on the laſt general faſt, upon Aſh-Wedneſday, the 18th day of February, at the collegiate church of St Peter in Weſtminſter, by the right honorable and right reverend Father in God John Lord Biſhop of Lincoln, and Dean of the ſaid church.

(*ccc*) This deſign it is well known was executed by Mr Pool, under the title of *Synopſis Criticorum.*

to by the Archbiſhop on condition that every proprietor might obtain his own, which the Colonel ſaw performed (101).

[KKK] *And ſome years* 1200 *l.*] The following inſtance ſhews remarkably the generoſity of his temper. When Peter du Moulin, flying from the ſiege of Mount Albans, came into England, the Biſhop hearing of him, and gueſſing that he might very probably be in want, ordered his chaplain Dr Hacket to make him a viſit, and bid him carry him ſome money, not naming any ſum; upon which Dr Hacket ſaying he could not give him leſs than 20 l. I did demur upon the ſum, ſays the Biſhop, to try you. Is 20 l. a fit gift for me to give a man of his parts and deſerts? Take 100 l. and tell him he ſhall not want, and I will come ſhortly and viſit him myſelf; which he did afterwards, and was as good as his word in ſupplying his wants while he was in England, and then ſent for his ſon, and gave him a good fine cure in Wales, with a condition of allowing his mother ſomewhat for her ſupport (102).

[LLL] *The particulars of his benefactions.*] Theſe are as follow. Upon Weſtminſter Abbey 4500 l. Upon the library there 500 l. The college debt 300 l. He new-caſed one ſide of the ſquare of Lincoln college in Oxford, and built the chapel (103), and furniſhed it with very handſome utenſils, eſpecially for the communion table. In St John's college, Cambridge, he founded two fellowſhips and four ſcholarſhips, and gave the ſociety the perpetual advowſon of four eccleſiaſtical benefices (104), two with cure, the rectories of Freſhwater and Souldren, and two without cure, the donatives of St Florence and Aberdarron, beſides a very large fair gilt bowl, with a cover, for public uſe on feſtivals. He likewiſe contributed 2011 l. 13 s. 4 d. towards the building of the caſe of the new library there, which after his death was finiſhed with what part the troubleſome times had ſpared of his mangled library, and by ſelling the duplicates and imperfect books (to which adding the ſum of 125 l. 4 s. 1 d.) the college made a purchaſe of lands to the value of 20 l. per ann. 6 l. 13 s. 4 d. whereof to the library keeper for the augmentation of his ſtipend, and the reſt for books for the library, as his Lordſhip's perpetual gift (105). We are informed that the college accepted of his foundation of fellows and ſcholars, out of gratitude to him, at leſs than half the revenue ſufficient to maintain it; for which reaſon, after the ſuſtaining of much loſs, they were at laſt forced to ſink the fellowſhips in their own defence, and in compliance with the ſtatute of the college. It is certain he was ſo ſenſible of the kindneſs of the college to his foundation, and how unhappily the deſigns of making them reparation for the detriment they had ſuſtained thereby were fruſtrated, that he reſolved to leave them an eſtate of 300 l. per ann. that the writings of ſettlement were actually drawn, and read over to, and approved of by him; but it being ſomewhat late at night, and his Lordſhip much indiſpoſed, he deferred the ſigning and ſealing of them till the next morning, before which time it pleaſed God to take him out of the world (106).

[MMM] *A high ſpirit.*] This laid him open to be galled by his enemies, of which nobody took more advantage than Archbiſhop Laud, who himſelf ſeems likewiſe to have had his reſt much diſturbed by Williams, as appears by ſome paſſages in his diary. Thus: *October* 23. *I dreamt the Keeper was dead. June* 14, 1626. *Dreamt the Biſhop of Lincoln came to me with iron chains, but returning freed from them, he leapt upon a horſe; neither could I overtake him. In March* 1627, *Sir Geo. Wright whiſpered in my ear in my ſleep, that I was the cauſe that Lincoln was not admitted again into favour. July* 13, 1637. *Dreamt at Andewick, that the Biſhop of Lincoln came and tried to ſit above me at the council board, and that the Earl of Holland came and placed him there.*—— On the other hand, all authors agree, that Williams was not leſs haunted by Laud, whoſe very perſon he affected to deſpiſe, if we may believe Lord Clarendon; and it is evident that their mutual animoſity firſt helped to ruin each other, and then ſerved to ruin the church (107).

(101) See alſo Philips, p. 286.

(102) Hacket, part iii. p. 33.

(103) It is in a very good taſte.

(104) Two of them he had obtained of King James, as before mentioned.

(105) Philips, p. 311.

(106) Le Neve, ubi ſupra, p. 228.

(107) The caſe ſeems to be this: Laud heartily hated Williams for his want of zeal in the cauſe of the church, according to his notions; and Williams heartily deſpiſed Laud for his want of wiſdom and policy in any cauſe.

P

WILLIS [Thomas], the moſt eminent phyſician of his time, was born January 27, 1621-2, at Great Bedwin in Wiltſhire (*a*), where his father, Mr Thomas Willis, then reſided (*b*); but ſhortly after removing to North Hinkſey, near Abingdon in Berkſhire, ſent this his eldeſt ſon to ſchool to the famous Mr Edward Sylveſter at Oxford, where the ſcholar's diligence meeting with a good capacity and ready apprehenſion, rendered him fit for the univerſity about the age of fifteen, when he was taken under the patronage of Dr Thomas Iles, Canon of Chriſt-church, and admitted a Batler of that college in 1636 (*c*). In this ſituation he applied himſelf with the ſame innate induſtrious temper to the academical ſtudies, and proceeded A. B. June 19, 1639. He likewiſe commenced A. M. on 18th of the ſame month, 1642 (*d*), having at that time ſome thoughts of chooſing divi-

(*c*) Wood, as before. Our author's grandſon, Browne Willis, Eſq; erected a handſome monument in Chriſt-church to Dr Iles, in 1757.

(*d*) Idem, in Faſti Ox. vol. I. 279. & in vol. II. col. 5.

nity for his profeſſion. But his father [A] dying the next year, he left Oxford, and went to take care of his inheritance at North Hinkſey, where he continued, till being haraſſed by the parliament party, who were encamped not far off in the neighbourhood of Oxford, he withdrew for protection into that city, which being garriſoned for the King, he there bore arms in the ſervice of his Majeſty till it ſurrendered; when having ſeen the conſtitution of the church overturned, and no encouragement left for the ſtudy of divinity, he turned his thoughts to phyſic (e); in which faculty he took the degree of Bachelor, December 8, 1646 (f): and applying himſelf to the practice of his profeſſion with remarkable induſtry, he went conſtantly every Monday to Abingdon market (g). At the ſame time being piouſly diſpoſed, and a zealous ſon of the church of England, he had prayers and ſacraments daily performed at his chambers in Canterbury quadrangle at Chriſt-church, by ſome of his friends [B], according to the then aboliſhed church liturgy. All this while his buſineſs increaſing with his fame, he quitted the college, and took a houſe in St John Baptiſt's pariſh, oppoſite to Merton college; where, notwithſtanding the imminent danger of it, the ſame method of divine ſervice was daily practiſed. About this time he married Mary the daughter of Dr Samuel Fell, the ejected Dean of Chriſt-church (h). In the midſt of thoſe diſtractions, which then miſerably rent the public affairs, Oxford was remarkably diſtinguiſhed by a confluence of learned men of all parties and perſuaſions, who, confirming the truth of that maxim, that *true learning is of no party*, formed themſelves into a philoſophical ſociety for the improvement of natural knowledge. Of this ſociety our author was one of the firſt members (i); and particularly proſecuting the ſtudy of chymiſtry, he publiſhed in 1659 thoſe remarkable tracts, which firſt brought his merit into the knowledge of the world, *Of Fermentations, of Fevers, and of Urines* [C]. Theſe pieces were not leſs illuſtrious proofs of his philoſophical than of his medical genius: And upon the King's reſtoration the next year, our phyſician was recommended by Archbiſhop Sheldon to the Sedleian profeſſorſhip of natural philoſophy at Oxford, into which he was unanimouſly choſen Auguſt 8, in the room of Joſhua Croſs, then ejected (k); and he ſeldom failed for a conſiderable time of reading ſuch lectures, as drew an unuſual number of auditors *. He took his doctor of phyſic's degree on the 30th of October following (l). Upon the inſtitution of the Royal Society, he became one of the firſt members of

[A] *His father.*] Dr John Fell, Biſhop of Oxford, gives us the following account of this gentleman (1), that he was deſcended of an honeſt family, that he had a liberal education, and took the degree of A. M. in the univerſity of Oxford, whence, chooſing a country life, he retired to an eſtate (2) which he was poſſeſſed of near the ſame city, and ſolely attended his domeſtic affairs, and the care of his family; that during the civil wars he was taken off by the contagion of a camp-fever, leaving his ſon an orphan of about 20 years of age. This account is expreſly controverted by Mr Wood (3), who tells us, that this Thomas Willis of North Hinkſey near Abingdon in Berkſhire, was ſome time a retainer to St John's college, but took no degree; that he afterwards became bailiff or ſteward to Sir Walter Smith of Bedwin, and in the laſt part of his life reſided altogether at North Hinkſey; and that he was the ſon of another Thomas Willis, a taylor, who moſtly lived at Kennington near Abingdon: but for this article the antiquary alledges nothing more than hearſay; for which another writer informing us there was no grounds, ſuppoſes that our author's father was ſent to St John's college on account of his relation to Dr Francis Willis, ſome time Preſident of that college, who having no children, left an eſtate at North Hinkſey of about 70 l. a year to his family; that engaging in the civil wars as a royaliſt, he died in defence of that cauſe, Auguſt the 4th, 1643, and was interred in the chancel of Hinkſey church, in the ſame grave with his wife, as appears by the inſcription on the grave-ſtone; that beſides our author, his eldeſt, he left two other ſons, namely John, who was bred an attorney at law, and became chapter-clerk at Chriſt-church, and compoſed an excellent Ledger-book, which goes by his name, from the old records and evidences of the college eſtates; that this John left an only daughter, Margaret, who married Mr George Cooper, Regiſter to the univerſity, from which match deſcended Dr George Cooper, Fellow of New college, and an eminent phyſician at Oxford. The other brother of our author, named William, died a Fellow of Trinity college in the ſame univerſity, and A. M. not long after the reſtoration. That our author's father had a younger brother named John, from whom deſcended the family of Willis, of conſiderable note at Halſhead-hall, in the pariſh of Preſcot in Lancaſhire. (4) Upon the whole, it cannot be denied that Mr Wood's information concerning our author's grandfather is not altogether ſo improbable as this writer intimates, who has given us no account at all of him, only inſinuates that he was deſcended from a family of his name at Great Bedwin in Wiltſhire, where, ſays he, ſeveral of the name occur in the pariſh regiſter. The reader cannot but obſerve that the circumſtances of our author's education, as his going to ſchool every day from Hinkſey four miles to Oxford, and not boarding in the city; his being entertained in the family of Dr Iles as his exhibitioner, and admitted in the college a batler, the loweſt order in the univerſity, and his keeping Abingdon market at his firſt ſetting out in the practice of phyſic, all ſpeak the low condition of his family; and indeed Dr Fell, who plainly intends his account of our author for a handſome panegyric upon his brother-in-law, ſays no more than that he was extracted from an honeſt family, *honeſta familia ortus*. It is certain that the meanneſs of the Doctor's birth was no real diſparagement to his perſon, who by his diſtinguiſhed merit became *Faber fortunæ ſuæ*.

[B] *Divine ſervice according to the church liturgy.*] Among others that attended this ſervice, were particularly Mr (afterwards Dr) John Fell (Biſhop of Oxford) brother-in-law to our author, Mr John Dolben, afterwards Archbiſhop of York, and Mr Richard Alleſtree, afterwards Provoſt of Eton college. Beſides theſe the congregation conſiſted of moſt of the loyaliſts in Oxford, and eſpecially thoſe ſcholars that were ejected in 1648 (5). This diſtinguiſhed part of our author's loyalty no doubt was of ſingular ſervice to him in his election to the Sedleian lecture of natural philoſophy after the reſtoration.

[C] *Of fermentation*, &c.] In this treatiſe the Doctor firſt ſtarted that hypotheſis, which in his ſubſequent writings he made uſe of for the ſolution of all the phænomena appearing either in the natural or morbid ſtate of the body, as alſo for the operation of medicines. He maintains, that fermentations occaſioned by the chymical principles of the blood, are the grand principle of life from its firſt appearance in the *punctum ſaliens*, through all its natural growth, to its decay and final diſſolution; the juſt proportion and ſtate of theſe principles conſtituting the health of the body and the diſeaſes, and at laſt the death of it, being brought on either by the exceſs or defect of this proportion, cauſing either too great or too little fermentation therein. For inſtance, in fevers, the principal cauſe of it (*m*). In 1664, he diſcovered the famous mineral ſpring at Aſtrop [*D*], near Brackley, in Northamptonſhire; and the ſame year he publiſhed his celebrated treatiſe on the *Anatomy of the Brain* [*E*]. The plague raging, eſpecially in London, this and the following year, the Doctor drew up, in 1666, *A plain and eaſy Method for preſerving thoſe that are well, from the Infection of the Plague, or any contagious Diſtemper in City, Camp, Country, Fleet, &c. and for curing ſuch as are infected with it* (*n*). The ſame year, his conſtant patron Archbiſhop Sheldon, always ſtudious to promote his welfare, having prompted him to ſettle in the metropolis, he removed ſoon after to the city from Oxford, and took a houſe in St Martin's lane, Weſtminſter (*o*). This ſtep effectually anſwered the purpoſe intended by it. He preſently grew into the moſt extenſive practice of any profeſſor at that time in the faculty; and he executed it with diſtinguiſhed ſkill, care, and induſtry (*p*). Yet he did not neglect the duties of religion; but as he roſe early in the morning to attend divine ſervice, which he ſeldom or never failed of frequenting, before he viſited his patients, he agreed with the ſchoolmaſter, who taught in the veſtry-room of St Martin's church, to read prayers at ſix in the morning in ſummer, and at ſeven in the winter half year; and at five in the evening. And ſeeing the ſervice at theſe times much frequented, after having continued to pay the ſalary during his life-time, he ſettled at his death twenty pounds a year for that purpoſe (*q*). About this time he was elected a fellow of the college of phyſicians in London (*r*), and was appointed phyſician in ordinary to King Charles

cauſe of diſeaſes, he imputes their riſe to the exceſſive fermentation, which cauſes too great an effervеſcence, and a boiling heat in the blood.

This piece being attacked by Edmond de Meara, doctor of phyſic at Briſtol, and fellow of the college of phyſicians at London, was defended by Dr Richard Lower *, in a piece intituled *Diatriba, &c.* in the preface to which he gives this reaſon for publiſhing a vindication of our author, becauſe not only the name of Willis, but even of philoſophy itſelf, was injured; and that he does not attempt to aſſert the cauſe of Willis as though he needed any aſſiſtance, but merely to eaſe him of the trouble of ſuch a taſk, who was deſigned for nobler employments, than attending to the calumnies of his antagoniſt. He declares himſelf greatly ſurprized that Willis, equally celebrated for his courteſy and gentleneſs of manners, who neither by word or deed had given offence to Meara, ſhould be perſecuted with the moſt notorious falſities and reproaches. But this uſage, continues he, may be expected from one who has vilified the greateſt names and perſons, Des Cartes, Hervey, and Gliſſon. This Briſtol doctor denied Hervey's famous diſcovery of the circulation of the blood; charges him with advancing many ridiculous abſurdities, and even impious opinions (6). Neither does he give Gliſſon any better quarter, for attempting to confirm Hervey's doctrine of the ſanguifying faculty of the blood, which having tranſcribed from that author, he concludes thus: *Ita præſidenter philoſophatur Gliſſonius, non aliter quam ſi ut Actæon Dianam, naturam nudam ſine veſte conſpexiſſet* (7). He then enters upon the defence of Galen's doctrine of the four humours againſt Willis; and having charged him with borrowing his account of the heart from Carteſius, whom he endeavours to expoſe as confounding the vital and benign heat with the deſtructive fervors and flame in fevers; which confuſion, ſays he, though it may be pardoned in Carteſius, yet is abſolutely inexcuſable in Willis; *quæ tamen Confuſio quanquam Carteſio, ingeniis aliorum minus ſolidis aliquam educationis umbram venditanti, concedi poſſet, Williſio certe, in academia Oxonienſi philoſophanti, imo philoſophiæ reſtaurationem parturienti, nullatenus concedi poteſt.*

* See his article.

(6) Ch. iv. p. 54, 55.

(7) Ch. v. p. 57.

The following cenſure of Meara is worth notice: he declares his indignation againſt this new hypotheſis to be chiefly occaſioned by the introduction of a new and pernicious practice founded upon it. This remark furniſhed Dr Lower with an opportunity of obſerving on the contrary, that no change was made by it in the practice, nor any alteration in ſuch remedies as experience had approved. The ſame thing is alſo expreſsly intimated by Dr Willis, who claims no other merit by his hypotheſis, than that of founding the practice, which was almoſt wholly empirical before, upon a better way of reaſoning, and thereby of proceeding to a more rational practice. However, it muſt not be omitted, that the Doctor (as is uſually ſeen in the caſe of a new invention) became ſo enamoured of his darling hypotheſis, as to carry it to an indefenſible, not to ſay chimerical exceſs, which in the end proved its ruin. In no long time it was forced to give way to a more mechanical hypotheſis, ſupported by a better knowledge in mathematics, by Dr Pitcairn, and his followers; but this too, being carried to a like exceſs, has ſuffered the like fate. In ſhort, the true cauſe ſeems to be one of nature's ſecrets which are hidden from us mortals; and I am apt to think that the Θειον τι of Hippocrates is the beſt ſolution.

[*D*] *Aſtrop wells.*] It is ſuppoſed he was then (April 12) going upon a viſit to Lady Keyt, his patient, in Warwickſhire, and that obſerving his horſe to drink more largely of it than uſual, he thence took a hint, prompted by a natural curioſity *, to make ſeveral experiments upon the water, which he tells us himſelf he found impregnate with a vitriolic ſalt and ſteel, in which reſpect he ranks it with the German Spa and Tunbridge wells. Being found to have a good effect in the ſcurvy, aſthma, green ſickneſs, and other like diſeaſes, the fame of it ſoon ſpread itſelf over the kingdom. It has been before obſerved, that in making the experiments he was aſſiſted by Dr Richard Lower; and Mr Wood ſpares not to give the honour of the diſcovery more to this aſſiſtant, who he tells us was at this time with Dr Willis in this viſit of his patients. That Willis being then aſleep, or in a doſing condition on horſeback, Lower imparted the obſervation of the horſe's drinking to him, whereupon they jointly made the experiments; and Dr Willis afterwards recommended the water to his patients (8). The water is obſerved (9) to have an irony ſmell and taſte; is, according to ſome, impregnated with ſteel, and, according to others, purely vitriolic. It purges chiefly by urine.

* Pharmaceutice Rational. l. 3. ch. 7. part 2.

(8) Ath. Oxon. vol. II. col. 857. The antiquary here ſpeaks rather diſparagingly of our author, againſt whom it is ſaid he had ſome prejudice, by a quarrel between their ſervants. Br. Willis.

(9) Morton's Natural Hiſtory of Northamptonſhire, p. 281, 282.

[*E*] *The anatomy of the brain.*] The ſubſtance of this piece had been read as lectures in the ſchools at Oxford; but before he printed it, was much improved and diligently reviſed, as he acquaints us in the preface: where he alſo ingeniouſly acknowledges the aſſiſtance of Dr Lower in this work, both in the diſſections of the brain, and obſervations upon them, as a partner and fellow-labourer: he likewiſe had the advice of Dr Thomas Millington, Fellow of All Souls college, in the reaſoning part; and many of the figures were drawn up by Sir Chriſtopher Wren, with diſtinguiſhed curioſity and accuracy (10). Our author made ſeveral conſiderable improvements in this branch of anatomy. The brain having been found before to conſiſt of three parts, the *cerebrum*, *cerebellum*, and *medulla oblongata*, he examined theſe parts; and by tracing the medullary ſubſtance through all its inſertions in the viſcera, examining the origin of all the nerves, and going along with them into every part of the ſyſtem, the brain was, beyond all contradiction, proved to be the fountain of ſenſe and motion; and by the courſes of the nerves, the manner how any one part of the body conſpiring with any other to procure any one particular motion, was clearly ſhewn; and thereby it was made plain even to ſenſe, that very many parts joined at once in cauſing the ſame motion, the nerves cauſing the motions going into every one of thoſe parts, which are all ſtuck together (11).—However, as the ſubject was then ſo little known, it muſt not be diſſembled, that ſome of our author's reaſonings from the *phænomena*, eſpecially in the comparative anatomy of this part, are very extraordinary. For inſtance, he aſcribes the involuntary motions of the

(10) See his article.

(11) See Vieuſſens and Du Verney upon the ſame ſubject, who followed our author, but corrected ſome of his miſtakes in the anatomical part.

Charles II. who afterwards offered to confer upon him the honour of knighthood, which however he modeſtly declined (*s*), being not ſo deſirous of a diſtinction by any dignity or rank in his own perſon, as ſtudious to procure a handſome proviſion for his family [*F*], for whom he had the tendereſt regard. Having before he left Oxford put to that preſs *Pathologiæ cerebri & nervoſi generis ſpecimen in quo agitur de morbis convulſivis & ſcorbuto*, it came out at Oxford in 1667. 4to (*t*). And an account of it was publiſhed in the Philoſophical Tranſactions, No. 31. In this treatiſe, obſerving how much former authors had been miſtaken in their notions concerning hyſterical and hypochondriacal affections, he declares, that the moſt rational account which can be given of the ſymptoms attending thoſe diſorders, is by attributing them to convulſive motions. He likewiſe conjectures that the cholic, tympanites, and ſome ſorts of aſthmas, are in great part nervous diſtempers. Some animadverſions being made upon this piece by Dr Nathaniel Highmore in 1670, our learned author, in anſwer thereto, publiſhed *Affectionum quæ dicuntur hyſtericæ & hypocondraicæ pathologia ſpaſmodica vindicata, contra reſponſionem epiſtolarem Nathanielis Highmore, M. D. Cui acceſſerunt exercitationes medico-phyſicæ de ſanguinis accenſione & motu muſculari*. Lond. 1670. 4to (*u*). Addreſſed to Dr Highmore. An account of it is printed in the Philoſophical Tranſactions, No. 57. Dr Willis imagined hyſteric fits to proceed from the brain, Dr Highmore from the blood and lungs. Before the expiration of this year, he had the misfortune to loſe his wife, who died October the 31ſt, of a conſumption, exceſſively lamented by her huſband [*G*]. Among other means to divert his melancholy

(*u*) And at Leyden 1671. 12mo.

---

the heart and pulſe, &c. particularly to the *cerebellum*, excluſive of the *cerebrum*, which he makes to preſide over the voluntary motions (12). He aſcribes to the cortical part of the brain the generation and production of the animal ſpirits, of whoſe exiſtence he ſpeaks with the ſame aſſurance as that of the blood itſelf, from which he ſays they are produced. To theſe he aſcribes both imagination and memory; the firſt being a certain undulation or wavering of the animal ſpirits, begun inwardly in the middle of the brain, and expanded or ſtretched out from thence on every ſide towards its circumference. That memory conſiſts in the regeneration or flowing back of the ſame animal ſpirits from the exterior compaſs of the brain towards its middle. The reſt of the faculties of the ſenſitive ſoul, as ſenſe and motion, are ſeated in the ſame animal ſpirits. But though he concurs (13) with the commonly received opinion, that the brain is the chief ſeat of the rational ſoul, yet he neither thinks the *pineal gland* to be the ſeat of the ſoul, nor that its faculties ariſe from it; becauſe, ſays he, animals which ſeem to be almoſt quite deſtitute of imagination, memory, and other ſuperior powers of the ſoul, have this glandular kernel large and fair enough (14). He is clear, that neither the animal ſpirits themſelves, nor their traces nor footſteps, being indiſcernible, are this ſeat, but that very liquor or juice which is the latex or vehicle of the animal ſpirits, without which theſe could not be combined or bound, nor be able to combine and knit together the *ſyſtaſis* of the ſenſitive ſoul. 'Tis the action of this nervous juice, in a certain ſpirituous ferment, poured with the arterious blood, full of the nutritious humor, which is the genicular ſeed of the other parts of the body; whence to the defect, redundancy, and diſorder of this nervous *latex*, he aſcribes palſies, ſome atrophies, &c. and hence comes that great reproach, the pretence of a nervous caſe, as an excuſe for the ignorance of the phyſician.

Dr Boerhaave more than all recommends this treatiſe of the anatomy of the brain (15). This, ſays he, is the beſt treatiſe of anatomy that ever was publiſhed; to which is added a new deſcription of the nerves, and their diſtribution in this or that part: their origin and end is moſt excellently deſcribed; ſo that neither Galen nor Sylvius le Boe, who boaſted ſo much of their tables, are in any wiſe to be compared to Willis. This treatiſe is abſolutely the beſt of any to teach one the nature of the nerves that go out from the cranium, which ſerve the external ſenſes, the viſcera (which are called ſplanchnia) and the muſcles of the head and neck. You need look no further than Willis and his moſt excellent treatiſe in theſe matters. But if you would know the nerves which deſcend to all the muſcles of the body, then this treatiſe of Willis muſt be corrected by the *Neurologia* of Raymon Vieuſſens. So then, concludes he, Willis is the beſt that ever wrote of the nerves of the external ſenſes. Again, in another place he writes thus: Willis, in his *Anatome Cerebri*, eſpecially if you can get the London edition in 1670, which is much more copious than the former in 1664, there is no book more beautiful than this. The figures are ſo exact, as if they were the very body itſelf, which is owing to Sir Chriſtopher Wren, that complete mathematician, who was preſent at the diſſections of Lower and Willis, and deſigned them with his own hand. The other editions in Dutch and French are ſo altered, that the figures are ſcarce worth looking at. He afterwards proceeds to recommend Vieuſſens's *Neurologia*, and Ridley's *anatomy of the brain*; and concludes: I cannot give you better advice, than carefully to read theſe authors. For order in writing Willis is certainly preferable to the reſt. The ſame Boerhaave likewiſe recommends our author's treatiſe of urines.

[*F*] *He declined knighthood, being more ſtudious of wealth.*] Though the offer of this honour might be looked upon to proceed as much from a regard in his Majeſty to his own dignity, in having his phyſician in ordinary raiſed to that rank and quality, yet there was this particular inducement to accept it, that the ſame honour had been conferred upon the King's other phyſicians, to whom he muſt conſequently upon the refuſal yield the place in his attendance. But his heart was more ſet to procure a fortune for his family. Mr Wood tells us (16), that 'ſoon after his ſettling in 'Weſtminſter, he became ſo noted, and ſo infinitely 'reſorted to, for his practice, that never any phyſi'cian before went beyond him, or got more money 'yearly than he.' The antiquary does not ſtick to aſſert, that 'the drudgery which he underwent moſtly 'for the ſake of lucre, contributed very much to the 'ſhortening his life.' However that be, no doubt but it was the predominant paſſion of his conſort, as will be ſeen in the next remark.

[*G*] *Exceſſively lamented by the Doctor.*] Seeing the conſumption grow worſe, the Doctor propoſed to leave the town, and attend her in the country, as the likelieſt means to obtain the recovery of a perſon ſo dear to him as ſhe was; but ſhe could not be brought to conſent to it, as this would be putting an end to thoſe great gains which flowed in upon him from his buſineſs; thus preferring her children's increaſe of fortune even before her own life itſelf, ſhe fell a ſacrifice to her predominant paſſion. She died at the houſe in St Martin's Lane, and was buried in Weſtminſter-Abbey: where on a ſtone laid over her grave is the following inſcription written by her huſband:

> MARIA *uxor chariſſ.* THO. WILLIS, *M. D.*
> *necnon Sam. Fell, S. P. D. & Eccleſiæ Cathedralis*
> *Chriſti Oxon. Decani Filia; Fœmina, ſi quæ alia,*
> *pietate, prudentia, & morum ſuavitate inſignis;*
> *ſummo omnium, ac imprimis mariti ſui deſiderio &*
> *luctu obiit in vigilia omnium ſanctorum, Anno Do-*
> *mini* 1670; *jamq; hic conditur, feſti illius auroram*
> *expectans æternam.*
>
> *In eadem etiam humo Katharina eorum filia ſepulta*
> *fuit, poſtridie S. Michaelis, Anno Domini* 1667.

On the ſame ſtone were the following words afterwards added by Browne Willis, Eſq; in memory of the Doctor, who was buried by her,

> *Hic etiam jacet prædictus* THO. WILLIS, *M. D.*
> *celeberrimus. Obiit Nov.* 11. 1675. *Ætatis* 54.

under this affliction, he had recourſe to his philoſophical ſtudies; the reſult of which was his treatiſe *De anima brutorum, quæ hominis vitalis ac ſenſitiva eſt, exercitationes duæ* [*H*]; *quarum prior phyſiologica, ejus naturam, partes, potentias, & affectiones tradit; altera pathologica, morbos, qui ipſam & ſedem ejus primariam, cerebrum nempe & nervoſum genus afficiunt, explicat, eorumq; Therapeias inſtituit.* We have an account in Phil. Tranſ. No. 83. of this curious piece, which came out in 1672, 4to and 8vo (*w*). The Doctor maintains the ſoul of brutes, as being only vital and ſenſitive, to be conſtituted of mere matter, and to periſh naturally with their bodies; as he does alſo the ſenſitive ſoul of man; aſſerting immateriality, and conſequently immortality, to be the prerogative of the rational ſoul. Having tried the force of philoſophy to alleviate his grief, he reſolved to bury it in the arms of a Knight's widow, named Elizabeth Cawley, whom he took for his ſecond wife in September, either this year or the next (*x*): but he did not long ſurvive that marriage, for putting his *Pharmaceutice Rationalis, ſive Diatribe de medicamentorum operationibus in corpore humano*, to the preſs in 1763, he lived not to ſee the publication of the whole work [*I*]; the ſecond part being publiſhed by Dr. Fell at Oxford, and licenſed

(*w*) And at Amſtel. in 1674. 12mo.

(*x*) Memoirs in the family.

[*H*] *He maintains the ſoul of brutes to be material.*] He tells us himſelf (17), that he undertook this work as a *conſolatio philoſophica* under his extreme affliction for the loſs of his conſort; tho' by reaſon of the many avocations in his buſineſs he was not able to finiſh it till this time.—— In juſtice to our author it will be proper to give an extract of his own words in reaſoning upon this curious ſubject.

(17) In the preface.

“ *Dato animæ portionem* (inquit ille) *unam vitulem in ſanguine gliſcentem, ejus incendium quoddam eſſe, alteramque ſenſitivam tantummodo eſſe ſpirituum animalium aggeriem; ubique in cerebro & nervoſo genere diffuſam; hinc conſequitur, bruti animam toti corpori coextenſam, partes non modo plures, & diſtinctas, ſed & quadantenus diſſimilares habere. Quod autem nonnulli objiciunt Bruti animam quia percipit, ſive ſe ſentire ſentit, immaterialem eſſe, ſiquidem materies perceptionis incapax videtur, id veriſimillimum quidem eſſet, ſi perceptio iſta rerum materialium limites tranſgrederetur, altiuſve quidvis ſpiraret iſtis quæ inſtinctui naturali aut idiocraſiis (ut ſympathias antipathiaſque mittam) paſſim attribuuntur. Ecquis autem ſponſorem ſe fecerit Deum Opt. Max., quem ut opificem unicum ita & motorem primum & præſentiſſimum ubiq; auſpicem profiteor, non potuiſſe vires & facultates materiæ imprimere, vitæ ſenſitivæ muniis, accommodas. In ſcriptoris manu calamus diſputat, perorat, res geſtas narrat, futuris & præteritis intereſt, & quidni credamus majora longe a re quacunque præſtari poſſe, quando numinis ſolertia acceſſerit? Demum, ſi quis ſubſtantiam illam ſubtiliſſimam & prorſus æthercam quæ vitali œconomiæ inſervit, immaterialem ſtatuat, eo quod inertem corporum inanimatorum indolem ſupergreditur, meminerit mihi indulgere, ſi forte ego materialem appellem, quod majoribus intervallis infra rationis prærogativas ſubſiſtit... Porro hinc Epicuriſmo Atheiſmoque potentiſſimus elenchus opponitur, in quantum rationum momentis conficitur, ſenſitiva noſtra anima una pariter ac brutorum pereunte, alteram perpetuo ſuperfuturam eſſe; ecquis enim de ſtatu poſthumo ac æterno perſuaſus, haud totam navabit operam, quo felicius in eo, aut ſaltem non miſerrime degat* (18).”

(18) Ibid.

“ Granting the vital part of the ſoul to be a certain fire and flame of the blood in which it glows, and the other, the ſenſitive part, to be only an aggregate or conflux of animal ſpirits every where in the brain and nervous ſyſtem, hence it will follow, that the ſoul of brutes being coextended to the whole body, has not only various and diſtinct, but alſo in ſome meaſure diſſimilar parts. As to the objection that the ſoul of brutes, becauſe it perceives, and feels itſelf to feel, muſt be immaterial, ſince matter ſeems to be incapable of perception, that indeed would be very probable, if this perception ſurpaſſed the limits of material things, or mounted any higher than thoſe things which are every where attributed to natural inſtinct or an appropriate formation (to ſay nothing of ſympathies and antipathies). But who will be the Almighty's ſponſor (whom I profeſs as the only workman, ſo the firſt mover and governor, to be every where intimately preſent) to ſay he cannot impreſs upon matter ſuch powers and faculties as are accommodated to the offices of ſenſitive life. The pen in the writer's hand diſputes, pleads, relates exploits, is preſent to future and paſt things, and why ſhould we not believe that far greater things may be performed by any inſtrument, when the ſkill of the Deity ſupervenes? In ſhort, if any one ſhall maintain that moſt ſubtle and intirely ætherecal ſubſtance which ſerves the uſe of the vital œconomy to be immaterial, inaſmuch as it exceeds the inert conſtitution of inanimate bodies, let him not diſdain to bear with me, while I call that material, which ſubſiſts at a much greater diſtance beneath the prerogatives of reaſon. Moreover, hence ariſes a moſt powerful argument againſt Epicuriſm and Atheiſm; ſeeing it is effected by the powers of reaſon, that while our ſenſitive ſoul periſhes in like manner as does that of brutes, the rational ſoul ſhall ſurvive. For who that is perſuaded of a poſthumous and eternal ſtate, will not do his utmoſt to live more happily, or at leaſt not moſt miſerably in it?”

The Doctor looked upon theſe exercitations as a ſupplement to his *Anatome Cerebri.* Accordingly we find him in the 4th chapter, ſpeaking of the drum of the ear, ‘ this,’ ſays he, ‘ performs the ſame office ‘ with regard to the hearing, as the coats of the eye, ‘ which conſtitute the pupil, do with reſpect to the ‘ ſight; both theſe membranes refract, and as it were ‘ ſoften the ſenſible objects, and deliver them fitly ‘ proportioned to the ſenſorium; for if they were to ‘ fall upon it naked and without that proviſion, they ‘ would eaſily hurt and overpower its tender frame. ‘ *Simili officio fungitur reſpectu auditus ac tunicæ oculi* ‘ *pupillam conſtituentes reſpectu viſus,* &c.’ Dr *Schelhammer* (19) hath reflected upon this paſſage with an illmannered ſeverity, and after having proved, that they are the humors not tunics of the eye that refract the rays of light, he aſks, gibing, whether the ſonorous rays are refracted by paſſing through a different medium? and, Whether the convexity or concavity of the drum collects thoſe rays into a focal point, or ſcatters them? &c. In proceeding he calls in queſtion not only the judgment but alſo the faithfulneſs of our learned author; which cenſure, however, is reſpectfully delivered in theſe words. ‘ *Ob has rationes a clariſſimi* ‘ *viri, ac de re medica præclare meriti, non poſſumus* ‘ *non eſſe alieniores: in quo uti ingenium admiror, quo-* ‘ *ties medicamentorum vires aut morborum cauſas expli-* ‘ *cat, ſic ubi forum ſuum egreſſus Philoſophum agit, ac* ‘ *vel partium uſum vel chymicarum rerum naturam ſcru-* ‘ *tatur, ejus haud ſemel non modo judicium deſidero, ve-* ‘ *rum aliquando etiam fidem.*’—For theſe reaſons we ‘ cannot but diſſent from this moſt famous, and in the ‘ medical faculty eminently deſerving perſon, whoſe ‘ genius as I admire when he explains the powers of ‘ medicines, or the cauſes of diſeaſes, ſo when he goes ‘ out of this province, and plays the philoſopher, ‘ I find him more than once defective in judgment, ‘ and ſometimes even in fidelity.’ In anſwer to this, Dr Derham, acknowledging the animadvertor to have out-done all that wrote before him, in his book *De Auditu,* and ſhewed himſelf a man of learning and induſtry, ‘ yet,’ proceeds he, ‘ as our countryman wrote ‘ more than he (though perhaps not free from errors ‘ too) ſo he hath manifeſted himſelf to have been as ‘ curious and ſagacious an Anatomiſt, as great a Phi- ‘ loſopher, and as learned and ſkilful a Phyſician, as ‘ any of his cenſurers, and his reputation for veraci- ‘ ty and integrity was no leſs than any of theirs too. ‘ But after all this terrible clamour, Dr Schelhammer ‘ prejudicately miſtaketh Dr Willis's meaning,’ &c. (20)

[*I*] *Pharmaceutice Rationalis Part II. was publiſhed by Dr Fell,* &c.] The *Pharmaceutice* was tranſlated into Engliſh by an anonymous author, printed at Lond. 1679, in folio: but not being well done, it was corrected by S. Pordage, Eſq; who alſo tranſlated our Author's piece *De Fermentatione,* &c. his *Cerebri Anatome,* cenſed the day after the author's death *, which happened at his houſe in St Martin's lane, November 11, 1675, occaſioned by a pleuriſy, in the fifty-fourth year of his age [*K*]. He was interred, as has been already ſaid, in the ſame grave with his firſt wife, in Weſtminſter Abbey. Dr Fell has given us a proof of his own excellent rhetorical abilities, in drawing a handſomely favourable reſemblance of his brother-in-law, which will well reward the trouble of a peruſal, and the more, as the kinſman appears not to have given way to a culpable flattery out of fraternal affection, the particulars being moſtly confirmed by Mr Wood, who, as has been before obſerved, was rather diſpoſed to diſparage him. "Though Dr Willis," ſays the antiquary, "was a plain man, a man of no carriage, "little diſcourſe, complaiſance, or ſociety, yet for his deep inſight, happy reſearches "in experimental and natural philoſophy, anatomy, and chymiſtry, for his wonderful "ſucceſs and repute in his practice, the natural ſmoothneſs, pure elegancy, delightful "unaffected neatneſs of Latin ſtyle, none ſcarce have equalled, much leſs outdone him, "how great ſoever. When at any time he is mentioned by authors, as he is very often, "it is done in words expreſſing their high eſteem of his great worth and excellency; and "he is placed ſtill as firſt in rank among phyſicians." In concluſion the antiquary adds, "*And further alſo, he hath laid a laſting foundation of a body of phyſic, chiefly on hypotheſes of* "*his own framing* (*y*)." But this laſt encomium is ſtrained too high [*L*]; for our author's hypotheſes gave way, it is well known, to others in a ſhort time. However, the reſt of the antiquary's eloge is countenanced by Dr Fell, who informs us, that though the Doctor was very frugal, yet no one was more generous than he (*z*); that he denied himſelf every thing, and nothing to the poor and miſerable. Beſides what he diſtributed with his own hands, he had almoners in the city, in the country, and in the univerſity. And he affirms from his own knowledge, that you could more eaſily get from him a hundred guineas for charitable uſes, than ſo many pence from moſt other people: That from his youth to the laſt day of his life he never reckoned any ſum of money, that he received, his own, till he had dedicated no contemptible portion of it to God (*aa*).—I omit to ſay, continues he, how firm and unbroken he was in adverſity, how temperate in the midſt of affluence; when in the greateſt reputation for learning, how modeſt; when unjuſtly attacked, how ready to forgive; how faithful to his Prince under the greateſt extremities; how dutiful to the oppreſſed church; candid and open in his profeſſion; indefatigable in his ſtudies; of few words; in the whole courſe of his life a Chriſtian (*bb*) [*M*].

The Doctor had three ſons, and five daughters. Thomas, the eldeſt ſon and heir, was bred at Weſtminſter-ſchool, and admitted thence a ſtudent at Chriſt-church, Oxford, where he took the degrees in arts, being a man of excellent learning. He fell into a conſumptive

[*L*] *This encomium is too high ſtrained.*] In the like ill-judged adulation Dr Plot concludes his account of our Phyſician in theſe extravagant words; 'So that 'England, for ought I know, may have as much 'reaſon to boaſt of her learned Willis, as Coos and 'Pergamus [Hippocrates and Galen] of old, of their 'great maſters in phyſic (21).'— Such kind of incenſe foils an author's fame more by its ſmoke than ſweetens it by its overcharged odour.

[*M*] For the ſatisfaction of the learned reader we ſhall give the Biſhop's elegant words, of which the above is a tranſlation. *Quanquam ipſe nemo magis frugalis*,

* Le Neve's Monumental Inſcriptions.

(21) Natural Hiſtory of Oxfordſhire, p. 309.

conſumptive indiſpoſition, and went to Montpellier, which ſerved greatly to eſtabliſh his health. He reſided for ſome time at Bletchley, near Fenny Stratford, in Bucks; the manors of which places his father had purchaſed of George Villiers the younger Duke of Buckingham. He behaved ſo very well in every ſtation, as to be extremely beloved; and in particular was ſo affectionate a huſband, that his wife died for grief ſeven weeks after his death, which happened November 11, 1699, leaving four ſons and five daughters [*N*]. He was interred in Bletchley church. We have no account of our phyſician's two other ſons. The daughters were Mary, born January 1, 1661. Catherine, born February 5, 1662. Anne, born June 30, 1665; ſhe died May 31, 1725. Jane, born September 8, 1666, was married to Robert Symmonds, Eſq; High Sheriff of Herefordſhire in the laſt year of King William; by whom ſhe had iſſue Thomas Symmonds, of Pengethly, near Roſſe, one of the moſt univerſal ſcholars of the age: ſhe died February 2, 1692. Rachel, the youngeſt daughter, was married to Roger Lingen, of Radhook in Glouceſterſhire, of a very ancient family; by whom ſhe had an only child, Thomas Lingen, Eſq; a gentleman of a great eſtate, who in 1735 was High Sheriff of Glouceſterſhire (*cc*): ſhe died about the year 1707 (*dd*).

(*cc*) Gen. Dict. as before.

(*dd*) Memoirs in the family.

galis, & ad rem attentus, nemo magis munificus; omnia ſcilicet ſibi, nihil autem pauperibus & miſeris negaverat. Præter illa quæ proprio manu elargitus eſt, eleemoſynarios, & diſpenſatores in urbe, rure, & academia ſparſos, habuit. Rem multis experimentis mihi compertiſſimam loquor; facilius quis ab ipſo centum aureos idoneo pietatis opere propoſito acceperit, quam a pleriſque aliis extorſerat totidem aſſes. — A prima ejus adoleſcentia ad ultimum vitæ diem, nullam pecuniarum quam acceperat ſummam pro ſuo habuit, donec Deo & pauperibus partem non contemnendam ſacram feciſſet. Mitto dicere quam in adverſa fortuna infractus; in affluente fuerat temperans; quam in ſumma eruditionis fama modeſtus; cum indigne laceſſeretur, quam ad injurias condonandas facilis; quam principi ultima paſſo fidus; eccleſiæ oppreſſæ obſequens; In artis ſuæ profeſſione candidus & apertus; in ſtudiis indefeſſus; ſermone parcus; in toto vitæ curſu Chriſtianus.

[*N*] *Leaving five ſons and four daughters.*] The ſons were, 1. Browne, of whom ſee the next article. 2. Thomas, who died at ſea going to the Eaſt Indies. 3. Robert, who died Maſter of a ſhip at Algiers. 4. John, ſome time of Chriſt Church, now or lately living at Gray's Inn, London. 5. James, who died at ſea a young man. The four daughters were, Elizabeth, married to Samuel Robinſon, Eſq; merchant in London, who died without iſſue. Jane married to Germanicus Shepherd, of Broad Chalk in Wiltſhire, Eſq; a widow, living in 1760, that hath one ſon and one daughter. Mary and Anne both died of the ſmall pox, unmarried (22).

(22) From Memoirs communicated by the family.

WILLIS [Browne] an eminent antiquary, and grandſon of the preceding phyſician, was born September 14, 1682, at St Mary Blandford in Dorſetſhire, his mother being the iſſue of Robert Browne, Eſq; of Frampton in that county. But upon his father's ſettling at Bletchley in Buckinghamſhire, he was firſt put at a proper age to Bechampton ſchool (*a*) in the neighbourhood, where he continued three or four years, and then was removed to Weſtminſter ſchool. Here the adjoining Abbey engaged his admiration. He loved to walk and contemplate the ſolemnity of the building, the antique appearance, the monuments filled his whole mind, he delighted himſelf in reading old inſcriptions. In ſhort, here he firſt imbibed the love of that kind of antiquities, and the impreſſion grew indelible. At the age of ſeventeen he loſt his father, which being followed in leſs than three months by the death of his mother, gave him inexpreſſible affliction, and brought on the falling-ſickneſs, which continued for many years. But this diſorder, great and laſting as it was, did not extinguiſh the ardency of his paſſion for antiquities. And it is a proof of the ſtrength of his mind and his extraordinary induſtry, that under ſuch a diſadvantage he ſhould apply himſelf ſo cloſely as he did to the moſt laborious reſearches. He was this year 1699 admitted a gentleman-commoner at Chriſt Church College, Oxford, under the tuition of the famous geographer Edward Wells, D. D. [*A*] He continued at the Univerſity four years, and then left it without taking any degree. He had now attained the age of manhood, when young gentlemen generally chooſe to complete their education by travelling abroad, Mr Willis's genius carried him into another

This article is taken chiefly from a paper intituled, Some account of Browne Willis, Eſq; LL. D. late ſenior fellow of the Society of Antiquaries of London. By Dr Ducarel, F. S. A. Read before that ſociety May 22 and June 12, 1760.

(*a*) See an account of this ſchool in our author's hiſt. of the hundred of Buckingham, p. 137. & ſeq.

[*A*] *Under Dr Wells.*] This gentleman, who was a very eminent tutor at this college, had the rectory of Bletchley in Bucks given him by his pupil Mr Willis. He was likewiſe rector of Coteſbatch in Leiceſterſhire, as appears from ſeveral of his books, which being generally well received by the public, we ſhall give the following complete liſt of them. 1. An Hiſtorical Geography of the Old and New Teſtament, &c. illuſtrated with maps and chronological tables. In 4 vol. 8vo. 2. The young Gentleman's Courſe of Mathematics, in 3 vol. 8vo. 3. An Hiſtorical Geography of the Old and New Teſtament, &c. 4. Arithmetic and Geometry, vol. I. Trigonometry, Mechanicks, and Opticks, vol. II. Aſtronomy, Chronology, and Dialling, vol. III. Illuſtrated with ſeveral Copper-plates. The ſecond edition. 5. A Paraphraſe, with Annotations, on all the Books of the Old and New Teſtament, 6 vol. 4to. 6. An Help, for the right underſtanding of the ſeveral divine Laws and Covenants. 8vo. 7. Controverſial Treatiſes *againſt the Diſſenters*. The ſixth ed. 8. An Expoſition of the Church Catechiſm. 9. Prayers on common Occaſions, appertaining to the forementioned Expoſition of the Church Catechiſm. 10. *Harmonia Grammaticalis*: or, A View of the Agreement between the Latin and Greek Tongues, as to the declining of Words, &c. 11. A Letter to a Friend concerning the great Sin of taking *God's name in vain*. 12. *Unworthineſs* no *Excuſe* for not coming to the *Sacrament*. 13. Of *Childrens Capacity* to receive *Religious inſtructions*, and of the *manner* how to give them ſuch *inſtructions*; together with *Prayers* adapted to the Capacities of *Children*. 14. A Diſcourſe concerning the great and indiſpenſable Duty of a decent and reverent *Behaviour* in Church. 15. The great and indiſpenſable Duty to contribute liberally to the *Rebuilding, Building, Repairing, Beautifying*, and *Adorning Churches*. Being a Diſcourſe peruſed and approved of by the late moſt pious Robert Nelſon, Eſq. The ſecond edition. Dedicated to Browne Willis, Eſq. 16. A Diſcourſe ſhewing, That the Marriages of ſuch as are near of Kin are ſinful under the Goſpel, as well as they were under the Law. To which is added, the Table of Marriage. 17. Forty ſix propoſitions, briefly proving, that his preſent Majeſty King George is the only rightful and lawful King of G. Britain. 18. *Elementa Arithmeticæ Numeroſæ & Specioſæ. In uſum juventutis academicæ. Auctore Edv. Wells, S. T. P. Editio altera*, 8vo. An excellent treatiſe. 19. *Dionyſii Geographia emendata & locupletata Additione ſcil. Geographiæ hodiernæ Græco carmine pariter donata, cum 16 Tabulis Geographicis, ab Edv. Wells, S. T. P.*

ther courſe of making that improvement at home. He found in his own country all that he wanted, by the inſtruction and converſation of that univerſal ſcholar, the celebrated Mr William Wotton, then Rector of Middleton Keynes in Buckinghamſhire [*B*]. With that friend he continued till 1705, when being choſen member of parliament for the town of Buckingham (*b*), he conſtantly attended the houſe of commons, and was generally upon committees during the ſhort time he ſat there. In 1707 he married Catharine, only child of Daniel Elliot of Port Elliot in the county of Cornwall, deſcended as well as himſelf from the ancient Lords of Bletchley and the adjoining pariſh of Whaddon. The lady brought him a fortune of 8000l. and a numerous iſſue*. The ſame year he finiſhed the repairing and beautifying Bletchley Church, to which he had contributed from the year 1704 not leſs than 800l. He alſo gave a ſet of exceeding handſome plate for the communion ſervice. All this while Mr Willis's thoughts were chiefly employed upon the ſtudy of antiquities, and he firſt became known to the world by the publication of *Queries for the hiſtory and ſurvey of the county of Buckingham* in 1712, in one ſheet folio. This was followed by *The hiſtory of Hyde Abbey, together with liſts of the Abbots of Newminſter and Hyde*, which being communicated to Mr Gale, were inſerted by him in the *Hiſtory and Antiquities of Wincheſter Cathedral*, publiſhed in 1715, and in that and the following year came out our author's elaborate piece, entitled, *Notitia Parliamentaria*, &c [*C*]. Theſe works endeared him to the antiquaries, who upon the revival of that ſociety in 1717 were glad to have the honour of his name in their roll. Auguſt 3, 1723, the univerſity of Oxford conferred on him the degree of A. M. by diploma, as a reward of his literary merit; to which learned body he afterwards became a conſiderable benefactor. In 1725 he loſt his lady, over whom he erected a monument in Bletchley Church with an inſcription as below [*D*]. The beautiful church of St Martyn's at Fenny Stratford (*c*) was begun this year upon a ſubſcription ſolicited by Mr Willis, and it was conſecrated May 27, 1730. In 1741 (*d*) he preſented the Univerſity of Oxford with his fine cabinet

(*b*) In the room of Sir Richard Temple, who had made his election for the county.

* See her monument in remark [*D*].

(*d*) The cieling was decorated with the arms of all the benefactors who gave 10l. or upwards.

(*c*) He had revived the market of this town in 1702.

S. T. P. Editio quarta. 20. A Set of Maps of Ancient and Modern Geography. 21. A Treatiſe of Geography ſuited to the Maps, 8vo. 22. Remarks on Dr Clarke's Introduction to his Scripture Doctrine of the Trinity, 8vo. 23. A Reply to Dr Clarke's Letter to Dr Wells, 8vo.

During our author's continuance under this celebrated tutor at Chriſt Church, he became intimately acquainted with Mr William Adams, a ſtudent of that college, a man of uncommon parts and learning, in whoſe converſation therefore he could not fail to improve; and who, moreover, in the early part of life, made it his buſineſs to introduce him into the moſt polite company in the Univerſity: and for ſo valuable a friend he ever afterwards retained the greateſt regard and eſteem. Here likewiſe he firſt contracted a firm friendſhip with the learned Dr Richard Frewin, that great ornament of his own profeſſion; which friendſhip ſubſiſted uninterruptedly during the great number of years to which they both attained. Dr Frewin being always pleaſed with the reputation his friend afterwards attained to in his reſearches as an antiquary, and Mr Willis alternately obliged by Dr Frewin's readineſs to aſſiſt him in any caſes relating to his health.

[*B*] *Mr Will. Wotton.*] This univerſal ſcholar, who was preſented to Middleton Keynes in 1693 had publiſhed, the following year, his *Reflections upon ancient and modern Learning*, wherein he celebrates our author's grandfather Dr Thomas Willis for an improver of learning in his *Cerebri Anatome*, obſerving, that 'the author had there traced the medullar ſubſtance 'of the brain through all its inſertions into the cor'tical, and the *Medulla oblongata*; and examined the 'uſe of all the nerves, and went along with them in'to every part of the body. Hereby not only the 'brain was proved to be the fountain of ſenſe and 'motion, but alſo by the courſes of the nerves the 'manner how every part of the body conſpires with 'any others to procure any one particular motion, was 'clearly ſhewn; and thereby it was made plain even 'to ſenſe, that wherever many parts joined at once 'to cauſe the ſame motion, that motion is cauſed by 'the nerves that go into every one of thoſe parts, 'which are all ſtruck together. And', concludes he, 'though Vieuſſens and Du Verney have in many 'things corrected Dr Willis's Anatomy of Nerves, 'yet they have ſtrengthened his general hypotheſis at 'the ſame time that they diſcovered his miſtakes (1).' Dr Wotton alſo retiring afterwards upon a particular occaſion into Wales, drew up the memoirs of the cathedral churches of St David's and Llandaff at the requeſt of our author, who publiſhed them in his ſurveys of thoſe churches (2).

[*C*] *Notitia Parliamentaria, &c.*] The whole title is, *Notitia Parliamentaria; or an Hiſtory of the Counties, Cities, and Boroughs in England and Wales, with Liſts of all the Knights, Citizens, and Burgeſſes.* This work was a conſequence of the ſubject of his *Queries relating to the hiſtory of Buckinghamſhire*, in which he purpoſed to inſert a liſt of the members of parliament for that county. This deſign led him to ſearch firſt the indentures at the Rolls chapel: but finding them very defective, ſcarce half of them being preſerved entire, that defect put him upon ſearching elſewhere, ſo that at laſt by cloſe application he got all the parliaments in a great meaſure entire (3). This ſucceſs, the fruit of his uncommon induſtry, prompted him to enlarge his firſt view, and extend it to ſeveral other counties, cities, and boroughs; a work which had been much wanted towards the perfecting of our Engliſh hiſtory. He publiſhed two volumes in 1715 and 1716, and then ſtopped for want of proper encouragement. He reprinted the firſt volume with additions in 1730; and upon the coming out of the Journals of the Houſe of Commons, he publiſhed, as an appendage thereto, The third part of his *Notitia Parliamentaria*, containing an account of the firſt returns and incorporations of the cities, towns, and boroughs in England and Wales; with liſts of the repreſentatives in the ſeveral parliaments from 1541 to 1660.

[*D*] *The inſcriptions upon his lady's monument.*] They run thus:

> 'Here under reſteth the body of *Catherine*, only 'child of *Daniel Elliot*, of Port Elliot, in the 'county of Cornwall, Eſq; Wife of Browne 'Willis, Eſq; Lord of theſe Manors; by whom 'ſhe had Iſſue ten Children, of which four Sons 'and four Daughters ſurvive her, viz. Thomas, 'John, Henry, Elliot, Gertrude, Catherine, Mary, Alice. Both ſhe and her Huſband were 'deſcended from the antient Lords of this and 'the adjoining Pariſh of Whaddon, when departing this Life at Whaddon-Hall, Oct. 2, '1725, in the 38th Year of her Age, ſhe was, 'according to her Deſire, here interred (4).—— 'Here alſo lieth the body of Anne, the Wife of 'Thomas Willis, Eſq; who died May 21, 1739, 'aged 22 Years and 5 Days.'

ELLIOT WILLIS, A. M.

(3) Preface to vol. I.

(1) Reflections upon ancient and modern Learning, c. 17. p. 196, 197. ed. 1694.

(2) See his article in the Supplement.

(4) She was a woman of ſome learning. In a viſit to her conſort at Whaddon-hall about the year 1718, he ſhewed me a pamphlet in the Bangorian controverſy, which he ſaid was of her writing.

of Engliſh coins, at that time looked upon as the moſt complete collection in England and which he had been upwards of forty years in collecting [E]. This cabinet he annually viſited upon the 19th of October, being St Frideſwide's day, and never failed making ſome additions to it. Mr Willis alſo gave them upwards of 1200 tradeſmens halfpence and farthings*, which he had collected with great labour, and ſome MSS. beſides all his own (which he gave by his laſt will) to the Bodleian Library, together with a picture of his grandfather Dr Thomas Willis. In gratitude to ſo worthy a benefactor, to themſelves in particular, and to the learned world in general by his writings [F], the univerſity created him LL. D. April 10, 1749. by diploma. In the mean time his beneficence was far from being exhauſted by ſupplying ſuch valuable means to promote uſeful learning. A dreadful fire on May 19, 1746, having deſtroyed above fifty houſes at Stony-Stratford in Buckinghamſhire, this charitable gentleman, beſides collecting a handſome ſum of money among his friends for the benefit of the unhappy ſufferers, repaired at his own expence the tower of St Mary Magdalen's Church there, in hopes that others might have contributed towards the rebuilding that church, which was then burnt down (e). In 1752 he laid out 200l. towards the repairs of the fine tower of Buckingham church, and was upon every occaſion a great friend to that town, which he had once repreſented in parliament. In 1756, Bow Brickhill church in the ſame county, which had been diſuſed near 150 years, was reſtored and repaired through his generoſity. In 1757 he erected a handſome monument in Chriſt Church for Dr Iſles, Canon of that church, to whom his grandfather was an exhibitioner, and at his own expence placed a marble ſtone over the grave of Sir Simon Bennet, Bart. in Bechampton Church, on account of his benefactions at Bechampton, Buckingham, Stony Stratford, and other parts. After an induſtrious and well-ſpent life, this uſeful gentleman died at Whaddon Hall, Feb. 5, 1760. He expired with great eaſe, and without the uſual agonies of death, and was buried the 11th of that month in Fenny Stratford chapel [G], and lies under a white marble ſtone enchaſed with black, the inſcription on which was left by himſelf (f). His character was handſomely repreſented, with a juſt regard to a decent impartiality, in the eloge read before the Society of Antiquaries, in theſe terms:

‘As to his character, this learned ſociety, of which he was one of the firſt revivers, and one of the moſt induſtrious members, can bear me witneſs, that he was indefatigable in his reſearches: for his works were of the moſt laborious kind. But what enabled him, beſides his unwearied diligence, to bring them to perfection, was, his being bleſſed with a moſt excellent memory. He had laid ſo good a foundation of learning, that though he had chiefly converſed with records, and other matters of antiquity, which are not apt to form a polite ſtyle; yet he expreſſed himſelf, in all his compoſitions, in an eaſy and genteel manner. He was, indeed, one of the firſt who placed our Eccleſiaſtical Hiſtory and Antiquities upon a firm baſis, by grounding them upon records and regiſters: which, in the main, are unexceptionable authorities. During the courſe of his long life he had viſited every cathedral in England and Wales, except Carliſle: which journeys he uſed to call his Pilgrimages. In his friendſhips, none more ſincere and hearty: always communicative, and ever ready to aſſiſt every ſtudious and inquiſitive perſon. This occaſioned an acquaintance and connexion between him and all his learned contemporaries. For his mother, the univerſity of Oxford, he always expreſſed the moſt awful reſpect and the warmeſt eſteem.

‘As to his piety and moral qualifications, he was ſtrictly religious, without any mixture of ſuperſtition or enthuſiaſm, and quite exemplary in this reſpect. And of this, his many public works in building, repairing, and beautifying of churches, are ſo many ſtanding evidences. He was charitable to the poor and needy; juſt and upright towards all men. With regard to himſelf, he was remarkably ſober and temperate; and often ſaid, that he denied himſelf many things, that he might employ them better.

* It was uſual for merchants to coin them for their own uſe, before the royal coinage of them in 1672 by King Charles II. upon which a proclamation was iſſued for making current his Majeſty's farthings and halfpence, and prohibiting thoſe made by private perſons to be paid or received in trade. Salmon's Chron. Hiſt. under that year.

(e) He afterwards gave for the benefit of that church a lottery ticket, which came up a prize.

(f) See remark [G].

[E] *He gave his cabinet of coins to Oxford.*] However the univerſity thinking it too much for him, as he had a large family, to give the gold ones, purchaſed them for 150 guineas; which were paid to him for 167 Engliſh gold coins at the rate of four guineas per ounce weight, and even in this way the gold coins were a conſiderable benefaction.

[F] *His writings.*] Beſides thoſe already mentioned, they are, 1. *A Liſt of the Priors of Worceſter**. 2. *Surveys of the 4 Welſh cathedrals.* Lond. 1718, 19, 20 and 21, 4to. 3. *Hiſtory of the mitred parliamentary Abbies and conventual cathedral Churches*, 1718, 1719, in 2 vol. 8vo. 4. *Survey of the Cathedrals of England*, with *Parochiale Anglicanum*, &c. 3 vol. 4to. 5. *A Series of Principals of religious Houſes* †. 6. *Addreſs to the Patrons of Eccleſiaſtical Livings*, without name or date, a ſingle ſheet 4to. 1750. 7. *Ecton's Theſaurus*, a new edition, 4to. 1754. 8. *Hiſtory and Antiquities of Buckingham*, &c. 1755, 4to.

* Inſerted at p. 116. of the Antiquities of that church, publiſhed by W. Thomas, D. D. in 1717. 8vo.

† Inſerted at the end of Bp Tanner's Notitia Monaſtica, fol. 1744.

[G] *He was interred in Fenny Stratford chapel.*] He left particular directions as to his funeral, and deſired that no perſons might be invited to it, except the Mayor and Aldermen of Buckingham, to each of whom he left his firſt volume of *Notitia Parl.* and a ſmall legacy beſides. Mr Cole, rector of Bletchley, Mr Francis, miniſter of Fenny Stratford, and Mr John Gibberd, curate of Whaddon, attended in a mourning coach, and near 60 of his neighbours and tenants on horſeback. He alſo left the following inſcription, which he directed to be put on his grave ſtone (5).

Hic ſitus eſt
BROWNE WILLIS, *Antiquarius,*

(5) Id. p. 51.

‘ And, indeed, he appeared to have had no greater value for money, than as it furniſhed him with opportunities of doing good.’

He was ſucceeded in the family eſtate by his eldeſt grandſon, who became his heir upon the death of his eldeſt ſon Thomas Willis, which happened before his own. This gentleman was born in 1710, married Sept. 3, 1735 Anne, daughter of John Hulme, Eſq; of the pariſh of Eccles in Lancaſhire, and by her had his eldeſt ſon Thomas, born Feb. 11, 1738, to whom his grandfather, having appointed him his ſole executor, left all his pictures and books [*H*], &c. except Rymer's Fœdera, in 17 folio volumes, which he bequeathed to Trinity College, Oxford, and the choice of one book to the Rev. Mr Francis Wiſe, who upon the completion and eſtabliſhment of the Radclivian Library in that noble ſeat of learning, was appointed firſt Librarian *(g)*.

(g) See Dr Radcliffe's article.

[*H*] *His ſole executor.*] This gentleman is ſince dead, and has been ſucceeded by his half-brother John Willis, eldeſt ſon by a ſecond marriage of his father, who after the death of his firſt wife, May 21, 1739, married Frances, eldeſt daughter of John Robinſon, Eſq; of Cranſley in Northamptonſhire, and left by her this ſon John, the preſent heir of the family.

P

WILLUGHBY [Francis] a very learned and ingenious gentleman in the ſeventeenth century, was the only ſon of Sir Francis Willughby, Knt. deſcended of two very ancient families, both Willughbies, the one honourable, namely, that of Ereſby in Lincolnſhire, by the father's ſide; the other worſhipful, viz. that of Willughby on the Woulds, or Wollaton, in Nottinghamſhire, by the mother's [*A*]. His mother was the Lady Caſſandra, daughter to Thomas Ridgway, Earl of Londonderry *(a)*. From his childhood he was addicted to ſtudy; and, when he came to the uſe of reaſon, ſo valued and huſbanded his time, as to omit no opportunities of improving himſelf; deteſting no vice more than idleneſs. He chiefly applied himſelf to thoſe ſciences which are moſt abſtruſe; and came to have a deep inſight into the mathematicks, and natural philoſophy. For ſome time he was a member of Trinity College in Cambridge, with his worthy friend, the true chriſtian philoſopher, John Ray; and that learned ſociety have paid a due reſpect to thoſe two great men, and a proper compliment to themſelves, by placing their buſts in their beautiful library. In the inquiſitive age Mr Willughby lived in, obſerving, that the hiſtory of animals had in a great meaſure been neglected, he made the ſtudy of that his province, and the illuſtrating of it his chief and moſt delightful employment. To that end, he made a voyage into foreign countries, with his friend Mr Ray, Sir Philip Skippon, and other gentlemen *(b)*, in the years 1663 and 1664, on purpoſe to ſearch out and deſcribe the ſeveral ſpecies of animals, birds, beaſts, fiſhes, and inſects. Though he was but a few years abroad, yet he travelled over moſt part of France, Spain, Italy, Germany, and the Low Countries [*B*]: in all which places he was ſo diligent and ſucceſsful, that not many ſorts of animals, deſcribed by others, eſcaped his obſervation. He drew them with a pencil, and afterwards the birds were curiouſly engraved on copperplates, at the charge of his widow, Emma, daughter of Sir Henry Bernard, Knt. and printed with his Ornithology [*C*]: And alſo the Hiſtory of Fiſhes [*D*]. A few other ſmall pieces of his are printed in the Philoſophical Tranſactions, and amongſt

(a) Preface to Sir Francis Willughby's Ornithology, by J. Ray.

(b) Dr M. Liſter, Henry Maſſingberd, and Mr Bacon.

[*A*] *Deſcended of two very ancient families, both Willughbies*, &c.] The ſeveral families of Willughby, or Willoughby, deduce their pedigree from Sir John de Willoughby, who had the lordſhip of Willoughby in Lincolnſhire given him by William the Conqueror (1) Sir Chriſtopher Willughby, Knight of the Bath, who died in 1498, by Margery his wife, daughter of Sir William Jennens, of Knotſhall in Suffolk, Knt, had five ſons; whereof William, the eldeſt, on the failure of iſſue male of John Lord Wells, his mother's father, became one of his coheirs, and had the title of Lord *Willoughby of Ereſby*. Thomas, the youngeſt ſon, was made Sergeant at Law in 1522, conſtituted King's Sergeant 28 April 1531; and having received the honour of knighthood, was advanced to be Chief Juſtice of the Common Pleas October 9, 1538. He died September 29, 1545. Robert, his ſon and heir, marrying Dorothy, daughter to Sir Edward Willoughby, of Wollaton in Notinghamſhire, had iſſue Thomas; who by Catharine his wife, daughter of Sir Percival Hart, had 7 ſons and 3 daughters; whereof Percival ſucceeded him in his eſtate, and was knighted April 20, 1603. He married Bridget, eldeſt daughter and coheir of Sir Fr. Willoughby, Knt. of Wollaton aforeſaid, another branch of this ancient family of the Willoughbys, deſcended from Sir Richard Willoughby, Chief Juſtice of England in King Edward the Third's reign: and he from William de Willoughby, brother of Sir Robert Lord Willoughby of Ereſby, living in the reigns of K. Edward I. and II. Sir Francis Willoughby, before-mentioned, built a noble ſeat at Wollaton, which, together with the greateſt part of his large inheritance, came to the ſaid Percival, who died about the beginning of the civil wars; leaving the eſtate to his eldeſt ſon Sir Francis, who dying in 1665, left his only ſon Francis Willoughby, Eſq; the ſubject of this article, and two daughters, Lettice, married to Sir Thomas Wendy, of Haſlingfield in Cambridgeſhire, Knight of the Bath; and Catharine, to Clement Winſtanley, Eſq;

(1) Ar. Collins's Peerage, edit. 1756. vol. 5. p. 67.

[*B*] *He travelled over moſt part of France, Spain, Italy, Germany, and the Low-Countries.*] His Voyage through a great part of Spain, and Mr Ray's Journey through part of the Low-Countries, Germany, Italy, and France, were publiſhed by Mr John Ray, Lond. 1673. 8vo. and inſerted afterwards into Dr John Harris's Collection of Voyages and Travels. Vol. II. ... Sir Philip Skippon's Journey was printed in what is called Churchill's Collection of Voyages, Vol. VI.

[*C*] *His Ornithology.*] Mr Ray publiſhed it in 1676. Lond. fol. with this title, *Franciſci Willoughbeii de Middleton, Armigeri, e Reg. Soc. Ornithologiæ Libri tres, in quibus Aves omnes hactenus cognitæ, in Methodum naturis ſuis convenientem redactæ, accurate deſcribuntur: Deſcriptiones iconibus elegantiſſimis, & vivarum Avium ſimillimis, æri inciſis, illuſtrantur. Totum opus recognovit, digeſſit, ſupplevit*, Joh. Raius.... Mr Ray made great additions and improvements to Mr Willoughby's materials; and afterwards tranſlated it into Engliſh, and cauſed it to be printed in 1678, with very great improvements (2).

(2) See above the article J. Ray, Remark [*G*].

[*D*] *And alſo the Hiſtory of Fiſhes.*] This was printed in 1686, fol. by the order and at the charge of the Royal Society, under this title, *Fran. Willougbbeii Armig. de Hiſtoria Piſcium Libri quatuor, Juſſu & Sumptu Societatis Regiæ, Lond. editi. Totum opus recognovit,* amongſt Mr Ray's Letters [*E*]. This moſt worthy and learned perſon was cut off by an untimely death, July 3, 1672, when he was aged but 37 years, to the great reluctancy of all curious and inquiſitive perſons, eſpecially thoſe of the Royal Society, of which he was an eminent member and ornament; to the inexpreſſible ſorrow of his friends, and of all good men that knew him; and the grievous loſs of the commonwealth of learning. He was buried with his anceſtors, and a monument with an inſcription [*F*] was erected to his memory. We ſhall give his character below, in the words of the excellent Mr Ray (*c*) [*G*], who was beſt acquainted with his merit and virtues. By his lady Emma above-

(*c*) Preface to Mr Willughby's Ornithology, Eng. edit. Lond. 1670. fol.

cognovit, coaptavit, ſupplevit, Librum etiam Primum & Secundum integros adjecit Joh. Raius è Soc. Reg. By which title it appears, that Mr Ray, beſides digeſting the whole work, added the two entire firſt books. Dr Cromwell Mortimer cauſed the title-page of this book to be reprinted, in 1743, and ſubjoined at the end of it an Index of the fiſhes deſcribed or pictured in this work; and their names in Engliſh, Dutch, German, French, Italian, Portugueſe, &c. from Dr Tancred Robinſon's MS. notes in a copy of this book in the Royal Society's library; and from Mr Ray's Synopſis Piſcium; Dr Walter Charleton's Onomaſticon Zoicum; Dr Chr. Merrett's Pinax; Dr Nehem. Grew's Muſæum of the Royal Society; Sir Hans Sloane's Natural Hiſtory of Jamaica; M. Cateſby's Natural Hiſtory of Carolina, &c. With a view of the claſſes in which fiſhes are diſtributed. Labels of the names are paſted at the bottom or ſides of the figures.

[*E*] *A few other ſmall pieces of his are printed in the Philoſophical Tranſactions*, &c.] Namely, Account of an Eclipſe ſeen at London, June 22, 1666 (3). Of a dwarf Oak from New England (4). Obſervations concerning Vegetation, and the running of the ſap (5). A Letter about the hatching a kind of Bee lodged in old willows (6). A Letter containing ſome conſiderable Obſervations about that kind of Waſps called Ichneumones, &c. (7) ... A few Letters to and from him are printed among Mr Ray's Philoſophical Letters.

(3) No. 15. p. 295.

(4) No. 58. p. 1700.

(5) No. 43. 48. 57. 70.

(6) No. 74. p. 2221.

(7) No. 76. p. 2279.

[*F*] *An inſcription*, &c.] It is as follows.

Propter jacet Franciſcus parentum optimorum filius verè magnus, ſi quid magni habet pietas, probitas, veracitas, incorrupta fides, rigida honeſti obſervantia, obſtinata ſobrietas, ſimplex ſolertia, ſumma & modeſta eruditio. Religio ſine ſuperſtitione, ſine faſtu nobilitas. *Aſſurgite quantum eſt hominum bonorum huic tam verendo nomini! Hic* cum in vivis eſſet, poſtquam peregre variarum Europæ nationum, linguarum, artium, morum, legum naturas indagâſſet, eaſdem domi excoluit, & perpolivit. Mathematicæ intimos receſſus aliiſq; inacceſſos penetravit, medicinæ varios ſinus perluſtravit, totam inſuper philoſophiam ita excuſſit, ut naturas ſuas & nomina omnibus reſtitueret. Hiſtoriam naturæ de integro pene concinnavit, eo acumine ut ſemper novus, ea diligentia ut ſemper ſibi conſtans, ea integritate ut ſemper fidelis naturæ interpres evaſerit: Duxit uxorem Emmam Bernard filiam ſecundam domini Hen. Bernard, quæ prolem ei enixa eſt Franciſcum, Caſſandram, & Thomam; & jam poſt ſingularem bene actæ vitæ exiſtimationem, triſte ſui deſiderium relinquens, adſcriptus eſt immortalibus tertio die Julii 1672. anno ætatis 37. quod ſupereſt votum abſolvat, tranſcribant patrem nati, & nati natorum, & qui naſcentur ab illis. Hoc monumentum officioſæ pietatis & memoriæ ergo devotiſſime conſecravit Thomas Willoughby, Bar'.

i. e. Near this place lies Francis ſon of the beſt parents, who was truly great, if there is any thing great in piety, probity, truth, ſincerity, ſtrict honeſty, ſobriety, a clear underſtanding without craft, and a conſummate erudition with the greateſt modeſty. Religion without ſuperſtition, nobility without pageantry. Riſe up all good men at this venerable name! After he had carefully ſurveyed all the nations of Europe, with their languages, arts, manners, and laws, he returned to his native country, where he digeſted and improved the knowledge he had acquired in foreign countries. He penetrated the myſteries of the mathematicks, which were inacceſſible to others. He thoroughly viewed the various depths of medicine; and ſo perfectly examined every branch of philoſophy, that he diſcoved the nature and fixed the names of all creatures. He had almoſt compoſed a Natural Hiſtory; with that ſagacity that he was always new; that exactneſs that he was always conſiſtent; and that faithfulneſs that he was always a true interpreter of nature. He married Emma Bernard, ſecond daughter of Sir Henry Bernard, by whom he had Francis, Caſſandra, and Thomas. Thus, after he had acted his part well upon the ſtage of life, he quitted it for immortality (to the regret of all his friends) the third day of July 1672. aged 37. All that remains for us, is to wiſh, that the ſons may imitate the father, and the ſons ſons, and thoſe who ſhall deſcend from them. This monument of piety and dutiful remembrance was conſecrated to him by Sir Thomas Willoughby, Bart.

[G] *We ſhall give his character below in the words of the excellent Mr Ray*, &c.] 'He was,' ſaith Mr Ray, 'endowed with excellent gifts and abilities both of body and mind, and bleſſed with a fair eſtate. Howbeit, as he did duly prize theſe advantages of birth, eſtate, and parts, ſo he did not content himſelf therewith, or value himſelf thereby, but laboured after what might render him more truly honourable, and more truly to be called his own, as being obtained by the concurrence at leaſt of his endeavours. Firſt then, as God had given him a quick apprehenſion, piercing wit, and ſound judgment, ſo by his great induſtry and conſtant uſe of theſe gifts, he did highly improve and advance them. He was from his childhood addicted to ſtudy, and ever ſince he came to the uſe of his reaſon ſo great a huſband of his time, as not willingly to loſe or let ſlip unoccupied the leaſt fragment of it, deteſting no vice more than idleneſs, which he looked upon as the parent and nurſe of almoſt all others. Nay, ſo exceſſive was he in the proſecution of his ſtudies, and other employments, without any intermiſſion or diverſion, that moſt of his friends were of opinion he did much weaken his body, and impair his health, by his inceſſant labours, and perpetual intention of mind upon buſineſs. However that be, hence it came to paſs that he attained very good ſkill in all parts of learning, and particularly got a deep inſight into thoſe ſciences which are moſt abſtruſe and impervious to vulgar capacities, I mean the moſt ſubtil parts of the mathematicks. Of his ſkill in natural philoſophy, chiefly the hiſtory of animals, I ſhall ſay no more, but that it hath not been my hap to meet with any man either in England, or beyond ſeas, of ſo general and comprehenſive knowledge therein. But what rendered him moſt commendable, was his eminent virtue and goodneſs. I cannot ſay, that I ever obſerved ſuch a confluence of excellent qualities in one perſon. For, notwithſtanding the forementioned advantages, which are wont to puff up mens minds with pride, he was ſo truly *humble*, that I have not known any man of the meaneſt fortune or birth exceed him in that virtue. He deſpiſed no man for his poverty or mean parentage; honoured all men, was affable to the meaneſt, not preferring himſelf before others, but condeſcending to them of low degree. He was ſo reſolutely *ſober* and *temperate*, that neither the importunity of company, or pleaſure of ſenſe, could ever tempt him to exceſs: of that exemplary *chaſtity* and *purity*, that his life condemns the diſſoluteneſs and corrupt practices of the preſent age, and demonſtrates the poſſibility of reſtraining and regulating thoſe motions and deſires, which of all others are wont to be moſt violent and inordinate: ſo ſcrupulouſly *juſt* and *righteous*, that he had rather a great deal ſuffer wrong than do any: ſo *true to his word and promiſe*, that a man might ſafely venture his eſtate and life too upon it; his word being, as an honeſt man's is ſaid to be, as good as his bond: ſo *faithful and conſtant to his friend* in all conditions, as well adverſe as proſperous, that one might be ſecure of him, and confident of his help and aſſiſtance, whatever diſtreſs or calamity might befal one; he never deſerting any man only becauſe fortune frowned upon him, as the common ſort of friends are wont to do. He was ſo diffuſe and comprehenſive in his *charity*, that he

'could

abovementioned he left two ſons, Francis and Thomas, and Caſſandra, late Ducheſs of Chandois. Francis, the eldeſt ſon, was created a Baronet April 7, 1677, but dying unmarried in 1688, in the 20th year of his age, the title and eſtate devolved on his brother Thomas, who was created Baron of Middleton, January 1, 1711. He departed this life April 2, 1729, and was ſucceeded by his ſon Francis, the preſent Lord Middleton.

‘ could heartily affect and embrace good men of all perſuaſions; good men, I ſay, to exclude ſuch opinions as are deſtructive of, or inconſiſtent with true goodneſs. To theſe I might add his *patience* and *ſubmiſſion* to the divine will, which did eminently appear in the time of his ſickneſs, when he profeſſed himſelf contented to leave the world, if it pleaſed God to have it ſo, though then in the height of his ſtrength and parts, and in the hot purſuit of uſeful ſtudies and deſigns, and in ſuch circumſtances as to his private affairs and concerns in the world, as rendered ſome continuance of life very deſirable to him, and would have tempted a man of ordinary virtue to expreſs ſome anger and diſcontent at the ſentence and expectation of death. And, laſtly, his due *fear and reverence of the Deity*, deep ſenſe of his goodneſs, and thankfulneſs for the ſame, ſincere piety in all his carriage towards him, and great abhorrency of whatever tended to his diſhonour.—— Thus much I thought fit to obſerve concerning his virtues, partly to do him right, by procuring him the honour due to his memory; and partly to provoke young gentlemen of this nation, by the propoſal of ſo illuſtrious an example of their own rank, to proſecute the ſtudy of ingenuous literature, and aſpire to true honour by the conſtant exerciſe of virtue.’

C

WOLLASTON [William] was born March 26, 1659 at Coton Clanford in Staffordſhire, where his father then reſided, a private gentleman of a ſmall fortune (*a*), being deſcended from an ancient and conſiderable family (*b*) in that county, where the elder branch always continued: but the ſecond, in proceſs of time, was tranſplanted into other counties. However, the head of it flouriſhed formerly at Oncot in the county of Stafford, though of late years at Shenton in Leiceſterſhire; and was poſſeſſed of a large eſtate lying in thoſe and other counties. Our author was a ſecond ſon of a third ſon of a ſecond ſon of a ſecond ſon (*c*); yet notwithſtanding this ſeries of younger brothers, his grandfather, who ſtands in the middle of it, had had a conſiderable eſtate both real and perſonal, together with an office of 700 l. per annum (*d*). And from a younger brother of the ſame branch ſprung Sir John Wollaſton, Lord Mayor of London, well known in that city at the time of the civil war (*e*). At nine years old, Mr Wollaſton was ſent to a maſter who had opened a Latin ſchool at Shenſton in Staffordſhire, where his father then reſided. Here our author continued near two years, and having received ſuch inſtruction as that perſon was capable of giving him, he was removed to Litchfield. He had been at this ſchool but a ſhort time when the Magiſtrates of the city, upon ſome quarrel, turned the maſter out of the ſchool-houſe. However, Mr Wollaſton with many of the ſcholars, followed the ejected maſter, and remained with him till he quitted his ſchool, which was about three years. After which the ſchiſm being ended, he returned into the free ſchool, and continued there about a year. The rudeneſs of a great ſchool was particularly diſagreeable to his natural diſpoſition; and what was ſtill worſe, he began now to be much troubled with the head-ach, which ſeems to have been conſtitutional in him: yet his uncommon attention to his book, and eagerneſs to improve, had now rendered him fit for the univerſity. Accordingly he was ſent to Cambridge, and admitted a penſioner at Sidney college, June 8th, 1674, in the ſixteenth year of his age. Here he was ſo circumſtanced as to labour under various diſadvantages. He was come up a country lad from a country ſchool; had no acquaintance in his college, nor even in the univerſity; few books or materials to work with; his allowance being by no means more than ſufficient for bare neceſſaries; neither had he ſufficient confidence to ſupply that defect by enquiring from others. Add to this, that his ſtate of health was not quite firm (*f*). However, under all theſe diſadvantages he acquired a great degree of reputation, and having taken his degree of Bachelor of Arts at the regular time, he offered himſelf a candidate for a fellowſhip in his college, but miſſed of that preferment. July 1681 he commenced Maſter of Arts, and about this time ſeems to have entered into Deacon's orders. On Michaelmas day following he left the univerſity, and having made a viſit to the then head of this branch of the family, his couſin Wollaſton of Shenton in Leiceſterſhire, he went to pay his duty to his father and mother at Bloxwyche, where they now lived: and not having ſeen them for many years before, he ſtaid with them till May or June 1682. But ſeeing no proſpect of preferment, he ſo far conformed himſelf to the circumſtances of his family, as about this time to become Aſſiſtant at Birmingham ſchool to the head-maſter, who readily embraced the opportunity of ſuch a coadjutor, and conſidered Mr Wollaſton as one who prudentially ſtooped to an employ below what he might reaſonably have pretended to. However, this inſtance of his humble induſtry was far from being diſpleaſing to his couſin of Shenton, who it ſeems had a great eſteem for the head maſter (*g*), and in a ſhort time he got a ſmall lecture at the diſtance of about two *miles* from Birmingham; but as he performed there the whole Sunday's duty, that fatigue, added to the buſineſs of a great free-ſchool for about four years, began to break his conſtitution [*A*]. But the old maſter being now turned out, in order to make way for a

[*A*] *Began to break his conſtitution.*] During this ſpace he likewiſe ſuffered many anxieties, and underwent a great deal of trouble and uneaſineſs, in order to extricate two of his brothers from ſome inconveniences to which their own imprudencies had ſubjected them. And in the good offices which he did them

at

particular perſon to ſucceed him, our author was choſen ſecond maſter only, under a pretence that he was too young to be at the head of ſo great a ſchool (*b*), but ſome of the Governors themſelves owned that he had wrong done him in this matter. However that be, 'tis certain, upon this occaſion he took prieſts orders in purſuance to the charter of that ſchool, which being interpreted likewiſe ſo as to oblige the maſters to take no church-preferment, he reſigned his lecture. This happened in the year 1686, and was a conſiderable eaſement to him. His new poſt was worth about 70l. per annum, which afforded him a tolerably competent ſubſiſtence. In the mean time the late chief maſter after his expulſion retired to his brother's houſe, which lying in the neighbourhood of Shenton, he once or twice waited upon Mr Wollaſton of Shenton, and undoubtedly informed him of the character, learning, converſation, and conduct of our author, which he was very capable of doing, becauſe they lived together till the time of this old gentleman's leaving Birmingham. Mr Wollaſton of Shenton having now lately loſt his only ſon*, and never intending (as appears from his whole conduct) to give his eſtate to his daughters, purſued his father's deſign of continuing it in the male line of his family, and reſolved to ſettle it upon our author's uncle and father, his own firſt couſins, and his neareſt male-relations, in the ſame proportions and manner exactly as it had been entailed on them by his father. And accordingly he made ſuch a ſettlement, ſubject however to a revocation. Our author all this while applied himſelf to his buſineſs; and never ſo much as waited upon his couſin, or employed any one to ſpeak or act any thing in his behalf (though many then blamed him for neglecting to do it): only one viſit he made him in the November before his death, which was upon a Saturday in the afternoon. He gave him a ſermon the next day, received his hearty thanks, and the next morning deſired leave to return to the duties of his ſtation; without ſpeaking or even inſinuating any thing in relation to his eſtate. His couſin diſmiſſed him with great kindneſs; and by his looks and manner ſeemed to have a PARTICULAR REGARD for him, but diſcovered nothing of his intention *by words*. However, he uſed to employ perſons privately to obſerve our author's behaviour (who little ſuſpected any ſuch matter) and his behaviour was found to be ſuch, that the ſtricter the obſervations were upon it, the more they turned to his advantage. In fine, Mr Wollaſton of Shenton became ſo thoroughly ſatisfied of our author's merit, that he revoked the forementioned ſettlement, and made a will in his favour [*B*]. In Auguſt following that gentleman fell ſick, and ſending ſecretly to our author to come over to him, as of his own accord, without any notice of his illneſs, he complied with the meſſage, and ſtaid ſome days at Shenton. But while he was gone home again, under a promiſe of returning, his couſin died, Auguſt 19, 1688. By his relation's will Mr Wollaſton found himſelf intitled to a very ample eſtate. However this change, ſudden and advantageous as it was to his affairs, wrought no change in his temper. The ſame firmneſs of mind which had ſupported him under the preſſures of a more adverſe fortune, enabled him to bear his proſperity with moderation: and his religion and philoſophy taught him to maintain a due equanimity under either extreme. In November following he came to London (*i*), and about a year after, on the 26th of that month 1689, he married Miſs Catherine Charlton, daughter of Mr Nicolas Charlton an eminent citizen of London, a fine woman with a good fortune, and a moſt excellent character. With this lady he ſettled in Charter-houſe Square in a private, retired, and ſtudious life. His carriage was nevertheleſs free and open. He aimed at ſolid and real content, rather than ſhew and grandeur, and manifeſted his diſlike of power and dignity by refuſing one of the higheſt preferments in the church, when it was offered to him (*k*). He had now books and leiſure, and he was reſolved to make uſe of them. He was perfectly acquainted with the elementary parts of learning, and with the learned languages, Latin, Greek, Hebrew, Arabic, &c. He thought it neceſſary to add to theſe ſuch a degree of philology and criticiſm as ſeemed likely to be uſeful to him; and alſo mathematical ſciences, or at leaſt the fundamentals of them; the general philoſophy of nature; the hiſtory and antiquities of the more known and noted ſtates and kingdoms; and ſuch like erudition: and in order to attain the knowledge of true religion, and the diſcovery of truth, the points which he always had particularly in view, and to which he chiefly directed all his ſtudies, he diligently enquired into the idolatries of the heathens; and made himſelf maſter of the ſentiments, rites, and learning of the Jews; the hiſtory of the firſt ſettlement of Chriſtianity, and the opinions and practices introduced into it ſince. In the mean time he exerciſed and improved his mind by throwing off prejudices, uſing himſelf to clear images, obſerving the influence and extent of axioms, the nature and force of conſequences, and the method of inveſtigating truth. In general, he accuſtomed himſelf to much thinking as well as much reading. He likewiſe delighted in method and regula-

(*b*) In this ſchool there were three maſters and two aſſiſtants, beſides a writing-maſter. Ibid. p. ix.

* He died in 1685, as appears from his funeral ſermon preached by J. Cave, A. M. and publiſhed with the title of *Chriſtian tranquillity, or the government of the paſſions of joy and grief*, a ſermon upon the occaſion of the much lamented death of that hopeful young gentleman, Mr Fran. Wollaſton, an only ſon, and heir to a very fair eſtate. Preached at Shenton in Leiceſterſhire. Lond. 1685. 4to. Wood, vol. 2. col. 854.

---

at this time we are aſſured that he ſeemed to have overacted his part, ſince he indulged his affection for them more than was conſiſtent with a due regard to his own welfare, as he was then circumſtanced (1).

[*B*] *And made a will in his favour.*] The circumſtances whereby Mr Wollaſton came into poſſeſſion of his eſtate, and the ſteps which led to it, as above-related, ſufficiently ſhew the abſolute groundleſneſs of that ſtory which having (merely on account of the marvellous in it) paſſed current and generally uncontroverted for many years, had obtained at the time of our author's deceaſe a kind of ſanction; that he was an abſolute ſtranger to the former poſſeſſor and his family, and happened to fall into his company by mere accident at an inn. An imagination ſo far from being true, or bearing any reſemblance, we ſee, to truth, that they were very near relations, and this very eſtate had been twice entailed upon Mr Wollaſton's uncle and father (2).

(1) Preface to the ſeventh edition of Religion of Nature delineated, p. 8, 9.

(2) Preface to the ſixth edition of Religion, &c. p. 8.

rity; and choſe to have his labours and refreſhments periodical, and that his family and friends ſhould obſerve the proper ſeaſons of their revolution. He was moſt remarkably chearful and lively in private converſation, and by that as ready, as by his treaſures of learning he was abundantly qualified, to be ſerviceable to all ſorts of people. This rendered his company agreeable, and himſelf worthy to be courted by the learned and virtuous. But a general acquaintance was what he never cultivated; and it grew (as is generally the caſe) more and more his averſion, ſo that he paſſed his days moſtly at home, with a few friends with whom he could enjoy an agreeable relaxation of mind, and receive all the advantages of a ſincere and open friendſhip *(l)*. Having thus fixed his reſolution to deſerve honours, but not to wear them, it was not long before he publiſhed a piece intitled, *The deſign of part of the book of Eccleſiaſtes, or the unreaſonableneſs of man's reſtleſs contentions for the preſent enjoyments, repreſented in an Engliſh poem*, in 8vo. But as he had never made poetry his buſineſs, ſo he was very ſenſible of the defects of this attempt in that way of writing, and was afterwards very deſirous to ſuppreſs it [*C*]. This poem was printed in the year 1690 *(m)*. Notwithſtanding he declined to accept of any public employment, yet his ſtudies were deſigned to be of public uſe, and his ſolitude was far from being employed in vain and trifling amuſements, terminating in himſelf alone [*D*]. But neither in this laſt view could his exceſſive retirement be without ſome inconveniences [*E*]; His intimates were dropping off, and their places remained unſupplied: his own

(l) Account of his life, &c. in the preface, ubi ſupra, p. 14, 15, 20.

(m) In 1703 he compoſed a little Latin grammar, which though he printed, was only for the uſe of his family.

[*C*] *And deſirous afterwards to ſuppreſs it.*] The publication of this piece ſeems to be entirely owing to the great ſatisfaction he had in contemplating the happy ſituation of his affairs, which put it into his power to gratify his own temper in the choice of a way of life the moſt agreeable to his nature. This, I think, is apparent, from his own account of the matter.—— 'The following poem,' ſays he (3), 'is not the effect 'of any extraordinary ſkill which I pretend to in po'etry, but was firſt began merely as the exerciſe and 'diverſion of a few hours, that I was not capable 'of ſpending better. For though, as you well ima'gine, I had never made poetry my buſineſs, nor 'ever intended to try whether I had any genius that 'way; yet I had in courſe, as others do, read ſome 'of the Latin and Greek authors, had now and then 'admired the performances of our own countrymen, 'had learned in ſome meaſure how to form ideas of 'things in my mind, and got ſome rude and more 'general conceptions of the nature of poeſy; which 'was enough for my purpoſe, who propounded but 'to fill up ſome odd and unſerviceable vacuities in 'my time, and by being employed about a proper 'ſubject to deceive them more inſenſibly; but I was 'not long permitted thus quietly to entertain myſelf; 'the ſame cauſes that diſabled me for better things, 'encreaſing upon me, and diſabling me for this too. 'So in ſhort the few indigeſted materials which I had 'collected among my own thoughts, in order to a 'poem, were thrown by and forgotten. In this ſtate of 'neglect they lay for ſome years, till lately, tumbling 'over ſome other trifles, I found them in the heap, 'and could not let them paſs, inconſiderable as they 'were, without a reflection upon thoſe circumſtances 'which put me upon this eſſay. At laſt, being once 'engaged in meditation, and led by it from one 'thing to another, I concluded to go on with what 'I had begun, and after my manner to finiſh it. This 'I have done, and which is more, *for ſome reaſon or* '*other* (forgive me, reader) have made it public too.' As he ſets out in this manner, ſo he concludes this account of the work in the ſame ſtrain; where, by way of objections, he has impartially repreſented the ſeveral defects in it; one of which, he ſays, is, that the the verſe, but eſpecially the rhymes, are weak, if not blundered. Upon this point he makes the following impartial declaration: 'I take not,' ſays he, 'any 'rhymes, much leſs my own, to be worth either de'fending or excuſing. For, as I confeſs myſelf auk'ward at making them, ſo am I ignorant of their 'excellence when they are made, and as they gave 'me more trouble than all the reſt, ſo have they done 'me that other miſchief of cramping my thoughts, 'and in great meaſure ſpoiling the verſe, though, as 'it luckily falls out, a naughty verſe is a leſs fault 'in ſatire than in any thing elſe. Had I been hardy 'enough (like ſome others, which too late I wiſh) to 'have broken a barbarous cuſtom, and freed myſelf 'from the troubleſome and modern bondage of *rhym*'*ing* (as Milton calls it), the buſineſs which now im'mediately follows had been ſomething better than 'it is.' In the ſame epiſtle we have his notions upon the ſubject of poetry in general. Hiſtory he ſuppoſes addreſſed to the underſtanding or apprehenſion; oratory directs itſelf not only to the underſtanding, but alſo to the judgment, or ſome paſſion apt to lead the perſon in whom it is raiſed, into aſſent. But poetry penetrates through all theſe to the admiration alſo, not only *informs* or *perſuades*, but exceedingly and above all delights us too, entertains our fancy and curdles our blood (4). This laſt effect of poetry ſeems rather to be the proper character of ſatire in particular, which was the ſpecies of his poem.

[*D*] *He was far from paſſing his time in trifling amuſements, terminating in himſelf alone.*] It is true, by his method of life he was rather qualified for private inſtruction, than accompliſhed for public addreſs and ſhew. But the latter was not his point. We are told, (5) he looked upon that ſpecious ſort of knowledge, which often gains a man the reputation of a ſcholar at a cheap rate, to be a falſe learning, and of no kind of ſervice to him, who was in queſt of real knowledge.—— He was of opinion too that a man might eaſily read too much, and he conſidered the *helluo librorum* and the true ſcholar as two very different characters. The love of truth and reaſon made him love free-thinking; and, as far as the world would bear it, free-ſpeaking too. This tended, he thought, to the diſcovery of error, though he was not inſenſible that this might render him leſs acceptable to many perſons, to thoſe who perhaps have juſt ſenſe enough to perceive their own weakneſs, or judge of things by the vogue they bear, or the reſpect they have to their own intereſt or party, or can bear neither the trouble of an honeſt enquiry themſelves, nor yet that another ſhould know what they do not know, and in ſhort, to every prejudiced perſon whatſoever. But he took all opportunities to aſſert ſeriouſly and inculcate ſtrenuouſly the being and perfections of God, his Providence both general and particular, the obligations we are under to adore him, the reaſonableneſs of all virtue, the immateriality and immortality of the ſoul, future rewards and puniſhments, and other high and eſſential points of natural religion, and of the Chriſtian revelation. In fine, to reaſon impartially, and to know where to ſtop, was the mark he always aimed at. And he loved truth not in ſpeculation only, but alſo in practice; for he loved punctual honeſty.

[*E*] *Neither could his exceſſive retirement be without ſome inconveniencies.*] We are told (6), that the general character of his nature was, tenderneſs and ſenſibility. Such a diſpoſition frequently makes a man ſeek for retirement as a neceſſary ſhelter from the diſappointments, vexations, and injuries which are unavoidable in an active life; but every one knows, that it is almoſt, if not altogether, as unavoidable for this tenderneſs not to be nurſed by ſolitude into an unmanly delicacy and unſociable ſoreneſs of ſenſibility. Nor does our author ſeem to have been exempted from this general frailty. For though this tenderneſs diſpoſed him to feel and compaſſionate the miſeries of others, inſomuch that he oftentimes ſuffered more perhaps in another man's caſe, than the ſufferer himſelf did in his own; though this tenderneſs always induced him to endeavour to ſatisfy and convince in caſes where he might have commanded moſt deſpotically and abſolutely,

(4) Per ambages Deorumque miniſteria & fabuloſum ſententiarum tormentum præcipitandus eſt liber ſpiritus, ut potius furentis animi vaticinatio adpareat, quam religioſæ orationis ſub teſtibus fides.—— Petron. Arbiter Satyricon.

(5) By the author of a general account of his life, ubi ſupra, p. 16, 17.

(6) Ibid. p. 18.

own infirmities were increaſing: the frequent remiſſion of ſtudy growing more and more neceſſary; and his ſolitudes at the ſame time becoming leſs and leſs pleaſant and agreeable. But what decays ſoever he felt in his bodily ſtrength, it is certain nevertheleſs, that the clearneſs and perſpicuity of his thoughts continued in full vigour. However, perceiving his deſigns fruſtrated by the daily attacks of nature, and that it would be impoſſible to finiſh and complete them in the manner he wiſhed, he ſeems to have intended to deſtroy with his own hand the greateſt part of his works; and that thoſe few manuſcripts which were found after his death were indebted to the treachery of his memory for their preſervation [*F*]. For he had within the laſt two or three years of his life actually burnt ſeveral treatiſes, in the compoſition whereof he had beſtowed no ſmall quantity of time and pains (*n*). In the year 1720 he had the misfortune to loſe his wife, who died on the 21ſt of July that year. They had lived extremely happy in each other, and he was much afflicted with the loſs. He buried her in the ſame grave, where he himſelf then intended to be, and was afterwards, laid; and wrote an inſcription upon her monument, wherein he has perpetuated her fame by a very diſtinguiſhing characteriſtic [*G*]. In 1722 he

ſolutely; yet the ſame author intimates, that in theſe intervals he frequently, though unadviſedly, degenerated into chiding, when he intended only to explain and convince. To this indulged tenderneſs may alſo be aſcribed that exceſſive degree of diffidence of himſelf, which incapacitated him in a great meaſure for appearing in public at all but to his diſadvantage, which no doubt muſt render him in appearance inferior to thoſe, who exceeded him in nothing ſo much as in forwardneſs and ſo much conceit as is a neceſſary ſpur to action. Something of this might indeed be owing to the depreſſion of his ſpirits in his younger days. From the ſame cauſes (it is obſerved too) might ariſe his ſtrong apprehenſions of the unreaſonableneſs and injuſtice of thoſe, who were deſignedly the beginners of quarrels or abuſes, or invaded without provocation another's good name. The ſame tenderneſs rendered him in a high manner ſenſible of the deſertion, unkindneſs, and indifference of friends. The turn of the expreſſion evidently inſinuates, that his ſenſibility was carried to an exceſs of paſſion in both theſe inſtances; but were it not ſo, the words immediately following are full and explicit, which inform us, that he never indulged his paſſions to the hurt of any one. If in any reſpect he ſhewed that he was not ſo complete a ſtoic as to have eradicated his paſſions, or ſo perfect a philoſopher as never to be ſurprized by them, it was in the eſcape of a haſty word or expreſſion now and then, when he was put off his guard by hurries, indiſpoſitions, or ſuch like occaſions.—— Yet (we may eaſily believe) he was not always angry, when the urgency of buſineſs, the ſtraitneſs of time, the importunity of impertinent people, or the like, cauſed him to talk louder or quicker than ordinary; nor often, if at all, without ſufficient reaſon, nor ever ſo angry with any one elſe as with himſelf for having been ſo. In ſhort, if every one would reſtrain their anger within the ſame bounds as he did, there might be a haſty word or expreſſion dropt ſometimes upon provocation or indiſpoſition, but there would never be reſentment, wrath, or quarrel more in the world. So ſays the compiler of his character (7).— The juſt concluſion from all which is, That the fruit being always kept in the ſhade, and not brought into the public ſun-ſhine in the open field, never ripened into a full mellowneſs.

[*F*] *Thoſe few manuſcripts which were found after his death were indebted to the treachery of his memory for their preſervation.*] The following indeed happened to be ſpared; but from the place where they lay, and ſome other circumſtances, it is probable they owed their eſcape to mere forgetfulneſs. They are, 1. *An Hebrew grammar.* 2. *Tyrocinia Arabica & Syriaca.* 3. *Specimen Vocabularii Biblio-Hebraici, literis noſtratibus, quantum fert linguarum diſſonantia, deſcripti.* 4. *Formulæ quædam Gemarinæ.* 5. *De variis generibus pedum, metrorum, carminum, &c. apud Judæos, Græcos, & Latinos.* 6. *De vocum tonis monitio ad tyrones.* 7. *Rudimenta ad matheſin & philoſophiam ſpectantia.* 8. *Miſcellanea Philologica.* 9. *Opinions of the ancient Philoſophers.* 10. 'Ιȣδαΐκα; *ſive religionis & literaturæ Judaicæ Synopſis.* 11. *A collection of ſome antiquities and particulars in the hiſtory of mankind; tending to ſhew that men have not been here upon this earth from eternity, &c.* 12. *Some paſſages relating to the hiſtory of Chriſt, collected out of the primitive fathers.* 13. *A treatiſe relating to the Jews, of their antiquities, language, &c* (8). What renders it the more probable, and indeed almoſt beyond doubt, that he would have deſtroyed theſe likewiſe, if he had remembered them, is, that ſeveral of theſe which remain undeſtroyed, are only rudiments or rougher ſketches of what he afterwards reconſidered and carried on much farther, and which even after ſuch reviſal he nevertheleſs committed to the flames, as being ſtill, in his opinion, ſhort of that perfection, to which he deſired and had intended to bring them. So that his death abſolutely put an end to the expectation of ſeeing any more of his works in print, ſince it would be equally injurious to the author, and diſreſpectful to the public, if his family ſhould expoſe his more imperfect ſketches in print, after his death; when he himſelf had in his life-time deſtroyed ſeveral more finiſhed pieces, becauſe he judged them not ſufficiently accurate (9).

[*G*] *He has perpetuated her fame by a very diſtinguiſhing characteriſtic.*] The epitaph is as follows:

Hic, ad imum parietem, ſita eſt
CATHARINA,
GULIELMI WOLLASTON,
Hujus manerii Finburienſis Domini, &c.
Uxor κυριδία ac dilectiſſima:
E qua prolem ille numeroſam & pulchram

he printed a few copies of his treatiſe intitled, *The Religion of Nature delineated.* He had not completed his whole deſign, thoſe copies being only intended for private uſe in the proſecution of it. Accordingly he ſoon after (*o*) began to turn his thoughts to the third queſtion recited in the entrance of that treatiſe. However, in this deſign he had opportunity to make but a very ſmall progreſs. He was himſelf not without apprehenſions, that he ſhould not live to finiſh it; and about Midſummer 1723 he was prevailed upon by the inſtances and perſuaſions of his friends to ſet about reviſing and publiſhing what he had done of the work, which contained an anſwer to the two firſt of the propoſed queſtions; reſolving, as ſoon as that ſhould be done, to return to and finiſh his anſwer to the third queſtion (*p*). But in this he was diſappointed; for immediately after he had completed the reviſal and publication of the treatiſe as it appeared in 1724 [*H*], in 4to. an accident of breaking his arm increaſed his diſtempers, and haſtened his death, which happened October 29th the ſame year. His body was carried down to Great Finborough, and laid cloſe by the ſide of his deceaſed wife, according to his own deſire, expreſſed in the epitaphs above-mentioned. We are aſſured (*q*), that the picture of his life is moſt fully drawn in *The Religion of Nature delineated*; that there we may behold him in his real character, in the humble ſubmiſſion and reſignation of himſelf to the unerring will of the divine Being; in his true conjugal and paternal affection to his family; in his kind regard and benevolence towards his fellow creatures, according to their reſpective ſtations in life. For he himſelf ſteadily practiſed thoſe duties and obligations which he ſo earneſtly recommended to others. Accordingly his lateſt moments were calm and eaſy, ſuch as might be expected to cloſe a life ſpent like his. He left the world, as he ſojourned in it, quietly and reſignedly. Both the manner of his life, and that of his death are well worthy of imitation. The great demand for this book (of which more than ten thouſand were ſold in a very few years) and the public honours paid to the memory of the author, are ſufficient teſtimonies of its value. Yet it has not eſcaped the cenſure of a celebrated mercurial writer [*I*]. However, it muſt be owned, that another of

(*o*) July 1723.

(*p*) Theſe three queſtions are in the beginning of his book, p. 4.

(*q*) Pref. p. 23.

We need not take notice that the quality marked by the Greek word, which declares her a true virgin before marriage, is ſomething ſingular, and no where before (as I know of) mentioned in an epitaph. Every ſchool-boy knows it is fetched from Homer (10), where Agamemnon gives this excellence in Clytemneſtra as the principal motive of his preferring her to Briſeis, and being ſo ſatisfied in her as not to deſire any amorous exceſſes with another.

> ——*καὶ περ ϱα Κλυτεμνεςρης προβεβȣλα*
> *Κȣριδίης ἀλόχȣ*——

[*H*] *As it appeared in* 1724.] It has gone through ſeveral editions ſince that time. To the 7th, printed in 1750, which is the lateſt, there is added a tranſlation of the notes into Engliſh by Dr John Clarke, Dean of Saliſbury, who informs us (11), that this taſk was undertaken by him at the particular requeſt of her late Majeſty Queen Caroline for her own uſe. In this performance, which, as far as I have looked into it, ſeems in general to be juſt enough, only one paſſage occurred, where, if the tranſlator has given us the true ſenſe of the original, it ſeems to ſtand in need of ſome further opening, to let us ſee directly into the aptneſs of Mr Wollaſton's application. In p. 201. our author obſerves, that *we are not always certain who are good, and who are wicked.* This remark is illuſtrated by the following obſervation of Virgil,

> ——*Cadit & Riphæus juſtiſſimus unus*
> *Qui fuit in Teucris, & ſervantiſſimus æqui.*
> *Dîs aliter viſum!*——

Thus tranſlated by Dr Clarke, 'Riphæus alſo was 'ſlain, who was one of the moſt juſt men amongſt the 'Trojans, and a very ſtrict preſerver of equity; *but 'the Gods muſt be ſubmitted to.*' Here the word *muſt* throws the ſenſe aſide from Mr Wollaſton's intention; to prevent which I would add theſe words, '*who know 'better than we.*'

[*I*] *Has not eſcaped the cenſure of a celebrated mercurial writer.*] This is Mr William Warburton, now Biſhop of Glouceſter, who frankly ranks our author among thoſe who have not *founded morality in will*, but having clearly demonſtrated the natural eſſential differences of things, never gave themſelves any farther trouble, but delivered this as a proof of the moral difference. "One of our moſt celebrated writers," ſays he (12), [Dr Wollaſton] "hath not eſcaped this "delusion; who diſſatisfied with all the principles "with which the preceding writers of his party had "deduced the morality of actions, when he had de"monſtrated with greater clearneſs than any before "him the natural eſſential difference of things, un"luckily miſtook it for the moral difference, and "thence made the formal ratio of moral good and "evil to conſiſt in a conformity of mens actions to the "truth of the caſe, or otherwiſe. For it is a prin"ciple with him, that a true propoſition may be de"nied or affirmed to be what they are by deeds as "well as by expreſs words. But had both parties "been pleaſed to conſider this natural eſſential differ"ence of things, as what it muſt be confeſſed by both "to be, the rule that God hath given his creatures "to bring them to the knowledge of his will, the "diſpute had been at an end: and they had em"ployed this difference not as the atheiſt does, for the "foundation of morality, but as all true theiſts ſhould "do, for the medium to bring us to that only ſound "foundation, *the will and command of God.*" It may not be amiſs to ſet this matter in its true light, which I take to be as follows. Mr Wollaſton, in his ixth propoſition, ſection 1. where the definition referred to by this antagoniſt is found, expreſſes himſelf thus (13): *If the formal ratio of moral good and evil be made to conſiſt in a conformity of men's acts to the truth of the caſe, or the contrary, as I have here explained it, the diſtinction ſeems to be ſettled in a manner undeniable, intelligible, practicable.* This explanation is contained in the preceding propoſitions; in the fourth of which (14) he obſerves, that thoſe propoſitions which are true and expreſs things as they are, expreſs the relation between the ſubject and the attribute as it is.——If there is a ſupreme being upon whom the exiſtence of the world depends, and nothing can be in it but what he either cauſes or permits to be, then to own things to be as they are, is to own what he cauſes, or at leaſt permits to be thus cauſed or permitted; and this is to take things as he gives them, to go into his conſtitution of the world, and to ſubmit to his will revealed in the books of nature; to do this therefore muſt be agreeable to his will.——He proceeds afterwards in theſe words: As the owning of things in all our conduct to be as they are, is direct obedience; ſo the contrary not to own things to be what they are, is direct rebellion againſt him who is the author of nature. Farther, Mr Wollaſton's ixth propoſition is (15), If there be moral good and evil diſtinguiſhed as before, there is religion, and ſuch as may moſt properly be ſtiled natural. [Here] by religion, ſays he, I mean nothing elſe but an obligation to do what ought not to be omitted, and to forbear what ought not to be done. So that there muſt be religion if there are things of which ſome ought not to be done, ſome not to be omitted: but that there are ſuch, appears from what has been ſaid

of equal wit and learning, but of a more artful addreſs, has ſhewn more reſpect to our author's univerſal reputation [*K*]. He had by his wife eleven children, of whom four died

ſaid concerning moral good and evil; becauſe that which to omit would be evil, and which therefore being done would be good, or well done, ought certainly by the terms to be done, and ſo that which being done would be evil, and implies ſuch abſurdities and rebellion againſt the ſupreme being *as are mentioned under propoſition the IVth*, ought moſt undoubtedly not to be done.—Since things are ſo, there muſt be religion in nature, properly called the *religion of nature*, or *natural religion*, the great law of which religion, the law of nature, or rather of the Author of nature, is——After this he proceeds to treat of happineſs and reaſon, as neceſſary to a full explanation of his manner of thinking. Under this laſt head of reaſon, having ſhewn that our reaſon can diſcover truth, and perceive the will of God, he obſerves (16), that a Being who has ſuch a determining and governing power ſo placed in his nature, as to be eſſential to him, is a being certainly framed to be governed by that power. *It ſeems to be as much deſigned by nature, or rather the Author of nature*, that rational animals ſhould uſe their reaſon and ſteer by it, as &c. If then, continues he (17), a rational being as ſuch is under an obligation to obey reaſon, and this obedience or practice of reaſon coincides with the obſervation of truth, theſe things plainly follow. 1. *That what is ſaid, ſect. I. prop. IV. muſt be true with reſpect to ſuch a being*, for this further cauſe, becauſe to him nothing can be right that interferes with reaſon, and *vice verſa*. 2. That there is to a rational being ſuch a thing as religion, which may alſo upon this further account properly be called natural. For certainly to obey the law which the Author of his being has given him, is religion; and to obey the law which he has given or revealed to him by making it to reſult from the right uſe of his own natural faculties, muſt be to him his natural religion. 3. A careful obſervation of truth, the way to happineſs, and the practice of reaſon, are in the iſſue the ſame thing, and ſo at laſt natural religion is grounded upon this triple and ſtrict alliance or union of truth, happineſs, and reaſon. Having now, and not before, completed the explanation of his whole meaning, be begins ſect. Vth in theſe words: 'I have 'ſhewn in what the nature of moral good and evil 'conſiſts; viz. *a conformity or diſagreement to truth, 'and thoſe things that are coincident with it, reaſon 'and happineſs*.' Can any one now entertain the leaſt doubt but by the words, *a conformity to the truth of the caſe as I have explained it*, Mr Wollaſton comprehends, among others, that truth which ariſes from the relation betwixt man as a creature and the will of God as his Creator: without which relation, that is, if there was no God, the truth of the caſe would not be what it is; that reaſon can perceive this relation, and that this perception clearly indicates the deſign or will of God, who is the Author of it, that man ſhould be governed by it. So far Mr Wollaſton. Let us now ſee how this point is determined by his antagoniſt. After he has run through the whole argument, he ſums up the matter thus: *On the whole then, it appears from the ſtrongeſt and cleareſt deductions of reaſon, that will and will only can conſtitute obligation; and conſequently moral actions, that is, ſuch as deſerve rewards and puniſhments*. Yet when men reflect upon the affections of their own minds, and find there a ſenſe of right and wrong ſo ſtrongly impreſſed as to be attended with a conſciouſneſs; that the one deſerves reward, and the other puniſhment, even though there were no God; this ſo perplexes matters as to diſpoſe them, in oppoſition to all thoſe plain deductions, to place morality in the eſſential difference of things. But would they conſider that *that* very ſenſation, which ſo much miſleads us in judging of the true foundation of morality, is the plaineſt indication of *will*, which for the better ſupport of virtue ſo framed and conſtituted the human mind, a conſtitution utterly inconceivable on the ſuppoſition of no God; would they, I ſay, but conſider this, all the difficulty would vaniſh (18).—I confeſs, he muſt have a much clearer eyeſight than I am bleſſed with, who can perceive any other difference between theſe two celebrated authors in the point before us, than this, that according to the reaſoning of the former, the truth of the caſe neceſſarily includes the will of God the Author of nature, without which therefore any ſuppoſed obligation to act in conformity to that truth muſt be deficient; whilſt the latter pronounces that the will, and the will only of God the Creator, conſtitutes obligation. The atheiſt is in each view alike placed out of the rank of a moral agent; but Mr William Wollaſton, whoſe aim evidently was both to convince and perſuade the gainſayer, choſe to expreſs himſelf ſo, as to ſettle the point in a manner not only the moſt undeniable, but likewiſe the moſt intelligible, and at the ſame time the moſt practicable too; whereas Mr William Warburton, whoſe aim and whoſe only aim is clearly to confute the atheiſt, has with no leſs judgment perhaps in that view choſe to ſuit his expreſſion to the dogmatical preciſion of the ſchools: *Will and will only conſtitutes obligation* *.

[*K*] *Another ... has ſhewn more reſpect to our author's univerſal reputation.*] This is Dr Conyers Middleton, (19) who, in a letter to Dr Waterland, having (as he pretends) ſhewn his antagoniſt's weakneſs in anſwering the objections againſt revealed religion, advanced by the author of *Chriſtianity as old as the Creation*, obſerves, that the taſk he had undertaken of vindicating the particular texts of ſcripture from cavil and exception, 'or, ſays he,' 'reſcuing, as you call it, the word 'of God from reproach and blaſphemy, is much more 'likely to furniſh matter for new ſcandal, than extinguiſh the old: for this, as far as my experience has 'reached, has always been, and will for ever be, the 'conſequence of this method of defending religion; 'ſince it is built upon a wrong principle, and proceeds 'upon a ſyſtem that cannot be maintained, viz. that 'every ſingle paſſage of the ſcriptures we call canonical, muſt needs be received as the very word and 'as the voice of God himſelf. This notion, which 'you every where inculcate, as 'tis falſe in itſelf, ſo 'it muſt neceſſarily lead you into error and abſurdity, 'and expoſe you to the contempt and ridicule of all '*rational* men, who can never embrace an hypotheſis, 'however confidently aſſerted, which they ſee contrary 'to facts, and the plain conviction of their ſenſes.' He then proceeds to confirm this remark with the teſtimony of Mr Wollaſton, in theſe words: 'Tis the obſervation, ſays he, of a late grave author, much verſed in reflections of this kind, *that there is no greater cauſe of modern infidelity* (20), *than that ſome opinions and rites are carried to ſuch an immoderate height, as expoſes the abſurdity of them to all men of common ſenſe* (21); *who out of an indignation and an exceſſive renitence, not ſeparating that which is true from that which is falſe, are apt to fall into the contrary extreme, a contempt of all religion*.

But if this covert freethinker found it to his purpoſe to commend our author, we ſee another, who while he allows him to be a man of parts, learning, a philoſopher, and a geometrician, yet condemns his ſyſtem as a ſtrange *theiſm*, and has laboured through ſeveral pages to ridicule it, as being alike dogmatical and abſurd, as what he calls artificial theology. The high-ſpirited writer here underſtood, is the famous Henry late Lord Viſcount Bolingbroke (22), who was quick-ſighted enough to perceive that Mr Wollaſton's method of demonſtrating the religion of nature, clearly paves the way for the *religion of grace*, which it was his open purpoſe to diſcredit. Our author, in treating of the proofs for the immortality of the ſoul, has theſe words: Here I begin to be very ſenſible how much I want a guide. But as the religion of nature is my theme, I muſt at preſent content myſelf with that light, which nature affords; my buſineſs being, as it ſeems, only to ſhew what a heathen philoſopher without any other help, and almoſt αὐτοδίδακτος *, may be ſuppoſed to think. I hope that neither the doing of this, nor any thing elſe contained in this delineation, can be the leaſt prejudice to any other true religion; whatever is *immediately revealed from God*, muſt as well as any thing elſe be treated as being what it is, which cannot be, if it is not treated with the higheſt regard, believed, and obeyed. That, therefore, which has been ſo much inſiſted on by me, and is as it were the burden of my ſong, is ſo far from undermining true *revealed religion*, that it rather paves the way for its reception. This I take this opportunity to remark to you once for all (23). How comes it then to be aſſerted that he makes no mention of revealed religion, not even dropping the leaſt or moſt diſtant hint in its favour (24)? Mr Wollaſton indeed ſticks cloſe to his plan in anſwering the two died in his life time, the reſt ſurvived him. Four of his ſons were educated, as he had been, at Sydney College in Cambridge. The eldeſt, William Wollaſton, Eſq; who ſucceeded to his father's eſtate, reſides now at Finborough, and is one of the repreſentatives in parliament for Ipſwich *.

* This was written during the laſt parliament of George II.

two firſt queſtions concerning natural religion; the conſideration of revealed religion moſt properly falling under the purpoſed anſwer to the third queſtion; namely, *How a man may qualify himſelf ſo as to be able to judge for himſelf of the other religions profeſſed in the world?*

Let it be added by way of *corollary* (to keep to our author's plan) that he found himſelf obliged expreſsly to recur to revelation for ſuch a proof of the ſoul's immortality as ſuperſeded all the arguments produced in ſupport of it by mere unaſſiſted reaſon; all which, after collecting them into one view, and urging them as he has done in the ſtrongeſt manner, are conſequently by this appeal implied to fall ſhort of giving that full ſatisfaction neceſſary to this grand baſis of all religion.

It is obſervable, that in proſecuting this important point, he was led, for the ſolution of ſome difficulties, to embrace, though not pertinaciouſly to maintain, the opinion (of Plato, if I miſtake not) that that the human ſoul is a cogitative ſubſtance clothed in a material *vehicle*, or rather united to it, and as it were inſeparably mixt, I had almoſt ſaid, continues he, incorporated with it; that theſe act in conjunction, that which affects the one affecting the other (25). This opinion he likewiſe thinks to have been eſpouſed or at leaſt countenanced by Mr Locke, where that philoſopher writes thus: *It is worth our conſideration, whether active power be not the proper attribute of ſpirit, and paſſive power of matter. Hence may be conjectured, that created ſpirits are not totally ſeparate from matter, becauſe they are both active and paſſive. Pure ſpirit,* viz. *God, is only active, pure matter is only paſſive; thoſe beings that are both active and paſſive, we may judge to partake of both* *. Mr Wollaſton afterwards calls this an *animated* vehicle (26), and ſuppoſes it not to be diſſolved with the groſs body by death, but to be immortalized, and to continue for ever united to the ſoul; and that by means of this vehicle the man continues to be the ſame perſon through all the changes which the groſs body undergoes in this life; 'that is,' ſays he, 'if I may uſe a ſchool term, the *egoity* is preſerved (27).' However, he is very far from ſuppoſing that this material vehicle, ſubtilized and refined as it may be, is capable of thinking. On the contrary, nobody has better than he ſhewn againſt Mr Locke, the utter impoſſibility of matter's being endued with that faculty, or that ſuch a power can be ſuperadded to any matter, however refined or ſubtilized: nor has any one better than he anſwered Mr Locke's objections againſt thinking's being eſſential to the ſoul.

(25) p. 363.

* Locke's Eſſay upon Human Underſtanding.

(26) p. 371.

(27) p. 373.

But after all, we muſt not conclude theſe remarks without taking notice of ſome notions advanced by our author incidentally in the courſe of his work, which may, perhaps, be thought not defenſible; as that "there were *animalcula* of every tribe originally "formed by the Almighty Parent, to be the *ſeed* of "all future generations of animals (28)." Again, in ſpeaking of the aſſiſtance and directions given to good men, and the infatuations to bad men, by the Deity, he ſays, "If any one ſhould object, that if "men are thus over-ruled in their actings, then they "are deprived of their liberty, &c. the anſwer is, "that though man is a free agent, he may not be free "as to every thing (29);" whereas, if I miſtake not, it is generally held by the advocates of free-will, that theſe influences of the Deity, if there be ſuch, are ſo directed, as no way to intrench upon the human liberty.

(29) p. 165.

P

WOLSEY (or, as it is ſometimes written, WULCEY †) [THOMAS] Cardinal S. R. E. and Archbiſhop of York, Prime Miniſter to K. Henry VIII. a perſon who from a mean birth raiſed himſelf by very extraordinary abilities to all theſe high honours and dignities, and therefore juſtly claims a place in this collection. He was born in March 1471 at Ipſwich in Suffolk, of parents, whoſe obſcurity hath eluded the moſt diligent reſearches of the antiquarians [*A*]. But the boy diſcovering in his infancy a ſprightly genius, and a diſpoſition to learning, was put to a grammar ſchool, where he made a very extraordinary progreſs, and being ſent thence to Magdalen College in Oxford, he advanced in the academical ſtudies with equal quickneſs, and obtained his firſt degree of Bachelor of Arts in a ſmall time after his admiſſion, which being conferred upon him at the age of fifteen, procured him the appellation of the *boy bachelor (a)*. He was elected Fellow of his college ſoon after; and having commenced Maſter of Arts, was appointed maſter of the grammar ſchool, belonging and adjoining to the college; during which employ he had, among others under his care, three ſons of the Marquis of Dorſet [*B*], who afterwards, on his entering into holy orders, became his patron. In

1498

† See Knight's life of Eraſmus. p. 36. and Fiddes's life of Cardinal Wolſey, p. 2. note (*e*).

(*a*) Secret hiſt. of Card. Wolſey, by Cavendiſh, who ſays he had this laſt particular from the cardinal's own mouth, ch. 1.

[*A*] *Obſcure parents.*] The ſtory of his father being very mean, and a butcher, which had paſt current before, was at laſt contradicted by Dr Fiddes, who meeting with the laſt will of one Robert Wolſey of Ipſwich, wherein are the following paragraphs: *Item; I will that if Thomas my ſon be a prieſt within a year next after my deceaſe, then I will that he ſing for me and my friends by the ſpace of a year, and he to have for his ſalary ten marks. And if Thomas my ſon be not a prieſt, then I will that another honeſt prieſt ſing for me and my friends for the term aforeſaid, and he to have the ſalary of ten marks.*

Item, I will that Joan my wife have all my lands and tenements in the pariſh of St Nicolas in Ipſwich, and my free and bond land in the pariſh of Stoke. The reſidue of my goods not bequeathed, I give and bequeath to Joan my wife, Thomas my ſon, and Thomas Cady, who I make executors of this my teſtament, and do order Richard Farington ſupervíſor thereof.

This will, ſays Fiddes, is dated September 21, 1486, and the reference in it to his ſon Thomas, who is ſuppoſed to have been bred a ſcholar, and deſigned for a prieſt, renders it not ſo much probable as a matter paſt all doubt, if we may judge from the circumſtances of time and place, the agreement of names and perſonal characters, that this Robert was in fact the father of Thomas, afterwards Cardinal Wolſey; who, as he had no eccleſiaſtical preferment till the time of his being inſtituted to the rectory of Lymington in 1500, may very well be preſumed to have taken orders ſhortly after the date of this will, being at the time when it was executed in the 25th year of his age. Beſides, had there been any other Wolſey deſigned for holy orders of the ſame name, place, and age with the Cardinal, it is highly probable ſome account would have been preſerved of him in hiſtory or by tradition, by reaſon of his having at leaſt ſome diſtant relation in theſe ſeveral reſpects to ſo very eminent a perſon. In all probability he had neither brother nor ſiſter then living, there being no mention of other children, nor the leaſt proviſion made for any in the will, the tenor of which ſpeaks the teſtator to be poſſeſſed of a conſiderable eſtate for a plebeian at that time. Upon the whole, may not the whole matter be compromiſed by ſuppoſing Wolſey's father to have been both grazier and butcher, which is very common to this day? (1) It may not be impertinent to obſerve, that a baſs relief of the Cardinal's head in profile is carved, with a butcher's knife by the ſide, on the central board of the arch of the gateways into the butchery at Ipſwich. There is a tradition that it was built by the Cardinal, and it appears now to be very old, and being a timber building, may undoubtedly have ſtood from the Cardinal's time.

(1) Fiddes's life of Wolſey, p. 5. ed. 1723. fol.

[*B*] *Three ſons of the Marquis of Dorſet.*] Their names were John, Anthony, and Leonard. Their father

1498 he was made Burſar of his college [*C*]. About which time he became acquainted with Eraſmus [*D*], then at Oxford, with whom he concurred in encouraging what was then called the new learning, or the ſtudy of the Greek language (*b*) in that univerſity [*E*]. During the Chriſtmas holidays in 1499, he attended his three honourable ſcholars to

ther Thomas Grey was created a Marquis by Ed. IV. and upon Richard's mounting the throne he rerired into France; and being at the French court when the Earl of Richmond was ſoliciting their aſſiſtance, he voluntarily offered himſelf to remain there as one of the Earl's pledges. Upon Henry's ſucceſs the money being paid, the Marquis returned to England; where he had not been long before Henry grew jealous of him, on account of ſome expreſſions dropt in France relating to Henry's title. Being informed of the King's diſpleaſure, he ſet out for St Edmundſbury, where his Majeſty then was, with a deſign to juſtify himſelf, but was arreſted on the road, and carried to the Tower without being heard, where he remained till the defeat of Lambert Simnel, and the Queen's coronation ſoon after; when being releaſed without examination, he retired ere long into the country (2), and ſpent the greateſt part of the remainder of his time in a rural life. It was during this retirement that Wolſey became known to him.

From this nobleman deſcended the laſt Duke of Kent of the name, who was Marquis Grey May 30, 1740. His Grace having no male iſſue, his eldeſt daughter alſo, who married the Lord Glenorchy, having no male iſſue, left an only daughter, Jemima Campbell, who married the Honourable Philip York, eldeſt ſon to the Earl of Hardwick, late Lord Chancellor of England. She was created Marchioneſs Grey, and the title of Marquis Grey was limited upon her marriage to the heirs male of her body (3).

[*C*] *He was burſar of his college.*] While he had this office the tower of the college chapel was finiſhed, called Wolſey's Tower, which is univerſally admired for its beautiful ſimplicity and juſt proportion. It is ſaid, the burſar made uſe of violent means to ſupply himſelf from the college treaſury with the money neceſſary to carry on the building; but the charge muſt have no foundation, ſince though ſo heinous an offence, yet it never was, as we find, objected to him by his enemies. It is likely, ſays Dr Fiddes (4), if he did uſe any forcible means to come into the treaſury, he apprehended himſelf unjuſtly oppoſed, contrary to ſome previous truſt which the ſociety had repoſed in him, wherein yet they might think it convenient, by reaſon of the growing unexpected expences of the building, that he ſhould be reſtrained. Upon the whole, the moſt candid way of judging is to conſider that noble ſtructure as an early inſtance of Wolſey's great and enterprizing mind, and we may add, of his good taſte in architecture.

[*D*] *He became acquainted with Eraſmus.*] This great genius came to England the year before, and going to Oxford, fell there into the acquaintance, among others, of our Burſar of Magdalen college (5). Beſides the natural connection between them as men of learning, Eraſmus had been tutor at Paris to Thomas Grey, eldeſt ſon of the Marquis of Dorſet. From this beginning there grew a kind of friendſhip between them, which it ſoon became the intereſt of Eraſmus to cultivate. Accordingly we find him very early publiſhing a Latin tranſlation of Plutarch's tract concerning *the uſefulneſs that may be reaped from Enemies,* inſcribed to Wolſey, who he obſerved to a friend was riſing ſo faſt in favour and preferments, that he had been forced to change his addreſs three times. It was finiſhed when Wolſey was made Biſhop of Lincoln; Eraſmus was then at Cambridge, and repaired to London to pay his compliments upon the occaſion to the new Biſhop, who received him very kindly, and gave him hopes of the firſt vacant canonry at Tournay. This was performed afterwards, as is proved by an Epiſtle of one Molendinus, a canon there, to Eraſmus, quoted by Dr Knight, who however obſerves, that he was worked up by his friends ſo as to have no liking for it, which is confirmed by his never going to take poſſeſſion of it. The Cardinal therefore diſpoſed of it to another, promiſing to give Eraſmus ſomething more agreeable to his mind. It appears from a letter of Sir Thomas More to Eraſmus, that this was a preferment which would not have ſuited him, and that the Cardinal did him no ill office in taking it again. Beſides, about the ſame time a penſion was obtained for him by Wolſey to the value of two hundred florins, which apparently was pretty regularly paid, ſince Eraſmus complains of his having received only two hundred florins in 1517. Dr Knight had better grounds for his remark, that Eraſmus did not much depend upon the Cardinal, though he continued to pay his court to him. In a letter, dated from Baſil, February 3, 1516, to the Cardinal, he begins thus: I am very ſorry that I had not an opportunity of a longer and more particular conference with your Highneſs before I left England: my laſt refuge and the ſheet anchor of my felicity I had fixed in you; *extremam & ſacram anchoram, ut vocant, meæ felicitatis in Te fixeram.* But I was in haſte to publiſh St. Jerom.——He proceeds thus: There is a new Greek Teſtament printed as it was written by the Apoſtles, with a Latin tranſlation and annotations by me, and ſome other things.—He concludes in theſe terms: Therefore, when we have finiſhed theſe undertakings, we will haſten our return to England, eſpecially if your Eminency's goodneſs and generoſity will in the mean time be providing ſomething for me as a refreſhment both to my mind and body, after the fatigues I have undergone from theſe employments. May a good ſtate of health be enjoyed by your moſt reverend Lordſhip, to whom I wholly devote and dedicate myſelf. After all this talk of his deſign to publiſh St Jerom's works, the Cardinal might fairly expect to have ſeen it addreſſed to himſelf; but inſtead of this it came out that year with a dedication to Archbiſhop Warham, the Cardinal's profeſſed enemy. Indeed both this piece and his edition of the New Teſtament gave great offence to the zealots among the clergy, who ſpared not to tax Eraſmus with hereſy. Upon theſe accounts he might fairly think it proper to drop his attachment to his old friend: who 'tis acknowledged did not ſpare in return occaſionally to beſtow ſome of the choiceſt flowers of his ſarcaſtical rhetoric upon the Cardinal. So that, upon the whole, Dr Fiddes's remark upon it deſerved not that ſevere cenſure which is thrown upon it by Dr Knight; but we ſhall lay it before the reader for his judgment. ‘After all the advantageous things ſpoken by Eraſmus of the Cardinal, did he not at laſt expoſe him to the world in a new, perhaps a much truer light, as being no longer under the awe of his power and promiſes, or as having nothing more either to fear or hope from him? This, ſays the Doctor, is an exception, which may be naturally made, and I am willing to give it all the force I can; but at the ſame time recommend it to be conſidered how far a change of fortune in our patrons and friends is commonly apt, though that is an effect which ought not to follow in generous minds, to cauſe a change both in our ſentiments and behaviour towards them, and eſpecially if we have thought ourſelves much neglected or very ill uſed by them.

[*E*] *He concurred with Eraſmus in encouraging the ſtudy of Greek.*] We have ventured to aſſert this upon the authority of Mr Wood (6), notwithſtanding the following animadverſion of Dr Knight (7). ‘Though the Oxford hiſtorian,’ ſays he, ‘mentions Eraſmus as teaching Greek at Oxford, and living there many years at different times, yet, by all that I can find, it is probable that he never went there after his firſt coming to England in 1498, or made no ſtay there. By his own account, he had not Greek enough to ſet up for a teacher, even ſome years after his leaving England for the firſt time. He purſued thoſe ſtudies at Paris, as ſoon as he left England; and ſays in one of his letters, that his application to Greek had almoſt killed him, and that he had no money to buy books, or to retain a maſter. He ſpeaks of a Profeſſor of Greek at Paris, one George Hermonymus, a ſurly old blockhead, who was neither willing nor able to teach it. He was therefore forced to make his own way, by tranſlating Greek writers. In a letter to Colet [Dean of St Paul's] in 1504, he ſays, that he had cloſely applied himſelf to Greek for the three laſt years.’ Was Eraſmus's heart ſet ſo much upon acquiring the Greek language, that he purſued that ſtudy as ſoon as he left England, is it not then more than probable that he encouraged it before at Oxford?

which

(*b*) Dr Fiddes, in his life of the cardinal, obſerves, that this gained Wolſey great reputation there.

(2) The Marquis being a Yorkiſt, it is probable would not have been ſo eaſily diſcharged, had there been any proof againſt him.

to their father's houſe, when the Marquis was ſo much pleaſed with his converſation, that he preſented him to the rectory of Lymington in Somerſetſhire, which was in his gift, and became vacant in the beginning of the following year 1500. This was the firſt preferment he had in the church, and he left the univerſity in conſequence thereof, and reſided upon his cure, where he repaired and beautified both the church and the parſonage-houſe. But a piece of ill conduct [*F*] in 1502 drew upon him the diſpleaſure of Sir Amyas Pawlet, then a juſtice of peace in the neighbourhood, who carried his anger ſo high as to ſet the Rector in the public ſtocks of the town. This rude treatment, added to the loſs of his patron the Marquis, who died in September the preceding year, put him upon thinking of a removal from Lymington (*c*). It is obſerved, that he had a natural dignity of manner and aſpect (*d*), which was very ſerviceable to his preferment. Accordingly he was received not long after by Dr Dean, Archbiſhop of Canterbury, as one of his domeſtic chaplains. In this ſituation he quickly became a great favourite, and by his means obtained from Pope Alexander the grant of a diſpenſation to hold two benefices, in 1503. Upon the death of the Archbiſhop on the 15th of February that year, he was appointed Chaplain to Sir John Nanfan (*e*), who being Treaſurer of Calais, then in the poſſeſſion of the Engliſh, took Mr Wolſey in his retinue to that place, and in a little time, being much advanced in years, committed to him the whole care and management of his office, and upon his return to England recommended him to his Majeſty [King Henry VII.] ſo effectually, that the King made him one of his chaplains *. This was a ſtep he had much wiſhed for, and it was ſoon improved by him. Before the end of December 1504, he obtained from Pope Julius II. another diſpenſation to hold a third preferment; and the following year was preſented to the rectory of Redgrave in the dioceſe of Norwich. In the mean time he made his court ſo ſucceſsfully to two favourites of his Majeſty, that they ſpoke of him with high commendations of his wit and eloquence, learning and aſſiduity, to their maſter, who thereupon ſent for him, and propoſed ſeveral queſtions to him about his affairs, his anſwers to which ſatisfying the King of his abilities, his Majeſty reſolved to entruſt him with a ſecret negotiation for ſettling ſome points previous to his projected marriage with Margaret, Ducheſs Dowager of Savoy, the Emperor Maximilian's only daughter, and relict of Philip King of Caſtile. Whilſt his inſtructions were drawing up, he had frequent acceſs to the King and council, to whom he gave freſh proofs of his capacity for political affairs. He executed this embaſſy with ſurprizing diſpatch [*G*], for which he received particular thanks from Henry, who on February the 2d next year gave him the Deanery of Lincoln; to which were added in the beginning of 1509 firſt the prebend of Walton Brinhold, and then that of Stowe in the ſame church, and was prevented from giving him farther marks of his favour by his death, which happened on the 22d April that year (*f*). But this loſs was abundantly repaired by his ſon and ſucceſſor Henry VIII. The Biſhop of Wincheſter, who had recommended him to the father, began now to caſt his eye upon him as a perſon that might be ſerviceable to himſelf in his preſent ſituation. This prelate ob-

(*c*) However, he did not reſign the living till 1509. Ib.

(*d*) This is not ill expreſſed in his ſtatue over the gateway to the grand entrance into the hall at Chriſt-Church, erected at the expence of Sir Jon. Trelawney, ſome time Biſhop of Wincheſter.

(*e*) Sir John, who was a Somerſetſhire man, might probably know or have heard of him while he reſided at Lymington, which is in that county.

* Lord Herbert ſays, he was chaplain to the houſhold.

(*f*) Gen. Hiſt. of England.

---

which is all that is aſſerted in the text; to which may be added however in reſpect of his teaching it there, that Greek was ſo very little, if at all known then, that a very ſlender acquaintance with it would be ſufficient to initiate others therein (8).

[*F*] *A piece of ill conduct.*] Wolſey being of a free and ſociable temper, went with ſome of his neighbours to a fair in an adjacent town, where it is ſaid his drinking to exceſs created ſome diſorder, which was puniſhed by the Knight in this ignominious durance. Biſhop Godwin ſays, Sir Amyas treated Wolſey in this ſcandalous manner for little or no occaſion; and Dr Fiddes thinks, he could not well juſtify it. Whatever judgment may be paſſed thereupon, we find the affront was remembered by Wolſey, who, when he came to be Chancellor, ſent for the Knight, and ſeverely reprimanded him for it, and confined him within the bounds of the Temple for five or ſix years (9); which Dr Fiddes allows was extending his authority too far: and indeed in point of generoſity it might have been forgot, eſpecially after it had been followed by ſuch a prodigious train of the higheſt preferments; and in point of prudence ſuch a neglect of it would have helped to bury it in oblivion.

[*G*] *He executed this affair with ſurprizing diſpatch.*] He ſet forward from Richmond, where Henry then was, at four in the afternoon on a Sunday, and ſoon came to London, where he found a barge ready to carry him to Graveſend; arriving there in leſs than three hours, he immediately took poſt horſes, and reached Dover the next morning: the paſſage-boat being juſt going off for Calais, he was ſo lucky as to get thither before noon, from whence he got to Bruges on Tueſday morning. The Emperor receiving notice of his arrival, inſtantly gave him audience, to whom Wolſey delivering his credentials, preſſed his return might be expedited; upon which Maximilian gave him his anſwer the ſame night, wherein every thing he had propoſed on the part of his maſter was agreed to. Upon this, early on Wedneſday morning he took poſt for Calais, where he came at the opening of the gates, and found the paſſage-boat ready to put to ſea; he embarked therein, and in a ſhort time landed at Dover; where poſt horſes being ready, he arrived ſafe that night at Richmond, where he repoſed himſelf after ſo fatiguing a journey. On Thurſday morning he attended at court; as ſoon as he ſaw his Majeſty he threw himſelf at his feet. Henry was diſpleaſed to ſee him, and ſuppoſing he had protracted his departure, began to reprove him for the dilatory execution of his orders. On which Wolſey, to the King's great ſurprize, addreſſed himſelf to his Majeſty in the following words: If it may pleaſe your Highneſs, I have already been with the Emperor, and diſpatched your affairs, I truſt, to your Grace's contentation; and then preſented his letters of credence. *But, on ſecond thoughts,* ſaid the King, *I found that ſomewhat was omitted in your orders, and have ſent a meſſenger after you with fuller inſtructions.* 'I met the meſſenger,' replied Wolſey, 'on the road in my return; but having 'reflected on that omiſſion, I ventured of myſelf to 'execute what I knew muſt be abſolutely neceſſary to 'your Majeſty's ſervice, preſuming to ſupply the defect 'of my diſpatches in that particular, and I humbly aſk 'pardon for having exceeded my commiſſion.' His Majeſty pleaſed with the expedient, and in general with the ſucceſs of his negotiation, readily excuſed him, gave him his royal thanks, and commanded him to attend after dinner; when he reported his embaſſy to the King in council with ſuch a graceful deportment, and ſo eloquent language, that he received the utmoſt applauſe: all declaring him to be a perſon of ſuch capacity and diligence, that he deſerved to be further employed (10).

(8) See Sir Tho. More's article.

(9) Here he ſought to mitigate the reſentment of this great miniſter, and to prepare a way for the recovery of his liberty by adorning the gatehouſe next the ſtreet with the arms, the hat, and other badges of diſtinction proper to him as cardinal. Fiddes, p. 7. This gate was taken down and rebuilt by Sir Chriſt. Wren in 1684, without the former ornaments.

(10) Gen. Hiſt. of England.

ſerving, that the Earl of Surrey had totally eclipſed him in favour, reſolved to introduce Wolſey into the young Prince's familiarity, in hopes that he might rival Surrey in his inſinuating arts, and yet be contented to act in the cabinet a part ſubordinate to Fox himſelf, who had promoted him. From this juncture we are to conſider Wolſey as a ſtateſman. In a very little time he gained ſuch an aſcendant in Henry's good graces, that he ſupplanted both Surrey in his favour, and Fox in his truſt and confidence. Being admitted to the King's parties of pleaſure, he took the lead in every jovial converſation, and promoted all that frolick and entertainment which he found ſuitable to the age and inclination of the young monarch; neither his own years, which were little ſhort of forty, nor his character as a clergyman, were any reſtraint upon him, or engaged him to check by any uſeleſs ſeverities the gaiety in which Henry, who had ſome ſmall propenſion to debauchery, paſſed his careleſs hours. During the intervals of amuſement he introduced buſineſs and ſtate affairs, and inſinuated thoſe maxims of conduct, which he was deſirous his Maſter ſhould adopt. He obſerved to him, that while he entruſted his affairs to the hands of his father's counſellors, he had indeed the advantage of employing men of wiſdom and experience, but men who owed not their promotion to his favour, and who ſcarce thought themſelves accountable to him for the exerciſe of their authority. That by the factious cabals and jealouſies which prevailed among them, they more obſtructed the advancement of his affairs, than promoted it by the knowledge which age and practice had conferred upon them; and while he thought proper to paſs his time in thoſe pleaſures to which his age and royal fortune invited him, and in thoſe ſtudies which in time would enable him to ſway the ſcepter with abſolute authority, his beſt ſyſtem of government would be to intruſt his authority in the hands of ſome one perſon, who was the creature of his will, and who could entertain no view but of promoting his ſervice; and that if this miniſter had alſo the ſame reliſh for pleaſure with him, and the ſame taſte for ſcience, he could the more eaſily account to him for his whole conduct, and introduce his maſter into the knowledge of public buſineſs; and thus without tedious conſtraint or application, initiate himſelf into the ſcience of government. Henry entered into all the views of Wolſey, and finding no one ſo capable of executing this plan of adminiſtration, as the perſon who propoſed it, he ſoon advanced his favourite from being the companion of his careleſs hours, to be a member of his council, and from being a member of his council to be his ſole and abſolute miniſter *(g)*. In the mean time, upon this King's acceſſion to the throne, he was made Almoner to his Majeſty, who upon the conviction of Empſons of high treaſon, gave him that ravenous miniſter's houſe, which was near his own palace of Bridewell, Fleet-ſtreet, London. In November 1510, he was taken into the privy council, and appointed Reporter of the proceedings in the ſtar-chamber; and on the 29th of the ſame month the King preſented him to the rectory of Turrington in the dioceſe of Exeter, and on February 17th following he was made Canon of Windſor, and Regiſtrary of the moſt noble order of the Garter. In Nov. 1512 he was collated to the prebend of Bugthorp in the church of York, by the recommendation of Cardinal Bainbridge, Archbiſhop of the ſee, and upon the death of the Dean ſoon after, he ſucceeded him in the Deanery of that church (*h*). It was about this time that he became the King's firſt favourite, and had the chief management of all public affairs. The Duke of Norfolk finding the King's money almoſt all exhauſted by projects and pleaſures, while his inclinations for expence ſtill continued, was glad to reſign his office of treaſurer, and retire from court. His rival, Fox Biſhop of Wincheſter, profited nought by his obeyſance; but partly overcome by years and infirmities, partly diſguſted at the aſcendant acquired by Wolſey, withdrew himſelf to the care of his dioceſe. The Duke of Suffolk had alſo taken offence, that the King by the Cardinal's perſuaſion had refuſed to pay a debt which he had contracted during his abode in France, and thenceforth affected to live in privacy. Theſe incidents left Wolſey to enjoy without a rival the whole power and favour of the King, and put into his hands every ſpecies of authority. In vain did Fox before his retirement warn the King not to ſuffer the ſervant to be greater than his maſter; Henry replied, *that he knew well how to retain all his ſubjects in their obedience*; but he continued ſtill an abſolute deference in every thing to the direction and counſels of the cardinal. The public tranquillity was ſo well eſtabliſhed, the obedience of the people ſo entire, the general adminiſtration of juſtice by the Cardinal's means ſo exact, that no domeſtic occurrences happened ſo remarkable as to diſturb the repoſe of the King and his miniſter. They might even have diſpenſed with themſelves for giving any ſtrict attention to foreign affairs, were it poſſible for man to enjoy any ſtation in abſolute tranquillity, or to abſtain from projects and enterprizes, however frivolous and unneceſſary *(i)*. He was alſo this year made Dean of Hereford, and Chancellor of the order of the garter. In 1513 he obtained the Biſhopric of Tournay in Flanders [*H*], and before the end of the year ſucceeded to that of Lincoln, in the room

(*g*) Hiſt. of England, as before.

(*h*) Fiddes.

(*i*) Hume's Hiſt. of England, under Henry VIII.

[*H*] *He obtained the biſhoprick of Tournay in Flanders.*] This followed upon the battle of the Spurs, when Tournay ſurrendering to the King, the French Biſhop refuſed to ſwear fealty to him, upon which his Majeſty made Wolſey Biſhop, who had attended him in this expedition. However, he met with great difficulties in holding it; the Pope declaring for or againſt him, as his affairs proved ſucceſsful or otherwiſe in Italy. *Wolſey, upon his return to England, appointed* Dr Sampſon§ *his Vicar-general; who being a friend to* Eraſmus, *recommended him as a Canon to* Wolſey, *who is ſaid to have preſerved to that church its ancient privileges, for which the Canons ſent him a letter of thanks in* 1515. But when Dr Sampſon went

§ See ſome account of this perſon (who became afterwards a Biſhop, and a privy-counſellor) in Knight's *life of Eraſmus*, p. 43. and Burnett's *Hiſtory of the Reformation*, book iii. p. 149.

of Dr William Smith * deceaſed, to which he was conſecrated March 26, 1514. Cardinal Bainbridge dying that year, our minion was promoted to the ſee of York on the 5th of Auguſt, and had a bull of abſolution granted to him by the Pope in October following. Sept. 7th 1515 he was created a Cardinal of S. R. E. by the title of Cardinal of St Cecile beyond the Tiber †. This was done by the Pope manifeſtly in the view of engaging in his intereſt a perſon who had ſo great an influence over the King, and ſure never churchman, under colour of exacting regard to religion, carried to a more exorbitant height the ſtate and dignity of that character. His train conſiſted of eight hundred ſervants, of whom many were Knights and Gentlemen: ſome even of the nobility put their children into his family, as a place of education [*I*]; and in order to ingratiate them with their patron, allowed them to bear offices as his ſervants. At the ſame time, whoever was diſtinguiſhed by any art or ſcience, paid court to the Cardinal, and none paid court in vain: Literature, which was then in its infancy, found in him a generous patron, and both by his inſtitutions and private rewards he gave encouragement to every branch of erudition. But he did not content himſelf with this munificence which gained him the approbation of the wiſe; he ſtrove to dazzle the eyes of the populace by the ſplendor of his equipage and furniture, the coſtly embroideries of his liveries, and the luſtre of his apparel. He was the firſt clergyman in England who wore ſilk and gold, not only on his habit, but alſo on his ſaddles and the trappings of his horſes. He cauſed his Cardinal's hat to be borne aloft by a perſon of rank; and when he came to the King's chapel, permitted it to be laid in no place but on the altar. A prieſt, the talleſt and moſt comely he could find, carried before him a pillar of ſilver, on whoſe top was placed a croſs. And not content with this parade, to which he thought himſelf intitled as Cardinal, he provided another prieſt of equal ſtature and beauty, who marched along, bearing the croſs of York, even in the dioceſe of Canterbury, contrary to the ancient rule and agreement between the prelates of thoſe royal ſees (*k*). He had alſo a penſion of three thouſand livres granted to him this year by Charles King of Spain, having before obtained the conditional grant of a penſion of ten thouſand ducats out of the Duchy of Milan [*K*]. In November the ſame year he was made the Pope's Legate a latere;

[*L*]

in his maſter's name to ſome towns in Flanders belonging to his dioceſe in order to get in the Biſhop's dues, he found but odd treatment from the officers of the town; the Biſhop Elect, as he was then called, claiming the property of what Sampſon endeavoured to collect. With this he acquainted his Lordſhip; and in the concluſion of his letter ſays, that if his Grace would quietly enjoy the adminiſtration, he muſt get the French King to write to his Biſhop not to oppoſe; for if the officers ſaw their maſter's letter in his favour, they would immediately obey. Though Biſhop Wolſey had obtained the Pope's brief to confirm him in this biſhoprick, yet the officers objected to certain paſſages in the brief, which would make a lawſuit convenient. What further encreaſed the trouble, Adrian Biſhop of Bath and Wells, the King's Orator at Rome, ſuffered a bull to be obtained in favour of the French Biſhop, in order to reſtore him to the biſhoprick; ſo that now in a peremptory manner he demanded the revenues, threatening to excommunicate all ſuch as refuſed to comply with his demands, ſeeing the bull was directed to all Chriſtian Princes to aſſiſt him with their forces to put him into poſſeſſion of this biſhoprick, under pain of excommunication. Upon this Dr Sampſon applied to Wolſey again, repreſenting, that if the bull was not ſet aſide or ſuppreſſed, he could be of no further ſervice there. Wolſey was ſurprized; and the King ſent a letter to the Pope, aſſuring him, that his troops would by no means think themſelves obliged to execute ſo unjuſt a ſentence; declared the Pope's proceedings to be contrary to the laws of God and man; and charged the Biſhop of Bath not only with negligence, but infidelity; and in caſe he did not take care to procure a revocation of the bull, the Biſhop was given to underſtand, that he ſhould be ſuperſeded by one who would have more regard to the truſt repoſed in him. Then his Majeſty directed Wolſey to apply to the Bp of Worceſter to get the bull revoked, who ſhortly after obtained another bull, which ſuperſeded the French Biſhop's. This laſt bull had its deſired effect, and at length Wolſey was made eaſy in the enjoyment of the biſhoprick. He held it till 1518, when the town being delivered up to the French, that monarch's ambaſſadors in England gave their maſter's letters patent, whereby he bound himſelf to pay the Cardinal an annual penſion of twelve thouſand livres Tournoiſe, to ſatisfy him for the loſs of the biſhoprick (11).

[*I*] *He received ſeveral noblemen for education.*] Among others that were ſo placed was the Lord Percy, eldeſt ſon of the Earl of Northumberland, who was one of thoſe that uſually waited on the Cardinal to court; by which means the young Lord had frequent opportunities of converſing with the maids of honour, particularly with the Lady Anne Boleyn, whoſe favour and affections Percy ſoon ſo far gained, that ſhe agreed privately to marry him; which coming to Henry's ear, was ſo highly reſented by him, that he charged the Cardinal to ſend for his pupil's father to court, formally to break the contract. This affair terminated in the young Lord's receiving a ſevere reprimand from the Earl his father in the preſence of ſeveral of the Cardinal's gentlemen, and it was with much difficulty that he regained his father's favour. However, he ſhortly after quitted the Cardinal's family, retired into the country, and lived private for ſome time. The Lady Anne was alſo after this diſmiſſed the court, and ſent to one of her father's ſeats in the country, the contract being diſſolved by the Cardinal, as having been made without the King's or the young Lord's father's knowledge; and his Lordſhip ſhortly after married a daughter of the Earl of Shrewſbury. Anne Boleyn took the breach of this match ſo heinouſly, that ſhe vowed, if ever it lay in her power, to do the Cardinal ſome diſpleaſure; which ſhe afterwards made good, being, as is well known, the chief inſtrument of his ruin (12).

[*K*] *A penſion of the dutchy of Milan.*] This was ſtipulated in a treaty with Franciſcus Sforza, to aſſiſt him in recovering that dutchy from the French King. Henry was to have a yearly tribute, and Wolſey was to have 10,000 ducats yearly for his part, as appears from the original contract preſerved in the Cotton library; whereas it is aſſerted to be eighteen thouſand by Polydore Virgil. But the unfairneſs of that deputy collector of the Pope's annates to Wolſey is well known and generally allowed, and therefore needs not our animadverſion. The reader who has not already ſeen it, will be pleaſed with the following letter wrote by him, when he was in the Tower, to the Cardinal; the original is ſaid to be in the Exchequer record office, and has been thus tranſlated into Engliſh.

To the Moſt Reverend Lord my God the moſt
worthy Cardinal Wolſey.

'Moſt great and moſt Reverend Pontiff, and moſt 'firm Pillar of the Church of God, humble commendations. And I your ſervant, who ſtill am buried 'in the ſhadow of death, have heard of your extraordinary fame, with how much applauſe of all men your 'moſt reverend Lordſhip has been raiſed to the high 'Cardinalate here. So great is your vertue, that you 'reflect more luſtre and dignity on that ſupreme Order, than you receive therefrom. I among the reſt 'do rejoyce and am heartily pleaſed; but [illegible] it

your

(12) Hume, ubi ſupra.

[*L*] and, December 22d, Lord High Chancellor of England, upon the reſignation of Archbiſhop Warham [*M*]. In the beginning of the year 1518 he attended Queen Katharine

‘ ſhall be lawful for me in his Majeſty's preſence to adore you, then will my ſoul be in raptures with thee, O God of my comfort. Moſt reverend Lord God of forgiveneſs, God of pity, at length extend your mercy on your poor ſervant. Your benignity lately forgave my crime, vouchſafe out of the bowels of your mercy to forgive the penitent likewiſe, that your gifts may be as your moſt reverend Lordſhip.

‘ Now the time approaches, when our Redeemer Chriſt deſcended from the heavens to reconcile ſinners to God the Father; vouchſafe, moſt great Prelate, in the ſame manner to help me from the ſhades of death in this ſeaſon of Grace by the right hand of your clemency, and to reſtore one to holy light, that on the Lord's birth I being by your mercy regenerated, may be able to return thanks and praiſe to the ſame Lord Jeſus, with tranquillity of mind and a cheerful heart for your moſt reverend Lordſhip, as I ſhall conſtantly do, while life remains.

‘ Therefore, moſt good and reverend Lord, have mercy on me ſpeedily, who am afflicted and in great diſtreſs. See me, O Thou who canſt ſave for ever. Have mercy, draw near. Amen.

‘ Your Moſt Reverend Lordſhip's
‘ Humble creature,
‘ POLYDORE.’

The cauſe of this collector's impriſonment, Mr Rapin tells us, was this: Wolſey having employed Hadrian to ſollicit for the purple in his name, and finding Hadrian, inſtead of ſerving him, had done him ill offices, he was ſo incenſed thereat, that on ſome ſlight pretence he committed Polydore, Hadrian's deputy in England, to the Tower; and then prevailed upon the King to write with his own hand to the Pope, deſiring him to appoint another collector in Hadrian's room. It is proper to acquaint the reader, that it was not the Cardinal, but the King, who committed Polydore to the Tower (13).

(13) Gen. Hiſtories of Engl.

[*L*] *He was made Legate and Chancellor, on the reſignation of Warham.*] Cardinal Campeggio had been ſent Legate into England, in order to procure a tythe from the clergy, for enabling the Pope to oppoſe the progreſs of the Turks. The danger was real, and formidable to all Chriſtendom, but had been ſo often made uſe of to ſerve the intereſted purpoſes of the court of Rome, that they had loſt all influence on the minds of the people. The clergy refuſed to comply with Leo's demand; Campeggio was recalled; and the King deſired of the Pope, that Wolſey, who had joined in this capacity, might be alone inveſted with the legatine power, together with a right of viſiting all the clergy and monaſteries, and even with ſuſpending the whole laws of the church during a twelvemonth. Wolſey having received this new dignity, made a new diſplay of that ſtate and parade, to which he was naturally addicted. On ſolemn feaſt-days he was not content without ſaying maſs after the manner of the Pope himſelf: not only he had Biſhops and Abbots to ſerve him, he even engaged the firſt nobility to give him water and the towel: he affected a rank ſuperior to what had been claimed by any churchman in England. Warham, the Primate, having wrote him a letter, wherein he ſubſcribed himſelf *your loving brother*, Wolſey complained of his preſumption in thus challenging an equality with him. When Warham was told of the offence he had given, he made light of it; *Know ye not*, ſaid he, *that this man is drunk with too much proſperity?* ——But Wolſey carried the matter much further than pomp and oſtentation; he erected an office which he called the Legantine court, and as he was now, by means of the Pope's commiſſion and the King's favour, inveſted with all power both eccleſiaſtical and civil, no man knew what bounds were to be ſet to this new tribunal; he conferred on it a ſpecies of inquiſitorial and cenſorial powers even over the laity, and directed it to enquire into all matters of conſcience, into all conduct which had given ſcandal, into all actions, which, though they eſcaped trial, might appear contrary to good policy. Offence was juſtly taken at this tribunal, which was really unbounded; and the people were the more diſguſted, when they ſaw a perſon who indulged himſelf in the licences of pleaſure ſo ſevere in reproving the leaſt appearance of immorality in others. But to render his court more obnoxious, he made one John Allen the judge of it, a perſon of a ſcandalous life, whom he himſelf as Chancellor had condemned for perjury. As this man exacted fines from every one whom he was pleaſed to find guilty, or take bribes to drop proſecution, many concluded with ſome appearance of reaſon that he ſhared with the Cardinal thoſe wages of iniquity; the clergy, and particularly the monks, were expoſed to this tyranny; and as the libertiniſm of their lives even gave a juſt handle againſt them, they were obliged to buy an indemnity by paying large ſums to the legate or his judge. Not contented with this authority, Wolſey aſſumed the power of all the biſhop's courts, particularly that of judging of wills and teſtaments, and his deciſions in thoſe important points were ſometimes not a little arbitrary; as if he himſelf were Pope, and as if the Pope could diſpoſe abſolutely of every eccleſiaſtical eſtabliſhment, he preſented to whatever priories or benefices he pleaſed, without regard to the right of election in the monks, or of patronage in the nobility and gentry. This whole narration has been copied by all the hiſtorians from the author cited in the margin (14). Here are many circumſtances, however, very ſuſpicious, both becauſe of the obvious partiality of the hiſtorian, and becauſe the parliament, when they ſtrictly examined Wolſey's conduct, could find no proof for any material crime he had committed (15). No one durſt carry to the King any complaint againſt theſe uſurpations of Wolſey, till Archbiſhop Warham informed him of the diſcontent of the people. Henry profeſſed his ignorance of the whole matter. *A man*, ſays he, *is not ſo blind any where as in his own houſe. But do you, Father*, added he to the Primate, *go to Wolſey, and tell him, if any thing be amiſs, that he mend it.* A reproof of this kind was not likely to be effectual. It alſo ſerved to augment Wolſey's enmity to Warham. But one *London* having proſecuted Allen, the Legate's Judge, in a court of law, and convicted him of malverſation and iniquity, the clamour at laſt reached the King's ears, and he expreſſed ſuch diſpleaſure at the Cardinal, as made him ever after more cautious in exerting his authority (16).

(15) Fiddes's piece entitled, A vindication of the Cardinal from certain popular imputations.

(16) Hume in the reign of Henry VIII.

[*M*] *He was made Lord High Chancellor upon the reſignation of Warham.*] Mr Rapin having ſet forth the Cardinal's unexampled magnificence and ſtate, and obſerved that every body ſpoke of it with indignation, goes on thus: ‘ The Archbiſhop was no leſs offended than the reſt; but what gave him moſt offence was to ſee the croſs carried before the Cardinal, tho', he was in the province of Canterbury. This quarrel could not be decided but by the King's expreſs commands to the Archbiſhops of York not to have the croſs carried before them in the other province; but Wolſey, who thought himſelf much above his predeceſſors, purpoſed to revive the conteſt, in contempt of that prohibition. Warham, who was of a peaceable temper, eaſily perceived that any attempt of his to hinder it would be to no purpoſe, ſince Wolſey had an abſolute ſway over the King. Wherefore, not to have the object before his eyes, he deſired the King's leave to reſign the chancellorſhip (17).’ In anſwer to this let us hear what is alledged by Dr Fiddes. ‘ There ‘ are,’ ſays the Doctor, ‘ two conſiderable teſtimonies from Eraſmus's great friends, Sir Thomas More and Ammonius, relating to the Cardinal's wiſe and equitable conduct as Chancellor of England, that may be here moſt conveniently cited, and eſpecially as they tend to remove a prejudice which has been entertained againſt the Cardinal, as if he had uſed ſome indiſcreet methods towards ſuperſeding Archbiſhop Warham in that high office. Sir Thomas More's words are theſe: *The Archbiſhop of Canterbury hath at length reſigned the office of Chancellor, which burthen, as you know, he had ſtrenuouſly endeavoured to lay down for ſome years; and the long-wiſhed-for retreat being now obtained, he enjoys a moſt pleaſant receſs in his ſtudies, with the agreeable reflection of having acquitted himſelf ſo honourably in that high ſtation. The Cardinal of York*, proceeds Sir Thomas, *ſucceeds him, who diſcharges the duties of that poſt ſo conſpicuouſly, as to ſurpaſs the hopes of all, notwithſtanding the great opinion they had of his other eminent qualities, and what is more rare, to give ſo much pleaſure and ſatisfaction after ſo excellent a predeceſſor. Archiepiſcopus Cantuarienſis officio Cancellarii, cujus onus jam aliquot, ut ſcis, annos mirum quam laborabat excutere,*

tharine to Oxford, when he acquainted that univerſity with his intention of founding ſeveral public lectures, which he ſoon afterwards carried into execution [*N*]. The ſame
year

tere, tandem exſolutus eſt, & deſideratam jam diu ſeceſſum nactus, gratiſſimo inter literas otio, & negotiorum bene a ſe geſtorum recordatione fruitur. Princeps ei Cardinalem ſuffecit Eboracenſem, qui ita ſe gerit, ut ſpem quoq; omnium quanquam pro reliquis ejus virtutibus maximam longe exuperet. Morus Eraſmo. Ammonius writes to Eraſmus to the ſame effect in regard to the foregoing articles, and ſays, *Your Archbiſhop, with the King's good leave, has laid down his poſt, which that of York, after much importunity, has accepted, and behaves moſt beautifully. Tuus Cantuarienſis, cum bona Regis venia, magiſtratu ſe abdicavit, quem Eboracenſis impenſe rogatus ſuſcepit, & pulcherrime gerit. Andreas Ammonius Eraſmo.* Though the words of theſe two gentlemen may not be judged deciſive in the Cardinal's favour, yet it won't, I believe, be denied, that they have given the moſt candid account of the matter; for which reaſon we thought proper to give them a place here. 'Upon the other diſpute, proceeds Dr Fiddes, about precedency to the Abp of Canterbury aſſumed by the Cardinal, it has been obſerved, that even from our own hiſtories it appears, Archbiſhops formerly took place of Cardinals; and we find that Cardinals, though Legates, yielded the precedency to Biſhops, which was obſerved in the Council of Renne. But this was afterwards altered. When Kemp, Archbiſhop of York, was made Cardinal, he claimed in the Houſe of Lords the precedence of Chichely, Archbiſhop of Canterbury; the latter refuſing to comply with the demand, it was referred to the Pope, who determined it in favour of Kemp. Accordingly Cavendiſh informs us, that Wolſey having obtained to be Cardinal, thereby got the better of Warham in this point: however, Warham being Chancellor, took place in the Houſe of Peers, of which he is Speaker. This appears from the Journals of the Houſe, 7 Henry VIII. and Biſhop Burnet produceth an inſtance, wherein Wolſey after he was made Chancellor gave place to Warham. This is in a letter written to the Pope in 1530, which the Cardinal ſubſcribed before Warham; and though, as Harmer obſerves, he was not then Chancellor, which the Biſhop inſinuates, having reſigned the ſeals October 17, 1529, yet he was ſtill Cardinal. But the truth is, he was at that time neither in a condition nor temper to inſiſt upon punctilios (18).'

[*N*] *He founded ſeveral Lectures at Oxford.*] There were ſeven of them. 1. Theology, whereof one Thomas Brynknell was the firſt reader, nominated by himſelf, whoſe ſucceſſor he had been as Maſter of Magdalen college ſchool, and he afterwards was recommended to Henry VIII. by the Univerſity to write againſt Luther, and accordingly wrote a piece intitled *Tractatus contra Doctrinam Martini Lutheri*, which is commended in one of the Univerſity public Regiſters. The Univerſity makes honourable mention of him in a letter to the Cardinal, and at the ſame time acquaint his Eminency, that they are not able to expreſs the benefit of his lectures in general, and more particularly of the theological one. 2. Civil Law. It is not known who was the firſt lecturer upon this. Mr Wood ſays, it was read in 1523, as well as that of rhetoric, by Ludovicus Vives. 3. Phyſic. The firſt reader was Thomas Muſgrave, A. M. 4. Philoſophy. The initial letters of the firſt reader's name are L. B. which is all that could be diſcovered of him. 5. Mathematics. The firſt reader was one Richard Cateler, a native of Holland, and educated in the colleges of Wyrtenberg and Cologn, who is ſaid to have been a perſon of ſo great probity and goodneſs, that he deſerved a better fortune than is commonly ſhared by mathematicians; at the ſame time he was ſo great a maſter of his art, that he deſerved to be called ſo κατ' ἐξοχὴν. 6. The Greek language. Calphurnius, a native of Greece, was firſt appointed by the Cardinal to this province. This Profeſſor firſt taught the pronunciation of the language at Oxford as it is now read. 7. Rhetoric and Humanity. The firſt reader was Clement, who was ſucceeded by Lupſet. Clement was tutor to Sir Thomas More's children, and Lupſet has been already taken notice of in theſe memoirs*; we ſhall only add thereto a remark of Dr Knight, 'that he never arrived at any great preferment, which probably his 'dying young might prevent, or elſe the frowns of 'Card. Wolſey;' a cenſure paſſed without ſo much as any grounds pretended for it, might have for his own ſake been better ſpared. It is certain, the Univerſity wrote a letter of thanks to the Cardinal in 1521, for having given them Lupſet, in which are theſe words: *Immortalis beneficii loco accepimus quod benigniſſima tua beneficentia in communem rei literariæ uſum dignato ſit Lupſetum ad nos remittere, quem etſi ſemper habuimus chariſſimum, nunc tamen, quia a Tua Majeſtate amanter commendatum, multo arctius amplectimur.* This laſt expreſſion was egregious flattery; but the Cantabrigians alſo in one of their addreſſes to the Cardinal call him *præſens Numen.* This lecture was alſo read, as well as that of the Civil Law, in purſuance of the founder's requeſt, by Joannes Ludovicus Vives, a Spaniard of Valentia, of whom we have the following account; that he was born in March 1492, and having learned grammar and claſſical learning in his own country, he went to Paris to ſtudy logic and philoſophy. But theſe being taught there upon the method of the ſchoolmen, whoſe ſophiſtical diſputes were not agreeable to him, he went to Louvain, and there in 1519 publiſhed a book againſt them, intitled *Contra Pſeudo-Dialecticos.* At Louvain he applied himſelf intirely to the Belles Lettres, and became very conſummate therein; and his reputation was ſo great, that in July 1517, though then at Louvain, he was appointed Fellow of Corpus Chriſti college in Oxford by the founder; his fame being ſpread over England, as well on account of his great parts and learning, as for the peculiar reſpect and favour with which Queen Katherine of Spain honoured him; in 1521 he was choſen Preceptor to William de Croy, the young Cardinal of Toledo, who died that year. In 1522 he dedicated his Commentary upon St Auguſtine *De civitate Dei* to Henry VIII. which was ſo acceptable to that Prince, that Cardinal Wolſey by his order invited him over to England: he came in 1523, and going to his fellowſhip at Oxford (19), he there read in his college, at the Cardinal's requeſt, his lectures of humanity and civil law, at which Henry VIII. and Queen Katherine honoured him with their preſence as auditors; and being conſtituted tutor to the Princeſs Mary, who reſided there, for the Latin tongue, for whoſe uſe he wrote *De ratione ſtudii puerilis*, which he addreſſed to his patroneſs, Queen Katherine, in 1523; as he did the ſame year another *De inſtitutione Fœminæ Chriſtianæ*, written by her command. Afterwards he went to Bruges in Flanders; and returned the year following to Oxford, where he continued his lectures: but preſuming to ſpeak and write againſt the King's divorce from Queen Katherine, Henry impriſoned him for ſix months. As ſoon as he obtained his liberty he returned to the Netherlands, and reſided at Bruges, where he married, and taught polite literature till his death, which is ſaid to have happened, though not certain, in 1544; he was buried in the church of St Donatus there. His works were printed in two tomes, folio, at Baſil 1555. but without his Commentary on St Auſtin, which has been publiſhed ſeparately, though never well. However it is perhaps at preſent the moſt uſeful of his works, and contains a great deal of ſacred and profane learning (20). He was much eſteemed by Eraſmus and Sir Thomas More. 'He is one of thoſe,' ſays Eraſmus to More, 'whoſe 'glory will eclipſe mine. He is a true philoſopher, 'and a deſpiſer of fortune; and he is fit to beat the 'ſcholaſtics at their own weapons, which he under'ſtands perfectly well.' And indeed he has given an eſſay of his abilities in this way. He was undoubtedly one of the moſt learned men of his age; ſome have affected to make him and Budæus and Eraſmus the triumvir, as it were, in the then republic of letters. They aſcribed to each thoſe peculiar qualities in which they ſuppoſed each to excel, as wit to Budæus, eloquence to Eraſmus, judgment to Vives, and learning to them all. But Du Pin does not approve of this diviſion: 'Eraſmus,' he ſays, 'was doubtleſs a man 'of a finer wit, more extenſive learning, and of a 'more ſolid judgment than Vives; Budæus had more 'ſkill in the languages and in profane learning than 'either of them; and Vives excelled in grammar, 'rhetoric, and logic.' But however Du Pin may ſeem to degrade Vives upon the compariſon with Eraſmus and Budæus, yet he has not been backward in doing juſtice to his real merit. 'Vives,' ſays he, 'was not 'only excellent in polite letters, a judicious critic year on the 6th of May he received two grants of an extraordinary power in reſpect to Letters Patent under the Great Seal [*O*]; and in October following he was conſtituted Bailiff of the honour of Cheſhunt in Hertfordſhire. On the 3d of Auguſt preceding the Pope had granted him the adminiſtration of the Biſhoprick of Bath and Wells, the temporalities of which ſee he received from the King the ſame month. The Cardinal was very inſtrumental in procuring the eſtabliſhment of the College of Phyſicians this year [*P*]. In 1519 he erected a Legantine court at Weſtminſter, and behaved in ſuch an arbitrary manner therein, as is condemned both by the Lord Herbert, and Mr Collier; and Polydore Virgil complaining of it to the King, his Majeſty gave him a check for it *(l)*: however, in reforming the abuſes among the clergy, he is commended. He likewiſe received the ſons of ſeveral noblemen and gentlemen into his family for education, and made George Cavendiſh of Suffolk his gentleman uſher. The whole regulation of the interview between the two kings of England and France this year was entruſted to his appointment by both thoſe ſovereign princes. On the 29th of July 1520 the Pope granted him a penſion of two thouſand ducats upon the biſhopric of Placentia, and conſtituted him perpetual adminiſtrator of the ſee of Badajos, without prejudice to what he had or ſhould have for the future. This year an account was alſo taken by his order of the ſeveral pariſhes in England [*Q*]. In the beginning of the year 1521 he procured Luther's doctrine to be condemned in an aſſembly of divines held at his own houſe for that purpoſe [*R*]. On the 7th of December the ſame year the temporalities of the rich abbey of

(l) See an account of the proceedings in this court in Remark [*L*].

‘ and an eminent philoſopher; but he applied himſelf alſo to divinity, and was ſucceſsful in it. If the critics admire his books *De cauſis corruptarum artium*, and *De tradendis diſciplinis*, on account of the profane learning that appears in them, and the ſolidity of his judgment in thoſe matters, the divines ought no leſs to eſteem his books *De veritate fidei Chriſtianæ*, and his commentary upon St Auguſtine *De civitate Dei*; in which he ſhewed that he underſtood his religion thoroughly (21).' The characters of theſe ſeveral lecturers are therefore drawn more at length, as being ſo many conſpicuous proofs of the founder's care and concern for the uſefulneſs of his benefaction in particular, as well as inſtances of that encouragement to learning in general, of which he is univerſally allowed to have been a promoter. And in that ſpirit, at the ſame time that he declared to the univerſity his intention of founding theſe lectures, he concluded his ſpeech with his deſire of having their ſtatutes reduced to a better form; to which he received a moſt reſpectful anſwer; and letters were directed to Archbiſhop Warham, their Chancellor, upon it. The Archbiſhop was then in the univerſity, and returned an anſwer, applauding the Cardinal's overtures for founding new lectures, but diſſented from his propoſal relating to the reformation of their ſtatutes; which anſwer being no way pleaſing to the univerſity, they renewed their application to him; whereupon he complied with their requeſt, and on the 1ſt of June, in a full convocation, an ample decrèe was paſſed, that the ſtatutes of the univerſity ſhould be put into the Cardinal's hands to be completed, reformed, changed, or expunged, as he in his diſcretion ſhould think proper. However, this deſign was never carried into execution, though the Cardinal obtained ſeveral privileges and immunities for them; all which they enjoy to this day, except one, of exempting them from a public tax, which was infringed in King William's time, by comprehending them in the land and malt-tax. After all, it is natural to aſk, concerning the Cardinal's lectures, what is become of theſe noble and truly valuable foundations? to which we have the following anſwer; ‘ They are now, alas,' ſays Dr Fiddes (22), ‘ no where to be found, nor ſo much as the ruins or any ſcattered remains of them, unleſs in the hands of thoſe perſons to whom the profit was leaſt intended by the Founder. In ſhort,' continues this writer, ‘ they were ſwallowed up in the ruins of that great man, and in the devaſtation which after his fall was made of things appropriated to pious uſes. Whence it appears, that whatever ſalaries he paid theſe lecturers, yet he never ſettled any eſtate upon the lectureſhips by deed; which perhaps was obſerved by Archbiſhop Laud, who happily by ſuch a deed preſerved his Arabic lecture from falling a ſacrifice.'

(21) Du Pin's Bibliothec. Eccleſ. Antiq. 16. century.

(22) Ch. xxvi. book ii.

[*O*] *Extraordinary letters patents.*] Theſe were dated May the 6th. In the firſt he was impowered to grant letters patents of denizon to be made out under the great ſeal to ſuch perſon or perſons as ſhould at any time ſue to him for the ſame, without any other warrant. In the other he is authorized to make out letters patents under the great ſeal, of all congé d'elires, royal aſſents, and reſtitutions of temporalities as well of archbpricks, monaſteries, abbeys, priories, as of all other religious houſes within the King's realm of England and Wales, and the marches of the ſame, to ſuch perſons as ſhould afterwards in due form ſue for the ſame; and that by virtue of the ſame powers, the Cardinal ſhould cauſe from time to time to be made out commiſſions, and writs of *dedimus poteſtatem*, to ſuch as ſhould think convenient, to take the homages and fealty of all manner of perſons, as well Archbiſhops and Biſhops as other perſons, due unto the crown for the ſaid temporalities.

[*P*] *The college of phyſicians in London.*] This appears from the preamble to their original charter, which in Engliſh runs thus: ‘ Whereas we judge it the duty of our kingly office to conſult the happineſs of our people, firſt, by ſeaſonably putting a ſtop to the endeavours of the wicked; we have thought it neceſſary to check the boldneſs of thoſe unſkilful men, who profeſs phyſic more out of avarice, than any confidence of a ſafe conſcience, to the great damage of the ignorant and credulous people.

‘ Wherefore imitating in part the example of well regulated cities in Italy and ſeveral other nations, and partly moved thereto by the earneſt requeſt of the following grave and learned men, Thomas Linacre and Ferdinand de Victoria, our phyſicians; Nicholas Halſewel, John Francis, and Robert Yaxley, phyſicians; but chiefly by the moſt reverend Father in Chriſt, Lord Thomas, Cardinal Prieſt of the holy church of Rome, with the title of St Cecile beyond the Tiber, Archbp of York, and of our kingdom of England our moſt dear chancellor; We will and command that a perpetual college be founded for grave and learned men publicly to practiſe phyſic in our ſaid city and the ſuburbs thereof, and ſix miles round it, &c. (23)' In memorial of this favour the college have placed a fine picture of the Cardinal next to that of his Majeſty, done by Hans Holben; and to the liſt of their benefactors, next to the article relating to the King, is the following, *Cardinalis Wolſeius, Archiepiſcopus Eboracenſis, apud Regem Hen. VIII. diligenter interceſſit ad collegium fundendum.*

(23) A copy of the original Latin may be ſeen in Goodall's Royal College of Phyſicians, p. 6. & ſeqq. Edit. 1684. 4to.

[*Q*] *An account of the pariſhes in England.*] By this account there appeared to be 9407 churches; but Biſhop Gibſon obſerves, that there were, in his time, no more than 9282. ‘ I know not,' ſays he, ‘ how this difference ſhould ariſe, unleſs it be, that ſome were demoliſhed in the laſt ages, and that chapels parochial were omitted (24).'

(24) Gibſon's Camden.

[*R*] *He procured Luther's doctrine to be condemned, &c.*] He alſo publiſhed Pope Leo's bull againſt Luther, and ordered it to be every where publiſhed. He likewiſe required all perſons, under pain of excommunication, to bring in all Luther's books that were in their hands. He enumerated forty two of Luther's errors. ‘ This,' ſays Biſhop Burnet (25), ‘ ſhews the apprehenſions they were under of the ſpreading of Luther's books and doctrine. All people were ſo ſenſible at this time of the corruptions, that every motion towards a reformation was readily hearkened to every where. Corruption was the common

(25) Hiſt. of the Reformation, b. 3. p. 25.

St Albans was veſted in him [*S*]. This year he attended the Queen on a viſit which her Majeſty made to Cambridge, of which univerſity he had been choſen Chancellor in 1514 upon the reſignation of Fiſher Biſhop of Rocheſter, who had been elected into that dignity for life. Wolſey accepted the choice by a letter dated June the 2d that year, and held the place till a little before his death, when he was ſucceeded by Thomas Lord Cromwell. Soon after his return from Cambridge, he went abroad in the character of the King's Lieutenant [*T*]. The ſame year he received a new bull, prolonging his Legantineſhip, for two years after another bull, which had greatly enlarged his power [*U*], from Pope Leo X.: Upon whoſe demiſe, December this year, 1521, he ſtood candidate for the papal chair in 1522, and ſent Dr Pace, Dean of St Paul's, to manage that affair; but Adrian was choſen before the Dean arrived at Rome. However, the ſame year, the Emperor ſettled a penſion upon him of nine thouſand crowns of gold; and Dr Ruthal, Biſhop of Durham, dying next year, 1523, he was made Biſhop of that ſee [*W*]; upon which he reſigned the adminiſtration of Bath and Wells. The ſame year he iſſued a mandate to remove the Convocation of the province of Canterbury from St Paul's to Weſt-

'ſubject of complaint, and in the commiſſion given 'to thoſe whom the King ſent to repreſent himſelf 'and his church in the council of Lateran, *the reformation of the head and members* is mentioned as that 'which was expected from that council. This was 'ſo much at that time in all mens mouths, that one 'of the beſt men in that age, Colet, Dean of St 'Paul's, being to open the convocation with a ſermon, made that the ſubject of it all.' The council of Conſtance begun in 1512 and ended in 1517. The Cardinal was then in the height of his power and favour with the King, and therefore no doubt adviſed this reformation of the head and members. His averſion and contempt of the Monks on account of their ignorance and corruption is notorious; yet we do not find that he ever proceeded to perſecution againſt them. It cannot be denied, that his ſpirit was not of that kind. One article of his impeachment is, that he was remiſs in hunting and puniſhing heretics, and rather diſpoſed to ſcreen them, by means of which connivance Lutheraniſm had got ground; this is obſerved by his apologiſt Fiddes (25), and in reality is one of the moſt favourable things that can be ſaid for him.

[*S*] *The rich Abbey of St Albans was veſted in him.*] It is not known when he was firſt appointed Abbot. Some have thought it was in 1516; it is certain that he had it in 1518, ſince by the patent for granting him the temporalities of the See of Bath and Wells, dated the 28th of Auguſt that year, he has liberty of holding the ſame ſee with the Abbotſhip of St Albans and other eccleſiaſtical livings in commendam with York.—— Thoſe who have ſaid he was deprived of this abbey by præmunire, ſeem to be miſtaken; ſince from a manuſcript of St Albans in the archdeacon's office of inſtitutions there appears one William Wakefield inducted the 9th of September 1530, into the vicarage of St Peters in the town of St Albans by the Cardinal's licence and authority; and this was not long before his death. However, there can be no doubt but he was by the præmunire deprived of the temporalities, though not of the ſpiritualities (26).

[*T*] *He went abroad in the character of the King's Lieutenant.*] Cavendiſh, who gives a particular detail of this promotion, tells us, among other things, that juſt before his departure from Calais, he ſummoned his train, and made a ſpeech to them to be very careful of behaving to him as the King's Lieutenant with the exacteſt reverence in reſpect to his maſter's honour before the Frenchmen; and inſtructed them in the nature of the French, 'who,' ſays he, 'at their firſt 'meeting will be as familiar with you, as if they had 'known you by long acquaintance, and will commune with you in the French tongue, as if you knew 'every word; therefore uſe them in a kind manner, 'and be as familiar with them as they are with you. 'If they ſpeak to you in their native tongue, ſpeak to 'them in Engliſh; for if you underſtand not them, no 'more ſhall they you.' Then turning to one of the gentlemen who was a Welſhman, '*Rice*,' quoth he merrily, '*ſpeak thou Welſh to them, and doubt not but 'thy ſpeech will be more difficult to them, than their 'French ſhall be to thee* (27).'

[*U*] *Another bull which greatly enlarged his power.*] By this bull he was empowered to make fifty Knights, fifty Counts Palatine, and as many Acolites and Chaplains, forty Notaries apoſtolic, who ſhould have the ſame privileges as thoſe had that were made by the Pope, to legitimate baſtards, give degrees by acts of law, phyſic, and divinity, and grant all ſorts of diſpenſations (29).

[*W*] *Upon the death of Dr Ruthal, he was made Biſhop of Durham.*] Biſhop Ruthal was born at Cirenceſter in Glouceſterſhire, where he founded a free ſchool, giving a houſe and ſeven pounds a year for the maintenance of a maſter. Though he was bred at Oxford, and took his degree there of D. D. yet being incorporated to that degree at Cambridge in 1500, he was elected Chancellor of that univerſity in 1503, (30) being then Archdeacon of Glouceſter. In the beginning of September 1505 he was made Dean of Saliſbury. He was eſteemed a very learned and experienced gentleman in political affairs, and was made ſecretary to Henry VII. who, a little before his death, nominated him to the ſee of Durham upon the tranſlation of Bainbridge to York, and made him a privy counſellor, and he was continued both Secretary and privy counſellor to Henry VIII. who confirmed his father's nomination of him to Durham, to which ſee being elected, the temporalities were reſtored to him, 3d July 1 Henry VIII. A. D. 1509. He was afterwards made Lord Privy Seal, and was eſteemed to be admirably well read in both the laws. He died in February 1522-3, and was buried in St John Baptiſt's chapel in Weſtminſter Abbey. He is ſaid to have been a munificent benefactor to the palace of Aukland, belonging to his ſee, by Godwin (31), who relates the following remarkable ſtory of him, which as it concerns our Cardinal, is the reaſon of giving this ſuccinct account of him.— He was deſired, ſays Godwin, by Henry VIII. to write his opinion of the ſtate of the kingdom in general, and more eſpecially that part of it which more immediately concerned the crown. The Biſhop executed the King's command, wrote his opinion in a fair hand, and bound it up in a volume. As he was thus employed at the King's inſtance to ſtate the condition of the kingdom, he bethought himſelf of looking into the ſtate of his own concerns, and got a ſecond volume bound up in the ſame manner as the firſt, wherein he wrote an exact inventory of all his eſtates both real and perſonal, which, it is ſaid, amounted to no leſs a ſum than 100000 l. ſterling. The King ſent to him for his book, which his Majeſty was very impatient to ſee. But by a fatal miſtake he delivered the book containing the inventory of his own eſtate, inſtead of that he had written by the King's order. Wolſey carried the book to the King, and told his Majeſty, that though he would not meet with the account he expected, yet he would find the particulars of Biſhop Ruthal's eſtate, and where to apply for money in caſe he wanted.—— Godwin obſerves, that the miſtake fell ſo heavy on the Biſhop's ſpirits, that it haſtened his death: and the miniſter's behaviour cannot by any means be defended, who evidently offered this ſacrifice to his own ends. It is not ſaid whether the King did take advantage of the information: 'but this,' ſays Dr Knight (32), 'we are ſure of, that not a great while 'after, in the ſame net that the Cardinal laid for others, 'were his own feet taken: for his whole ſubſtance, 'and the vaſt treaſure he had amaſſed together, 'were all ſeized for the King's uſe, and he himſelf 'died with grief.' A reflection, if not cruel in itſelf, yet unaptly on this occaſion obtruded, with an

Weſtminſter [*X*]. Upon the death of Pope Adrian in September this year, the Cardinal made freſh applications for the popedom, but met with a ſecond rebuff [*Y*]. Clement VII. of the houſe of Medici, was elected by the concurrence of the imperial party. Our Cardinal thereupon perceiving the inſincerity of the Emperor towards him, concluded that Prince would never ſecond his pretenſions to the papal chair. This was highly reſented by him as an injury; and he began from thence to eſtrange himſelf from the imperial court, and to pave the way for an union between his maſter and the French King. Mean while he diſſembled his reſentment; and after congratulating the new Pope upon his promotion, he applied for a continuation of the legantine power, which the two former Popes had conferred upon him. Clement knowing the importance of gaining his friendſhip, granted him a commiſſion for life, empowering him to viſit and reform religious houſes; ſo that by theſe and other unuſual acceſſion of powers he in a manner transferred to him the whole papal authority in England, and he was actually revered there as Pope (*m*). In 1525 he undertook the care of conducting a loan for his Majeſty's ſervice, which gave great offence to the nation [*Z*]. The ſame year the Cardinal ſent

Dr

injudicious inſinuation of its being an inſtance of the divine *Nemeſis*. The Doctor could not find that the King made any uſe of the information; the faireſt inference from whence is, that it was not given with any malevolent deſign, eſpecially if we conſider the Cardinal's influence over his Majeſty at that time.— Better is the remark made upon it by Mr Jortin, though no friend to the Cardinal's memory, in theſe words: ‘ Whilſt we deteſt,’ ſays he, ‘ the treachery of the Cardinal, we cannot afford much pity to the Biſhop with his hundred thouſand pounds. If he had made a wiſe uſe of them like Archbiſhop Warham, who had the honour and the glory to live and die poor, they would have been beyond the reach of the King and Cardinal,

‘ *Extra fortunam eſt quicquid donatur amicis,*
‘ *Quas dederis ſolas ſemper habebis opes.*

‘ Even a pagan could ſay this (33).’

(33) Jortin's Life of Eraſmus, vol. I. p. 472.

[*X*] *He iſſued a mandate to remove the convocation, &c.*] 'Tis ſaid, that by his legatine power he firſt removed the convocation, held at St Paul's at the Archbiſhop of Canterbury's call, and called the Archbiſhop and clergy to meet at Weſtminſter, a ſight never before ſeen in England. Upon which Skelton the poet made this diſtich,

Gentle Paul, lay down thy ſword,
For Peter of Weſtminſter hath ſhaved thy beard.

And Dr Fiddes obſerves (34), that this was thought ſo ſingular a ſtep, that it would render all the proceedings of the aſſembly invalid, wherefore they did not ſit many days before they returned to St Paul's. Archbiſhop Parker (35) repreſents this fact not only as without a precedent, but alſo as importing a crime of a moſt enormous nature; *inauditi exempli flagitium* are his words. This cenſure, ſays Dr Fiddes (36), might have been expreſſed in gentler terms; for that the cardinal had thought himſelf really inveſted with the power which he pretended to exerciſe, or deſired to exerciſe, judging, that in ſuch a character he ſhould be more able at the head of the convocation to do the King greater ſervice in managing for the ſupply. After which the Doctor concludes this extraordinary remark in the following words. ‘ It having,’ ſays he, ‘ been agreed on all hands, that Wolſey as Archbiſhop had no ſeat in the convocation ſummoned by Warham, though it is urged by ſome, that he might have ſat there as Abbot of St Albans.’ Both the pleas here alledged by the Doctor are inexcuſable, and the latter deteſtable, being grounded on a conceſſion of that abandoned ſpirit which has marked out the Cardinal ever ſince as a flagrant pattern of a wicked miniſter, ready to ſacrifice every thing to the will of the ſovereign. We muſt own this is more like the orator at the bar pleading for his client, than of the judicious panegyriſt. The impotence and futility of his words renders the Cardinal more conſpicuouſly odious, and himſelf contemptible. The following letter to a noble lord gives a good idea of what was talked of this ſtep of Wolſey's at that time. Having given his lordſhip an account of the method of carrying the loan in the houſe of commons, he proceeds thus: ‘ Alſo in the convocation among the prieſts the day of their appearance, as ſoon as maſs of the Holy Ghoſt at Paul's was done, my Lord Cardinal cited them to appear before his convocation at Weſtminſter, which they did, and there was another maſs of the Holy Ghoſt; and within ſix or ſeven days the prieſts proved, that all my Lord Cardinal's convocation ſhould do, would be void, becauſe their ſummons was to appear before my Lord of Canterbury; which thing ſo eſpied, my Lord Cardinal hath addreſſed a new citation into every country, commanding the prieſts to appear before him eight days after the aſcenſion: and then I think they ſhall have a third maſs of the Holy Ghoſt. I pray God the Holy Ghoſt be among them and us both. I do tremble to remember the end of all theſe high and new enterprizes; for oftentimes it hath been ſeen, that to a new enterprize there followeth a new manner and ſtrange ſequel. God of his mercy ſend his grace unto ſuch new faſhions, that it may be for the beſt (37).’

[*Y*] *He met with a ſecond rebuff.*] On this occaſion his agents were Dr Tho. Hannibal and John Clerk, the King's orators at Rome, who ſent him an account of the reaſons alledged againſt his election: That he would never go to Rome in perſon: that he was *nimis potens*, too powerful, and that he was not old enough, (38) reaſons which demonſtrate nothing ſo much as they do the ſuperiority of his competitor's intereſt in the conclave. The Cardinal was greatly mortified by this ſecond diſappointment, inſomuch that imputing it to the remiſſneſs of Dean Pace, who was Ambaſſador at Venice, he never forgave him, as we have already obſerved (39).

(39) In Remark [*C*] under Cardinal Pole's article, vol. v. p. 3386.

[*Z*] *A loan for his Majeſty's ſervice.*] In the execution of it he begun with the convocation, in hopes their example would influence the parliament to give a large ſupply. He demanded a moiety of their eccleſiaſtical revenues, to be paid in five years, viz. two ſhillings in the pound for five years, and obtained it, though not without ſome difficulty. Afterwards he went, attended by ſeveral of the nobility and prelates to the houſe of commons, and in a long and elaborate ſpeech laid before them the public neceſſity, the danger of an invaſion from Scotland, the affronts received from France, the league in which the King was engaged with the Pope and the Emperor, and he demanded a grant of 800,000l. divided into four yearly payments, a ſum computed from the late ſurvey or valuation to be equivalent to 4s. in the pound of one year's revenue, or 1s. in the pound yearly according to the diviſion propoſed; ſo large a grant was unuſual from the commons, and though the extraordinary demand was ſeconded by Sir T. More the Speaker, and ſeveral other members attached to the court, the houſe could not be prevailed with to comply; they voted only 2s. in the pound on all poſſeſſed of 20l. per annum and upwards, and 1s. on all poſſeſſed of 40s. a year, and on all the reſt of the ſubjects above 16 years of age a groat a head. This laſt ſum was divided into two yearly payments, the former into four yearly payments, and was not therefore at the utmoſt above 6d. in the pound. The grant of the commons was about the moiety of the ſum demanded, and the Cardinal therefore, much mortified with the diſappointment, came again to the houſe, and deſired to reaſon with ſuch as refuſed to comply with the King's requeſt. He was told, that it was the rule of the houſe never to reaſon, but among themſelves, and his deſire was rejected. The commons however enlarged a little their former grant, and voted an impoſition of 3s. a pound on all poſſeſſed of

50l.

Dr Longland, Biſhop of Lincoln, to Oxford, to acquaint that univerſity with his reſolution to found a college there. In 1527 he went Ambaſſador to France, and obtained a commiſſion empowering the Maſter of the Rolls to hear cauſes in Chancery in his abſence [*AA*]. After his return home he was conſtituted the Pope's Vicar General. The ſame
